But is there really a Shakespearian metaphysic for comedy, and can Feste actually be its spokesman? And doesn't the mere suggestion that there might be one trigger the warning that whatever Shakespeare's comedies are about, they are not dramatizations of philosophical systems? Are they not, as representative critics insist, just exuberant expressions of the here and now, of the saturnalian claims of life, of love and its fulfillment? Shakespeare is, of course, extolling all these things; hence the difficulty of interpreting the comedies by means of any one critical standard. But it may be that by seeking some broad conceptual base we can discover a critical stance that permits us to do justice to at least the major comedies as a group—to their joyous acceptance of life and love, their social satire, their low comedy characters who are always more than mere clowns, their poignant songs that are always more than mere embellishments to the action, and their breathless cascades of wit that are surely something more than mere witticisms. What fashions these disparate elements into obvious comic wholes if it is not some philosophic vision pervasive through them all, something which Shakespeare was gradually coming to understand during the 1590's? And if there is such a vision—skeptics will assert at once that there is not—might it not be discoverable in Twelfth Night, the one comedy in which everyone agrees that Shakespeare recombines into a subtler, almost perfect whole everything (plot devices, character types, themes) to be found in more diluted combinations in the earlier comedies?

By its very nature the search I am undertaking in this essay will lead far into the critical area called by John Russell Brown that of the "implicit judgment." For what I am suggesting is that through Feste Shakespeare is concerning himself in a teasing, yet finally serious way with the ontological postulates affirmed by Parmenides in his insistence upon the irreconcilable difference between "what is" and "what is not," and is
implying a somewhat whimsical, but nevertheless penetrating criticism of it. Whether Shakespeare had any knowledge of the fragments of Parmenides's poem, Nature, I shall defer till the end of this essay, meanwhile citing and commenting upon the curious parallels between several of Feste's most cryptic statements and their counterparts in Parmenides.

I approach this possibility primarily in the spirit of play, on the assumption that without damaging the judgment we can, like equilibrists, balance these parallels against each other for a while and speculate about whether by means of them a rounded interpretation of Twelfth Night might not be possible. And if by this means light can be shed upon odd corners of the play usually bypassed by critics, it may then be profitable to turn to the historical issue—could Shakespeare have known anything about Parmenides, and if so, what?—and debate it tranquilly. And then could we not conclude, if only tentatively, that there is a metaphysical basis for Shakespearian comedy—even if Shakespeare had no knowledge of Parmenides whatsoever?

II

Of all Feste's ambiguous comments, three seem to me to be tinged with something I tend to call Parmenidean:

1. The most elusive (usually dismissed as nonsense by editors if they annotate it at all) occurs immediately prior to Feste's masquerade as Sir Topas, the curate: "for, as the old hermit of Prague, that never saw pen and ink, very wittily said to a niece of King Gorboduc, 'That that is is'; so I, being Master Parson, am Master Parson; for what is 'that' but that, and 'is' but is?"

   (IV.ii.14-19)

   ♦ Almost as puzzling is the second, which occurs when Feste confuses Sebastian for Cesario and exclaims: "No, I do not know you; nor I am not sent to you by my lady, to bid you come speak with her; nor your name is not Master Cesario; nor this is not my nose neither. Nothing that is so is so"

   (IV.i.5-9)

   ♦ The third occurs somewhat earlier, when to Viola's joshing comment that he is "a merry fellow and car'st for nothing," Feste replies: "Not so, sir; I do care for something; but in my conscience, sir I do not care for you. If that be to care for nothing, sir, I would it would make you invisible" (III.i.30-35). And a few lines later Feste declares: "I am indeed not her [Olivia's] fool, but her corrupter of words"

   (III.i.40-41)

When we place these passages, especially the first two, against one of the key passages from the first part of the body of Parmenides's poem, often called the Way of Truth, we find an odd correspondence:

Come now and I will tell thee—listen and lay my word to heart—the only ways of inquiry that are to be thought of: one, that [That which is] is, and it is impossible for it not to be, is the Way of Persuasion, for Persuasion attends on Truth.

Another, that It is not, and must needs not be—this I tell thee is a path that is utterly undiscernible: for thou couldst not know that which is not—for that is impossible—nor utter it.

For it is the same thing that can be thought and that can be.
What can be spoken of and thought must be: for it is possible for it to be, but it is not possible for "nothing" to be. These things I bid thee ponder; for this is the first Way of inquiry from which I hold thee back.\(^7\)

The verbal parallels should be obvious between Feste's "that that is is" and Parmenides's "[That which is] is" in the first verse-paragraph; though perhaps I should state flatly that Feste's second comment, "Nothing that is so is so" I see as parallel to Parmenides's assertions in the second and fourth verse-paragraphs that not-being, or nothing, cannot be known. These assertions are also relevant to Feste's insistence in the third comment that he does care for "something"—"something" (left undefined) being balanced against "nothing" and "invisible."

But it is one thing to point out corresponding passages and another to interpret them; and since Parmenides's poem is not always immediately comprehensible to lay readers, it may not be amiss to quote at some length from F. M. Cornford's interpretation:

This first way of untruth directly contradicts the Way of Truth. The starting-point of the true Way is: That which is is, and cannot not-be. The starting-point of this false way is: That which is, is not, and must not-be, or It is possible for 'nothing' to be. Here is a flat contradiction; one or other of the starting-points must be completely dismissed before we can advance a step in any direction. The goddess accordingly condemns the false Way as 'utterly undiscernible': a Way starting from nonentity lies in total darkness and cannot be followed to any conclusions whatsoever....

No advance can be made from the premise that all that exists was once in a state of non-existence, or that nonentity can exist.... Thought cannot pursue such a Way at all; there is no being for thought to think of or for language to describe significantly. This impassible Way may be called, for distinction, the Way of Notbeing. It is dismissed, once for all, in the above fragments.\(^8\)

In short, Parmenides is drawing an absolute distinction between an intelligible world ("that which is, is") comprehensible to the mind and therefore called the Way of Truth, and its opposite ("that which is, is not"), totally incomprehensible to the mind and therefore logically absurd.

"But," Parmenides continues,

secondly (I hold thee back) from the Way whereon mortals who know nothing wander, two-headed; for perplexity guides the wandering thought in their breasts, and they are borne along, both deaf and blind, bemused, as undiscerning hordes, who have determined to believe that it is and it is not, the same and not the same, and for whom there is a way of all things that turns back upon itself.

For never shall this be proved; that things that are not are; but do thou hold back thy thought from this Way of inquiry, nor let custom that comes of much experience force thee to cast along this Way an aimless eye and a droning ear and tongue, but judge by reasoning the much-debated proof I utter.\(^9\)

Cornford's explanation:

I have called this second way of untruth the 'Way of Seeming' ... because 'opinions' or 'beliefs' is too narrow a rendering. 'What seems to mortals' ... includes (a) what seems real or appears to the senses; (b) what seems true, what all men, misled by the senses, believe and the dogmas taught by philosophers and poets on the same basis; and (c) what has seemed right to
men,… the decision they have 'laid down' to recognize appearances and the beliefs founded on mem in the conventional institution of language.…

Parmenides means that all men—common men and philosophers alike—are agreed to believe in the reality of the world our senses seem to show us. The premise they start from is neither the recognition of the One Being only (from which follows the Way of Truth and nothing more) nor the recognition of an original state of sheer nothingness (which would lead to the impassable Way of Not-being). What mortals do in fact accept as real and ultimate is a world of diversity, in which things 'both are and are not,' passing from non-existence to existence and back again in becoming and perishing, and from being this ('the same') to being something else ('not the same') in change.10

Whatever these passages from Parmenides and Cornford may lead to, it should at least be clear that Feste's ambiguous statements, cited earlier, ought not to be brushed aside as mere nonsense. Here we have, tucked into contexts tricked out as the usual pattern of the professional stage fool, statements that apparently do more than echo Parmenides (as we shall see shortly). And they are just the sort of metaphysical statements suitable to a play whose plot depends upon the confusions generated by self-deception, physical and psychological disguise, and mistaken identity—confusions that gradually become worse confounded until the shrewder characters begin to make sharp distinctions between "what is" and "what appears to be." But the critical problem itself is initially one of tone. Is Shakespeare mocking philosophical hair-splitting, or is he getting down to substantial metaphysical assumptions by adopting an oblique approach calculated not to disrupt the genial comic mood that pervades every scene? Or to put the question another way, is Feste in the most literal sense only a "corrupter of words," a clever professional entertainer acquainted only by hearsay with the philosophical slogans and catchwords of the age?

Persuasive answers to these questions depend upon the meanings implicit in Feste's statements and the degree to which they illuminate major themes. First: "'That that is is'; so I, being Master Parson, am Master Parson; for what is 'that' but that, and 'is' but is?" On the simplest level Feste is suggesting here the difference between what is indubitably real and what only appears to be so. Though dressed as Sir Topas, he is not really Sir Topas, either to Maria, Sir Toby, or himself, since all three know his real identity. Nevertheless he is "really" Sir Topas to Malvolio as long as he can play the role imaginatively enough for Malvolio to accept him as such. And this Malvolio does, partly because he cannot see Feste, partly because he is too confused, owing to the imputation of madness, to penetrate Feste's vocal disguise, and partly because, owing to delusions about himself (his own reality), he is incapable of recognizing reality of any sort. But the problem is more complex than this. There is the provocative possibility, as Feste hints, that so long as one plays a role to perfection, one is the role one plays: the mask one assumes can become oneself. But in this case "that" (one's former self) is no longer "that," but has become "this" (one's present self), so that "is" may not necessarily always be "is." Contrary to Parmenides's conviction, "the same" may not be easily distinguishable even on purely logical grounds from "not the same." And so appearance seems to possess some measure of reality.

But as Feste knows very well, he is not Master Parson. He is himself, a concrete entity that unquestionably is and about whom he can think clearly so long as he avoids self-delusion and is on guard against possible false appraisals of what is real. Such mistakes are common enough unless one evaluates sensory data according to rigorous logical standards. For though the effort to determine what "that that is" actually "is" may lead to bewilderment, nevertheless "that that is." In sum, Shakespeare through Feste is suggesting obliquely both the strength of Parmenides's metaphysics, the need for absolute definition of the real; and its weakness, Parmenides's failure to credit the world of sensible objects with any reality whatsoever.

In addition, Feste is implicitly exposing the ambiguity of basing a metaphysic upon the meaning of the verb "to be." Unhappily, "to be" has three general meanings that breed confusion of thought by their tendency to elide into each other. (1) Identification—i.e., Feste can be named and thus is knowable in Parmenides's terms.
The existential—i.e., Feste "is," or has being, and so is again available to cognition. And (3) the copulative—i.e., Feste is equivalent to himself, yet paradoxically can assert, "so I, being Master Parson, am Master Parson." But as the ensuing scene with Malvolio demonstrates, all three definitions point to involvement in the world of sensible, as well as of intelligible data, so that appearance cannot always be readily differentiated from reality (as Plato revealed to the disadvantage of Parmenides's system).11

The ambiguity implicit in "to be" is even more glaring in Feste's mistaken identification of Sebastian for Cesario: "No, I do not know you; nor I am not sent to you by my lady, to bid you come speak with her; nor your name is not Master Cesario; nor this is not my nose neither. Nothing that is so is so." Here Feste's position is reversed from what it is in the preceding instance. Not in control of all the facts, he is obliged like Malvolio to rely upon sensory impressions for the determination of what is real. Yet he has two advantages over Malvolio. He need not doubt his own sanity, nor is he suffering from self-delusion. It is noticeable that he depends, if only negatively, upon the meaning of "to be" as identification ("nor your name is not Master Cesario") and as the existential ("nor this is not my nose neither"). Sight is misleading him, but touch and his full awareness of his own body are not. He can therefore conclude, both logically and illogically (as well as ironically), that "nothing that is so is so." He can argue correctly by analogy that if his nose is still his nose, Cesario must still be Cesario (and can thus be named), not somebody else—and yet incorrectly, since Sebastian is not Cesario.

Furthermore, Feste's "nothing that is so is so" is curiously reminiscent of Parmenides's (1) "It is not, and must needs not be" (explicated by Cornford as "That which is, is not, and must not-be"), and (2) Parmenides's "it is and it is not, the same and not the same." Feste, then, in his confusion, yet in his certainty that he is right, is unwittingly undermining, we might say, the very keystone of Parmenides's metaphysic. By relying upon sensory evidence and past experience, the only raw materials for cognition he now possesses, Feste is pursuing the Way of Seeming; and to the degree that this Way supports his sound conclusion that his nose is his nose, the weakness of Parmenides's proposition that the Way of Seeming is a totally false way is strongly implied. But to the degree that sensory evidence and past experience lead Feste, however naturally, to a false conclusion, Parmenides's dogmatic dismissal of the Way of Seeming and his equally dogmatic insistence upon the Way of Truth as the only true way are affirmed.12 "That that is is." Sebastian is plainly something, not nothing; yet just as plainly neither sensory evidence alone nor sound logic will ever lead to defining or naming correctly what and who he is. The unreliability of sensory data is further emphasized in the immediate and similar misapprehension of Sebastian's identity by Sir Toby, Sir Andrew, and Fabian, so that Sebastian begins to question the sanity of everyone in Illyria: "Are all the people mad?" (V.i.29)—a copulative use of "to be."

On the other hand, the conclusion is implied that nothing can come from nothing, a solidly Parmenidean doctrine. Thus it can be assumed that when Feste informs Viola he does "care for something," in reply to her good-natured assertion that he is a "merry fellow and car'st for nothing," he means what he says. What that something is can be conjectured after the remainder of his reply has been interpreted: "but in my conscience, sir, I do not care for you. If that be to care for nothing, sir, I would it would make you invisible." Kittredge's gloss seems only a good try: "to care for something is the same as not to care for nothing; then perhaps the fact that I do not care for you makes you equivalent to nothing; and, in that case, I wish you might be actually nothing, and so—invisible."13 In the light of Parmenides's views upon nothing, a considerably more acute interpretation is possible.

To quote again from Cornford's analysis of the second passage from Parmenides: "No advance can be made from the premise that all that exists was once in a state of non-existence, or that nonentity can exist.... Thought cannot pursue such a Way at all; there is no being for thought to think of or for language to describe significantly."14 Feste's rejoinder to Viola (phrased conditionally, be it noted) seems, then, to imply the Parmenidean doctrine of the non-existence of nothing and the consequent existence of something. To care for nothing would be tantamount to believing that nothing "is," and this would be a palpable absurdity. In such a
case, Viola would indeed be invisible, just as is nothing. It would be impossible to think or say anything about Viola that would make logical sense. Feste would then be, what he knows he is not, a "corrupter of words."

But to care for something is to possess values, to be engaged in ethical measurements—to care for what is true. And this means to care for what is real, since, though in an ontological sense reality can be limited only to "what is," in an ethical sense it can be extended to cover "what ought to be" or "what is best," as Plato very well understood. When Feste insists that he does care for something, he means in all likelihood that he cares for reality in both these senses. What that something is, is the sum total of "what is" and "what ought to be" disclosed in the comic vision of life that is the play, and this vision is implied in Feste's ironic criticism of the false values of the various deluded characters. But this is to move from metaphysics to ethics, which Parmenides was scrupulous not to do, but which Shakespeare as a comic dramatist could not have avoided doing, had he been minded to.

III

Earlier I posed questions to which specific answers may now be offered. Let me repeat the questions here. "Is Shakespeare mocking philosophical hair-splitting, or is he getting down to substantial metaphysical assumptions by adopting an oblique approach calculated not to disrupt the genial comic mood that pervades every scene? Or to put the question another way, is Feste in the most literal sense only a 'corrupter of words,' a clever professional entertainer acquainted only by hearsay with the philosophical slogans and catch-words of the age?"

That Feste is not corrupting words, contrary to his own assertion, is evident throughout. Indeed, he implies broadly that the inhabitants of Illyria are the real corrupters of words. Early in the play he warns his auditors (and so us): "I wear not motley in my brain" (I.v.63); and midway in the play he points out the danger of mistaking words for things. (1) "A sentence is but a chev'ril glove to a good wit. How quickly the wrong side may be turn'd outward!" (III.i.13-15) (2) "But indeed words are very rascals since bonds disgrac'd them" (III.i.24-25). And (3) "Words are grown so false that I am loath to prove reason with them" (III.i.29-30). Are we not, then, committed to the working assumption that Feste's words are rich with implications, especially when he speaks most cryptically? For to be cryptic is not necessarily to be verbally corrupt.

It seems equally implausible to believe, after absorbing the range of implications in Feste's three "Parmenidean" statements, that Shakespeare's intention was to mock philosophical hair-splitting. Leaving aside the fact that this kind of mockery supplies only a limited comic mileage, one can remind one-self that all great comedy has for its raison d'être the exposure of the difference between "what is" and "what appears to be," both being balanced, however gingerly, against "what ought to be." That this touchy contrast and balance are fundamental to all Shakespearian comedy no one would deny. Is it, then, unreasonable to assume that in the substratum of his maturest comedy, the one immediately preceding the great tragedies, Shakespeare was speculating upon the nature of reality and dramatizing how difficult it is to be certain of any type of reality? Furthermore, the parallels with Parmenides are too pronounced (still leaving aside the historical problem) to be ignored. One is at least driven to wonder where Shakespeare came upon the most telling phrase of Eleatic philosophy, "that that is is," and why he placed it in Feste's dialogue just at the point in the play where appearance and reality are being thoroughly confused by all the characters, and even by Feste. One cannot assume that Shakespeare, by this time an accomplished dramatist, would have thrust in this puzzling statement only for obscurantist reasons or only because it was part of the verbal rag-tag of the 1590's, as of course it may have been. Lastly, the metaphysical issues I have been sketching in permeate the entire play.

It has never been commented upon, to my knowledge, that Twelfth Night is very liberally sprinkled with questions. Numbering slightly over 300, their greatest incidence is in those scenes in which misunderstandings grounded in self-delusion or mistaken identity are most prevalent. A fair number of questions simply promote plot movement or comic gags, but an impressively high total have to do with
identification and motive—with what is materially and non-materi ally real. In fact, the characteristic questions turn upon the verbs "to be" and "to will" (i.e., to want, desire, or intend), as in Olivia's pointed questioning of Viola: "What are you? What would you?" (I.v.228-229).

Shakespeare's iteration of this kind of questioning reaches into every cranny of the play and every question devolves upon the proposition, "that that is is," or upon modifications of it. Hence, though cataloguing is a weariness to the critical soul, I shall give typical examples in this and the following paragraph, which readers are at liberty to skip or skim. In I.ii, Viola asks about Orsino and Olivia: "What is his name?" (26) and "What's she?" (35). In I.iii, Sir Toby asks about the detractors of Sir Andrew: "Who are they?" (37). In I.v, Olivia asks about Cesario, before Viola's entrance: "What kind o' man is he?" (159); "What manner of man?" (161); "Of what personage and years is he?" (164); and to Viola: "Are you a comedian?" (194); and "What is your parentage?" (296)—all of them questions dealing with identification. In this same scene Viola begs Olivia to remove her veil, a typical Shakespearian symbol of appearance masking reality. In II.iii, Malvolio asks Feste, Sir Andrew, and Sir Toby: "My masters, are you mad? or what are you? Have you not wit, manners, nor honesty, but to gabble like tinkers at this time of night? … Is there no respect of place, persons, nor time in you?" (93-99). To which Sir Toby replies: "Art any more than a steward? Dost thou think, because thou art virtuous, there shall be no more cakes and ale?" (122-125), and later with respect to Malvolio he asks Maria: "What, for being a Puritan?" (155). And in II.v, Malvolio's soliloquy upon the identity of the intended recipient of the forged letter, supposedly written by Olivia, is entirely consonant with the implied self-questioning: "Am I he?"

In III.i, Viola asks Feste: "Art thou a churchman?" (4); "Art not thou the Lady Olivia's fool?" (36); and Olivia bluntly asks Viola: "What is your name?" (107). And when Olivia hints: "I would you were as I would have you be!" Viola asks in return: "Would it be better, madam, than I am?" (154-155). In III.iv, Olivia asks Malvolio a series of questions about his ludicrous behavior, among them: "Why, how dost thou, man? What is the matter with thee?" (26-27); "Why dost thou smile so, and kiss thy hand so oft?" (35-36); to which Maria adds: "Why appear you with this ridiculous boldness before my lady?" (40-41). Somewhat later Viola inquires about Sir Andrew: "What is he?" (256) and "What manner of man is he?" (288-289). Later yet Antonio is asked by Sir Toby: "Why, what are you?" (346). In IV.i, Sebastian wonders: "Are all the people mad?" (29) and shortly demands of Sir Toby: "What wouldst thou now?" (44). In IV.ii, all the questions Feste asks Malvolio concern the "is" and "is not" of his madness and culminate in: "But tell me true, are you not mad indeed? or do you but counterfeit?" (121-123). And in Act V the crucial questions follow the same pattern until mistakes have been rectified, true identities and motives have been confessed, and the need for such questions has disappeared.

The relevance of these questions to Feste's "that that is is" and "nothing that is so is so" hardly requires comment. Throughout the play one character after another attempts to ascertain the reality of other characters: their identity, their intentions, their beingness—so that disguise and mistaken identity are not mechanical plot devices, as in the early comedies, but are symbolic figurations of the metaphysical problems of "seeming" and "being." The difference between inner and outer, already symbolized in the caskets in The Merchant of Venice, is developed in Twelfth Night to apply fully to the "knot intrinsicate" of human personality and the difficulty of defining or describing it accurately, all of which is revealed in the various forms of self-deception of Orsino, Olivia, Malvolio, and Sir Andrew, and of the bafflement consequent upon the mask of appearance worn by many of the characters.

Viola's estimate of the Captain's character is an apt summary of the metaphysical and ethical situation: "And though that nature with a beauteous wall / Doth oft close in pollution, yet of thee / I will believe thou hast a mind that suits / With this thy fair and outward character" (I.ii.48-51). Indeed, the image of the beauteous wall incorporates both Parmenides's Way of Truth and Way of Seeming and makes concrete the ease with which "what appears" may be mistaken for "what is." Orsino and Olivia, handsome without, are sentimental within. Equally absurd discrepancies between "seeming" and "being" are burlesqued in the degraded gentility of Sir
Andrew and the social climbing of Malvolio. And in time the image of the wall is applied to Viola herself, when upbraided by Antonio in words that echo her own judgment of the Captain (III.iv.400-404).  

This image works its way through the play submerged in turns of phrase, often paradoxical, that bear down hard upon Feste's "that that is is." In I.v, Viola tells Olivia: "I am not that I play" (196-197); and "I see you what you are" (269). In II.ii, Viola's "as I am man" and "as I am woman" (37 and 39) further the ambiguity, along with Orsino's egotistical observation in II.iv: "For such as I am all true lovers are" (17). In II.v, Malvolio is ironically hidden in the forged letter "to insure thyself to what thou are like to be, cast thy humble slough and appear fresh" (160-162); and in III.i, Feste remarks to Viola: "Who you are and what you would are out of my welkin" (63-64). In the same scene Viola informs Olivia: "That you do think you are not what you are" (151) and "I am not what I am" (153). In III.iv, Sir Andrew addresses Viola in his insane letter of challenge: "Youth, whatsoever thou art, thou art but a scurvy fellow" (161-162); and in V.i, Olivia begs Viola, mistaking her for Sebastian: "Be that thou know'st thou art, and then thou art / As great as that thou fear'st" (152-153).

This long sequence of interrogative, declarative, and imperative statements hinging on "to be" and "to will" heads up in Orsino's amazed reaction to the sight of Viola and Sebastian in Act V: "One face, one voice, one habit, and two persons! / A natural perspective, that is and is not!" (223-224). Here the Way of Truth ("that that is is") and the Way of Seeming or Not-Being merge in as subtle a criticism of Parmenides's metaphysics as Plato's more elaborate study of it in the Parmenides and the Sophist. "[That which is] is, and it is impossible for it not to be" appears less contradictory to "It is not, and must needs not be" (and to Parmenides's contempt for the "undiscerning hordes, who have determined to believe that it is and it is not, the same and not the same") than Parmenides had supposed. Whether Orsino's ironic echoing of Parmenides be deliberate or not, it is surely significant in any summing up of Shakespeare's own thinking. For it now appears that "what is" and "what is not" are not by necessity mutually exclusive, however illogical this conclusion seemed to Parmenides.

But seemingly illogical conclusions need not be frightening so long as one faces squarely the possibility of deception and of lack of pertinent information, as Sebastian does in his soliloquy in III.iv. Here for the first time a character employs human reason as an instrument for probing beneath appearances. By carefully testing the reality of his situation through controlled analysis of the information provided by his senses of sight and touch, he concludes that his dream-like relationship with Olivia is not delusion. "For though my soul disputes well with my sense / That this may be some error, but no madness," he is still "ready to distrust mine eyes / And wrangle with my reason" on the supposition that either he or Olivia might be mad (III.iv.9-16). Percept is mingling here with concept, which is to say that either without the other has pronounced limitations.

Thus Shakespeare's conclusion appears to be that to reach trustworthy conclusions about "seeming" and "being," neither logic alone (Parmenides's Way of Truth) nor thoughtless faith in the senses (Parmenides's Way of Seeming) are entirely reliable. They can be either singly or mutually misleading. In a play as steeped in deception and self-deception as Twelfth Night such a conclusion is, of course, rich in implications, especially when extended into value judgments. For just as "seeming" and "being" need to be distinguished between in matters of identification and of existential and copulative relationships, so too must they be distinguished between when one is evaluating love and the legitimate and illegitimate claims of pleasure and of moral principle (the overt themes of the play).

But this is not to say that reliance upon logical thought and sensory perception should not be employed to the full, nor that, to weigh the scales again in Parmenides's favor, "that that is, is not." Viola turns out to be Viola, not Cesario: "that that is is." And so we can conclude with Feste, in the final song that touches upon every theme of the play, that "what you will" and "what is" mutually limit each other, owing to the nature of things and to human fallibility, though "what you will" and "what is" are both capable of a fair degree of descriptive
But did Shakespeare have any knowledge of Parmenides (a problem inevitably linked with his possible knowledge of Platonism)? And if not, or if we cannot be sure, does this fact militate against the metaphysical interpretation of *Twelfth Night* offered in this essay?

That Shakespeare had any direct acquaintance with Parmenides seems improbable. But that in the sixteenth century it would have been impossible to learn anything about Parmenides is simply not so. One must bear in mind that the fragments of Parmenides's poem survived for the most part in two sources; (1) the poem is quoted in full by Sextus Empiricus in his *Against the Logicians* and to this quotation he added a commentary; and (2) the major fragments from the body of the poem were preserved by Simplicius in his commentary on the *Physics* and the *de Caelo* of Aristotle. That Both Sextus and Simplicius were available to those who cared is certain (Sextus, in particular, in the Latin translation of Henri Estienne, Paris, 1562), though it is not easy or always possible to plot out with any certainty the spread of pre-Socratic philosophy during the Renaissance. We do know, for instance, that soon after his return from Italy, Thomas Linacre translated the commentary of Simplicius on the *Physics*, but did not publish it; and we do know that some of the fragments of Parmenides were published in his *Poesis Philosophica* by Henri Estienne (Geneva, 1573) along with some doxography from Plato, Theophrastus, Plutarch, Clement, and Proclus. But no one could have learned much from this collection, nor is there much likelihood that Shakespeare ever saw it. It is also true that prior to 1573 J. C. Scaliger had gathered together the verse of Parmenides and Empedocles, but his manuscript was not published. In point of fact, no complete or even semi-complete edition of the fragments appeared until late in the eighteenth century.

A possible Shakespearian source for information about Parmenides might have been Giordano Bruno, whose English sojourn extended from 1582 to 1585, and whose London circle included John Florio, Sir Philip Sidney (who alludes to Parmenides, as well as to Thales, Empedocles, Pythagoras, and Phocylides in the fourth paragraph of "The Defense of Poesy"), and Sir Fulke Greville. Two of Bruno's Italian works are dedicated to Sidney, and Greville appears as host in Bruno's *Ash Wednesday Supper*. Bruno apparently also knew Sir Thomas Sackville, Lord Buckhurst, later first Earl of Dorset, and perhaps Gabriel Harvey, who certainly knew about Bruno. It has even been suggested by Benedetto Croce that Berowne in *Love's Labor's Lost* is a portrait of Bruno himself. That Bruno greatly admired the pre-Socratic philosophers there can be no doubt. Writes Dorothea Waley Singer: "Among many passages we may recall from the *De Immenso* Bruno's magnificent lines proclaiming that the potentiality of all parts is in the whole and in each ("All things are in all"). This is the real basis of his view of the Identity of Opposites, and he fortifies himself with the support of such names as Anaxagoras, Anaximenes and 'the divine Parmenides,' as well as of Plato's *Timaeus* and the neoplatonists." But be this as it may, such allusions to the works of Bruno in Shakespeare's plays as have been alleged are far from convincing, nor can one accept without considerable skepticism the parallels, suggested by Frances A. Yates, between Italians living in London in the 1590's and some of the characters in *Love's Labor's Lost*. On the whole, it seems fairly improbable that Shakespeare could have learned much about Parmenides via Bruno.

Of all the possible sources the most plausible appears to be the brief account of Parmenides in Diogenes Laertius's *Lives of Eminent Philosophers*, Latin translations of which were well-thumbed during the Renaissance. Here Shakespeare could have learned that Parmenides divided his philosophy into two parts dealing the one with truth, the other with opinion. Hence he somewhere says: Thou must needs learn all things, as well the unshakeable heart of well-rounded truth as the opinions of mortals in which there is no sure trust.... He made reason the standard and pronounced sensations to be inexact. At all events his words are: And
let not long-practiced wont force thee to treat this path, to be governed by an aimless eye, and echoing ear and a tongue, but do thou with understanding bring the much-contested issue to decision.30

Here we have a good thumb-nail sketch of the conventional Renaissance view of Parmenides's metaphysics and his method, but even if Shakespeare had read it and had noted any of the other unelightening references to Parmenides scattered through the Lives, he would not have found Feste's "that that is is."

Were it certain that Shakespeare's acquaintance with Plato came directly from the dialogues, it might be conjectured that his source for Feste's phrase was either the Parmenides or the Sophist, in the Latin translation of Ficino, widely read in the Renaissance, wherein Parmenides's postulates are rigorously examined; or in the Theaetetus, the Symposium, or the Euthydemus, wherein Parmenides is either alluded to by name or certain of his doctrines, such as the non-existence of nothing, are briefly mentioned. But no investigator of Shakespeare's learning has ever claimed that his knowledge of Plato was either scholarly or extensive. On the other hand, so authoritative a student of Greek philosophy as John Burnet has argued that in Lorenzo's rhapsodic lines upon the music of the spheres in The Merchant of Venice (V.i.59-65) "Shakespeare has given us the finest interpretation in any language of one of the central doctrines of Greek philosophy"—that the soul, imprisoned in the body, cannot hear the harmonies produced by the motion of celestial bodies—as stated in the Timaeus.31 Burnet contends that Shakespeare's classical attainments were more considerable than are supposed and that he "was able to disentangle the essential meaning of the Pythagorean doctrines preserved in that dialogue [the Timaeus'], though these were only known to him through a very distorted tradition."32 This tradition Burnet traces with great care in order to support his belief that by the fifteenth century the principal ideas of the Timaeus were everybody's property, and that Shakespeare's knowledge of Plato came to him through a long line of sources whose fountainhead was the early medieval School of Chartres.33 "It is certain, at any rate, that there was a vast mass of floating traditional lore, of Pythagorean and Platonic origin, in the England of Shakespeare's youth, and that he was just the man to be influenced by it."34

My own impression is that the best, and probably the only, case to be made for Shakespeare's possible knowledge of Parmenides is the kind Burnet makes for his knowledge of Plato and Pythagoras. (One should not forget that Feste "tests Malvolio's madness by quizzing him about Pythagoras's theory of metempsychosis"—IV.i.55-65) When such scrupulous scholars as J. S. Smart, J. A. K. Thomson and T. W. Baldwin hesitate to claim much for Shakespeare's Latinity and classical learning,35 it would be pointless to argue that Shakespeare possessed scholarly knowledge of Parmenides, especially when such knowledge was not widespread in his own age. All one can do is measure the degree of his knowledge against a representative text, as Burnet did with respect to the Timaeus. If such measurement leads to a more intensive reading of Twelfth Night, or to considerable portions of it, then one can suspect rather strongly that somewhere behind the play stands, mirabile dictu, the figure of Parmenides.

Certainly the postulate (and conclusion too, since Parmenides's thought is finally circular), "that that is is," is not original with Shakespeare. Just as certainly, so far as can now be known, it was original with Parmenides. And just as certainly the phrase is not meaningless jargon. Therefore it has meaning when Feste speaks it. Where Shakespeare found it I frankly do not know, nor do I know how we can find out for certain now. On the other hand, dangerous though it may be, we should not be afraid to assume that Shakespeare, like many other Renaissance writers with well stocked minds, had a broader knowledge about many things than scrupulous scholarly researchers can pin down precisely. The possibility is strong that "that that is is" had for some time been current as part of the stock phraseology of the age and was used commonly in certain contexts by the formally educated Elizabethan. I can imagine, then, that Shakespeare might have picked it up by ear and perhaps might never have associated it with any philosopher known to him. But that he would not have wondered what the phrase means, would not have worried it over in his own mind, would not have been attracted to it because of its succinctness and its cryptic quality I cannot imagine. Whatever kind of mind Shakespeare had, we can be certain that it was an inquisitive one, one given to intense speculative habits.36
Consequently I cannot believe that he put this curious phrase into Feste's mouth fortuitously just when deception of every sort is most rampant in the play and when plot complications are maximal. By the time Shakespeare was writing *Twelfth Night* he was not composing plays by reliance only upon inspiration, and this play is one of Shakespeare's most intricately planned achievements. "That that is is" fits too snugly into the total pattern of the play to be only a lucky hit.

Indeed, once its full meaning is understood and applied back to puzzling passages in the play, everything in it begins to respond resonantly—so that one becomes convinced that the play has a metaphysical substratum. This resonance does not destroy, but rather harmonizes with and enhances the play's Twelfth Night gaiety and its curiously reserved, almost sad, yet always sympathetic feeling for the nature and quality of love, of moral order, and of human *joie de vivre*. These things have their own reality and their own appearances, neither precisely like those defined by Parmenides, nor yet precisely unlike them. Love both is and appears to be; so like-wise with moral order and joy in being alive. Failure to perceive this ambiguity, which is fundamental to man's experience, leads to the folly of Orsino and Olivia, of Malvolio, and of the revelers who comprise Sir Toby's social intimates. For folly may be defined as failure to perceive the true nature of people, events, values, things, or as incapacity to separate words from things.

And so it can be argued that something like a Parmenidean metaphysics, with its Platonic qualifications, is singularly appropriate as a foundation for a metaphysic of Shakespearian comedy. The rigid simplicity of "that that is is" obliges us, as it apparently obliged Shakespeare, to speculate rigorously about what is permanent in a world of constant flux. This, too, is one of the obligations of the writer of comedy, plus the sensitivity not to draw too rigid distinctions. (I am not implying, of course, that Shakespeare had not speculated on the relationship of appearance to reality until he wrote *Twelfth Night*. His thinking on this issue began very early in his career and came to a rapid, but immature head in *The Rape of Lucrece*.) It is noteworthy that in *Twelfth Night* rigid distinctions are not drawn, yet neither are they blurred out. Rather, they are faced up to, and a process is covertly suggested whereby human beings, limited by nature, may intelligently face up to them; hence the iteration of characteristic questions and paradoxical answers that embrace both the sensible and the intelligible worlds.

Moreover, through understanding clearly the meaning of "that that is is," we can better understand Shakespeare's enormous advance in *Twelfth Night* as a craftsman: his movement away from the implausible use in the early comedies of conventional theatrical disguises, mistaken identities and the like into a more plausible use of them in the mature comedies (where misuse of the senses, especially of sight and hearing, become crucial), and finally into the fully symbolic use of disguise and mistaken identity in Edgar, for instance, in *King Lear*. And it is Lear far more even than Hamlet who struggles toward the rockbottom meaning of "that that is is" and learns through experiences of horrifying actuality the fallacy of Parmenides's doctrinaire belief that "nothing can come from nothing."

It ought not, then, to be considered heavy-handed or straw-clutching to seek out a metaphysic for *Twelfth Night* by way of Parmenides, even if, as may be the case, Shakespeare had no knowledge of Parmenides whatsoever. By juxtaposing this merriest, yet saddest of all Shakespeare's comedies against the rigors of Parmenidean thought, we can at least make use of a basic tool for thinking clearly about "seeming" and "being," a tool Shakespeare made use of, whether he understood its place in the history of ideas or not. It was a tool that Plato himself was happy to employ, though in time he forged a better one by developing Socratic dialectic. So also did Shakespeare. For the dialectic of speech and action typical of *Twelfth Night* prepared the way for the dialectic of thought and action Shakespeare developed as far as he could in the great tragedies that were on the horizon.

**Notes**

7 Citations from Parmenides are from the translation by Francis MacDonald Cornford of those fragments upon which he comments in *Plato and Parmenides* (New York, 1939)—in this instance, pp. 30-31.

8 Cornford's commentary, pp. 31-32.

9 Cornford's translation, p. 32.

10 Cornford's commentary, pp. 32-33.

11 The complexities inherent in such a differentiation are explored in the *Theaetetus* and in the two dialogues in which Plato submits the philosophy of Parmenides to rigorous dialectic, the *Parmenides* and the *Sophist*.

12 See Plato's criticisms of Parmenides's metaphysics in the *Parmenides* and the *Sophist*.

14 Cornford's commentary, p. 31.

15 See especially Feste's subtle criticism of Orsino (II.iv.75-81). I cannot accept L. G. Salingar's interpretation of Feste as a skeptical moralist who finds a sanctuary in fantasies of pure nonsense: "what he sees at the bottom of the well is 'nothing.'" ("The Design of *Twelfth Night," *Shakespeare Quarterly*, IX [Spring, 1958], 136.) Salingar's analysis of all the overt themes of the play is, however, acute and persuasive.

16 I am assuming, of course, that metaphysics and ethics cannot be rigidly separated. What is real in an ethical sense is real only to the degree that behind it is an ontological reality of some sort.

17 Altogether there are 314 questions: 92 in Act I; 67 in II; 76 in III; 26 in IV; and 51 in V. The greatest incidence occurs in I.iii.—32; I.v.—46; II.iii.—29; II.v.—21; III.i.—13; III.iv.—53; IV.ii.—15; and V.i.—51; i.e. in the eight crucial scenes out of the total eighteen.

18 See Summers, *passim*.

19 Thou hast, Sebastian, done good feature shame.
   In nature there's no blemish but the mind;
   None can be call'd deform'd but the unkind.
   Virtue is beauty; but the beauteous evil
   Are empty trunks, o'erflourish'd by the devil."

20 On the epistemological level *Twelfth Night* is not provocative. There is considerable iteration of forms of "to know," but questions and answers dealing with how one knows are too few to admit of a theory of
knowledge.

21 Plato argues somewhat similarly in the *Sophist*. See A. E. Taylor, *Plato, the Man and His Work*, 6th ed. (London, 1949), p. 389: "When we say that something 'is not so-and-so,' by the not-being here asserted we do not mean the 'opposite' … of what is but only something different from what is. 'A is not X' does not mean that A is nothing at all, but only that it is something other than anything which is X…. We may say, then, that 'not-being' is as real and has as definite a character as being. This is our answer to Parmenides. We have not merely succeeded in doing what he forbade, asserting significantly that 'what is not, is': we have actually discovered what it is. It is 'the different.' … It is childishly easy to see that any thing is different from other things and so may be said to be 'what is not'; the true difficulty is to determine the precise limits of the identity and difference to be found among things….

28 Singer, pp. 84-85.

30 See the Loeb ed., trans. R. D. Hicks (Cambridge, Massachusetts, 1950), 11, 431. Sextus Empiricus in his commentary on Parmenides says much the same thing. See footnote 22.

32 A *Book of Homage to Shakespeare*. It is generally believed, however, that Shakespeare's specific knowledge of Pythagoras came from Ovid, *Metamorphoses*, XV.

33 Burnet, pp. 59-60. See also an even more comprehensive survey than that in "Shakespeare and Greek Philosophy."

34 Burnet, "Shakespeare and Greek Philosophy," p. 60.

35 See J. S. Smart, *Shakespeare, Truth and Tradition* (London, 1928); J. A. K. Thomson, *Shakespeare and the Classics* (London, 1952); and T. W. Baldwin, *William Shakespeare's Small Latine & Less Greeke*, 2 vols. (Urbana, 1944). All these scholars agree that Shakespeare read no Greek; that his reading knowledge of Latin was sufficient to allow him to read Ovid in the original, though he appears to have read Golding's translation
of the *Metamorphoses* through preference; and that his classical knowledge, though extensive in many ways, could not be called scholarly by Renaissance standards.

35 Inasmuch as the approach to source studies employed in this essay will undoubtedly produce anguished reactions in some quarters, it may not be amiss to quote a somewhat similar defense, written by J. B. Leishman in support of his conviction that Shakespeare must have had a fair knowledge of Horace: "Was Shakespeare familiar with Horace's Odes? I can see no way of proving that he was, but on the other hand, it seems to me almost incredible that he should not have been. Almost all other great poets have learnt from their predecessors, either by way of a progressively un-imitative imitation, or simply through an ever-renewed awareness of the infinite possibilities of expression and of what great poetry could and ought to be; but it seems to be generally assumed that, except for a few translations, Shakespeare, when he read at all, read chiefly almanacks, Fat Stock Prices, and whatever may have been the Elizabethan equivalent of a financial weekly. What I find so incredible about this is the lack of curiosity it presupposes.... No doubt the fact that he could write like Aeschylus without ever, perhaps, having even heard the name of Aeschylus, makes it not impossible to suppose that he could write like Horace without ever having read him. On the other hand, we cannot assume that Shakespeare had not read him simply because we cannot produce from his poems and plays such immediately recognisable imitations of variations of Horatian phrases and passages as we can produce from Petrarch or Ronsard or Ben Jonson." ([*Themes and Variations in Shakespeare's Sonnets*](https://www.loc.gov/item/61010074/), p. 36.)

**Helene Moglen (essay date 1973)**

*In this essay, Moglen postulates a set of Freudian psychological theses that underlie Shakespeare's portrayal of disguised characters in Twelfth Night."

Mistaken identity and sex disguise are familiar, rather hackneyed devices used with some regularity in romantic comedy. Critics of *Twelfth Night* have taken these conventions for granted and have been content simply to describe their use in the articulation of plot and character. Surprisingly little allowance has been made for the possibility that Shakespeare might have defined quite differently, at different points in his career, the varying functions of devices as rich in implication as these. Because critics of the play have largely ignored the psychological premises of romance, they have not understood that Shakespeare, in the comic romances of this period, reinterpreted conventional techniques and incorporated them into an apparent theory of the development of personal and therefore sexual identity. It will be the purpose of this essay to indicate the ways in which these psychological premises are fundamental to the treatment of theme and character in *Twelfth Night,* basic to the relation of plot to subplot, and strikingly similar to major aspects of Freud's own theory of psycho-sexual development.

Illyria is a world of the dreaming mind: landscaped by wishes and fears, peopled by fragments of the self. Illyria is a world of symbols in which the face must be traced in the mask and the appearance is more real than reality. Here the dreaming heroes and heroines (Orsino, Sebastian, Olivia, Viola) explore the secrets of their own identities. The object of their quest is love: to recapture the unconscious unity of childhood in the integration of the self with another.

But Illyria is also a real world: comic and absurd. Here self-indulgence replaces self-involvement and hypocrisy is the primary disguise. The comic heroes (Sir Toby, Sir Andrew, Malvolio) move between freedom and rigidity. Their need to free themselves from restraint confronts their obligation to assume responsibility. In one world, the individual's self-definition is given a psychological reference. In the other, the process takes place within a social context.
In *Twelfth Night* the conditions of the romantic journey have been satisfied before the play begins. All authority figures have miraculously disappeared, external barriers are down, the self is thrust back upon itself. As they undertake their quests, Orsino, Olivia and Viola seem to emerge from states of childish narcissism in which they are themselves objects of their own love: a beginning stage (as Freud was later to define it) of all normal sexual development.

Thus, Orsino egotistically withdraws from society, neglecting the responsibilities of the dukedome ("For I myself am best / when least in company") and giving himself instead to the sensation of sensation. It is not a woman he loves, but love itself—in the form of Olivia. It is the "food of love" he enjoys; his own capacity for love which he celebrates. His feeling is not part of a relationship. It is stimulated by appearance. Its source is visual.

O' when mine eyes did see Olivia first,
Methought she purged the air of pestilence.
(II, i, 20-21)

As with many courtly lovers before him, Orsino is delighted by his own reflection—discovered in his mistress's eyes.

Olivia is a perfect object for Orsino's egotism. With her as his beloved, he can enjoy the experience of love without having to confront its reality. He can appreciate Olivia's capacity for sisterly affection while anticipating the passion which will eventually accompany her aroused sexuality:

O' she that hath a heart of that fine frame
To pay this debt of love but to a brother,
How will she love when the rich golden shaft
Hath killed the flock of all affections else
That live in her…
(II, i, 34-38)

And he is safe in the knowledge that for seven years nothing will disturb the sweetness of that anticipation. Olivia protects herself by carefully preserving and savoring the subtly spiced sensations of the grief which is the condition of her celibacy:

But like a cloistress she will veiled walk,
And water once a day her chamber round
With eye-offending brine: all this to season
A brother's dead love, which she would keep fresh
And lasting in her sad remembrance.
(II, i, 29-33)

Both Orsino and Olivia are locked within the prisons of their self-love. They progress from narcissism only insofar as they *define* their self-involvement as love for another. But their behavior belies the truth of their definitions and it remains for Viola to become the agency of their freedom, helping them progress through adolescent conflict to mature resolution.

Initially, Viola's own situation seems to parallel theirs, but her divergences prove more crucial than the similarities. With Orsino and Olivia, she is cut off from the familiar forms of her old life, but while the causes of change are, in their cases, largely specious and self-imposed, they are, for her, radical and decisive. She has undergone a long and dangerous sea-journey (a familiar metaphor for the romantic quest for self) and, at the
end, she finds herself bereft—as is Olivia—of a brother. Almost drowned, on the shore of a strange country, she has been, in a sense, reborn; prepared for a new life which is, from another perspective, a new level of development.

Viola's spontaneous response to the information that Orsino rules the land to which she has come, implies that she, like Olivia and the Duke himself, is interested in the possibilities of courtship.

Orsino! I have heard my father name him.
He was a bachelor then.
(I, ii, 28-29)

But her interest is not conscious. Viola, unlike the heroines upon whom she was modeled, has no particular interest in the Duke. Her susceptibility to love is general: a stage in her development. And, quite typically, her curiosity is accompanied by fear and ambivalence. If she is attracted, she is also repelled by an environment that threatens her uncertain sexuality. The security of Olivia's household, the immediate sense of kinship, is tempting:

O' that I served that lady,
And might not be delivered to the world,
Till I had made mine own occasion mellow.
What my estate is.
(I, ii, 41-44)

But she must and is prepared to play—as Olivia and Orsino are not—an active role. With a more sophisticated understanding of the dangers of disguise, the delusory quality of appearance (Nature with a beauteous wall / Doth form close in pollution...) (I, iii, 48-9) she initiates the next stage of her development, deciding to become "the form of my intent," offering to serve the duke in the guise of a young man. The chosen disguise suggests that Viola's intent is to become that androgynous person who, in the Eden of childhood she was, and longs again to be. She is a boy-girl hovering precariously, if self-consciously, between the sexless child and the adult female. Her disguise is the adolescent confusion of identity made visible. It is a confusion of identity equally, if less consciously, shared by Olivia and Orsino.

Seen from this perspective, the loss of the brother represents for Viola and Olivia a denial of the primitive, infantile unity of the personality; a schism that necessarily accompanies self-awareness. Orsino's isolation implies a similar fragmentation. For all, the primary narcissism of childhood yields to the sexual ambiguity of adolescence which must be confronted before it can be resolved. The assumption of a male identity is essential to Viola's definition of herself as woman. It suggests the objectification of conflict, allows her to act out her ambivalence, and enables her ultimately to assume a role more appropriate to the demands of nature and society. Similarly, as they interact with the ambiguous sexuality of Viola-Cesario, Olivia and the Duke confront themselves in homoerotic relationships which allow them to achieve the security which is essential if they are to accept mature, heterosexual love. Freud remarked:

It is well known that even in the normal person it takes a certain time before a decision in regard to the sex of the love-object is finally achieved. Homosexual enthusiasms, tinged with sensuality are common enough in both sexes during the first years after puberty.

It is with this period of uncertainty and change that Shakespeare concerns himself. What Jan Kott calls, in another context, "the metamorphosis of sex," becomes the focus of the play. Sexual roles are explored and defined, conflicts are resolved and Viola is the medium and the measure.
To Orsino, Viola offers the terms of a rather simple compromise. The security afforded by Cesario's masculine appearance allows the Duke to reveal himself to the receptive—albeit disguised—femininity of Viola:

Thou know'st no less but all. Cesario, I have unclasped to thee the book even of my secret soul.

(I, iv, 12-14)

From Cesario, the Duke (whose "mind is a very opal") learns the lesson of a constancy that creates meaning for the romantic songs that feed his fantasies. He has congratulated himself on the strength of his passion, "as hungry as the sea," and dotes on stories of lovers slain by the heartlessness of fair maidens. By his own admission:

… however we do praise ourselves,
our fancies are more giddy and unfirm
more longing, wavering, sooner lost and worn,
Than women's are.

(II, iv, 33-36)

He is quick to deny the affection he has professed for his young page, when he suspects Cesario's involvement with Olivia:

Come, boy, with me; my thoughts are ripe in mischief.
I'll sacrifice the lamb that I do love,
To spite a raven's heart within a dove.

(V, i, 132-4)

Cesario remains steadfast, however, and offers himself lovingly and in fact to the cruelty of his sentimental wrath:

And I, most jocund, apt and willingly,
To do you rest a thousand deaths would die.

(V, i, 112-3)

By affording him this transitional relationship, Viola forces Orsino to search out the truth of the disguise and provides him with a corrective to illusion.

In relating to Olivia, Viola must play a complex role. By avoiding contact with Orsino and removing herself from the temptation of a heterosexual love relationship, Olivia has revealed her fear of herself. An orphan, like Viola, she will not jeopardize her newly won authority nor will she endanger the integrity of an identity already threatened by the symbolic loss of her brother. The efficient head of a complicated household, Olivia does not want to surrender her masculine dominance: "She'll not match above her degree, neither in estate, years, nor wit (I, iii, 106-7)." She is willing to speak with Cesario because he is unthreatening: his audacious wit as well as his commanding nobility which make her put aside her veil. Her ambivalence is betrayed. Her vulnerability is exposed. In admitting that "Ourselves we do not owe (I, v, 311)," she acknowledges herself to be part of a developmental process which she cannot control. It is the odd logic of this process which defines her actions, attracting her to Viola, attaching her to Cesario and leading her to accept quite readily the eventual substitution of Sebastian.
Viola, too, recognizes that she is not mistress of her situation:

O Time, thou must entangle this, not I;
It is too hard a knot for me t' untie.

(II, ii, 40-1)

And she becomes aware of the dangers of the disguise which she has assumed:

Disguise, I see thou art a wickedness
Wherein the pregnant enemy does much.

(II, ii, 27-8)

Still, to embrace illusion is to give oneself to a necessary madness. As Cesario, Viola is able to establish the meaning of her sexual identity. Although she enjoys her easy domination of Olivia, she prefers to subordinate herself to the Duke. In the process of convincing Olivia that it is appropriate for her to give freely of her love ("What is yours to bestow is not yours to preserve (I, v, 186-7).") she explores in herself a capacity for feeling which is profound. The security afforded by her disguise makes the exploration possible. She is an eloquent petitioner:

Make me a willow cabin at your gate
And call upon my soul within the house;
Write loyal cantons of contemned love
And sing them loud even in the dead of night;
Hallo your name to the reverberate hills
And make the babbling gossip of the air
Cry out "Olivia." O you should not rest
Between the elements of air and earth
But you should pity me.

(I, v, 269-277)

Her disguise makes her eloquence a mockery of romantic sentiment, but it also invests that mockery with the genuine feeling which is her love for the Duke.

Viola demonstrates the truth of the clown's assertion that: "A sentence is but a chev'ril glove to a good wit. How quickly the wrong side may be turned outward (III, i, 11-13)." Her language is as ambiguous as her disguise, and reveals as it hides. The game she plays enables her to test reality while only partially accepting it. Her ultimate readiness to confront herself is asserted by her confrontation with Sebastian. Aware of the nature of her femininity, she can encounter the masculine possibility: her brother externalized and experienced now as "the other." He is the form of her awareness and, on the level of plot, he makes it possible for that awareness to be activated. The mystery of their twinship solved, her separateness asserted, she is able to put on her "woman's weeds" and assume the role of wife.

Sebastian is, in every respect, an appropriate "double" for Viola. His experience parallels hers and his development is the same as Olivia's and Orsino's. Like Viola, Sebastian has endured an arduous sea-journey which deprives him of his twin and brings him to a new land. The images used to describe his experiences are symbolic of resurrection (he binds himself to a mast and rides upon it like Arion upon the Dolphin's back) and suggest that he has progressed from one level of development to another. In the crisis of identity, friend supplants sister (" …for some hour before you took me from the breach of the sea was my sister drown's (II, i, 22-24).") The fact that his relationship with Antonio is tinged by the same homoeroticism that distinguishes Olivia's attraction to Viola and Orsino's affection for Cesario, is suggested by the language that Antonio uses when he speaks of the depth and intensity of his attachment:
If you will not murder me for my love,
let me be your servant.

(II, i, 36-37)

I have many enemies in Orsino's court,
Else would I very shortly see thee there.
But come what may, I do adore thee so
That danger shall seem sport, and I will go.

(II, i, 46-49)

When we are first introduced to Sebastian as he takes leave of Antonio, he seems slightly feminized.

My bosom is full of kindness and
I am yet so near the manners
Of my mother that, upon the least
Occasion more, mine eyes will tell
Tales of me.

(II, i, 39-42)

But he hovers on the edge of manhood, anxious to separate himself from the domination of his older friend ("Therefore I shall crave of you your leave, that I may bear my evils alone (II, i, 5-6.").) It is appropriate that he should now divest himself of his disguise, telling Antonio his name and describing to him his background. Having endured the loss of his sister, inviting a separation from Antonio, Sebastian seems in growing control of himself. He demonstrates his physical prowess when challenged by Sir Toby and Andrew and, more importantly, he welcomes with mature ease, the reality of the dream:

What relish is in this? How runs the stream?
Or I am mad, or else this is a dream,
Let fancy still my sense in Lethe steep;
If it be thus to dream, still let me sleep!

(IV, i, 59-62)

When he explains to Olivia: "You are betrothed both to a maid and man (V, i, 263)," he reveals the truth of the illusion.

Through Sebastian the resolution of the romance is made possible. In their readiness for marriage all of the characters affirm their own sexual identities. In choosing a mate each of the characters confronts that part of the self which is subordinate but, nevertheless, essential to total definition. Courtship involves an awareness and externalization of conflict. Marriage is the promise of a higher unity. Explaining the need of the personality to move beyond its early narcissism, Freud wrote:

… we are so impelled when the cathexis of the ego with libido exceeds a certain degree. A strong egoism is a protection against disease but in the last resort we must begin to love in order that we may not fall ill, and must fall ill if, in consequence of frustration, we cannot love.9

It is the illusion, the experimental assumption of roles, which allows the development here from the disease of self-involvement and fragmentation to the healthful state of love and self-definition.

II
In the sub-plot of *Twelfth Night* the same themes are explored, but the exploration is given a social focus. The romantic characters and situations have their comic counterparts. Self-revelation replaces self-recognition. Self-indulgence replaces narcissism and the absence of self-knowledge is expressed in hypocrisy. The conflict is one of social rather than sexual definition and the antithetical possibilities which must be resolved are personal freedom and expression on one hand, social formalism and responsibility on the other.

Sir Toby, the "Lord of Misrule" who "burlesques majesty by promoting license,"\(^\text{10}\) occupies a key position, similar to Viola's. Viola, in her androgynous disguise, encourages Olivia and the Duke to project freely the selves submerged in the roles they play. Sir Toby, whose drunken revelry is another form of disguised freedom, manipulates Sir Andrew and Malvolio so that each betrays his true nature, hypocritically masked. Antisocial qualities are identified and purged. In Sir Andrew, the vanity of the courtly lover is revealed: recognition of his cowardice is a corrective to the absurdity of idealized romance. Ignorant of himself and the woman chosen to be his mistress, he is Orsino perceived through the lens of social comedy. Only ridiculous, he is not punished, for he does, after all, search for love remembering, with some nostalgia, that he "was adored once too."

Malvolio, alone of the Illyrians, does not share this capacity for affection. His narcissism is not an early stage of a complex developmental process, but seems rather to be endemic. He is "sick of self-love" and "tastes with a distempered appetite (I, v, 90-91)." He is a man who "practises behavior to his own shadow (II, v, 16)." A precursor of the commercial revolution, as C. L. Barber suggests,\(^\text{11}\) Malvolio translates all values into material terms. Love, for him, is power. To marry Olivia is to become Count Malvolio. It is to exercise control over the household, to claim the right to berate Sir Toby. In his pride he rejects the established order of society and believes that accepted hierarchies can be overturned. Most important of all, perhaps, Malvolio rejects the wisdom of the fool and refuses to accept the function of disguise:

\[
\begin{align*}
I \text{ protest I take these wise men} \\
\text{that crows so at these set kind} \\
of \text{fools no better than the fools' zanies.} \\
\text{(I, v, 87-9)}
\end{align*}
\]

Paradoxically, it is because of his inflexibility that he alone is sealed into a disguise. Maria's plan offers him only the concrete, external form of his own self-deception. He belongs to the world of comic realism and aspires to the world of psychological romance. He is unable to use the freedom of either as part of his process of self-definition. He rejects the dream along with the cakes and ale. His journey into the self can be nothing more than what it, in fact, becomes: imprisonment in the pitch blackness of delusion.

Malvolio is representative of that egotism which is, in its extreme form, anti-social and self-destructive. His final threat of revenge makes this clear. Because he cannot progress to a state of knowledge which implies integration through the recognition of inner and outer order, he must himself be purged. His dismissal is the symbolic condition of the consolidation of the society and the integration of the individual which is represented by marriage.

It is in the atmosphere of freedom created by Sir Toby that Malvolio's unmasking is created by Maria. Only she is able to mediate between the two worlds of Illyria, while being part of their reality.\(^\text{12}\) Moving between Olivia and Sir Toby, she maintains the structures of the household (a microcosmic version of Illyria) imposing order, meting out justice. Her wit, like Viola's, implies the flexibility requisite to personal maturity and social stability. In the parodic letter she writes to Malvolio and in her chiding of Sir Toby, she suggests the limitations of romantic idealism and comic freedom.

At first Sir Toby rejects those restrictions which her reason would impose upon him:
but he recognizes the value of a wit that can conceive as the form of disguise the revelation of truth. Responding joyously to her ingenuity ("I could marry this wench for this device (II, v, 83)") he comes to respect the constructive intelligence which makes it possible. In this way Maria functions for him as Viola functions for Orsino and Olivia. And when Sir Toby does, in fact, decide to marry Maria, his decision implies his recognition of the limited and transitional value of disguise. Somewhat ruefully he puts aside his freedom ("I hate a drunken rogue (V, i, 200)") and accepts responsibility.

Feste's song places the action of the play in its final perspective. The inevitable movement from childhood to maturity is noted. The psychological and social resolutions once affected, are qualified. The play is, after all, only another kind of disguise which presents reality in a bearable form. The truth itself encompasses more than the image by which it is suggested. The ambivalent quest for self, the conflict between personal integrity and social definition: these are seldom resolved as happily as in Illyria. Freedoms claimed are easily lost, recognitions made are obscured and "the rain it raineth every day."

Notes

4 William Shakespeare, Twelfth Night, Or What You Will, ed. Charles T. Prouty, Penguin Books, Baltimore, Maryland, 1958, I, iv, 36-37. All subsequent references will be to this edition and will be given in the text.

5 L. G. Salinger, in "The Design of Twelfth Night, points out that in all four of the plays which served as probable or possible sources for Twelfth Night, the heroine knew previously the master whom she serves as page and, wanting to win his love, pursued him to his own country.

7 Jan Kott, Shakespeare Our Contemporary, New York, Anchor, 1961, p. 314. Kott suggests that the play deals with the ambiguity and impossibility of clear sexual definition and choice. His argument is stimulating and insightful, but seems to overlook the developmental aspect of the plot as well as the resolution of central conflicts. Shakespeare seems to express his point in Sebastian's words to Olivia:
So comes it, lady, you have been mistook;  
But nature to her bias drew in that.  
V, i, 266-7

8 It is interesting to note, as L. G. Salinger points out in "The Design of Twelfth Night," that the Italian authors who provided Shakespeare with his sources for the play, gave Viola both a domineering father and a foster mother, like Juliet's nurse. The effect of Shakespeare's change is not simply to make "the whole situation more romantically improbable, more melancholy at some points, more fantastic at others," as Salinger suggests, but to emphasize the psycho-sexual, developmental aspect of his characterization.

11 Barber, p. 256.

12 Feste also mediates between the comic and romantic sensibilities, but he remains, in the tradition of the jester, an outsider.

Karen Greif (essay date 1981)

[In this essay, Greif claims that Twelfth Night views "playing" as a means both to conceal and to reveal truth.]

'The purpose of playing,' says Hamlet, is 'to hold as 'twere the mirror up to nature: to show virtue her feature, scorn her own image, and the very age and body of the time his form and pressure.'1 Hamlet himself employs 'playing', in various guises, as a means of penetrating false appearances to uncover hidden truths, but he also discovers how slippery illusions can be when their effects become entangled in the human world. Like Hamlet, but in a comic vein, Twelfth Night poses questions about 'the purpose of playing' and about whether illusion is perhaps too deeply embedded in human experience to be ever completely separated from reality.

Virtually every character in Twelfth Night is either an agent or a victim of illusion, and often a player will assume both these roles: as Viola is an impostor but also a prisoner of her own disguise, or as Sir Toby loses control of the deception he has contrived when he mistakes Sebastian for his twin. Illyria is a world populated by pretenders, which has led one critic to describe the action as 'a dance of maskers ... for the assumption of the play is that no one is without a mask in the serio-comic business of the pursuit of happiness'.2 In the course of the story, many of these masks are stripped away or willingly set aside; but illusion itself plays a pivotal yet somewhat ambiguous role in this process. While Viola's masquerade serves to redeem Orsino and Olivia from their romantic fantasies and ends in happiness with the final love-matches, the more negative aspects of deception are exposed in the trick played against Malvolio, which leads only to humiliation and deeper isolation.

Role-playing, deceptions, disguises, and comic manipulations provide the fabric of the entire action. So pervasive is the intermingling of illusion and reality in the play that it becomes impossible at times for the characters to distinguish between the two. This is not simply a case of illusion becoming a simulated version of reality. 'I am not that I play', Viola warns her fellow player (1.5.184); but, as the subtitle suggests, in Twelfth Night one discovers that 'what you will' may transform the ordinary shape of reality.
The fluidity of the relationship between 'being' and 'playing' is indirectly illuminated at the beginning of act 3, in the play's single face-to-face encounter between Viola and Feste, who share the distinction of being the only pretenders in Illyria who do not wear their motley in their brains. They match wits in a contest of wordplay, which moves the Fool to sermonize: 'To see this age! A sentence is but a chev'ril glove to a good wit. How quickly the wrong side may be turn'd outward!' (3.1.11-13). According to Feste, words have become like kidskin gloves, pliable outside coverings readily yielding to manipulation by a good wit. Viola's response echoes this sense; those who know how to play with words 'may quickly make them wanton' (1. 15). Men may expect words to operate as constant symbols of meaning, faithfully reflecting the concrete outlines of reality; but, in fact, words prove to be flighty, untrustworthy mediators between human beings and experience:

Clown. But indeed, words are very rascals
since bonds disgrac'd them.

Viola. Thy reason, man?

Clown. Troth, sir, I can yield you none
without words, and words are grown so
false, I am loath to prove reason with them.

(11. 20-5)

Rather than serving as a medium for straightforward communication, words have become bent to the purposes of dissembling. Feste declares himself a 'corrupter of words' (1. 36), and throughout the play he demonstrates how chameleon-like words can become in the mouth of an expert dissembler like himself. Yet Feste is also recognized by his audience and many of his fellow players as a kind of truth-teller; under the guise of fooling and ingenious word-play, he reminds those around him of truths they have blocked out of their illusion-bound existences. The Fool's dialogue with Viola suggests that 'since bonds disgrac'd them', words have fallen under suspicion within the world of *Twelfth Night*, at least among those who admit their own dissembling. But for those who possess wit and imagination, the protean nature of words also affords an exhilarating form of release. Dexterity with language becomes a means of circumventing a world that is always shifting its outlines by exploiting that fluidity to the speaker's own advantage.

The same ambiguity that is characteristic of words pervades almost every aspect of human experience in *Twelfth Night*. Illyria is a world of deceptive surfaces, where appearances constantly fluctuate between what is real and what is illusory. Out of the sea, there comes into this unstable society a catalyst in the form of the disguised Viola, who becomes the agent required to free Orsino and Olivia from the bondage of their self-delusions. Equilibrium is finally attained, however, only after the presence of Viola and her separated twin has generated as much error and disturbance as Illyria could possibly contain.

Moreover, this resolution is achieved not by a straight-forward injection of realism into this bemused dreamworld, but by further subterfuge. 'Conceal me what I am', Viola entreats the Sea Captain after the shipwreck (1.2.53), setting in motion the twin themes of identity and disguise that motivate so much of the action in *Twelfth Night*. Identity, it is important to bear in mind, includes both the identity that represents the essence of one's being, the 'what I am' that separates one individual from another, and also the identity that makes identical twins alike; and the comedy is concerned with the loss and the recovery of identity in both these senses.

Viola's plan to dissemble her true identity proves to be ironically in keeping with the milieu she has entered. But the fact that Viola, left stranded and unprotected by the wreck, assumes her guise as Cesario in response to a real predicament sets her apart from most of the pretenders already dwelling in Illyria. Surfeiting on fancy, they endlessly fabricate grounds for deceiving others or themselves. Orsino and Olivia are foolish, in part, because it is apparent that the roles of unrequited lover and grief-stricken lady they have chosen for themselves spring more from romantic conceits than from deep feeling or necessity. The games-playing mania of Sir Toby Belch and his cohorts carries to comic extremes the Illyrian penchant for playing make-believe.
Just as words, in Sir Toby's hands, are rendered plastic by his Falstaffian talent for making their meaning suit his own convenience, so he manufactures circumstances to fit his will.

The kind of egotism that stamps Sir Toby's perpetual manipulation of words and appearances, or Orsino and Olivia's wilful insistence on their own way, is far removed from Viola's humility as a role-player. Although she shares Feste's zest for wordplay and improvisation, Viola never deludes herself into believing she has absolute control over either her own part or the actions of her fellow players. Musing over the complications of the love triangle into which her masculine disguise has thrust her, Viola wryly concedes 'O time, thou must untangle this, not I, / It is too hard a knot for me t'untie' (2.2.40-1). Viola's outlook is unaffectedly realistic without the need to reject imaginative possibilities. Her own miraculous escape encourages her to hope her brother has also survived the wreck, but throughout most of the play she must continue to act without any certainty he is still alive. She accepts the facts of her dilemma without self-pity and begins at once to improvise a new, more flexible role for herself in a difficult situation; but she also learns that the freedom playing permits her is only a circumscribed liberty. For as long as the role of Cesario conceals her real identity, Viola is free to move at will through Illyria, but not to reveal her true nature or her love for Orsino.

The first meeting between Cesario and Olivia creates one of the most demanding tests of Viola's ability to improvise. She meets the challenge with ingenuity, but Viola also insists, with deliberate theatricality, on the disparity between her true self and the role that she dissembles:

**Viola.** I can say little more than I have studied, and that question's out of my part.
Good gentle one, give me modest assurance
if you be the lady of the house, that I may proceed in my speech.

**Olivia.** Are you a comedian?

**Viola.** No, my profound heart; and yet (by the very fangs of malice I swear) I am not that I play.

(1.5.178-84)

In her exchanges with Olivia, Viola is able to treat the part she plays with comic detachment; but the some-what rueful tone underlying her awareness of the ironies of her relation to Olivia turns to genuine heart-ache when this separation between her true identity and her assumed one comes into conflict with her growing love for Orsino.

Unable to reveal her love openly, Viola conjures for Orsino the imaginary history of a sister who

lov'd a man
As it might be perhaps, were I a woman,
I should your lordship.

(2.4.107-9)

As long as Orsino clings to his fancied passion for Olivia and she herself holds on to her disguise, Viola can vent her true feelings only by more dissembling, so she masks her secret love for the Duke with the sad tale of this lovelorn sister. Yet her fiction also serves to present her master with a portrait of genuine love against which to measure his own obsession for Olivia. 'Was this not love indeed?' she challenges him:

We men may say more, swear more, but indeed
Our shows are more than will; for still we
prove
Much in our vows, but little in our love.
(11. 116-18)

Her story is a touching one, and for once Orsino's blustering is stilled. He is moved to wonder 'But died thy sister of her love, my boy?'; but she offers only the cryptic answer 'I am all the daughters of my father's house, / And all the brothers too—and yet I know not' (11. 119-21). Viola's veiled avowal of her love is perhaps the most delicate blend of imagination and truth in the play, and this fabrication will finally yield its reward when Cesario is free to disclose 'That I am Viola' (5.1.253).

Role-playing, whether it be a deliberate choice like Viola's disguise or the foolish self-delusions that Orsino, Olivia, and Malvolio all practise upon themselves, leads to a general confusion of identity within Illyria. In the second encounter between Olivia and Cesario, this tension between being and playing is given special resonance:

Olivia. I prithee tell me what thou think'st of me.
Viola. That you do think you are not what you are.
Olivia. If I think so, I think the same of you.
Viola. Then think you right: I am not what I am.
Olivia. I would you were as I would have you be.
Viola. Would it be better, madam, than I am? I wish it might, for now I am your fool.
(3.1.138-44)

Like a tonic chord in a musical passage. Viola's riddles always come back to the idea of 'what you are' and 'what I am', the enduring truth of one's real identity. But this note of resolution is never a stable one. Viola warns Olivia that she has deluded herself into acting out fantasies with no basis in reality, first in her vow of celibacy to preserve her grief and then in her pursuit of the unattainable Cesario. In turn, she herself admits that 'I am not what I am.' Olivia, meanwhile, is obsessed with 'what thou think'st of me' and what 'I would have you be'. She is less interested in the truth about Cesario or her own nature than in making what is conform to what she would like it to be. On the one hand, the facts of nature ensure that she will be frustrated in her wooing, and yet her beloved will indeed be transformed into what she would have him be when the counterfeit Cesario is replaced by the real Sebastian.

The compression of so many levels of meaning within this passage suggests how complicated and paradoxical the relationship is in Twelfth Night between what actually is and what playing with reality can create. Viola's exchange with Olivia follows directly upon her encounter with Feste, and the second dialogue translates into terms of identity and role-playing the same attitudes towards words appearing in the first. The Fool claims that 'since bonds disgrac'd them', words have no static nature—that no unchanging identification between the-thing-itself and the word symbolizing it is ever possible—and the condition of being, the identity belonging to 'what I am', is in a comparable state of flux throughout most of the action.

The separation between being and playing, like the disjunction between words and concrete reality, may lead to a sense of disorientation closely akin to madness. This is the condition that the release of imagination creates in Malvolio. When he exchanges the reality of what he is for the make-believe part he dreams of becoming, he begins to act like a madman. Viola's charade as Cesario produces a welter of mistaken identities
that so disorient her fellow players no one is quite certain of his or her sanity. Yet another variation of the
madness which springs from unleashing the effects of imagination upon reality is seen in the escapades of Sir
Toby Belch.

His reign of misrule is fuelled by his refusal to allow reality to interfere with his desires, and this unruliness
drives his associates to wonder repeatedly if he is mad.

Yet, just as Feste finds means of communicating truth by playing with words, so does the unstable
relationship between being and playing allow at least a few of the players in Illyria to discover a more flexible
sense of identity that can accommodate both enduring truths and changing appearances. The same loosening
of the bonds governing identity that can lead to bewildering confusion may also open up a fresh sense of
freedom in shaping one's own nature. What you will may indeed transform what you are.

The point at which all these attitudes converge is in the recognition scene of the final act. At the moment
when Viola and Sebastian finally come face to face upon the stage, the climactic note of this motif is sounded
in Orsino's exclamation of wonder:

One face, one voice, one habit, and two
persons,
A natural perspective, that is and is not!
(5.1.216-17)

For the onlookers, who are still ignorant both of Viola's true identity and of the existence of her twin, the
mirror image created by the twins' confrontation seems explicable only as an optical illusion of nature. Yet the
illusion proves to be real; this 'natural perspective' is the stable reality underlying
the mirage of shifting appearances caused by mistaken identity.

This dramatic revelation of the identity that has been obscured by illusory appearances, but is now made
visible in the mirror image of the twins, is deliberately prolonged as Viola and Sebastian exchange their
tokens of recognition. Anne Barton has drawn attention to the fact that the recognition scene provides

a happy ending of an extraordinarily schematized and 'playlike' kind. Viola has already had
virtual proof, in Act III, that her brother has survived the wreck. They have been separated for
only three months. Yet the two of them put each other through a formal, intensely
conventional question and answer test that comes straight out of Greek New Comedy.³

The recognition of identity is at first an experience involving only the reunited twins; but, as the facts of their
kinship are brought forth, the circle of awareness expands to include Orsino and Olivia. They appreciate for
the first time their shared folly in desiring the unobtainable and both discover true love in unexpected forms
by sharing in the recognition of the twins' identities. As Orsino vows,

If this be so, as yet the glass seems true,
I shall have share in this most happy wrack.
(5.1.265-6)

The reflections of identity that have been present throughout the play are now openly acknowledged and
sealed by the bonds of marriage and kinship. The similarities between Viola and Olivia, for example—the lost
brother, the unrequited love, the veiled identity—which are echoed in the names that are virtually ana-grams,
are now confirmed by the ties of sisterhood when each wins the husband she desires.
Paradoxically, what allows this dramatic moment of epiphany to occur at all is the same loss and mistaking of identities that caused the original confusion. It is the separation of the twins and Viola's subsequent decision to 'Conceal me what I am' which gives emotional intensity to the moment when identity is recognized and regained. This final scene, moreover, makes it clear that the regaining of lost personal identity—the individuality that distinguishes Viola from Sebastian—is closely tied to the recognition of the likeness that makes the twins identical. The recognition scene, with its ritual-like ceremony of identification, suggests that men and women must recognize how much they are identical, how much alike in virtues and follies and in experiences and desires, before they can affirm the personal identities that make them unique. These twin senses of identity converge in the final act, dramatically embodied in the reunited twins who share 'One face, one voice, one habit, and two persons'.

But at what point do the reflections stop? Beyond the onlookers upon the stage who behold this ceremony of recognition is the larger audience of the illusion that is Twelfth Night. The play itself is 'a natural perspective, that is and is not': a mirror held up to nature intended to reflect the contours of reality and simultaneously a work of imagination that incarnates the world of being in a world of playing. What the audience encounters in the mirror of the play is its own reflected identity in the characters who play out their experiences upon the stage. In sharing the experience of Twelfth Night, we come to recognize the ties of identity that link our own world of being to the imagined world of the play; and, on a more personal level, we identify our private follies and desires in our fictional counterparts upon the stage. In acknowledging this kinship of resemblance, we too gain a fresh awareness of the nature of 'what I am', the true self concealed beneath the surface level of appearances. Moreover, having witnessed how deeply life is ingrained with illusion within Illyria, we may awake from the dreamworld of the play to wonder if 'what we are' in the world outside the playhouse is perhaps less static and immutable than we once believed. At this point, imagination and truth may begin to merge in our own world: 'Prove true, imagination, O, prove true' (3.4.375).

If art possesses this creative power, however, there remains the problem of dealing with the more troubling issues raised by the gulling of Malvolio. The plot contrived to convince the steward of Olivia's passion for him is enacted with deliberately theatrical overtones, and the conspirators employ deception to feed and then expose Malvolio's folly in much the same way that a playwright manipulates illusion and reality upon the stage. Yet Malvolio's enforced immersion in the world of make-believe in no way reforms him. Nor does it enable him to gain a more positive understanding of either his own identity or the ties that bind him to his fellow men. Malvolio remains isolated and egotistical to the end. What is more, the mockers who have seen their own follies reflected in Malvolio's comic performance are no more altered by the experience than he is.

The plot against Malvolio is originally planned along the traditional lines of Jonsonian 'humour' comedy: the victim's folly is to be exposed and purged by comic ridicule to rid him of his humour. Maria explains the scheme in such terms to her fellow satirists:

… it is his grounds of faith that all that look on him love him; and on that vice in him will my revenge find notable cause to work…. I know my physic will work with him.

(2.3.151-3;172-3)

But there is also a strong dose of personal spite in their mockery. The pranksters are really more eager to be entertained by Malvolio's delusions of grandeur than they are to reform him. Maria guarantees her audience that 'If I do not gull him into an ayword, and make him a common recreation, do not think I have wit enough to lie straight in my bed' (11. 134-7). It is certainly in this spirit that the revellers take the jest. 'If I lose a scruple of this sport', Fabian pledges as the game begins, 'let me be boil'd to death with melancholy' (2.5.2-3).

Maria plants the conspirators in the garden box-tree like spectators at a play, bidding them: 'Observe him, for the love of mocker y; for I know this letter will make a contemplative idiot of him' (11. 18-20). Malvolio, who
'has been yonder i’ the sun practising behavior to his own shadow this half hour' (11. 16-18), is a natural play-actor; and he immediately takes the bait of this improvised comedy. The megalomania suppressed beneath his Puritan façade is comically set free by the discovery of Maria's forged letter, and he is soon persuaded to parade his folly publicly by donning the famous yellow stockings.

Maria's letter cleverly exploits Malvolio's conceit, but he himself manufactures his obsession. With only the flimsiest of clues to lead him on, Malvolio systematically construes every detail of the letter to fuel his newly liberated dreams of greatness, never pausing to consider how ludicrous the message really is:

> Why, this is evident to any formal capacity, there is no obstruction in this. And the end—what should that alphabetical position portend? If I could make that resemble something in me! …
> M.O.A.I. This simulation is not as the former; and yet, to crush this a little, it would bow to me, for every one of these letters are in my name.

(11. 116-20; 139-41)

The deception deftly juggles appearances to prompt Malvolio to his own undoing, but there is always the danger inherent in such games of make-believe that the dupe will no longer be able to cope with reality once his self-fabricated fantasies are stripped away from him. 'Why, thou hast put him in such a dream', Sir Toby laughingly tells Maria, 'that when the image of it leaves him he must run mad' (11. 193-4). But no such qualms disturb these puppet-masters. When Fabian echoes this warning, Maria replies 'The house will be the quieter' (3.4.134).

Although it is the letter that persuades Malvolio to play out his fantasies in public, his audience has already been treated to a display of his fondness for make-believe. While the conspirators impatiently wait for him to stumble on the letter, Malvolio muses on his dream of becoming the rich and powerful 'Count Malvolio'. As he paints the imaginary scene of Sir Toby's future humiliation and expulsion, the eavesdroppers find themselves unexpectedly drawn into the performance they are watching. Sir Toby, in particular, becomes so enraged at this 'overweening rogue' (1. 29) that Fabian must repeatedly warn him to control his outbursts: 'Nay, patience, or we break the sinews of our plot!' (11. 75-6). Malvolio's audience prove to be as uncertain as their gull about the boundaries separating fiction from fact, as will be made comically evident in the miscalculations and confusions that result from the duel contrived between Sir Andrew and Cesario. Taken unawares by Malvolio's tableau of future triumph, the three spies inadvertently become participants in the comedy they are observing.

Malvolio's private playlet of revenge and his discovery of the letter are staged in a deliberately theatrical manner, played before the unruly audience of Sir Toby, Sir Andrew, and Fabian. His play-acting exposes Malvolio's folly to comic perfection; but it also, in its own topsy-turvy fashion, holds the mirror up to nature for both the spectators in the box-tree and the audience beyond the stage. It is a glass more like a funhouse mirror than the symmetry of a 'natural perspective', but in Malvolio's absurd performance the pranksters are presented with a comically distorted image of their own follies and delusions. Malvolio's folly is made more ludicrous by the charade that openly exposes the overweening ambition and conceit normally held within respectable bounds by the sanctimonious steward, but the difference between the performer and his audience is simply one of degree.

If Malvolio is treated by these practical jokers as a puppet on a string, a 'trout that must be caught with tickling' (2.5.22), Sir Andrew is no less Sir Toby's own 'dear manikin' (3.2.53). His auditors deride Malvolio's pretensions to his mistress's love; but Sir Andrew's wooing of Olivia is equally preposterous, and his hopes are based entirely on Sir Toby's counterfeit assurances. Sir Toby may ridicule Malvolio's determined efforts to 'crush' the letter's message to accommodate his own desires, but the assertion of imagination over concrete reality is no less a characteristic trait of Sir Toby himself, who has earlier insisted that 'Not to be a-bed after
midnight is to be up betimes' (2.3.1-2). The only difference in their dealings with words is that Malvolio uses logic as a crowbar to twist and hammer meanings into a more gratifying form, while Sir Toby chooses to suspend logic altogether. The steward's obsessive instinct for order is simply the inverted image of Sir Toby's own mania for disorder. Even their plot to put an end to Malvolio's authority is dramatized for the spectators in a parody version supplied by Malvolio's own dream of revenge.

The spectators are in their own ways as much drowned in excesses of folly and imagination as their gull. But as they mock the woodcock nearing the gin, the on-lookers fail to realize that the 'play' itself is an imaginary snare for the woodcocks in its audience. Sir Andrew's reaction to Malvolio's fictive dialogue with a humbled Sir Toby exemplifies the fatuity of his fellow auditors:

\[
\begin{align*}
\text{Malvolio.} & \quad \text{'Besides, you waste the treasure of} \\
& \quad \text{your time with a foolish knight'}— \\
\text{Andrew.} & \quad \text{That's me, I warrant you.} \\
\text{Malvolio.} & \quad \text{'One Sir Andrew'}— \\
\text{Andrew.} & \quad \text{I knew 'twas I, for many do call me} \\
& \quad \text{fool.}
\end{align*}
\]

(2.5.77-81)

Sir Andrew makes the correct identification but remains oblivious to the intended reprimand. In the same fashion, all the members of Malvolio's audience observe their reflected images in the mirror of the comedy without recognition, thus comically fulfilling Jonathan Swift's famous dictum that 'Satyr is a sort of Glass, wherein Beholders do generally discover every body's Face but their own.'

By the time Malvolio encounters Olivia again after reading her supposed declaration of love, his perceptions have become completely mastered by his delusions. To those around him who are unaware of the deception, Malvolio appears quite mad. 'Why, this is very midsummer madness', (3.4.56) cries Olivia in response to the incoherent ramblings of this smiling, cross-gartered apparition. From his own perspective, however, he is unquestionably sane, and it is the rest of the world that is behaving strangely. Unlike Viola or Feste, Malvolio has no talent for improvisation. His rejection of a rigidly defined identity, although it gives him a temporary release from social bonds, affords Malvolio no room for flexibility.

Faced with the fluidity of the world of playing in which he suddenly finds himself, Malvolio insists on trying to marshal shifting appearances back into regimented formation:

\[
\text{Why, every thing adheres together, that no dram of a scruple, no scruple of a scruple, no} \\
\text{obstacle, no incredulous or unsafe circumstance—What can be said?}
\]

(3.4.78-81)

But Malvolio's efforts to control the flux are like trying to sculpt water into solid shapes; the material itself refuses static form. His obstinate insistence that the words and actions of those around him should conform to his will makes him appear mad to his fellow players, while they seem equally insane to him.

The quandary over who is mad and who is sane becomes even more entangled in the dialogue between the incarcerated steward and the Fool, disguised as Sir Topas. Malvolio is entirely just in his charge that 'never was man thus wrong'd.... they have laid me here in hideous darkness' (4.2.28-30). From his perspective, the darkness is tangible and his madness the fantasy of those around him. Yet it is also true, as 'Sir Topas' insists, that the darkness is symbolic of the shroud of ignorance and vanity through which Malvolio views the world:
Malvolio. I am not mad, Sir Topas, I say to you this house is dark.

Clown. Madman, thou errest. I say there is no darkness but ignorance, in which thou art more puzzled than the Egyptians in their fog.

Malvolio. I say this house is as dark as ignorance, though ignorance were as dark as hell; and I say there was never man thus abus'd. I am no more mad than you are.

(4.2.40-8)

His 'confessor's' riddles seem designed to force Malvolio to a new understanding of his identity as a fallible and often foolish human being. But 'Sir Topas' is himself a fake—a self-avowed corrupter of words whose disguised purpose is not to heal Malvolio's imagined lunacy, but to drive him deeper into madness. Feste juggles words with ease because he understands that they are 'very rascals since bonds disgrac'd them', but Malvolio stubbornly insists on making rascal words behave with as much decorum as he believes they should. Throughout this scene, Malvolio returns to his claim 'I am not mad' with the same tonic emphasis as Viola reverts to 'what I am' in her dialogue with Olivia (act 3, scene 1). But being incapable of Viola's playful attitude, Malvolio rejects any imaginative interpretation of his dilemma.

His rigidity toward both language and experience leaves him incapable of comprehending any truth beyond the concrete limits of reality. 'I tell thee I am as well in my wits as any man in Illyria' (4.2.106-7), Malvolio insists with absolute justice; but how far from madness are the other inhabitants of Illyria? In a very ironic sense, Malvolio gets what he deserves when he is imprisoned in his cell. Having persisted in imposing his arbitrary order upon capricious words and appearances, he is himself confined in a guardhouse for his own caprices.

Whatever his deserts, there is nonetheless considerable justice to Malvolio's charge that he has been much abused by the deceivers who have made him 'the most notorious geek and gull / That e'er invention play'd on' (5.1.343-4). Ironically, Malvolio's absurdly inflated ego and his isolation are only hardened by his satiric treatment. Even in making his defence, Malvolio stubbornly maintains yet another delusion, that Olivia is personally responsible for his torment. Humiliated beyond endurance, Malvolio stalks off the stage with a final ringing assertion of his vanity and alienation: 'I'll be reveng'd on the whole pack of you' (1. 378). Malvolio stands as an isolated figure in a festive world from beginning to end because never once does he honestly perceive his own nature, the true identity of 'what I am', or the corresponding ties of identity that bind him to his fellow players.

The pranksters, in spite of their fondness for 'fellowship', do not fare much better. They have already demonstrated a failure to detect their own follies in Malvolio's pretensions, and it is therefore appropriate that the beguilers as well as their gull should be missing from the witnesses at the recognition scene and the subsequent revelations. Sir Toby, in particular, suffers for his failures of identification. After having challenged Sebastian to a fight in the mistaken belief he was the timorous Cesario, Sir Toby rages onto the stage with a bloody head, angrily spurning the comfort of his friend Sir Andrew: 'Will you help?—an ass-head and a coxcomb and a knave, a thin-fac'd knave, a gull!' (5.1.206-7).

Whereas the mistaken identities and role-playing in the romantic plot centering on Viola ultimately lead, in the recognition scene, to a renewal of identity and the human bonds of kinship and marriage, Malvolio's immersion in a world of make-believe yields no such beneficial rewards. The ironic counterpart to the recognition scene with its unravelling of identities is Malvolio's dungeon scene. There, Malvolio is literally enclosed in darkness in a cell cutting him off from all direct human contact, and he is bedevilled by tricksters.
who would like to drive him into deeper confusion. Nor does his audience there or in the garden scene gain
any greater insight into their own characters. This failure of imagination, set against Viola's own miraculous
success, reflects ironically on the supposedly therapeutic value of 'playing' and the dubious morality of the
wouldbe satirists as much as it does on Malvolio's own recalcitrance. Malvolio's final words and his incensed
departure add a discordant note to the gracefully orchestrated harmonies of the final act.

Malvolio's response to his comic purgatory stirs un-resolved questions about the value of playing with reality.
Whereas Viola's part in the comedy reveals how the release that playing allows can lead to a renewed sense of
identity and human bonds, Malvolio's role exposes the other side of the coin, the realm in which release of
imagination leads only to greater isolation and imperception. Fabian's jest about Malvolio's absurd
play-acting, 'If this were play'd upon a stage now, I could condemn it as an improbable fiction' (3.4.127-8),
like the theatrical overtones of Viola's improvisations and the playlike quality of the recognition scene,
deliberately opens up the vistas of the play by reminding us that we are witnesses of a play, 'a natural
perspective, that is and is not'. But amusing as Malvolio's surrender to playing is, it raises the most disturbing
questions in the play. Can men, in fact, ever perfectly distinguish what is real from what is imagined or
intentionally spurious? Can they ever come to know the truth about themselves, the identity appearances have
concealed from them?

Twelfth Night itself offers no pat solutions. In a comic world devoted to playing and yet mirroring the actual
world of being, in which identities are both mistaken and revealed, in which deception can both conceal truths
and expose them, and in which bonds have disgraced the words on which men are dependent for
communication, no permanent resolution of these ambiguities is ever possible. Shakespeare himself shrugs off
the task of providing any final illumination with delightful finesse. As the play draws to a close with Feste's
epilogue song and the world of playing begins to dissolve back into the world of being, the Fool concludes:

    A great while ago the world begun,
    With hey ho, the wind and the rain,
    But that's all one, our play is done,
    And we'll strive to please you every day.

Twelfth Night Literary Criticism (Vol. 34): Relation To
Elizabethan Culture

Charles Tyler Prouty (lecture date 1966)

[In the following essay first delivered at the 1966 Shakespeare Seminar, Prouty positions Twelfth Night with
regard to Shakespeare's source materials, focusing specifically on his interpretation of Renaissance notions of
courtly love.]

In some thirty years of teaching it has been my experience that of all the plays in the Shakespeare canon the
comedies are the most difficult to teach. The Joyous Comedies in particular require so much explanation that
we are in danger of losing the play in establishing what I regard as the essential details. The reason is very
simply that these are sophisticated plays based on a complex of social and literary conventions that were well
known to the Renaissance world in general and the Elizabethan world in particular but are almost unknown to
our world. In Twelfth Night we are dealing almost exclusively with the conventions of love and the behaviour
of lovers—conventions which are completely alien to our world. The important thing, however, is
Shakespeare's reaction to these conventions, which controls the nature of his play and makes it, therefore,
peculiarly his own. In the social world of the Renaissance the traditions of the Middle Ages which we call Courtly Love flourished, and these conventions were incredibly sophisticated; they are not certainly, to be seen in the context of the banal sexuality of our times.

For example, in the 1570s a novella by George Whet-stone entitled 'Rinaldo and Guetta' tells us a lovely story. An aged man by the name of Frizaldo is in love with the fair Giletta, but Giletta is not in love with him. Rather she is in love with Rinaldo, a hand-some but poor young man who is, of course, in love with her. On a specific occasion Frizaldo has entered Giletta's chamber while Rinaldo is outside underneath the balcony singing a love song. Frizaldo, recognizing the voice, pretends ignorance as far as Giletta is concerned, and so he addresses her with the term of 'Mistress'. Giletta, in order to conceal her knowledge of the singer outside, is forced to use the appropriate reply: she addresses Frizaldo as 'Servant'. These words, 'Servant' and 'Mistress', are conventional words and do not necessarily imply a sexual relationship; but the implication is enough for the wretched Rinaldo, who flees the scene and jumps into the river, ostensibly to die. But, perhaps because of the temperature of the water or for some other reason, he has second thoughts, swims to the farthest shore, returns in the nick of time to rescue the fair Giletta, and all ends happily! The conventions in this kind of story are typical, and, for example, we see in the second scene of Twelfth Night, where the ship captain tells Viola, 'What great ones do, the less will prattle of,' that the types of behaviour reflected here were not exclusively the property of the great; while the great had established the game, the game itself was known through all strata of society. However by the 1590s the game had become the subject of witty scoffing. For example, in Greene's Menaphon, first published in 1589, we find these lines from 'Doron's Eclogue ioynd with Carmela's'. Doron addresses Carmela:

Carmela deare, evert as the golden ball
That Venus got, such are thy goodly eyes,
When cherries iuice is iumbled therewithal!,
Thy breath is like the steeme of apple pies.

Thy lippes resemble Two Cowcumbers faire,
Thy teeth like to the tuskes of fattest swine,
Thy speach is like the thunder in the aire:
Would God thy toes, thy lips and all were mine.

Here we can see how the conventional epithets of 'ruby lips' and 'pearl-like teeth' have been reduced to rustic figures, and thus how the whole game is deliberately undercut and becomes the subject of laughter. The same kind of thing occurs in As You Like It when Rosalind tells Orlando, 'Men have died from time to time and worms have eaten them but not for love.' This, of course, is a great blow to the over-serious Orlando because he really does believe that he would die from love, even though he fails to keep his appointments with Rosalind in spite of all his oaths. And Rosalind has played with the conventions still further with her references to Troilus's having his brains dashed out with a Grecian club and Leander's being drowned by catching a cramp on a hot summer's night. The whole set of conventions was understood by the Elizabethans (and as a matter of fact it was still understood in prewar England as we can see in such a play as Noel Coward's Private Lives or in the popular press. Such periodicals as the Tatler were filled with pictures of the 'great ones' at balls, at hunts, at race meetings and all that sort of thing, and these were largely seized upon by the middle and lower classes as subjects for conversation and objects of admiration.)

The conventions are clearly indicated in the source materials of Twelfth Night so we must know about these materials and must try to ascertain Shakespeare's comprehension of them, what he read and also what he knew about the intellectual milieu in which these conventions operated and out of which the written materials came.

The first mention of Twelfth Night, in John Manningham's Diary, is in the entry for 2 February 1602. At the Middle Temple the Candlemas Feast was celebrated by a performance which Manningham describes as 'a
play called Twelve Night or What You Will, much like the Commedy of Errores, or Menechmi in Plautus, but most like and neere to that in Italian called Inganni.'

The latter play to which Manningham refers is an Italian play of 1562 written by one Nicolo Secchi. More important for our purposes, however, is the earliest known play dealing with the theme of separated twins; this, *Gli'Ingannati*, first printed in 1537, was presented by the Academy of the Intronnati of Siena—Intronnati, of course, means 'Thunderstruck'. In its printed form it was preceded by another play, a comedy entitled the *Comedia del Sacrificio*, which was also a presentation of the Thunderstruck Ones. Here the members all appear as rebels against the tyranny of love. In the centre of the stage is a large urn with a fire burning inside and each member of the Academy in turn makes his way forward to cast into the urn some token of his erstwhile beloved so that it is consumed by the flames and thus symbolizes his rejection of love. He, of course, speaks appropriate lines to indicate what he is doing and why he is doing it.

Now this Academy is not something unusual. It was one of many that spread all over Italy during the late fifteenth and early sixteenth century, and these derived from the fifteenth-century Platonic Academy in Florence which was a very serious Academy (for example, Ficino's Commentary on Plato's *Symposium* was only one of the works that came out of it). The serious purpose was, however, very soon lost and the jesting spirit took over. Practically every city in Italy had an Academy by the sixteenth century, and the custom of such academies spread to even France and Germany. The aim had now become one of producing courtiers in imitation of *Il Cortegiano*, polished and refined gentlemen. The names of the societies and of the individual members became wittily allegorical or symbolic. Wit was prized above all, everything was a subject for jesting.

It is just such an academy as this that we find in Shakespeare's *Love's Labour's Lost* or in the festivities at Gray's Inn, entitled *Gesta Grayorum*. Now let us turn to the play of the 'Thunderstruck Ones'. It's a typical Italian comedy of plot, the Commedia Erudita. There is no attention paid to character or morality; the play is amoral. Most important there is no tone except the tone of jesting and a complete lack of seriousness. This is the most important aspect that we have to consider in *Twelfth Night*—the whole aspect of tone.

Specifically the immediate English source is a short story by Barnaby Riche, 'Apollonius and Scilla', contained in a collection which Riche wrote and entitled *Riche His Farewell to the Militarle profession*, printed in 1581. Riche's point of view is quite different from that of the Italians and, of course, from that of Shakespeare. He has gathered together these stories, according to his own word, for 'the onely delight of the courteous Gentlewomen bothe of England and Ireland'. Riche is, in short, a bourgeois moralist who, as a very moral gentleman, takes a very dim view of the whole game of Love. In his own preface to the volume he speaks of the poisoned cup of error, love being madness, wickedness, etc., etc. But we do not need to labour that point, it will appear later.

Exactly as Riche began his story with comments on love in general so did Shakespeare, but with what a difference: 'If music be the food of love, play on, Give me excess of it … ' (It's interesting that Kemble transposed this scene, made it the second scene, and made Viola's appearance, which we find in scene two of modern editions, the first—Sir Tyrone Guthrie did the same thing in his production at this Stratford.) This is, of course, a gross misunderstanding of the play because one needs this first scene to set the tone of the whole play. The problem is, of course, how we are to read this soliloquy of Orsino's. It can be read as 'big' lyric poetry, with high soaring gestures, and so on, or perhaps, more wisely, it can be read with a certain degree of archness which will give the audience an idea of a slight undercutting. As a matter of fact, the whole show is given away by the Duke's final lines, 'So full of shapes is fancy / That it alone is high fantastical,' which are immediately followed by Curio's inquiry, 'Will you go hunt, my lord?'

**DUKE:** What, Curio?

**CURIO:** The hart.
DUKE: Why, so I do, the noblest that I have.
O, when mine eyes did see Olivia first,
Methought she purged the air of pestilence.
That instant was I turned into a hart,
And my desires, like fell and cruel hounds,
E'er since pursue me.

The reference was obvious to anybody in Shakespeare's audience because even the middle classes would have read Ovid in school. They would have known that the learned Duke was referring to the myth of Actaeon who gazed upon Diana bathing and was punished by being pursued by his own hounds after a vengeful Diana metamorphosed him into a stag.

The same kind of learned reference is found in the ensuing dialogue when Valentine reports about Olivia's reaction to the Duke's suit. The key here is, of course, in the language and the way it is used. Valentine knows the proper words: 'And water once a day her chamber round with high offending brine.' But the Duke does even better:

O, she that hath a heart of that fine frame
To pay this debt of love but to a brother,
How will she love when the rich golden shaft
Hath killed the flock of all affections else
That live in her; when liver, brain, and heart,
These sovereign thrones, are all supplied and filled,
Her sweet perfections, with one self king,
A way before me to sweet beds of flow'rs;
Love-thoughts lie rich when canopied with bow'rs.

In other words, Orsino has read all the right books. The 'rich golden shaft' is, of course, Cupid's arrow. He has two sets of arrows, gold and lead; the gold inspires love, the lead inspires dislike, or to use the Elizabethan word, disdain. Furthermore, it is not just a golden arrow, it is a rich, golden shaft. And Orsino continues to demonstrate his knowledge as well as his imaginative powers. The seats of her affections are thoroughly described, 'liver, brain, and heart'—the 'sovereign thrones'.

Now according to various theories of love, the seat of the affections could be any one of these three parts of the body—usually the heart, though of course the liver and brain figured too. But Orsino has to get them all in just to prove how learned he really is. Here then is a key to the whole play. The use of language, the words, the conceits, the figures, the references, but most important the way in which these are used and the tone in which they are spoken, is exemplified for us quite clearly, I think, by what I have said about Curio's entry, the Ovid reference, Cupid's arrows and the seats of the affections.

We find the same tone in Viola's first appearance in the second scene:

VIOLA: What country, friends, is this?
CAPTAIN: This is Illyria, lady.
VIOLA: And what should I do in Illyria?
My brother he is in Elysium.

Having consigned her brother to the other world, Viola at once imagines that he is not dead. 'Perchance he is not drowned. What think you, sailors?' One notes the three 'perchances' in three successive lines: 'perchance
he is not drowned; the captain replies that it is 'perchance' she was saved; Viola replies, 'O my poor brother, and so perchance may he be.' This is no accident; this is another perfectly clear clue to an Elizabethan audience, as it should be to us, that games are going on. The game continues with the Captain, who refers to her brother whom he had seen clinging to a mast

Where like Arion on the dolphin's back,
I saw him hold acquaintance with the waves
So long as I could see.

The Captain is learned, he knows his classical mythology too. The story of Arion and the dolphin was well known. This matter of tone is further evidenced by the way in which coincidence now takes over. It just so happens that the Captain was born near where they have been cast up on the seacoast and he knows all about Orsino. So, too, does Viola. 'Orsino! I have heard my father name him. He was a bachelor then.' (One notices Viola's first reference, 'He was a bachelor then.' Her 'fell and cruel' intent is quite clear!)

Following the Captain's reference to Olivia and his description of her, Viola momentarily forgets about the bachelor. Now she is going to serve this lady who has retired from the world and whose sad condition suits with Viola's. However, she immediately changes her mind again and decides to serve Orsino, of course in disguise. She is going to be a eunuch to account for her voice, and the Captain is to introduce her and to secure her a position in Orsino's service. As far as this matter of tone is concerned, the exit line is interesting. Viola says, 'I thank thee. Lead me on.' Well, what a way to end the scene!

Let us follow this whole matter of tone in the main plot. Viola next appears in Act I, Scene iv, where she is going under the assumed masculine name of Cesario. She is very high in the Duke's favour, so high in fact that she is to go a-wooing for him: 'I'll do my best to woo your lady.' But suddenly we are struck over the head by her concluding lines, with their nice use of couplet, in an aside, 'Yet a barful strife! Whoe'er I woo, myself would be his wife.'

In all the typical Elizabethan romances this is the way they fall in love. It is a coup de foudre—all of a sudden they are in love. This is the first we have heard of Viola's love. We might have anticipated it, but the way in which it is delivered to us gives us the tone of the play and the tone with which we are expected to approach the love portions of the play.

But it most certainly should be noted that, although we are dealing with a convention, the language of Viola here, and of other characters in similar situations, is not stylized, not a language of conventions. Here we have a plain style, with a simple, bare, statement of fact. Elsewhere when Viola is dealing with other conventions she can use an imaginative language, a poetic language, but here in her declaration of love, she does not.

The next time we meet Viola is toward the end of the first act. Here she has come a-wooing for Orsino, but the scene has begun with our introduction to the lady Olivia whose first line, to us, is 'Take the fool away' (referring, of course, to the Clown, Feste). In the ensuing dialogue with Feste and Malvolio there is no evidence whatsoever of Olivia's great sorrow of which we have heard so much but which she never displays. Feste does ask her why she mourns, but she makes merely a brief and undeveloped factual response to this. Olivia ticks off Malvolio, she greets the drunken Sir Toby rather easily and her big moment comes, as I have said, when Viola comes a-wooing for Orsino.

This encounter between Viola (Cesario) and Olivia is what I choose to call the 'Big Game' scene, because in this scene both Viola and Olivia know that each is playing a game and each one of them knows that the other knows that respective roles are being performed. Just to make sure that we do not miss the point Viola begins by referring to herself as an actor: 'I would be loath to cast away my speech; for, besides that it is excellently well penned, I have taken great pains to con it.' In other words, she has a set speech which she has ostensibly
written herself and which she has learned by heart. The same figure of an actor is carried on in the ensuing
dialogue when Olivia inquires, 'Are you a comedian?' 'No', says Viola, 'no, my profound heart; and yet (by the
very fangs of malice I swear) I am not that I play.' A few lines later she again refers to her speech, 'Alas, I
took great pains to study it, and 'tis poetical.' An actual definition of her role is found when she says, 'I am a
messenger.' She subsequently uses, of course, the language of heraldry, as does Olivia. And here the dialogue
gives a clear indication of the nature and intention of the scene, when Olivia says, 'Sure you have some
hideous matter to deliver, when the courtesy of it is so fearful. Speak your office' (the office of herald). One
notes the adjectives 'hideous' and 'fearful'; such matters, of course, are not for everyone's ears, and so Viola
makes it quite clear that she will only speak to Olivia: 'It alone concerns your ear. I bring no overture of war,
no taxation of homage. I hold the olive in my hand. My words are as full of peace as matter.' These are the
phrases, the conventional phrases, of a herald.

Olivia opens the next gambit by inquiring, 'Now, sir, what is your text?', to which Viola replies, 'Most sweet
lady—'. Olivia: 'A most comfortable doctrine, and much may be said of it. Where lies your text?' Now the use
of this word 'text' is a definite reminder of the language of love, which is part of the amalgamation of the
Petrarchan tradition with that of Courtly Love in which the lover becomes an almost religious figure and the
lady, of course, a saint. (Near the beginning of his career in The Two Gentlemen of Verona Shakespeare uses
this religious conceit in connection with love in the dialogue in the very first scene between Valentine and
Proteus.) The conceits continue. In answer to the inquiry, 'Where lies your text?' Viola replies, 'In Orsino's
bosom.' Olivia asks, 'In his bosom? In what chapter of his bosom?' To which Viola replies, 'To answer by the
method, in the first of his heart.' Thus the figure of the 'text' of her message has been related to Orsino's heart.
Olivia is playing along and uses the word 'chapter', referring, of course, to 'text'; one is curious as to just what
Viola means by the 'method'. Certainly she doesn't mean 'method' in the modern sense of 'mumble and
scratch'; she means 'method' in following the conventions. This is the way you play the Game; this is what you
ought to say.

Viola's next move is to ask to see Olivia's face, and Viola can be a little bit arch or, to some people's tastes,
almost cruel. When she comments on the vision of Olivia's beauty, 'Excellently done, if God did all,' Olivia
insists, 'Tis in grain sir; 'twill endure wind and weather.' Says Viola,

'Tis beauty truly blent, whose red and white
Nature's own sweet and cunning hand laid on.
Lady, you are the cruellest she alive
If you will lead these graces to the grave,
And leave the world no copy.

(We are at once reminded of similar ideas in Shakespeare's Sonnets where the friend is urged to marry so that
his beauty may be passed on through his children to subsequent generations and thus not be lost to the world.)
Well, this is rather old stuff by about 1600, the probable date of Twelfth Night. Olivia is not going to have
much more of this, and solves the problem of preserving her beauty by saying,

O, sir, I will not be so hard-hearted. I will give out divers schedules of my beauty. It shall be
inventoried, and every particle and utensil labelled to my will: as, item, two lips, indifferent
red; item, two grey eyes, with lids to them; item, one neck, one chin, and so forth. Were you
sent hither to praise me?

Beauty has thus been reduced to an inventory such as one might find appended to an inquisition post mortem
or in a testamentary paper such as a will. The conceit that Olivia is here employing punctures, of course, any
idealization of love. It completely destroys the traditional description of a beautiful woman derived from
Ariosto's description of Alcina, one that begins at the forehead and proceeds down to the eyebrows, the eyes,
the nose, the lips, the teeth, the throat and so on.
Olivia thinks rather well of Orsino:

Yet I suppose him virtuous, know him noble,
Of great estate, of fresh and stainless youth;
In voices well divulged, free, learned, and valiant,
And in dimension and the shape of nature
A gracious person. But yet I cannot love him.
He might have took his answer long ago.

At this point Viola remembers her speech and launches into it when Olivia inquires, 'Why, what would you?'

Make me a willow cabin at your gate
And call upon my soul within the house;
Write loyal cantons of contemned love
And sing them loud even in the dead of night;
Halloe your name to the reverberate hills
And make the babbling gossip of the air
Cry out 'Olivia!' O, you should not rest
Between the elements of air and earth
But you should pity me.

This lyric strain is soon ended by Olivia whose only comment is, 'You might do much. What is your parentage?'

VIOLA: Above my fortunes, yet my state is well.
I am a gentleman. OLIVIA: Get you to your lord.
I cannot love him. Let him send no more.

Viola does her best to preserve the traditional love strain:

Love makes his heart of flint that you shall love;
And let your fervor, like my master's, be
Placed in contempt. Farewell, fair cruelty.

And with only a few more words than Viola has used to inform us of her love for Orsino, Olivia tells us that she has fallen in love with Viola in her guise of Cesario:

Not too fast; soft, soft,
Unless the master were the man. How now?
Even so quickly may one catch the plague?
Methinks I feel this youth's perfections
With an invisible and subtle stealth
To creep in at mine eyes.

And, at the conclusion, 'Well, let it be.' This is all we hear. She has fallen love; there is nothing much to be done about it. Well, let it be.
The ring episode concludes this part of our study. Olivia has sent Malvolio in pursuit of Viola-Cesario, telling him that the ring had been left with her by Cesario, presumably as a gift from Orsino. Of course, no such ring has appeared. This is simply a device of Olivia's, and Viola quite understands what's going on when she encounters Malvolio. Here again the language is very important. Viola says:

She loves me sure; the cunning of her passion  
Invites me in this churlish messenger.  
None of my lord's ring? Why he sent her none.  
I am the man. If it be so, as 'tis,  
Poor lady, she were better love a dream.  
Disguise, I see thou art a wickedness

Wherein the pregnant enemy does much.  
How easy is it for the proper false  
In women's waxen hearts to set their forms!  
Alas, our frailty is the cause, not we,  
For such as we are made of, such we be.

There can be no question that in the terms 'pregnant enemy' and 'proper false' we have a reference to Satan, but what is such a serious reference doing in such a context? Well, very simply in my view it emphasizes the whole artificiality of the episode that we have witnessed—the game that Olivia and Viola have been playing with one another. And this artificiality is, of course, emphasized by the couplet with which Viola ends the scene:

O Time, thou must untangle this, not I;  
It is too hard a knot for me t' untie.

Again the couplet rhyme, again the bald statement of fact—nothing much can be done about it, time just has to work it out somehow or other. This final couplet, like Viola's couplet announcing her love for Orsino, is in the best tradition of the romances, exactly the sort of thing that we find in Two Gentlemen of Verona over and over again. The point is that we are laughing at, or are amused by, the whole business. The ultimate absurdity in this play is found in the denouement. The Duke learning of Olivia's love, is ready to kill Cesario. He breaks forth:

O thou dissembling cub, what wilt thou be  
When time hath sowed a grizzle on thy case?  
Or will not else thy craft so quickly grow  
That thine own trip shall be thine overthrow?  
Farewell, and take her; but direct thy feet  
Where thou and I, henceforth, may never meet.

About a hundred lines later, after Sebastian has appeared and the mystery of the identity has cleared up, the Duke is very anxious to marry Viola:

Give me thy hand,  
And let me see thee in thy woman's weeds.

Here again a declaration of love is couched in very, very simple language, lacking ornamentation or imagery of any sort: 'Let me see thee in thy woman's weeds.' This is no 'big' confession of love, no 'big lyric love stuff
whatsoever. In fact, the nearest we come to any traditional language is found when the Duke says,

Here is my hand; you shall from this time be
Your master's mistress.

We may now, I think, briefly summarize the main plot. We have been operating in a world of artificiality. The whole question of reality has been raised by Viola. The business of falling in love is completely artificial. The switch of the Duke is completely artificial. The characters themselves are not, in the accepted sense of the word, rounded, three-dimensional characters. They are, in essence, flat, but this does not mean that Shakespeare has lacked dramatic skill—far from it. He is using these characters for his own purposes. He is playing games with us, and, by playing games, he convinces us of the reality of the characters. Of course we like Viola. She is a very sweet girl, but there is no depth to the character, no dimension to it beyond the purely theatrical. In other words, we are dealing here with theatrical truth as opposed to the truth of the printed page. The illusion in the theatre will hold us, will captivate us, and, in the theatre, no more is needed for this artificial love. It's exactly the sort of thing that Noel Coward does to perfection. In other words, I am suggesting that we treat the play as a play and examine it on the basis of its theatrical premises. Here these premises are the artificial world of lovers as exemplified over and over again in the world of Queen Elizabeth's court where such games were played, such lines spoken, such attitudes taken; and everything turns out all right, of course.

As we turn to the subplot we find ourselves in a very real world indeed. Sir Toby and Sir Andrew are drunk every night. Toby is, of course, urging Sir Andrew on, ostensibly to woo Olivia, but mainly because Sir Andrew has three thousand ducats a year. The hypocrisy of Toby's attitude toward Sir Andrew and his possible wooing of Olivia is found in his description of Sir Andrew: 'He's as tall a man as any's in Illyria'—'tall' suggesting a 'fine, upstanding noble fellow'. Furthermore, according to Toby, Sir Andrew has other gifts: 'He plays o' th' viol-de-gamboys, and speaks three or four languages word for word without book, and hath all the good gifts of nature.' But immediately Sir Andrew appears his stupidity is apparent in his misunderstanding of Toby's simple injunction, 'Accost', which he takes to be Maria's name. As far as being a musician or having other talents, as far as languages go, Sir Andrew denies them specifically in his own words. For example, he says, 'Methinks sometimes I have no more with than a Christian or an ordinary man has. But I am a great eater of beef, and I believe that does harm to my wit.' A few lines later he demonstrates his complete ignorance of foreign languages when Toby inquires, 'Pourquoi, my dear knight?' 'What is pourquoi?' asks Andrew, 'Do, or not do? I would I had bestowed that time in the tongues that I have in fencing, dancing, and bear-baiting. O, had I but followed the arts!' Sir Toby's original description of Andrew in terms of the courtier, the gentleman, is completely invalidated by Andrew himself. He is rather the exact opposite of the ideal courtier, the ideal courtly gentleman. When describing his abilities in dancing, in response to Toby's inquiry, 'What is thy excellence in a galliard, knight?' 'Faith, I can cut a caper,' says Sir Andrew; and he goes on, 'And I think I have the back-trick simply as strong as any man in Illyria.' Toby hits back very, very hard: 'Wherefore are these things hid?' These things are, of course, not assets; they are not recommendations for Sir Andrew as a potential suitor for the fair Olivia—far from it.

If Sir Andrew is a caricature, so too is Malvolio. But Malvolio has the further distinction of being rather unpleasant. We see this unpleasantness quite clearly in the later scene when Sir Toby and the others are having a good time drinking and singing and eating:

My masters, are you mad? Or what are you? Have you no wit, manners, nor honesty, but to gabble like tinkers at this time of night? Do ye make an alehouse of my lady's house, that ye squeak out your coziers' catches without any mitigation or remorse of voice? Is there no respect of place, persons, nor time in you?
Here Malvolio's attitude is well described in Toby's line, 'Dost thou think, because thou art virtuous, there shall be no more cakes and ale?'

Malvolio is the enemy of joy, of cakes and ale, of pleasure in life. This has tempted some to press, I think, just a bit too hard on Malvolio as a portrait of a Puritan. No, no! Olivia is much more accurate when, earlier in the play, she has told Malvolio, 'You are sick of self-love.'

And it is this very state of mind, this being sick of self-love, that motivates the action of the subplot. Here we note that in contrast with the main plot we do have specific motivation. Things happen now for a reason. The letter is planted in order to gull and trick Malvolio. The characters involved are in a sense lowlife and quite realistic. Thus we have the artificial world of Orsino and Olivia and Viola, in contrast with the world in the servants' hall. In both plots we see foolish love, but in the artificial world everything works out all right. We need a bit of machinery to get Antonio out of trouble. And, obviously, there has got to be some machinery to get Malvolio out of gaol. But it cannot be too strongly emphasized that there is no machinery of this nature in the main plot; there we have simply the *deus ex machina* appearance of Sebastian to resolve the question of identity and all is well.

We must not leave the play without some mention of the note of sadness which has received so much comment. Reviewing a recent performance at Stratford-upon-Avon, Harold Hobson of the *Sunday Times* described *Twelfth Night* as Shakespeare's most melancholy play and also as his most wittily written.

The melancholy is found exclusively in Feste's songs, in the first:

```
O mistress mine, where are you roaming?
O, stay and hear! your true-love's coming,
   That can sing both high and low.
Trip no further, pretty sweeting;
   Journeys end in lovers meeting,
   Every wise man's son doth know;
```

and the conclusion of the second verse,

```
Then come kiss me, sweet and twenty,
   Youth's a stuff will not endure.
```

To suit the Duke's melancholy of love Feste produces another famous song:

```
Come away, come away, death,
And in sad cypress let me be laid.
```

And, of course, perhaps the most famous song is that which concludes the play when Feste sings:

```
When that I was and a little tiny boy,
   With hey, ho, the wind and the rain,
A foolish thing was but a toy,
   For the rain it raineth every day.
```

I think we should, perhaps, temper our attitude towards this note of sadness with reference to the title of the play, *Twelfth Night or What You Will*. Twelfth Night, the Feast of the Epiphany, marked the end of the Christmas festivities and, as a general rule, there was no more playing of plays at Court until the Sunday
before the beginning of Lent or on Shrove Tuesday itself. Thus very simply Twelfth Night marks the end of
the festivities of the Christmas season. In that sense it is not too difficult to understand that final stanza of the
last song.

A great while ago the world begun,
   With hey, ho, the wind and the rain;
But that's all one, our play is done,
   And we'll strive to please you every day.

The fun and the games are over and we will have one last fling, a sort of carnival time before Lent—but that is
still some weeks away. In other words, I don't think we need to be any more seriously concerned about it than
I have indicated. The title—The End of the Christmas Revelry. Yes, yes. It's all over—the fun and games are
ended. And so Adieu.

Notes

1 3.2.20-4. Quotations from Shakespeare are from The Riverside Shakespeare, ed. G. Blakemore Evans et al.
   (Boston, 1974).

3 "'As You Like It" and "Twelfth Night": Shakespeare's Sense of an Ending', in Shakespearian Comedy, ed.

4 It is relevant to recall that the festival of Twelfth Night, in addition to its popular associations with the
   holiday release of Misrule festivities, was also a religious celebration of the Feast of Epiphany.

5 Discussing the use of identical twins in The Comedy of Errors, Northrop Frye argues: ' … I feel that one
   reason for the use of two sets of twins in this play is that identical twins are not really identical (the same
   person) but merely similar, and when they meet they are delivered, in comic fashion, from the fear of the loss
   of identity, the primitive horror of the döppelganger which is an element in nearly all forms of insanity,
   something of which they feel as long as they are being mistaken for each other.' (A Natural Perspective (New
   York, 1965), p. 78)

Karin S. Coddon (essay date 1993)

[In this essay, Coddon claims that the closing of Twelfth Night emphasizes disorder over natural order,
   seeming "less than a wholesale endorsement of the privileges of rank and hierarchy."]

In Twelfth Night demarcations between male and female, master and servant, libertine and moralist come into
festive—and not so festive—collision. Typical readings of the play have focused on its misrule and
topsy-turvy as serving ultimately to reaffirm the dominant, aristocratic values against which the ostensible
"puritan," Malvolio, stands as a scorn-worthy scapegoat. 1 By this reasoning, the play may be seen as a
comedy in which insubordination, cross-dressing, and unruly "license" are, in the final analysis, contained in
the rites of unmasking and marriage. The play's notably troubled closure—Malvolio's vow of revenge, the
Captain's imprisonment, and Feste's strangely inappropriate closing dirge—has been given its due only insofar
as it contributes to the comedy's "dark outline." But the problem of closure also aligns *Twelfth Night* with *Hamlet* and *King Lear*, plays in which the apparent "restoration of order" is countered by the excesses of precedent disorder that have been repressed, perhaps, but not entirely effaced. If in *Twelfth Night* the aristocratic order is ostensibly reasserted in the pairings of Orsino/Viola and Oliva/Sebastian, the refusal of the play's closing to recuperate two of its most disorderly subjects—Malvolio and Feste—suggests rather less than a wholesale endorsement of the privileges of rank and hierarchy. For by mockingly disclosing the mutability and contingency of social rank, *Twelfth Night* demystifies one of Elizabethan authority's central political fictions. In the process, the play tests the precarious limits of theatrical "license," as festivity itself exceeds the containment of mere "fantasy inversion" to take on a markedly historical, even contestatory dimension.

Elizabethan and Jacobean culture is commonly characterized by an overwhelming obsession with "good order and obedience." Copious propaganda exhorted a minutely classified, divinely ordained social hierarchy:

```
Every degree of people in their vocation, calling, and office hath appointed to them, their duty and order. Some are in hyghe degree, some in lowe, some kynes and prynces, some inferiors and subjectes, priestes, and layemenne, Maysters and Servauntes, Fathers and children, husbands and wives, riche and poore, and everyone hath nede of other: so that in all thynges is to be lauded and praysed the goodly order of god, wythoute the whiche, no house, no citie, no commonwealth can continue and indure or laste.
```

Yet Keith Wrightson has suggested that the promulgators of this rigidly organic paradigm "knew very well that it was an ideal, an aspiration," a response to increased opportunities for social mobility rather than a reflection of universal belief or practice. As Wrightson has demonstrated, while the foremost status of the titular nobility remained a constant, there was notable slippage throughout the entire social hierarchy between supposedly rigid "degrees of people":

```
gentle status itself could be achieved as well as inherited; by obtaining a university degree, by appointment to governmental or military office, or by any man who "can live without manuell labour, and thereto is able and will beare the port, charge and countenance of a gentleman."
```

The Elizabethan propensity for classifying and even legislating (e.g., via sumptuary laws) a fixed and self-evident social hierarchy was belied by actual social practice; under James the First, rampant title-mongering would further erode the primacy of blood and birth as sole determinants of social rank. Jacobean indiscretions aside, the official propaganda chiefly served the interests of the uppermost social echelon, not the least of which was a crown intent on absolutism but without a standing militia to enforce it. For the primacy of blood, after all, lay at the core of the divine-right ideology so dear to both Elizabeth and James.

The theater, of course, already occupied the most equivocal of situations toward the aristocratic and nonaristocratic, even antiaristocratic factions. As Michael Bristol has remarked, "The social position of the players and of their work was based on two contradictory presuppositions—that they were engaged in a business or industry, and that they were engaged in 'service' to their aristocratic patrons." Government licensing and courtly patronage do not necessarily imply the theater's ideological alignment with the court, especially given the apparent, remarkable social heterogeneity of Elizabethan and Jacobean audiences. Comedy in particular tended to foster heterogeneity, as Robert Weimann has noted:

```
In matters of social custom and dramatic taste there was as yet no clear division between the rural plebs and the London middle classes. This meant that there was little difference between the middle class and the plebian reception of the Morris dance, the jig, clowning, and the like. The middle strata of these craftsmen and the more wealthy dealers and retailers enjoyed
```

545
these entertainments just as did the lower strata, the laborer, carriers, servants.  

Similarly, the very nature of theatrical representation defied "official" positions on rank and degree, as common players personated princes, male actors "boyed" females. If Malvolio, like such antitheatrical polemicists as Phillip Stubbes, disapproves of festive misrule in principle, the government's regulation of the theater testifies to its own anxieties about the drama's potential to produce (and reproduce) fictions contesting Tudor and Stuart official ideologies. The theater, like the "allicens'd fool," was to an extent authorized to enact a degree of insubordination, apparently on the thought that it would thus function as a sort of safety valve for discontent that might otherwise seek less indirect forms of expression. But as Natalie Zemon Davis has argued, festive misrule need not be conceived as either wholly contestatory or wholly conservative:

It is an exaggeration to view the carnival and Misrule as merely a "safety valve," as merely a primitive, prepolitical form of recreation… the structure of the carnival form can evolve so that it can act both to reinforce order and to suggest alternatives to that existing order.

My suggestion, then, is that Twelfth Night pointedly reinforces neither aristocratic nor anticourt values; rather, by exploding the kinds of social classifications propounded by contemporary theorists into a multiplicity of slippery, contingent positions, the play subversively confounds holiday and history, festive "license" and contestation. Officially controlled by the government and increasingly subjected to virulent antitheatrical attacks, the theater was positioned as much in a site of limited resistance as of limited allegiance. The opening—and closing—resistance of Feste the clown to narrative recuperation suggests not only the possibility of theatrical evasion of order, but also a material if limited autonomy from the institutional structures seemingly acknowledged in the reversions of the young nobles and the overreaching Malvolio to their proper places and degrees.

Lawrence Stone's argument for a "crisis of the aristocracy" as a major precipitant of the 1642 revolution has been roundly criticized by a number of social historians. It has been suggested, for example, that radical social change in seventeenth-century England was due more to the emergence of landed and professional "middle classes" than to a decline in the aristocracy's prestige. Yet without asserting a direct causality between aristocratic excesses and the development of a revolutionary movement, it seems clear that the nobility's profligate expenditures and conspicuous consumption served to weaken the aristocracy both economically and in terms of popular perception. The latter is evidenced in mocking gallows derision throughout Jacobean tragedy; Shakespeare's Lear and Tourneur's Revenger's Tragedy offer bitter critiques of courtly extravagances. Even so worldly a blade as John Harington remarked upon the libertinism of the Jacobean court, where

those, whom I never coud get to taste good liquor, now follow the fashion and wallow in beastly delights. The Ladies abandon their sobriety, and are seen to roll about in intoxication…. I do often say (but not aloud) that the Danes have again conquered the Britains, for I see no man, or woman either, that can now command himself or herself.

But the court of James Stuart hardly introduced excess into the early modern English aristocracy. Twelfth Night, with its elaborate imagery of appetite and satiety, seems to draw upon contemporary notions, by no means hyperbolic, about the consumption habits of an aristocratic household. In fact, the supposed "morality of indulgence" John Hollander attributes to aristocratic excess and satiety in the play becomes a bit incongruous in light of Stone's catalogues of noble gluttony. According to Stone, even conservatice, prudent Lord Burghley indulged in the extravagant gormandizing of aristocratic "festive" entertainments:

The £363 [Burghley] spent on a feast to the French Commissioners in 1581 might perhaps be explained on grounds of public policy. But what are we to make of the £629 spent in three days' junketing at the marriage of his daughter a year later? At this vast party there were
consumed, among other things, about 1,000 gallons of wine, 6 veals, 26 deer, 14 sheep, 16 lambs, 4 kids, 6 hares, 36 swans, 2 storks, 41 turkeys, over 370 poultry, 49 curlews, 135 mallards, 354 teals, 1,049 plovers, 124 knotts, 280 stints, 109 pheasants, 277 partridges, 615 cocks, 485 snipe, 840 larks, 21 gulls, 71 rabbits, 21 pigeons, and 2 sturgeons.\(^{17}\)

If music be the food of love, play on, indeed; Orsino's elaborate tropes of appetite and satiety might well have prompted a subversive laughter, given the mind-boggling extravagances of the Elizabethan aristocrat's table. On the other hand, certain factions were less likely to find such gluttony a laughing matter in the inflation and famine-plagued 1590s. For the commoner and particularly the poor, the 1590s were years of economic hardship and deprivation. Four consecutive failed harvests between 1594 and 1597 contributed to rampant food shortages;\(^{18}\) authorities greatly feared the possibility of large-scale social disorder, and in fact, a number of food riots occurred in both the countryside and London.\(^{19}\) As Buchanan Sharp has shown, the privileged were frequently the focus of the rioters' deepest resentments: "The reported poor of Somerset who in 1596 seized a load of cheese were reported to be animated by a hatred of all gentlemen because they believed 'that the rich men had gotten all into their hands, and will starve the poor.'"\(^{20}\) Civil discontent over food shortages bore the threat of an attack on the entire social order, as the Privy Council itself recognized.\(^{21}\) Indeed, in the aftermath of the abortive Oxfordshire Rising of 1596, Attorney-General Coke insisted that "[t]he real purpose of Bartholomew Stere [one of the Oxfordshire conspirators] was 'to kill the gentlemen of that country and to take the spoile of them, affirming that the commons, long sithens in Spaine did rise and kill all the gentlemen in Spain and sithens that time have lyved merrily there.'"\(^{22}\) Thus historicized, Twelfth Night's mockery of noble excesses may be seen as homologous to the rather less playful sentiments of another Oxfordshire conspirator, James Bradshaw, who asked "Whether there were not certaine good fellowes in Witney that wold ryse & knock down the gentlemen & riche men that take in the comons, and made corre so deare?"\(^{23}\)

It is worth noting, however, that the play's lone vocal critic of profligacy, Malvolio, is held up to even greater derision than the extravagant nobles. As Elliot Krieger has noted, Malvolio "actually threatens the social order much less than he seems to.... [H]e has the greatest respect for all the accoutrements of aristocratic rank."\(^{24}\) Malvolio, "sick of self-love,"\(^{25}\) covets the very privilege he seems to criticize, as is borne out by his desire to transcend his social rank by marrying Olivia. Far from a radical social critic, Malvolio is more reminiscent of the antitheatricalists\(^{26}\) who lambasted playgoers for their own variety of moral gluttony. Phillip Stubbes claimed that playgoers "are alwaies eating, & neuer satisfied; euer seeing, & neuer contented; continualie hearing, & neuer wearied; they are greedie of wickednes."\(^{27}\) That Malvolio's threat of revenge troubles the play's comic ending suggests less an endorsement of the legitimacy of his grievances than an ironic acknowledgment of the strident persistence of antitheatricalism.

Orsino's opening trope, then—

\[
\begin{align*}
\text{If music be the food of love, play on,} \\
\text{Give me excess of it, that, surfeiting,} \\
\text{The appetite may sicken, and so die} \\
\text{(I.i.1-3)}
\end{align*}
\]

—lends to his lyric self-indulgence a material marker of social privilege and its excesses. It serves to yoke together the amorous appetites of the relatively decorous Orsino and the more grotesque, "carnivalesque" appetites of Sir Toby Belch.\(^{28}\) For Sir Toby is, of course, the play's most comical—and most pointed—travesty of aristocratic self-indulgence. His revels are informed by the popular tradition of "seasonal misrule," a tradition already suspect for its violations of class and gender boundaries.\(^{29}\) Sir Toby cavorts not only with his fellow titled tosspot Sir Andrew Aguecheek, but also with his social inferiors—Feste, Fabian, and Maria, the last of whom he marries.\(^{30}\) The deflation of Malvolio's ambition to wed into the aristocracy is countered by the marriage of Olivia's uncle to her serving-woman. The play's fantasy transgressions typical of festive misrule—Olivia's infatuation with a disguised woman, "Cesario's" with Orsino—are ostensibly...
contained as gender stability is restored. Like Malvolio’s vow of revenge, however, Sir Toby’s offstage marriage to Maria is a reminder of the instability of rank and order that persists outside the world of the play. Far from being merely a temporary and cathartic release from social order, festivity intervenes to alter that order. Sir Toby’s marriage to Maria makes explicit the identification of festivity with social fluidity, despite the play’s apparent recuperation of transvestism and homoerotic desire.

But Sir Toby’s marriage is not the play’s sole—or most significant—offstage social transgression. Feste’s first appearance in I.v. aligns the clown with insubordination, with the equivocal boundaries between licensed and unlicensed foolery.

MARIA. Nay, either tell me where thou hast been, or I will open my lips so wide as a bristle may enter, in way of thy excuse: my lady will hang thee for thy absence.
CLOWN. Let her hang me: he that is well hanged in this world needs to fear no colours.
(I.v.1-5)

As has been frequently noted, Feste’s entrance is marked by an emphatic lacuna; his introduction is colored not only by the unauthorized absence from Olivia’s household, but also by his defiant resistance (“Let her hang me”) to Maria’s interrogations about his whereabouts, even under the threat of hanging or unemployment. The clown’s unlicensed insubordination lies less in the nature of his absence than in his refusal to represent a “subjectivity” to his interrogator. This is not to claim that Feste’s uncooperation is akin to Hamlet’s “I have that within which passes show” (I.ii.85), but rather, that theatricality constitutes a site of evasion from subjectification, i.e., the strategies of surveillance and interrogation that comprise, as Michel Foucault has written, “a ritual of discourse in which the speaking subject is also the subject of the statement … a ritual that unfolds within a power relationship.” An actor does not speak a "self”—he impersonates; his social identity is not metaphysical but infinitely manipulable, as was recognized, however disapprovingly, by the theater’s critics. For

unlike the consecrated minister of God’s word or the political orator, an actor is a man whose public utterance does not represent what he feels or thinks, although it is said with full conviction and the sound of authority. An actor is not just someone whose speech is "dissembling": the deeper problem is that he is most valued for his ability to dissemble convincingly.

That virtually the first thing we learn about Feste is that he has been somewhere offstage, outside of representation and vigilance, suggests not a Derridean aporia so much as the theater’s potential to exceed its carefully, officially delimited boundaries, to collapse the distinction between “festivity” and history. As Bristol notes of Feste, “[the clown] traverses the boundary between a represented world and the here-and-now world he shares with the audience.” Earlier clowns like Richard Tarlton commonly interacted directly with the audience as well as with other characters in the play; though Feste embodies the sophistication and intellectualism of the later Elizabethan jester, he is as much of the world outside the play as of the fictive world within.

Despite its comic word-play, Feste’s exchange with Maria has somewhat grave undertones. The threat of hanging seems hyperbolic, though as Maria notes, "to be turned away" would be "as good as a hanging" (I.v. 18); a fool without a post would be "voiceless," indeed. The refusal of interrogation risks a coerced expulsion from discourse entirely. The Elizabethan theater, like Feste testing the limits of licensed foolery, was subject to an authority that could—and occasionally, did—impose silence. But also like Feste, the theater deftly
confounds the boundaries between festive misrule and unruly license. Not the least of the Elizabethan clown's functions is to mediate between audience and play; with Feste, the mediation takes on, however playfully, a dimension of conspiracy.

Upon Olivia's appearance, the clown launches into what is ostensibly the licensed insubordination allowed his function by his patroness and superior. Feste's witty impertinence reestablishes his "allow'd," public role as jester. Though he effectively proves her a fool, Olivia concedes, "There is no slander in an allow'd fool" (I.V.94). Yet because Feste's cheeky demonstration of his mistress's foolishness has been preceded by his unlicensed absence, Olivia's authority here seems superfluous, even specious, as though Feste is but humoring her by playing the prescribed role of servant. Typically mistrustful of festive insubordination and frivolity, Malvolio, rather than Olivia, takes offense at the fool's impudence. But Olivia's rejoinder—"O, you are sick of self-love, Malvolio, and taste with a distempered appetite" (lines 90-91)—tacitly accuses the steward of the very ills he claims to disdain. For Malvolio's "self-love" is pointedly not the absence of appetite but merely a "distempered" one. That Olivia's reprimand of Malvolio is shortly followed by the reappearance of Sir Toby "in the third degree of drink" (line 136) marks a less festive variety of inversion: Malvolio is not so much the antithesis of Sir Toby as he is the reversed mirror-image.

Feste, then, is far more than merely the "spirit of festivity"; he is also an ironic commentator upon the discrepancies between aristocratic myth and the material circumstances that contradict it. The clown's consistent gulling of his social superiors has been frequently noted,\(^\text{36}\) but it is a mistake to view Feste as simply a protocapitalist "service professional."\(^\text{37}\) The emphasis on payment serves to remind the spectator that this is not the mythic, feudal world of loyal, ideal service, "The constant service of the antique world, / When service sweat for duty, not for meed!"\(^\text{38}\) but rather one in which festivity itself is purchased at the same outlandishly inflated rate that swells Orsino's plaints of love or Olivia's grandiloquent self-denial. The contrast between the bawdy knights' boisterous entreaties for a song and the melancholy "O Mistress Mine" with which the clown responds points up the distance between mythic \textit{carpe diem} romance and the almost indiscriminate, self-indulgent appetites that govern not only Sir Toby and Sir Andrew but Orsino and Malvolio as well. Hollander's suggestion that the song is a reflection upon the various lovers' romantic foibles\(^\text{39}\) does not take into account either the inappropriate audience or the closing allusion to an uncertain future outside of the festive present: "Youth's a stuff will not endure" (II.iii.53). \textit{Twelfth Night}'s nominal situation in a particular, finite time not only evokes traditional, popular festivity organized around the church calendar;\(^\text{40}\) it also foregrounds the play's precarious temporality. The Epiphany functions as a temporal trope much as the Forest of Arden, in As \textit{You Like It}, functions as a spatial one: the time of carefree, aristocratic festivity is gone, and between nostalgia for an idealized past and uncertainty about the historical time beyond holiday is the tenuous and hence ironic celebration of the present.

As Feste willingly joins Sir Toby and Sir Andrew for a merry round, he playfully reminds the latter that his own cooperation in the song entails a transgression of rank: "'Hold thy peace, then, knave,' knight? I shall be constrained in it to call thee knave, knight" (II.iii.66-67); Feste subtly remarks upon the knights' complicity in the deconstruction of social order. Akin to government licensing of the theater, the nobles' authorization of "benign" festive subversion enables the terms by which institutional authority may be mocked and questioned. The ostensibly vast social distinction between gentleman and common player is elided. Just as Feste has previously "proven" Olivia a fool, his observation that Sir Toby is "in admirable fooling" (line 81) places his social superior in the role of servant, jester, \textit{player}—the very kind of class "mingle-mangle" so mistrusted by the antitheatricalists.\(^\text{41}\) Interestingly, it is Malvolio who scolds the revelers for their violation of good order:

My masters, are you mad? Or what are you? Have you no wit, manners, nor honesty, but to gabble like tinkers at this time of night? Do ye make an ale-house of my lady's house, that ye squeak out your coziers' catches without any mitigation or remorse of voice? Is there no respect of place, persons, nor time in you?
Malvolio objects to the revelry explicitly on grounds of its disorderliness of "place, persons, [and] time"; once more, the critic of aristocratic "uncivil rule" is the play's most vehement proponent of a stable, orderly social structure. But Sir Toby, thus chided for transgression of his degree, picks up the gauntlet with a peculiarly bitter rejoinder to Malvolio: "Art any more than a steward? Dost thou think because thou art virtuous, there shall be no more cakes and ale?" (lines 113-15). The question, of course, is rhetorical, though like Malvolio's threat of revenge, in retrospect rather eerily prophetic.

There is some suggestion, once again, that the festive interval—as interval—itself is already anachronistic, that the revels have, if not ended, become embedded in historical rather than holiday matters. Orsino, in II.iv once more caught in the throes of a language of amorous appetite, requests "that old and antic song" (line 3) performed the night before. Curio's response to this is, interestingly, the first and only time Olivia's clown is named, and, additionally, given a history: he is "a fool that the Lady Olivia's father took much delight in" (lines 11-12). The introduction of Feste's name in this context seems appropriate; for the festivity with which Orsino identifies him is indeed a thing of the past, when festive rites were bound up in a popular, material marking of time:

Mark it, Cesario, it [the song] is old and plain;
The spinsters and the knitters in the sun,
And the free maids that weave their thread with bones,
Do use to chant it: it is silly sooth,
And dallies with the innocence of love,
Like the old age.
(lines 43-48)

Given Orsino's own penchant for florid, hyperbolic love talk, his paean to the "silly" song is noteworthy. And yet the song, when it does come, seems less a rustic lay than a pensive Elizabethan lyric telling of a lady's disdain and a "dying," unrequited lover's lonely fate. Like "O Mistress Mine," "Come Away, Death" is touched by Petrarchan conventions of female resistance and frustrated male desire. The song's melancholy, along with its identification with an idealized past, contrasts strikingly with the language of self-indulgent appetite and desire that characterizes its context. The sad song is unsuited to its setting, but not solely because of the play's comic aims. It is a performance whose signification has been rendered specious by the play's own ironization of desire; the song, like the one preceding, is merely the "food of love" for the nobleman's appetite. Indeed, Orsino follows with two more elaborate speeches of quantification and appetite to "Cesario," in blatant contradiction of his prior homage to the simplicity of the old love song. The disembodied metaphoric trappings of petrarchan love become in Twelfth Night parodically reconstituted as crassly material, even gluttonous.

Similarly, Feste's refusal, to Viola, of the "licensed" title of fool, and his claim that he is, rather, Olivia's "corrupter of words" (III.i.36-37), acknowledge the degeneration of language, the discrepancy between the anachronistic idiom of lyric love and the actual amorous discourses marked by consumption and excess. As Terry Eagleton has observed, "What has discredited language in Feste's view is commerce, the breaking of bonds.... Bonds—written commercial contracts—have rendered signs valueless, since too often they are not backed up by the physical actions they promise." Feste is Olivia's "corrupter of words," but after the fact: language is no more innocent than love. Feste's corruption of language, however, is of a different and more equivocal variety than Orsino's or Malvolio's, for he consistently takes the words of his noble superiors—much as he does their money—and destabilizes them, exposing the semiotic and political slipperiness of ostensibly stable categories and values. Thus he responds to Viola's characterization of him as
"a merry fellow, [who] car'st for nothing" (III.i.26-27) with what may seem like an inexplicably surly rejoinder: "Not so, sir, I do care for something; but in my conscience, sir, I do not care for you" (lines 27-28). Like Orsino before her, Viola attempts to constitute Feste as merely the embodiment of the mirthful court jester, the abstract spirit of song and festivity. But the clown, as in his initial exchange with Maria, at once resists the fixity of his prescribed role and pointedly refuses to invest "corrupt" words with any kind of truth value. What that "something" may be for which he cares is less significant than the refusal of explication.

When Feste accepts Viola's money, he also accepts his function as servant, but not without a saucy allusion to her complicity in the crassest variety of commerce: "I would play Lord Pandarus of Phrygia, sir, to bring a Cressida to this Troilus" (III.i.51). Pandarus, of course, evokes the activity for which Orsino has engaged "Cesario"; like Feste, Viola is playing the role of servant, and her actual social superiority is undercut by the clown's suggestion of a kind of material equivalence between them. Viola apparently recognizes her error in labeling Feste merely a merry madcap, and characterizes him as, like herself, one playing a part:

This fellow is wise enough to play the fool,  
And to do that well, craves a kind of wit:  
He must observe their mood on whom he jests,  
The quality of persons, and the time,  
And like the haggard, check at every feather  
That comes before his eye. This is a practice  
As full of labour as a wise man's art.  
For folly that he wisely shows is fit;  
But wise men, folly-fall'n, quite taint their wit.

(lines 60-68)

This speech is commonly taken as the playwright's homage to the art of theater, or even as a tribute to Robert Armin.43 But while it is an oversimplification to read Feste's function as strictly metadramatic, Viola's words indeed testify to the "labour" and intellection of playing, as if to counter antitheatricalist accusations of wantonness and idleness. Indeed, one of Armin's own Quips upon Questions articulates a similar theme:

True it is, he playes the Foole indeed;  
But in the Play he playes it as he must:  
Yet when the play is ended, then his speed  
Is better than the pleasure of thy trust.  
For he shall have what thou that time has spent,  
Playing the foole, thy folly to consent.

He playes the Wise man then, and not the Foole,  
That wisely for his lyving so can do;  
So doth the Carpenter with his sharpe tool,  
Cut his owne finger oft, yet lives by't to.  
He is a foole to cut his limbe say I  
But not so with his toole to live thereby.44

The notion of fooling as professional, intellectual labor at once responds to and significantly revises such suspicions as those of Stephen Gosson regarding the actor's equivocal identity: "There is more in [Players] than we perceive."45 The comic actor is thus transformed from diabolically Protean hypocrite to expertly
skilled craftsman, a keen observer of social practices shrewd enough to play fool "for his lyving."

In fact, Feste corrupts words chiefly to expose the corruption of others by them, and for them. To this extent, the clown embodies the instructive model of comedy extolled by Thomas Heywood in *An Apologie for Actors* (1612):

And what is then the subject of this harmlesse mirth? either in the shape of a clowne to shew others their slovenly and unhandsome behaviour, that they may reforme that simplicity in themselves which others make their sport, lest they happen to become the like subject of generali scorne to an auditory; else it intreates of love, deriding foolish inamorates, who spend their ages, their spirits, nay themselves, in the servile and ridiculous imployments of their mistresses.46

In IV.i, wherein "Sir Topas" interrogates Malvolio, Feste both exemplifies and parodies the didactic dimension of foolery. Again, the scene owes a debt to the festive tradition of "misrule," in which, as Stuart Clark has noted, typically "clerical parodies of divine service substituted the profane for the sacred, and low for high office."47 But Feste is doing more than mocking Malvolio with his travesty of a Puritan curate. With his emphatic, ludicrous "testing" of Malvolio's sanity, Feste parodies the discourse of interrogation he has himself consistently eluded. The clown uses the guise of authority to mock authority, a strategy manifest not only in "Sir Topas's" worrying of the "madman," but also in Feste's assumption of the voices of both the curate and the servant: "Maintain no words with him, good fellow!—Who, I, sir? not I, sir! God buy you, good Sir Topas!—Marry, amen!—I will, sir, I will" (lines 102-105). As Maria has pointed out, the clown's costume is superfluous (lines 64-65); language itself enables dissemblance. In theater, subjectivity is no more than a habit that aptly is put on. Feste's trick question to Malvolio—"But tell me true, are you not mad indeed, or do you but counterfeit?" (lines 117-18)—mockingly discloses the equivocal nature of playing itself. Neither madness nor sanity has any ontological status in the realm of theatricality, for the "counterfeit" is at once as true—and as false—as the thing itself. Stable distinctions between licensed and unlicensed foolery then, are radically problematic, Heywood's "harmlesse mirth" perhaps not as socially benign as the term suggests.

Not surprisingly, the play's final act, with its various unmaskings and revelations, yet falls short of the thorough restoration of order that the plot and genre seem to dictate. V.i begins with an almost uncanny echo of I.v, as Fabian beseeches the clown to show him Malvolio's letter, only to be enigmatically refused (lines 1-6). Feste's resistance to Fabian's entreaty is narratively inexplicable, since the latter has been in on the trick all along and the former at least attempts to read the letter publicly. Feste's refusal appears motivated simply by a characteristic deflection of interrogation for its own sake. But it is also in the last act that Feste is silenced, as Olivia objects to his "mad" reading of Malvolio's letter, despite his protests, and orders Fabian to deliver the missive instead. It is a significant moment, not the least because Olivia, the clown's employer, here disdains his foolery on grounds that its theatricality is an apparent obstacle to discerning the truth. This momentary suppression of theatricality serves to refigure—temporarily, at any rate—the intractable lines of social hierarchy heretofore overturned by playing. Malvolio, upon appearing, issues a proclamation whose very tenor is one of "unseemly" entitlement: "Madam, you have done me wrong. Notorious wrong" (lines 327-28). But the ensuing explanation merely reiterates the steward's subordinate position, as Olivia remarks, "Alas, poor fool, how they have baffled thee!" (line 368). Malvolio, the overreacher, is now reduced to the lowly status of one whose function he has previously scorned, as Feste promptly reminds him, concluding "thus the whirligig of time brings in his revenges" (lines 375-76). But just as Feste has taken his cue to speak from Olivia's epithet "poor fool," so does Malvolio take his from the clown's gloating last words. "I'll be reveng'd on the whole pack of you(!)" Malvolio warns (line 378), the "whole pack" evidently including not only the pranksters (the two chiefest of whom—Sir Toby and Maria—are not present) but the nobles as well. The so-called "festive comedy" concludes rather ominously; if indeed "the whirligig of time brings in his revenges," it is difficult to dismiss Malvolio's parting threat as merely one sour note troubling an otherwise stable social hierarchy.
Significantly, the clown's closing song seems to take its uncertain, melancholy tone not from the promised (though deferred) wedding and "golden time" of Orsino's last speech, but from the bitter note of Malvolio's final words. Far from heralding a "golden time," a term that itself evokes the pastoral myths of idyllic, benevolent relations between masters and servants, the haunting song marks the end of holiday time and takes the play back into history, into materiality. Not just the wind and rain, but their inexorability against the festive vices of lust and drunkenness, the harshness of "man's estate" wherein gates are shut against foolery, call attention to the illusory nature of comic resolution and to the uncertain world to which actor and spectator alike must return. The final line, "And we'll strive to please you every day" (line 407), is a reminder that playing itself, while trafficking in illusion, is historically embedded, materially reproducible in time and space, and thus vulnerable as well to "wind and rain," to the threats that escape narrative closure. But like Malvolio's threat, Feste too is outside the narrative here, his song not mediated by the now-vanished illusory world of Illyria. It is a moment that keenly demonstrates Weimann's assertion that "the comic actor … does not merely play to the audience; to If Malvolio's a certain degree still plays with the audience." If Malvolio's evasion of closure deflates the ideal of a "golden time," Feste's signifies a resonant deconstruction of the boundaries between festivity and history. He stands as an emblem of the theater's capacity to intervene in lived experience. This gesture of self-licensed foolery figures the theater's testimonial to a limited institutional autonomy, even while the melancholy song discloses the material terms of those limitations.

Notes

3 For a consideration of the problematics of disorder and closure in Hamlet, see my essay "Suche Strange Desygn's: Madness, Subjectivity, and Treason in Hamlet and Elizabethan Culture," Renaissance Drama n.s. 20 (1989): 51-76.

23 Quoted in Walter, p. 99.

26 I am deliberately avoiding the term "puritan" in reference to Malvolio, not only because I do not believe he is explicitly a satirical Puritan in the sense, e.g., of Jonson's *Zeal-of-the-Land Busy*, but also because, as Palliser observes, "'Puritan' has proven almost impossible to define, both at the time and since, and some historians are now tempted to abandon the term altogether" (p. 347; see also ).

27 Quoted in Weimann, p. 171.

28 Cf. Terry Eagleton: "Like Falstaff [Sir Toby] ... is a rampant hedonist, complacently anchored in his body, falling at once 'beyond' the symbolic order of society in his verbal anarchy, and 'below' it in his carnivalesque refusal to submit his body to social control" (*William Shakespeare* [London: Basil Blackwell, 1986], p. 32).

Ralph Berry remarks that Maria's exact social status is somewhat unclear, though he observes that other characters frequently address her as a menial servant (*Shakespeare and Social Class* [Atlantic Highlands, NJ: Humanities Press International, 1988], pp. 70-71).

I still think that C.L. Barber says it best: "the fool in *Twelfth Night* has been over the garden wall into some such world as the Vienna of *Measure for Measure*. He never tells where he has been, gives no details. But he has an air of knowing more of life than anyone else—too much, in fact" (p. 259).

Twelfth Night Literary Criticism (Vol. 34): Sexual Ambiguity

Leonard F. Manheim (essay date 1964)

[In the following essay, Manheim gives a psychoanalytic treatment of Twelfth Night, contending that the play is "an oedipal comedy written from the viewpoint of the father. "]

Such tricks hath strong imagination,
    That if it would but apprehend some joy,
It comprehends some bringer of that joy.

_A Midsummer Night's Dream V.i.18-20_

*Will* will fulfill the treasure of thy love …

_Sonnet 136_

I offer an interpretation of _Twelfth Night_ based on accepted Shakespearean scholarship plus the data of psychoanalysis. I shall extrapolate beyond the words assigned to the characters in the play and shall consider these characters as "persons" known to me (and, in all truth, there are few persons whom I meet in the ordinary intercourse of life whom I know as well as I know these characters), and capable of having a former and a future existence of their own, all, of course, wholly within the bounds of the play's basic structure and development. In the same way, and using the same data, I shall attempt to read _out of_ (not into) the text evidence of the author's own fears, hopes, and wishes, none of which will at any time contradict or attenuate any accepted biographical facts and documented material. I know that in accepting Freud, Jones, and their school, and rejecting that of Stool and Sisson, I run the risk of critical condemnation, including the risk of being belabored with the cudgel of Professor Sisson's animadversions on "The Mythical Sorrows of Shakespeare."¹

I know this so well that I have run to meet it by basing my title on Sisson's. But the reading is different. By "mythical" I mean not that which is mendacious, factitious, untrue, consciously conceived by an irresponsible critic; but rather that which is the product of a non-conscious, "mythopoeic" drive to explain phenomena which are not rationally understood, or which are so understood but are not, on the psychodynamic level, acceptable to the conscious mind.² I substitute "joys" for "sorrows," and I mean by "joy" just what Shakespeare meant by the word in his treatise on the ways of the mind which is embodied in the colloquy between Theseus and Hippolyta in the fifth act of _A Midsummer Night's Dream_. As is apparent, I agree with Freud that "Story-tellers are valuable allies, [whose] testimony is to be rated high, for they usually know many things between heaven and earth that our academic wisdom does not even dream of."³ But I am concerned not only with the intuitions of Shakespeare the creative artist, but with the wish-fulfilling fantasies of Shakespeare the man, and I imply this by adopting, with a possible change of emphasis, his subtitle for _Twelfth Night_, indicating that by the fantasy of this piece of joyous entertainment he is flying in the teeth of certain painful but unalterable facts, giving himself through this fantasy grounds for (irrational) joy. In other words, "What You Will" implies the phenomenon of "the omnipotence of thought"; it means not (or not only) "whatever you prefer" but "that which you will into being," "that which you attempt to bring about as a wish-fulfillment."⁴ I contend that in _Twelfth Night_ Shakespeare was freely expressing a number of such wish-fulfillments, some of them conscious, some of them possibly preconscious (that is, not within the area of awareness but capable of being understood directly when they are brought into that area), but most of them completely unconscious; that these wish-fulfillments had indeed grown out of the private and personal experience of the author but were also projected into the personal and private experience of the "persons" introduced as characters in the
The more conventional Shakespearean critic, apprehensive—not without cause—of the excesses committed by some psychoanalytic investigators (I hesitate to call them "critics"), will ask, "How much do we really know of Shakespeare's private and personal experience?" and "What does that private and personal experience have to do with his works of art?" To the first question I respond that I shall imply nothing concerning Shakespeare's private life which is not in complete harmony with evidence which is acceptable to the most traditional critic; viz., the Shakespearean documents gathered and published by J. O. Halliwell-Phillips, D. H. Lambert, E. K. Chambers, and B Roland Lewis. Nor do I intend to imply a one-to-one relationship between documented events and works produced; that, for instance, a shocking event will necessarily be reflected in an attitude or tone in the next succeeding play. I do imply, however, that once an event of importance has been established in point of time, it must be considered as having some influence on some work which follows it, closely or at farther remove. And this makes plain my reply to the second question, for I firmly believe that Shakespeare was a man as well as an artist, and that no man can do, say, or write anything (even—or, rather, particularly—a work of art) that does not reflect his own experience directly or indirectly. The real difficulty is not in finding evidence in a work of art that points clearly to the influence of private experience; on the contrary, the difficulty lies in the fact that created material has its roots in many, seemingly unrelated, elements of personal experience, much of it, I must repeat, unconscious; in other words, much of that material is, as the psycho-analyst puts it, "overdetermined," requiring investigation into many, often inconsistent and seemingly irreconcilable, sources.

The preliminaries thus disposed of, I proceed to my basic contention: Twelfth Night is an oedipal comedy written from the viewpoint of the father, just as Hamlet is an oedipal tragedy written from the viewpoint of the son. The comedy was written between 1598 and 1601; so was the tragedy. Shakespeare's son, Hamnet, died in August of 1596, at the age of eleven, and was survived by his twin sister Judith. In Twelfth Night the twin son and daughter are separated by the primal power of the sea, each considering the other dead. The living daughter takes upon herself the sex and appearance of the dead twin son and is so successful in passing for him that the sea-captain Antonio, who has enacted the role of father-substitute to the son, can say when he sees the two of them together,

How have you made division of yourself?
An apple, left in two, is not more twin
Than these two creatures. Which is
Sebastian?"

It need not be pointed out (and it could hardly have been unknown to the Elizabethans) that whatever might have been the confusion between male twins in The Comedy of Errors, brother-and-sister twins are fraternal, not identical; they do not resemble each other more than ordinary brothers and sisters do.

Here, then, is the first and fundamental wish-fulfillment of the play. The dead son can be replaced by the living daughter, who gives up her own sex in order to obtain access, by appearing as a man, or at least "an eunuch," to the bachelor who must be considerably older than she is, for she has "heard [her] father name him" (I.ii.28), and that father "died that day when Viola from her birth / Had number'd thirteen years" (V.i.251-252). The Duke, when informed by Cesario that "he" has been attracted to a woman of about the Duke's age, exclaims,

Too old, by heaven; let still the woman take
An elder than herself …

(II.iv.30-31)
and stresses the persistent fantasy that women, on losing their virginity, are thereby rendered less attractive to their lovers, a doctrine to which Viola will, of course, not wholly assent:

_Duke:_ Then let thy love be younger than thynself,
Or thy affection cannot hold the bent;
For women are as roses, whose fair flower
Being once display'd, doth fall that very hour.
_Viola:_ And so they are: alas, that they are so;
To die, even when they to perfection grow!

(II.iv.37-42)

The Duke's attitude toward Viola's masculinity seems to me to be rather ambivalent, and Cesario clearly runs the risk of being accused of a homosexual attachment to the bachelor Orsino. Even in the opening scenes, Valentine comments, "If the Duke continue these favours towards you, Cesario, you are like to be much advanced: he hath known you but three days and already you are no stranger" (I.iv.1-4). And the Duke himself displaces and condenses his emotional attachments by insisting that Cesario-Viola is the best possible bearer of the tale of his love for Olivia:

For they shall yet belie thy happy years,
That say thou art a man: Diana's lip
Is not more smooth and rubious; thy small pipe
Is as the maiden's organ, shrill of sound;
And all is semblative a woman's part.

… Prosper well in this,
And thou shalt live as freely as thy lord,
To call his fortunes thine.

(I.v.29-34,37-39)

Orsino reveals even more when he loses his temper, for he reproaches both Cesario and Olivia when he refers to the former as "this your minion, whom I know you love, / And whom, by heaven I swear, I tender dearly" (V.i.128-129), an obvious projection, for if Cesario is anyone's "minion" it will have to be Orsino's who tenders him dearly rather than Olivia's. And this ambivalence of Orsino is embedded in the speech in which Italianate sadism for once rears its ugly head in the fantasy-land of Illyria:

Why should I not, had I the heart to do it,
Like to the Egyptian thief at point of death,
Kill what I love?—a savage jealousy
That sometimes savours nobly….

Come, boy, with me; my thoughts are ripe in mischief:
I'll sacrifice the lamb that I do love,
To spite a raven's heart within a dove.

(V.i.120-123,133-134)

For a moment it seems that the pattern of Fletcher's Philaster and Bellario is about to be enacted, when Olivia sets matters right by calling in the euphuistic priest to testify to the marriage. But I wonder how many readers and viewers of the play have not suspected, as I did years ago, that Orsino was aware of Viola's secret on
some level of marginal consciousness.

But no such logical inference is necessary, for there is no logic in the wish-fulfilling Unconscious, and Viola can be both the lost twin-brother and the surviving twin-sister, who will provide the mourning dramatist with the male heir he so greatly desires and at the same time be the solacing daughter who will unwaveringly prefer the father-figure in spite of all the enticements of normal heterosexual adjustment. In the blithe irrationality of the Unconscious, Viola comes back to life once as her own twin brother, the sea-devoured Hamnet-Sebastian, and then Sebastian (the beautiful martyr, the "hanging god," let it be remembered, of medieval and Renaissance art) also returns to life to wed with most precipitate haste the other virginal figure who is, as we shall note more fully in a moment, another projection of the beloved daughter, leaving the first daughter-image, the inviolate Viola, free to devote herself wholly to her beloved father-Duke. And all this happens in Illyria, a fantasy-land like the later Bohemia which had a seacoast for the same reason that Illyria does; i.e., in order that the sea may both engulf and give up its dead. The word-play "Illyria-Elysium" is made at the very outset of the play (I.i.3-4). In this country of the fulfilled wishes of fantasy it is possible for a sister not only to take the place of her dead brother and thus restore him to life, but also to be, in one guise, a loving daughter to her mourning father, while her alter ego is recompensed for the loss of one brother by finding another who is permitted to be her sexual mate.

Note how the legitimized incest-fantasies become more and more apparent as we examine the ambivalent intricacies imposed by the plot. Manningham was able to gloss over the implications of an underlying incest-theme by forgetting (or never realizing) the occasion of Olivia's mourning and referring to her as the "lady widowe," even though Viola's seacaptain says at the very outset that she is

A virtuous maid, the daughter of a count
That died some twelvemonth since; then
leaving her
To the protection of his son, her brother,
Who shortly also died; for whose dear love,
They say, she hath abjured the company
And sight of man.

(I.i.36-41)

to which Viola quite naturally responds,

O that I served that lady,
And might not be delivered to the world,
Till I had made mine own occasion mellow,
What my estate is!

(I.i.41-4)

But Viola is not to be allowed to join her lot with that of her sister in misfortune; instead she goes to serve a living lord and master who "knows her not." And the father-daughter incest theme is betrayed in lines which through their insistent poetic beauty, have obscured their revealing ambiguity.

Viola: My father had a daughter loved a man,
As it might be, perhaps, were I a woman,
I should your lordship.
Duke: And what's her history?
Viola: A blank, my lord. She never told her love,
But let concealment, like a worm i' the bud,
Feed on her damask cheek: she pined in thought
And with a green and yellow melancholy,
She sat like patience on a monument,
Smiling at grief. Was not this love indeed?

Duke: But died thy sister of her love, my boy?
Viola: I am all the daughters of my father's house,
And all the brothers too: and yet I know not.

(II.iv.110-118,122-124)

A moment ago I spoke of Olivia as Viola's alter ego. The point might be made without more painstaking demonstration, but there is a pattern in the play which blurts out the secret that even he who runs may read. Let us look for a moment at a piece of deliberate mystification concocted by Maria for the humbling of Malvolio and the delectation of Toby and his companions. In the forged letter which Malvolio believes to have been written by Olivia, there are two sets of verses, the second of which is to convey to the hapless steward, who hardly needs the additional assurance, that it is he and he alone who is the object of his mistress' love:

I may command where I adore;
But silence, like a Lucrece knife,
With bloodless stroke my heart doth gore:
M, O, I, A, doth sway my life.

(II.v.115-118)

Neither Malvolio nor the audience needs much prompting that the code points to him. "M,—Malvolio," he says; "M,—why that begins my name" (II.v.137-138). But he is concerned because "A should follow, but O does" (II.v.142-143). Apart from his reading, we may want to make one of our own, for the letters contribute to a pervasive anagram. The vowels are to be found in the name of every character in the romantic (incest-ridden) plot. All three are to be found in "Viola" and "Olivia" as well as in "Malvolio." Two are to be found in the lesser figures, "Orsino" and "Maria." In the gullied steward whose name furnishes the first clue to the anagram, the "mal-" element points clearly to the "evil" in the presumption of the Puritanical steward who should be the protector of the virginity of his lady-mistress, but instead raises his eyes in unholy desire for her. This is emphasized by the "will" element in "-volio" (voglio), substituted in place of the original letters in the "Malevolti" of the source-material. All three vowels are to be found in his name, the "o" being used twice, to establish a masculine ending to a rearrangement of both "Viola" and "Olivia." And these two are obvious anagrams for each other, with the latter name carrying a second "i." And, as I have suggested above, she is indeed a second "I" to Viola. As double, therefore, she rejects the substitute father whom her counterpart adores, thus rejecting but also achieving the implied incest. She loses one brother but is recompensed for the loss by her marriage to Sebastian, just as the first "I" loses a brother and finds a father.

The incest-taboo is also avoided by what we might term a "purloined letter" technique; the relationships, real and substitute, are made so obvious, so oft-repeated, that they are accepted as innocent, since nothing forbidden could be so patently presented. This is, of course, a pattern not uncommon in Shakespeare, as in other Elizabethan dramatists. Viola and Sebastian, the fatherless twins, each have their respective father-protectors, the sea-captains who rescue them from the sea of death and watch over them even after bringing them to rebirth in the land of Illyria-Elysium. Viola's unnamed captain is the sole custodian of her secret, as well as of her "maiden weeds" (V.i.262), but his possible protection for the daughter who turns out to need none is frustrated by the evil "father" Malvolio, who keeps him "in durance" (V.i.281-284).
Sebastian's faithful father-protector, fares worse, for he is in mortal danger in Illyria (in which he resembles
father Aegeon in *The Comedy of Errors*) but braves all dangers for the son who proves to be (or at least seems
to be) ungrateful and unfilial. He is saved only by the intervention of the father-paramount, the Duke.

To the fathers who serve, or are served by the twins (the reversal is a dynamic equivalence in the pattern of
the Unconscious, in which there is no such word as "not"), there must be added the congeries of fathers who
cluster about the second "I." With her real father and brother gone, she avows her intention of remaining
unseen—veiled—for seven years, the appropriate period of biblical servitude. She casts aside that veil,
however, both literally and symbolically, when brother Cesario makes his appearance and saucily commands
her to do so. In the meantime, and until her deliverance by Cesario-Sebastian, she is surrounded by a
grotesque set of "protectors," only one of whom, Sir Toby, has designs on her fortune which do not also
include threats to her virginity. But they cannot prevail, for if Viola-Cesario has not the swordsman's skill to
defend her against the witless Sir Andrew, Sebastian is waiting to act as substitute in the nick of time, and to
give Sir Toby a bloody coxcomb (or to make it plain that that is what each of the two false knights really is)
and break Sir Andrew's head as well, thus rescuing the virgin "I" from all her unworthy "protectors."

Before concluding, let me repeat my words of warning. I am not describing or attempting to describe the
conscious, intentional devices of an artist, appealing to the conscious awareness of the reader or spectator.
Any such appeal would arouse anxiety rather than pleasure in both; whereas such anxiety is avoided when
"deep calleth unto deep." The analytic critic, like the analytic therapist, avoids this anxiety by a process which
I cannot undertake to explain here. In any case, it has become apparent in the years since psychoanalytic
criticism first began to function (as criticism, I repeat, not as clinical analysis) that analysis does not "reduce"
the work of art nor militate against its full enjoyment; rather, the contrary is true: we perceive in depth what
we had formerly missed superficially. In our play we see the disarming nature of the approach through
comedy summed up in the song of Feste as epilogue:

> When that I was and a little tiny boy,
> With hey, ho, the wind and the rain:
> A foolish thing was but a toy,
> For the rain it raineth every day.

A profound but unacceptable psychodynamic drive is presented as "a foolish thing," "a toy"; indeed, nothing
more than a Twelfth-Night frolic. It could have been masked in the form of tragedy; perhaps the self-same
drive would reappear some years later in *King Lear*. But now, at the end of *Twelfth Night; or, What You Will*
we rest content, for

> A great while ago the world begun,
> With hey, ho, the wind and the rain:
> But that's all one, our play is done,
> And we'll strive to please you every day.

**Notes**

XX; London: Humphrey Milford). Actually, Professor Sisson's fire is not directed against the psychoanalytic
critic. The immediate cause of his irritation was Nazi propaganda in the guise of criticism, "… by dint of
which there arises, as from a trap-door at Bayreuth, a dour heroic figure of pure Nordic ancestry, the enemy of
all Southern decadences, faithful to his Leader, the prophet of the new Germany of today" (pp. 3-4). These
excesses Professor Sisson ascribes not to the influence of psychoanalysis (under the circumstances, he could
hardly do so) but to the example of Coleridge, carried over into the nineteenth-century German criticism of
the brothers Schlegel and their followers, and back into *their* British successors in the later nineteenth and
early twentieth centuries.

Not that there is a lack of evidence of Professor Sisson's animosity toward psychoanalytic criticism per se. See, for example, his introduction to Hamlet in his edition of the Complete Works (New York: Harper & Bros., [1953]):

There has been altogether too much throwing about of brains concerning the character of Hamlet himself, both analytic and psycho-analytic. We would do better to consider Hamlet according to his own words, and against the contemporary background of the writings of Thomas More or of John Donne on the problems of his state of mind.

(p. 997)

The psychoanalytic critic—need it be said?—does consider the character "according to his own words," and he does not deny the influence of Shakespeare's contemporary background; he does, however, insist on his right and duty to consider the author first as a man, then as a Western man, and then as an Elizabethan man.

2 When we consider how much more prevalent the latter meaning of "mythical" has become, it is at least remarkable that the critic who used the word in "mythical sorrows" should not have chosen some expression which is unequivocally indicative of "non-existent" or "grossly exaggerated."

3 Delusions and Dreams in Jensen's "Gradiva" (1893-1895), Standard Edition of the Works of Sigmund Freud (London: Hogarth Press, (1953)), IX, 8. See also and

4 "The omnipotence of thoughts, or, more accurately speaking, of wishes, has since been recognized as an essential element in the mental life of primitive people." This is Freud's additional (1923) note to "A Case of Obsessional Neurosis" (1909) in Collected Papers (London: Hogarth Press), IV (1953), 370n. The play on "will" is, of course, closely allied to Shakespeare's wordplay on his own name, as, for example, in the "Will" sonnets (135, 136, 143).

10 Much of the biographical information concerning births, marriages, and deaths is taken by the authorities named in notes 5-8 from entries in the parish Register of the Church of the Holy Trinity, Stratford-upon-Avon. This gives 2 February 1585 as the date of the christening of Hamnet and Judith, son and
daughter of William Shakespeare, and 11 August 1596 as the date of Hamnet's funeral.

11TN, V.i.229-231. I use the Temple edition (see note 9), and I see no need to reproduce old spelling and punctuation. Act, scene, and line numbers are hereafter indicated in the text.,

12 It may be argued that the identical appearance of the twins is inherent in Shakespeare's sources. Whether this is so or not is not decisive in the matter of psychodynamic interpretation, for what Shakespeare invented and what Shakespeare adopted by selection from his source material are both indicative of at least some personal predilection on his part for a particular dramatic device. Still, it may be appropriate to glance at the scholarly data concerning the sources. Manningham's diary entry for 2 February 1601 (-2) describes the play as "Much like the Comedy of Errors, or Menechmi in Plautus; but most like and near to that in Italian called Inganni" (Gollancz, p. v). "The source for the main plot," writes Sisson (Complete Works, p. 356), "is apparently Riche his Farewell to Militane Profession (1581) in which he tells the tale of Apolonus and Sila, Apolonius being Orsino and Sila Viola…. The story came to Riche from Bandello's Italian novella, and to him from an Italian play Gli Ingannati (The deceived ones) dating from 1531…. " The identity of the Italian source is not particularly clarified by the fact that "there are at least two Italian plays called Gli'Inganni (The Cheats), to which Manningham may have referred in his entry as containing incidents resembling those of Twelfth Night; one of these plays, by Nicolo Secchi, was printed in 1562; another by Curzio Ganzalo, was first published [in Italian?] in 1592. In the latter play the sister, who dresses as a man and is mistaken for her brother, gives herself the name of Cesare…. A third play, however, entitled Gli'Ingannati (Venice 1537), … bears a much stronger resemblance to Twelfth Night; in its poetical induction, // Sacrificio, occurs the name 'Malevoli,' which is at least suggestive of the name 'Malvolio'" (Gollancz, pp. vi-vii). To dispose of matters of source and origin, it seems generally agreed that Malvolio (except for the suggestion of the name), Sir Toby, Sir Andrew, Fabian, Feste, Maria, and (at least as far as her name is concerned) Olivia are all wholly Shakespeare's.

13 I for my part, have forsworn all temptation to speculative biographical inferences, but I cannot refrain from marshalling a few of the well-attested facts, leaving the inferences to the reader.

Both of Shakespeare's daughters were unmarried at the time Twelfth Night was probably written, Susanna being no more than eighteen years old and Judith no more than sixteen (if we take the terminus ad quern, 1601, as the date of the play; it seems more probable that they were both several years younger). Susanna married on 5 June 1607, at the age of twenty-one, and the marriage seems to have been considered a good one; at all events, William Shakespeare named John and Susanna Hall the residuary legatees in his Will, in addition to indicating other marked signs of confidence in them. Judith did not marry until 10 February 1616, being then thirty-one years of age.

Judith's marriage was followed soon after (25 March 1616) by the execution of Shakespeare's Will, and about a month after that by Shakespeare's death. A few words of comment on some of the less familiar provisions of the Will. (I think I may make them on the strength of the text of the Will alone, for I claim some familiarity with the Anglo-American law of wills, since I was admitted to the New York Bar in 1925.) I have already commented on the special favor shown to John and Susanna Hall. In the Will Judith receives £100 "in discharge of her marriage porcion" (the words quoted were added to the original draft of the Will), plus £50 in return for her surrender of her rights as heir-at-law of certain real property left to Susanna; plus another £150, which is attributable to her only if she survives the testator's death by three years, and which is then to be held in trust with the income alone payable to her "soe long as she shalbe married and covert baron" (a familiar device to prevent a husband's getting his hands on his wife's property), with a gift over to her children, "if she have anie, and if not, to her executors or assignes, she lyving the saied term after my deceas."

It is plain that the elder daughter was preferred to the younger, even though the latter had remained unmarried and faithful to the father for so many years. The very close order in which her marriage, her father's Will, and
his death followed one another seems to me most interesting,—but I have sworn to let the reader do the speculating, and I say no more.

Lorna Hutson (essay date 1996)

[In the excerpt that follows, Hutson contends that in Twelfth Night Shakespeare questions natural sexual differences, blurs sex and gender, and explores sex through rhetorical deception.]

Elder Loveless. Mistres, your wil leads my speeches from the purpose. But as a man—
Lady. A Simile servant? This room was built for honest meaners, that deliver themselves hastily and plainely, and are gone. Is this a time or place for Exordiums, and Similes, and metaphors?!

"Shakespearean comedy," writes Stephen Greenblatt, "constantly appeals to the body and to sexuality as the heart of its theatrical magic." Without wishing to disparage the enterprise of writing histories of the body, or indeed to underestimate what such histories have accomplished in terms of enhancing our understanding of early modern culture, I would like in the following pages to challenge the operation of a certain kind of "body history" within recent Shakespeare criticism. I do not so much want to disagree with Greenblatt's statement as it stands, as to argue that our understanding of how Shakespeare's comedy intervened, both in its own time and subsequently, to modify attitudes to sexuality and to gender has been more obscured than enlightened by the obsession with the "body" as Greenblatt here understands it, and with the kind of body history to which he and others have prompted us to turn.

1. Circulating Arguments: The "Single Sex" Body

I shall focus my argument on Shakespeare's Twelfth Night, a play which, for all the curiously metaphoric, even disembodied nature of the language in which it articulates the desires of its protagonists, has nevertheless become the touchstone of this "body" criticism within Shakespeare studies. Yet it is worth remarking that the current critical interest in Twelfth Night as a play about the indeterminacy of gender and the arbitrary nature of sexual desire actually began with the contemplation not of the materiality of the body, but with that of the signifier. In much earlier twentieth-century criticism, Shakespeare's comedies have been appreciated as temporary aberrations from an established sexual and social order for the purposes of a thoroughly conservative "self-discovery" and return to the status quo. Saussurian linguistics, alerting critics to the way in which meaning in language is always the effect of a play of differences, enabled them to challenge such interpretations on their own terms by arguing that the conservative denouement was inadequate to contain and fix the meanings released by the play of differences. This was especially the case in comedies such as As You Like It and Twelfth Night, in which the fiction of a woman's successful masquerade of masculinity is complicated by the understanding of its having been originally composed for performance by a boy. Suddenly, instead of being about the discovery of one's "true" identity, or a "natural" social and sexual order, it seemed that what the comedies were about was the ease with which systems of sexual difference could be dismantled, and the notion of gendered identity itself called into question. This was important when it happened—the mid-1980s—because at the same time feminist critics were beginning to draw attention to the misogynistic implications of the transvestite theater, thereby throwing into confusion that venerable tradition of critical delight in the sprightliness of Shakespeare's girls-dressed-as-boys. How could we go on liking Rosalind and Viola in the knowledge that what they really represented was the denial to women of access to
the histrionic exchanges in which they excelled and we took pleasure?5 Just in time poststructuralist criticism saved us from the agony of this dilemma by recuperating the double transvestitism of the comedies as a calling into question of the "fully unified, gendered subject," thereby producing, instead of a patriarchal Shakespeare, a Shakespeare, who, in the words of Catherine Belsey, offered "a radical challenge to patriarchal values by disrupting sexual difference itself."6

Subsequently, the notion that what the comedies were about was really the indeterminacy of gender was given a new and historically authenticating twist by investigations into the history of biological definitions of gender which seemed to prove that, in the minds of Shakespeare's contemporaries, gender itself was a kind of comic plot, the happy denouement of which could only be masculinity. A special issue of Representations on "Sexuality and the social body in the nineteenth century" contained an article by Thomas Laqueur which, though primarily concerned with the politics of nineteenth-century reproductive biology, was nevertheless to have a considerable impact on Renaissance literary studies as a result of what its findings implied about the biological construction of gender in the early modern period. Laqueur drew our attention to a momentous, but overlooked event in the history of sexuality. Sometime in the late eighteenth century, the old belief that women needed to experience orgasm in order to conceive was abandoned. Women were henceforward to be thought of as properly passionless, because passive, participants in the act of sexual reproduction. What this implied was nothing less than a change in the existing physiology of sexual difference: the ancient Galenic model, according to which the hidden reproductive organs of women were merely a colder, imperfectly developed, and introverted type of the penis and testicles, requiring to be chafed into producing their seed, was replaced by the modern notion of the incommensurability of male and female reproductive organs. Laqueur's crucial point, however, was that the need to replace the old Galenic "metaphysics of hierarchy" between the sexes with an "anatomy and physiology of incommensurability" actually anticipated any real scientific understanding of women's reproductive makeup, and must therefore have been motivated not by scientific discovery, but by the need to find a new rationale for the exclusion of women from Enlightenment claims for the equality of men.7

I am ignorant of the effect of Laqueur's argument on nineteenth-century criticism, but the impact on Renaissance studies has been considerable. Writing in 1986 Laqueur cites, in a footnote, a paper on Shakespeare's Twelfth Night by Stephen Greenblatt, which was first published in 1985 in a collection called Reconstructing Individualism8 and subsequently included in Greenblatt's 1988 Shakespearean Negotiations as the essay, "Fiction and Frustration." Both authors evince exactly the same ancient and sixteenth- and seventeenth-century medical texts—first and foremost, Galen on the exact parity between male and female reproductive organs ("think of the 'uterus turned outward and projecting': Would not the testes [ovaries] then necessarily be inside it? Would it not contain them like a scrotum? Would not the neck [the cervix], hitherto concealed … be made into the male member?"9) and then Galen's sixteenth- and seventeenth-century readers, Ambroise Paré, Jacques Duval, Thomas Vicary, Helkiah Croke, and Jane Sharp.10 They also both cite Montaigne, who twice refers to a story also told by Ambroise Paré about the sex-change of Marie-Germaine, a contemporary inhabitant of Vitry-le-François, who had the misfortune or good fortune to realize her manhood by jumping too energetically over a stream, thus prompting the eruption of the appropriate genitals".

Where Laqueur expounded the Galenic model of woman as introverted man in order to expose the politics of nineteenth-century reproductive biology and its denial of female orgasm, Stephen Greenblatt's identical quotations employ the model's stress on the defective "heat" of female reproductive organs, and the "friction" required to activate them, as an allegory for the "theatrical representation of individuality in Shakespeare." "Erotic chafing" writes Greenblatt, "is the central means by which characters in plays like The Taming of the Shrew, A Midsummer Night's Dream, Much Ado About Nothing, As You Like It, and Twelfth Night realize their identities and form loving unions."11 One might be forgiven for balking at the definition of The Taming of the Shrew as a fiction of "identity," or at the naturalization of its highly pragmatic argument of husbandry as a form of "erotic chafing"; Greenblatt, however, refrains from pursuing his argument in relation to this or indeed any of Shakespeare's comedies other than Twelfth Night. He puts the question of the relation of identity
to erotic chafing—of fiction to friction—more persuasively by asking, "how does a play come to possess sexual energy?" The answer is supplied by a reading of Twelfth Night, the crux of which is a short speech made by the male twin, Sebastian, after Olivia has realized that his double, with whom she was in love, is a woman and his sister. "So comes it, lady," says Sebastian, "you have been mistook,"

But nature to her bias drew in that.
You would have been contracted to a maid;
Nor are you therein, by my life, deceive'd:
You are betroth'd both to a maid and man.

According to Greenblatt, the "nature" to which Sebastian refers is, precisely, the Galenic discourse of the one-gender body. Sebastian's reference to himself as "both a maid and man" consequentially invokes the inherent instability of gender as construed by this model, which in turn enables a good, radical-sounding assault on more comfortable readings which essentialize sexual difference. Thus, Greenblatt quotes C. L. Barber's argument that, "the most fundamental distinction that the play brings home to us … is the difference between men and women" in order to reinforce, by contrast, the persuasiveness of his view that the fundamental physiological distinction between men and women is precisely what the play can't "bring home," historically speaking. At the end of Twelfth Night, as he points out, "Viola is still Cesario—For so you shall be,' says Orsino, 'while you are a man' (5.1.386)—and Olivia, strong-willed as ever, is betrothed to one who is, by his own account, both 'a maid and a man.'" Notice just how closely this conclusion resembles the poststructuralist reading which found Twelfth Night calling into question, "the possibility of a fully unified, gendered subject." And, as with the poststructuralist argument, a crucial legacy of this reading is its obscuring of the need to account, in feminist terms, for the historical fact of the absence of women's bodies from the Renaissance stage. In the light of the Galenic theory of reproduction, concludes Greenblatt, it is easy to see that transvestitism actually "represents a structural identity between men and women—an identity revealed in the dramatic disclosure of the penis concealed behind the labia." And the dramatic fiction—an outrage to belief which is nevertheless endowed with generative because persuasive power—becomes analogous to the friction or chafing required, according to this Galenic model, both to warm women into conception, and to stimulate their reticent reproductive organs into realizing their latent virility.

Two years after Greenblatt's "Fiction and Friction" was published, Laqueur's thesis on the political and cultural investments of reproductive biology was published in book form as, Making Sex: Body and Gender from the Greeks to Freud. The chapter on the pervasiveness of the Galenic model in Renaissance thought and culture carries an epigraph from Twelfth Night:

Sebastian [To Olivia]
So comes it, lady, you have been mistook.
But nature to her bias drew in that.
You would have been contracted to a maid;
Nor are you therein, by my life, deceived:
You are betroth'd both to a maid and man.

And he goes on to introduce the substance of his chapter thus:

Somehow if Olivia—played by a boy, of course—is not to marry the maid with whom she has fallen in love, but the girl's twin brother Sebastian; if Orsino's intimacy with "Cesario" is to go beyond male bonding to marriage with Viola, "masculine usurped attire" must be thrown off and woman linked to man. Nature must "to her bias" be drawn, that is, deflected from the straight path. "Something off center, then, is implanted in nature," as Stephen Greenblatt puts it, which "deflects men and women from their ostensible desires and toward the pairings for which they are destined." But if mat "something" is not the opposition of two sexes that
naturally attract one another—as it came to be construed in the eighteenth century—then what is it?\textsuperscript{18}

The answer, of course, is the one-gender body according to Galen, with all its micro- and macrocosmic correspondences. The reading of a single Shakespeare play—or rather, the reading of five lines from a single Shakespeare play—seems to be doing a lot of work in supporting a circular argument about the relevance of body history to the question of how the magic of theater relates to the early modern conception of the body.

In the last five years, Laqueur's and Greenblatt's arguments and examples—Galen, Ambroise Paré, Jacques Duval, Helkiah Crooke, Jane Sharp, and (especially, perhaps) Montaigne—have been repeatedly invoked and quoted to support arguments about the pervasiveness of sixteenth-century fears that women might turn into men and men into women. Stephen Orgel thus accounts for the practice of having boys play women on the English stage by means of a complex argument whereby pathological fears about the chastity of women are weighed against equally pathological "fantas[ies] of a reversal from the natural transition from woman to man," which "are clearly related to anatomical theories of the essential homology of male and female." "Many cases," he writes, "were recorded of women becoming men through the pressure of some great activity."\textsuperscript{19} The endnote to this large claim refers not to women, but to alligators, but as the previous note referred the reader to Laqueur's \textit{Representations} article and to Greenblatt's "Fiction and Friction," we can be reasonably sure that the "many cases" in question are in fact the single case of Marie-Germaine, cited by both Paré and Montaigne.

It is true that both Montaigne and Paré liken the case of Marie-Germaine to other examples; these, however, being drawn from such authors as Pliny and Ovid, scarcely seem to constitute "many cases being recorded" in the times of the authors concerned.\textsuperscript{20} Judith Brown's well-researched \textit{Immodest Acts: The Life of a Lesbian Nun in Renaissance Italy} exaggerates less, but still enlarges the evidence: "in a few cases women did not just imitate men, but actually became men," she writes, citing Greenblatt.\textsuperscript{21} More recently, Valerie Traub's \textit{Desire and Anxiety: Circulations of Sexuality in Shakespearean Drama}—which contains an interesting and persuasive account of Twelfth Night—claims, citing both Greenblatt and Laqueur, that fear of turning into a woman "may have been a common masculine fantasy" in the sixteenth and seventeenth centuries.\textsuperscript{22} Traub's critical project involves enlarging Orgel's contention that the homoerotics of the Renaissance stage enabled "fantasies of freedom" for women as well as men\textsuperscript{23} by deconstructing the hierarchy of hetero- over homo-erotic readings of the plays, and revealing, as she puts it, "the polymorphous potential of desire itself, which Shakespeare so assiduously evokes and controls." Though such potential might not seem to have much to do with women in an exclusively male theater, Traub argues that boys were available to women as objects of fantasy, and in rejecting what she characterizes as the "feminist" interpretation of the boy player's significance (that is, the boy-player as instrument of the patriarchal control of female chastity) reveals her indebtedness to Greenblatt in preferring to argue that the boy-player represented, "an embodiment of the metadramatic theme of identity itself: always a charade, a masquerade, other." Laqueur provides further support for Traub's rejection of the idea that an all-male theater in itself argues either indifference to women's intelligent participation, or fear of the effects of such participation upon the reputation of women and their families. On Laqueur's evidence Traub proposes that

\begin{quote}
in spite of patriarchal control of female sexuality through the ideology of chastity and the laws regarding marriage, there seems to have been a high cultural investment in female erotic pleasure—not because women's pleasure was intrinsically desirable, but because it was thought necessary for conception to occur.\textsuperscript{24}
\end{quote}

Once again, as in Greenblatt and in Orgel, the focus on a medical discourse about the body enables a way of speaking of sixteenth- and seventeenth-century dramatic discourse, and of the position that it offered women in the audience, as exhaustively signified by its analogue, erotic arousal.

What bothers me most about these arguments is that while they seem to be historicizing and de-essentializing our ideas about the relationship of gender to sexuality, the "fantasies" and "anxieties" that they identify in
early modern dramatic texts take no account at all of the way in which, in sixteenth-century society, a woman's sexual behavior was perceived to affect the honor and therefore the credit and economic power of her kinsmen. Nor do they consider the way in which such traditional conceptions of sexual honor, credit, and wealth were themselves being rapidly transformed by the technology of persuasion—or "credit"—that such dramatic texts as Shakespeare's represented. None of these critics appear to entertain the possibility that the capacity to plot, write, and be able to make use of the erudition and wit of a comedy such as Twelfth Night might in itself be more central to sixteenth- and seventeenth-century conceptions of what it meant to "be a man" than any theory derived from Galen. Moreover, for all the emphasis on plurality, the "polymorphous potential" and the "unmooring of desire" released by the comedies, there still seems to be a commitment to the twentieth-century "lit-crit" notion that what the comedies are really all about is individual identity. Traub explores how characters negotiate their individual desires in the plays as if they were real people and not even partly figures in a persuasive discourse or agents of a plot, while Greenblatt celebrates "the emergence of identity through the experience of erotic heat" as "this Shakespearean discovery, perfected over a six- or seven- year period from Taming to Twelfth Night." It seems that where literary criticism, as it was once conceived, celebrated the saturnalian energies of Shakespeare's comedies for returning us to a "natural" social and sexual order, these theorists of desire want to find a historically specific concept of "nature"—the Galenic one-sex body—that mimics what is actually their essentialized notion of culture as something which is always preoccupied with the theatrical destabilization of "identities"—identity is "always a masquerade, a charade, other." But what if the errors, confusions, and masquerades of comedy were not, in their own time, thought of as dramas of identity? And what if the way in which the plays construct sexual difference in relation to the audience crucially concerned not the sexual object-choice of men or women in the audience, but whether or not they were able to make use of the play as a discourse, an argument, to enhance their own agency? When James Shirley wrote the preface to an edition of Beaumont and Fletcher's comedies, published in 1647, he called it the collection of the Authentick Witt that hath made Blackfriers an Academy, where the three howers spectacle while Beaumont and Fletcher were presented, were usually of more advantage to the hopeful young Heire, then a costly, dangerous, forraine Travell … And it cannot be denied but that the young spirits of the Time, whose Birth and Quality made them impatient of the sorrower ways of education, have from the attentive hearing of these pieces, got ground in point of wit and carriage of the most severely employed students … How many passable discoursing dining witts stand yet in good credit upon the bare stock of two or three of these single scenes!

I'd like to suggest that Shirley's final metaphor of young men as prodigals, living on the "credit" of an ability to recommend themselves to strangers, a "stock" of wit which they have learned from plays, might tell us something about the way in which Shakespeare's plays, for all that they invoke the magic of the reproductive body, nevertheless construct sexual difference by appealing to the male (because formally educated) mind.

2. "Nor are you therein, by my life, deceiv'd": Twelfth Night and Gl'Ingannati

My counter-argument depends on the claim that the kind of comic plot from which Shakespeare never wavered—the five-act plot derived from Terence and Plautus—was perceived in his own time to be concerned, not with the emergence of identity, but with men's discursive ability to improvise social credit, or credibility. For all its popular appeal, Shakespeare's drama had a rigorous intellectual basis in the deliberative or hypothetical structure of Terentian comedy as it was rhetorically analyzed in every grammar school. The rhetorical analysis of Terentian comedy, far from being a rigid intellectual straightjacket (as I was implicitly taught at school, where I learned that Shakespeare transcended his contemporaries by ignoring the classical unities) enabled the achievement of a drama that carried emotional conviction as an unfolding narrative of events—"a kind of history," as Shakespeare himself called it—by investing the representation of those events with the impression of an intelligible combination of causality and fortuitousness. Not only were Terentian
plots themselves examples of how one might dispose an argument probably; they also offered images of male protagonists who were themselves able, in moments of crisis, to improvise a temporary source of credit (perhaps a disguise, or a fiction of being related to someone rich) that could defer disaster until the terms of the crisis had altered to bring in a fortunate conclusion. The commentaries of the fourth-century grammarian, Donatus, together with those of Melanchthon and other sixteenth-century humanists, were appended to every edition of Terence, with the effect that no schoolboy could escape noticing how the plays demonstrated that uncertain or conjectural arguments were more productive in social exchanges—because more productive of emotional credibility—than the traditional means of assuring of good faith by oaths or other tokens.31

The Terentian plot characteristically concerned an illicit sexual union between a well born young man and a prostitute, which in turn betrayed a promise made between his father and neighbor that the son should unite their houses by marrying the neighbor's daughter. Characteristically, too, the plot managed to lend emotional credibility to the highly improbable argument that the prostitute in question was, in fact, the long lost daughter of the neighbor, thereby reconciling in her person the laws of desire and those of social exchange. Donatus's commentary on Terence was discovered in 1433, and its impact on the composition of European drama evident by the early sixteenth century.

Formal effects upon sixteenth-century vernacular drama, however, were complicated by the ideological impacts of the Reformation and Counter-Reformation, both of which revolutionized attitudes to sex, marriage, and the conjugal household in Europe. For example: Terentian comedy articulates a sense in which the space of prostitution is prophylactic; a household of male, citizen relatives is not dishonored by the entry of the heroine whose desirability was initially associated with her marginal status and sexual accessibility to the young hero. The plays therefore represent a society in which official tolerance of prostitution first sanctions the initial violation of chastity and ensures that, once attached to a citizen household, the woman will be protected by the very institution that once made her vulnerable. The Reformation and the Counter-Reformation, however, brought with them an end to ideologically sanctioned prostitution, so that, as Lyndal Roper writes of Augsburg, "any sexual relationship outside marriage, and any occasion on which the sexes mingled … might lead to sin."32 The marginal status once overtly allocated to prostitutes became a covertly allocated category of suspicion embracing all women.

Nevertheless, there were differences in the way in which Catholic and Protestant Europe acknowledged this and reacted to the sexual mores of the Terentian plot. While the writers of Italian commedia erudita cynically substituted citizens' wives and daughters for the prostitutes of Roman comedy, northern humanists tempered their enthusiasm for New Comedy as a model of Latinity and eloquence with a distaste for its evident authorization of illicit financial and sexual transactions, that is, clandestine marriages and rhetorical and sartorial impostures of credit. Thus, while Ariosto was claiming to outdo Terence and Plautus with his brilliant /Suppositi in which conjectural arguments ("supposes") are manipulated by the dramatist and the heroes to facilitate and subsequently legitimize the defloration of a citizen's daughter, German and Dutch humanists were redeeming the Terentian plot of sexual and financial deception by adapting it to the New Testament parable of the talents and that of the prodigal son.33 The waste of money and dissipation of male sexual energy, became, in these reforming "Christian Terence" plays, analogous to the danger posed to civil society by the abuse of conjectural argument in what we might call the "technology of credit" represented by the Terentian plot.34

I use the word "technology" here to stress the material impact of the pedagogic dissemination of Terentian rhetoric. A pre-capitalist society necessarily guarantees its economic exchanges—exchanges of honor and wealth—by such instruments as oaths, which bind the faith of the contracting parties. The Terentian plot dramatizes a situation in which oaths and gestures of good faith bring about such an impasse as can only be resolved by exploiting the "error" or uncertainty about motive and intention which obtains between the participants in any social transaction. At a formal level, this very exploitation of error or uncertainty was the basis of the Terentian achievement of dramatic verisimilitude. Reformation dramatists were, therefore,
concerned to appropriate the power of the Terentian formula to grant verisimilitude to dramatic fantasy, or to bestow credibility upon outrageous hypotheses, without endorsing the suggestion that this rhetorical "technology of credit" be exploited to facilitate deceptive sexual and financial exchanges in real life.

Much has been made, in recent discussions of "desire" on the English Renaissance stage, of the anti-theater writers' objections to the eroticized body of the boy player. These discussions evidently misunderstand the relationship of anti-theater writing to sixteenth-century neo-Terentian drama, with disastrously simplifying effects. Thus, for example, the title of one polemic against the stage, Stephen Gosson's *Playes Confuted in Five Actions* does not go unnoticed, but its relevance is missed; Laura Levine calls Gosson's conception of his attack as a five-act play "confused," while Jean Howard simply notes that Gosson "uses the five-act structure of classical drama to wage war on theatre." The point is that the five act Terentian argument represented, for educated sixteenth-century men, a technology of credit or of probability which, in its dramatic form, was perceived to be implicated in an ethos of betrayal, sexual and otherwise. Gosson's title indicates a need to appropriate dramatic probability for the cause of reform, as it moves from mocking native English drama's ignorance of verisimilitude to condemning the probable arguments of Italian *commedia erudita* for their thematic endorsement of sexual and financial deception:

> When the soule of your playes is … Italian baudery, or the wooing of gentlewomen, what are we taught? … the discipline we gette by these playes is like to the justice that a certaine Schoolmaster taught in *Persia*, which taught his schollers to lye, and not to lye, to deceive, and not to deceive, with a distinction how they might do it to their friends, & how to their enemies; to their friends, for exercise; to their foes, in earnest. Wherein many of his pupils became so skillful by practise, by custome so bolde, that their dearest friends payde more for their learning than their enemies. I would wish the Players to beware of this kinde of schooling … whilst they teach youthfull gentlemen how to love, and not to love … As the mischiefs that followed that discipline of *Persia* enforced them to make a lawe, that young men should ever after, as householders use to instruct their families: so I trust, that when the Londoners are sufficiently beaten with the hunte of suche lessons that are learned at Plaies, if not for conscience sake, yet for shunning the mischief that may privately breake into every mans house, this methode of teaching will become so hateful, that even worldly pollicy … shall be driven to banish it.36

[my italics]

Gosson, of course, had himself been a dramatist; English playwrights were not ideologically immune to the effects of the Reformation, and were themselves torn between admiration for the rhetorical proficiency of Italian *commedia erudita*, and unease at its explicit promotion of an ethos of imposture and deception.

George Gascoigne thus produced an exuberant translation of Ariosto's irrepressible *I Suppositi* but followed it with the composition of an exceptionally harsh prodigal son play in which he argued that he would hence-forth be guilty of "no Terence phrase," since "Reformed speech doth now become us best."37 George Whetstone's two five-act plays concerning the exposition and punishment of illicit sex and the abuse of financial credit in a city like London were prefaced by an acknowledgment of the need for English dramatists to heed the Terentian rhetoric of probability, for the English playwright "grounds his work on impossibilities." The problem, argued Whetstone, was that the available Continental models of a probable drama—*commedia erudita* and "Christian Terence"—were no use to the English dramatist: "at this daye, the Italian is so lascivious in his comedies that the worst hearers are greeved at his actions," while "the German is too holye: for he presentes on every common Stage, what Preachers should pronounce in Pulpets."38 As Shakespeare paid both Gascoigne and Whetstone the compliment of rewriting the plays in question, we may reasonably infer that he was aware of the difficulty of dissociating the productivity of the Terentian technology of probability from its implicit endorsement of violations of chastity and betrayals of household honor.39
Shakespeare's *Twelfth Night*, for all its currency as a drama of the body and sexual desire, is in fact so remarkably chaste that Elizabeth Barrett Browning's friend, Anna Jameson, writing a political and feminist criticism of Shakespeare in 1832 could exclaim, "how exquisitely is the character of Viola fitted to her part, carrying through her ordeal with all inward grace and modesty!" Jameson was not being naive or repressed about the sexual content of the play: a glance at the Italian or Roman models of any comedy by Shakespeare will reveal how consistently he chastened their arguments, displacing deep into his depiction of female "character" the signs of an inclination towards sexual betrayal that in his originals were explicit sexual acts. The lawyer John Manningham, seeing a performance of *Twelfth Night* at the Middle Temple in February 1601, noted that it was "much like the commedy of errors or Menachmi in Plautus, but most like and neere to that in Italian called Inganni." Although there is a play called "Inganni," Manningham was almost certainly thinking of *Gl'Ingannati* or "The Deceived," a play by the Accademia degli Intronati di Siena, written as an apology to the ladies for a sketch performed the previous evening, which was Twelfth Night, 1531. *Gl'Ingannati* seems to have enjoyed a reputation for formal excellence only second, or perhaps not even that, to Ariosto. If Machiavelli (who himself translated Terence's *Andria*, the play central to Donatus's analysis) could urge the Tuscan to forget their prejudice against Ferarese Ariosto, for his "gentil composizione," the French Charles Estienne, dedicating his translation of *Gl'Ingannati* to the Dauphin in 1549, argued that this Sienese play surpassed even Ariosto, giving the reader the impression "que si Terence mesmes l'eust composé en Italien, à peine mieux l'eust il sceu diter, inventer ou deduyer." [That if Terence himself had composed it in Italian, he would hardly have known better how to express, invent or handle it.] English readers were probably aware of the play's high literary reputation; the scholarly publisher, Girolamo Ruscelli, included a collection of Italian comedies "buone degne di legersi, & d'imitarsi," [well worthy of being read and imitated] to which he appended a critical apparatus "de' modi osservati in esse da gli antichi, così Greci come Latini" [in the manner observed in the case of ancient authors, both Greek and Latin] so as to make them into a book of "eloquentia."

Behind the central plot device of both Ariosto's / *Suppositi* and *Gl'ingannati* (and remotely, therefore, behind Shakespeare's *Taming of the Shrew* and *Twelfth Night*) lay the notorious play by Terence called *Eunuchus*, which concerns a young man's gaining access, on the pretext of being a eunuch, to the house in which a virgin is being kept, whom he proceeds to rape. Renaissance versions of the plot, of course, have to deal with what we might call the "homosocial" aspect of the crime—that is, the outrage to fathers and kinsmen—since the virgin is no longer found in a house of courtesans. Thus, Polinesta's father in / *Suppositi* lifts the genre into pathos with his sorrow at the loss of his daughter's honor in his own house. And in *Gl'Ingannati*, though there is less pathos, the scandal of the daughter's seduction is perhaps even greater, due to the bizarre means by which she is left alone with a man in her bedroom (her father assumed the man was a woman dressed up; maybe it is a reminiscence of this scandalous plot that has Viola asking to be presented "as an eunch" to Orsino's court at the beginning of *Twelfth Night*).

*Gl'Ingannati* begins with a contract between two old men, Virginio and Gherardo, whereby Gherardo is to marry Virginio's daughter, Lelia; "Ne pensar ch'io mi sia permutare di quel ch'io t'ho promesso" [Don't think I'll go back on what I've promised] says Virginio; a merchant's credit depends on keeping his word. But his daughter, Lelia—Shakespeare's Viola—has slipped away from her convent and, disguised as a page, has entered the service of Flaminio, with whom she is in love, but who is himself besotted with another, namely Gherardo's daughter, Isabella, the equivalent of Shakespeare's Olivia. Isabella receives letters and "embassies" [imbasciati] from Flaminio by means of his cute page, Fabio (Lelia in disguise) with whom she, of course, falls in love.

It is worth pointing out how much more explicit than *Twelfth Night* this play is about the fact that sexual desire is not gender specific. Indeed, it becomes very clear that what counts, in distinguishing those who may desire and ask, and those who must be passive, is not gender but social status. Thus, when Lelia's nurse,
Clemenzia, finds out that, as Flammineo's page, she has been sleeping in the antechamber of his bedroom, she assumes he will ask her to sleep with him.\textsuperscript{49} And later, when Isabella's maid, Pasquella, asks Lelia, disguised as Fabio, why on earth "he" doesn't want to sleep with her mistress, Lelia-as-Fabio replies: "a me bisogna servire il padrone, intendi, Pasquella?" [I have to serve the master, you know what I mean, Pasquella?] and Pasquella does understand: "O io so ben che a tu padron non faresti dispiacere a venirci, non dormi forse con lui?" [Oh, I know very well that you don't displease your master by coming here; but you don't, by any chance, sleep with him?]. When Lelia replies, "Dio il volesse ch'io fosse tanto in gratia sua" [I wish I were so much in his favor] Pasquella is puzzled; "Oh non dormiresti piu volentieri con Isabella?" [Wouldn't you rather sleep with Isabella?], she asks. And she makes it clear, in an ensuing speech on the ephemerality of Fabio's good looks, that (as a fellow dependent herself) she regards the arrangement of sleeping with Isabella not so much as more "natural" than simply as more stable, practical, and fortunate in the long term for Fabio.\textsuperscript{50}

In good Terentian fashion, the denouement of the play proves that the contract between the old men is not broken, though both are fortunately deceived; their houses are united not by the impotent old Gherardo's marrying Lelia, but by the passionately consummated union of Isabella with Lelia's long-lost twin brother, Fabrizio, who, like Shakespeare's Sebastian, doesn't question his good fortune in happening accidentally upon a rich woman who ardently desires him. But where Shakespeare's Olivia finds out who her lover really is by means of the words he speaks (which, as we've seen, have been recently been read as proof of the inherent instability of gender in sixteenth-century thinking about the body), Isabella and the audience of Gl'Ingannati discover who her lover is in a speech which is more explicitly designed to "appeal to the body." Pasquella, Isabella's maid, emerges from the room in which the two old men have locked Isabella and someone who they think is the truant Lelia, in boy's clothes:

\textit{Pasquella:}

those two old sheep insisted that young man was a woman, and shut him in the room with Isabella, my mistress, and gave me the key. I wanted to go in and see what they were doing, and, finding them embracing and kissing together, I had to satisfy myself as to whether the other\textsuperscript{51} was male or female. The mistress had him stretched out on her bed, and was asking me to help her, while she held him by the hands. He allowed himself to be overcome, and I undid him in front, and in one pull, I felt something hit my hand; I couldn't tell whether it was a pestle, or a carrot, or indeed something else, but whatever it was, it hadn't suffered from hailstones. When I saw how it was, girls, I fled, and locked the exit! And I know that as far as I'm concerned, I won't go back in alone, and if one of you doesn't believe me, and wants to satisfy herself, I'll lend her the key.\textsuperscript{52}

Pasquella then tries to persuade the distraught Gherardo that it isn't true—his daughter isn't really embracing a man: "vedeste voi ogni cosa, e miraste che gli è femina" [Did you see everything? Well, then you can see she's a woman]. But Gherardo is not to be appeased: "svergognato a me," he says, "I am dishonoured."\textsuperscript{53} Gherardo has been deceived, despite his own sharp awareness of the nebulous quality of sexual honor and its susceptibility to gossip.

Precisely because they involve citizens' wives and daughters rather than courtesans, Renaissance imitations of Terentian comedy exhibit a strong awareness of the resemblance of the Terentian technology of probability—the uncertain, or conjectural argument—to the everyday gossip that destroys female sexual honor. Ariosto makes this a theme in \textit{I Suppositi}, where the nurse comes out of her house, onto the stage, anxious to avoid the spread of rumor within the walls, and proceeds to announce to the theatre at large that her charge has (probably) been sleeping with a household servant. But here in \textit{Gl'Ingannati} the joke turns on the way that Gherardo's cautious calculations on the risks of mere probability, uncertainty, and conjecture—calculations as to whether an association with the transvestite (and hence probably promiscuous) Lelia would call Isabella's own sexual innocence into question—are overthrown, by the substitution of
Fabrizio for Lelia in Isabella's bedroom, which ensures an unequivocally penetrative defloration. "L'ho veduto con questi occhi," says Gherado, "egli s'era spogliato in giubbone, et non hebbe tempo a corprisì … Io dico che gli e maschio, e bastarebbe a far due maschi" [I saw it with these eyes … he was undressed to his shirt and didn't have time to cover himself … I tell you he was a man, and had enough for two men].

The rhetorical deceptions by means of which the play's argument attains its probability—"la gaçon de disposer & pursuyure leur sens & argumens en icelles, pour donner recreation aux auditeurs" that Charles Estienne so admired—thus come to be associated with this act of penetrative sex. To the ladies in the audience, the prologue comments,

As far I understand it, they've called this comedy "The Deceived" not because they were ever deceived by you, oh no, … but they've called it so because there aren't many characters in the plot (favola) who don't, in the end, find themselves deceived. But there is among these deceptions one particular sort which makes me wish (for the malice I bear you) that you might be often deceived, if I were the deceiver … the plot is a new one … and is extracted from no other source than their busy pumpkin heads, from whence also came the fortunes you were allotted on Twelfth Night.

In this context, it looks as if the most significant single departure from the Italian variants on the plot of The Eunuch in Twelfth Night is its dissociation of the effectiveness of the original imposture of credit—the original pretense of androgyny or emasculation which effectively gains access to both to the person and to the heart of the wealthy Olivia—from the identification of its triumph as explicitly sexual (Fabrizio proving his virility with Isabella), rather than chastely marital (Sebastian contracted to Olivia). To a chance member of the audience of Twelfth Night in the Middle Temple in 1601 who saw the resemblance of Shakespeare's play to Gl'Inganni or Gl'Ingannati, meaning respectively "the deceits" and "the deceived," Sebastian's speech at the end might well recall these plays' themes and titles:

So comes it, lady, you have been mistook.
But nature to her bias drew in that.
You would have been contracted to a maid;
Nor are you therein, by my life, deceiv 'd:
You are betroth'd both to a maid and man.
(V.i.257-61)

"Deceiv'd" surely here recalls its Italian translation, "ingannata," and no less surely, there is an ethical distinction being made here between being "mistook" and being "deceiv'd" that turns on the question of whether or not Sebastian is a "maid." His affirmation before the audience that he is both "a maid and man" is less a signal of his inherent androgyny than an assurance that Olivia, not having experienced the same "inganno" as Isabella, remains chaste, honorable, and a prize worthy his, Sebastian's, having.

To the argument implied here—namely, that the explicit eroticism of Gl'Ingannati makes interpretations of Twelfth Night that focus exclusively on the body and sexuality look a little contrived—it could be objected that I am being literal-minded about the theatrical representation of desire. It could be argued (and I would agree) that the very reticence and fantasticality of the amorous language of Twelfth Night ensures the "circulation" of desire or of sexual energy more effectively than the gleeful voyeurism of Gl'Ingannati. If this is so, however, it must also be acknowledged that the same linguistic reticence and latency of meaning which allows us, in the 1990s, to read Twelfth Night as a celebration of the polymorphous potential of desire, equally enabled Anna Jameson in 1832 to find in Viola a paradigm of the sexual self-control that qualified women for access to education and political life. For, within Laqueur's argument, Jameson belongs to that category of nineteenth-century women who based their claims for the recognition of women's political capacity on arguments proving their inherent moral strength. If the rest of Laqueur's argument for the importance of the
eighteenth-century transition from the endorsement to the denial of female orgasm has substance, then it must follow that Shakespeare's own texts belong among the discourses that have, historically, helped to construct the moral characteristics felt to be appropriate to a biology of incommensurability—sexual difference—between the male and female. And this in turn would imply that, in their own time, Shakespeare's comedies were not just—in Stephen Greenblatt's words—fictions which "participated in a larger field of sexual discourses" but were fictions of the Reformation—that is, they were actively transformative of existing sexual discourses, tending to substitute the intimation of female sexual intention for the representation of the act which would implicate both sexes equally.58

It is, in fact, possible to trace through Shakespeare's plays a consistency of strategy (though not, of course, of effect) in his chastening of the roles and language of women. Whereas in his Italian and Roman sources, the significance of the "woman's part" to the resolution of the dilemma depends upon her having had sex, in Shakespeare this significance is translated into an implicit, or uncertain argument involving her dis-position to have sex, or her "sexuality." To modern readers this can give the impression of a more complex "interiority" or "character" because its doubtfulness requires our interpretation. In the fraught context of the emergent commercial theatre of sixteenth-century England, however, Shakespeare's chastening of Italian and Roman dramatic models was motivated by the need to prove that the productively deceptive arguments of a Terentian-style theatre need not, as its enemies suggested, necessarily advocate the breakdown of trust and honor by endorsing every kind of sexual and financial deception in contemporary society.59

To attempt a reading of Twelfth Night that would seriously try to take account of the play's place in the history of sex and gender would require some elaboration of how, in common with other Shakespeare plays, this comedy makes a theme of being implicated in a humanistic literary culture which, through its privileging of skill in persuasive argument, was in the process of transforming relations of economic and social dependency. Current discussions of the subversive erotics of the Renaissance stage trivialize the economic and social issues at stake in Twelfth Night and similar plays by reducing the whole of the humanist literary culture of which the theatre was a product to the most banal version of Greenblatt's "self-fashioning"—a mere "increased self-consciousness about the fashioning of human identity as a manipulable, artful process."60 "Self-fashioning" thereby becomes synonymous with a quite unspecific notion of "theatricality," which in turn is easily assimilated to the concept of "performativity" articulated by Judith Butler in relation to the category of gender.61 The sixteenth-century investment in masculine education, which crucially enabled the very instances of "self-fashioning" or of "theatricality" so beloved of current criticism—an education which privileged the dialectical and analysis and imitation of classical texts—is simply left out of the discussion. What we have as a result is a criticism of Shakespeare, Jonson and others that is incapable of accounting for the rhetorical and affective excess distinguishing this drama of the English Renaissance from its Continental antecedents; an excess which, in the case of Twelfth Night, permits interpretations as widely divergent as those of Greenblatt, Barber, and Jameson, and which therefore (because of its contribution to the historical "instability" of the play's "identity") surely begs to be interpreted as a thematic aspect of the play's concern with disguise, deception, and "theatricality."

For an example of how even good contemporary criticism effaces the rhetorical content of the play I want to turn to Valerie Traub's argument that the meaning of Viola/Cesario resides principally in the "dual erotic investment" that the play establishes in order to "elicit the similarly polymorphous desires of the audience, whose spectator pleasure would be at least partly derived from a transgressive glimpse of multiple erotic possibilities." In order to "substantiate the play's investment in erotic duality," she continues,

one can compare the language used in Viola/Cesario's two avowals of love: the first as Orsino's wooer of Olivia, and the second as s/he attempts to communicate love to Orsino. In both avowals, Viola/Cesario theatricalizes desire, using a similar language of conditionals toward both erotic objects …"If I did love you with my master's flame, / With such a suffr'ing, such a deadly life, / In your denial I would find no sense; / I would not understand
I would not for a moment deny the existence of the "dual erotic investment" which Traub does well to point out. However, another brief glance at *Gl'Ingannati* will show that Shakespeare's text is more remarkable for resisting than exploiting the considerable dramatic potential of any such investment.

Reading *Gl'Ingannati*, Shakespeare would have come across a model for a scene between Olivia and Viola/Cesario. The scene in question requires the audience to share the voyeuristic position of Flamineo's servants who stumble across Isabella and Lelia/Fabio during an intimate exchange of words and caresses. The audience, however, knows that "Fabio" is, for the purposes of the play, a woman (though the part was probably played by a boy). For the servants, then, the scene arouses sexual feeling and a sense of scandal at the betrayal of Flamineo by the "boy" whom he loved and trusted so much; the audience, however, freed from any sense of the latter, is invited to enjoy the transgression of the scene as if it were a kind of affluence; in Traub's words, it becomes "a transgressive glimpse of multiple erotic possibilities."

Isa. Do you know what I'd like?
Lel. What would you like?
Isa. I'd like you to come closer.
Sca. Get closer, you bumpkin.
Isa. Listen, do you want to go?
Sca. Kiss her, for Christ's sake.
Cri. She's afraid of being seen.
Isa. Come into the doorway a little.
Sca. The thing is done.
Cri. Alas, alas, I'm dry and thirsty—do it to me!
Sca. Didn't I tell you he'd kiss her?

Without denying the possibility of performing the equivalent scene between Olivia and Viola/Cesario in such a way as to maximize its erotic possibilities, I would want to argue that the rhetorical excess which distinguishes Shakespeare's text from the Italian model insists on a far higher level of engagement from the audience as auditors. This, in turn, reorients the dramatic meaning of the scene from pleasure in the spectacle of erotic possibility towards complicity in the act of *interpretation* by means of which a reader or auditor lends credibility to the figures, tropes, and fictions in the discourse of another.

Such audience complicity in the bestowal of credibility through interpretation replicates what the scene offers by way of a narrative of "desire." Olivia's desire for Viola/Cesario must become intelligible (unless we ignore the text altogether) through Viola/Cesario's progression away from formal literary models of courtship towards the affective intimacy of a more familiar mode of address, exemplified in the deservedly famous speech which begins, "Make me a willow cabin at your gate" (1.5.273). At this point we have already witnessed Olivia's unenchanted exposure of the economics of the Petrarchan argument, her parody of its facile and opportunistic movement from the praise of natural beauty to the imperatives of husbandry and reproduction: "O sir, I will not be so hard-hearted, I will give out divers schedules of my beauty" (1.5.247-48). Cesario's subsequent readiness to improvise a first-person fiction of abandonment in love represents an ability to extemporize, to seize "the gifts of moment" and so illustrate the crowning glory of classical rhetorical education.

The speech's most obvious analogue in the schoolboy literature which prepared men for such improvisations is that of the impassioned epistolary rhetoric of the women of Ovid's *Heroides*, whose vivid evocations of their writing, and of the cries that echo through the wild and lonely places to which they are abandoned,
resemble (in their simultaneous acknowledgment of hopelessness and its contradiction by the emotions aroused in the reader) the curious emotional power tapped by Cesario's entry into a hypothetical desolation of ineffectual texts that nevertheless defy the premise of their ineffectuality. Like Dido writing "without hope to move you," or Oenone, telling Paris how she made Ida resound with howls ("uluati") at his desertion, Viola/Cesario imagines filling the vacant times and spaces of rejection with "cants of contemned love" and "halloos" of Olivia's name, suddenly evoking a geography of loneliness in a play otherwise suggestive of houses, estates, and urbanity. The implied femininity of Cesario's hypothetically assumed persona here, however, merely complicates the already problematic dramatic hypothesis of a female "Viola" inasmuch as the prominence of Ovid's *Heroides* within the education syllabus for boys implied, as Warren Boutcher has noted,

>a relationship between the path to knowledge and … the mastery of the heroical genus *familiare*, with its base in epistolary stories which involve—both in the telling and in the action—intimate access to and power over feminine sensibility.

The "femininity" of the genre, then, is inseparable from its implication in a plot of seduction not unlike that of Petrarchism, except that in this version "femininity" itself—understood as a peculiar susceptibility to artificially induced compassion—is the emotional catalyst of masculine rhetorical success.

Olivia's desire for Viola/Cesario becomes apparent as a response to this speech and is inseparable, in its articulation, from the material expression of belief ("credit") that would exempt the unknown stranger from providing the heraldic display (the "blazon") that would put "his" gentility beyond doubt:

"What is my parentage?"
"Above my fortunes, yet my state is well,
I am a gentleman." I'll be sworn thou art;
Thy tongue, thy face, thy limbs, actions and spirit
Do give thee five-fold blazon. Not too fast:
soft! soft!
Unless the master were the man …
(1.5.293-98)

Olivia's desire motivates her affirmation of Cesario's somewhat evasive protestation of gentility on the grounds of "his" exceptional beauty, eloquence, and presence of mind. What this implies, then, is that the capacity to arouse desire resides less in the androgynous beauty of the body, than in the body conceived as the medium of *elocutio* ("tongue … face … limbs … actions … spirit"); that is, the apt delivery of the mind's invention. Viola/ Cesario embodies the capacity of timely and well expressed speech to compel for a mere fiction *credit*, that is the kind of materially consequential belief (in this case, belief in matrimonial eligibility) that is rarely afforded to the "real thing."

The transgressive "glimpse" being offered to a seventeenth-century audience here, I would suggest, is less that of lesbian desire than that of the opportunity for social advancement and erotic gratification afforded by education for any servant of ability entrusted with missions of such intimate familiarity. That the entertainment of such a possibility is necessarily transgressive (though here held at bay from full recognition by the "femininity" of Viola) is evident from the care taken in the Malvolio plot to exploit the audience's revulsion at the very same idea. As a steward, Malvolio shares with Viola/Cesario the distinction of being a household servant whose "civility" of manner is qualification for a position of exceptional trust in the intimate affairs of the household. Olivia's musing, "unless the master were the man," touches the center of the play's concern with the question of social advancement by means of skills and attractions "blazoned" in the execution of service rather than properly inhering in nobility. How can such social advancement be imagined
except as an individualistic pursuit of gain, a betrayal of trust, sexual honor, economic dependency, and love?

Leo Salingar and Emrys Jones have shown how comedies of the late 1590s and early 1600s are concerned with establishing the credentials of a notion of "gentility" that operates independently of the feudal structures of lineage and affinity. "The king might create a duke, but not even he could create a gentleman," writes Jones, echoing a sentiment expressed in plays of this period. Gentility thus conceived is less the effect of lineage than of a certain affluence—freedom from manual labor—combined with the type of liberal education that might contribute a civil demeanor in social exchange. The arguments of such comedies therefore require that the discursively and morally cumbersome aspects of the humanist education bequeathed by Erasmus and the grammar schools be adapted to requirements of a style and habitus such as Viola/Cesario exhibits: a non-pedantic conversational facility appropriate to the modest enterprises of urban social encounter.

Salingar sees the conflicts played out through this re-definition of humanistic "wit" in terms of an attempt to distinguish between money values and "the values of a leisure class" whose social and financial ambitions are subliminally expressed as the civilized pleasures of courtship. Jones notes in the early 1600s the "crystallisation of a new theatrical formula":

The plays in question are comedies, usually set in some fictitious vaguely foreign court, often with a double-plot of which one part may be romantic and the other more frankly comic. The comic action sometimes takes the form of a persecution, a "baiting" extended through several episodes.

About the same time as the Chamberlain's men performed Twelfth Night, the children of the Chapel staged one of the plays to which Jones here refers, The Gentleman Usher. In the predicament of its eponymous anti-hero, Bassiolo, the play comments interestingly on Twelfth Night, condensing different aspects of the situations in which Viola/Cesario and Malvolio find themselves. Bassiolo is, like Malvolio, the most trusted servant in the household of Count Lasso, but, like Viola/ Cesario, his being familiarly confided in and befriended by a nobleman for whom he undertakes to woo Margaret, Count Lasso's daughter, immediately puts him in a position of both actual and potential betrayal of trust: Vincentio accuses him of behaving, "as if the master were the man" in an erotic sense, but he has already done so in the sense that in his contract of friendship with Vincentio, he is wooing for himself.

Chapman's is, however, a far more conservative play than Shakespeare's. Whereas Viola/Cesario's inspired improvisation on the model of the Ovidian heroic epistle actually gains the sympathetic ear and the heart of Olivia, Bassiolo's verbose and cumbersome attempt at amorous epistles merely earns him the noble lovers' contempt, serving to prove that the adaptation of a liberal education to civilized wooing can only be managed by one whose gentleness of birth is beyond dispute. The play is nevertheless concerned to argue the necessity of complementing the hunting and riding skills traditionally definitive of nobility with "wits and paper learning" of a non-pedantic kind; the Duke's ennobling of his illiterate minion, Medice, proves disastrous, arguing against the social advancement of servants who are unable to acquit themselves plausibly in noble society. At the same time, however, the play finds, in Bassiolo's dilemma between fidelity to his master, and the opportunity offered by Vincentio's pretended confidence in his rhetorical ability, that any servant so accomplished and entrusted is liable to deceive.

The fantastic unlikelihood of the plot of Twelfth Night and its apparent preoccupation with issues of gender have distracted critical attention from the play's affinity with such contemporary comedies of civility and social advancement. Yet it might well be argued that the very fantasticality of the fiction of gender in Twelfth Night constitutes the play's strategy of engagement with contemporary debates on the legitimacy of the individualistic exploitation of service in order, in Viola's own words, to "make occasion mellow."
Twelfth Night endorses the notion of rhetorical opportunism, or individual enterprise insofar as it expresses the mastery of fortune and of the occasions of civil life as the metaphorical equivalent of heroic enterprise on the high seas. Thus, for example, the rivalry between Viola and Aguecheek for the favor of Olivia is recurrently expressed in a nautical idiom. Viola is spoken of as having "trade" (3.1.76) and "commerce" (3.4.175) with Olivia, "she is the list of my voyage" says Viola (3.1.77). The hapless Aguecheek, for lack of Viola's witty invention and attractive presence, is berated for having "sailed into the north of my lady's opinion, where you will hang, like an icicle on a Dutchman's beard, unless you redeem it by some laudable attempt, either of valor or policy" (3.3.24-28). Fabian's reference here—to a 1598 translation of Gerrit de Veer's report of the ordeal of Dutch explorers trapped for ten months in Nova Zembla, where they "never saw, nor heard of any man"—comically imagines Aguecheek's conversational failure both as a failure to prove his masculinity and as meriting exile altogether from the new medium of masculine self-assertion—the profitable commerce of sociability.

The sociability thus defined as heroically masculine, however, must be purposeful as well as facile; Orsino, as Feste says, is insufficiently discriminating in the object of his discourse: "I would have men of such constancy put to sea that their business might be everywhere and there intent nowhere, for that's it always makes a good voyage of nothing" (2.4.75-78). The pervasiveness of such oceanic metaphors, as well as references to maps and narratives of discovery (Malvolio's smiling face is likened to the 1599 map which displayed the new world "as revealed by actual voyages of discovery") invests the Renaissance synonymity of "tempest" and "fortune" with specifically economic resonances. From the analogy developed between drinking and the hazards of navigation (Feste tells Olivia that a drunken man is like a drowned man—1.5.132) there emerges a chiastic narrative of rhetorical oikonomia, in which the eloquent and beautiful twins exchange near-drowning for domestic security, while the drunken and inept or irresponsible Toby and Aguecheek—initially comfortable with cakes and ale in Olivia's buttery—are finally banished, like the "knaves and fools" they prove to be, to the "wind and the rain" of Feste's song, beyond Olivia's gates.

Oikonomia is rhetorical because linguistic ability is identified with the ability to manage wealth. Maria declares of the wealthy Aguecheek that he is incompetent with his resources, he will "have but a year to all those ducats. He's a very fool, and a prodigal" (1.3.22); this failure in husbandry is then discovered at intervals during the play as Aguecheek's recurrent inability to invent plausible arguments or "reasons" for his words or actions. Aguecheek's companions are always teasing him for the reasons he cannot give; "Pourquoi? " asks Toby when Aguecheek declares his intention to leave at once, but the question bewilders the knight (1.3.89). In a later exchange Fabian joins Toby in demanding evidence of plausibility: "You must needs yield your reason, Sir Andrew" (3.2.2). The letter which Toby urges him to make "eloquent and full of invention" (3.2.41-43) turns out to be as barren as his speech: "Wonder not … why I do call thee [a scurvy fellow] for I will show thee no reason for't" (3.4.152-53).

When Anna Jameson praised Viola for the moral sensibility she displayed both in the propriety of her fidelity to Orsino, and in "her generous feeling for her rival Olivia," she appropriated for nineteenth-century feminism a seventeenth-century play's concern with calling into question the assumption that eloquent servants, accomplished in the provision of reasons, and entrusted with the intimate affairs of the household, are necessarily opportunists, people who deceive. The narrative rationale of the scene I have already remarked upon in Gl'Ingannati, in which Flammineo's servants spy upon Isabella and Lelia's kiss, is to enrage Flammineo against the deceitfulness of his favorite, Fabio; a hilarious scene ensues in which the probability of the kiss is itself called into doubt by the incompetence of the servants in relaying to Flammineo their evidence of Fabio's perfidy. The point here, however, is that Lelia/Fabio has kissed Isabella; one deceit leads to another, and Lelia finds herself explaining her refusal of further favors to Isabella on the grounds that "too much love" for Isabella has already led her to deceive ("ingannare") her lord. Earlier, however, Lelia/Fabio showed a singular lack of regard for Flammineo's suit, attempting by means of Pasquella to ensure that Isabella would never respond to his affections; Viola, as Jameson notes, is remarkable for resisting the temptation to do this. In Chapman's Gentleman Usher, Bassiolo, also in the position of a go-between or an
ambassador between lovers, is tempted not only into exploitation of his position of trust, but into presumptions of equality and friendship with the nobleman who employs him, which the play then ridicules with all the fervor of profound social anxiety.

It becomes clear that the twinning of Sebastian and Viola, and the femininity of the latter, occurs in Shakespeare's play not simply (as in other derivatives of Terence's *Eunuch*) for the sake of resolving an erotic impasse by offering a means of gaining access to the cloistered woman, but for the sake of foregrounding an outrageously improbable hypothesis about the possibility of combining fidelity in service with rhetorical *oikonomia*—that is, the heroic exploitation of rhetorical opportunity, which typically achieves both economic security and erotic gratification. Terence Cave has noted that the final revelation of "Viola's" identity remains merely hypothetical, contingent on an accumulation of probabilities beyond the scope of the play: "Do not embrace me till each circumstance / Of place, time, fortune do cohere and jump / That I am Viola." It could be said that the femininity of Viola is the grounds upon which the fiction of the servant Cesario can prove the success of eloquence in the narrative of social advancement that Sebastian fulfills, while at the same time ensuring this narrative remains quite untainted by what would otherwise be its precondition—the betrayal of the master by his "man." Viola/Cesario, then, represents more than the "dual erotic investment" that exhausts the meaning of Lelia/Fabio, for s/he is the means by which a seventeenth-century audience could be seduced into entertaining unawares the possibility of a positive version of Malvolio, a servant able to exploit the civility that earns the trust and favor of noblewomen to the extent of achieving the "love" that promises contractual equality. When Fabian imagines himself condemning the crossgartered Malvolio as an "improbable fiction" on the stage, he draws attention to the self-consciousness that marks the play's violation of the Terentian rhetoric of probability, which remains so near the textual surface of *Gl'Ingannati*. Any audience hearing Fabian, however, must feel that the primary violation of probability lies not in the outrageousness of Malvolio's behavior, but in the very existence of the person called Viola, who represents, as Terence Cave has written, "a particularly fruitful violation of the laws of rational discourse no less than sexual decorum," and whose name performs a number of associative tricks, as it "echoes the erotic flowers and music of the opening scene, insidiously rearranges the letters of Olivia's name, and comes close to naming violation itself."

The play's erotic investment in Viola/Cesario is less, I would argue, than its investment in the violation of probability constituted by the twinship of Viola and Sebastian, which first casts the desire and emotion aroused by Cesario into extremity, and then resolves that extremity as a miraculous disproof of the betrayal of trust that would, in the ordinary circumstances of daily life, be its explanation. Thus, for example, where the sodomitic behavior of Fabrizio's traveling companion, the pedant in *Gl'Ingannati*, merely fuels the sexual comedy of that play, the love Antonio feels for Sebastian, while equally open to homoerotic interpretation, is not sidelined by mockery, but rendered able to share on equal terms in a dramatic climax which turns less on the nuptials that unite the two houses than on the proof that not one of the lovers of a beautiful "boy"—neither his wife, nor his master, nor his friend in need—is "therein, by my life, deceiv'd." The "hints of corruption and aggression," which, as Cave notes, recur in the play, accumulate around the common sense perception that the youthful beauty of a stranger is *probably* as deceitful as it is irresistibly attractive.

Certainly Orsino, having charged his lovely ambassador with the ethically problematic obligation to make "discourse" of his "dear faith" and "act" his woes, reads the apparent consequence—Cesario's contract to Olivia—as presaging the youth's career in similar deceptions: "thou dissembling cub! What wilt thou be / When time hath sown a grizzle on thy case?" (5.1.162-63). The pathos of Olivia's case is more marked, as she interprets Viola/Cesario's love for Orsino as the "fear" rightfully aroused by the consciousness of having betrayed his master. In attempting to prevent Viola/Cesario's protestation of innocence, she exposes the instability of her own grounds for belief in the youth's continued fidelity to her. "Oh, do not swear!" she begs, "Hold little faith, though thou hast too much fear" (5.1.169-170). Most moving of all, however, is Antonio's apology for being obliged by love into an extremity that makes demands of the one he loves. "What will you do, now my necessity / Makes me to ask you for my purse?" he gently enquires (3.4.342-43), only to be
moved by Viola/ Cesario's non-recognition, into an outburst against the deceptiveness of the "promise" that was the boy's manner and looks (3.4.369-79).

A contemporary reader, perusing a popular anthology of the period known as *The Parodyse of daynty deuises*, found one poem entitled thus: "Who mindes to bring his ship to happy shore / Must care to know the lawes of wisdomes lore." By this poem he wrote, "rules of wary life," bracketing off for particular annotation a verse referring to trust in friendship. Do not bestow credit on boys, the verse advised, for, "Ful soone the boy thy frendship will despyse / And him for loue thou shalt ungrateful find." As Erica Sheen has pointed out, the protracted denouement of *Cymbeline* features a "boy" called Imogen who refuses to plead for the life of her savior and friend, Lucentio. His moralizing comment, "briefly die their joys / that place them on the truth of girls and boys" does nothing to assuage the audience's impatient desire to resolve his mistake, proving the "truth" that probability and versified common sense would deny. Just so here, in *Twelfth Night*, Antonio's sententious conclusions on beauty and deceit merely fuel the audience's desire to relieve him of the pain of believing he has loved a "most ingrateful boy" (5.1.75). In view of this, Greenblatt's observation that, at the end of the play, "Viola is still Cesario," seems not so much to argue for any specific beliefs about instability of gender, as to be a part of that complex affective structure by means of which a boy proves, most improbably, to be "true" to all the kinds of lovers he might have—right up until the end of the play.

What, then, of the play's place in a history of sex and gender? The least that should be said is that any attempt to de-essentialize and historicize gender by appealing to a Galenic theory of men and women differentiated only by degrees of body heat is of strictly limited value in the analysis of a complicated tradition of comic writing in which what distinguishes men is their privileged access to allusive and intertextual levels of meaning—in other words, their access to active participation in the historical and discursive process of defining the social roles and characteristics of either sex. But something rather more positive may be said about *Twelfth Night* in particular. For here once again Shakespeare has chastened the argument of a neoTerentian play in such a way as to maximize the interpretative possibilities, and consequently the historical tenacity, of the English dramatic text.

That the meaning of the Viola/Olivia courtship for a seventeenth-century audience resided at least partly in its capacity to seduce them into condoning the social (rather than sexual) transgression elsewhere reviled by the play's mockery of Malvolio is suggested by the history of critical reaction to Shakespeare's conception of Viola. The probability of Lelia's dressing up as Fabio is established in *Gl'Ingannati* in an exchange with her nurse during which she admits that since being kept prisoner by soldiers, she has become sexually suspect irrespective of her conduct: ever since the sack of Rome, she says, "ne credevo poter vivere sí honestamente, che bastasse a far che la gente non havesse che dire" [I didn't see how I could live honestly enough to stop them gossiping]. In 1753 Charlotte Lennox, writing a criticism of Shakespeare, objected to the want of any similar argument of probability in relation to Viola's decision to dress as a man:

A very natural scheme, this for a beautiful and virtuous young Lady, to throw off all the modesty and Reservedness of her Sex, mix among men, herself disguised as one; and prest by no Necessity; influenced by no Passion, expose herself to all the dangerous consequences of so unworthy and shameful a Situation.

The Italian source, she notes, "is much more careful to preserve Probability" than "the Poet Shakespeare." However, by 1832 the very want of any "probable" argument for Viola's behavior (since any such would reflect upon Viola's modesty) enabled Anna Jameson to celebrate her femininity as the source of the peculiar integrity which characterizes her relations to both master and mistress. The very improbability of Viola, then, serves to break down the identification of rhetorical virtuosity (the capacity to make things probable) with the sexual conquest of women that marks the plot of the Italian play. The literal intertwining of the names of Malvolio, Olivia, and Viola has often been pointed out, but it many not be entirely fanciful to recall that the
identification of "inganni" (deceptions, probable arguments) with the sexual deception that makes Isabella unchaste is signaled in the prologue of Gl'Ingannati with following innuendo:

But there is among these deceptions one particular sort which makes me wish, for the malice I bear you, that you might be often deceived, if I were the deceiver.89

Here "il mal ch'io vi voglio" is a kind of flirtatious joke on the euphemism for fancying someone, "ti voglio bene." In entertaining ambitious fantasies which suddenly and indecorously make the audience aware that these are also sexual fantasies about Olivia (2.5.47-48), Shakespeare's Malvolio bears the trace of the erotic "mal ... voglio" by which Fabrizio's economic success is identified as a sexual conquest and extended through innuendo to characterize the terms upon which a female audience may be imagined capable of enjoying the argument of the play.

What was positive for seventeenth-century women about the way in which Twelfth Night addressed them, then, was due less to the "high cultural investment in female erotic pleasure … because it was thought necessary for conception to occur" than to its opposite:90 the extent to which, by refusing to subject Olivia to the "mal ... voglio" of an explicitly sexual encounter with Sebastian on the model of Isabella's with Fabrizio, Shakespeare manages to portray a heroine whose prudence, good judgment, and ability to govern others remain uncompromised even by her contract with the beautiful youth. For in marrying Sebastian, Olivia has arguably yielded to no whim, but carried out the strategic plan first made known to us by Sir Toby Belch: "she'll not match above her degree, neither in estate, years, nor wit" (1.3.106-108). Olivia never wavers from this purpose, and in providing the precedent that it elsewhere pretends to deny—marriage between a noble-woman and one beneath her—the play endorses the real-life example of the highly intelligent Katherine Brandon, Duchess of Suffolk, who, after having been married at fourteen to her forty-nine-year-old noble guardian, later decided to marry none other then her gentleman usher, who was "an accomplished gentleman, well versed in the study of the languages … bold in discourse, quick in repartee." There were, as Katherine Brandon's biographer commented, "many reasons why the clever and serviceable gentleman usher who conducted her business … should seem to the Duchess a more desirable husband than an ambitious noble."91 Shakespeare's play, around 1602, contributed to the undoing of the social and sexual stereotyping that would make of that last statement nothing but a dirty joke.

Notes

3 I should acknowledge here my gratitude to Gayle Kern Paster, who, on reading a version of this paper, pointed out that my concern here is more with textual criticism's historicizing of erotic desire rather than with body history per se.

The examples Montaigne cites are those of Iphis, from Ovid, *Metamorphoses* IX, 793ff, and of Lucius Constitus, from Pliny, *Naturalis Historia* VII, iv. See Michel de Montaigne, *The Complete Essays*, trans. M. A. Screech (London: Penguin, 1991), 110. In his chapter of "histoires memorables de certains femmes qui sont degeneres en hommes," Ambroise Paré, *Des Monstres et Prodiges*, ed. Jean Céard (Geneva: Libraire Droz, 1971), includes the same example from Pliny, the story of Marie Germaine, and the example of Maria Pateca, told by João Rodrigues in *Amati Lusitani Medici Physici Praestantissimi, Curationum medicinalium centuriae quatuor* (Froben: Basel, 1567), 168. Needless to say, Rodrigues also cites Pliny, confirming a certain sense of circularity and repetition in the gathering of such instances. One might want to argue for a belief in the frequency of the phenomenon from Montaigne's comment, "Ce n'est pas tant de merveille que cette sort d'accident se rencontre frequent" [It isn't surprising that this sort of accident occurs frequently]. However, as Montaigne attributes the "accident" in question to the power of the imagination, which elsewhere in the same essay becomes responsible for un-founded beliefs in the magic that causes impotence, it is not clear how sceptically he means this. In any case, Montaigne's version of Marie-Germaine's accident does not
conform to Paré's analysis, since Montaigne attributes to the power of the imagination the capacity to satisfy itself a sexual longing by producing the desired genitals of the (opposite?) sex—"si l'imagination peut en telles choses, elle est si continuellement et si vigoureusement attaché à ce sujet, que, pour n'avoir si souvent à rechoir en même pensée et àperé de désir, elle a meilleur compte d'incorporer une fois pour toutes cette virile partie aux filles." This would seem to argue that girls did not already possess "cette virile partie." See Michel Eyquem de Montaigne, Oeuvres Complètes, ed. R. Barrai (Paris: du Seuil, 1967), 54. An excellent article by Patricia Parker, which came to my notice after I had written this article, criticizes both the functioning of medical discourse and the teleology of masculinity as a "reassuringly stable ground" in the arguments of Laqueur and Greenblatt and points to the preoccupation of Montaigne's essay with the anxiety that masculinity itself requires supplementation, to repair the "defect in sex" which is impotence. See Patricia Parker, "Gender Ideology, Gender Change: The Case of Marie Germaine," Critical Inquiry 19 (Winter, 1993), 335-64.

22 Traub, 51. This seems unlikely, since Paré explicitly says that the mutation can only go one way: "nous ne trouvons jamais en histoire veritable que d'homme aucun soit devenu femme, pource que Nature tend toujours à ce qui est le plus parfaict, et non au contraire faire ce qui est parfaict devienne imparfaict" [we never find in any true history that any man whatsoever became a woman, because Nature always tends towards that which is the most perfect, and does not on the contrary make what is perfect become imperfect].

23 Orgel, 10.

24 Traub, 103, 117, 141.

25 Thus, Traub, in her concern to refute or modify Orgel's argument that the transvestite theatre was at least in part motivated by a recognition of the value represented by female chastity, misleadingly represents the arguments as being about "the fantasized dangers posed by women" (121), which obscures beyond recovery the notion that women's chastity was valuable because it affected male honor and, therefore, economic power. The latter argument has been well made in relation to "desire" in the ancient world by John Winkler, The Constraints of Desire: The Anthropology of Sex and Gender in Ancient Greece (London: Routledge, 1990), 74-75.

26 Greenblatt, 88.

27 The idea that women in the audience fell in love with the players seems to have been common enough; see Beaumont and Fletcher 1.1.46-48, of a waiting maid: "She lov'd all the Players in the last Queenes time once over: she was strook when they acted lovers, and forsook some when they plaid murtherers." Women's susceptibility to the fiction, then, seems to have been laughed at, whereas the ridicule of men turns on the degree of aptitude or otherwise with which they make use of the wit they have heard at plays.

33 "E vi confessa in questo l'Autore avere e Plauto e Terenzio seguitato, … non solo ne li costumi, ma ne li argomenti ancora de le fabule vuole essere de li antiche … imitatore" [And the Author confesses that in this he has followed Plautus and Terence … because he wants to be an imitator of the ancients not just in their customs, but in their arguments and plots]: *Tutte le Opere di Ludovico Ariosto*, ed. Cesare Segre (Milan: Mondadori, 1974), 197.

39 Gascoigne's *Supposes* as *The Taming of the Shrew* and Whetstone's *Promos and Cassandra* as *Measure for Measure*.

Delle Comedie Elette Novamente raccolte insieme, con le correttioni, & annotationi di Girolamo Ruscelli (Venetia, 1554), 164. Unfortunately, there are few annotations after Bibiena and Machiavelli, and there is nothing interesting on Gl'Ingannati.

See Terence, The Eunuch, Terence, 2 vols., trans. J. Sergeant (London: Heinemann, 1912). Arisoto explicitly derives his seduction plot from The Eunuch (Opere, IV. 197), but mitigates its scandalous effect by crossing it with Plautus' highminded Captivi. Shakespeare in The Taming of the Shrew makes several references to The Eunuch, which assimilate it to the humanist debate about the ethics of teaching schoolboys the classics, and to the anti-theatre argument that theatre works like pornography, to arouse men to commit sexual crimes. For the centrality of The Eunuch to sixteenth-century debates about art and pornography, see Carlo Ginzburg, "Titian, Ovid and Erotic Illustration," Myths, Emblems, Clues, trans. John and Anne Tedeschi (London: Hutchinson, 1986), 77-95.

1.3.56; "Thou shalt present me as an eunuch to him"; compare Terence, "Chaerea. o fortunatem istum eunuchum qui quidem inhanc detur domum! ... Parmeno. pro illo te deducam" [Chaerea. o what a lucky eunuch to be made a present for that house! ... Parmeno. I could take you instead], The Eunuch, in Terence, II. 270-71.

Sacrificio, Gl'ingannati, Comedia degli Intronati celebrato nei Giuochi d'un Carnovale di Siena (Venetia: Altobello Salicero, 1569) 1.1, fol. 18v. There is a translation of this play by Geoffrey Bullough in Narrative and Dramatic Sources of Shakespeare (London: Routledge, 1958), 2:286-339, but it omits or censors a fair amount.

"Clem. Dimmi un poco, & dove dormi tu? / Lelia. In una sua anticamera sola. / Clem. Se una notte tentato dalla maladetta tentazione ti chiamasse che tu dormisse con lui, come andrebbe? / Lelia. Io non voglio pensare al male prima che venga" 1.3, fol. 26r.

"Clem. Dimmi un poco, & dove dormi tu? / Lelia. In una sua anticamera sola. / Clem. Se una notte tentato dalla maladetta tentazione ti chiamasse che tu dormisse con lui, come andrebbe? / Lelia. Io non voglio pensare al male prima che venga" 1.3, fol. 26r.

This isn't quite accurate as a rendering of "s'era maschio o femina," but any other way would announce the gender of Isabella's partner too soon by assigning a pronoun.

Gl'Ingannati, 4.4, fol. 58v. This is one of the passages that Bullough omits in his translation.

Gl'Ingannati, 4.8, fol. 62v.

Gl'Ingannati, 4.8, fol. 62v.

Estienne, Les Abusez, sig. A3r.

See Laqueur, *Making Sex*, 194-205 and Barbara Taylor, *Eve and the New Jerusalem* (Virago, 1983), 28. Laqueur and Taylor both refer to the use made by feminists like Jameson of texts such as John Millar’s *The Origin of the Distinction of Ranks* (Basel, 1793), which suggested that position of women in any society might be taken as a measurement of its civility and well being. Millar's influence is certainly traceable in Anna Jameson's *Sketches in Canada, or Rambles among the Red Men* (London: Longman, 1852), and is compatible with the project of *The Characteristics of Women* as outlined in the introductory dialogue, 20-31.

Greenblatt, *Fiction and Friction*, 75.

For an account of how this happens in *The Comedy of Errors* and *The Taming of the Shrew*, see ”Why do Shakespeare's women have 'characters'?” *The Usurer's Daughter*, 178-213.

Levine, *Men in Women's Clothing*, 11; see also Both Levine and Howard reduce the meaning of "theatricality" to the subversions, sexual and social, effected by the assumption of disguise, as if clothes themselves made the theatrical fiction credible and powerful.

Traub, *Desire and Anxiety*, 131.

None of the authorities on sixteenth-century Italian drama that I consulted [Mario Baratto, *La Commedia del Cinquecento* (Venice, 1975); Nino Borsellino, *Rozzie Intronati* (Rome, 1974); Aulo Greco, *L'istituzione del teatro comico nel rinascimento* (Naples, 1976); Marvin Herrick, *Italian Comedy in the Renaissance* (Urbana: U of Illinois P, 1960); Louise Clubb, *Italian Drama in Shakespeare’s Time* (New Haven: Yale UP, 1989)] could inform me on this question of staging. However, Pamela Benson very kindly consulted the current expert on Italian theatrical production, Richard Andrews, whose reply suggested that although plays in convents had all female casts, courtesans were famous for improvising scenes in their salons, and there is some evidence that women did play at court and in some touring companies, they were unlikely to have taken parts in a play put on by a learned academy, such as the Intronati di Siena. I would like to thank Pamela Benson and Richard Andrews for this information.

**Twelfth Night Literary Criticism (Vol. 34): Further Reading**

Argues that, during the course of the play, *Twelfth Night* transforms the audience's perception of the performance, portraying "theatre as blood sport, theatre that celebrates its own dark origins."

Explores the syntax and diction in three extracts from *Twelfth Night* and how they contribute to characterization.

Considers *Twelfth Night* to be one of the richest of Shakespeare's comedies in terms of its characterization, moving beyond farce to a consideration of unique and complex identities and motivations.

Contends that the figure of Viola/Cesario defies natural sexual categories by affirming the plasticity of gender.

Asserts that *Twelfth Night* contains disturbing elements that prefigure the bleak worlds of such plays as *Hamlet* and *Troilus and Cressida*, because in *Twelfth Night* "Shakespeare was beginning to outgrow the pure mirth of the comic vision."

Interprets Malvolio's imprisonment according to the religious teachings of Martin Luther.

Reviews Samuel Johnson's interpretation of Viola.

Explores the plot elements and characterizations (especially of Malvolio and Lear) shared by Twelfth Night and King Lear, and what distinguishes them as comedy and tragedy, respectively.

Argues that the source of the comedy in Twelfth Night is "self-deception as it manifests itself in love."  

Considers Malvolio to be essential to the "merriment" of Twelfth Night, especially in his expression of repressed sexual desires.

Provides an overview of Twelfth Night, comparing it to the comedies that preceded it.

**Twelfth Night Literary Criticism (Vol. 46): Introduction**

**Twelfth Night**  

For nearly two hundred years, commentators have generally agreed that Twelfth Night represents the culmination of Elizabethan romantic comedy. By reshaping circumstances, dramatic conventions, and character types he had employed in earlier comedies, Shakespeare created a paragon of this genre—and then turned to other dramatic forms. Many twentieth-century scholars have noted that the play contains elements of the problem comedies and the romances that followed Twelfth Night. Over the past three decades, feminist, new historicist, Marxist, and materialist critics have emphasized these elements, raising questions about the play's depiction of love and gender relations, the treatment of Malvolio, and Feste's role in the punishment of Olivia's steward as well as in the work as a whole.

Over the past twenty years, many critics have looked closely at Shakespeare's portrayal of the principal characters in Twelfth Night. Offering what he has described as an "anti-romantic" interpretation of the play, Richard A. Levin (1979) has assessed Viola as a cunning young woman who intentionally charms and misleads Olivia as part of her overall strategy. In Levin's estimation, Viola is determined from the outset to marry Orsino, and her deceptions reflect the prevailing values of the play. René Girard (1990) has focused on Olivia and Orsino, viewing both of them as obsessed by self-love and desperately in need of a sense of superiority in their relations with the opposite sex. This kind of narcissism, he has argued, places a priority on desire rather than pleasure. Also evaluating the meaning of sexuality in Twelfth Night, John Astington (1994) has remarked that Malvolio is depicted as unsuited for marriage because of his spiritual impotence. The public mockery of Malvolio's lust for Olivia, the critic has maintained, exposes the steward's inadequate understanding of the true responsibilities of heterosexual love. Feste's role in the gulling of Malvolio has intrigued several recent commentators. Joan Hartwig (1973) has regarded it as mean-spirited, severe, and abusive. Feste's concept of justice, she has contended, is the legal equivalent of revenge, and the absence of forgiveness in the conclusion of the subplot leaves readers and audiences uneasy. Hartwig also has noted, however, that the clown offers other characters, including Malvolio, different perspectives from which to view themselves, and that he is particularly concerned with calling attention to human folly. Robert Wilcher (1982)
has compared Feste with other Shakespearean clowns, particularly the type known as "the domestic fool." Wilcher stresses Feste's vulnerability—his precarious situation in Olivia's household and his shortcomings as a professional jester—and has argued that the fool's verbal agility is inadequate to fill the role assigned to him. Karen Greif (1988) has termed Feste as enigmatic and inscrutable, but also as a character who serves as "a unifying presence." Reviewing twentieth-century theatrical renditions of Twelfth Night's fool, she has demonstrated that since Harley Granville-Barker's innovative staging of the play in 1912, Feste has become the personification of its melancholy undertone: a poignant mediator between the illusions of romantic comedy and the realities of human existence. Greif also has pointed out the connection between modern critical appreciation of the play's darker elements—stage productions that emphasize its bittersweet tonalities, and late twentieth-century philosophical concerns with issues of identity and alienation. In contrast to Wilcher, Bente A. Videbæk (1996) has recently rated Feste's linguistic abilities highly, noting in particular the different verbal manipulations the fool employs with aristocrats on one hand and with menials on the other. From this critic's point of view, Feste's paramount quality is his aloofness from the intrigues of the dramatic action. But Videbæk also has maintained that Feste's role as mediator between the audience and the on-stage characters, his talent for adjusting his clowning to different situations, and his capacity to show up Olivia's and Orsino's sentimental notions of love are vital to our understanding of Twelfth Night.

Aside from analyses of the play's principal characters, late twentieth-century criticism of Shakespeare's last romantic comedy is dominated by consideration of gender issues. Cristina Malcolmson (1991) has explored the relationship between gender and status in Twelfth Night and has argued that although the play questions the traditional social order, in which men are regarded as inherently superior to women, it also betrays a deep anxiety about independent and upwardly mobile females. In Malcolmson's judgment, Shakespeare resolves this tension and preserves harmonious social relations by portraying Viola as gracious, deferential, and motivated by love for Orsino—not by any interest in improving her rank in society. Douglas E. Green (1991) has also evaluated questions of love and gender in Twelfth Night, and, like Malcolmson, discerns there a repressed fear of strong-willed women. He further has claimed that while on the surface the play suggests that men and women are equally capable of being faithful or erratic in their love, the subtext endorses the value of homosexual rather than heterosexual love. Irene G. Dash (1997) has similarly examined the question of independent, headstrong women in Twelfth Night. In contrast to Malcolmson and Green, however, Dash has asserted that Shakespeare treats the subject with "humor and insight." From her perspective, though Olivia and Viola initially challenge traditional notions of female dependency, eventually their erotic desires lead them to yield their independence and then gracefully conform to the social and sexual norms of a patriarchal world. Clearly there is no general consensus among contemporary critics regarding Shakespeare's depiction in Twelfth Night of human love and gender relations, and it appears likely that these topics will continue to draw the attention of scholars and commentators well into the next century.

Twelfth Night Literary Criticism (Vol. 46): Overviews

Elizabeth Story Donno (essay date 1985)

[In the excerpt below, Donno traces the progress of the play's dramatic action and discusses the principal characters. Although she acknowledges some discrepancies and inconsistencies in the story, she applauds Shakespeare's treatment of the complicated plot.]

After the theatres reopened in 1660, Pepys saw Twelfth Night on three occasions—in 1661, 1663 and 1668. Despite such familiarity, he seems to have missed the evocative and allusive quality of Shakespeare's alternative title, noting in his diary after the 1663 performance that this 'silly' play did not relate 'at all' to the
name or to the day. Even for Shakespeare's contemporary audience its most memorable element was the character of the proud, self-loving steward Malvolio—witness a performance presented at court by Shakespeare's company in 1623 (again on Candlemas Day) under the title Malvolio. Leonard Digges, who had contributed commendatory verses to the First Folio, observed in a later and longer tribute:

loè in a trice
The Cockpit Galleries, Boxes, all are full
To hear Malvoglio that cross-garter'd gull.

(Shakespeare's Poems, 1640)

Some time in 1632 (or later) King Charles inscribed 'Malvolio' against the printed title in his copy of the Second Folio. One may conclude that, so far as contemporary (and later) stage popularity was concerned, the whirligig of time did bring in the revenge on the 'whole pack' of the other characters that the discomfited steward promises as he exits in the final act.

But it is Sir Toby Belch, the Countess Olivia's perennially tipsy kinsman, who has the most lines to speak and who, despite his earlier 'fruitless pranks', contrives the means both to complicate the plot and to resolve it. From the outset the convivial Sir Toby is hard put to understand the countess's vow to abjure both the sight and the company of men in order to mourn her brother's death for seven long summers. This desire to cloister herself for so extended a period reveals, as John Russell Brown observes, that Olivia must be very young indeed; so, too, if one judges from their emotional predispositions and actions, all the characters must be, except perhaps for Feste—the Lady Olivia's father having taken much delight in him—and, possibly, the sprightly Sir Toby, though modern productions do not always take such evidence into account.

Shakespeare, in fact, is fairly specific in indicating the ages of the two pairs of lovers. The twins were thirteen when their father died (5.1.228-9, 232); the disguised Viola is described by Malvolio as 'not yet old enough for a man, nor young enough for a boy' (1.5.130) and an 'apple cleft in two' is not more like than the pair of them (5.1.207-8). Though obviously beardless, Sebastian is a skilful swordsman (even if Viola is not). Orsino is described as of 'fresh and stainless youth' though he has a beard (1.5.214, 3.1.38-9); since he believes that a husband should be older than his wife (2.4.27-8), he may be assumed to be a little older than both Olivia and Viola. Whether or not he is as young as the four lovers, Sir Toby, like Touchstone in As You Like It (5.4.55-6), pressing in among the 'country copulatives', anticipates the dénouement by taking the 'little villain' Maria as his wife, an action presaged in the jesting remarks of Feste at 1.5.22-4 and of Sir Toby himself at 2.5.150, and performed, it would seem, as early as 4.2, as line 57 suggests. Convinced, on any count, that 'care's an enemy to life', he has brought in a suitor for Olivia, even if it is the fatuous Sir Andrew Aguecheek. As incorrigible a 'gull-catcher' as Maria, Sir Toby also uses him as his own 'dear manikin' from whom he can extract a steady supply of money.

Sentiment, which motivates Olivia's desire to become a weeping recluse (though Feste soon prompts her to laugh again, and she is without a veil when Cesario arrives at her gate), is also characteristic of the moody Orsino, the duke or perhaps simply a count of Illyria—Shakespeare seems to have wavered in his conception. Having loved the image of Olivia for a month before the play opens, he continues to protest his love for three more months even before he has a chance to speak to her directly. Like Romeo infatuated with fair Rosaline, he is obsessed with the idea of being in love. His inconstancy of mood is emphasised in the first seven lines of the play when, calling for an excess of music in order that his appetite for it may sicken, he at once demands that the musicians repeat one particular strain because of its 'dying fall', but before he has spoken three more lines his appetite has already sickenèd, and he orders them to desist altogether. At the end of this opening speech he foreshadows the hasty replacement of the initial object of his affection that will occur in Act 5 by acknowledging here the capricious quality of love: whatever is held of greatest worth may 'fall into abatement and low price'. Yet as a result of the homage and solicitude of his young page, who bravely masks her own
emotions in order to woo Olivia on his behalf, he comes by the end of the last act to recognise the value of the devotion she has tendered to him.

With Olivia and her o'erhasty marriage to Sebastian, the case is different. Shakespeare explains it with a metaphorical reference to bowling; in her case, 'nature in her bias drew in that'. Although it may be Olivia's own tendency to sentiment that prompts her to become so quickly enamoured of the disguised Cesario, her counter-wooing has the function of predisposing her to love Sebastian in accord with nature's bias. The rationale behind this quite absurd situation is, Porter Williams notes, much like that of the lover in Donne's 'The Good-morrow':

If ever any beauty I did see,
Which I desired and got, 'twas but a dream of thee.

Still, Olivia remains sufficiently cool-headed to take the wondering but infinitely pliable Sebastian-supposed-Cesario to a nearby chantry to plight their troth before a holy man.

Contrasting with the sentimental Orsino and Olivia is Viola, the charming but quite practical flotsam of the sea who quickly sets about improving her situation. Informed that she cannot serve Olivia, she at once determines to disguise herself as a page and serve the noble Orsino, known to her father and, fortuitously it seems, still a bachelor. Within three days she has endeared herself to him, so much so that he has unclasped to her the book even of his 'secret soul'. In the exchanges with Olivia and the 'lighter members' of her household, she conducts herself with great verbal skill, exhibiting a remarkable range of emotional responses, at times saucy, florid or outspoken, but in some situations she remains quite surprisingly taciturn. Though Antonio, having rescued her from the farcical duel with Sir Andrew, addresses her as Sebastian, she says nothing to interfere with his arrest as a pirate or to question him about the fate of her brother. She simply allows herself to hope that he is indeed alive. Her actions throughout can be said to be predicated on her view that time will untangle all things (2.2.37-8), this in accord with the commonplace doctrine (topos) that truth is the daughter of time (veritas filia temporis). Even in the final scene, when Orsino asks to take her hand and to see her in her woman's weeds, she says nothing more than that the captain who has them has been imprisoned at Malvolio's suit. When some forty lines later he again gives her his hand and declares that from this time on she is to be her 'master's mistress', she utters not a word. Nor does she say anything more for the remainder of the action. Yet underlying her variable responses and her taciturnity is an emotional constancy, well evoked in the lines beginning 'My father had a daughter loved a man' and culminating in the moving self-portrait of the figure of Patience smiling at grief (2.4.110-11).

The clown Feste, mediating between the courtly milieu and Sir Toby's, is an irresistible figure. This results in large part from the fact that, actively engaged in both worlds, he distances himself from each by means of his witty and facetious comments. It is now accepted that Shakespeare's projection of the role of professional wit who wears the dress of the fool but does not wear motley in the brain, was the result of Robert Armin's entry into the Chamberlain's Company (probably in 1599). Early apprenticed to a goldsmith, Armin was also for some years a writer of ephemeral pamphlets and entertainments; these include an account of six 'natural' fools and a play exploiting the art of impersonation, in which he was adept. Two of the pamphlets he signed 'Clununcio del Curtanio Snuffe' and 'Clununcio del Mondo Snuffe', that is, Snuff, Clown of the Curtain Theatre and Snuff, Clown of the Globe. He was included in the list of actors in Jonson's The Alchemist in 1610, so at that date he was still a member of the King's Men, the title given to the Lord Chamberlain's Company on the accession of James I. He died five years later. The following lines, addressed to 'Honest, gamesom Robin Armine', attest to his skill and echo Viola's comment on Feste: 'This fellow is wise enough to play the fool' (3.1.50):
So play thy part, be honest still with mirth,
Then, when th'art in the tiring-house of earth;
Thou being his servant whom all kings do serve,
Mayest for thy part well-played like praise deserve:
For in that tiring-house when either be,
Y'are one man's men and equal in degree;
So thou in sport the happiest men dost school
To do as thou dost—wisely play the fool.

(John Davies, *Scourge of Folly* (1611))

Four years Shakespeare's junior, Armin would have been thirty or so when *Twelfth Night* was written, and the slightly wry speeches Feste is given seem intended to reflect a maturity of outlook that holds no illusions about the durable nature either of emotional situations or of practical circumstances. Hence his incorrigible begging and hence his stress both in words and in song on the transitory: youth is a stuff—a material thing—that will not endure; beauty is but a flower; present love is justified by present laughter since 'what's to come is still [i.e. always] unsure'. His wit is both corrective and apt. He uses his good fooling to remedy Olivia's displeasure at his truancy from her household and to persuade her of the folly of mourning a brother's soul which, after all, she *knows* is in heaven, and he pointedly remarks that Orsino's tailor should make him a doublet of changeable taffeta to accord with his changeable mind.

All in all, Feste seems to present through his nonsense a no-nonsense point of view. Accosting Cesario—though, ironically, it is in fact Sebastian—he speaks to him in his own highly ironic fashion:

No, I do not know you, nor I am not sent to you by my lady to bid you come speak with her; nor your name is not Master Cesario; nor this is not my nose neither. Nothing that is so is so.

(4.1.4-7)

In the next scene, as he impersonates Sir Topas the curate come to visit Malvolio the lunatic, he observes of his disguise:

'That that is, is', so I, being Master Parson, am Master Parson; for what is 'that' but 'that' and 'is' but 'is'?

Yet Cesario has declared to Olivia, in all truth, 'I am not what I am'; Sir Toby has said to Sir Andrew, with some truth, that 'not to be abed after midnight is to be up betimes'; even the dénouement of the play seems to go contrary to Feste's claim. When the twins are seen together, they seem so like that it is as if there were but one face, one voice and one manner of dress—that is, the *same* face, voice and dress but still two flesh-and-blood persons. To the others, struck with wonder at the sight, the identical appearance of the twins is declared to be, in the words of Orsino, 'A natural perspective, that is and is not!' Yet in so far as theatrical illusion has been achieved, the dénouement gives substance to Feste's claim, 'That that is, is', at least in Illyria.

The dissembling of one's true nature (conscious with Viola and Feste, unconscious with Orsino and Olivia) is highlighted in the figure of the steward Malvolio. The chief officer in Olivia's household—and one that she would not have miscarried for half of her dowry—he takes to his duties with seriousness and some pomposity. That these responsibilities would have included the preserving of discipline is shown by the rules for his household which a young nobleman, Anthony Browne, the second Viscount Montague, set down in 1595, at the age of twenty-one. The steward should 'in civil sort' reprehend and correct 'negligent and disordered persons', reforming them by his 'grave admonitions and vigilant eye', among these the 'riotous, the contentious, and quarrelous persons of any degree' as well as 'the frequenters of tabling, carding, and dicing in
corners and at untimely hours and seasons'.

But when Malvolio breaks in on the carousing Sir Toby, Sir Andrew and Feste, called to do so, it seems, by the countess herself as Maria has forewarned, he cannot be said to chide them 'in civil sort'. Rather he accuses the two knights of gabbling like tinkers, squeaking out—this of the mellifluous-voiced Feste—cobbler's catches as if they were in an ale-house. Such a rebuke by a social inferior is enough to set off Sir Toby and he rounds on him, 'Art any more than a steward?'; he then follows this up with one of the most quoted lines in the play, incorporating in it what Hazlitt termed an 'unanswerable answer':

Does thou think because thou art virtuous there shall be no more cakes and ale?

Maria is also angered by his charge that she is at fault in providing the means for this 'uncivil rule', and she sums up for the others Malvolio's unpleasant qualities: he is a 'kind' of a puritan, that is, censorious, but one who is inconstantly so. He is, moreover, a time-server, an affected ass who imitates the behaviour of his betters, and is 'so crammed', she says, 'with his own excellencies' that he conceives of himself as worthy of the love of all. On these grounds she contrives the device of forging a love letter from the countess enjoining him to assume ridiculous behaviour and garb in order to secure her favour, a device which feeds his aspiration to become 'Count Malvolio'. Although Feste is not in the group which observes Malvolio's absurd response to the letter, he justifies his share in the 'interlude' on the grounds of Malvolio's having disparaged his ability as a jester, while Fabian justifies his on the grounds that Malvolio has brought him out of favour with his lady about a bear-baiting. The last of his officious actions, noted this time by Viola, is to have the kindly captain who has rescued her imprisoned on some unspecified charge. There is then in Malvolio's 'stubborn and uncourtly parts' sufficient motivation to justify Maria's trick. Intended 'to pluck on laughter', it begins to get out of hand with the confining of Malvolio in a dark room as a madman; at one moment, even Sir Toby wishes they were well rid of their knavery.

Yet Malvolio's lubricious self-projection, cunningly revealed in a day-dream-like soliloquy, is splendidly comic. He imagines himself as three months married to Olivia, now wearing a velvet gown and sitting in a chair of state, having just come from a day-bed where he has left her sleeping; he imagines how he will have 'seven' of his servants summon Sir Toby to his presence and how, after quenching his 'familiar smile' and saying, 'Cousin Toby, my fortunes having cast me on your niece', he will direct him to amend his ways. This fantasy on Malvolio's part is put into perspective when he appears before Olivia wearing yellow stockings and cross-garters, his face crimped into myriad lines by his incessant smiling. Even more startling to her than his dress is the 'ridiculous boldness' of his talk. Tipped off as she is by Maria's charge that he is 'for sure' tainted in his wits, she accepts his strange words as evidence that something is wrong and solicitously asks, 'Wilt thou go to bed, Malvolio?' Taking this in seriousness, since it accords with his secret desires, he responds, 'To bed? Ay, sweetheart, and I'll come to thee.' The audacity of his response is further highlighted by Shakespeare's establishing the time-scheme by means of adroit references. At the end of the preceding scene (2.5), when Maria alerts the conspirators to hide in (or behind) a box-tree to spy on Malvolio, it is probably early morning since she comments that he has been 'yonder i'the sun practising behaviour to his own shadow this half hour'. In the exchange between Viola and the fool that opens this scene, Feste comments that foolery like the sun shines everywhere, which suggests that it is now midday. Thus Malvolio's avidity to go to bed at noon (as the Fool in Lear puts it) strikes an even more lubricious note. From Shakespeare's time until the mid eighteenth century, the 'sportful malice' prompting the treatment of Malvolio seemed a just matter of comedy, but for Romantic and Victorian interpreters, as well as for some in the twentieth century, the ill-used steward came to seem a victim not of sport but of social discrimination.

If Shakespeare's characterisation of Malvolio has stimulated a mixed reaction, so, too, has the structure of the play, some critics finding in it signs of hasty composition, though not so many as to distract a viewing audience. One discrepancy is the rank of Orsino, who is consistently called 'duke' in stage directions and
speech headings and during two scenes of the first act but is otherwise called 'count'. In his careful analysis of the text, Robert K. Turner suggests that Shakespeare's conception of the character of Orsino changed during composition and that he decided to make him less of a figure of authority (such as Duke Theseus in *A Midsummer Night's Dream*) and more of a lover (like Count Claudio in *Much Ado about Nothing*).\(^{12}\)

There are other inconsistencies and loose ends. On Viola's first entrance, when she resolves to serve Orsino, she gives as a qualification her ability to sing and to speak to him in many sorts of music, but when a song is required in the second act, it is Feste who performs. This has led some, including Dover Wilson, to postulate revision, a more radical explanation than is required in view of the favours Orsino has extended to Cesario, which have elevated him above the status of a mere performer: within three days' time (1.4.1-3) he is no longer a stranger to Orsino who has, within that short span, divulged to him his inmost sentiments (1.4.12-13).

Again one notes that it is Fabian who makes a 'third' in the espial of Malvolio's antics, rather than Feste as Maria had specified; yet at the end of Act 5, Feste is able to quote from the letter as if he, too, had been one of the eavesdroppers on Malvolio. In fact, what Maria first declares she intends for him—'some obscure epistles of love, wherein by the colour of his beard, the shape of his leg, the manner of his gait, the expression of his eye, forehead, and complexion, he shall find himself most feelingly personated' (2.3.131-4)—does not concur with the letter that Malvolio reads aloud two scenes later—except, that is, for its amatory suggestiveness. One small inconsistency is in the two accounts of Antonio's sea fight with Orsino's galleys: for his part, Antonio denies (3.3.30) that it was of a 'bloody nature' whereas Orsino (5.1.45) speaks of the 'scathful grapple' directed against the finest of their ships, though the speech is also intended to acknowledge Antonio's valour even as a pirate. Finally, the appearance of Sir Andrew and Sir Toby with bleeding heads must be the result of a second encounter with Sebastian-supposed-Cesario (see Commentary and stage direction at 5.1.160), but this is not provided for in the text.

In spite of these inconsistencies and loose ends, there is much subtlety in Shakespeare's handling of his complex plot which is particularly evident when an attitude or an action or situation relating to one character is duplicated by another. This creates a 'twinning' effect that reinforces the central situation brought about by a pair of identical twins.\(^{13}\) It is as if—to adapt Ulysses' words in *Troilus and Cressida*—many touches of nature make the whole world kin.

Despite the difference in the situation of the two heroines there is a similarity: both have lost their fathers and both, it would appear, have recently lost their brothers, but whereas Olivia would extravagantly mourn (even as Orsino would extravagantly love), Viola, trusting to her own escape as a promise of Sebastian's, reacts practically. Yet in the matter of falling in love the two heroines act alike, in that Viola freely extends her affection to Orsino without invitation on his part, even as Olivia extends hers to Cesario without any invitation except that suggested by her role as surrogate wooer. This makes for a slight touch of irony at the end of the first wooing scene, for when Cesario says 'Love make his heart of flint that you shall love', Viola does not know that she herself will turn out to be the inadvertent object of Olivia's love. The wish is also ironically cancelled with Sebastian's arrival in Illyria and the stunning alacrity with which he assents to a betrothal.

The two heroines are alike in their personal orientation. Viola's conviction that time will 'untangle' all things (*veritas filia temporis*; or, as the English proverb has it, 'time brings the truth to light' (Tilley T324)) is comparable to Olivia's (and Malvolio's) belief in 'fate' which is commented on below. The two are also alike in possessing the virtue of constancy, Viola in her devotion to Orsino, Olivia in her refusal to accept his suit. To Orsino's query in Act 5, 'Still so cruel?', she responds, 'Still so constant'. The emotional impact the twins make is, quite expectedly, alike; Olivia terms it an 'enchantment', Antonio a 'witchcraft'; the harsh denunciation he levels at Cesario-supposed-Sebastian for his seeming ingratitude is paralleled by that which Orsino levels at Cesario for the seeming betrayal of his trust.
Perhaps the most ingenious duplication is that between Olivia and Malvolio. She herself acknowledges their similarity of deportment: he is 'sad and civil', a kind of behaviour that she feels suits well with her own fortunes in love. When Maria informs her that he is surely tainted in his wits since he does nothing but smile, she confesses:

I am as mad as he
If sad and merry madness equal be.

And later she alludes to her own 'extracting frenzy', which has made her forget about his. Moreover, such sad and merry madness typifies the deportment of the other characters, whether it be the moody Orsino or the mad-brained Sir Toby; this is finely pinpointed in 4.1 when, out of the blue, Sir Andrew attacks Sebastian, who wonders incredulously: Are all the people mad? Again, in 4.3, Sebastian 'wrangles' with his reason, speculating in soliloquy whether it is he himself or Olivia who is mad. From the confines of the dark room Malvolio's words thus have special point when he asserts to Feste: 'I tell thee, I am as well in my wits as any man in Illyria.'

Malvolio also emphasises the similarity of his deportment to Olivia's when he writes assuring her that he has the benefit of his senses as well as she. But his assurance is Gomically belated; by the time Olivia hears the letter, read madly at first by Feste impersonating the 'mad' Malvolio and then straightforwardly by Fabian, she (like Orsino) has met with a happy corrective, first to her predisposition to grief and then to her infatuation with Cesario. In view of the psychological misrule prevailing in Illyria, it is not surprising that the word 'mad', together with its cognates (madness, madmen, madly), is used more frequently in this play than in any other in the canon, with The Comedy of Errors, and its double set of twins, a close rival.

Another point of likeness between Olivia and Malvolio is their willingness to justify their own desires by readily ascribing them to a power outside themselves called either 'fate' or 'fortune'. In the soliloquies following on Cesario's first visit, Olivia ponders how quickly she has caught the plague, questions her actions, and concludes:

Fate, show thy force; ourselves we do not owe.
What is decreed must be; and be this so.

(1.5.265-6)

In writing to Malvolio, Maria simulates not only Olivia's hand but also this point of view when she specifies, 'Thy fates open their hands.' To Malvolio, willingly deluded by the letter's confirmation of his own desires, 'it is Jove's doing, and Jove make me thankful', a point he reiterates with supreme confidence after Olivia believes him to be mad:

What can be said? Nothing that can be can come between me and the full prospect of my hopes. Well, Jove, not I, is the doer of this, and he is to be thanked!!

(3.4.71-3)

Even before Maria drops the letter, Malvolio prefaces his rationalising hope that Olivia might indeed love him, by saying 'Tis but fortune; all is fortune.' When Olivia pleads with Cesario-supposed-Sebastian to admit their betrothal, she echoes this point of view, urging him 'Fear not, Cesario, take thy fortunes up.'

This is, of course, what all the central characters do. If somewhat bewildered by the fortuitous opportunity to marry Olivia after the earlier 'malignancy' of his fate, Sebastian at once accepts 'this accident and flood of fortune', an acceptance that twins with Viola's attitude when, resolved to serve Orsino, she awaits whatever
may be the outcome: 'What else may hap, to time I will commit.' The untangling of circumstances by the passage of time and the reliance on fortune and fate create, for characters 'of fresh and stainless youth', the sense of wonder that is proper to the ending of romantic comedy. For the lovers, the result, as it was earlier for Maria and Sir Toby, is to be marriage when 'golden time convents'. For Antonio and Sir Andrew, what's to come is still unsure. For Malvolio, the whirligig of time having also brought in its revenges, there is the hint that he may be entreated to a peace. For Feste, there is still the pleasure he takes in singing.

And, fittingly, in place of an epilogue, he is given a final song. This, while promising that the actors for their part will strive each day to please their audience, also provides a somewhat cryptic ending to the dramatic action. Commentators have ranged widely in their response to it. Eighteenth-century editors, followed by Dover Wilson and others in this century, reacted strongly to its seeming lack of relevance to the play or to the character of Feste; more recent commentators extract a bawdy and sexual import, while still others find a strain of melancholy that harkens back to the potential within the play for violence and unhappiness—the arrest of Antonio, the (short-lived) anger of Orsino towards Olivia and Viola, perhaps even Sir Toby's harsh dismissal of the 'thin-faced knave' Sir Andrew. But since this potential is never actualised, Feste's song is perhaps more properly viewed as a means of breaking away from the Illyrian world of illusions with a return to the real world where it may—or it may not—rain every day. The song's cryptic nature, with its catch-phrase 'that's all one', may be particularly appropriate for the ending of a play with the subtitle 'What You Will'.

Notes

2 See p. 16 below and n. 4, and Textual Analysis, p. 153.

3 As in other of Shakespeare's plays, there is a double-time scheme: the action requires three months for its fulfilment, but two consecutive days serve for the sequence of scenes. See Brown, 'Directions for Twelfth Night', where he correlates the references to time with the action.

4 See Commentary (1.1.4) for Joseph H. Summers's suggestion of some comic stage business here.

6 Viola's taciturnity in the later part of Act 5 can, of course, be accounted for by the exigencies of the plot. Like his heroine earlier on, Shakespeare has a great many knots to untie. Having given her this moving speech when it applied so aptly to her emotional situation, he can assume (with the audience) that with its happy resolution, words are unnecessary.

J. A. Bryant, Jr. (essay date 1986)

[In the following essay, Bryant asserts that Twelfth Night is an iconoclastic work that challenges the reassuring conventions of romantic comedy.]

Ever since the time of the Romantics, high praise for Twelfth Night has been one of the commonplaces of Shakespeare criticism. In our own time Leo Salingar has called it the "crowning achievement in one branch of his art"; and J. Dover Wilson, implicitly replying to Samuel Johnson, who complained that the latter half of the play "exhibits no just picture of life," has gone even farther: "That gem of his comic art, that condensation of life and (for those who know how to taste it rightly) elixir of life," were Wilson's superlatives; then he added, "He could never better this—and he never attempted to. He broke the mold—and passed on." Other commentators have been more specific. Kenneth Muir, by way of introducing his comments on Twelfth Night, cites Barrett Wendell's characterization of the play as a masterpiece of recapitulation and goes on to note that it combines, among other things, the device of mistaken identity that has proved so successful in The Comedy of Errors (making the look-alike pair brother and sister, however, as in numerous Italian comedies); the use of the disguised heroine as emissary, "from the man she loves to the woman he loves," from The Two Gentlemen of Verona; the theme of friendship from The Merchant of Venice; the singing fool (a combination of Amiens and Touchstone); a Falstaffian character in Sir Toby; and a half-witted suitor from The Merry Wives of Windsor. T. W. Baldwin has demonstrated that all this variety fits harmoniously into a frame that may well have been derived from Terence's Andria; and both Salingar and C. L. Barber have attributed at least part of its unity of tone to a pervasive spirit of saturnalia, Barber adding that the play goes well beyond this in its "exhibition of the use and abuse of social liberty." More recently Carolyn G. Heilbrun has touched briefly but persuasively upon the play as a celebration of androgyny; and Walter N. King, in his introduction to a collection of essays on the play, has provided an able discussion of the subtly changing perspectives that threaten to bring most of its characters to complete bewilderment and frustration but, in the manner of similar perspectives in a metaphysical poem, ultimately find resolution.

What many of these critics have been praising in Twelfth Night is the convention of romantic comedy—or rather the romantic version of Italianate comedy—which for Shakespeare's generation served, as it has for most generations since, to reassure audiences about civilized society's ability to renew itself. Joseph Summers,
himself an admirer of *Twelfth Night*, finds the resolution of the play and hence its presumably implicit reassurances less than convincing. *Twelfth Night* is the climax of Shakespeare's early achievement, he writes, but at the same time it comes close to proclaiming the limitations of that achievement: "More obvious miracles are needed," he concludes, "for comedy to exist in a world in which evil also exists, not merely incipiently but with power."\(^9\) Summers's reservation here also has to do with the convention of romantic comedy, which he understandably considers inadequate to represent real life. The details of his diagnosis are questionable, but not the insight that has prompted it: in Shakespearean comedy neither the dramatic convention nor the plot—nor even the special occasion if there is one—is ever more than incidentally determinative. Such things point not to the play but to the expectations that we in our habitual inattention to the complex way in which the world really works bring to the play and to other fictions, and in many cases to life itself.

The patterns of comedy that Shakespeare inherited, like patterns in other traditional forms of art, symbolized communal responses that his world still considered natural and valid—in particular, those responses involving the preservation of stability and order in a society which like its constituents was necessarily forever perishing. For the most part, we today are comfortable with those same responses and expect comic art to confirm their adequacy; thus Shakespeare's comedies still give most of us at least part of what we have always expected from comedy generally. Art, however, is not always the compliant handmaiden of society. It is her nature, especially when endowed with the vitality of someone like Shakespeare, to deny as well as to confirm, to generate new responses to perennially recurring situations, and sometimes in the process to break as many icons as it preserves. As we have seen, even in such early and relatively conventional plays as *The Comedy of Errors* and *The Two Gentlemen of Verona* Shakespeare gave indications of the iconoclastic character that comic dramatic art was to assume under his hand. In *Love's Labor's Lost* and *The Merchant of Venice* he raised questions about human suffering, cruelty, and mortality that writers in fulfilling comedy's responsibility to entertain had traditionally elected to ignore. In *Much Ado about Nothing*, he challenged the propriety of comedy's traditional ending. In *As You Like It* he dared to suggest that the mold itself of comedy might ultimately be irrelevant. In short, hints about the limitations of conventional comedy had been lurking at the fringes of Shakespeare's vision all along, and the situation in *Twelfth Night* was calculated to make audiences uneasy almost from the outset.

To begin with, as Summers notes, there are no parents or their equivalent in *Twelfth Night*, and the young people are therefore free to make their own way. "According to the strictly romantic formula," Summers writes, "the happy ending should be already achieved at the beginning of the play."\(^10\) Just the reverse is true, of course; and the reasons for that, though conspicuous, have apparently not been obvious to the play's admirers. First, Shakespeare at the beginning has provided no visible means of balancing the equation of lover and beloved that he has set before us. Olivia occupies the role of marriageable female in *Twelfth Night*, but she has no suitor that is both acceptable and available to her—no Fenton, no Orlando, no Ferdinand—until the beginning of Act IV, when Sebastian, who she thinks is the Cesario she knows, glides ready and able into her view. She could have Duke Orsino, but she will not. She would have Viola-Cesario, but cannot—for reasons that Viola, Antonio the sea captain, and we alone know. Thus for three acts the Duke pursues Olivia, Olivia pursues Viola, and Viola yearns for the Duke—a merry-go-round chase, a three-way stalemate, that has no prospect of resolution in matches until a fourth person arrives to turn Olivia out of the circle and make it possible for the other two to confront one another as pursuer and pursued.

Second, the absence of parents is not an unmixed blessing for any of the lovers in *Twelfth Night*, but it is an especially unfortunate circumstance for Olivia. In the normal course of a comic action, those filling the role of *senex* have subtle positive functions to perform as well as the more spectacular negative ones; and Olivia's parents and elder brother, all dead as the play begins, would have been expected at least to foster the idea of a good marriage for the girl and more than likely in the end to have come round to her way of thinking about an appropriate candidate. By convention they would have been faulty in their initial judgments about her best interests, but as sponsors distinguished by good will and protective instincts they would have been entitled to
seats of honor at the prenuptial feast. As it is, Shakespeare's Olivia stands defenseless in a world that with the death of her brother has suddenly turned threatening. Orsino, whom she does not and apparently cannot love, relentlessly presses his suit, undoubtedly in part because he finds the love-game amusing but also in part because by marriage he would annex Olivia's estate. He has rivals in the latter objective. Commoner Malvolio, taking advantage of a social revolution that has recently made it possible for "the Lady of the Strachy" to marry her yeoman of the wardrobe (II.v.39-40), seeks to rise in the world from steward's quarters to his lady's chamber; and Sir Toby Belch, Olivia's sottish uncle and her next of kin, has presumed to stand in loco parentis and promote a suitor of his own. We see no other suitors, but these are quite enough to show the dangerous situation of a landed and wealthy young female in Shakespeare's world, where authority over land and wealth was expected to be vested ultimately in a suitable male. Hence Olivia assumes a mask of grief, not necessarily out of self-love or whimsy (as has been commonly assumed by critics and producers of the play) and perhaps not even out of genuine grief, but out of an urgent need to protect her own interests. Despite her declared intention to mourn for an improbable seven years, the convention of mourning can serve at best as a temporary stay; but that convention is the only protection she has. Into this strained situation Viola enters to become unwittingly a fourth suitor for Olivia's hand—in Olivia's eyes the only suitor, and in the eyes of others, including eventually even Orsino, an impudent interloper to be dealt with contemptuously and with appropriate violence.

One might argue, especially in this last quarter of the twentieth century, that Olivia's need to be rescued by a strong male is to her discredit—that her position is only as parlous as she herself chooses to let it be. So it is; and so can it be considered in the world that Shakespeare creates in his plays, for repeatedly these invite approval for the threatened female who seizes the male role in a male-dominated society and triumphs over the disadvantages that society has imposed on her own sex. The fact remains, however, that Shakespeare lived in and depicted a society in which the woman who does not escape by extraordinary means must settle for being either an ornament or a slave. Moreover, even those who resort to extraordinary means may escape only temporarily—witness Julia, Portia, and Rosalind, all of whom presumably put off their masculine garments and return to live ever after in the subservient role that society has assigned to them. Angry Kate's ironic note, for all we know, was not detected until fairly recently. And Beatrice's concluding remark to Benedick is as follows: "I would not deny you, but by this good day, I yield upon great persuasion, and partly to save your life, for I was told you were in a consumption" (V.iv.94-97). To this, editors since the eighteenth century would have us believe, Benedick replies with a mouth-stopping kiss. Shakespeare, however, apparently gave the quieting to an embarrassed Leonato, who told his irreverent niece, "Peace, I will stop your mouth," and perhaps applied a gesture of a different sort.

In Illyria, consensus about the natural dependency of women seems to be fairly solid. Malvolio is convinced that his mistress is secretly yearning for an appropriate man to take charge, and so when Maria applies the bait to his vanity, he is apt to believe he is that very man. Duke Orsino, denied admittance by the conventions of mourning, continues to make advances through his messengers and tells the last of these, Viola disguised as Cesario, that the problem with Olivia is her woman's inability to comprehend the depth and seriousness of the passion that men may feel:

Alas, their love [i.e., women's] may be called appetite,
No motion of the liver, but the palate,
That suffer surfeit, cloyment, and revolt,
But mine is all as hungry as the sea,
And can digest as much. Make no compare
Between that love a woman can bear me
And that I owe Olivia.

[II.iv.97-103]
Even Sir Andrew Aguecheek assumes that Olivia is ready for appropriate male advances and recoils in something between indignation and disgust when he spies her making what he believes to be overtures to the Duke's messenger: "No, faith, I'll not stay a jot longer. . . . Marry, I saw your niece do more favors to the Count's servingman than ever she bestow'd upon me. I saw't i' th' orchard" (III.ii.1-7). Sir Toby moves quickly to disabuse him, but Toby is clearly of like mind about women. He resents Olivia's declared state of mourning as a feminine frivolity that interferes with his more serious plans. "What a plague means my niece to take the death of her brother thus?" he fumes to Maria (I.iii.1-2); and in the exchange that follows he details Sir Andrew's qualifications as a lover and thereby further reveals his obtuseness where Olivia's predilections are concerned. Fortunately for her, Sir Toby's implementation of his plans is as inefficient as his judgments about women are erroneous. The proposed duel between Sir Andrew and Cesario backfires upon the head, literally, of its perpetrator, though one should recognize here that but for the lucky presence of Sebastian on the scene to take the challenge intended for Cesario, that duel and the action of the play might have ended quite differently. Unseen by all these watchful males, however, is a clever Olivia driven to extraordinary means of her own, who will abandon proprieties and confound definitions by pursuing forthrightly and then marrying on the spot a young man of no station whatever.

In more ways than one Viola is a counterpart to Olivia. She too is parentless; she has also lost a brother, or thinks she has; and she has put on a pretense for essentially the same reason as Olivia—to protect herself against such predators as may be at large in the presumably civilized world of Illyria. The device Viola has chosen, however, has placed her in an awkward situation. No sooner has she put on male attire and enlisted in the Duke's service than she falls in love with her master, who requires her to advance his cause with a lady manifestly amenable to being wooed by someone—though not by the Duke, either directly or indirectly.

This improbable situation is the source for several aspects of the play that have charmed modern audiences—most of these being touches of pathos rather than of comedy. Viola's best speeches are cases in point. For example, she tells Olivia at their first meeting that if she were Duke Orsino she would

Make me a willow cabin at your gate,
And call upon my soul within the house;
Write loyal cantons of contemned love,
And sing them loud even in the dead of night;
Hallow your name to the reverberate hills,
And make the babbling gossip of the air
Cry out "Olivia!"

[I.v.268-74]

Her language here speaks of a more intense experience than brief infatuation would warrant. Some critics have postulated a justification for it in Marsilian-Platonist terms, but one is probably nearer the spirit of the play to see it as something quaintly amusing, the mysterious attraction of a scarcely grown moth for an unresponsive star. Nevertheless, Viola's argument here has the power of a nascent but very real love for the Duke; and the same bittersweet passion of young love informs the account she gives to him of the depth of women's affection as demonstrated by the unspoken adoration of her "father's daughter":

. . . she never told her love
But let concealment like a worm in th' bud
Feed on her damask cheek; she pin'd in thought,
And with a green and yellow melancholy
She sate like Patience on a monument,
Smiling at grief.
Because she is apt to feel such stirrings as no longer trouble the Duke, which indeed the Duke for all his declarations about masculine love can no longer even recall, Viola moves in company with Euphrasia-Bellario of Beaumont and Fletcher's Philaster (1608-10), the determined Helena of All's Well That Ends Well, and the Imogen of Cymbeline. Like these, Viola is genuinely and, to speak literally, hopelessly in love; but the special irony of the situation that develops in Act I is that Olivia is no less genuinely in love and in her misapplied affection exhibits to Viola precisely the kind of intense feeling that Viola chides her for not rendering to the Duke.

If we were not dealing with characters whom Shakespeare has endowed with flesh and blood, we might say that Viola is the love-in-idleness in this second play that Shakespeare wrote about "midsummer madness" (III.iv.56). Before her coming, there was no genuine love in Illyria. Her arrival there set all in motion, activating Olivia's suitors to an intensity that had previously seemed unwarranted and, more important, pushing the hitherto diffident Olivia out from behind her façade of grief to discover possibilities in the world that she had not dreamed of. Her newly found love, though it has some of the aspects of the ultimately divine fixation that Marsilio Ficino, Castiglione, and countless sonneteers have written about, is no more Neoplatonic than Viola's equally sudden love for the Duke. One might better say that the love manifested by these two women has an agapeic quality in that it prompts one of them, denied of her station and even of her sex, to offer services and devotion to a duke who barely notices her as anything more than a servant, and prompts the other, a lady of acknowledged station, to spurn suitors at all appropriate levels—duke, knight, and competent steward—to throw herself shamelessly upon a page boy.

Where Olivia is concerned, however, it is important to note that Shakespeare in presenting her initial awakening to the universal call of the flesh depicts it as an unconscious appreciation of that androgynous ideal which is normally conceived in youth and subsequently suppressed in adulthood, here beautifully portrayed by Viola as woman-man and reinforced subliminally for the Elizabethan audience by the boy-actors who were portraying both female characters on the stage. Regardless of how one tries to explain this love, there is much in it that remains inexplicable; and Shakespeare's portrayal continues to succeed with readers and audiences undoubtedly in part because most people subconsciously want something like it to be true and are delighted when Shakespeare's art can bring their wishes to a semblance of reality. Unfortunately, our latter-day conventions, translated into expectations, encourage us to discredit the genuine and innocent warmth present here and in similar situations in other Shakespearean plays and thus prevent our acknowledgment of emotional tremors which even now we hasten to dismiss as inchoate feelings, childish preludes to adult emotions that are presumably more stable and lasting, and in any case more respectable.

Nevertheless, regardless of how seriously one takes the suggestions of agapeic or androgynous attachments in Twelfth Night, one should never lose sight of the heterosexual grounding that is essential to the comic resolution achieved in the play. All the lovers here ultimately demand for satisfaction the physical possession of a member of the opposite sex. Olivia could not have been happy with Viola indefinitely, for all the beauty of Viola's face and form; and Orsino, attuned to practical considerations, finds it possible to disregard Viola's charms until he recognizes that they are as feminine in fact as they appear to be. Moreover, sexual attraction is all that really matters. Rank apparently has nothing to do with love and loving in Twelfth Night. In spite of the outrage Toby expresses at the thought of a steward's aspiring to take the hand of his niece, he does not hesitate to marry Maria, Olivia's diminutive gentlewoman ("the youngest wren of nine"), whom he mockingly dubs Penthesilea and repeatedly calls "wench." Olivia herself has no compunction about marrying someone she takes to be a serving-man; and even after the unveiling in Act V neither she nor the Duke gains any substantial knowledge about the pedigree of the twins they are linking permanently to their fortunes. One looks in vain here for some hint of what is clearly set forth in Barnaby Riche's Apolonus and Silla: that the two were actually children of another illustrious duke, Pontus of Cyprus, and worthy to mate with nobility anywhere. In short, practical and even spiritual motives for love ultimately give way in Shakespeare's Twelfth Night to
elemental sex, and thus the ancient order of society as understood by commentators—political, ecclesiastical, and otherwise—painfully maintained over the centuries and presumably divinely ordained, is here challenged by the basic animal impulses that are the reason, often unacknowledged, why society is essentially not an institution at all but a process.

This reduction of comedy in *Twelfth Night* to the ground of its being intensifies an ironic dimension in the gulling of Malvolio that is often overlooked in modern readings and productions, which persist in ignoring the complex effects of the play. To begin with, Malvolio is not a mere appendage to the plot; nor is he the insensitive killjoy and social climber that Sir Toby sees or the “time pleaser” Maria would have him be. As one critic has observed, Malvolio’s part is structurally at the center of the plot and his gulling is symbolic of the challenge to order that persists throughout the play. There is truth in both observations. The setting of Shakespeare’s comedies, regardless of designation, is invariably English; and as Shakespeare and his contemporaries knew, the ranks of the English gentry included more than a few families that had achieved their status relatively recently. Lady Olivia’s all but defunct family has the marks of being one of these; at the very least, Sir Toby, the one surviving elider member of the family, still has the class-consciousness of the newly arrived and the tavern manners of a serving-man. Malvolio, by contrast, has the marks of a belated aspirant, quite as class-conscious as Toby but awkwardly so, and as zealously committed as any newly arrived neophyte to the preservation of order, precedence, and propriety. Charles Lamb’s view of him is not currently popular, but it is closer to the truth and infinitely preferable to the farcical Malvolio that simpers and prances on some stages. Consider this passage from Lamb’s essay:

> His quality is at the best unlovely, but neither buffoon nor contemptible. His bearing is lofty, a little above his station, but probably not much above his deserts. . . . We must not confound him with the eternal old, low steward of comedy. He is master of the household to a great Princess, a dignity probably conferred upon him for other respects than age or length of service. . . . His rebuke to the knight, and his sottish revelers, is sensible and spirited; and when we take into consideration the unprotected condition of his mistress, and the strict regard with which her state of real or dissembled mourning would draw the eyes of the world upon her house affairs, Malvolio might feel the honor of the family in some sort in his keeping; as it appears not that Olivia had any more brothers, or kinsmen, to look to it—for Sir Toby had dropped all such nice respects at the buttery hatch.

This is a Malvolio who makes the tactical error of forthrightly confronting one who is technically his superior for indulging in a form of gaiety that has in it no real love of life (Maria calls it “caterwauling”) and certainly no consideration for others, and thus finds himself both rebuked by that superior and caught in a mill devised by a fellow servant (again Maria) who also aspires to a higher station no less than he, though with far less warrant. Malvolio is right to regard all of his tormentors with contempt. Maria’s ingenuity probably makes her the best of the lot. Sir Toby is a bore as well as a boor. Fabian is an insensitive servingman, whom Malvolio has properly rebuked for staging a bear-baiting on the estate (II.v.7-11), Feste is at best (except for the actual gulling scene) a second-rate clown, and Sir Andrew is a fool. Fabian observes at the end that their mischief has been such as “may rather pluck on laughter than revenge; / If that the injuries be justly weigh’d / That have on both sides pass’d”; but Fabian the bear-baiter is hardly one to give a reliable opinion. Malvolio may be deficient in humor, and he is certainly naive; but he has injured no one, and he has every cause to be angry. Moreover, the gulling that destroys him destroys the last conscious defender of the graceful world to which he would aspire.

Mark Van Doren, who also considered Malvolio central to *Twelfth Night*, concluded his essay on the play with the following sentence: "The drama is between his [Malvolio’s] mind and the music of old manners." This is true, but perhaps not quite in the way Van Doren intended. For Van Doren the important thing about the play was its courtly decor, lyrics that could be set to appealing music, carefree roistering belowstairs, expressions of romantic love followed by appropriate matings. Considered solely in the light of these things,
Twelfth Night appears to be a triumph of sophistication and wit and a reaffirmation of the values of conventional Italianate comedy. Actually it is nothing of the sort.

As has already been noted, Twelfth Night presents a world in which the opportunity for undertaking a comic action and pursuing it to the conventional conclusion has collapsed. Control of the social unit that occupies the center of our attention, Lady Olivia's estate, has passed for the moment to that lady's keeping; and because she is young, female, and unprotected, the wolves are circling. Wit characteristic of the old order is still present: for all her pretense of grief, Olivia has a large measure of it, and Viola brings in still more; but in the empty corridors where these two meet, its sparkle has more poignancy than brilliance. Music is still present, at least on the periphery of the main action, but music in Twelfth Night no longer symbolizes the harmony and order that comedy would achieve or restore. Of the two memorable lyrics in the play, the one that celebrates young love in its immediacy, "O mistress mine," is caterwauled by the aging Sir Toby and company. The other is a lament for a dead love that cannot be revived: "Come away, come away, Death." A number of older critics—F. G. Fleay, Richmond Noble, and J. Dover Wilson—suggested that this sophisticated piece of melancholy replaced the "old and antique song" that the text calls for (II.iv.3) when Robert Armin, a clown with a trained voice, performed the singing function originally intended for a singing boy who would play the part of Viola posing as a eunuch (I.ii.62). S. L. Bethell, after summarizing the whole argument, pointed out sensibly that it is sufficient the song be "romantically suggestive of antiquity," as indeed it is.18 Orsino in asking for the song notes that it differs sharply from the "light airs and recollected terms / Of these brisk and giddy-paced times" (II.iv.5-6) and thus makes the point of the play: that the old times are beyond recall; the old order is dead. He speaks with more truth than he knows or would like to believe. No amount of music can bring back the world in which courtship of the kind he would pursue can exist. Maria knows this. Olivia shows by her actions that she knows it too. Viola, but for her infatuation with Orsino and her loyalty to him, would know it sooner than she does. Malvolio, who has been outside the magic circle all his life, does not know it and thus is apt to be tricked by a spurious invitation to join in the (to him) unfamiliar dance. Still inexperienced in spite of his years, he has no way of recognizing that the show of courtly manners he is urged to assume can only be an inadvertent parody and a reaffirmation of his incompetence to participate in a game that people are no longer playing. His incorrigible loneliness is merely accentuated by the folly that a heartless anarchy has thrust upon him.

A production of Twelfth Night at Stratford-upon-Avon some years ago solved the problem of Malvolio by playing him for laughs and reducing him to little more than a stick figure with the diminished humanity of a Keystone Cop from the early cinema. The gulling thus became a harmless trick perpetrated on one who had neither dignity nor the capacity to feel. What was left in that production, however, was hardly the graceful apotheosis of Italianate comedy for which Shakespeare "broke the mold—and passed on." Even Shakespeare's language, which was largely uncut, was insufficient to prevent the general charges by London critics of prosiness and farce; the balance had been disrupted, and the illusion dispelled. The glitter was tinsel.19 One production, of course, proves nothing about a Shakespeare play; but Twelfth Night may best be regarded as an elaborate trompe l'oeil. Superficially it resembles Italianate comedy, but actually it is the apotheosis of a development that Shakespeare had been anticipating ever since he portrayed the French ladies at the court of Navarre. It is already a part of the era in which a Helena and a Mariana would resort to bed tricks to snare reluctant males, an Imogen put off her sex to go after a husband who had rejected her, a Hermione retire for sixteen years, freeze a kingdom, and take her man at the end by a trick, and an innocent and uninstructed Miranda out-woo and out-argue a prince who most likely would have preferred a casual seduction. Dr. Johnson was understandably disturbed by the ending of Twelfth Night, but he was wrong to say that it exhibits no just picture of life. Like most of his contemporaries, he was guided by expectations that are essentially inapplicable to this play except by way of ironic contrast. For him it exhibited no picture of life that he could comfortably accept, but one suspects he saw well enough what was there.

Notes

3 J. Dover Wilson, Shakespeare's Happy Comedies (Evanston, Ill.: Northwestern Univ. Press), p. 181.

10 Ibid., p. 24.

11 Some critics see in Sir Toby's advocacy of Sir Andrew Aguecheek merely a device to bilk the fool of his money; see Van Doren, Shakespeare (Garden City, N.Y.: Anchor-Doubleday, 1953), p. 139. This does not quite account, however, for Sir Toby's eagerness to press for a duel with Cesario-Viola once he has detected a hint of real rivalry in that quarter.

12 According to The Riverside Shakespeare ed. G. Blakemore Evans (Boston: Houghton Mifflin, 1974), p. 364, the attribution of the speech to Benedick and the stage direction about kissing originated with Styan Thirlby and Lewis Theobald, respectively.

17 Van Doren, Shakespeare, p. 143.

This was a summer production of 1966. Sir Andrew Aguecheek was given unusual prominence, with David Warner in the role.

Twelfth Night Literary Criticism (Vol. 46): Feste

Joan Hartwig (essay date 1973)

[In the essay that follows, Hartwig contends that Feste helps illuminate the discrepancy between human will and Providence in Twelfth Night and proposes that Feste's enigmatic final song emphasizes the ambiguities of human experience—which is neither as grim as the clown's pessimistic verses nor as blissful as romantic comedy.]

Shakespeare's plays frequently counterpose the powers of human and of suprahuman will, and the antithesis usually generates a definition of natures, both human and suprahuman. These definitions vary, however, according to the play. For instance, Hamlet's "providence" does not seem the same as the darker, equivocating power that encourages Macbeth to pit his will against a larger order; and these controls differ from Diana and Apollo in the later plays, Pericles and The Winter's Tale. Furthermore, Hamlet's submission and Macbeth's submission to non-human controls (if indeed they do submit their individual wills) cannot be understood as the same action or even to imply the same kind of human vision.

Many of the conflicts of Twelfth Night seem to be concerned with the contest between human will and suprahuman control; yet, the latter manifests itself in various ways and is called different names by the characters themselves. As each contest between the human will and another designer works itself out, the involved characters recognize that their will is fulfilled, but not according to their planning. The individual's will is finally secondary to a design that benevolently, but unpredictably, accords with what he truly desires. For example, when Olivia, at the end of Act I, implores Fate to accord with her will in allowing her love for Cesario to flourish, she has no idea that her will must be circumvented for her own happiness. Yet the substitution of Sebastian for Cesario in her love fulfills her wishes more appropriately than her own design could have done. Inversely, when Duke Orsino says in the opening scene that he expects to replace Olivia's brother in her "debt of love," he doesn't realize that literally he will become her "brother" (Li.34-40). As the closing moments of the play bring Olivia and the Duke together on the stage for the only time, she says to him, "think me as well a sister as a wife" (V.i.307); and the Duke responds in kind: "Madam, I am most apt t' embrace your offer," and a bit later, "Meantime, sweet sister, / We will not part from hence" (V.i.310, 373-74). The Duke had not understood the literal force of his prediction, but his early statement of his hope plants a subtle suggestion for the audience. When the play's action accords with Duke Orsino's "will," the discrepancy between intention and fulfillment is a delightful irony which points again to the fact that "what you will" may be realized, but under conditions which the human will cannot manipulate. Orsino's desire to love and be loved, on the other hand, is fulfilled by his fancy's true queen, Viola, more appropriately than his design for Olivia would have allowed.

The one character whose true desires are not fulfilled in the play is Malvolio. His hope to gain Olivia in marriage results in public humiliation at the hands of Feste, who takes obvious satisfaction in being able to throw Malvolio's former haughty words back at him under their new context of Malvolio's demonstrated foolishness:

Why, 'some are born great, some achieve greatness, and some have greatness thrown upon them.' I was one, sir, in this interlude, one Sir Topas, sir; but that's all one. 'By the Lord, fool,
I am not mad!' But do you remember, 'Madam, why laugh you at such a barren rascal? An you smile not, he's gagged'? And thus the whirligig of time brings in his revenges.

(V.i.360-66)

Feste's assertion that the "whirligig of time" has brought this revenge upon Malvolio neglects the fact that Maria has been the instigator and Feste the enforcer of the plot to harass Malvolio. Time's design, insofar as Malvolio is concerned, depends upon Maria's and Feste's will, which differs significantly from a central point that the main plot makes—that human will is not the controller of events. The characters in the main plot learn from the play's confusing action that human designs are frequently inadequate for securing "what you will," and that a design outside their control brings fulfillment in unexpected ways. Feste's fallacy, of course, makes the results of the subplot seem to be the same as the results of the main plot, but Time's revenges on Malvolio are primarily human revenges, and this particular measure for measure is thoroughly within human control. Feste's justice allows no mitigation for missing the mark in human action; and the incipient cruelty that his precise justice manifests is felt, apparently, by other characters in the play.

When Olivia and her company hear Malvolio's case, she responds with compassion: "Alas, poor fool, how have they baffled thee! . . . He hath been most notoriously abused" (V.i.359, 368). Duke Orsino, upon hearing Malvolio's letter of explanation, comments, "This savors not much of distraction" (V.i.304). And even Sir Toby has become uneasy about the harsh treatment of Malvolio in the imprisonment scene: "I would we were well rid of this knavery. If he may be conveniently delivered, I would he were; for I am now so far in offense with my niece that I cannot pursue with any safety this sport to the upshot" (IV.ii.66-70). Actually, to place the responses into this sequence reverses the play's order; and we should consider the fact that Shakespeare builds toward a compassionate comment, with Olivia's statement climaxing an unwillingness to condone the actions of Feste and Maria in gulling Malvolio—at least in its last phase. Feste's exact form of justice without mercy has always characterized revenge, and even the word "revenge" is stressed by several of the characters in the subplot. When Maria voices her apparently spontaneous plot to gull Malvolio, she says:

The devil a Puritan that he is . . . the best persuaded of himself; so crammed, as he thinks, with excellencies that it is his grounds of faith that all that look on him love him; and on that vice in him will my revenge find notable cause to work.

(II.iii. 134-40)

Maria's successful implementation of her "revenge" elicits Sir Toby's total admiration. At the end of II.v, he exclaims, "I could marry this wench for this device" (168), and when Maria appears soon thereafter, he asks, "Wilt thou set thy foot o' my neck?" (174). The battlefield image of the victor and the victim is mock-heroic, of course; but in the final scene Fabian testifies to its literal fruition: "Maria writ / The letter, at Sir Toby's great importance, / In recompense whereof he hath married her" (V.i.352-54). Sir Toby's submission to Maria's will is a comic parallel for two actions: the pairing off of lovers, and the submission of the individual's will to a design other than his own. Yet the inclusion of a parodic version of marriage-harmony in the subplot does not fully ease the discomfort of the subplot's conclusion. Fabian tries to smooth it away when he suggests that the "sportful malice" of gulling Malvolio "may rather pluck on laughter than revenge" (V.i.355-58). Neither Feste nor Malvolio seems to be convinced, however. Feste's "whirligig of time brings in his revenges," and Malvolio quits the stage with, "I'll be revenged on the whole pack of you!" (V.i.366-67). The forgiveness that should conclude the comic pattern is "notoriously" missing from the subplot and cannot be absorbed successfully by the Duke's line, "Pursue him and entreat him to a peace." Malvolio seems unlikely to return. The major differences between the subplot and the main plot is clearest at this dramatic moment: revenge is a human action that destroys; love, graced by the sanction of a higher providence, creates a "golden time."

607
Feste's "whirligig" seems to be a parody of Fortune's wheel in its inevitable turning, particularly with its suggestions of giddy swiftness and change. It provides a perfect image for the wild but symmetrical comic conclusion of the play's action. Feste's speech which includes it gives the appearance of completion to a mad cycle of events over which no human had much control. Only in Malvolio's case was human control of events evident. In her forged letter, Maria caters to Malvolio's "will" and, by encouraging him to accept his own interpretation of circumstances as his desire dictates, she leads him not only into foolishness, but also into a defense of his sanity. The discrepancy between Malvolio's assumption that fortune is leading him on his way and the fact that Maria is in charge of his fate manifests itself clearly in the juxtaposition of her directions to the revelers (as she leaves the stage) with Malvolio's lines as he enters:

MARIA Get ye all three into the box tree. . . . Observe him, for the love of mockery; for I know this letter will make a contemplative idiot of him. Close, in the name of jesting. [The others hide.] Lie thou there [throws down a letter]; for here comes the trout that must be caught with tickling. Exit.

Enter Malvolio.

MALVOLIO 'Tis but fortune; all is fortune. Maria once told me she [Olivia] did affect me. (II.v.13-22)

The gulling of Malvolio which follows is hilariously funny, partly because Malvolio brings it all on himself. Even before he finds the letter, his assumptions of rank and his plans for putting Sir Toby in his place elicit volatile responses from the box tree. And after he finds the forged letter, Malvolio's self-aggrandizing interpretations of the often cryptic statements evoke howls of glee mixed with the already disdainful laughter. The comedy of this scene is simple in its objective exploitation of Malvolio's self-love, and Malvolio becomes an appropriately comic butt. The audience's hilarity is probably more controlled than Sir Toby's and the box tree audience's excessive laughter; still, we are united in laughing at Malvolio's foolishness. And when Malvolio appears in his yellow stockings and cross-garters, the visual comedy encourages a total release in the fun of the game—Malvolio is gulled and we need not feel the least bit guilty, because he is marvelously unaware of his own foolishness. Oblivious to any reality but his own, Malvolio thinks he is irresistibly appealing with his repugnant dress and his continuous smiles—so contrary to his usual solemnity—and Olivia concludes that he has gone mad. "Why, this is very midsummer madness," she says, and, then, as she is leaving to receive Cesario, she commends Malvolio to Maria's care.

Good Maria, let this fellow be looked to. Where's my cousin Toby? Let some of my people have a special care of him. I would not have him miscarry for the half of my dowry. (III.iv.55-58)

Malvolio misconstrues Olivia's generous concern as amorous passion and he thanks Jove for contriving circumstances so appropriately:

I have limed her; but it is Jove's doing, and Jove make me thankful. . . . Nothing that can be can come between me and the full prospect of my hopes. Well, Jove, not I, is the doer of this, and he is to be thanked. (III.iv.68-77)

Malvolio's scrupulous praise of a higher designer than himself is a parodic echo of Olivia's earlier submission to Fate after she has begun to love Cesario: "What is decreed must be—and be this so!" (I.v.297). The
impulses underlying Malvolio's speech (and to some extent, Olivia's speech as well) exert opposite pulls: Malvolio wants to attribute control of circumstances to Jove at the same time he wants divine identity. He attempts to simulate foreknowledge through predictive assertion: "Nothing that can be can come between me and the full prospect of my hopes." As long as events are in the hands of a non-human control, man cannot destroy or divert the predetermined order. But Malvolio cannot foresee the vindictive wit of Maria (often pronounced "Moriah"), nor can Olivia foresee the necessary substitution of Sebastian for Viola-Cesario. Each must learn that he, like the characters he wishes to control, is subject to an unpredictable will not his own. Precisely at this moment—when the character is forced to see a discrepancy between what he "wills" and what "is"—the possibility that he is mad confronts him.

Feste seems to adopt the disguise of Sir Topas to convince Malvolio that he is mad, and the imprisonment scene evokes a different response than the letter that exploits Malvolio by encouraging him to wear yellow stockings and cross-garters. In the earlier phase of the gulling, Malvolio is a comic butt after the fashion of Sir Andrew Aguecheek, unaware of his foolishness; however, imprisoned, Malvolio is a helpless victim, fully aware that he is being abused. With Olivia, his extraordinary costume and perpetual smiles make him a visible clown, and, as a result, he even seems good-humored. But with Maria and Feste in the imprisonment scene, he is not visible; we only hear him and his protestations of abuse. These different visual presentations produce a notable difference in comic effect because visual comedy often changes a serious tone in the dialogue.

In the imprisonment scene, Sir Topas keeps insisting that things are not as Malvolio perceives them; but Malvolio refuses to admit a discrepancy between what he perceives and reality. Accordingly, Malvolio insists that he is not mad.

_Malvolio within._

MALVOLIO Who calls there?

CLOWN Sir Topas the curate, who comes to visit Malvolio the lunatic. . . .

MALVOLIO Sir Topas, never was man thus wronged. Good Sir Topas, do not think I am mad. They have laid me here in hideous darkness.

CLOWN Fie, thou dishonest Satan. I call thee by the most modest terms, for I am one of those gentle ones that will use the devil himself with courtesy. Say'st thou that house is dark?

MALVOLIO As hell, Sir Topas.

CLOWN Why, it hath bay windows transparent as barricadoes, and the clerestories toward the south north are as lustrous as ebony; and yet complaines thou of obstruction?

MALVOLIO I am not mad, Sir Topas. I say to you this house is dark.

CLOWN Madman, thou errest. I say there is no darkness but ignorance, in which thou art more puzzled than the Egyptians in their fog.

MALVOLIO I say this house is as dark as ignorance, though ignorance were as dark as hell; and I say there was never man thus abused. I am no more mad than you are.

(IV.ii.20-48)
In the darkness of his prison, Malvolio literally is unable to see, and Feste makes the most of the symbolic implications of Malvolio's blindness. The audience perceives with Feste that the house is not dark (that hypothetical Globe audience would have been able to see the literal daylight in the playhouse), yet the audience also knows that Malvolio is being "abused" because he cannot see the light. The audience is therefore led to a double awareness of values in this scene: we are able to absorb the emblematic significance of Malvolio's separation from good-humored sanity and to know at the same time that Malvolio is not mad in the literal way that Feste, Maria, and Sir Toby insist. Although the literal action engenders the emblematic awareness, the literal action does not necessarily support the emblematic meaning. This pull in two opposite directions occurs simultaneously and places the audience in a slightly uncomfortable position. We prefer to move in one direction or in the other. Yet it seems that here Shakespeare asks us to forgo the either-or alternatives and to hold contradictory impressions together. Malvolio cannot be dismissed as a simple comic butt when his trial in the dark has such severe implications.10

The ambiguities of his situation are clear to everyone except Malvolio, but he rigidly maintains his single point of view. Because he refuses to allow more than his own narrowed focus, he is emblematically an appropriate butt for the harsh comic action that blots out his power to see as well as to act. He must ultimately depend upon the fool to bring him "ink, paper, and light" so that he may extricate himself from his prison, a situation which would have seemed to Malvolio earlier in the play "mad" indeed. Feste thus does force Malvolio to act against his will in submitting to the fool, but Malvolio fails to change his attitudes.11 Malvolio remains a literalist—Feste's visual disguise is for the audience so that we can see as well as hear the ambiguities of his performance, a point that Maria brings into focus when she says "Thou mightest have done this without thy beard and gown. He sees thee not" (IV.ii.63-64).

In the very next scene, Sebastian presents a contrast which delineates even more clearly the narrowness of Malvolio's response to an uncontrollable situation. Sebastian, too, confronts the possibility that he is mad: his situation in Illyria is anything but under his control.

This is the air; that is the glorious sun;  
This pearl she gave me, I do feel't and see't;  
And though 'tis wonder that enwraps me thus, 
Yet 'tis not madness. . . .  
For though my soul disputes well with my sense 
That this may be some error, but no madness,  
Yet doth this accident and flood of fortune  
So far exceed all instance, all discourse,  
That I am ready to distrust mine eyes  
And wrangle with my reason that persuades me  
To any other trust but that I am mad,  
Or else the lady's mad. 

(IV.iii.1-16: my italics)

Sebastian's pile of contrasting conjunctions ("though," "yet," "but") underlines his hesitance to form a final judgment, unlike Malvolio, whose point of view never changes despite the onslaught of unmanageable circumstances. The contradictions of his sensory perceptions lead Sebastian to a state of "wonder" in which he is able to suspend reason and delay judgment, and this signifies a flexibility of perception which Malvolio cannot attain. Malvolio is not stirred by the discrepancies of experience to consider that appearances may not be reality; but Sebastian can appreciate the undefinable workings of a power beyond the evident. Sebastian's ability to sense the "wonder" in a world where cause and effect have been severed gives him a stature that Malvolio cannot achieve.12 Yet the difference between them is due to the source of their manipulation as well as to their response. Sebastian is manipulated by Fate or by Fortune; Malvolio, by Maria and Feste. Human
manipulators parody suprahuman control and because they do, Maria and Feste define both levels of action.

Feste, Maria, and Sir Toby are all in a set and predictable world of sporting gullery, and the rules for their games are known. Feste's "whirligig" associates Time with a toy (perhaps even with an instrument of torture) and limits Time to human terms of punishment. On the other hand, the Time that Viola addresses does untie her problematic knot of disguise. Feste's attribution of revenge to this "whirligig of Time" points up the difference between the two controls. The whirligig becomes a parodic substitute for the larger providence that other characters talk about under other titles: Time, Jove, Fate, Fortune, or Chance. Significantly, Malvolio's humiliation is the only humanly designed action that fulfills itself as planned. The subplot performs its parody in many other ways, but in Feste's summary "whirligig" it displays the double vision that Shakespearean parody typically provides. The foibles of the romantics in Illyria are seen in their reduced terms through Sir Toby, Maria, and Sir Andrew, but the limitations of the parodic characters also heighten by contrast the expansive and expanding world of the play. Love, not revenge, is celebrated.

But even Feste's whirligig takes another spin and does not stop at revenge: in the play's final song the playwright extends an embrace to his audience. Feste's song creates an ambiguity of perspective which fuses the actual world with an ideal one: "the rain it raineth every day" is hardly the world described by the play. Romantic Illyria seems to have little to do with such realistic intrusions. Yet, the recognition of continuous rain is in itself an excess—it does not rain every day in the actual world, at least not in the same place. Thus, the pessimistic excess of the song balances the optimistic excesses of the romance world of Illyria; neither excess accurately reflects the actual world. Despite the apparent progress the song describes of a man's growing from infancy to maturity and to old age, it remains something of an enigma. The ambiguities of the first four stanzas build to a contrast of direct statements in the final stanza.

A great while ago the world begun,
With hey, ho, the wind and the rain;
But that's all one, our play is done,
And we'll strive to please you every day.

The first line of this stanza seems to imply that the world has its own, independent design; and it also suggests that man's actions must take their place and find meaning within this larger and older pattern. The specific meaning of that larger design, however, remains concealed within the previous ambiguities of Feste's song. His philosophic pretensions to explain that design are comically vague and he knows it. He tosses them aside to speak directly to the audience: "But that's all one, our play is done." This is the same phrase Feste uses with Malvolio in his summary speech in Act V: "I was one, sir, in this interlude, one Sir Topas, sir; but that's all one." In both cases, Feste avoids an explanation.

Turning to the audience and shattering the dramatic illusion is typical in epilogues, but Feste's inclusion of the audience into his consciousness of the play as a metaphor for actual experience has a special significance here. Throughout Twelfth Night, Feste has engaged various characters in dialogues of self-determination. In one game of wit, he points out that Olivia is a fool "to mourn for your brother's soul, being in heaven" (I.v.65-66). By his irrefutable logic, he wins Olivia's favor and her tacit agreement that her mourning has been overdone. The Duke also is subject to Feste's evaluation in two scenes. Following his performance, upon the Duke's request, of a sad song of unrequited love, Feste leaves a paradoxical benediction:

Now the melancholy god protect thee, and the tailor make thy doublet of changeable taffeta, for thy mind is a very opal. I would have men of such constancy put to sea, that their business might be everything, and their intent everywhere; for that's it that always makes a good voyage of nothing.

(Il. iv. 72-77)
And later, when the Duke is approaching Olivia's house, Feste encounters him with one of his typically unique and audaciously applied truisms:

DUKE I know thee well. How dost thou, my good fellow?

CLOWN Truly, sir, the better for my foes, and the worse for my friends.

DUKE Just the contrary: the better for thy friends.

CLOWN No, sir, the worse.

DUKE How can that be?

CLOWN Marry, sir, they praise me and make an ass of me. Now my foes tell me plainly I am an ass; so that by my foes, sir, I profit in the knowledge of myself, and by my friends I am abused; so that, conclusions to be as kisses, if your four negatives make your two affirmatives, why then, the worse for my friends, and the better for my foes.

(V.i.9-20)

The Duke has in fact lacked some knowledge of himself, and Feste's pointed remark makes it clear that he is using his role as fool to point up the true foolishness of others. In the prison scene with Malvolio, Feste provides a confusing game of switching identities from the Clown to Sir Topas. In each situation, Feste provides the other person with a different perspective for seeing himself. Thus, it is more than merely appropriate that at the end of the play Feste engages the audience in its own definition of self. By asking them to look at their participation in the dramatic illusion, Feste is requesting them to recognize their own desire for humanly willed happiness.\(^{17}\)

The playwright, like the comic providence in the play, has understood "what we will" and has led us to a pleasurable fulfillment of our desires, but in ways which we could not have foreseen or controlled. The substitution of the final line, "And we'll strive to please you every day," for the refrain, "For the rain it raineth every day," is a crucial change. Like the incremental repetition in the folk ballad, this pessimistic refrain has built a dynamic tension which is released in the recognition that the play is an actual experience in the lives of the audience, even though it is enacted in an imagined world. The players, and the playwright who arranges them, are engaged in an ongoing effort to please the audience. The providential design remains incomplete within the play's action and only promises a "golden time"; similarly, the playwright promises further delightful experiences for his audience. The subplot's action, on the other hand, is limited within the framework of revenge: the revenge of the subplot characters elicits Malvolio's cry for revenge.

Malvolio is the only one who refuses to see himself in a subservient position to a larger design. And possibly because that design is too small, we cannot feel that his abuse and final exclusion from the happy community of lovers and friends allows the golden time to be fulfilled within the play. Feste's manipulation of Malvolio resembles the playwright's manipulation of his audience's will, but in such a reduced way that we cannot avoid seeing the difference between merely human revenge and the larger benevolence that controls the play's design.

Notes

1 Viola's Captain calls this power "chance" (I. ii. 6, 8); Viola submits herself to "Time" (I. ii. 60; II. ii. 39); Olivia and Sebastian refer to "Fate" (I. v. 296; II. i. 4); Malvolio speaks of Jove's control (II. v. 158, 164; III. iv. 68-77); and the forged letter names "the stars," "the Fates," and "Fortune" (II. v. 131-146). Citations of the

2 S. Nagarajan, "'What You Will': A Suggestion," *Shakespeare Quarterly*, 10 (1959), 61-67, employs Thomistic categories to discuss the function of human will in the play.

3 Notice the similarity between Feste's description of events and Iago's prediction as he encourages Roderigo to join him in his revenge against Othello: "There are many events in the womb of time which will be delivered" (I. iii. 366). Iago implies that he is merely an agent bringing about time's inevitable retributions.

4 Fabian's participation in the gulling of Malvolio has a vengeful motive, because, as he says to Sir Toby, Malvolio has at some previous time "brought me out o' favor with my lady about a bear-baiting here" (II. v. 4-7).

5 The *OED* cites Feste's line as an example under "circling course, revolution (of time or events)," but other uses of the term cited there are also important in the force of the word in *Twelfth Night*: "whirligig" is the name of various toys which are whirled, twirled, or spun around; the term was also used to signify "an instrument of punishment"; and the word suggests fickleness, inconstancy, giddiness, or flightiness.

6 Maria indicates her "foreknowledge" of Malvolio's certain response (II. iii. 137-40), and Malvolio's comments fulfill her prediction (II. v. 110-12, 150-52).

7 Olivia has drawn a similar conclusion about herself in the opening lines of this scene: "I am as mad as he, / If sad and merry madness equal be" (III. iv. 13-14). Because Olivia concurs with Maria in classifying Malvolio's peculiar behavior as "madness," she inadvertently begets the subplotters plan for imprisoning Malvolio. We have Rosalind's word for it in *As You Like It* that the typical treatment for lunatics in the sixteenth century was imprisonment:

> Love is merely a madness, and, I tell you, deserves as well a dark house and a whip as madmen do; and the reason why they are not so punished and cured is that the lunacy is so ordinary that the whippers are in love too.

   (III. ii. 376-80).

> Out, hyperbolical fiend! How vexest thou this man! Talkest thou nothing but of ladies?

   (IV.ii.25-26)

Obsessive interest in sexual lust seems to have been a commonplace shorthand to indicate madness for Renaissance dramatists: for examples, see Ophelia's mad songs in *Hamlet* (IV.v); Edgar's speech to King Lear as poor Tom o' Bedlam (III.iv.); and the masque of madmen in *The Duchess of Malfi* (IV.ii.). Feste is also following Vice's typical role of teasing and tormenting the Devil when he berates Malvolio, who (Feste asserts) is possessed by the fiend—a point that Feste's song at the end of IV.ii reiterates.
9 The two productions of *Twelfth Night* that I have seen both chose to emphasize visual comedy. One was the Royal Shakespeare Company’s performance at Stratford-Upon-Avon in August 1971. During the scene, Malvolio kept popping his head up through a left-front trap door, and Feste responded with a swift stomp of his foot, closing the trap according to his whim. In this case, Malvolio was not allowed to see Feste, but the audience was allowed to see Malvolio. A performance in the fall of 1971, by Florida's Asolo Theater, had Feste roll onstage a wheeled cage with a small barred window on the upper left, covered by a flap. A sign reading "Beware the Lunatic" covered most of the visible side of the cage and evoked a large laugh from the audience. Throughout the scene, Feste was able to lift or lower the flap covering the bars, so that Malvolio was exposed to the audience and to Feste according to Feste's whim. In both of these instances, the visual comedy was heightened at the expense of the text and its suggested visual effects: Malvolio neither sees anyone nor is seen by anyone in the darkness of his prison. An illustration of this scene from Nicholas Rowe's edition of 1709 shows Malvolio separated from the others by a center stage partition, which would allow the audience to witness both situations simultaneously. This is closer to stage directions in the text, but, of course, would not have been probable for Shakespeare's staging of the scene. See "Plate 9 (c)," W. Moelwyn Merchant, *Shakespeare and the Artist* (London: Oxford University Press, 1959), between pp. 48, 49.

10 The problem of whether to sympathize with or to reject and ridicule Malvolio is an old one. Charles Lamb probably opened this Pandora's box when he praised Malvolio as what Lamb thought he should have been—"brave, honourable, accomplished": from "On Some of the Old Actors," *The London Magazine*, 1822, reprinted in *Shakespeare's Twelfth Night*, ed. Leonard F. Dean and James A. S. McPeek (Boston: Allyn and Bacon, 1965), p. 150. Many arguments have been advanced against Malvolio's "humanity" as realized in the play. Two of the more interesting are by S. L. Bethell, *Shakespeare and the Popular Dramatic Tradition* (London: Kings and Staples, 1944), pp. 77-78, and Barbara K. Lewalski, "Thematic Patterns in *Twelfth Night*" *Shakespeare Studies*, 1 (1965), 168-81.

11 Julian Markels, "Shakespeare's Confluence of Tragedy and Comedy," p. 84, and Barbara Lewalski, "Thematic Patterns in *Twelfth Night*," discuss the regenerative potentials of madness. Both discussions are pertinent to the emblematic values presented in this scene.

14 Joseph H. Summers makes a similar point, "The Masks of *Twelfth Night*," *The University of Kansas City Review*, 22 (1955), 31. In contrast, the song becomes an appropriate description of the play's world in *King Lear* (III. ii. 64-77).

15 I disagree with John A. Hart's opinion that Feste's song "is not hard to fathom": "Foolery Shines Everywhere: The Fool's Function in the Romantic Comedies," *Starre of Poets, Carnegie Series in English*, 10 (Pittsburg: Carnegie Institute of Technology, 1966), p. 47. Hart's own reading of the song's "general meaning" differs in several major points from other readings. One of the most generally held readings is by John Weiss, *Wit, Humour, and Shakespeare* (Boston, 1876), p. 204. It is impossible to list every variant, but worth noting by contrast is Leslie Hotson, *The First Night of *Twelfth Night*,* pp. 168-71, who centers his discussion of the song on the sexual innuendoes that proceed from reading "thing" as male genitalia.

16 Leslie Hotson, *ibid.*, p. 171, n. 2, points out that this line "recalls the Elizabethan euphemism for coition, 'To dance The Beginning of the World!'" Without discounting that allusion, I suggest that a much more general pattern of action is implied.
Robert Wilcher (essay date 1982)

[In the following excerpt, Wilcher asserts that, in contrast to the more conventional clowns of Shakespeare's earlier comedies, Feste is a more fully human character.]

I

Since Francis Douce's pioneering study of the 'clowns and fools' of the Elizabethan stage, a good deal of scholarly scrutiny and critical interpretation has been directed towards Shakespeare's use of his inheritance from popular drama in general and from traditions of fooling in particular.¹ But compared with the detailed studies that have been devoted to the serious dramatic functions that Shakespeare developed for the solo-turn exemplified by Launce's monologues in The Two Gentlemen of Verona and the porter scene in Macbeth,² that other familiar routine of popular comedy—the double-act—has been somewhat neglected. William Willeford traces the origins of the 'knockabout fool pair' to the interplay between the Devil and the Vice in the Tudor moralities;³ and Austin Gray identifies the comic personalities of the actors Will Kemp and Dick Cowley behind the long line of Shakespearian double-acts, from Launce and Speed to the grave-diggers in Hamlet, offering this account of the relationship between the stooge and the lead comedian:

This old fellow is a mere shadow to his wiser gossip. It is his business to ask simple-minded questions or to listen in simple-minded wonder to the dogmatic wisdom of his friend. In short, his main duty is to be the cause that wit and comicality express themselves through the mouth of his friend.⁴

The fullest account of the nature and function of the double-act is by J. A. B. Somerset who, in the course of tracing the history and significance of the comic turn in Renaissance English drama, spends some time on 'the "vaudeville" interchange in which the master acts the role of straight-man to the fooling of his servant or jester, while realizing that he is doing so'.⁵ It is the purpose of the present paper to examine the use of comic duologues in As You Like It, Twelfth Night, and Hamlet, in order to indicate the variety of Shakespeare's artistic response to Dogberry's observation that 'an two men ride of a horse, one must ride behind' (Much Ado About Nothing, 3.5.35-6).⁶

Some preliminary attention must be given, however, to the early comedies, because they establish in simple form the materials which Shakespeare was to manipulate later in more complex ways and also offer glimpses of those insights into human behaviour which he perceived in the very nature of the double-act. Three variations can be distinguished, involving both the status of the participants and the kind of humorous exchange that takes place between them. First there is the Kemp-Cowley type of set-piece described by Gray, in which the lead clown and the stooge share the same low social class. The comedy resides in the ability of the dominant partner to outwit his slower companion, either by confusing him or by trapping him into an absurd situation by verbal trickery. A crude example occurs in The Taming of the Shrew, in the scene where Grumio thwarts his fellow-servant's eager desire for news of their master's marriage for some thirty lines and then clinches his comic superiority in a more material way:

Grumio. First know my horse is tired; my master and mistress fall'n out.

Curtis. How?
Grumio. Out of their saddles into the dirt; and thereby hangs a tale.

Curtis. Let's ha't, good Grumio.

Grumio. Lend thine ear.

Curtis. Here.

Grumio. There. [Striking him.

Curtis. This 'tis to feel a tale, not to hear a tale.

Grumio. And therefore 'tis called a sensible tale; and this cuff was but to knock at your ear and beseech list'ning.

(4.1.46-58)

Launcelot Gobbo's determination to 'try confusions' with his sand-blind father in *The Merchant of Venice* (2.2.28 ff.) is in a similar vein. In *The Two Gentlemen of Verona*, the servants Launce and Speed are more equally matched intellectually, but in each of their encounters Launce is given the upper hand in the verbal sparring and Speed is relegated to the stooge's role:

Speed. How now, Signior Launce! What news with your mastership?

Launce. With my master's ship? Why, it is at sea.

Speed. Well, your old vice still: mistake the word. What news, then, in your paper?

Launce. The black'st news that ever thou heard'st.

Speed. Why, man? how black?

Launce. Why, as black as ink.

(3.1.276-83)

This exchange opens into the long sequence in which Speed 'feeds' Launce by reading items from a paper detailing the qualities of Launce's mistress, thus allowing the lead clown all the witty punch-lines.

In each of these cases, the double-act interrupts the progress of the plot and is clearly designed to display the talents of the company's clowns in an interlude of low comedy. At the other end of the social scale are the duologues between characters from the main plot. *The Two Gentlemen of Verona* opens with a witty scene of parting between Valentine and Proteus, which will serve to exhibit the distinctive features of this second kind of exchange:

Proteus. Upon some book of love I'll pray for thee.

Valentine. That's on some shallow story of deep love: How young Leander cross'd the Hellespont.

Proteus. That's a deep story of a deeper love; For he was more than over shoes in love.
Valentine. 'Tis true; for you are over boots in love, And yet you never swum the Hellespont.

Proteus. Over the boots! Nay, give me not the boots.

Valentine. No, I will not, for it boots thee not.

(1.1.20-8)

Here, in contrast to the previous examples, there is no dominant partner. Each holds his own in a mutual display of verbal cleverness. The puns proliferate in the game of keeping the ball of wit in the air. It is more common for this kind of game to be played while other characters are present, and then it takes on the air of a contest, with the spectators frequently commenting on the expertise of the players. Love's Labour's Lost furnishes an example:

Katharine. She might 'a been a grandam ere she died. And so may you; for a light heart lives long.

Rosaline. What's your dark meaning, mouse, of this light word?

Katharine. A light condition in a beauty dark.

Rosaline. We need more light to find your meaning out.

Katharine. You'll mar the light by taking it in snuff; Therefore I'll darkly end the argument.

Rosaline. Look what you do, you do it still i' th' dark.

Katharine. So do not you; for you are a light wench.

Rosaline. Indeed, I weigh not you; and therefore light.

Katharine. You weigh me not? O, that's you care not for me.

Rosaline. Great reason; for 'past cure is still past care'.

Princess. Well bandied both; a set of wit well play'd.

(5.2.17-29)

The Princess's image indicates the holiday nature of this kind of repartee, having no other purpose than to exercise the participants and entertain their companions. In a scene from The Two Gentlemen of Verona, however, the sport is given an edge of seriousness when Valentine is challenged by Thurio, his rival for the hand of Silvia:

Silvia. Servant, you are sad.

Valentine. Indeed, madam, I seem so.

Thurio. Seem you that you are not?

A needling interchange ensues, until Valentine catches Thurio on the raw by proving him a fool:
Silvia. What, angry, Sir Thurio! Do you change colour?

Valentine. Give him leave, madam; he is a kind of chameleon.

Thurio. That hath more mind to feed on your blood than live in your air.

Valentine. You have said, sir.

Thurio. Ay, sir, and done too, for this time.

Valentine. I know it well, sir; you always end ere you begin.

Silvia. A fine volley of words, gentlemen, and quickly shot off.

(2.4.8-31)

Silvia's two interventions suggest that Thurio, by taking up Valentine's initial 'I seem so' in a malicious sense and then becoming heated as the exchange develops to his disadvantage, is breaking the rules of this kind of social badinage. When personalities and the rivalries of real life become engaged in the verbal contest, the delicate mechanisms of social decorum are endangered. Silvia's concluding attempt to bring the uncomfortable situation back within the bounds of the courtly game is appropriately expressed in an image of warfare rather than sport. Already, thus early in his career, Shakespeare demonstrates how the witty duologue may be exploited dramatically to expose psychological and social tensions among characters.

The third type of comic duologue is that discussed by Somerset, in which a character of high status consents to play straight-man to a socially inferior comedian. In the early comedies, the comic actor had been accommodated in the fictional world of the play as a servant. This figure, as Robert Weimann has demonstrated in his analysis of Launce's contribution to The Two Gentlemen of Verona, moves between the real-life situation of a clown confronting a theatre audience and the dramatic situation of a character relating to other characters:

The real performance of the actor and the imaginative role of the servant interact, and they achieve a new and very subtle kind of unity. Within this unity, the character's relations to the playworld begin to dominate, but the comic ease and flexibility of these relations are still enriched by some traditional connexion between the clowning actor and the laughing spectator.7

It is in monologues and asides, and with his dull companion in the low-comedy double-act, that the clown asserts his function as entertainer of the audience and maintains his semi-independence of the playworld. When he becomes involved in the third kind of duologue, he withdraws into the fiction and exerts his wit to entertain not us, directly, but his employer. The difference between the master-servant conversation and the low-comedy turn is indicated by Antipholus of Syracuse's description of his relationship with Dromio in The Comedy of Errors:

A trusty villain, sir, that very oft,
When I am dull with care and melancholy,
Lightens my humour with his merry jests.

(1.2.19-21)
Launcelot and Grumio play at fooling their social equals and intellectual inferiors, Old Gobbo and Curtis, for the delight of the audience; Dromio and his successors Touchstone and Feste are allowed to amuse their social superiors within the world of the drama.

On two occasions in *The Comedy of Errors*, Antipholus agrees to indulge Dromio, feeding him in act 2, scene 2 with such lines as 'Your reason? ', 'Let's hear it', 'For what reason?', 'Name them'; and in act 3, scene 2 playing up to his conceit of the amorous kitchen-wench as 'a globe' by asking him to locate different countries on her anatomy. These two extended duologues are as much formal double-acts interrupting the plot as the Grumio-Curtis sequence, but the style of comedy is quite different, as we enjoy the inventiveness of Dromio's replies rather than the lower humour of one fool outwitting another. When Launcelot engages his superiors in witty conversation, another feature of this mode of comedy comes to light. He harps upon Jessica's Jewishness and her conversion to Christianity, asserting that she will be damned for her father's sins and complaining that 'this making of Christians will raise the price of hogs' (*The Merchant of Venice*, 3.5.20). These jokes are typical of the later professional fools' habit of telling home-truths and handling taboo subjects. Jessica is in no way offended or disconcerted, and seems to enjoy the chance to treat these disturbing personal matters in a mood of playfulness. As Olivia says, when Feste makes light of her brother's death: 'There is no slander in an allow'd fool' (*Twelfth Night*, 1.5.88). . . .

III

In *Twelfth Night*, Shakespeare uses the technique of the double-act to conduct his most penetrating psychological study of the domestic fool. The character and personal predicament of the early comic servants had never been the focus of dramatic attention. Launce's parting from his family and affection for his dog, and Launcelot's hard life in Shylock's household, had been used simply as the basis for comic turns. Touchstone's behaviour in the Forest of Arden had provided insights into social manners, but had not involved us in the clown's predicament as a unique individual. He was introduced, we remember, with a philosophical discussion about wit and folly, and it was his functioning as a jester not his character as a man that Shakespeare was interested in. The duologue routine which brings Feste before us for the first time immediately establishes the difference of approach in *Twelfth Night*:

*Maria.* Nay, either tell me where thou hast been, or I will not open my lips so wide as a bristle may enter in way of thy excuse; my lady will hang thee for thy absence.

*Clown.* Let her hang me. He that is well hang'd in this world needs to fear no colours.

*Maria.* Make that good.

*Clown.* He shall see none to fear.

*Maria.* A good lenten answer. I can tell thee where that saying was born, of 'I fear no colours'.

*Clown.* Where, good Mistress Mary?

*Maria.* In the wars; and that may you be bold to say in your foolery.

*Clown.* Well, God give them wisdom that have it; and those that are fools, let them use their talents.

*Maria.* Yet you will be hang'd for being so long absent; or to be turn'd away—is not that as good as a hanging to you?
Clown. Many a good hanging prevents a bad marriage; and for turning away, let summer bear it out.

Maria. You are resolute, then?

Clown. Not so, neither; but I am resolv'd on two points.

Maria. That if one break, the other will hold; or if both break, your gaskins fall.

Clown. Apt, in good faith, very apt!

(1.5.1-24)

Feste is a hired man, dependent on his fooling for his living. Whatever licence he may have to speak, he is not free to be absent without his employer's permission, and the threat of being 'turn'd away' hangs over his position in the social microcosm of Olivia's household. The progress of the duologue illustrates just how precarious that position is. He begins with a rather feeble pun on 'colours' and 'collars', and when Maria 'feeds' him with the line, 'Make that good', he collapses into the even feebler conclusion: 'He shall see none to fear.' Maria registers the poorness of this 'lenten answer', and then takes over as dominant partner in the comic routine, with Feste dropping into the role of straight-man: 'Where, good Mistress Mary?' His reply, with its comment 'those that are fools, let them use their talents', is a resigned admission that his 'talents' in the field of fooling are small. A few lines later, after offering a threadbare proverb in response to Maria's repeated warning about hanging, he launches into another joke with an intended pun on 'points'. But Maria is too quick for him, and instead of playing straight-man steals his punch-line. 'Apt', says Feste, crestfallen, 'in good faith, very apt!' the kind of remark that one expects to hear from the impressed audience of the clown, not from the clown himself.

Feste's aside, as Olivia and Malvolio approach, is different in kind from the asides of clowns like Speed or Thersites, which register a critical attitude towards the antics of the other characters. It is more of an overheard thought (a silent prayer for help) than a wink at the audience, and it reveals Feste's critical awareness of his own shortcomings rather than the folly of others:

Wit, an't be thy will, put me into good fooling! Those wits that think they have thee do very oft prove fools; and I that am sure I lack thee may pass for a wise man.

(1.5.29-32)

His uneasiness is quite justified, since Olivia is evidently displeased with him and tired of his predictable brand of humour:

Olivia. Take the fool away.

Clown. Do you not hear, fellows? Take away the lady.

Olivia. Go to, y'are a dry fool. I'll no more of you. Besides, you grow dishonest.

(11. 35-8)

He desperately produces a lengthy syllogistic proof that Olivia is a fool, to be met not with applause, but with a blocking speech: 'Sir, I bade them take away you.' The mock dignity of his assertion that 'I wear not motley in my brain' only half conceals his resentment at the role in which he has been cast by Fortune rather than by
Nature, and he appeals for one more chance to demonstrate that he can perform adequately: 'Good madonna, give me leave to prove you a fool.'

Olivia relents, and agrees to play her part in the comic duologue with her dubious 'Can you do it?' and the feed line: 'Make your proof.' This opens the way for a comic catechism, which wins Olivia over: 'What think you of this fool, Malvolio? Doth he not mend?' The ensuing dialogue, in which Malvolio castigates 'these set kind of fools' and gets uncomfortably near the truth about Feste's limitations—'unless you laugh and minister occasion to him, he is gagged'—adds further detail to Shakespeare's study of this particular clown's predicament. He is caught up in the below-stairs rivalries of a great household, and it is easy to understand why he tries to avoid anything that would aggravate Olivia's displeasure—keeping in the background when Sir Toby and Maria hatch the plot against Malvolio, and only allowing himself to be drawn in somewhat diffidently at a late stage in the proceedings, when Sir Toby is looking for a way to be 'well rid of this knavery'.

He seems to be more valued by Orsino for his ability to sing than for his skill in fooling, and it is noticeable that he plays second fiddle to Sir Toby in the great merry-making scene, and that praise for his wit comes from the foolish Sir Andrew, who enjoys such jokes as 'I did impetico thy gratility' and 'I shall never begin if I hold my peace.' In the Sir Topas episode, Feste exhibits a skill in mimicry, not in verbal brilliance. His wit is at its most inventive when he is begging money from Orsino and Viola. Warde characterizes Feste's performances as a jester accurately as lacking in both the 'spontaneous humor' and the 'sententious wisdom' we expect from a fool. His wit, he continues, 'is at times labored, frequently forced, and seldom free from obvious effort. It is professional foolery, rather than intuitive fun.' And Bradley gets closer to the heart of his mystery in recognizing that the lot of such a man, who is 'more than Shakespeare's other fools, superior in mind to his superiors in rank', must be 'more or less hard, if not of necessity degrading'.

Apart from his opening exchanges with Maria and Olivia and the Sir Topas episode, Feste's lengthiest involvement in duologue is with Viola. In substance, this scene is as much a comic interlude as the letter-reading turn between Speed and Launce: it contributes nothing to the plot. It does, however, substantiate Warde's and Bradley's insights into Feste's character and raise issues that are of thematic importance in the play:

Viola. Save thee, friend, and thy music! Dost thou live by thy tabor?

Clown. No, sir, I live by the church.

Viola. Art thou a churchman?

Clown. No such matter, sir: I do live by the church; for I do live at my house, and my house doth stand by the church.

Viola. So thou mayst say the king lies by a beggar, if a beggar dwell near him; or the church stands by thy tabor, if thy tabor stand by the church.

Clown. You have said, sir. To see this age! A sentence is but a chev'ril glove to a good wit. How quickly the wrong side may be turn'd outward!

Viola. Nay, that's certain; they that dally nicely with words may quickly make them wanton.

(3.1.1-14)

Formally, this is a duologue that belongs to the Launce-Speed type, since both participants are supposedly of the servant class. Viola makes a good-natured approach, calling him 'friend', but Feste, with a mixture of resentment and insolence, underlines his own inferior position in the servant hierarchy by addressing the
up-and-coming favourite, 'Cesario', in all but one of his thirteen replies with the mock-subservient 'sir'. In these opening moments of the encounter, the familiar double-act relationships fail to be established. Viola does not take up either of the conventional roles: that of stooge or that of straight-man. She attempts to engage the clown in a conversation between social and intellectual equals. C. L. Barber has pointed out that Feste's exasperation at the abuse of language in the interests of wit comes unexpectedly from the fool's mouth—in The Merchant of Venice, 'it was the gentlefolk who commented "How every fool can play upon the word!"'.

Two further points need to be made: firstly, Feste is not, as far as he knows, addressing more than a fellow-employee of the gentlefolk, for although 'Cesario's' parentage is 'above my fortunes' (1.5.262), 'he' is a dependant in Orsino's household; and secondly, it is in line with what we have seen of Feste's character that he should be contemptuous of the very art on which he must rely for his living. After all, it was he, not 'Cesario', who began the riddling conversation by turning the phrase 'live by' inside out. One might dig deeper, and suggest that his dallying with Viola's words is triggered by his bitterness at being forced by necessity to 'live by' his profession as jester-minstrel.

As the duologue continues, subtle adjustments are made in the relationship between the two participants:

_Clown._ I would, therefore, my sister had had no name, sir.

_Viola._ Why, man?

_Clown._ Why, sir, her name's a word; and to dally with that word might make my sister wanton. But indeed words are very rascals since bonds disgrac'd them.

_Viola._ Thy reason, man?

_Clown._ Troth, sir, I can yield you none without words, and words are grown so false I am loath to prove reason with them.

(3.1.15-23)

Viola's control of both the sexual and the social aspects of her disguise as a male servant wavers in the face of Feste's refusal to respond straightforwardly to her greeting. This is delicately registered in the shift from 'friend' to the would-be hearty 'man' in her mode of address to the clown and in her assumption of the socially superior role as 'feed'—more appropriate to her real status—with the questions 'Why, man?' and 'Thy reason, man?'

The crisis of the scene occurs in the next few speeches, as Viola unwittingly nettles Feste and brings his submerged hostility into the open:

_Viola._ I warrant thou art a merry fellow and car'st for nothing.

_Clown._ Not so, sir; I do care for something; but in my conscience, sir, I do not care for you. If that be to care for nothing, sir, I would it would make you invisible.

_Viola._ Art not thou the Lady Olivia's fool?

_Clown._ No indeed, sir; the Lady Olivia has no folly; she will keep no fool, sir, till she be married; and fools are as like husbands as pilchers are to herrings—the husband's the bigger. I am indeed not her fool, but her corrupter of words.

(11. 24-34)
Viola compounds the error of her patronizing tone in 'I warrant thou art a merry fellow' by using the title which Feste resents because of its implications. We remember that he even bridled when Olivia hinted that his jester's garb extended from his office to his nature: 'I wear not motley in my brain.' Viola tries to change this prickly subject, but Feste will not be placated and she breaks off the conversation in a way that places her firmly above him in the social hierarchy:

**Viola.** I saw thee late at the Count Orsino's.

**Clown.** Foolery, sir, does walk about the orb like the sun—it shines everywhere. I would be sorry, sir, but the fool should be as oft with your master as with my mistress: I think I saw your wisdom there.

**Viola.** Nay, an thou pass upon me, I'll no more with thee. Hold, there's expenses for thee. *[giving a coin.]*

(11. 35-41)

Having refused Viola's initial overtures of friendly equality, and resented her assumption of superiority, Feste now tries to turn her into his butt by calling her Orsino's fool. Viola's tip leads him into his routine of begging, but does not stem his insolence. In the very act of wheedling more money out of his antagonist, he is artfully implying that though 'Cesario' may not be a fool, he is nonetheless a hired man, and what is more, a pander:

**Clown.** I would play Lord Pandarus of Phrygia, sir, to bring a Cressida to this Troilus.

**Viola.** I understand you, sir; 'tis well begg'd. *[giving another coin.]*

**Clown.** The matter, I hope, is not great, sir, begging but a beggar: Cressida was a beggar. My lady is within, sir. I will conster to them whence you come.

(11. 49-54)

When he is gone, Viola gives her famous assessment of Feste and his art:

This fellow is wise enough to play the fool;
And to do that well craves a kind of wit.
He must observe their mood on whom he jests,
The quality of persons, and the time;
And, like the haggard, check at every feather
That comes before his eye. This is a practice
As full of labour as a wise man's art.

(11. 57-63)

As Joseph H. Summers points out, most of the characters in the play are wearing masks, and 'Feste is the one professional among a crowd of amateurs.'\(^\text{14}\) Unlike everyone else but Viola, however, Feste *knows* he is wearing a mask—that of fool—and must 'labour' to maintain it. This is why it is difficult to accept Roger Ellis's view that Feste 'covers his tracks so completely that we never see what he stands for, but only the folly and affectation which he ridicules in all around him', and that we never do find out what he does wear in his brain.\(^\text{15}\) Feste may be 'wise enough to play the fool'—with an effort—but he resents the fact that Fortune has made it necessary for him to practise an art which he knows is not natural to him; and in the scenes with Maria and Olivia in act 1 and with Viola in act 3, the routines of the comic duologue are deliberately manipulated by
Shakespeare to wwover his tracks, rather than to cover them. Touchstone was unconsciously trapped in his role; Feste is trapped in his, but with a full and painful awareness. It is typical of him that on the rare occasion when his wit rather than his singing is praised by Orsino—'Why, this is excellent'—Feste replies ruefully, 'By my troth, sir, no; though it please you to be one of my friends', and proceeds to beg for money.

6 All quotations from Shakespeare's plays are taken from Peter Alexander's text of the Complete Works (1951).

10 Feste wants to prove his own skill at fooling by inventing ingenious proof that his mistress is a fool—one of the traditional ploys of the jester.

11 Frederick Warde, The Fools of Shakespeare (1915), p. 78.

Karen Greif (essay date 1988)

[In the essay below, Greif traces the evolution of Feste in twentieth-century productions of Twelfth Night. She contends that Feste has become an alienated figure, who is profoundly aware of human frailty and the transience of human existence.]

All the characters in Twelfth Night are masqueraders—all imposters, self-deceivers, and counterfeiters, and all beguiled, to some degree, by the game of charades whirling around them. Only Feste the jester keeps his mask from slipping. He alone remains inscrutable, a quality that has made his character particularly fascinating to our century. We are intrigued by ambiguities, obsessed with ironies, and bewitched by paradoxes. So it is natural that the modern theatre has drawn attention to Feste, and in him we have discovered our own key to Twelfth Night. Just as the Romantics found near-tragic pathos in Malvolio's misadventures, or as the Victorians transformed Viola into a model of womanly devotion, we have searched for our own answers in the play's mirror; and the image cast back has been that of a wryly smiling, somewhat weary jester, one of life's privileged spies into the mystery of things.

I

That Feste has not always commanded respect in the theatre is clear from even a quick look at the play's stage history. To past audiences Feste was not compellingly enigmatic. He was simply baffling and all too often tiresome. His addiction to wordplay and witty jests, his oblique mockery, his delight in improvisation, his angling after coins, and his nebulous social rank all seemed alien to playgoers or actors who had lost touch with the Renaissance tradition of the "artificial" fool. Many of his jokes had become obscure and his ironic stance was hard to fathom. From the Restoration on, the standard practice was to play the hijinks in the comic plot for laughs while underlining the sentimental aspects of the romantic tangle, and Feste was odd man out in either simplified context. As a result, his part was invariably edited—sometimes emasculated—in performance. Not until this century has the fool moved from the periphery of the drama into its very heart.

A look at Bell's Shakespeare (London, 1773), an acting edition based on promptbooks used at Drury Lane and Covent Garden, reveals how dispensable Feste was once thought to be. Both of his love songs ("O mistress mine" and "Come away, death") were cut, along with the accompanying dialogue. The change in the revels scene (II.iii) kept the fun high-spirited and sped up the confrontation with the killjoy steward, but it also erased the rueful counterpoint the song provides by reminding us of time's passing. Similarly, the second abridgement (II.iv) showcased Viola's selfless devotion at the cost of the fool's dept parody of Orsino's love-melanchooly. Other cuts also weakened Feste's part. His banter with Cesario in III.i was sharply trimmed, as was his mock inquisition of Malvolio (IV.ii). These alterations were eventually codified by John Philip Kemble, who published an acting edition of Twelfth Night in 1810 that became (whether in its own stead or in Oxberry's virtually identical text) the standard theatrical version during the nineteenth century. Kemble adopted the cuts in Bell's edition and incorporated new ones of his own, including a few more slices from Feste's lines. Equally important, he re-aligned the scene order so that each act comprised a defined block of action, usually with strong opening and closing scenes that centered attention on Viola or Malvolio, the two leads. Such formal clarity was in line with Kemble's neoclassical standards, but it also broke the original dramatic structure. And in a theatre whether a linear plot was favored over a contrapuntal pattern, Feste's role in linking the story lines was easily ignored.

Of course, there were some managers who substituted their own versions for Kemble's, or who varied his formula, but they showed even less interest in the fool. For instance, one curious anomaly in Twelfth Night's stage history was the "operatic" version concocted by Frederick Reynolds for Covent Garden in 1820. Reynolds specialized in lavishly staged musical adaptations of Shakespeare, which he devised by ransacking the canon for graftable lyrics. Yet oddly enough, in revamping Twelfth Night, he cut all the original music.
except for the familiar epilogue song. As one might guess, the fool played a very minor role in this mutilated songfest. Some years later, in 1884, Henry Irving presented a more orthodox version at the Lyceum Theatre. Still remembered for Irving's pseudo-tragic Malvolio and for Ellen Terry's sparkling Viola, this star-oriented production gave scant attention to the supporting cast. Dully played by a faltering comedian, Feste won small response from Lyceum patrons.

The growth of the star-system—like Kemble's disentangling of the plot strands—inevitably sapped Feste's role. Once the spotlight was aimed at the heroine and the gull, the other major characters automatically became "second-string" parts. Just as Olivia turned into a stately contralto because she was so often played by aging ingenues, or Orsino was relegated to the rising—or falling—matinee idol in the company, Feste usually went to whichever actor could muster a decent singing voice and take the obligatory pratfalls. In Augustin Daly's opulent and immensely successful revival, presented in New York in 1893 and the following year in London, Ada Rehan dominated the stage as Viola. The fool—stripped of over half his lines—dwindled away to an inconsequential zany, trotted out to sing a few tunes and crack an occasional jest, but serving mostly as a sidekick to Sir Toby and Sir Andrew. The hapless steward also suffered from Daly's scissors-and-paste approach to the text; but the two worst incisions (the abridgement—later the omission—of the prison scene and Malvolio's disappearance from the last act) also seriously diminished Feste, who normally plays a crucial part in these episodes.\footnote{4} However, this troubled few playgoers, to judge from the reviews.

Most of the later revivals presented under the actor-manager regimes did little to enhance Feste's prestige. Yet in one of history's small perversities, an early hint of the changes in store came from a most unlikely theatrical quarter. At the turn of the century, just after Queen Victoria's death in 1901, Herbert Beerbohm Tree produced a sumptuous staging of \textit{Twelfth Night} at His Majesty's Theatre. In most respects, this was the usual Tree spectacular. There were extravagant sets, most conspicuously an awe-inspiring garden that seemed to stretch for acres, lavish costumes, and ebullient clowning by Tree as a vainglorious Malvolio. But Tree had decided to mount a joyously festive comedy, and he took as his motto Feste's line: "Foolery, sir, doth walk about the orb—like the sun, it shines everywhere." Tree's staging reserved center stage for the steward—here played as a fantastic grandee—but it also shed new light upon the fool. Set down in an Illyria dedicated to laughter, Feste became the "presiding genius" of the place, impishly serving as the "connecting link of stories otherwise disparate" who alerted everyone that the play's "swooning amorism no less than its roistering fun is 'high fantastical'" (\textit{The Times}, 6 February 1901). In keeping with the show's sunny spirits, the jester's wit was more whimsical than sharp, and Courtice Pounds acted him as a genial humorist playing his pranks with cheeky nonchalance. "This Feste," Max Beerbohm wrote, "was as constant and as indispensable as punctuation"; and Tree himself called him "the all-pervading spirit of Twelfth Night."\footnote{5} But while Tree took advantage of the fool's unifying presence to improve the coherence of the heavily cut acting version employed, Feste himself, in a production so relentlessly keyed to merry laughter, remained an uncomplicated figure, a waggish Lord of Misrule overseeing the holiday fun.

It was not until Harley Granville-Barker staged his brilliant \textit{Twelfth Night} at the Savoy Theatre in 1912 that Feste was anointed as the spokesman for the comedy's bittersweet undertones. Barker's viewpoint, expressed in his preface to the acting edition, was that the fool should not be played as a blithe spirit, flitting gaily through Illyria:

\begin{quote}
Feste, I feel, is not a young man. . . . There runs through all he says and does that vein of irony by which we may so often mark one of life's self-acknowledged failures. We gather that in those days, for a man of parts without character and with more wit than sense, there was a kindly refuge from the world's struggles as an allowed fool.\footnote{6}
\end{quote}

This portrait hints at several traits subsequent directors and actors would fasten on: the fool's ironic, faintly cynical detachment from his companions; his poignant, almost melancholy awareness of time's passage; and his use of wit as a shield against despair.
Sometimes these qualities have been magnified to the point of distortion, but in Barker's production Feste carried his mantle of irony lightly. He shared with his cohorts a delight in fellowship tempered by a keener sense that "present mirth" may vanish by tomorrow. As a member of Olivia's household he could enjoy his pleasures—and, like Sir Toby and Maria, he had a vested interest in protecting that refuge from Malvolio's stringent reforms. But he also showed a rueful awareness that for some listeners his fooling had indeed grown old. Because his part was not whittled down, as traditionally it had been, the full complexities of his nature were preserved. And by casting C. Hayden Coffin, a veteran of musical comedies, as Feste, and restoring all of the songs (set to authentic Elizabethan airs), Barker ensured that the musical interludes would not be slighted. He was careful not to distract attention from Feste during the songs, keeping the listeners onstage absorbed and still while Coffin sang the lyrics with quiet simplicity.

In the closing moments, Feste's role as mediator between the worlds of illusion and everyday reality was subtly evoked when the lovers passed through an arched gateway into the secluded garden, while the fool sang the epilogue verses from the forestage. As the gates closed upon the lovers and their fantasy world, the curtain slowly descended, leaving Feste alone on the apron. Then he, too, vanished through the curtains on the last notes: "But that's all one, our play is done, / And we'll strive to please you every day." That fare-well, critic John Palmer wrote, brought the enchantment to a graceful close: "We had wandered in Elia's fairyland, but the time had come for magic to be locked away. The spell, at last, was broken; and, thereafter, with hey ho, the wind and the rain, we must tumble forth into the crowd."

Significantly, the Savoy Twelfth Night was the first revival to include virtually the full text (only about twenty lines were cut), with the scenes kept in their original sequence. Combined with continuous staging that allowed only minimal breaks in the action and balanced ensemble playing from the cast, this reform enabled Barker to capitalize on the intricacy of Twelfth Night's design. The rediscovery in the theatre of Shakespeare's interlacing dramatic structure, which the best contemporary directors have preserved, gave a healthy boost to the fool's long-devalued role. As the one character who encounters all the other major players, in a series of meetings spread over the action, Feste helps to weave together the assorted plot strands. Moreover, in his aspect as observer-cum-sooth-sayer, Feste gives voice to many of the play's thematic motifs. By restoring the comedy's original form, Barker gave Feste both a greater stake in the action and a more rounded, fully human personality.

II

Although he had demonstrated how much an expertly realized Feste could contribute to Twelfth Night in performance, Barker's cue was not at once picked up by subsequent producers. Most of the Twelfth Nights staged in the next few decades were lightweight affairs—sometimes drawing carefree laughter with élan and sometimes merely going through the motions, but seldom breaking free of the conventional expectation that it be played as a happy golden comedy. The fools in these productions were usually of the cavorting variety—sprightly, gay, always ready with a joke or a song—and little mention was made of such standardized clowns in most reviews.

There were, nonetheless, a few productions that pointed the way toward the present emphasis. Tyrone Guthrie was one director who experimented with a more serious approach. He directed Twelfth Night in 1933, for his first season in charge of the Old Vic, with Morland Graham cast as the fool. This was a fast-paced, rollicking version that reflected Guthrie's concern to liberate the comedy from its stodgier traditions. In place of scenic backdrops, he substituted an architectural setting intended to approximate the openness and depth of the Elizabethan stage. Caroline costumes broke with the rule of sixteenth-century dress. A flippant and skittish Olivia, acted with a disconcerting Russian accent by Lydia Lopokova, replaced the standard regal matron. And a deliberately discordant note was injected by making Feste a white-haired old man. He was still full of fun, but the suggestion that "clowns grow old like other people"10 silently mocked the laughs. There was only muted appreciation from the critics for such innovations; but in his next outing with Twelfth Night for the Old
Vic, in 1937, Guthrie once more gave Feste a touch of melancholy. This time playgoers were more receptive to his approach. *The Evening Standard* (24 November 1937) described the performance as a mellow blend of wit and beauty shadowed by "devouring time," calling particular attention to the nocturnal party when

> it is as though the revellers are drinking not for conviviality but to stiffen their hearts against the shadow of death. . . . And the clown, glancing at one and then the other, sings his song of sad mortality while the darkness deepens behind them. This is brilliantly done by Mr. Marius Goring, whose clown appears like a spirit from another world, commenting with bitter humour on the follies of mankind.

Some years later Alec Guinness, who had played Sir Andrew Aguecheek in Guthrie's 1937 production, staged his own revival of *Twelfth Night* for the Old Vic (1948). Having transposed Viola's shipwrecked arrival to the opening scene, Guinness began and ended the performance in thundery darkness. The intervening scenes presented, in J. C. Trewin's words, "a gentle summer-world with an odd tinge of pensive autumn in its sunlight"—and Feste, played by Robert Eddison, served as the chief reminder of that nip in the air. Skeptical critics dismissed him as a refugee from Lear's heath or as a gaunt memento mori: "white-haired, hollow-eyed, obviously tubercular . . . [his] doomed voice and haunted countenance dominate the Illyrian scene." Other viewers, however, were moved by the portrayal, which made Feste a more intriguing character than the stereotypical "fidget in cap-and-bells." For example, Audrey Williamson, in a sympathetic, although not totally approving, account of Eddison's performance, remembered him as a sad-gay figure of haunted melancholy: a Pagliacci clown, mournful and elongated, with whitened hair and lines of age on his face, moving among the sad cypresses like a man, not with a load of mischief, but of sorrow.

Perhaps it was the experience of the war and the frustrations of its peace that brought this melancholy conception into practice. The same impulses that nurtured such dramatists as Beckett, Osborne, and Pinter may also have fostered the modern tendency to shift *Twelfth Night*'s colors from midsummer brightness to autumnal shadings. Certainly, by the end of the 1950s, the bitter-sweet interpretation of the comedy had fully matured.

In 1957 Tyrone Guthrie re-staged *Twelfth Night* for the Stratford Festival Theatre in Ontario. Twenty years since his last Old Vic revival had only confirmed Guthrie's impression of darkness within the farcical intrigue: the hints that merriment may spill into madness, that love may turn sour, and earthly pleasures fade. In his program notes, Guthrie argued that, although the story belongs to the vernal season of blossoming exuberance, it should not be taken as a "sentimental Springtime Rhapsody." Rather, he believed that

> as always in the work of great masters, the laughter is not far from tears, behind the sunshine there is a hint of storm. The lyric poetry, some of it the loveliest ever written, . . . carries echoes and overtones of winter and death; we are never allowed to forget that soon, too soon, the garland is withered and the burgeoning tree will wave gaunt arms in the tempest engulfing King Lear.

Despite this impassioned rhetoric, the laughter was not forgotten—indeed, the promptbook in the Festival archives shows that the comic business was both acrobatic and inventive—but the fragility of "present mirth" was keenly felt. Walter Kerr, who deeply admired the performance, reported that "from the outset of the evening an undercurrent of ingrained sadness, of rueful longing for a time when gaiety came easier, serves as a contrast and counterpoint to the abandoned horseplay."

At the heart of this interpretation was Bruno Gerussi's Feste—a played-out entertainer whose songs had "all fallen into a minor key." He was an elderly grizzled fellow, clad in rough homespun, no longer sure of his
bearings but ready to improvise his way through the confusion. A Toronto critic remarked that the director's lens had pulled into focus the usually elusive jester:

Dr. Guthrie has probed this strange misfit and found a figure of strange sadness, an aging professional clown, his place in Olivia's household held on sufferance, his jokes as shabby as his clothes, at odds with the world and finding expression only in song.\textsuperscript{18}

In all three of Guthrie's \textit{Twelfth Night} productions, an aging and saddened Feste was the spokesman for the darker truths that underpin the dreams and revelry. Yet what had seemed to most a daring experiment in the '30s had, by 1957, become an "authentic" reading. Not only had his vision mellowed with time and experience, but Guthrie's audience was now more willing to embrace it.

The following season in England brought two new productions, one at the Old Vic directed by Michael Benthall and the other staged at Stratford's Memorial Theatre by Peter Hall. A twilight mood, often brightened with sportive comedy, permeated the Old Vic \textit{Twelfth Night}, set in a ruined garden dominated by a trellised pavilion and colored in hues of russet and gold. Derek Godfrey, as Feste, was handy at playing the local games; but he also conveyed that this was a fool with a history. He suggested to Harold Hobson a man too often "bruised by the world" and now in retreat; when Orsino tried to pay him for his song, he gravely refused the proffered coins—"No pains, I take pleasure in singing"—as if tired of having a price tagged to his art.\textsuperscript{19} By hinting at the sensibility usually camouflaged by Feste's drollery, the actor could expand the dimensions of the jester's personality. Mary Clarke, in her overview of the Old Vic season, not only placed Feste at the center of the play as the "character who holds all parts together," but she also observed, in accord with the widening consensus that his foolery hides an injured soul:

There is indeed an aching sadness at the very heart of his character, something much more pathetically, vulnerably human than can be suggested by the conventional white face of a clown. The secret of Derek Godfrey's success was that he allowed the humanity to shine through.\textsuperscript{20}

Such efforts to find a subtext to Feste's lines are common in modern productions, especially those that give him a pivotal role. Robert Eddison, for example, had implied a motive for Feste's revenge against Malvolio by suggesting that the fool concealed an unrequited love for Olivia that made him jealous of her attentive steward. And in the 1954 Old Vic production, the director Hugh Hunt had supplied his Feste (Leo McKern), a middle-aged jester dressed in faded motely, with a younger rival by turning Fabian into an up-and-coming fool.\textsuperscript{21} It is as if, by constructing a human face for the creature behind the jester's mask, the actor hopes to let us penetrate Feste's cryptic nature. If pushed too far, such Hamlet-like efforts to "glean what afflicts him" only undercut Feste's credibility as Illyria's resident truth-teller by making his motives transparently personal. But when handled subtly these glimpses into his secret mind can secure our trust that he speaks out of the lessons of heartfelt experience as much as from shrewd observation.

An effort to show a Feste who nurses a bitter knowledge of life without cracking the enigma was brilliantly—if sometimes unevenly—realized in the second of the 1958 productions, Peter Hall's staging for the Royal Shakespeare Company (revived in 1960). In a short essay on the play, written for the Folio Society edition, Hall characterized \textit{Twelfth Night} as "complex, ambiguous, and heartbreakingly funny." He saw it as a "transitional play" bridging the gulf between the earlier romantic comedies and the disquieting complexities of the problem plays and the tragedies: "There is something of bitterness in its comedy. But the comedy is rich, because there is darkness and disturbance."\textsuperscript{22} To dramatize this vision, Hall made Feste his presenter. This "allowed" fool, a self-proclaimed "corruptor of words," possessed a unique knowledge of life's inequities and its transience that tinged with irony the other characters' dreams of perpetual happiness—just as the Cavalier setting, evocative of Caroline extravagance and Puritan denial, hinted that history, in due course, would bring in its revenges.
As directed by Hall—and as played by Cyril Luckham and later Max Adrian—Feste was unusually astringent. This was a "dry fool" rather than a melancholy weeper, a man who knew too much and who shared his secrets only in oblique jests and songs. Hall described him as

bitter, insecure, singing the old half-forgotten songs to the Duke . . . his jokes now tarnished and not very successful. He is the creation of a professional entertainer, and we may perhaps relate him to John Osborne's Archie Rice, or to that fearful misanthropy which overtakes most comics when they begin to despise their audiences. He is suffered by all, and liked by few. He is the most perceptive and formidable character in the play.23

Hall detected behind the jokes and the impostures an idealist embittered by experience, a loner made sharply conscious of human folly by the sting of his own failures: "Feste is the critical centre of the play, the Thersites, the Jacques without eloquence, the malcontent, the man who sees all and says little, the cynic. It takes an idealist to be such a cynic."24

The performance began with a theatrical metaphor for Feste's role as go-between: not only in the sense that he makes the rounds of all the unwitting fools residing in Illyria, but also in that he serves as mediator between the real-life audience and the illusions of the stage. When the audience entered the theatre, the stage was screened by a gauze drop-curtain showing the image of a fool wearing an ass-eared cap and holding his bauble. A silvery nimbus shimmered around this central figure, about which could be seen the faces of the other characters, faintly touched by his radiance. Then a spotlight illuminated the image until, as music sounded, the stage lights came up—making the gauze transparent—to reveal Orsino luxuriating in his melancholy in the company of his retainers.

Gauzes were used throughout the performance, along with lighting effects, to give Illyria the atmosphere of "a country of dream that, at the last, melts again into dream."25 Through this mirage world, richly colored in earth tints reminiscent of Rembrandt and Van Dyck, the characters played out their fantasies, wryly observed by Feste, who alone seemed to know that "Youth's a stuff will not endure."

This was a world in which comedy and romance were inextricably mixed, where the clowns had their moments of dignity and the Countess was "a coquetish poseuse who seemed to have escaped from a columbarium for slightly cracked doves."26 But it was also one in which the mirth, however zestful, was always on the brink of dissipating, and the lyricism, however lovely, of falling into decadence. The other players, rapt in their dreams of living "happily ever after," might ignore the hints of mortality in store, but Feste was there to remind the audience with a bemused shake of his head at Sir Toby's and Sir Andrew's idiocies, a caustic poke at Orsino's fickleness, or a flash of triumph at Malvolio's humiliation. His first scene (I.v) intimated that the snubbed jester was all too sensible of "infirmity that decays the wise," as when he turned away at Malvolio's taunt that his skills were failing, and again when word of the young messenger drew Olivia's attention away from him. Later on, finding himself accosted by the new favorite of both lord and lady (III.i), Feste treated Cesario with studied indifference. Distance from his "fellows"—whether real or feigned—was also implicit in the ending given the midnight party (II.iii) to close the First Act. Once Maria began to hatch the plot against the peevish steward, the fool apparently slumbered until, as the pranksters crept out, he raised his head and gazed thoughtfully after them. A more acid humor sometimes entered into his reactions. For example, Orsino's failure to applaud his song added bite to the warning that "pleasure will be paid, one time or another" (II.vi); and his mock inquisition of Malvolio (IV.ii) was deliberately harsh, capped by the fool dancing on the trapdoor above the "madman."27 Such antics also exposed the human frail-ties of this disillusioned seer. Isolated from the rest of the characters by his bitterness no less than his prescience, Feste drifted through Illyria, a companion to all, but an intimate to none.

At the same time, other aspects of the production—its visual beauty and rich coloring, its inventive humor, and its lyrical moments—gave romantic love and all the other temptations of the flesh a compelling charm.
The audience was left with the thought that to be the possessor of tragic wisdom, especially within the milieu of romantic comedy, might be a terrible burden. This reminder was poignantly enacted in the play's conclusion, eloquently described here by Roy Walker:

. . . the play ended as it began, with music, all the romantic and comic characters, except Malvolio, dancing together in a golden distance behind a gauze curtain in love's now triumphant harmony, with Feste . . . seated on the fore-stage in the gathering dusk, sadly remembering how the world began. Now it was their light that just touched his figure, forlorn at the thought that there was no more for him to do in this world. Even a god who plays the wise fool may be left lonely at the dance of human love.

With this ending the opening sequence was now reversed. The audience, having been drawn through Feste's agency into the illusory world of Twelfth Night, were at last thrust back out of the golden dreamworld into the reality of "the wind and the rain," still accompanied by their guide, the sadly privileged fool.

III

These three productions—the Guthrie, the Benthall, and the Hall—consolidated Feste's position both as the messenger for Twelfth Night's darker tonalities and as a keystone to its dramatic structure. In particular, Guthrie's and Hall's versions have had profound effects on subsequent interpreters, sometimes to the point where the plaintive undertones these two directors tried to sound have usurped the melody. Surveying the Twelfth Nights staged since 1960, on both sides of the Atlantic, one uncovers a host of eccentric, heartsick, grouchy, and decaying Festes. The novelty has by now become the convention, even a worn cliché.

At Ontario, Guthrie's precedent has been adopted in several variations by his successors. Eric Christmas, under David Williams's direction in 1966, was made the eldest member of an otherwise youthful and perky cast, appearing to a visiting critic from The New York Times (10 June) "as an oldster . . . who putters about like a damp rustic wit in an Illyrian country-store." He was "as careworn and philosophic a clown," said The Toronto Globe and Mail (9 June), "as the fashion warrants, which is considerable in these gloomy times." A more austere impression of a man at odds with the world, and dissatisfied with fooling, was given, in David Jones's 1975 revival, by "Tom Kneebone's harsh and metallic clown, burnished by wit, but unhappy. This was a tough professional Feste, his eyes quizzical and disenchanted, his distaste for his fellow men beginning with himself." By 1980 Feste had mellowed considerably. Robin Phillips's elegant Georgian Twelfth Night had no need of a cranky malcontent to dispel its already low-keyed mirth. Instead, William Hutt portrayed "a warm-hearted retainer who . . . shuffles about in comfortable slippers" (Southern News, 10 June 1980), a wise old fool domesticated to a well-fed and affluent household and in no hurry to venture out into the wind and the rain. Ready to share a companionable chat with Olivia, to indulge Orsino's affectations, or to give a rueful shrug for Malvolio, this Feste injected a compassionate tolerance into the vicissitudes of Illyrian fortunes. There was no mockery of the sentiment in his songs. Rather he moved his listeners with heartfelt pleasure. At the end, the others passed out of view while Feste sang his sad, sweet tune, until he alone was left on stage.

Much of the edge was lost in this characterization—indeed, some critics found the production as a whole overly genteel—but in compensation Feste gained a heart for sorrows other than his own.

Meanwhile, the traditional happy-go-lucky fool has proved remarkably hardy in America, where he still often surfaces in regional productions of the comedy. But the modern diagnosis that he suffers from ennui, complicated by mid-life syndrome, has attracted some notable converts. Morris Carnovsky, a tragedian of solid credentials, played "a grey and seedy Feste" (New York Herald Tribune, 9 June 1960) at Stratford, Connecticut in 1960. "Tradition having given us a lineage of youthful, prancing, gay fools," Claire McGlinchee commented, "it was difficult to adjust to Morris Carnovsky's interpretation of Feste as a kind of lamenting Deor" even though he acted it with characteristic skill. A less gracious critic dismissed this gloomy fool as "a broken-down, seamed and moss-hung jester, a creaking wit . . . on his last legs" (The
Morning Telegraph, 10 June). One severe disadvantage to the actor attempting this pensive mode for Feste was that he was plopped down in a gimmicky production set à la H.M.S. Pinafore in a Regency seaside resort.

Such incongruity has its drawbacks, as does the alternative extreme of muting the contrast between saturnalia and sobriety. When Ellis Rabb staged the play at Lincoln Center in 1972, Feste (George Pentecost) was again a sad-faced clown "happier commiserating with himself in song than he is in his profession of fooling" (The Saturday Review, 25 March 1972); but this time he resided in an Illyria geared to the sadder aspects of the comedy. Set on a vast stage swathed in midnight-blue, with exotic "Arabian Nights" props and costumes, the performance afforded enough visual beauty to lull many critics. Walter Kerr, however, who had so admired Tyrone Guthrie's fusion of "sad and merry madness," complained that Rabb and his actors had overplayed the heartache (New York Times, 12 March):

Feste has always been a faintly weary clown, uncertain that his muse will sustain him through another bout of wordplay, and Feste's mood, as much as anyone's, lurks behind the prankish deceptions of the evening. But that is an undertone, one that can be beautifully exploited so long as it has a grinning surface to mock. Mr. Rabb has made it the whole tone, almost as though the company were singing a requiem for a comedy recently dead.

Kerr's remarks point up a weakness in the modern penchant for brooding Festes. When the hints of mortality and temporal urgency that give resonance to Twelfth Night's celebration of life are diffused throughout, the fool's deft reminders of time's exigencies are apt to become an insistent blare. Then the comedy itself, rather than shimmering with light and shadow, will turn enervating—as it did in the 1974 American Shakespeare Theatre production. Commemorated as the "underwater" Twelfth Night for its aquarium-like setting as well as its listless style, this production culminated in an anagnorisis full of "aching pauses between beats, unnecessary exits that left the lonely principals trying to be cheery in a void, and a visible draining of energy from the actors."32 Feste was a glum hanger-on, singing dirges to his fellow mopers. And in case anyone missed the point that Malvolio was "most notoriously abused," in the prison scene the poor man was strapped down under a spotlight while his inquisitor grilled him from the shadows.

A more playful mood was struck the same year at the Oregon Shakespeare Festival in Ashland. There Feste (Jeff Brooks) was restored to his tenure as humorist, and his presiding role as Master of the Revels was given a clever twist:

Feste walked through the play like a stage manager. He oversaw Viola's landing in Illyria. The lighting obeyed the gestures of his hand. In short, he transcended reality and heightened the comic spirit of make-believe.33

Viola's affinity with the fool who wears no motley in his brain was signalled by allowing her to learn the same trick, while for his antagonist, Malvolio, "the lights were less obliging." Though potentially hokey, this method was an imaginative way of evincing Feste's centrality; and by allowing him to be genuinely amusing, the director (Jim Edmondson) kept the pacing nimble and the lessons diverting. Less happily, Feste's role was enhanced in Gerald Freeman's 1978 American Shakespeare Theatre Twelfth Night by subsuming Fabian's lines into the fool's part. Worse yet, in 1980 the jester's deadpan wit was trivialized by rigging him out as a chino-clad, Kool-smoking leftover from "a Bing-Crosby-as-middle-aged-frosh movie" (The Village Voice, 17 December 1980) in David Mamet's campy rendition with New York's Circle Repertory.

The vogue for world-weary Festes has spread as far afield as Paris—where Jean Anouilh cast him as "sad and obsequious, like the romanticized Pierrot," in a mannered 1961 production —and Stockholm, where Ingmar Bergman staged a headily erotic Twelfth Night (1975) watched over by a timeworn Feste. The Swedish production impressed a visiting American critic as a more robust version of Bergman's own Smiles of a Summer Night, with the choric office of Madame Armfeldt, "that wise old woman who stands outside love's
mysteries and comments on them," given to Feste and Fabian, here played as two canny old family retainers for whom "love is only a faded memory."^35

But of all the places where Twelfth Night holds the stage, the bittersweet mode has been most persistent in Britain, where Hall's example and the Guthrie/Guinness Old Vic legacy have substantially recast the older notion of Feste. This is less true of amateur players, who often remain faithful to the tradition of flippanit wits, but even so there are exceptions. One semiprofessional case was Jonathan Miller's staging for the Oxford and Cambridge Shakespeare Company (1969). Vowing to dispense with "the capering ninnies of convention," the director promised instead "a clapped out clown with a bottle nose who knows he is scraping the bottom of the barrel to make his lady laugh."^36 The resulting gruff, acerbic fool was de-scribed, with less enthusiasm, by Sprague and Trewin (p. 131n.) as "a vinegary and unmusical hack." Perhaps the best symbol for the resilience of the weather-beaten Feste in the English theatre was Robert Eddison's reprise of his sad-gay fool for the Old Vic in 1978, thirty years after he had undertaken the role at the same house. If his nostalgia for better days, his threadbare outfit, and his forlorn visage gave Eddison something of the look of a retired flower child, this was still a memorable Feste: beautifully spoken and gallant in the face of sorrow.

But then he had some need of gallantry, since the fool, in this sometimes overblown production, was so achingly conscious of his own mortality. A typical instance came when, stricken by Olivia's gentle reproach—"Now you do see, sir, how your fooling grows old, and people dislike it?"—he buried his head sadly in her lap. For B. A. Young this was "a magical moment."^37 Yet, though truly affecting, it was also as hopelessly sentimental as any of the touching moments for Viola, or tormented histrionics for Malvolio, that the actor-managers had once devised. Unless Feste takes his own heartaches, as much as his pleasures, with a grain of salt, he is apt to turn maudlin. Just as important, his license to puncture the egocentric follies of others—like Justice Overdo's warrant or Gregers Werle's summons to the ideal—will be thrown in doubt if his own frailties are too much in view. Eddison's acting skill made Feste's troubles genuinely moving, in this case, but the voice of doom did rumble a bit naggingly. As well as demonstrating the tenacity of the sorrowful Feste in the theatre, this incarnation warned how easily he might slip into decadence.

IV

Nowhere has the serious interpretation of Twelfth Night made a deeper imprint than at Stratford's Royal Shakespeare Theatre. This is only natural in a company so responsive—in terms both of influence and reaction—to its own traditions; and Peter Hall's production was outstanding. It was also one that aged exceptionally well in memory. Despite the doubts about Hall's methods and intentions voiced in notices at the time, subsequent allusions reveal how durably this Twelfth Night stood as a measure for alternative visions. Of course, many aspects of Hall's interpretation—including his vision of Feste—were challenged, or else modified, by other RSC directors. Yet Stratford's Feste, although he has come in varying shapes and sizes, has kept with remarkable constancy both his ironic perspective on the masquerade at hand and his fund of privileged knowledge. C. L. Barber, writing at about the same time that Hall directed Twelfth Night, surmised that Feste "has been over the garden wall into some such world as the Vienna of Measure for Measure."^38 And we might say that at Stratford he has remained a traveller still, bringing back to Illyria memories from less happy realms beyond its borders.

This was true even in the 1966 production directed by Clifford Williams, which marked the sharpest break with the modern accent on the comedy's darker colors. As demonstrated through the plentiful allusions to carnival and saturnalia splashed across the playbill pages, the 1966 interpretation was a deliberate reversal of Hall's seriocomic approach. Played as a high comedy romp "firmly steeled against pathos and poetry" (The Times, 17 June 1966), Williams's Twelfth Night demoted Feste, acted by Norman Rodway, from the key spot Hall had granted him back to the supporting ranks. He remained, nevertheless, an aloof and unfunny fool "with more of dark, brittle realism than wistful charm" (The Glasgow Herald, 18 June). Curiously, even in a production as determinedly vivacious as this one, Feste sustained his air of knowing more than anyone else,
and of finding in such intuitions some cause for bitterness or sorrow. This was a trait, here only roughly sketched, that the next three productions would delineate in richer detail.

Feste was once again a major figure in John Barton's 1969 *Twelfth Night* (revived at the Aldwych in 1970 with several cast changes), one of the finest of the RSC versions. Intelligently and beautifully staged, this *Twelfth Night* was widely admired for its imagination and sensitive emotional shadings. Among its many virtues was the strength of the ensemble. The characters were fleshed-out, complex personalities, defined in good measure by the relationships—past and present, actual and desired—that joined them: "Mostly, the production simply explores the half-stated relationships and crannies of the play, loading them with feeling, . . . . Everyone is connected to everyone else, with a sympathy which never confuses sentiment with the sentimentality that is the subject of the comedy" (*The Observer*, 24 August 1969). No single character, therefore, dominated the stage; but the knowing fool did much to set the tone, one of grave lyricism and of laughter shot through with sadness.

According to Robert Speaight, Feste "was quietly in command—seeing everything and through everything, and singing with delicate accomplishment about many of the things he saw." Emrys James played him as a wryly compassionate fool, whose experience had earned him wisdom but not bitterness. A white-haired clown long in service to the family, he treated Olivia with affectionate concern and joked familiarly with her uncle. To Maria, who longed to marry the reluctant Toby, he gave quiet sympathy, and a smile to the ever-hopeful, though ever-thwarted, Sir Andrew. As a musician he was a welcome visitor to Orsino's court. Yet he remained detached, never forgetting his status as hired entertainer. Only with Viola, another independent spirit, did he find a momentary kinship when, in their brief interlude, "cross-talk gives way to music and unspoken communication, as the two characters sprawl out together ruefully surveying the human scene from some other plane" (*The Times*, 22 August 1969). Playing against the wrangling notes in this wit-contest, the actors brought out a shared understanding and respect between these two who play with words, just as they juggle roles, without losing their balance. It was even intimated that he had seen through her disguise when the fool crossed to her "as if [he] realized who [she] is" on the line "Who you are and what you would are out of my welkin." But more even than Viola, who at last joins the charmed circle of lovers insulated from loss or care, Feste was attuned to the hard realities of life, especially the sad fact that "Youth's a stuff will not endure." Awareness of time, which brings to a close all lovely things—youth, beauty, pleasure, even the play itself—was his special wisdom; and this gave the fool a crucial role in a production deeply concerned with the passing of time. From the reminders of transience and decay that sound in the lines, to the sundial upon the stage, time was felt as the untangling power that brought fulfillment to some, disillusionment to others, but irreversible change to all. Anne Barton, in the program note she wrote for the production, related the antics and revelry, sometimes bordering on madness, to the topsy-turvy holiday of Twelfth Night—but she emphasized that celebration must have an end. For a privileged few in Illyria the dream is left unbroken ("Viola and Orsino, Olivia and Sebastian remain, by the special dispensation of art, in a romance world that never falters"), but the others must face the "cold light of day." As the audience faces its own "jolt into reality," its guide is Feste:

> Left alone on the stage, Feste sings his song about the ages of man. . . . The reality of wind and rain wins out, the monotony of everyday. The passing of time is painful, may even seem unendurable, but there is nothing for it but resignation, the wise acceptance of the Fool. All holidays come to an end. All revels wind down at last. Only in the theatre can some people be left in Illyria.

These were truths the fool had known all along. One way that this was pointed in performance was to have Feste give snatches of his songs from time to time as counterpoint to the dialogue. He made his first entrance whistling "Hey, Robin, jolly Robin"—the song of fickle love he later sings as he nears the confined steward—and he repeated the same tune in other scenes. For that more poignant lament of unsatisfied desire,
"Come away, death," Feste had underlined the oblique parody of Orsino's melancholy by caricaturing a heart-sick lover—languidly circling the duke and pressing a hand to his brow—as he sang the second verse; later on, he hummed it again as Olivia pressed her favors on Cesario. Most telling, though, were the reprises of "O mistress mine." At the end of the revels scene, Maria returned and tried to lead Sir Toby off. When he resisted ("Tis too late to go to bed now") and left her, Sir Andrew kissed her hand and Feste closed the scene with a pensive strain of "Youth's a stuff will not endure." He sang the same words to point another touching moment, when outside Malvolio's cell a subdued Sir Toby slipped his ring onto Maria's finger and said, "Come by and by to my chamber." 

These last two instances of invented business exemplify the pensive tinge Barton gave to the comedy's intimations of mortality. In his detailed account of the staging in *Royal Shakespeare*, Stanley Wells described how sensitively Barton integrated humor with the pathos. Still, he conceded that in such wistful moments the director "was reducing the spectrum," employing effects that were masterly but that "deprived the play of some of its brighter colors." Many reviewers noted this rueful undertone. The critic for *The Daily Telegraph* (22 August 1969) judged that "what has interested John Barton in directing this revival is the melancholy that hangs over a play festive in spirit but concerned with people who misuse time, [who are] sadly deceived themselves and [are] deceived in each other." Others wrote of "the muted gold [light] of a winter garden" and of "the autumnal, sea-wrecked emotion which surged through" the play.

This plangent strain was not, it should be emphasized, the sole mood expressed. Barton himself stated that his object was to do justice to the play's complexity: "The text contains an enormous range of emotions and moods and most productions seem to select one—farce or bitterness or romance—and emphasize it throughout. I wanted to sound all the notes that are there" (*Plays and Players*, November 1969). Like Hall before him, Barton sought to harmonize the elements of comedy and romance, of present delight and the regretful hints that "what's to come is still unsure," but without making the swings of feeling too broad. Still, the bittersweet nuances were felt. In an interview given a few years after directing *Twelfth Night*, Barton described Shakespeare's attitude in this play as "on the whole wry, tolerant and accepting," but with a "very conscious split between the 'happy-ever-after' world of romantic comedy and his sense of what life and people are really like." His staging concentrated on the yearnings for satisfaction and security the characters all feel, but with the full knowledge that as many fantasies are shattered as are fulfilled, as many friendships damaged as upheld, as many courtships brought to nothing as to marriage. Sir Andrew carried with him a little bunch of golden primroses to give Olivia until he heard, to his dismay, that she detested anything yellow; Sir Toby spurned Sir Andrew's well-meant assistance, at the end, with "wintry" contempt; Antonio was left alone onstage, after the lovers had swept off, to make a solitary exit; and throughout the performance the distant sound of gulls and the restless sea reminded the audience of a reality circumscribing the Illyrian dreamworld. Even Sebastian's trust that Olivia's proposal was a happy stroke of fortune and not some lunacy was given an ironic cast by punctuating his reverie with the offstage cries of the confined "madman." Malvolio.

One notices, too, in looking through the reviews, how often this reflective sadness was associated with Feste. *The Times*, for example, recalled the original production as "Feste's Twelfth Night: a shifting perspective of romantic ardour and romantic folly seen through the eyes of the Fool against an ever present sense of the effects of time" (7 August 1970). "Emrys James's exquisite Feste sets the tone," stated *The Daily Telegraph* (22 August 1969): "This courtly jester . . . brings a Watteau-like dreaminess . . . to the very air we breathe in Illyria." In his lyrics and his word-games Feste reminds us of the rules that festive comedy can only temporarily suspend, but without the rancor or self-importance of a killjoy like Malvolio. And as James played him, the fool's perspective closely resembled the one Barton ascribed to his creator: realistic but "on the whole wry, tolerant and accepting." So it is not surprising that Feste seemed, to some viewers, to be at the play's heart, especially given his involvement with its deep concerns. The limits of fellowship, the problems of love, the fine line separating wisdom from folly or imagination from madness, the inconstancy of words and people, and the confounding of identity endemic to a world of quick-change artists—all these are spoken of or
acted out by Feste. In licensing the fool as his truth-teller, Barton followed Hall. But he replaced the earlier embittered veteran with a more resilient, more forbearing clown. What Stanley Wells underlined, in summing up his memories of Barton's Twelfth Night, was its "beauty of communication, of sympathy, understanding, and compassion. It had a Chekhovian quality. . . . Shot through with sadness though the production was, its ultimate effect was a happy one." 48 The Feste was very much in keeping with this generosity. Some sharpness was lost and some brightness muted, but the acceptance of frailty and mutability that infuses this last festive comedy was shown without breaking its harmonies or transforming it into a problem play.

Some dissonance, of course, is often wanted in the modern theatre. That vein of bitterness in the fool's utterances was by no means mined out yet. If Cyril Luckham and later Max Adrian, under Hall's direction, had portrayed Feste as a worn-out entertainer in the mold of Osborne's Archie Rice, then Ron Pember—in Peter Gill's 1974 Twelfth Night—carried this idea one step further with his "savage, sardonic teeth-bearing Feste rasping out his songs as if it were 'The Three Penny Opera'" (The Guardian, 23 August 1974). This "unshaven malcontent" (The Times, 23 August) brimmed with contempt for his listeners—and for himself, no less, for pandering to them. Interestingly, whereas prelapsarian Twelfth Nights had often glossed over Feste's money-grubbing, by compressing the dialogue or tossing it off lightly, this production made much of these episodes, thereby underlining both the entertainer's dependence on his audience and his disdain for their limitations. Gill encapsulated this ambivalence, for example, when Sir Toby casually tossed a coin to Feste in anticipation of some music and then Sir Andrew held up his own small offering—which Feste promptly took out of his hand. He delivered the song ("O mistress mine") directly to the audience while the two knights sat at their cups behind him. His stance and gritty voice conveyed that even if the onstage celebrants were too rapt in the present to bother with "what's to come," he knew full well their bills were coming due—and that the listeners out front should heed his meaning and not just wallow in the sentiment. Similarly, his attitude toward Orsino, even as he palmed his fee for a fine lyric or a well-turned jest, was daringly caustic—the more so because his noble auditor so clearly missed the ironic applications to his own foibles; and his encounter with Cesario in Act III stressed the abrasive undertones to their exchange. 49

Feste's isolation from his employers—and his cronies—was sociological no less than aesthetic. Peter Thomson incisively described this fallen but still testy class-warrior:

"Ron Pember spoke like a Londoner, dressed like a faded Harlequin now reduced to busking, and hinted always at a radical's distaste for the antics of privilege. He despised the effeminacy of Orsino's court, and his angry assumption that Viola considered him a beggar had all the spikiness of class pride. . . . He was a working man among the leisured classes, deeply critical of their behavior and bitterly dissatisfied with his own." 50

In an illuminating aside, Thomson reported that another member of the audience had compared this fool "with Bosola, another joker who declines to laugh at his own jokes." That to these viewers Feste resembled Webster's grimly sardonic outsider is a helpful gloss on Pember's acting. But that both critic and ordinary playgoer so casually accepted a kinsman to Bosola (however distantly related) as a lawful citizen of Illyria is an even more revealing sign of the preconceptions brought to a modern staging of Twelfth Night. Some reviewers found Pember's saturnine loner a bit eccentric—just as others thought the interpretation brashly original—but few dismissed him as a strange aberration in a festive comedy.

True, Pember's hard-boiled Feste gave a needed edge to an Illyria surfeiting on narcissism and sexual desire. His bitter dependence on patrons and their coins brought to new light all those other reminders of the economic realities that underpin holiday and romance: Orsino's "great estate" and Olivia's "quantity of dirty lands"; his counted-out "bounty" and her "inventoried charms"; Sir Toby sponging off Sir Andrew till the overextended pigeon "hadst need send for more money"; Malvolio dreaming of "some rich jewel" as he idly fondles his chain of office; Antonio's unlucky purse; Maria's "dowry" and Sir Toby's reluctant "recompense"; and all the many warnings that the piper must be paid, "one time or another."
The fool's unconvivial temperament also revealed an unexpected resemblance to another servant in the household: the steward Malvolio. In some ways, Feste was no less a "puritan" than his antagonist. He viewed the daily Illyrian carnival with the same disdainful glance Malvolio gave the impromptu late-night party. He set as high a value on his own opinions as the smug steward, even if they were formed by a keener intelligence. He was sensitive to class differences and monetary considerations. And he set himself apart from his fellows with equal insistence. Such a reading perhaps lays undue emphasis on connections that should only be hinted at. But Illyria is indeed a land where human beings are all mirrors to each other, casting back reflections—whether identical, reversed, or absurdly distorted—that most fail to recognize as images of themselves, so we should expect some correspondences between two fools. Nonetheless, linking Feste with Malvolio, like comparing him with Bosola, is an idea only modern audiences would countenance. The irony implicit in seeing Feste as an "ill-wisher" is simply more than we can resist. Today the expectation that every silver lining must have its cloud is so strong that an out-of-sorts or even downright grumpy Feste comes as no surprise to us.

Nor are we likely to be startled when Feste's role is built up, any more than erstwhile audiences were overly dismayed when he was shoved into the wings so that Malvolio or Viola or Sir Toby could reign undisturbed. A case in point was Terry Hands's direction of Twelfth Night for the RSC in 1979, with Geoffrey Hutchings as Feste. The best word for this fool was "ubiquitous." Onstage virtually every moment, Feste observed the other characters act out their fantasies—or meet their rude awakenings—from the sidelines, whenever he was not involved in the action. From the first minute of the performance, when a hooded figure (shortly revealed, minus cucullum, as the fool) piped the notes that so engrossed the lovelorn duke, to the last strummed chords of the epilogue song, Feste was at hand: sometimes watching from the margins of the stage, or closer by, behind a box-tree, sometimes eyeing his own onlookers as he sang or joked for them, and sometimes catching a word or gesture his companions were too fatuous or self-absorbed to mark—but always poised not to miss a thing worth noting. The possibilities for tongue-in-cheek dramatic irony, with this framework imposed, were naturally many. Since Feste had witnessed her arrival, Viola's disguise was occasion for wry glances rather than confusion; and his inside-track gave his encounter with Sebastian (IV.i) an almost farcical twist. As Roger Warren noted:

"Your name is not Master Cesario; nor this is not my nose neither" had to be made to mean the reverse of what it in fact does mean, to the extent of Feste actually removing a false nose to emphasize knowingly that "nothing is so that is so."

Feste's spying also gave him a ringside seat for Malvolio's reactions to the letter and his cross-gartered transformation—scenes from which the fool is textually excluded—so that his amused scrutiny added another circle of awareness to the side-show in motion, enveloping both the gullers and the gull.

In the later version of the staging, Feste even helped to dress the set. The scene throughout was an orchard of several trees planted in box-tubs. At the outset the landscape was wintry and bare, a bleak mirror to the men and women who ventured there, but as the sap began to rise in these repressed, barren, or somehow thwarted creatures, daffodils began to bloom in the tubs—each one planted by Feste, as the signs of warmth, release, and new growth appeared. Several marked the vows of heartfelt love soon proliferating; still more the late-night festivities and the deepening rapport between Viola and Orsino; and more yet Malvolio's headlong plunge into romance. By the time the steward reappeared, after the interval, decked out in yellow stockings, the trees had sprouted new leaves, more daffodils had flowered, and the midwinter chill had warmed into sunshine. The stagehands, of course, produced the greater miracle, but the fool's small plantings led the way into springtime.

The direction of the role was, in some ways, an extension of Hall's idea of the fool's centrality, but softened by the more generous tone set by Barton. As before, Feste was a penetrating clown who knew more of the truth than anyone else, although in this case he was inclined to smile at what he had discerned. And once again he
served as a kind of presenter, a mediator stationed midway between his fellow players and the spectators beyond the stage, but this time as a "showman" of another sort—not so much flagging entertainer as note-taking impresario. To Gareth Lloyd Evans he even seemed in charge of orchestrating the story: "He is on stage virtually all the time, not as the usual wry observer but as a kind of conductor of the action. You feel they dance to his tune, and he dispenses destiny."55

What saved this directorial imposition from heavy-handedness was, in large measure, Geoffrey Hutchings's self-effacing Feste. A small and quirky fellow, with a gnomish face that peered out of faded patchwork, his fascinated interest in the antics and revelations going on before him was seldom obtrusive, and he kept a light touch in his meetings with the other characters. Well aware of his own role-playing, he could smile at the poses that so absorbed the pretenders in his company—as when he snatched away Olivia's veil to show the girlish mirth hidden by her affected mourning or when, in the final scene, he maneuvered Orsino and Viola closer together56—but he kept his own secrets to himself. As a fool who had learned to live without illusions, he watched the human comedy spin itself out before his bemused eyes, relishing its ironies and accepting its pangs with equal humor. When at the last he sang of life's vicissitudes, a pensive tableau was formed around him: behind him, the quartet of lovers drifting slowly upstage, and off to the sides, sitting under the trees, those chastened by experience—"the wounded Aguecheek, head in hands, the isolated Antonio, and the sobered Maria and Toby, separated and facing away from each other."57

V

In his staging, Terry Hands carried to its practical limits the modern image of Feste as critic and chorus: the knowing observer who stands somewhere between the illusory fools upon the stage and their counterparts in the audience. Such an emphasis on Feste, like the ground bass of sadness that so often accompanies it, is a reflection of our time, our mind-set. Isolation, problems of identity, and broken dreams pervade modern drama. Similarly, Shakespearean performers gravitate toward the uncertainties and the hints of disturbance ingrained in even the brightest of his plays. Illyria has turned to an unstable world where the enigmatic Feste reigns as master of the revels winding down. Sometimes the fool's ubiquity or his weary wisdom can become mere tricks of habit. Yet, if done intelligently, serious treatment of Feste can still yield stimulating results.

The versions staged by the Royal Shakespeare Company exemplify the modern tradition's potential richness. These Festses, whatever their imperfections, are imaginative enough to transcend convention. His traits remain fairly constant. He is usually an aging fool, unattached but alert to what goes on. Whether cynical or compassionate, he is deeply conscious of infirmity—in himself and others—and of mutability. He is a role-player who keeps his own mask in place, and at the same time a spectator able to see through others' charades. He is a paid entertainer, something of a misfit, and a realist. Yet within the basic formula Stratford actors and directors have ingeniously given new dimensions to the role. The familiar convention is thus revitalized. Moreover, the company's ensemble skills promote strong casting and encourage the actors to test out new balances, new tensions in the relationships they create.

Conversely, some of the examples I have shown illustrate the less attractive features of the jester's modern stage identity. Too-sad Festses can turn maudlin, thereby blunting the comedy. Hack Festses make bad entertainers. Fools whose thoughts have soured or whose failings are too obvious cannot make convincing ironists, and dreary ones are worse. Gimmicky productions trivialize the fool's wisdom. Criticism-conscious productions puff him up unduly. Lastly, monotone productions that take their cue entirely from Feste's saddest utterances, or farcical versions weighed down with a malcontent clown, too often blast the comedy's delicate harmonies.

These are dangers even the finest directors must skirt with some care. A Peter Hall or Tyrone Guthrie may "do it with a better grace," but if carried too far the bittersweetness will turn to Jan Kott's desolate perception that fools like "Feste and Touchstone are not clowns any more; their jokes have ceased to be funny. . . . They live
in a bare world, bereft of myths, reduced to knowledge without illusions."  

No doubt, somewhere, *Twelfth Night* has been or will be played in such a barren lunar landscape—with an unsmiling clown in the foreground—but this is no less a distortion than the winsome, laugh-strewn versions once popular. *Twelfth Night* celebrates life and heartfelt emotion. The reminders that such things are fleeting, sometimes elusive, even riddled with absurdity, may pierce us. But the poignance is meant to endorse life's value, not deny it. Feste may stand at the garden gates, ready to usher us out of the sheltered world of romantic comedy, but he must not be exiled from its precincts. A Feste without sympathy for love and the good life, however keen his sense of their caprices, cannot open our eyes to that fuller vision of earthly life.

The whirligig of time brings in its revenges as surely in the theatre as in any other human sphere, so we should expect future transformations in Feste. But the odds are that those changes will not be too radical so long as we keep the perceptions and the biases our century has nurtured. Feste has long been seen as a professional entertainer, a shrewd wit, a loner with few, if any, attachments of affection. What has intensified is our sense that he is entrapped, or at the very least defined, by his role—a hired clown who sports his mask because it is the only sanctioned outlet for his insights. His self-containment is now a sign of alienation; his knowledge of human nature the hard-earned wisdom of a social misfit. At best he wins some freedom by hiding his "real" behind his pretended face, but this is necessarily a limited release.

Such problems of identity are a longstanding preoccupation of the modern theatre. From Pirandello's mind-games and Beckett's mock rituals through Sam Shepard's image-locked rock stars and would-be desperadoes, modern playwrights have wrestled with the actor's relationship to his role. Feste's awareness of his roleplaying and the limits it imposes is therefore very much in keeping with our cultural milieu. His pessimism is no less an expression of the times. If romantic aspirations have not been completely extinguished in our drama, they have been searchingly, often achingly, questioned. Our archetypal clowns are Samuel Beckett's Vladimir and Estragon, doing their vaudeville turns to the echoes of "all the dead voices." Feste may be more sophisticated than these poor tramps, but his fooling, too, makes us doubt the promises of happy endings, makes us remember that "the rain it raineth every day." Whether he takes the form of a disenchanted joker or a dreamer gone to seed, Feste tells us that Twelfth Night, the last night of the Christmas season, marks the end to feasting. Even when a warmhearted mood is set, granting holiday and love their pleasures, he sees beyond the passing moment. That blend of irony and compassion in John Barton's *Twelfth Night* that generated instants when "Shakespeare touches hands with Chekhov" (*The Times*, 22 August 1969) owed much to the presence of Feste, the wise observer of human folly.

Today a major *Twelfth Night* without a worthy fool would be unthinkable. This honor has a license from no less an authority than Sir Arthur Quiller-Couch, who over fifty years ago affirmed: "We must hold and insist on holding Feste, Master of the Revels, to be the master-mind and controller of *Twelfth Night*, its comic spirit and president."  

Viola may still win our hearts. Malvolio may grandstand all he pleases. The lovers and the merrymakers may take their turns as well. But the wily jester, inscrutable to the last, remains our chosen guide—deftly pointing our way through the comic maze and calling us back, at the end, to the waiting world outside the theatre's walls.

**Notes**

1 This article focuses on Feste's theatrical metamorphosis; but, as most readers will be aware, much of the same process has taken place in the criticism. As scholarly interpreters (like their theatrical counterparts) have stressed the play's darker, more ironic tones, they have more and more looked to Feste as its key. For anyone interested in comparing Feste's critical image with the stage version shown here, the following studies are representative: C. L. Barber, *Shakespeare's Festive Comedy* (Princeton: Princeton Univ. Press, 1959); Anne

See Hugh Hunt, *Old Vic Prefaces: Shakespeare and the Producer* (London: Routledge and Kegan Paul, 1954), pp. 70-72, 76-79. Hunt ascribed a personal bitterness to Feste's last song, in which the discredited fool acknowledges that "not only has he lost his place, but his successor has probably already been found" (p. 78).

23 Folio Society edition, p. 5. Clifford Leech draws a similar analogy, but without Hall's emphasis on Feste's bitter cynicism, when he notes that Feste "has amused us, and enriched our transient Illyria, but will not let us go without claiming a common humanity with us. He is a player as well as an imaginary character: we can meet him outside the theatre when the performance is over, and the life-conditions that we know belong to him too. He has a descendant in the Archie Rice of John Osborne's *The Entertainer*, who ended the play by asking us to let him know where we were working tomorrow: he was ready to exchange roles and to come and watch us" (*Twelfth Night and Shakespearian Comedy*, p. 54).

24 Folio Society edition, pp. 5-6. Surprisingly, the only sizable cuts in the text were made in Feste's scenes (the mock indictment of wordplay in III.i [11. 11-25] and about thirty lines from the prison scene [IV.ii]). Apparently most of these lines were restored, however, in the later version (Peter Hall's promptbooks for *Twelfth Night* [1958 and 1960], The Shakespeare Centre Library).

27 Peter Hall's promptbook for *Twelfth Night* (1958), Shattuck, TN, No. 98, Shakespeare Centre Library. Hall remarks in his Introduction to the Folio Society edition that Feste "cruelly tortures the imprisoned Malvolio" (p. 5), and his speculation that the fool might have been a failed priest (p. 6) may help explain the caustic treatment of the Sir Topas scene in his staging. According to a review of the 1960 revival in *The Evening News* (18 May 1960), Feste—epitomized as an "ageing clown . . . endlessly cracking his stale jokes in a desperate attempt to win brief smiles"—took "a terrible revenge on Malvolio" in the prison scene and danced
"a savage saraband" over his enemy.

**Twelfth Night Literary Criticism (Vol. 46): Characterization**

**Richard A. Levin (essay date 1979)**

[In the following essay, Levin maintains that Viola has an unromantic view of love, a remarkable ability to handle crises, and a willingness to manipulate both Olivia and Orsino to achieve her goals.]

Viola, the heroine of *Twelfth Night*, is widely admired as an example of 'selfless fidelity' in love.¹ She is praised by critics with divergent interpretations of the play itself. She appeals to those who regard *Twelfth Night* as a 'festive play', in the course of which characters overcome their illusions, grow in self-knowledge, and gain a sense of community. She is regarded as the one character who is not misled about herself, and who therefore can 'teach others the true meaning of love'.² Viola appeals just as strongly to critics who puncture the
romantic surface of the play, and find excesses in Illyria that cannot be purged as a mere product of a 'holiday' atmosphere. For these critics, Viola stands above her environment. She has been called the single 'reality figure' among characters lost in a variety of illusions about themselves and others. Another writer finds it a shame that so wonderful a girl as Viola should marry 'such a spineless figure as the Duke'. Finally, Viola is also praised by critics occupying a moderate position. They qualify the generally cheerful tone of comedy by speaking of 'a silvery undertone of sadness', or 'a nostalgic, elegiac' note. With this reading, Viola becomes 'the constant and unchanging heart at the centre of several shifting and unstable attachments'. Viola, it would seem, is worthy of the highest admiration.

This essay will argue that she has not been scrutinized with sufficient care, and that there is an important element of calculation in her personality. My purpose is to strengthen the anti-romantic reading of Twelfth Night, which, although it has had very able proponents, has yet to discover the 'worm i’ th’ bud' at the heart of the play (II. iv. 111). In the latter nineteenth century, dissatisfaction with Illyria centered on the mistreatment of Malvolio. Our century has taken more interest in Feste's profound disillusionment and in the aristocratic malaise of Orsino, and, to a lesser extent, Olivia. It is time to move from the periphery to the supposed romantic center of the play, and to find there a young woman with a distinctly unromantic attitude towards love. I begin with a key to Viola's personality provided by Dr Johnson in two succinct footnotes he wrote for Act I, scene ii of the play.

Viola, having come ashore after a shipwreck, determines from a sea captain that she is in Illyria, a land ruled by a bachelor, Duke Orsino, who woos the Countess Olivia. Viola decides: 'O that I serv’d that lady, / And might not be delivered to the world I Till I had made mine own occasion mellow / What my estate is' (41-44; italics added). Dr Johnson paraphrased the lines and offered a gloss:

I wish I might not be 'made publick' to the world, with regard to the 'state' of my birth and fortune, till I have gained a 'ripe opportunity' for my design. Viola seems to have formed a very deep design with very little premeditation: she is thrown by shipwreck on an unknown coast, hears that the prince is a batchelor, and resolves to supplant the lady whom he courts.

Dr Johnson's reason for concluding that these particular lines illustrate Viola's desire to wed the Duke may not be obvious but we should recall that in editing another play, Johnson suggested that the idiom to go 'to the world' meant marriage. In any event, Johnson is undoubtedly considering the lines in context, and he thinks that Viola's general intention is clear. A little later in the scene, Viola, on learning that Olivia is in mourning, changes her course of action. Dr Johnson commented: 'Viola is an excellent schemer, never at a loss; if she cannot serve the lady, she will serve the Duke'. Johnson, in effect, suggests that Shakespeare quickly shows that Viola is not introduced as an idealized romantic heroine. He might have said, more cautiously, that Shakespeare provides equivocal details so that we will prepare ourselves to watch Viola and make some very careful judgments. In any event, Johnson's successors, rather than taking up his lead, have been busy to eliminate any suggestion of duplicity on Viola's part. In 1790, Malone explained her quick moves on the basis of a source for the play, Riche His Farewell to Militarle Profession: Viola sailed for Illyria in search of Orsino, who is the man she loves. In 1821, James Boswell, the son of a more famous father, added to Malone's account: 'It would have been inconsistent with Viola's delicacy to have made an open confession of her love for the Duke to the Captain'. Later still (1854), R. G. White dismissed the whole controversy with great irony:

If there ever were an ingenuous, unsophisticated, unselfish character portrayed, it is this very Viola,—Dr Johnson's 'excellent schemer', who, wretched and in want, forms that 'very deep design' of supplanting a high-born beauty, of whom she had never heard, in the affections of a man of princely rank, whom she has never seen.
White read both Johnson and the text in a very literal-minded way and was baffled by what seemed an outrageous accusation. Spedding (1865) subsequently gave an eloquent defense of Viola as a romantic heroine who, in very trying circumstances after a shipwreck, does nothing inappropriate 'for a lady of her birth and breeding'.

This account of Viola's activity has remained intact in our own century. C. L. Barber, for example, writes that 'the shipwreck is made the occasion for Viola to exhibit an undaunted, aristocratic mastery of adversity'; and the New Arden Twelfth Night emphatically declares that Viola's 'disguise appears a natural step and neither a deep laid scheme nor an irresponsible caprice'. If Johnson is nevertheless right, then the whole character of the play has been misunderstood, even by critics who put an anti-romantic case. As Spedding pointed out in well-chosen words: 'Our conception of Viola's very nature, and with it the spirit of every scene in which she subsequently appears, and the complexion of the whole play, depends on' a correct determination of the issue. I am prepared to defend the essence of Johnson's analysis of Act I, scene ii, and to demonstrate Viola's subsequent 'scheming'.

Although Viola is safely ashore, the captain and the sailors (from the latter we hear nothing) are still her lifeline, and she treats them with calculation, beginning with the pretense of camaraderie: 'What country, friends, is this?' (1). The captain replies: 'This is Illyria, lady'. Viola then puns: 'And what should I do in Illyria? / My brother he is in Elysium' (italics added). Viola wittily suggests that a confusion of sounds has caused her to miss her proper destination. She now expeditiously sets about soliciting grounds for hoping that the mistake will in due course be corrected: 'Perchance he is not drown'd—what think you, sailors?' (5). The captain takes his cue and cheers her, and she thanks him with gold (17). This gesture requires scrutiny. Not every romantic heroine has gold in her purse (especially after a shipwreck), nor takes gold out to thank a man for spiritual solace. But Viola, it may be, has a design. She perhaps wishes to demonstrate that she has money, and that she knows how to reward favors. Viola is ready to see if there is more help she can get from the captain.

And, as it turns out, he knows Illyria well, having been born and bred there (22-23). 'Who governs here?' is her immediate response, and when the captain replies 'A noble duke, in nature as in name' she wants only hard fact, not speculation about the duke's character: 'What is his name?' (26). Upon hearing the name, Viola's memory, sharp on critical detail, recalls: 'Orsino! I have heard my father name him. / He was a bachelor then' (28-29). It seems fair to infer that Viola shows immediate interest in establishing herself well in the dukedom, and a royal marriage is entertained as a possibility. She hesitates momentarily, for she is not one to risk unnecessary danger, and thinks of biding her time in the safety of Olivia's court. But when the captain tells her that Olivia will entertain no kind of 'suit' (45), the word catches Viola's attention, and the captain nods in confirmation, adding, 'No, not the Duke's'. Viola's path is now clear to her; her approach to the captain characteristically indirect.

She first addresses him with a compliment that incidentally reveals her knowledgeable in the ways of the world:

There is fair behaviour in thee, captain,
And though that nature with a beauteous wall
Doth oft close in pollution, yet of thee
I will believe thou hast a mind that suits
With this thy fair and outward character.

(47-51)

She then proposes to disguise herself and enter the duke's court as a eunuch. 'I'll pay thee bounteously', she goes on to promise (52), and promptly urges: 'It may be worth thy pains; for I can sing / And speak to [the
Duke in many sorts of music' (57-58). Since music is 'the food of love' (I, i. 1), the direction of Viola's thoughts is plain enough. She may even exchange a smile with the captain when she blandly concludes: 'What else may hap, to time I will commit, / Only shape thou thy silence to my wit' (112-13). Only the least suspicious in the audience will be unprepared for Viola's contrivances at court.

The court, in English Renaissance drama, is a place where one seeks fortune, and where one's success—not to say life—depends upon pleasing a monarch. When Act I, scene iv, opens, Viola has disguised herself as Cesario, a male page. We may ask, why not a eunuch, as she had planned? Perhaps she has decided that a sexual identity, even if not her own, is still an asset. She has been at court 'three days', has already 'advanc'd', and is likely to advance further, if, as Valentine points out, 'the Duke continue these favors towards you' (1-4). Valentine is talking from bitter experience, for Cesario is replacing him at court. In Act i, scene i, Valentine, as Orsino's ambassador to Olivia, failed to gain entrance; Cesario is his successor. The duke enters, asks Valentine to stand aside (12), and gives Cesario 'his' instructions. Viola is most reluctant to accept the mission, for two very good reasons. First, she has her own designs on the duke. I say designs, for there has been no evidence yet, nor, I believe, is there reliable evidence subsequently, that Viola actually loves the duke. Second, while the duke mentions only the 'fortunes' that will be hers if she succeeds with Olivia (40), in fact, if she fails she will suffer Valentine's fate. The duke, however, is not to be refused, and Viola undertakes the task, in good faith, apparently.

She listens carefully as the duke urges her on her way. He tells Cesario 'to act my woes' (26), and that to do so 'shall become thee well . . . / [Olivia] will attend it better in thy youth / Than in a nuntio's of more grave aspect' (26-28)—with a stare for Valentine, no doubt. The duke goes on to describe why Cesario will appeal to Olivia, and in doing so reveals that he himself dotes on Cesario's lovely feminine features:

They shall yet belie thy happy years,  
That say thou art a man. Diana's lip  
Is not more smooth and rubious; thy small pipe  
Is as the maiden's organ; shrill and sound,  
And all is semblative a woman's part.  

(30-34)

Viola can see that the duke is attracted to her; perhaps she also wonders whether the duke is right, and her combination of masculine and feminine characteristics has novelty even among the women of a jaded Illyrian aristocracy. A course of action becomes clear to her. She will do no more than the duke instructs if she 'acts' a role and emphasizes her youthful appearance. Meanwhile, she can cultivate the duke's own interest in her.

The setting now shifts to Olivia's household, and details are soon provided which prove pertinent to our inquiry. Feste, Olivia's jester, is returning after an unexplained absence, and Maria, the lady in waiting, expects that he will have difficulty getting back into Olivia's favor. Nevertheless, he concentrates his skill—'Wit, and't be thy will, put me into good fooling' (I. v. 32-33)—and in a few short lines achieves his end. As Viola is about to enter and achieve comparable success, it behooves us to see whether the two employ parallel means. Feste sees past Olivia's initial reluctance to listen to him. He assumes that a person in mourning for an extended period of time is in need of amusement, and that a young woman has special needs. Therefore, in his introductory move, he disports his colorful wit before Olivia, much as a serpentine Satan plays before Eve in the garden. Feste knows that Maria wants a husband (27-28), and so does Olivia, for 'beauty's a flower' (52). Olivia is soon telling him that, 'for want of other idleness', she will let him 'prove' her a 'fool'. Olivia has a positive desire to be proved a fool—to the good fortune of both Feste and, as it turns out, Viola as well. With a performance requiring minimal skill, Feste soon has Olivia laughing at herself and indulging him.
At this point, Sir Toby enters with the information that a gentleman has come to call upon Olivia. It is immediately apparent that her mourning is little more than a polite way of saying 'no' to the duke, for she issues the instruction: 'If it be a suit from the Count, I am sick, or not at home' (108-09; italics added). But Cesario has cleverly declined to mention whose messenger 'he' is; Olivia is curious, and her curiosity becomes intolerable when Malvolio's description emphasizes Cesario's very youthful appearance: 'One would think his mother's milk were scarce out of him' (161-62). Olivia agrees to see Cesario; as we know, the latter has already been advised, by the duke, of Olivia's predilections.

Within just a little over a hundred lines of Cesario's entrance, Olivia has fallen in love with 'him'. It has been very widely assumed that Olivia does so in spite of Cesario's sincere attempt to woo for Orsino. To take two illustrations from the critics. Harold C. Goddard can usually see through anyone and anything, but he nevertheless says of Viola that 'she never toys with [the] possibility for a moment' of manipulating Olivia's emotions for her own ends. Alexander Leggatt finds that Viola urges the suit 'with the generosity that is part of her nature'. Two other critics offer a more qualified account. Herbert Howarth begins very firmly: Cesario 'urges his entreaties on Olivia as no previous messenger has dared'. But towards the end of his discussion, he muses: Viola "unconsciously" wills Olivia to fall in love with her'. Even E. C. Pettet, writing on Shakespeare's 'detachment from romance', ventures no further than to suggest that in Viola's 'fine love speeches' to Olivia, there is sometimes 'a suggestion of parody'. In spite of the weight of critical opinion, and the fact that Olivia is certainly an easy victim, I believe we can discover a systematic effort on Viola's part to awaken romantic affection. Viola, on her entrance, does not invoke 'wit', as we have seen Feste do, but she is a self-proclaimed believer in wit (I. ii. 61) and there is no reason to suppose that in her secretive way she has not gone about making calculations of her own. These should accord with Feste's but Viola has an additional advantage: 'she' is a handsome young man. What, then, if she offered herself as a suitor? To do so has many real advantages, and as many dangers. If Olivia loved her, Viola could be sure of a reception at her court, and Orsino would therefore remain satisfied with his ambassador. However, if the duke were to hear a word of what she were up to, she would be in serious trouble indeed. Hence Viola will have to seduce Olivia without the latter being aware that she does; Viola must appear to refuse and to serve her lord loyally, while Olivia herself can trip head over heels in love. Viola's apparent coolness to the suit would also serve to prolong the wooing, and hence give the patient Viola time to work on the duke.

When Viola enters the room, she begins a dull, stylized address, only to interrupt herself to ask with apparent nervousness, 'if this be the lady of the house?' (171-72). It is improbable that Viola is really in doubt as to Olivia's identity, for only one of the women is veiled and Viola knows Olivia to be in mourning. Viola is presenting herself as an awkward and shy youth, who has carefully memorized lines, but who fears 'scorn' (175) and may easily be put out of a 'part' (179). She wishes to suggest that, behind the actor with not very interesting lines, lies a real person with a depth of feeling that Olivia might well wish to explore. Olivia is indeed interested, but Viola has yet to perfect her act, and Olivia's first guess at the person behind the mask is all too accurate: 'Are you a comedian?' she asks (182). Viola answers with a comic touch that she conceals from Olivia, whom she falsely reassures: 'No; . . . and yet (by the very fangs of malice I swear) I am not that I play' (183-84; italics added). Viola hints to the audience that she does not 'play' at all; she is in terrible earnest.

Olivia now shows an interest in engaging Viola in 'skipping' (201) dialogue, for she answers her question, 'Are you the lady of the house?' with 'If I do not usurp myself, I am' (184-86). Viola, like Feste, now reminds her that a young woman should marry: 'What is yours to bestow is not yours to reserve' (188-89). Olivia is flattered. Viola goes on to suggest that beyond the introduction to the speech she has memorized lies 'the heart of my message' (190-91). She realizes, therefore, that Olivia, in asking her to come to the point, is not requesting that she leave, as Maria seems to think. Viola quickly asks Olivia to silence Maria: 'Some mollification for your giant, sweet lady' (204). Johnson provides a pertinent footnote: 'Ladies, in romance, are guarded by giants, who repel all improper or troublesome advances' (italics added). Olivia is not wise enough to take a hint and allows Viola to ask twice for a private audience, the second time with a suggestion.
of the seductive: 'What I am, and what I would, are as secret as maidenhead: to your ears, divinity; to any other's, profanation' (215-17). Olivia replies: 'We will hear this divinity', and accedes to Viola's request (218-19).

Olivia and Viola alone together, the latter soon gives the conversation an intimate turn: 'Good madam, let me see your face' (230). Olivia picks up the implication and comments: 'Have you any commission from your lord to negotiate with my face? You are now out of your text; but we will draw the curtain'. Olivia waits for Viola's response. Viola looks at her face and says: 'Excellently done, if God did it all'. This is a little light bantering, and, of course, an incidental crack at a rival. Viola then gets down to business, praising Olivia's beauty in lavish terms (239-43). Leggatt describes the ensuing interaction perfectly, but misses Viola's underlying strategy: Olivia 'keeps her defences up with conventional anti-Petrarchan jokes. Viola will have none of this, and persists'. Not realizing quite how vulnerable Olivia is at the moment, Viola urges Orsino's suit, rather than hinting at her own love. When Olivia quickly shuts to hear more, Viola replies with the most awful Petrarchanisms, and Olivia quickly shuts her up. Viola now makes the decisive move:

If I did love you in my master's flame,
With such a suff ring, such a deadly life,
In your denial I would find no sense,
I would not understand it.

(264-67; italics added)

Breathless, Olivia responds: 'Why, what would you?' and then Viola, with lyric passions, describes how fervently she would love, in famous lines beginning, 'Make me a willow cabin at your gate'. We have evidence (II. ii. 19-21) that from this point on Olivia speaks 'in starts distractedly'. 'You might do much', she says, and inquires of Cesario's parentage. 'Above my fortunes', is his obliging reply (278), thus reassuring her that he might not be an altogether unsuitable match. Olivia, greatly moved, breaks off the conference, instructing Cesario to give her refusal to his master, but for himself to come again, ostensibly to report the duke's reaction. Viola gone, Olivia comments, more truly than she knows, that Cesario 'with an invisible and subtle stealth' has crept 'in at mine eyes' (297-98).

Among modern editions of the play, the New Cambridge quotes this passage approvingly, and the New Arden is in essential agreement; Kittredge, however, insists that Viola 'has not failed to understand Olivia's words and manner in their recent interview'. To be even more cynical about Viola's motives, we can say that the return of the ring, along with Olivia's request, are clear signs to Viola that her plot has worked. She is not greatly surprised, and has long ago concluded on the need for secrecy; hence, she replies to Malvolio with perfect composure. The accuracy of this interpretation, and my general approach to Viola's character, are most fully tested by the speech she gives after Malvolio's exit.

The Folio text follows:
I left no Ring with her: what meanes this Lady? 17
Fortune forbid my out-side have not charm’d her:
She made good view of me, indeed so much,
That me thought her eyes had lost her tongue, 20
For she did speake in starts distractedly.
She loves me sure, the cunning of her passion
Invites me in this churlish messenger:
None of my Lords Ring? Why he sent her none;
I am the man, if it be so, as tis, 25
Poore Lady, she were better love a dreame:
Disguise, I see thou art a wickednesse,
Wherein the pregnant enemie does much.
How easie is it, for the proper false
In women s waxen hearts to set their formes: 30
Alas, O frailti e is the cause, not wee, 31
For such as we are made, if such we bee: 32
[Riverside text: 'Alas, our frailty is the cause, not we, (31)
For such as we are made of, such we be.' ] (32)
How will this fadge? My master loves her deerely,
And I (poore monster) fond asmuch on him:
And she (mistaken) seemes to dote on me: 35
What will become of this? As I am man,
My state is desperate for my maisters love:
As I am woman (now alas the day)
What thriftlesse sighes shall poore Olivia breath?
O time, thou must untangle this, not I, 40
It is too hard a knot for me t’unty.

Undoubtedly many actresses have, like Ellen Terry, depicted Viola as pleased when she realizes that Olivia
has fallen in love with her.26 I would go further, and call Viola's mood triumphant. However, as is her
practice, she does not admit her guilt outright, but lets those in the audience who will appreciate her irony. She
begins by pointing out that she has just concurred in a statement that is palpably untrue: in fact, she 'left no
Ring' with Olivia. Viola now asks the audience whether it is wondering, 'What meanes this Lady?' She gives
the answer in the following line. While in Elizabethan English 'not' frequently follows a verbal negation
without yielding a positive meaning, Viola is intentionally equivocal.
Her 'fortune' depends on her 'charming'
Olivia—and she has succeeded. Viola promptly exhibits the evidence supporting her conclusions, and
suggests that she has already drawn the necessary inferences (19-21). She ends with the confident assertion:
'She loves me sure' (22), and adds that Malvolio's message is a final incontrovertible piece of evidence
(22-24). We should not be misled by the apparent tentativeness of 'if it be so' for by finishing the line with 'as
tis', she contradicts her false modesty (25). Viola follows with one line of mock sympathy for Olivia (26), and
four of mock lament for the way evil flourishes in the world (27-30). In line 28, many editors from Johnson on
have identified the 'pregnant enemy' as the devil, but Luce, in the original Arden edition, provides an
alternative: 'This may be Satan, or any designing foe' (italics added).27 The editor further defines 'pregnant':
'resourceful, ever ready with wiles'. The enemy, then, can be Viola, working silently with 'fangs of malice'.
Rather than feeling sorrow on account of the evil in the world, she exults as one of those 'proper false' who
have found it 'easie' to seduce women (29-30).

The next two lines are invariably emended much as they are in the Riverside Shakespeare (see insert in the
Folio text above). The assumption is that Viola, as a woman, identifies with women, and excuses the fraility
commonly associated with their nature. However, in the preceding lines, Viola has identified not with other
women, but with the men who seduce them. Therefore, the Folio text is correct, although the emendations
undoubtedly catch what may be carelessly heard in the lines. In point of fact, Viola starts off with a sympathetic ‘alas’, and then promptly excuses the ‘frailtie’ of seducers. To round off her offense, she teasingly adds, ‘if such we be’, as if to deny all she has seemed to be admitting about herself.

The passage closes with Viola looking over the damage she had done, and portraying herself as a poor helpless female caught in a terrible web. The couplet embodies this sentiment epigrammatically. That Viola does not know how to ‘unty’ the knot is perfectly true. The wise, however, will conclude that Viola is already looking around her, and will do all in her power to ‘unty’, as she tied, the knot, for her advantage. Another Shakespearean heroine who cloaks herself in the garb of patient Griselde is Helena, in Shakespeare’s next comedy, All’s Well That Ends Well. Critics have been far more willing to see an element of calculation in her. We may think that, like Viola, even in soliloquy she is not candid, so that when she claims she is leaving France to oblige Bertram, she in fact has a new plan to claim her reluctant husband (H. ii. 99-129). When Helena next appears, waiting on a street in Florence where Bertram is soon to pass, we should ask whether chance or design has brought her to the right place at the right time. Let us use equal caution on Viola’s subsequent entrance, in scene iv.

When the duke enters, he draws Cesario to him, but his attention shifts in mid-line: ‘Now, good Cesario, but that piece of song, / That old and antique song we heard last night’ (2-3). Viola concludes from this interruption that she must compete with the Duke’s sentimental interest in music, and therefore, when the duke calls her to him again, and asks ‘How dost thou like this tune?’ she responds in an intensely lyrical vein (20-22). The duke, visibly moved, says ‘Thou dost speak masterly’, and becomes interested in Cesario’s love-life. It turns out that Cesario has loved one of the duke’s ‘favor’ (25), ‘complexion’ (26), and ‘years’ (28). But the duke either misses Cesario’s implications, or shies away from them. Perhaps he feels protective of Cesario, or perhaps he simply cannot help giving expert advice on love. He warns Cesario against taking a woman older than himself, and Viola, for the moment, is stymied.

After Feste’s song, she pulls out all the stops by inventing a famous narrative. She tells the Duke: ‘My father had a daughter lov’d a man / As it might be perhaps, were I a woman, / I should your lordship’ (107-09). The duke of course wants to know more, and Viola tells him that the girl ‘never told her love’ and ‘pin’d in thought’ (110, 112). The story deeply impresses the duke, and he asks breathlessly, ‘But died thy sister of her love, my boy?’ Viola now has her chance, and she thinks of taking it:

I am all the daughters of my father’s house,
And all the brothers too—and yet I know not.
Sir, shall I to this lady?

(120-22)

At the last moment, Viola decides against trusting the changeable duke, and quickly brings his attention back to the ‘suit’ at hand. She has resigned herself to further waiting.

Viola’s strategy with Olivia remains unchanged in two subsequent interviews, which can therefore be passed over quickly. Viola of course needs to do very little to precipitate Olivia’s outpourings, but that little she does. For example, in Act III, scene i, she greets Olivia in public with a stiff formal compliment, and then asks for a private interview, and gets it (84-85, 88-89, 92-93). Viola promptly introduces herself as Olivia’s ‘servant’ (97, 102). The language of courtly love is sufficient provocation for Olivia, who replies with an outpouring of emotion. Later in the Act, Cesario returns once again—indication of ‘his’ interest, Olivia presumes—and in the midst of his adamant denials, Olivia places a jewel with her picture around his neck—Cesario accepts the gift! (H. iv. 208-209). But Olivia is the least of Viola’s problems.
Critics have noticed that Viola does not control events in the latter acts of the play, although they have not been as quick to notice her ability to handle unexpected situations. The first crisis occurs when, after the interview mentioned at the end of the last paragraph, Sir Toby foments conflict by having Sir Andrew challenge Cesario to a duel. In these circumstances our strategist is not rendered entirely helpless. She knows herself too well to meet the male world with a pale imitation of its 'macho'. Instead, she frankly admits that 'I am one that had rather go with sir priest than sir knight' (III. iv. 270-71), and quickly puts her cunning to work. She tries to extricate herself, first working on Sir Toby, and then, when he goes to Sir Andrew, by approaching Fabian in like manner. Finally, when Antonio enters and diverts the attention of the others, she quietly talks Sir Andrew out of both the duel and his horse (321-24)!

When he identifies her as Sebastian and accuses her of lack of faith, Viola must shape a careful reply. If she repudiates Antonio sharply, she will provoke his anger, and also forego any chance that, should the occasion arise, he could be made her ally. On the other hand, to treat him kindly and settle his confusion would invite an immediate search for Sebastian, with unforeseeable consequences for herself at the duke's court. Viola's temporary solution is to give Antonio 'half her purse—so she claims, anyway (346-47)—but not to explain his confusion. After Antonio leaves, under arrest, she reflects on what has happened. Taken at her word, she is still in doubt as to whether her brother has survived: Prove true, imagination, O prove true' (376). But she may be far from ingenuous. Not only must the mistake in identity lead to the natural conclusion that her brother survives, but Antonio actually names 'Sebastian' (366) and recalls rescuing him (360). And Viola herself admits that she looks exactly like her brother for 'him I imitate' (383). Viola therefore passes off on whoever will listen an excuse for not seeking her brother, and for not giving real aid to his friend, Antonio. She insists upon waiting until she can make 'occasion mellow' (I. ii. 43).

Viola is not on stage in Act IV, but an event takes place which could have grave consequences for her. She has brilliantly succeeded in appearing to reject Olivia's advances, and she therefore need not fear direct communication between the Duke and Olivia. However, Olivia now comes upon Sebastian, takes him for Cesario, woos him with new success, and quickly marries him. Therefore Viola, unbeknownst to herself, has a new problem at the beginning of Act V, and, to make matters worse, the Duke has decided to go to Olivia's court himself. As he and Cesario arrive, Antonio is brought before the duke. Fortunately, Viola has already decided how to handle this eventuality, and immediately tells the duke that Antonio has been kind to her, but is mad (66-68). Luck is on her side because Antonio happens to say that he has kept Cesario company for the last 'three months . . . both day and night' (94, 96). The duke quickly adopts Viola's explanation, saying to Antonio: 'Thy words are madness' (98). At this moment, Olivia enters.

She naturally thinks Cesario is her husband, and though she has promised him to keep the marriage secret, she knows no restraint and throws him longing glances. Viola rebukes her in order to show the duke that she is loyal to him, but Orsino seems to have been harboring suspicions, and quickly concludes that Cesario has betrayed him. The duke expresses a cruel intention, and Viola seems to submit:

Duke. Come, boy, with me, my thoughts are ripe in mischief.
I'll sacrifice the lamb that I do love,
To spite a raven's heart within a dove.

Viola. And I most jocund, apt, and willingly,
To do you rest, a thousand deaths would die.

(129-33)

This has been called 'Viola's supreme moment of self-sacrifice', but her lines are susceptible to more than one interpretation. As always, she has her wits about her. She has heard the duke finally accept Olivia's
refusal: 'Live you the marble-breasted tyrant still' (124); and although Orsino seems to have turned his anger on Cesario, he has nevertheless inadvertently declared his love in the lines just quoted (see also 1.126). And so, Viola has given voice to concealed exuberance. The 'thousand deaths' for which she is 'apt', and which she will die 'willingly', are—sexual deaths. Viola once again shares her irony only with the audience; on stage she remains perfectly composed, for she has now to manage the dénouement.

In a moment, the situation actually appears to worsen. As Viola starts to follow Orsino off stage, all the while protesting her love for him, Olivia blurs out: 'Cesario, husband, stay' (143). Orsino turns to Cesario accusingly, and says: 'Her husband, sirrah?' Viola's response is knowing: 'No, my lord, not I' (145; italics added). All the parts of the puzzle are now clear to Viola, and she awaits the appearance of her twin brother. Sebastian enters. The duke speaks, and Antonio, and Olivia, but not Viola. Finally, an incredulous Sebastian turns to Cesario and remarks: 'I never had a brother . . . I had a sister' (226, 228). He goes on to inquire, 'What kin are you to me? / What countryman? What name? What parentage?' (230-31). Viola conceals from him her masculine disguise and instead contrives to perform a duet with her brother. Finally, at the emotional climax, she admits the deception.

Her delay in doing so is the most famous crux of the play. One critic has explained that Shakespeare wishes to freeze the action 'in the contemplation of a miracle'. Another that he is 'fumbling with the details of the . . . plot'. Still another that Shakespeare has created an 'intensely The moving' but obviously rical moment.32 Theatdeal best explanation is a good simpler than these. Viola's goal has been to win the duke. A hundred-odd lines back, in his allusion to Heliodorus' *Ethiopica* (117-19), Orsino revealed himself as an avid reader of romances. Therefore Viola has now seized 'occasion', as she promised she would, to fashion a sentimental and melodramtic reunion with her brother. Her calculation, as always, is accurate. The duke speaks up immediately:

I shall have share in this most happy wrack.
Boy, thou has said to me a thousand times
Thou never shouldst love woman like to me.

(266-68)

He looks forward to a wedding 'when golden time convents' (382). Viola is to be Orsino's mistress, and his fancy's queen' (388). He will go on living life as in a romance, and Viola will rule Orsino—and a dukedom.

The significance of the foregoing argument for interpretation of *Twelfth Night* may now be briefly explored, although a full discussion is beyond the scope of this essay.33 That a generation of critics concerned with the theme of appearance and reality in Shakespeare should nevertheless have failed to penetrate Viola's disguise indicates that we still have a great deal to learn about the play. Shakespeare himself is very nearly explicit about the kind of discernment needed. In Act I, scene v, while Feste and Maria are conversing together, he suddenly says to her: 'If Sir Toby would leave drinking, thou wert as witty a piece of flesh as any in Illyria' (27-28). This comment perfectly explains Maria's efforts to reform Sir Toby in an earlier scene, and the truth of Feste's observation is confirmed by Maria's quick effort to hush him. Feste is unromantic, or realistic, call it 'what you will' about Maria's activity. In another scene, Feste looks Viola over, observes that she scurries as quickly as he does between Orsino's court and Olivia's, and, after begging money of Viola, seems to suggest that she is as much a 'beggar' as he is (HI. i. 54-55). It is really Maria and Viola who have most in common, because Feste is of a divided mind about currying favor. Maria and Viola both use their 'wit' to execute a careful plot; they channel their energies in the service of men of superior social rank and inferior abilities. Both are patient, and both prevail. We might conclude, therefore, by saying that in a hierarchical social system, or in any social system, for that matter, there is competition for rewards. Fools like Malvolio and Sir Andrew reveal their motives and fall on their faces; but an intricate web of deception is the norm, and he who would understand, must look beneath the glitter in a romantic comedy like *Twelfth Night*. 
Notes

9 Ibid. p. 312.

11 James Boswell, The Plays and Poems of William Shakespeare (London, 1821), XI, 347 (n. 2); also in Furness, I. ii. 45-47n.

13 James Spedding, Fraser's Magazine, August 1865; quoted in Furness, I. ii. 59n.

14 Barber, p. 241; The New Arden Twelfth Night, eds. J. M. Lothian and T. W. Craik (London: Methuen, 1975), p. lxiii. Both Barber and Spedding (n. 13) give Viola an aristocratic birth. I believe that there is no evidence in the play justifying this assumption, and certainly no evidence that in plotting for a duke she is not aspiring beyond her class. In Shakespeare's London theatre, Viola's accent would have given the audience a precise indication of her social rank (unless she spoke with an ambiguous foreign accent). All Shakespeare criticism suffers from the absence of a direct dramatic tradition surviving from the dramatist's day; we should
not make matters worse by inventing biographies out of whole cloth.

15 Spedding, in Furness, I. ii. 59n.

18 See I. ii. 36-41 and 45; I. iv. 18-20.

19 At Act III, scene i. lines 123-25, Viola first tells Olivia that she pities her, and when Olivia answers 'That's a degree to love', Viola's revealing comment is 'No, not a grize; for 'tis a vulgar proof/That very oft we pity enemies' (italics added). Olivia, naturally, does not get the point, but we should.

20 *Johnson on Shakespeare*, p. 313.

21 Leggatt, p. 233.

22 In two subsequent passages, Olivia uses language which can be taken to suggest that she has an unconscious suspicion of what Viola is up to. Olivia blames Viola in the following lines: 'Have you not set mine honor at the stake, / And baited it with all th' unmuzzled thoughts / That tyrannous heart can think?' (III. i. 118-20). Later still, Olivia tells Viola that 'A fiend like thee might bear my soul to hell' (III. iv. 217).

23 Spedding in Furness, II. ii. 14n.

25 Our interpretation of Viola's character will survive speculation (were it to occur) concerning her motive for not accepting the ring, and then, when Malvolio has thrown it on the ground, for leaving it there while he is present. No one will ever be able to say that Viola took the gift, but Olivia can think that Viola accepted it covertly. As we will see, Olivia subsequently places a jewel on Viola (III. iv. 208-09), and later still (IV. ii. 2), we learn that she has given a 'pearl' to Sebastian, whom she mistakes for Cesario.

26 See Furness, II. ii. 27n and pp. 393-94. This is also the interpretation given to the passage by Anne Swift in a recent production of the play at the Berkeley Repertory Theatre, California.

29 Bertrand Evans, in *Shakespeare's Comedies* (Oxford, England: Oxford University Press, 1960) comes to similar conclusions about Viola's discoveries, but his assessment of her motives is entirely different, pp. 140-43. Viola also compromises her moral standing by allowing the captain she promised to help to remain in jail (V. i. 274-77).
New Arden *Twelfth Night*, p. lxxvi. See also Porter Williams, Jr, in Palmer, p. 184: 'Comedy here touches for a fleeting moment the pathos of tragedy'.

Sexual puns on 'death' and 'will' are too common to need documentation. Partridge, in *Shakespeare's Bawdy* (New York: Dutton, 1969), gives instances where 'apt' means 'sexually apt'; see also *Twelfth Night*, I. v. 26-28.

I am presently completing a book with a chapter on *Twelfth Night*.

**René Girard (essay date 1990)**

*[In the essay below, Girard evaluates Orsino's and Olivia's notions of human love and characterizes both characters as pseudo-narcissists. The critic maintains that in their twin obsessions with mimetic desire, they are identical personalities, each pursuing an inaccessible object and thus avoiding the disenchantment that must occur when desire is satisfied.]*

Orsino and Olivia are complex and refined characters. The duke has artistic and intellectual pretensions; before the curtain is raised, at the beginning of *Twelfth Night*, his musicians are playing a piece of music which Orsino greatly enjoys and, when it is over, he wants to hear it again. "Give me excess of it," he says:

\[
\text{that surfeiting,} \\
\text{The appetite may sicken, and so die.}
\]

Once again, the music is heard and Orsino does indeed find it less beautiful than the first time. In a single instant, as he himself had predicted, his appe-tite has sickened and died:

\[
\text{Enough, no more,} \\
\text{'Tis not sweet now as it was before.}
\]

"Surfeiting" suggests our modern nausea, a compulsive disgust, a revulsion so extreme and definitive that the word is a little shocking in the context of art. If we read on, however, we soon find that Orsino is not exclusively interested in esthetics. In the experience he describes, the erotic life looms larger than the arts. The "spirit of love" dies in the embrace of its objects, regardless of their nature:

\[
\begin{align*}
\text{Spirit of love, how quick and fresh art thou,} \\
\text{That notwithstanding thy capacity} \\
\text{Receiveth as the sea, nought enters there,} \\
\text{Of what validity and pitch soe'er,} \\
\text{But falls into abatement and low price} \\
\text{Even in a minute. So full of shapes is fancy} \\
\text{That it alone is high fantastical.}
\end{align*}
\]

(1.1.1015)
It is traditional to compare the course of desire with physical appetite and its satiety. But a healthy individual, even when no longer hungry, does not find good food disgusting, unless, of course, he abuses it. Orsino's experience resembles indigestion and Anne Barton rightly observes: "This love is a kind of glutton that devours dainties only to vomit them up."¹

The ups and downs of normal hunger are less extreme than what Orsino describes. His language evokes a pathological version of the natural process. The slant of the duke's metaphor suggests a human nature wounded by original sin.

This man who says that desire never outlives possession is nevertheless in love. During the rest of the play, he never utters more than two sentences in a row without mentioning Olivia, but Olivia is inexplicably absent from his speech on the spirit of love. Olivia is the one permanent goal, the only fixed point in an existence that would be empty and incoherent without her. Orsino's sense of self visibly depends on the unflagging intensity of his desire for Olivia. But he argues that there is no such thing as an unflagging desire once its object is won. If Olivia belonged to the duke, would she lose her charm as quickly as the piece of music? The question never comes up explicitly.

One of the duke's attendants, Curio, interrupts his meditation on desire:

   Will you go hunt, my lord?

   DUKE. What, Curio?

   CUR. The hart.

   DUKE. Why, so I do, the noblest that I have.
   O, when mine eyes did see Olivia first,
   Methought she purg'd the air of pestilence!
   That instant what I turn'd into a hart,
   And my desires, like fell and cruel hounds,
   E'er since pursue me.

   (I.i. 16-22)

As soon as the conversation shifts away from desire, the duke remembers Olivia. It takes a hackneyed pun to remind him of his beloved. Orsino's passion seems more at ease among literary clichés than in the context of a serious debate about the life and death of desire.

Orsino's first tirade on the subject is part of a musical prelude to the whole play, but it is more than a decorative hors-d'oeuvre; it is essential to our understanding of the comedy. It must be interpreted in the light of what follows; what it leaves unsaid is just as important as what it actually says.

Like many disillusioned romantics, Orsino speaks cynically about desire in general but he will go on desiring romantically until the end of his life. His cynicism about the past is not really independent from his current passion but the connection is paradoxical and Orsino himself never makes it completely explicit. We must rely on indirect clues that Shakespeare provides for this very purpose; we can and we must uncover the truth that his character never fully acknowledges.

Before we have time to forget Orsino's first speech, he gives the second, so different from the first in some ways that it seems to demand a different author, and yet so similar in other ways that the author cannot fail to be the same:
DUKE. There is no woman's sides
Can bide the beating of so strong a passion
As love doth give my heart; no woman's heart
So big, to hold so much; they lack retention.

Alas, their love may be called appetite,
No motion of the liver, but the palate,
That suffers surfeit, cloyment, and revolt,
But mine is all as hungry as the sea,
And can digest as much. Make no compare
Between that love a woman can bear me
And that I owe Olivia.

(II.iv.93-103)

According to this second speech, the only desires afflicted with the infirmities earlier described by Orsino as his own are feminine desires in general and those of Olivia in particular. Only women "suffer surfeit, cloyment and revolt." To make the contradiction even more blatant, Orsino suggests that these same infirmities are uncharacteristic of men and especially of himself. He opposes the weakness and fickleness of feminine desire to the undying strength of his virile desire for Olivia.

Once again, desire is as hungry as the sea and it can "digest" whatever it devours. The metaphor sounds just as ominous as the first time; in the first tirade, however, the maritime digestion expressed a pathetic contrast between the before and the after of all desires, their apparent inexhaustibility before possession is achieved, their instant death as soon as it is achieved. This time, there is no after, no surfeit for Orsino himself, and we can easily understand why: the passion for Olivia is an eternal before.

Olivia must be the first woman who ever had the upper hand with Orsino, and Orsino realizes that she has for him the eyes that he himself has always had for the other women in his life, the women that he ruthlessly discarded, no doubt, after possessing them.

Whenever Orsino occupies in relation to women the position that Olivia now occupies in relation to him, he feels the same "surfeit" that he now detects in her. He reacts in the very manner that he denounces as specifically feminine when it is her reaction to him personally. The phenomenon is the same but its ethical connotation has shifted from neutral in the case of Orsino to negative in the case of Olivia and of women in general.

To Olivia the story of Orsino's love sounds like a piece of music repeated too many times. Orsino is the one, this time, who has fallen into "abatement and low price." Olivia is sincerely bored with his sempiternal passion. Who wants to make love to an already digested man? It would be a misunderstanding to suppose that Orsino and Olivia have been physically intimate and that he disappointed her as a lover. Orsino is the defeated partner in a battle of pseudo-narcissism. It just happened that Olivia did not respond to his advances and this is how her victory was achieved. This is the only way in which a woman can durably fascinate such a man as Orsino. Were Orsino in Olivia's place, he would feel and behave with her exactly as she now feels and behaves with him. If she gave up the type of superiority they both crave in their relations with the other sex, immediately, he would cease to love her. At a deeper level, Orsino realizes that he and Olivia are very much alike. The spectacular disharmony between them does not stem from a conflict of personalities or from some other intrinsic difference but from the very reverse, an almost perfect identity. When Olivia entered his life, Orsino for the first time lost a mimetic and metaphysical battle that he had always won with everyone else.
Shakespeare wants us to compare the two speeches of Orsino; proof of this lies in the conclusion of the second one: "Make no compare . . ." When we hear this kind of warning from such a man, we should know that a comparison is in order.

Even very intelligent people can be so obsessed with their mimetic rivals that they talk like Orsino on occasions when it would be better for them to keep silent. We always marvel at the naive compulsion that forces these people to divulge the very truth they are trying to hide, but we ourselves will make the same mistake at the first opportunity.

All individuals beset by mimetic desire are easily fooled into believing that the entire world shares their obsession with their current rival. Like all people caught in a mimetic spiral, Orsino wants to convince himself that he is enormously different from his "beloved enemy," whereas in reality there is no difference, and something in him obscurely knows this. The anti-Olivia "propaganda" of the second speech is really an extrapolation of the self-knowledge demonstrated in the first speech.

Orsino thinks that he understands Olivia's desire and he certainly does, but not because of what he says, not because Olivia is one more exemplar of the archetypal woman whom all frustrated men ritually execrate. The sexist cliché is really a mask for a science of desire that does not want to acknowledge its real source. Orsino recognizes in Olivia the successful pseudo-narcissist that he used to be but is no longer, because of Olivia.

Orsino rightly interprets his relationship to this particular woman as a reversal of his habitual experience with the other sex. His banal anti-feminism is an effort to hide the true nature of this reversal and the origin of his insight into Olivia.

The idea that the desire of women for men can be weakened by a specifically feminine self-centeredness has always been popular with men. Men still love to portray as narcissistic in an absolute and non-mimetic sense the women who spurn their sexual advances. Freud gave a new lease on life to that myth with his definition of "narcissism" as a genuine self-centeredness that would be primarily feminine. Freud claimed that he had diagnosed a specifically "feminine" inability to respond to the real "object-love" of genuinely masculine men. But, quite significantly, the genuinely masculine men have a regrettable penchant for squandering their precious object-love on the women who deserve it least, narcissistic women, of course.

This is exactly Orsino's illusion; his second speech seems patterned on Freud's *Introduction to Narcissism* and as soon as we compare the two speeches, the radical critique that Shakespeare intended emerges. When placed side by side, the two speeches suggest a deconstruction of Elizabethan self-love that really amounts to a deconstruction of the Freudian concept *avant la lettre*. The words change and the myth of a specifically feminine self-centeredness remains.

The metaphoric continuity of the two speeches indicates that Orsino projects upon Olivia his own experience of the dominant erotic position, the position that Olivia now occupies with him. The fact that his insight is projective does not mean that it is worthless. Our perspicacity in such matters is always rooted in self-criticism; mimetic desire is the same in all human beings, regardless of age, gender, race, culture, etc.

Being projected upon its own mimetic replica, Orsino's insight into himself (the first speech) generates some real knowledge of Olivia's behavior (the second speech), but the duke cannot acknowledge its source without acknowledging his kinship with his mimetic **double**, thus undermining his resentment against an attitude that he, himself, would have adopted with Olivia, had the opportunity presented itself.

**Mimetic doubles** are sharp-sighted in regard to one another but their vision is distorted by the need they all feel to abolish the reciprocity in which their perspicacity is rooted. They must indignantly deny that they have anything in common with their rivals and yet, the only possible basis for their remarkable "psychological
acumen” is this mimetic desire that divides them *because they share it*:

Therefore thou art inexcusable, O man, whosoever thou art that judgest; for wherein thou judgest another, thou condemnest thyself; for thou that judgest doest the same things.

(Romans 2: 1)

Orsino slanders women not because he truly believes in the masculine superiority that he claims but because he feels inferior as the mimetic *double* whose desire is enslaved by the successful narcissism of his partner. The indifference that he disparages as feminine insubstantiality is really the source of the *metaphysical* prestige that Olivia would not enjoy for very long in his eyes, if she yielded to his desire.

Like all romantic thinkers, Orsino sees desire as an object/subject relationship exclusively; he systematically short-circuits the third dimension, the mimetic model/obstacle/rival that makes everything intelligible. This is an especially tempting illusion in cases of pseudo-narcissism, when all roles are played by the same individual. To Orsino, Olivia is simultaneously object, model, obstacle, and rival.

The view of desire as a subject/object relation is false even in the case of art, which esthetes love to bring up because it seems to prove the existence of the solipsistic desire in which they want to believe. In reality, the most powerful component of esthetic emotion is a godlike *otherness* in the admired work, a quality that too much familiarity may weaken or even destroy, as witnessed by the experiment of Orsino, the two successive performances of the same musical piece.

Like all divinities, beauty eludes the impurity of human contact and the illusion of unmediated desire is shattered. If this desire were truly unmediated, it would not be diminished by the continuous enjoyment of its object; it would survive the ordeal of possession and fulfillment would not turn to ashes. Unlike the romantics, Shakespeare rejects the theatrics of esthetic fetichism and this is part of his greatness.

The Orsino of the second speech is a frustrated lover dominated by the voice of his frustrated desire. The contradiction of the two speeches verifies the law that Orsino himself has formulated in the first: desire *seems* eternal and inexhaustible as long as it remains unsatisfied, and not one minute longer. The second speech is consistently inconsistent with the first because it is the voice of famished desire, the desire for Olivia, whereas the first is the voice of surfeit. From Olivia's standpoint, to surrender to Orsino's desire would be a bad idea.

The language and behavior of Orsino suggest that he is aware, more or less, of his own pseudo-narcissism and of everything we have just said about him. In spite of his own involvement, he is as lucid about it as Rosalind in *As You Like It*; he really understands what only outside observers understood in the earlier comedies. He embodies a more "advanced" version of the pseudo-narcissistic configuration.

He knows very well that his daily humiliations at the hands of Olivia are self-defeating. If he really wanted to seduce this woman, he would resort to the strategy outlined by Rosalind, feigned indifference, but he never does. What is the reason for Orsino's theatrically "romantic" behavior?

The duke knows that no desired object can fall into his hands and retain its appeal for very long. Only a victorious rival can invigorate desire; desire is irrevocably self-defeating. The only radical solution to its endless tyranny is total renunciation.

This policy is what all great religions recommend, all great ethical systems, all traditional wisdom. It is Hamlet's advice to Ophelia: *get thee to a nunnery*. Had she followed it, she would not have died the wretched death that she did.
Fortunately for desire, a rational loophole exists which enables the crafty spirit of love not to draw the correct lesson from its perpetual failures. Experience teaches us the unsatisfactory nature of all objects that can be possessed; it has nothing to say, strictly speaking, about objects that cannot be possessed. If we are punctiliously experimental about this matter, we can always claim that, as long as we do not possess these objects, we do not have enough information to dismiss them out of hand.

On the basis of a myopically interpreted experience, the absurdity of desire can never be demonstrated satisfactorily. A sophistic abuse of methodical doubt permits desire to reason as follows: "Since all objects that can be possessed prove valueless, I will renounce them once and for all in favor of those objects that cannot be possessed."

In *Twelfth Night*, this solution has a name, Olivia. She seems so impregnable that the duke can sincerely lament the fragility of all desire and yet remain supremely confident in the eternal duration of his desire for her.

The ocean of indifference that engulfs all other desires will never devour this particular one, Orsino thinks, for the very reason that it will never be satisfied. Olivia will remain forever inaccessible, not to Orsino alone but to all men. This creed remains obscure and Orsino avoids facing and formulating it explicitly, but it governs his life.

For the man who proclaims the bankruptcy of all desires, it still makes sense to desire Olivia. Orsino seems "irrational" as long as his real priority remains invisible. The real priority is not pleasure but desire at any price.

It is wrong to assume that, at all stages in its history, desire is seeking positive rewards. This was true perhaps in the initial phases, the ones portrayed in the early comedies. Orsino has reached a stage when, under the pressure of perpetual disenchantment, desire itself moves beyond the pleasure principle. Desire gives up pleasure in order to preserve itself as desire. Orsino is the first but not the last example of this desperate strategy.

The duke's desire for Olivia arises from the depth of his disenchantment and not in spite of it. A "rational" connection exists, but of such a nature that Orsino will never make it explicit, even to himself; we must deduce it from our comparison of the two speeches. In spite of his cynicism, Orsino is a man with a vast capacity for self-delusion.

To say that desire cannot survive the model's defeat is the same as saying that it cannot survive its own victory. The more desire learns about its own operation, the more intractable the dilemma becomes. Since desire dies of its own fulfillment, the road to eternal desire can only lie in the selection of a forever inaccessible object.

Orsino is the embodiment of this desire. The mimetic process takes time to unfold and, on this "historical" trajectory, Orsino belongs to a phase posterior to that of previous Shakespearean heroes. The chronological order of the comedies corresponds to a diachronic development of desire that leads from bad to worse. Orsino is not the end of the process, but he is not far from it.

His "hopeless" passion, I suggested, is a desperate move in a strategy of desire itself, a strategy of self-preservation. This is certainly true and yet a little misleading at the same time because this strategy demands no calculation, no planning of any sort and, in a sense, it does not deserve the name; it results from the normal drift of desire. All it takes to get there is a little too much success with women and then, all of a sudden, a little failure, the chance encounter of an Olivia. The quest for the perfect passion is hardly distinguishable from what happens to a blasé consumerist if and when he finally stumbles upon the forever
indigestible dish, the unconquerable object, the only object to which he can become durably attached.

By refusing to love him, Olivia renders a great service to the duke; she gives stability to his life. Deep down, the duke feels rather lucky; he is eager to perpetuate his sentimental deadlock with Olivia. When he and she finally come face to face in Act 5, the only words these strange accomplices exchange sound like a discreet acknowledgment of their negative partnership:

DUKE. Still so cruel?

OLIVIA. Still so constant, lord?

(v.i.110-11)

Orsino is confident that he can keep Olivia cruel forever. Since his desire is the model for her self-love, all he has to do, he thinks, to freeze the situation permanently in his favor, is to keep desiring her: she will keep rejecting not only him but all possible lovers; she will be the eternal prisoner of her monumental self-love, Orsino's personal gift to her. Even though he has fallen into "abatement and low price," Orsino feels that his prestige as a handsome young man and as a duke makes him superior to all potential suitors, so that Olivia will be forced to keep her part of the bargain; what she refuses to him she will never grant to any other man.

Orsino makes the usual mistake of "enslaved narcissists"; he has too much faith in the objective strength of his idol. This mistake is fatal. When he learns that Olivia has already betrayed him, he flies into a dreadful rage. Olivia is in love, and with whom? With Orsino's own ambassador! The irony of this is that, if something besides Olivia's narcissism is responsible for her falling in love, it is Orsino's behavior. He dispatched Cesario to his beloved because of the young man's personal charm, hoping that it would operate on Olivia as it did on him, and it certainly has; the duke's expectations are fulfilled beyond his wildest dream.

This plot is one more variation, of course, on the great Shakespearean theme of self-defeating mimetic lovers, who advertise the charms of their lovers to their rivals and the charms of their rivals to their lovers. The refined and subtle Orsino belongs to the same mimetic family as Valentine and Collatine. For a while, after he learns what has happened, he turns into a raving maniac. Olivia has fallen in love through Orsino's own mediation.

Notes

John Astington (essay date 1994)

[In the following essay, Astington explores the characterization of Malvolio in terms of the tension between paganism, Puritanism, and traditional Christian viewpoints in Twelfth Night. The critic compares Malvolio's humiliation to the mockery, exposure, and punishment of lust that was frequently a focus of traditional English folk festivals.]
... a good practise in it to make the steward beleue his Lady widdowe was in Loue with him by counterfayting a left'

John Manningham

He that is unmarried careth for the things that belong to the Lord, how he may please the Lord: But he that is married careth for the things that are of the world, how he may please his wife.

1 Corinthians, 7, 32-3

Now she that is a widow indeed, and desolate, trusteth in God, and continueth in supplications and prayers night and day.

But she that liveth in pleasure is dead while she liveth.

1 Timothy, 5, 5-6

Fashionably enough, the central farcical scene of Twelfth Night concerns an act of reading. What Malvolio reads and how he reads it have significant connections both with other events in the play, and with the wider world of seventeenth-century English society. The letter he finds invites him to join the festive rituals of love—to disguise himself, to smile, and to become a wooer, on the expectation of ending the revelling with epithalamium and marriage. This model for human conduct—the argument of romantic comedy—is in fact endorsed by a secondary text hidden within the first, as we shall see. But Malvolio, reading the words eagerly in the light of his predisposition, sees no subtleties, let alone the gaping trap. The festival in which he has already begun to take part is not the affirmative and sustaining one he imagines, but a punitive, defaming, mocking ritual aimed at him, his pride, pretensions, and authority. His reading—or misreading—marks his entry to a festive world, and festivals, like texts, are ambiguous. Particularly his treatment at the hands of the plotters forms a suggestive inverse ritual to set against those patterns which are traced by the energies of misplaced and baffled erotic desire, eventually untangled and fulfilled.

In the last scene of the play Feste finally delivers Malvolio's letter, excusing himself with the observation that 'madman's epistles are no gospels'. One could say that Malvolio's mistake has been to fall into the trap of taking a mad epistle for gospel, but here Olivia is not to be diverted by Feste's attempt to superimpose a theatrical style on plain sense: Orsino's recognition that 'This savours not much of distraction' echoes her own. Earlier in the play, Toby has pre-empted another plain reader, Viola, by rewriting Sir Andrew's challenge and by avoiding committing it to paper: 'this letter, being so excellently ignorant, will breed no terror in the youth. He will find it comes from a clodpoll. In the course of the play we have, then, two epistles which are gospels, in so far as their sense, or lack of it, is revealed in their style, and one which is dressed as a dish of poison, devilish and heretical.

Malvolio, if he is indeed a 'kind of puritan', should have had some experience in the interpretation of difficult or ambiguous writings, but he capitulates so absolutely to the apparent sense of a text that even Maria is amazed at his extreme folly: 'Yon gull Malvolio is turned heathen, a very renegado, for there is no Christian that means to be saved by believing rightly can ever believe such impossible passages of grossness.' Something has been wrong, clearly, with Malvolio's Puritan discipline, if he can fall so easily for 'some obscure epistles of love', taking the shadow for the substance in such an unguarded manner. In doing so, of course, he is unconsciously aping his betters, and it is the deluded Olivia who is readiest to understand and forgive him, pointedly comparing his case with hers twice in the play. Not that she is aware of her own delusion, however. She confidently assumes she is an accomplished reader of texts, and of bodies as texts, when she dismisses the first chapter of Orsino's heart, which Viola proposes as her gospel: 'O, I have read it. It
is heresy.

The revenge of foolery and holiday on Malvolio is motivated by his repressive and humourless sense of order, and by his self-conceit, but the terms of his humiliation are very deliberately chosen: not only is he made to transgress class barriers, but he is translated into a lover, about which role there is something deeply and fundamentally inappropriate. Malvolio's initial rule over the celibate, mourning household of Olivia is sterile and deathly. Sad and civil, he is customarily dressed in suits of solemn black, and he marks himself all too clearly as an enemy to the life of comic energy: his first line in the play invokes the pangs of death. Olivia's own brooding on death, however affected it may be, aligns her sympathetically with Malvolio's gloomy order: the entirely imaginary affection that Maria invents has at least a germ of plausibility about it. But Malvolio is valued by Olivia as a servant precisely because he appears to be passionless, 'Unmovèd, cold, and to temptation slow', a defender not only of wit, manners, and honesty, but of honesty in its sexual sense, a symbolic guardian at Olivia's gates. As a classically constructed blocking character, Malvolio inamorato is punished by the passion he apparently denies.

By the beginning of the box-tree scene, the treasons have already been planted in his mind, which is running on marriage: 'Having been three months married to her, sitting in my state—. . . Calling my officers about me, in my branched velvet gown, having come from a day-bed where I have left Olivia sleeping.' Dreams of power and luxury, therefore, accompany the relatively sober, yet preposterous 'married to her'; indeed the fantasy of high social rank runs slightly ahead of dreams of sexual indulgence. Married in his mind, he encounters the fateful epistle, the very letters of which drip with concupiscence. The style of the text he reads is a clever mixture of obliquity and directness, fustian riddles, grandiloquence, and minor rhetorical flourishes with a rather dated air. The prose begins with a clear warning—'If this fall into thy hand, revolve'—and immediately passes to an apparently clear statement—'In my stars I am above thee'—followed by a fugai development on the theme of greatness, which Malvolio is naturally disposed to hear with pleasure. Within the famous tripartite clause, thrice repeated in the course of the play, there lurks, perhaps, another warning for the truly virtuous. That is to say that the construction of this part of the epistle is remarkably close to gospel. In the nineteenth chapter of the Gospel according to St Matthew, Christ has been drawn by the Pharisees into a discussion of divorce and marriage. The complexities of morality and law lead the disciples to think that perhaps 'it is not good to marry'. In the King James Bible, Christ replies as follows:

11 But hee said vnto them, All men cannot receiue this saying saue they to whom it is giuen.

12 For there are some Eunuches, which were so borne from their mothers wombe: and there are some Eunuches, which were made Eunuches of men: and there be Eunuches, which haue made themselues Eunuches for the kingdome of heauens sake. He that is able to receiue it, let him receiue it.

Christ's words, he twice warns, are not to be understood by everyone, and the terms of his analogy are in many respects puzzling, but the evident centre of his meaning is that true greatness is not of this world, and that sexuality may be a bar to finding it. If Maria has intended this gospel text to serve as an allusive reflection beneath the surface of her epistle, the sense of the phrases begins to shimmer with opposites and distinctions: physical loss and spiritual gain, greatness and littleness (deficiency), fertility and sterility.

Malvolio has been offered an oblique warning about the futility of his marriage, if not a veiled insult, but fails to catch either. He would not, however, have known the gospel in the Authorized Version, and any kind of Puritan would have been most likely to be familiar with the Geneva Bible. The 1560 text translates the crucial verse in Matthew in a slightly different way:

For there are some chaste, which were so borne of (their) mothers bellie: and there be some chaste, which be made chaste by men: and there be some chaste, which haue made them
selues chaste for the kingdome of heauen.\textsuperscript{2}

The effect of 'chaste' is a good deal blander, and implies choice rather than compulsion or accident, although the second clause becomes puzzling in this respect. But the marginal glosses, a chief feature of the Calvinist bibles, leave the reader in no doubt over the sense in the first instance: 'the worde signifieth (gelded) and they were so made because they shuld, kepe the chambers of noble women: for they were judged chaste.' Malvolio, keeper of the chamber to Olivia, certainly wishes to be judged chaste, but is far from deeming himself unable to marry, from recognizing his own incapacity. The gloss on those that make themselves chaste, or who achieve chasteness, might we say, explains the phrase as a positive effect of grace, and of an effort of free will rather than negative self-abnegation or mutilation: Christ's phrase refers to those 'Which haue the gift of cotinece, & vse it to serue God with more free libertie.' And perhaps because the connection between chastity and godliness has an unfortunately Papist slant, the final sentence of the verse, Christ's second caveat, receives the following gloss: 'This gift is not commune for all men, but is verie rare, and give to fewe: therefore men may not rashly absteine from marriage.' The Puritan reading of the text, finally, is to endorse the argument of comedy. This is made particularly clear in Calvin's own commentary on these verses. Speaking of the disciples' uncertainty, he writes, perhaps rather surprisingly:

But why do they not think on their side how hard was the bondage of their wives? Simply because they are thinking only of themselves and their own convenience and are not motivated by the mind of the flesh that they forget others and want only themselves to be considered. Their ungodly ingratitude betrays itself that they reject this wonderful gift of God out of fear of one inconvenience or out of boredom. According to them it would be better to flee marriage altogether than to tie oneself to a perpetual bond of fellowship. But if God instituted marriage for the common welfare of the human race, it is not to be rejected because it carries with it some things which are less agreeable.\textsuperscript{3}

The world must be peopled, and the will of God followed. Malvolio may therefore have some sense of the buried text, but without necessarily reading it as being directed against marriage; God, or 'Jove', as he may have more innocously become by the time of the Folio text, seems to be overseeing the whole affair, including the interpretative spirit with which the sense of the words is received. Malvolio's reading of the letter, which he imagines to be free of 'imagination', could therefore be said to be a parody of the tendency of Puritan interpretation to read ambiguous texts in the direction of a theological programme, or to invoke the will of God to endorse personal predilections.

Godliness may render a man unfit for marriage, but the Geneva glosses also warn that 'Some by nature are vnable to marie, and some by arte'; 'The worde Eunuche is a generali word, and hath diuers kindes under it, as gelded men and bursten men.' By extension, one might say that the metaphoric application of physiological circumstances, Christ's starting point, hath divers kinds under it.\textsuperscript{4} Malvolio's spiritual sterility renders him unfit for comic marriage, whatever his physical potency may be. More importantly to the rituals of comedy, the gulling which is initiated in the box-tree scene is an extended episode of humiliation. Induced to declare himself no eunuch by nature, Malvolio then puts himself at risk of being made one by art. His self-exposure, capture, imprisonment, and binding—the entire course of his 'bafflement'—is not only the well-recognized expulsion of repressive order from festival and holiday, but an act of sexual degradation—a displaced gelding, through which Malvolio is emasculated by the laughter of the sexually united pairs:

Maria writ
The letter, at Sir Toby's great importance,
In recompense whereof he hath married her.

(\textit{Twelfth Night}, 5.1.359-61)
Yet however absurd the holy duty of marriage may seem in Malvolio's case—and it is not so much that the world has no need of more Malvolios as that he is contemplating marriage with the wrong person and for entirely the wrong reasons—it is extremely important to the play as a whole. 'If anyone imagines', says Calvin, 'that it is to his advantage to be without a wife and so without further consideration decides to be celibate, he is very much in error. For God, who declared that it was good that the woman should be the help meet for the man, will exact punishment for contempt of his ordinance. Men arrogate too much to themselves when they try The to exempt themselves heavenly calling, from their punishsolemnity of God's ment may be out of place in a comedy, as may the name of God itself, but the sense of 'heavenly calling' in sexual union is precisely in key with the magical happiness towards which the romantic comedies move. Resistance against this movement, or surprised acquiescence in it, is generally expressed with reference to purely natural or pagan forces, as when Viola speaks to Olivia about her beauty.

Lady, you are the cruell'st she alive
If you will lead these graces to the grave
And leave the world no copy.

(1.5.230-2)

Or when, at the end of the same scene, Olivia gives in to something beyond her own power to resist:

Fate, show thy force. Our selves we do not owe.
What is decreed must be; and be this so.

(1.5.300-1)

It is Olivia who most resists her obligation to marry by taking on a vow to what she imagines are higher things. Her withdrawal from the world is cast in the language of religious observance.

. . . like a cloistress she will veilèd walk,
And water once a day her chamber round
With eye-offending brine—

(1.1.27-9)

But the form of the observance, as Feste points out, is really without a religious object, an empty fetish like that of abjuring the sight and company of men, 'as if celibacy contained some meritorious service—just as the Papists imagine it is an angelic state. But all Christ intended', Calvin says of making oneself a eunuch for the kingdom of heaven's sake, 'was that the unmarried should set the aim before them of being more ready for the exercises of religion if they are freed from all cares. It is foolish to imagine that celibacy is a virtue, for this is no more pleasing to God in itself than fasting is, nor does it deserve to be reckoned among the duties required of us.' The 'divinity' the disguised Viola brings to Olivia shows her the vanity of withdrawing from the world. False and true divinity continue to pursue each other, with ironic effect, throughout the play. Immediately following the scene in which a false priest catechizes the desperate Malvolio, Olivia marries the dream she has loved since the fifth scene of Act I.

If you mean well
Now go with me, and with this holy man,
Into the chantry by. There before him,
And underneath that consecrated roof,
Plight me the full assurance of your faith,
That my most jealous and too doubtful soul
May live at peace.

(4.3.22-8)

The wonderful gift of God is celebrated in a religious ceremony which the seemingly arbitrary forces of nature, imagination, and sheer chance have helped bring about. The 'peace' Olivia looks forward to is precisely what has eluded Malvolio at the end of the play—but his symbolic and structural roles are very different from hers.

Viola's loss of a brother does not lead her to a cloistered withdrawal from the world, but she does pursue concealment, and specifically proposes a disguise which will remove her from the responsibilities of sexuality: 'Thou shalt present me as an eunuch to him.' She makes herself a eunuch not for the kingdom of heaven's sake but to gain some advantage over the forces of time and occasion, both of which eventually give her the peace they give Olivia. The exotic nature of Viola's proposed role, however, is unlikely to render her unobtrusive: in a Christian climate the eunuch was both freakish and foreign, specifically Turkish, as the Captain recognizes in his acknowledgment of Viola's request. Eunuchs might be fascinating in themselves as human types, but certainly by virtue of being involved in the mythologized fantasy world of Turkish sexuality. No more is made of the oddity of Viola's disguise—she is no Castrucchio, as Orsino's Illyria is not Volpone's Venice—but she retains a troublingly provocative physical presence, constantly drawing attention to her appearance from Orsino, Malvolio, Feste, and chiefly from Olivia. Disguise, and hence denial of sexual identity in her case, is a 'wickedness' as much as it is creative and liberating. It liberates, in fact, only for so long, and time first draws the knot of confusions tighter before untangling it. Olivia's claim on her as a husband, which she is able to corroborate with priestly authority, threatens first Viola's death and then the loss of the man she loves. So, once the appearance of Sebastian has begun to resolve the paradoxes, we have Viola's insistence, echoed by Orsino, that she resume her own clothes: 'Do not embrace me' she tells her brother, and the prohibition is implicitly extended to her future husband. As she is a man—or a eunuch—she is not ready to give herself to anyone.

Viola's superfluous disguise in Act 5 is matched by that of the humiliated Malvolio, still wearing the ludicrous costume he has been gulled into assuming by his reading of the letter—point devise, the very man. The 'notable shame' he has undergone has included his parading in the clothes and demeanour of an aspiring lover—a sexual role quite out of keeping with his peevish, repressed, sterile self-regard. One of the roles of festival customs, modern social historians agree, was to enforce communal order as much as temporarily to subvert it. David Underdown has described the clash in seventeenth-century English society between the cohesive function of festival and the godly order of those with a new vision of and programme for social organization:

The division in the English body politic which erupted in civil war in 1642 can be traced in part to the earlier emergence of two quite different constellations of social, political, and cultural forces, involving diametrically opposite responses to the problems of the time. On the one side stood those who put their trust in the traditional conception of the harmonious, vertically integrated society—a society in which the old bonds of paternalism, deference, and good neighbourliness were expressed in familiar religious and communal rituals—and wished to strengthen and preserve it. On the other stood those—mostly among the gentry and middling sort of the new parish élites—who wished to emphasize the moral and cultural distinctions which marked them off from their poorer, less disciplined neighbours, and to use their power to reform society according to their own principles of order and godliness.7

The church ale—at which cakes and ale were the traditional fare—was one typical site of this conflict. An ancient parish tradition—a kind of communal picnic with drinking, as well as piping, dancing, and sometimes dramatic activity—its function was to bring the parishioners together in a festive money-raising activity to
support the parish's charitable works. To the Puritan eye this praiseworthy end was entirely vitiated by the displays of unrighteousness the feast gave rise to. From about the time of Twelfth Night onwards there are numerous instances from across the country of festal customs being used against local Malvolios, in the course of which the representatives of authority were both mocked and, in extreme cases, physically assaulted.

Violence is in fact an entirely traditional ingredient of many forms of game and festival, and hence could give further cause to the godly to suppress festive customs. The liminal and group-bonding functions of football games with neighbouring villages, for example, are noted by Underdown: "Tis no festival unless there be some fightings' is a contemporary saying he quotes (p. 96). Personal or communal rivalries and disputes could therefore be sorted out—more or less symbolically—under the cover of festival licence. In Twelfth Night it is Sir Toby who is the lord of violent misrule, and he is perhaps not uncharacteristic of enthusiastic seventeenth-century revellers in that during his final appearance in the play he is both drunk and bleeding. The particular contest he has just lost, begun in jest and ended in earnest, is with a young stranger over his apparent sexual invasion into territory Toby may regard as his to defend, if not to bestow. However ironically, he has promised Olivia to Sir Andrew, and his oath to his gull earlier in the play is made on the physical manifestations of his own manliness: 'If thou hast her not i'th' end, call me cut' (2.3.180-1). Once Cesario shows some fighting spirit, male prowess is at stake: 'Come, my young soldier, put up your iron. You are well fleshed . . . Nay then, I must have an ounce or two of this malapert blood from you' (4.1.37-43).

Malvolio's heated imaginings about Olivia in the letter scene give rise to a string of violent stage-whispers from the box-tree—'O for a stone-bow to hit him in the eye!'; 'Fire and brimstone!'; 'Bolts and shackles!' (a premonition of Malvolio's punishment); 'Shall this fellow live?'; '. . . does not Toby take you a blow o' the lips, then?'; 'Out scab'; 'Marry, hang thee brock'; '. . . I'll cudgel him, and make him cry "O!"' After this, Malvolio is perhaps lucky to undergo the relatively lenient treatment he gets, although it is certainly a fairly frequent tendency in modern stagings of the play to emphasize the physical punishment in the revellers' teasing of him in 3.4, and since the eighteenth century the pain and privation of the dark house scene have often been stressed, to the degree that Malvolio has seemed on the edge of being mad indeed. His binding—promised by Sir Toby in 3.4—is not usually seen. He leaves the stage free, and while on Shakespeare's stage he may have been entirely invisible in 4.2, these days we tend to see an anguished face and beseeching, clutching hands as he pleads with Sir Topas and Feste. In any event, in fictional terms he must be free enough to write his letter, and when he re-emerges into the world of light he doesn't usually bear about him signs of his bondage (the far commoner stage tradition is for him to have straw sticking to his hair and clothes). Yet he is still dressed in his lover's garb, as I noted above, usually sadly muddied and ripped in performance, to signal the trials of constancy. The absurd costume, Maria's fantastical invention, includes the restricting bonds of the cross garters, which soon after he has put them on are already making him 'sad':

This does make some obstruction in the blood, this cross-gartering, but what of that?

(3.4.19-21)

The Grocer's Wife from The Knight of the Burning Pestle could tell him; there are dangers in putting on silly costumes: 'Tis no festival unless there be some fightings' is a contemporary saying he quotes (p. 96). Personal or communal rivalries and disputes could therefore be sorted out—more or less symbolically—under the cover of festival licence. In Twelfth Night it is Sir Toby who is the lord of violent misrule, and he is perhaps not uncharacteristic of enthusiastic seventeenth-century revellers in that during his final appearance in the play he is both drunk and bleeding. The particular contest he has just lost, begun in jest and ended in earnest, is with a young stranger over his apparent sexual invasion into territory Toby may regard as his to defend, if not to bestow. However ironically, he has promised Olivia to Sir Andrew, and his oath to his gull earlier in the play is made on the physical manifestations of his own manliness: 'If thou hast her not i'th' end, call me cut' (2.3.180-1). Once Cesario shows some fighting spirit, male prowess is at stake: 'Come, my young soldier, put up your iron. You are well fleshed . . . Nay then, I must have an ounce or two of this malapert blood from you' (4.1.37-43).

Malvolio's heated imaginings about Olivia in the letter scene give rise to a string of violent stage-whispers from the box-tree—'O for a stone-bow to hit him in the eye!'; 'Fire and brimstone!'; 'Bolts and shackles!' (a premonition of Malvolio's punishment); 'Shall this fellow live?'; '. . . does not Toby take you a blow o' the lips, then?'; 'Out scab'; 'Marry, hang thee brock'; '. . . I'll cudgel him, and make him cry "O!"' After this, Malvolio is perhaps lucky to undergo the relatively lenient treatment he gets, although it is certainly a fairly frequent tendency in modern stagings of the play to emphasize the physical punishment in the revellers' teasing of him in 3.4, and since the eighteenth century the pain and privation of the dark house scene have often been stressed, to the degree that Malvolio has seemed on the edge of being mad indeed. His binding—promised by Sir Toby in 3.4—is not usually seen. He leaves the stage free, and while on Shakespeare's stage he may have been entirely invisible in 4.2, these days we tend to see an anguished face and beseeching, clutching hands as he pleads with Sir Topas and Feste. In any event, in fictional terms he must be free enough to write his letter, and when he re-emerges into the world of light he doesn't usually bear about him signs of his bondage (the far commoner stage tradition is for him to have straw sticking to his hair and clothes). Yet he is still dressed in his lover's garb, as I noted above, usually sadly muddied and ripped in performance, to signal the trials of constancy. The absurd costume, Maria's fantastical invention, includes the restricting bonds of the cross garters, which soon after he has put them on are already making him 'sad':

This does make some obstruction in the blood, this cross-gartering, but what of that?

(3.4.19-21)
Malvolio. The previously unannounced Fabian enters the play in 2.5 as a further resentful victim of Malvolio's war on holiday pastimes: he has been 'brought . . . out o' favour with my lady about a bear-baiting here'. 'To anger him,' Toby replies, 'we'll have the bear again, and we will fool him black and blue'. Once again the promised violence happens only symbolically—Malvolio is not beaten up as is Captain Otter (as bear) by his wife (as dog) in Jonson's *Epicoene*—but we are reminded at this moment of the strong connections between festival and brutal punishment, and the evident need to give vent to disruptive and aggressive tendencies even in the midst of celebrations which affirmed the strength and mutual support of the community. Malvolio's bearishness remains in that he sees his tormentors as a 'pack'—hounds rather than people—at the end of the play.9 The violent accompaniments of festive activity are everywhere apparent in the social world surveyed by David Underdown: bear and bull baatings are the invariable entertainments at church ales. While one may have been attendant on feasting—the bull was baited before being butchered—the other patently was not. That the actual torturing of animals, whatever symbolic function it may have been recognized to carry, could itself take a symbolic form in festival is proved by an intriguing reference Underdown cites from Somerset in 1603, involving some trouble while someone was 'playing Christmas sports in a bear's skin' (p. 60). Such a winter-time activity—very reminiscent of Lanthorn Leatherhead's reported feats in *Bartholomew Fair* (3.4. 126-28)—may have as much to do with *The Winter's Tale* as with *Twelfth Night*, but the ritualized hunting that is expressed in animal baiting, and the deliberate arousal, in the case of cock-fighting, for example, of competitive sexual aggression in the animals, reveal an ambivalent fascination with purely physical power and instinctive drive as forces which must be celebrated, yet punished.10 Jonson, once again, more directly incorporates festive baatings and huntings into his comic structure, and his plays are to that extent crueler than Shakespeare's. Volpone's direct address to the audience following his sentence by the court—'This is called mortifying of a fox'—reminds us of the festive custom of hunting a fox or other small animal indoors, within the hall at a feast, frequently involving killing it by driving it into the fire. One of the fox's sins in *Volpone*, of course, is lust. The totemic sexual rituals associated with hunting and killing the stag, however, are clear enough in Shakespeare's work. The festive song in *As You Like It* is an anthem of male prowess and anxiety—the lusty horn is given to the victor as a sign that he is a potential victim of forces which lie outside his direct control. Falstaff's ritual punishment for lust at the end of *The Merry Wives of Windsor* is suffered in the disguise of a male deer—he is symbolically pinched and burnt, rather than actually butchered and cooked. Falstaff's dis-horning, George Turberville tells us, exactly follows the English practice of dismembering the stag after the kill; following the removal of one sign of the deer's maleness, 'before that you go about to take off his skynne, the fyrst thing that must be taken from him, are his stones which hunters call his doulettes'. These form part of 'the dayntie morselles which appertaine to the Prince or chief personage on field',11 In Beaumont and Fletcher's *Philaster* the cowardly and lustful Pharamond has paid the woodmen for the dowcets and head of a slain deer (4.2)—that he evidently needs them as aphrodisiacs hardly commends his unassisted sexual powers. Following the scenes of actual hunting in the fourth act, Pharamond becomes the human quarry of a popular riot in the fifth, when the citizens, like Laertes' Danish supporters, mutiny to reinstate Philaster. The language with which they threaten him deliberately recalls the hunting terms of Act 4, and his proposed punishment mockingly strips him of manhood.

**PHARAMOND** Gods keep me from these hell-hounds.

1 **CITIZEN** Shall's geld him, Captain?

**CAPTAIN** No, you shall spare his dowcets, my dear donsels; as you respect the ladies let them flourish. The curses of a longing woman kills as speedy as a plague, boys.

1 **CITIZEN** I'll have a leg, that's certain.

2 **CITIZEN** I'll have an arm.

2 **CITIZEN** He had no horns, sir, had he?
CAPTAIN No, sir, he's a pollard; what wouldst thou do with horns?

2 CITIZEN O, if he had, I would have made rare hafts and whistles of 'em; but his shin bones if they be sound shall serve me.

(5.4.53-74)12

Symbolic hunting therefore carries within it a potential for sexual shaming and degradation. Pharamond and Falstaff are both punished for lust by public exposure, and Malvolio's treatment clearly has something of a similar purpose, although it certainly lacks the direct physical violence the two former figures suffer. At least this is so in the text; there is a theatrical tradition of varying degrees of physical torture of Malvolio by Feste in 4.2. Malvolio's punishment is to be 'propertied', but largely to be forgotten, removed, and 'baffled' until his incandescent entry into Act 5. He is certainly punished for excess, but punished by deprivation, and his physical powerlessness in the dark house is to remind him of his unsuitability for the preposterous role he has taken on. A born eunuch, in Christ's terms, he is absurdly unfitted for the position of comic wooer and bridegroom.

The impotent lover, in body, mind, and social conduct, is a stock figure of erotic comedy. The absurdly enamoured father, the old man, the stupid heir, the pretentious braggart, the rake, all are variant threats to the union of the true lovers, and they must be outwitted, exposed, or otherwise removed in the course of the plot. In Jonson's Bartholomew Fair the egregious ninny Cokes, the contracted bridegroom of the witty but powerless Grace Wellborn, loses his fiancée to Quarlous in the liberating chaos of a festival atmosphere. He also loses his money, but in having his purse cut—twice—he is symbolically gelded of the manhood he so ineptly represents. He half recognizes what has happened to him in the words he addresses—mistakenly—to Overdo: 'Cannot a man's purse be at quiet for you, i' the master's pocket, but you must entice it forth, and debauch it?' (3.5.213-14), while Wasp scornfully tells his charge 'now you ha' got the trick of losing, you'd lose your breech, an't 'twere loose' (ibid. 221-3).13 Cokes, though he hardly cares in the regressively childish festive world he has entered, is symbolically shamed and neutered. His fascination with the puppets, babies, and trash is a complete identification—he, like the puppet Dionysius, has no sex. It is Jonson's disciple Richard Brome who writes the frankest version of what appears to be a submerged theme of festival and comedy when in his 1639-40 play The Court Beggar a doctor is held down across a table and threatened with castration at the hands of a 'Sowgelder' (4.2). His protests remind the audience of the dangerous uproar of popular holidays:

You dare not use this violence upon me
More rude than rage of Prentices.

The gelding turns out to be a 'counterfeit plot'—partly a deliberate degradation in revenge for the doctor's prior actions, and partly to scare him into confessing that the patient he is attending is, like Antonio in The Changeling, a sham madman. The scene could therefore be taken simply as a particularly risqué piece of farce used to enliven a rather creakily episodic plot, yet the larger question remains of why this particular action may have occurred to Brome as being suitable to a comedy filled with spurious and defective wooers.15

Nothing quite so specifically humiliating or violent turns up in the court records of pre-Restoration England, although there is a good deal of material connected with disorders and outrages arising from popular rituals of sexual control.16 The usual individual target for the community to direct its displeasure over aberrant sexual conduct was likely to be a woman; the whore, the adulteress, the scold, all suffered ritual mockery, exposure, and varyingly violent degrees of punishment. Yet the ceremonies which marked such disapproval—ridings,
parades, rhymes, lampoons, duckings, and so forth—were by no means directed at women alone. The man who suffered himself to be cuckolded or beaten was likely to be a target of mockery as an unmanly man, a man who couldn't wear the breeches. One particularly widespread custom, which has a literary record that stretches at least from Samuel Butler to Thomas Hardy, was the skimmington, a wild processional ride involving disguise, rough music, and, as Martin Ingram has written, 'mocking laughter, sometimes light-hearted, but often taking the form of hostile derision which could, on occasion, escalate into physical violence'.17 The ritual is clearly related to symbolic hunting, and indeed could feature participants dressed in horns or animal skins. If the custom arose to mock unconventional sexuality or deviant behaviour within a marriage its scope could be far wider, as Ingram explains:

While female domination and immorality were the characteristic pretexts for ridings, there were other occasions. A simple form of riding was sometimes used in a holiday context in 'trick or treat' games, and to punish people who refused to join in the festivities or who in other ways offended the holiday spirit. At Chichester in 1586, a game of 'tables' on New Year's Eve was rudely interrupted when William Brunne who then played the part of a lord of misrule came in . . . and said that that game was no Christmas game and so perforce took [one of the players] . . . from thence and made him ride on a staff to the High Cross.' The use of ridings to punish people who would not give money to Lords of Misrule on holidays was denounced by Philip Stubbes. Unfortunately, when refusal to take part in festivities (or, worse still, attempts to suppress such festivities) were based on Puritan principles, such ridings were apt to become distinctly less lighthearted and more elaborate. John Hole, the Puritan constable of Wells, discovered this to his cost in 1607. Hole and his associates tried to suppress the city's May games, which had been organised on a particularly grand scale that year in order to raise money for the repair of St Cuthbert's church. Hole's interference raised a storm of opposition, and he and his friends were savagely derided in a series of spectacular ridings performed before thousands of people.

(Ingram, pp. 170-1)

The John Hole case, which was surveyed by C. J. Sisson in Lost Plays of Shakespeare's Age as long ago as 1936, is particularly suggestive about the treatment given Malvolio by the revellers of Twelfth Night. Hole, like Malvolio, set out to oppose holiday revels on principle; the revellers' revenge was character assassination, as Hole was accused of adultery with another godly objector to the festival, the delightfully named Mrs Yard. None of the surviving lampooning verses make what one would think to be the obvious jokes about hole and yard (suitably inverted in good festival fashion), but Hole is simultaneously accused of lechery and impotence, like Malvolio doubly mocked for sexual ambition and incapacity. Particularly the exposure of the Wells killjoys by theatricalizing them—staging them in disguises and caricatured paintings—by making them join, in effigy at least, the very celebrations they have tried to stop, reveals a direct relationship between festive rituals and the comic structure of such plays as Twelfth Night. In the play Malvolio is more subtly tricked into staging himself as a parodic festival figure—a grotesquely inept embodiment of the energy celebrated in holidays, and as such a betsy, a guy, a Jack-a-Lent, a cockshot man, at whom people can hardly forbear hurling things. Death, darkness, sterility, and ill luck are heaped on his back, and laughed out of the play.

His scapegoat function has frequently been remarked on, but one theoretical defence of festive customs, presumably including the shaming rituals, was that they were restorative and socially cohesive. The exhibition of conflict or aberrance under the special conditions of holiday licence would lead, with luck, to resolution and rehabilitation. Thus those accused as rioters at Rangeworthy near Bristol in 1611 defended themselves by pointing out that communal feasting was for 'the refreshing of the minds and spirits of the country people, being inured and tired with husbandry and continual labour . . . for preservation of mutual amity, acquaintance, and love . . . and allaying of strifes, discords and debates between neighbour and neighbour'.
This sounds remarkably like the spirit of Fabian's plea to Olivia not to let retributive justice inappropriately be applied to holiday jests:

Good madam, hear me speak, 
And let no quarrel nor no brawl to come 
Taint the condition of this present hour, 
Which I have wondered at. In hope it shall not, 
Most freely I confess myself and Toby 
Set this device against Malvolio here

How with a sportful malice it was followed 
May rather pluck on laughter than revenge 
If that the injuries be justly weighed 
That have on both sides passed.

(5.1.352-65).

But the victims of the Rangeworthy riot, a Puritan constable and his followers who were beaten when they tried to arrest musicians and dancers, did pursue their case through the courts, and hence we happen to know about the incident. David Underdown holds up this obscure rural scuffle as an emblem of a changing world: 'The Rangeworthy revel is thus a classic example of Jacobean cultural conflict. Rituals appropriate to a traditional society, enshrining ancient values of custom and good neighbourhood, were attacked by people in authority who put individual piety, sobriety, and hard work above the older co-operative virtues' (p. 63).

Malvolio refuses Fabian's open hand. He has, after all, been most notoriously abused, and excluded from achieving greatness in any sense. Donald Sinden's entertaining account of playing the part ends with his invocation of the bitterness of Malvolio's humiliation and disappointment. There is nothing for him following his exit, Sinden suggests, save suicide. 18 Yet surely only a particularly sensitive, late-Romantic Malvolio would be snuffed out by a device. I think the seventeenth-century man is heading for his lawyer, and Star Chamber.

To return, finally, to texts, it is worth noting that mock preaching was a recurrent element in popular revels, particularly those with a satiric thrust against a local community figure. Such was the play which Sir Edward Dymock had performed at his house in Kyme, Lincolnshire, in August 1601, and which guyed Henry, Earl of Lincoln. Following the play proper one John Cradock preached a mock sermon in a black gown and cap; a witness said that he wore 'A counterfeat beard, and standing in a pulpitt fixed to the maypole on kyme greene, having a pott of ale or beare hanginge by him in stead of a hower glasse.' The costume sounds remarkably like that of Sir Topas, but the performance was evidently a good deal more elaborate, though entirely in key with Feste's excellent fooling. Cradock 'did represent the person of a Minister or Priests, and did . . . utter . . . "The Marcie of Musterd Seed and the blessing of Bullbeefe and the peace of Pottelucke be with you all. Amen."' 19 Cradock's spoof text for the sermon, from 'The 22 chapter of the book of Hitroclites', led to a series of improbable romance tales and jests, possibly with further parodic reference to the formulae of the liturgy and scripture. Some years later in Wiltshire a drunken revel included the preaching from the pulpit within the parish church of a mock sermon on the text of 'the one and twentieth chapter of Maud Butcher and the seventh verse' (Ingram, p. 166). Mockery of ecclesiastical authority and liturgical frameworks for mock heroics may be thought particularly Rabelaisian revels, but they were evidently equally English, and survived to the years when they might be employed to deride Puritan earnestness. If they did not appear overtly in plays licensed for the public stage, that should not surprise us. The subtler parodic text Maria includes in the spurious letter is at once a test of Malvolio's reading, a word to the wary, and a libel on his sexuality; as such it lies entirely within the English festival tradition.
Notes

1 A further interpretation of Malvolio's chosen letters has been suggested by Leah Scragg: "Her C's, her U's, and her T's: Why That?": A New Reply for Sir Andrew Aguecheek', RES 42 (1991), 1-16. Her suggestion that the line may have some reference to cutpurses has an interesting incidental bearing on my argument in this essay: see below.

2 This translation is superseded by the 1582 (et seq.) Geneva New Testament, which gives the word as 'eunuches', and in every other respect is very close to the King James version. The Bishops' Bible (1568) uses 'chaste'.

4 That the text was read literally as well as metaphorically is demonstrated by its citation in the discussions over the Essex divorce case in 1614. George Abbot, Archbishop of Canterbury, quoted the passage as clear 'warrant' for annulment of marriage. King James, arguing against too narrow a definition of 'inability', denied that Christ's categories of male impotence were prescriptive. See The Narrative History of King James (London, 1651), pp. 95, 102. I am grateful to Professor Leslie Thomson for drawing my attention to this material.

5Harmony, p. 249.

6Harmony, p. 249.

15 For a political reading of the play see Martin Butler, Theatre and Crisis 1632-1642 (Cambridge, 1984), pp. 220-8. The aberrant sexual behaviour in the play might be said to be a further manifestation of the madness and corruption Butler locates as its organizing themes.

16 An incident related in a letter by Robert Gell to Sir Martin Stuteville in July 1628 concerns violent revenge for rape at the siege of La Rochelle. Ten men of the town dressed up as women to lure the guilty soldiers of the besieging army, who then 'were so received that all to save their lives yielded unto ye young men, and went into the town, where, being most severely and barbarously punished, they were sent back to glory in the camp of their exploit, for which they were never again fitted'. The Autobiography and Correspondence of Sir Simonds D'Ewes, Bart., ed. J. O. Halliwell, 2 vols. (London, 1845), vol. 2, p. 201.
When Sebastian enters the last scene of *Twelfth Night* and begins to untangle the various intricacies of the plot, Duke Orsino describes his vision of Sebastian and Viola together in these words:

> One face, one voice, one habit, and two persons—
> A natural perspective that is and is not.

Orsino refers to a set of Renaissance artifacts, including complicated mirrors, which highlighted the effect of perspective on human vision. With some of these 'perspectives', a confusion of images would resolve themselves into clarity if viewed from one indirect position. In others, like Holbein's famous painting of 'The Ambassadors', two images could only be seen clearly from two entirely different points of view. Orsino's reference to a 'natural perspective that is and is not' implies not only that he thinks nature has produced before him what is usually the work of art by bringing two mirroring figures on the stage at once; he also suggests that one of these figures, Viola or Sebastian, is a confusion to the eye, and if one took the proper point of view, the confusion would be cleared. But the play reveals that things are more complicated than he would like: there is no view from which Viola will blend into Sebastian; the play proves that Orsino must learn to accept the confusion or the deeper clarity of two, equally viable, points of view.¹

Orsino’s reference to the 'perspective' reproduces the problem of gender in the play (are women and men twins in their mental and emotional abilities? do they have fundamentally different perspectives?). But it also evokes the play's twin issue: the relationship between gender and status. The play in fact treats these issues as reflections of each other: Viola's relationship to Orsino includes both that of woman to man and that of servant to master. More complexly, Viola's relationship to Orsino mirrors Malvolio's relationship to Olivia: both servants want to marry their masters; both men in these pairs are self-obsessed; both women seem far more intelligent than their male counterparts. Shakespeare considers the compatibility of servants and masters as he considers the comparability of men and women. When Orsino recognises the 'impropriety' of Viola's service to him, he puts it in terms of gender and status:

> So much against the mettle of your sex,
> So far beneath your soft and tender breeding.

(V, i, 322-3)
The artful rather than natural perspective of the play moves us to compare men and women, servants and masters, gender and status, and to ask if one can ever get all these issues clearly into view, while respecting their differences and understanding their connections.

The questions evoked by Orsino's reference to the 'perspective' are remarkably similar to those posed by the historian Joan Kelly in her article on gender and class, called 'The doubled vision of feminist theory'. Kelly urges feminist historians to recognise that a 'woman's place is not a separate sphere or domain of existence but a position within social existence generally'. She claims that feminists can see 'the relations of the sexes as formed by both socio-economic and sexual-familial structures in their systematic connectedness'. She posits a critical method which would acknowledge the differences of feminism and Marxism, and yet recognise that the issues of gender and class can only be clearly understood in their relation to each other:

'From this perspective, our personal, social and historical experience is seen to be shaped by the simultaneous operation of relations of work and sex; relations that are systematically bound to each other—and always have been so bound.'

Twelfth Night was written during a period before a woman's place was imagined as a separate sphere, since, for the Renaissance, a woman was considered to be analogous to other social inferiors in a hierarchical society. The Anglican homily on obedience substantiates its political claims through a mirroring set of obligations: 'some are in high degree, some in low, some Kings and Princes, some inferiors and subjects, Priests and laymen, Maisters and servauntes, Fathers and children, Husbands and Wives.' English society linked gender and status in its own, Renaissance version of Kelly's 'systematic connectedness'. The homily on marriage teaches wives to 'cease from commanding, and performe subjection' by using the same set of analogies: 'For when we ourselves doe teach our children to obey us as their parents, or when we reforme our servants, and tell them that they should obey their masters . . . If they should tell us againe our dueties, we should not thinke it well done.' The homilies testify to the flexibility of this system of correspondences, since women can be included as parents when it serves the purpose (in the homily on marriage) but excluded when it does not: the homily on obedience prefers 'Fathers and children'. Shakespeare, and other authors, constructed literary representations of these mirroring social estates sometimes to reinforce the ideology preached in the homilies, sometimes to challenge it, but primarily by evoking and manipulating what amounted to a cultural language of the analogies of subordination.

Kelly's article suggests that we need to include a historical perspective of both gender and class in our analysis of literature. My thesis is a development of hers: we can understand how gender operates in Renaissance literature only if we consider its relationship to status or class, and only through focused historical research about socio-economic structures, as Kelly puts it, as well as sexual-familial structures. We have to uncover, first, how representations of gender and status in a particular work operate within the Renaissance language of interconnection, and, second, how these representations express or elide actual conditions. Materialist feminists and, actually, all literary historicists have to create a 'perspective' of their own, in which gender and status, literature and history can be perceived in a modern account of their 'systematic connectedness'.

Twelfth Night dramatises the issue of social mobility through women who, though servants, are as capable as their male masters, and who rise out of their role as servants to become their master's mistresses. Our problem is to tease out the ideological significance inherent in the play's version of the cultural mirroring process, a version which links women and aspiring servants, marriage and social mobility. Twelfth Night considers advancement in terms of a marriage market which in the play is much more open to personal choice and status exogamy than it is in traditional society, and which also firmly closes down at particular moments. In the play, both men and women improve their lot through this open market, but the play explicitly compares the success of its women to the failure of particular men, who are excluded from the gifts of fortune for reasons which are culturally significant. Not only are female triumphs compared to male inadequacies; the proper attitude towards marriage becomes the mirroring reflection of the proper attitude towards social advancement. The play therefore transfers anxieties about fluid social relations onto gender relations, and solves the problem...
through its ideal of marriage. I will argue that the play dramatises the superiority of women to men in order to call into question the rigid structures of the traditional order, and, in the process, to validate certain forms of social mobility. Nevertheless, such questioning is contained through the play's model of marriage, which requires a 'loving' commitment to others. The ideology of the play resides in its formulation of love, which includes both dominant, traditional notions of interdependence, and newly emerging attitudes towards individual choice and personal desire, or, as the play puts it, 'will'.

As all critics of the play have noticed, desire or 'what you will' is the motivating force in the play, but this will or appetite is often hungry not only for music, drink or love, but for an improved social position. Maria's forged letter of love from Olivia to Malvolio, which promises him that 'thou art made, if thou desir'st to be so', is a jesting version of the projects of the other characters (II, v, 150-1). Sir Toby Belch seeks to better Sir Andrew Aguecheek's estate and his own by marrying Sir Andrew to his niece, Olivia. After Olivia marries Sebastian, and meets the unknowing Cesario in Act V, Olivia says:

Fear not, Cesario; take thy fortunes up,
Be that thou know'st thou art, and then thou art
As great as that thou fearest.

(V, i, 147-9)

Olivia points out the social distinction between Cesario and Duke Orsino, but exhorts the servant to embrace his new position as her husband, an estate which makes him as 'great' as his master. Marriage may be the goal of desire in the play, but these marriages can also elevate one of the partners to a higher social estate. Love and desire participate in the process of social mobility made most visible in Cesario's association with the Duke. Valentine says, 'If the Duke continue these favours towards you, Cesario, you are like to be much advanced' (I, iv, 1-2). Orsino says:

Prosper well in this,
And thou shalt live as freely as thy lord
To call his fortunes thine.

(I, iv, 38-40)

Viola herself has explicitly chosen her place in the play: 'I'll serve this Duke' (I, ii, 55); her marriage to him at the end of the play turns Cesario's advancement into a love-match.

The notion that one's social estate could be subject to one's will or a matter of desire underlies the play's simultaneous consideration of the relation of man to woman, and of master to servant. When Viola woos Olivia for Orsino, but wins her heart for herself, the wonder of it lies not only in that a woman has been mistaken for a man, but that a woman has been mistaken for a gentleman. When alone, Olivia repeats to herself her questioning of Cesario, and reveals her attraction to what she takes to be his 'gentility':

'What is your parentage?'
'Above my fortunes, yet my state is well.
I am a gentleman.' I'll be sworn thou art.
Thy tongue, thy face, thy limbs, actions, and spirit
Do give you fivefold blazon. Not so fast; soft, soft,
Unless the master were the man. How now?
Even so quickly may one catch the plague?
Methinks I feel this youth's perfections
With an invisible and subtle stealth
Olivia feels the inappropriateness of falling in love with a servant, but we see that she has in fact fallen for a cleverly created illusion, Viola's capable representation of the attributes of an upper-class young man, with his tongue, face, limbs, actions and spirit. As Sir Andrew puts it, 'That youth's a rare courtier' (III, i, 88). The argument of some critics that Viola's nobility shines through her disguise must be qualified by the emphasis that the play puts on manipulating illusions and fashioning appearances. Viola's success at this task is measured by Sir Andrew Aguecheek's failure; he is both male and knight, but his inadequate wit and verbal awkwardness ensure that he will be 'put down' by both Maria and Sir Toby (I, iii, 79).

In the play, a gentleman is 'made' and made loveable not by his title or blood, but by his (or her) will. Olivia makes it quite clear that she cannot love Duke Orsino simply for his aristocratic blood, though he is 'noble' and of 'great estate', 'a gracious person' both 'in dimension and the shape of nature' (I, v, 255-60). Cesario instead wins Olivia's heart when he plays the wilful lover:

Viola

If I did love you in my master's flame,
With such a suff'ring, such a deadly life,
In your denial I would find no sense;
I would not understand it.

Olivia
Why, what would you?
Viola
Make me a willow cabin at your gate
And call upon my soul within the house;
Write loyal cantons of contemned love
And sing them loud even in the dead of night;
Hallo your name to the reverberate hills
And make the babbling gossip of the air
Cry out 'Olivia!' O, you should not rest
Between the elements of air and earth
But you should pity me.

Olivia
You might do much. What is your parentage?

(V, 262-75)

Viola's reference to and demonstration of her verbal talents reveal that a gentleman's 'tongue' and 'spirit' are the result of intelligence and will, rather than gender or the 'great estate' that supports Orsino. Olivia in fact only becomes interested in Cesario's parentage after she is impressed with his linguistic potency. Viola is as able as the clown, whom she commands for the skills that she, he and a successful courtier share:

He must observe their mood on whom he jests,
The quality of persons and the time.

(III, i, 63-4)

A good wit can turn a sentence inside out, like a 'chev'ril glove' (III, i, 12); he can turn a woman into a man or a servant into a master. Viola and Maria are twinned in the play because, whereas Viola can produce the appearance of a man, Maria can produce the appearance of her mistress, not only through the similarity of their handwriting, but through the use of language that convinces Malvolio that this is indeed 'my Lady's hand' (I, v, 84). The skilful intelligence of Viola and Maria wins for them marriages which improve their social estate: clearly for Maria, whose role as a gentlewoman-in-waiting places her beneath Sir Toby, kinsman to
Olivia; and mostly likely for Viola, whose father's noble position is never precisely identified, and is probably beneath the rank of Duke Orsino.\textsuperscript{8} When Sir Toby marries Maria in recompense for her 'device', the play represents through the advancement of a woman by marriage what was occurring for ambitious men in society: verbal agility could turn a servant into a master, make a gentleman into a peer or send a commoner into the ranks of the upper classes.

Commentators on the social order speak frequently and heatedly during this period about a fluidity in the status structure which they take to be common knowledge and objective fact. William Harrison claims that merchants 'often change estate with gentlemen, as gentlemen do with them, by a mutual conversion of the one into the other'. According to Harrison, many obtain gentility through attending the Inns of Court or the University, gaining the money and leisure to 'bear the port, charge, and countenance of a gentleman', and purchasing a coat of arms from the heralds; by this process, they, 'being made so good cheap, bee called master . . . and reputed for a gentleman ever after'. Thomas Smith agrees with Harrison on this point, comments that the prince can 'make' gentlemen, esquires or peers, and, in a section entitled 'Whether the manner of England in making gentlemen so easily is to be allowed', decides that such changes of status are good for the realm, especially for the treasury. He also considers quite sympathetically the yeomen who 'doe come to such wealth, that they are able and daily doe buy the landes of unthriftie gentlemen'. By sending their sons to school and freeing them from manual labour, yeomen 'doe make their saide sonnes by these meanes gentlemen'. Thomas Wilson concurs that gentlemen have been 'overreched' by yeomen, and adds that city lawyers are in pursuit of a country seat: 'they undoe the country people and buy up all the lands that are to be sold.' Smith is less sympathetic to the phenomenon, as are a multitude of preachers and satirists. However, even a churchman like Robert Sanderson, middle-of-the-road Anglican minister, could in 1621 announce that such fluidity was not only the status quo, but to be preferred to a closed system of rank. In a sermon on vocation, Sanderson urges idle 'gallants' to find their own work:

\[\text{observe by what steps your worthy Progenitors raised their houses to the height of Gentry, or Nobility. Scarce shall you find a man of them, that gave an accession, or brought any noted Eminency to his house; but either serving in the Camp, or sweating at the Bar, or waiting at the Court, or adventuring on the Seas, or trucking in his Shop, or some other way industriously bestirring himself in some settled Calling and Course of Life.}\]

Only by equal labours can these young heirs merit 'those Ensigns of Honor and Gentry which [their ancestors] by industry atchieved.'\textsuperscript{9}

Modern historians who study social mobility agree in general with these views, but argue that the movement actually taking place was far less extensive than these comments imply. In his original account of the situation, Lawrence Stone represented the social mobility of the period as 'a seismic upheaval of unprecedented magnitude', and his figures suggest as much: between 1500 and 1700, the number of the upper classes trebled during a time when the population doubled; the number of peers rose from 60 to 160, of knights from 500 to 1,400, and of armigerous gentry from 'perhaps 5,000 to 15,000'.\textsuperscript{10} In his later work, Stone severely restricts his earlier assessment by claiming that newcomers were largely younger sons of the gentry, who, through the professions or trade, re-established their gentility. Nevertheless, he does admit to 'the influx of mercantile wealth into land in the late sixteenth and early seventeenth century'.\textsuperscript{11} Keith Wrightson states that 'social mobility was a constant phenomenon in English society', since gentility was based on 'the acquisition and retention of landed wealth' rather than birth. He also claims that the later sixteenth and seventeenth centuries 'produced a quickened pace of upward and downward social mobility'. He cites a study of Lancashire where 278 families lost their place among the gentry between 1600 and 1642, and 210 families (and perhaps 79 more) moved up into it. The rising families were in part those of wealthy townsmen, which Wrightson argues were largely younger sons of the gentry; nevertheless, by far the majority of newcomers were prosperous yeomen.\textsuperscript{12} Although Stone had originally defined marriage as 'the easiest road to riches', Wrightson concludes, as does Stone elsewhere, that very few marriages took place across status lines. There
were, however, some connections made between those in positions close to each other in rank or wealth: the peerage intermarried with the upper gentry, rich merchants and lawyers; the gentry with mercantile or yeoman families. Both of these historians agree that there was significant movement between ranks; they also believe that contemporary accounts of its range and frequency were exaggerated.

In *Twelfth Night*, Shakespeare creates a unique version of the age's Commentary about social mobility, since the play represents as primarily a female achievement the advancement noted by his contemporaries. One would like to classify this as pure myth; on the other hand, there is very little historical evidence about the social mobility of women. According to David Cressy:

> widows and women who were heads of households were the only women assumed to have any independence, but the polity was normally assumed to exclude women of all sorts . . .
>
> While a wife in England was accorded the rank or status of her man, she was, nonetheless *de jure* but the best of servants.  

The analogies of English social theory were quite inaccurate in their identification of wives with male children or male servants, since women were prohibited from most avenues for advancement. There is evidence that some daughters of rich merchants married into the gentry or peerage, but most marriages occurred within particular status groups. It is clear that studies of social mobility are severely lacking in evidence on women; more work needs to be done to investigate whether or not women improved their position through marriage or through trade. We can assume, however, that the play's representation of the mobility of its society through women is historically inaccurate, and curiously and significantly skewed in a way unlike the exaggerations of commentators.

*Twelfth Night* sets free a fluidity between the roles of man and woman, and master and servant in the case of Viola and Maria, but limits it severely and abruptly in the case of Malvolio. In *A Marxist Study of Shakespeare's Comedies*, Elliot Krieger argues that Malvolio's aspirations are ridiculed and exorcised by the play not in order to preserve the true 'liberty' of saturnalia, but 'to allow the aristocracy to achieve social consolidation.' He claims that whereas identity is generally mutable in the play, Malvolio's attempt to cross the line between servant and master is condemned as transgressive. Whereas Viola's enactment of gentility is rendered legitimate by our discovery at the end of the play of her 'noble' blood, Malvolio's inferior status ensures that his ambition will be viewed as presumption.  

Krieger is quite right to point out that the play balances the freedom of Viola's fluid identity against the strictures on Malvolio, and that such strictures finally reinforce class prejudice. But in this play such prejudice is more complex than Krieger suggests. The play includes a tentative but radical disruption of conventional categories of identity which is checked but not erased by its ending, and checked in a complicated way. Reducing Viola's astute role-playing to an expression of her nobility ignores the part she plays in this limited but tangible disruption as well as in its containment. Viola's performance as a courtier wins her prestige and potential financial rewards from Orsino and a proposal of marriage from Olivia; her noble breeding may make such success more likely, but her female gender makes it remarkable. Viola is never simply a noble person masquerading as a gentle person without wealth; her rendition of masculine gentility subtly suggests that all social roles can be impersonated. The play treats Viola very differently from Perdita in *Winter's Tale*, since *Twelfth Night* emphasises Viola's performative talent rather than her 'authentic' nobility. We may be convinced in Viola's first scene that she is no commoner: she speaks to the Captain and his sailors with authority, they defer to her, she pays them 'bounteously' (I, ii, 52). Yet the scene raises questions about whether Orsino's 'name' accurately represents his 'nature', or whether the Captain's 'outward character', either as behaviour or title, is related to his 'mind' (25, 50-1). These questions prepare us for Viola's experiments with appearance, partially because she has to negotiate in a world where titles may not be trustworthy, and partially because she herself will manipulate the relationship between seeming and being. The scene does not explicitly define Viola's status as either noble or gentle; rather, her rank is veiled from us just as Viola veils it.
from the people she will meet. Such masking has a purpose: we, and the characters, will know her through her
role-playing and her 'intent':

O that I served that lady,
And might not be delivered to the world,
Till I had made mine own occasion mellow,
What my estate is . . .
Conceal me what I am, and be my aid
For such disguise as haply shall become
The form of my intent.

(41-4, 53-5)

In these passages, to will or choose her way allows Viola to disrupt conventional definitions of identity: 'my
estate', 'what I am.' Not to be 'delivered to the world' is to withhold the details of one's family origins, gender
and present situation until one can give birth to oneself at the most propitious moment. Such a self-protective
delay replaces birth and status with a flexible identity, since not only can outer appearance be subject to one's
will, but this will can also be influenced by the practice of acting: Viola's disguise 'haply shall become / The
form of my intent.' The word 'form' reproduces the riddles about inner and outer identity that pervade the
scene, and the word 'become' increases the dilemma: will the disguise 'become' or be used as the outward form
of her inward intent? Will the 'matter' of her external costume represent decorously the inner structuring 'form'
or principle of her willed purpose? Will this disguise itself become or begin to dictate her desires? To what
extent do clothes make the man? Not only is rank replaced by intent in Viola's plot, but also the focus of the
scene on a correspondence between outer and inner quality is complicated by the suggestion that external
forms can determine internal states. When her estate is 'delivered' to us in the last act, it is only after we have
seen to what an extent her skilful use of disguise becomes her.

Malvolio also does not fit within Krieger's rigid schema. The play manipulates Malvolio's status titles for
dramatic purposes: when Malvolio is to appear presumptuous in his disciplining of Sir Toby, Toby cries, 'Art
thou more than a steward?' (II, iii, 113). When we are to recoil and laugh at Malvolio's desire to wed Olivia,
his analogy tricks us into overestimating the lowliness of his rank: 'There is example for't. The Lady of the
strachy married the yeoman of the wardrobe' (II, v, 39-40). We find out only in the late prison scene, when
our sympathy is needed, that Malvolio is in fact not a commoner but a gentleman (IV, ii, 85; see also V, i,
277, 280). He is therefore not disenfranchised in any technical sense; he has already crossed over the most
significant boundary line in the society, and is already a legitimate member of the ruling classes. It is true that
a marriage between Malvolio and the Countess Olivia would be viewed as unconventional—it would be
analogous to the marriage between the Duchess of Malfi and her steward Antonio.17 But Malvolio's dream of
marrying Olivia is in principle no more socially disruptive than Olivia's dream of marrying what she takes to
be the gentleman Cesario. Shakespeare seems less intent on stigmatising characters for behaviour outside their
rank than on emphasising status differences at particular moments for particular purposes. The play veils and
manipulates the rank of Malvolio and Viola in order to encourage the audience to compare their relative
success at winning their desired marriages. When their status is identified, it seems unlikely that the
ideological point would be that women of undefined noble blood can marry dukes, whereas gentlemen cannot
marry countesses. We must search more deeply for Malvolio's offending characteristic.

The play presents the problem most forcefully in two conjoining scenes: Act II, scene iv, in which the Duke
and Cesario debate whether or not a woman's love is equal to a man's, and scene v, in which Malvolio
imagines himself to be equal to Olivia and superior to Sir Toby through the marriage that would make him
'Count Malvolio'. It is here that the play's interest in twin characters and twin issues becomes most complex:
Cesario is like Malvolio because both are servants who wish to marry their masters; Viola is like Maria
because both use language and counterfeited appearances to manage their chosen male subjects; Malvolio is
like Orsino because both are self-absorbed men for whom mastery consists in the exercise of power and the exclusion of any consideration of the perspectives of others. The play calls attention to its twin issues by repeating lines: when the Duke asks Cesario what sort of woman he has fallen in love with, Cesario replies, 'Of your complexion' (II, iv, 26). When Malvolio imagines Olivia's love for him, he remembers Olivia's previous remark that, should she love, 'it should be one of my complexion' (II, v, 23-4). The play invites us to consider love from two angles: Viola's self-abnegating, amorous desire and Malvolio's self-deluded dream of power. It also encourages us to consider Orsino's inadequate sense of women in terms of Malvolio's more explicitly identified 'self-love'. It is in the simultaneous exploration of the worthiness of women and the inadequacy of Malvolio that we find the play's ideological bias: the desire of an inferior to be matched with a superior is acceptable as long as it is motivated by love; to the extent that desire is self-interested, it is foolish and dangerous. In the world of the play, Malvolio represents ill will or bad will (mal: evil; voglio: I will or desire). He pursues his ends for the wrong reasons rather than the right. Viola's name, on the other hand, suggests a female, positive version of Malvolio, one whose will has become, let us say, musical, and capable of harmonising society rather than disrupting it. In this play, desire replaces reverence as the basis of the bond that links master and servant, man and woman; we could say that loving and erotic desire mediates the issue of social mobility in the play, since loving desire acknowledges choice and human will, but it also ensures devotion or a commitment to others. In *Twelfth Night*, ambition is acceptable, as long as it is the ambition to love. Our question is, why is such devoted desire identified with a woman rather than a man? What does such an identification make possible for the play and what does it obscure?

In *Twelfth Night*, the current and popular controversy over women mediates the dilemmas about social mobility. This allows the play to question quite fully the traditional ideology that those who rule are mentally or morally superior to those who are ruled, but it holds such questioning in check through an ideal of marriage and a model of marital contract which guards against the dangers of personal independence. The romantic love in the play acknowledges the power of desire, but ensures that such desire will flow into the channels of traditional, socially instituted bonds.

Act II, scene iv, allows Viola to confront the Duke with the value and power of female intelligence, but such intelligence is only discussed in terms of a woman's capacity to love. The erotic power of this scene consists not only in the Duke's ignorance that his man-to-man talk with Cesario about love finally allows Viola to express what she feels, but also in the fact that the scene stages between two potential lovers the debate about women which usually took place within the confines of contemporary treatises. Shakespeare stages the debate with a bias: Viola's concealed identity and love for Orsino ensure our sympathy for her point of view. The Duke claims that women cannot love as deeply as he does, but the scene suggests that his love for Olivia is superficial, inconstant and finally repressive, since he seems unwilling to imagine or believe that a woman could initiate a love of her own. The Duke's 'self-love' has already been revealed in the first scene of the play, when he proclaims that, after Olivia's grief over her brother dies out, the Duke himself will take his place as the new male sovereign, the 'one self king' reigning in Olivia's affections (I, i, 40). In their conversation in Act II, scene iv, Viola reminds the Duke that he may not be so successful, and offers him the possibility of seeing things from a woman's point of view:

> Viola Say that some Lady, as perhaps there is,
> Hath for your love as great a pang of heart
> As you have for Olivia. You cannot love her.
> You tell her so. Must she not then be answered?
> Duke There is no woman's sides
> Can bide the beating of so strong a passion
> As love doth give my heart; no woman's heart
> So big to hold so much; they lack retention.

(II, iv, 89-96)
The Duke refuses to imagine that a woman could initiate desire as he does, and so he loses the point of the scene communicated to us: a woman, viola, loves as deeply as a man, and recognises that she cannot control her beloved's point of view.

The debate about love in this scene is a submerged exploration of the extent to which Renaissance masculinity depends on denying women a will of their own, and the independent perspective that goes with it. Viola deflates this masculine conceit by her words and her presence:

Duke Make no compare
   Between that love a woman can bear me
   And that I owe Olivia.
Viola Ay, but I know—
   Duke What dost thou know?
   Viola Too well what love women to men may owe.
   In faith, they are as true of heart as we.

(101-6)

When Viola interrupts the Duke's masculine and mastering order, 'Make no compare', she asserts that her knowledge and experience constitute an identity comparable to his own: 'Ay, but I know.' But what she knows is her erotic attachment to the Duke, 'what love women to men may owe', an attachment that ensures her willing participation in a marital system which fears more deeply the unattached woman than the brilliant wife. Viola's debate with the Duke exposes as masculine tyranny his desire to be Olivia's 'one self king', but protects him and the audience against the play's deeper fear of female independence, expressed in the Duke's reference to the story of Diana and Actaeon:

O, when mine eyes did see Olivia first,
   Methought she purged the air of pestilence,
   That instant was I turned into a hart,
   And my desires, like fell and cruel hounds,
   E'er since pursue me.

(I, i, 20-4)

The Duke speaks in the fanciful language of a poetic love, but his words reveal that he already fears rejection, since Olivia, like Diana, might refuse to be married; such a fear must be repressed because it would result in the dismemberment of a sense of masculinity which depends on female subservience. Again, the play questions Orsino's association of masculinity and power, but provides a new protection against the dangers of Diana: women will marry because they want to. When Sir Toby praises Maria for her victory over Malvolio, he calls her 'Penthesilea', the Amazon warrior with whom Achilles fell in love just before he killed her. These dangerous extremes of female independence and masculine tyranny are modified by Toby's affirmation that Maria is 'one that adores me' (II, iii, 176-9).

Viola's response to Orsino in their debate about love is similar to that of Jane Anger in the treatise 'Her Protection for Women' (1589), which answers a lost pamphlet by 'the surfeiting lover'. These two treatises took part in a series of exchanges which fuelled the controversy about women during the period.19 Like Viola, 'Her Protection for Women' declares that women should be recognised for their 'trueness of love' (p. 181), but the difference between the treatise and the play is registered in the difference between the name Jane Anger and that of Viola. Like Viola, Anger counters male views of female love, but less as a preface to marriage than as a reproof of men, uttered, as she says, in a 'choleric vein' (p. 173). Answering an opponent whose treatise seems to have renounced love and women as well, Anger uses the author's term for himself as
'surfeiting' to consider the destructive effects on women of defining male desire as an appetite. Orsino proclaims his inability to 'suffer surfeit' in his appetite for love, since he 'is all as hungry as the sea / and can digest as much' (II, iv, 100-1), but Anger points out the problem with the metaphor: men 'become ravenous hawks, who do not only seize upon us, but devour us' (p. 178). Her treatise clarifies the contradictory nature of Orsino's love, which he describes as both 'so strong a passion' that 'no woman's heart' is 'so big to hold so much', and as 'more longing, wavering, sooner lost and worn, / Than women's are' (II, iv, 94-6, 33-4). His desire for Olivia is described as infinite, like the sea, but he uses words which suggest that marriage itself would be no solution:

Nought enters there,
Of what validity and pitch so ever,
But falls into abatement and low price
Even in a minute.

(I, i, 11-14)

The Duke's description of desire implies that whether the lover surfeits or never surfeits, the fate of his wife will be the same:

For women are as roses, whose fair flow'r,
Being once displayed, doth fall that very hour.

Viola's reply is full of pathos:

And so they are; alas, that they are so;
To die, even when they to perfection grow.

(II, v, 38-42)

Such a reply is quite different from Jane Anger's comment on the subject:

men's eyes are so curious, as be not all women equal with Venus for beauty, they cannot abide the sight of them; their stomachs so queasy, as do they taste but twice of one dish they straight surfeit, and needs must a new diet be provided for them.

(p. 178)

Viola's careful and caring instruction of the Duke as well as our sympathy for her concealed love prepare us for the harmony of their betrothal in the last scene of the play, but keep us from considering what their marriage will finally be like.

Jane Anger's treatise is unusual in its lack of interest in the subject of matrimony, since most pamphlet-writers defending women during this period praised them most highly for their capacity to be able companions to men. Nicholas Breton in 'The Praise of Vertuous Ladies' (1597) claims that a man should see a great part of a woman in himself, since Eve was made out of Adam, and this proves that a woman is 'no other substance but another himself. For every excellent man, there is an excellent woman, who is 'everie waies his match'. The treatise soon turns to the match it most prizes, that of marriage, but here the equality of women stressed by the treatise becomes a threat. The best companion to a wise man is a witty woman, but 'it is wisdom for a man to take heed that a woman be not wiser than himself.' Finally, the treatise states with a jesting tone, but a serious purpose that the only worthy 'wit' of a maid is to choose a husband well; of a married woman, to love none other; and of a widow, to provide for her children. This treatise suggests that the faculties which made women
everie waies' a man's 'match' could only usefully be exercised within the institution of marriage, and that even in marriage these capacities had to be restrained.\textsuperscript{20}

A woman's love was essential to a successful marriage, according to the manuals of the period, which prized marriage as a form of companionship rather than simply as a necessity for lawful procreation. For William Perkins, the creation of Eve proved that a woman should not rule her husband, since she did not come out of his head, nor be his slave, since she did not come out of his feet, but, since she came out of his side, 'man should take her as his mate.'\textsuperscript{21} But the equality that this notion of companionship seems to promise is quickly qualified by the manuals, and the love of a wife for her husband begins to appear as another form of masculine control. Edmund Tilney's \textit{Flower of Friendshippe} (1568) states:

\begin{quote}
\textnormal{equalitie is principally to be considered in thys matrimonial amitie, as well of yeares, as of the gifts of nature, and fortune. For equalnesse herein, maketh friendliness \ldots \text.{In this long and troublesome journey of matrimonie, the wise man maye not be contented onely with his spouses virginitie, but by little and little must gently procure that he maye also steale away her private will, and appetite, so that of two bodies there maye be made one onely hart, which she will soone doe, if love raigne in her, and without this agreeable concord matrimonie hath but small pleasure \ldots or none at all, and the man, that is not lyked, and loved of his mate, holdeth his lyfe in continuall perill, his goodes in great jeopardie, his good name in suspect, and his whole house in perdition.}}
\end{quote}

John Dod and Richard Cleaver in \textit{The Godly Form of a Household} (1598) use almost the same words as Tilney, but their sense of the relationship between love and possession has increased: 'The husband ought not to bee satisfied that, he hath rob'd his wife of her virginitie, but in that he hath possession and use of her will.' Dod and Cleaver recognise the tension between the requirements that men rule and that women love: 'For although the husband shall have power to his wife, to feare and obey him, yet he shall never have strength to force her to love him.'\textsuperscript{22}

The marriage manuals emphasise the importance of personal choice and consent by the marriage partners, and such choice includes women as well as men, but the equality of choice does not extend much farther than the original decision. The literature on marriage during this period as well as current historical studies suggest that individual desire did influence marriage negotiations much more than we previously believed: Keith Wrightson has shown that Lawrence Stone overemphasised the capacity of aristocratic parents to determine marriages for their children, and ignored the extent to which lower-class marriages were initiated by the partners. Marriage manuals consistently acknowledge the fact of individual choice in their very structure, at the same time that they insist on parental approval. These manuals include chapters on consent and on the contractual nature of marriage, in order to stress the extent to which the marriage must be a matter of free will. It may finally be the case that marriage manuals were written for the children of the gentry or the middling sort' rather than for the aristocracy, whose marriages were more consistently determined by issues of status and wealth rather than personal choice. It is clear that they were written more often for men than for women. The voluntary nature of the marriage vow, in which the promise 'must not come from the lippes alone, but from the wel-liking and consent of the heart', nevertheless preceded a relationship in which a woman's love had to be matched by submission and obedience to her husband's will. Many marriage manuals suggest, in fact, that the only real choice appropriate for a woman after marriage was to choose to love her husband. In Tilney's \textit{The Flower of Friendshippe}, which celebrates 'perfite love' that 'knitteth loving heartes, in an insoluable knot of amitie', the female speaker, Lady Julia, urges women to apply themselves to their duty, not only to revere their husbands, but to love them:

\begin{quote}
The first thing, therefore, which the married woman must labour to intende, the first thing which she must with all her force, applie her whole minde unto, and the first thing which she must hartily put in execution, is to lyke, and love well. For reason doth bind us to love them,
\end{quote}
The fear of unloving wives in the marriage manuals is like the fear of female independence in *Twelfth Night*: in both cases, women refuse to authorise as mutually beneficial and as benevolent the form of social control inherent in the Renaissance institution of marriage. But this fear of the independent woman in *Twelfth Night* and the celebration of a romantic love that impels one to choose to be dependent on another mediates and controls the play's twin issue: the danger of self-interested rather than devoted servants. The play and its various literary and social sources testify to a society searching to articulate a new social bond between 'master' and 'servant', one which would acknowledge choice and ensure a new kind of dependability, based on contract rather than feudal obligation.

In Act II, scene v, which directly follows the debate about love between Orsino and Viola, Malvolio imagines his new estate as 'Count Malvolio', and the play reveals that such self-interest has always motivated his government within the house. It is clear that Malvolio does not pursue Olivia with the poetic abandon of the other lovers in the play; he sees her as his ticket to a higher social position. His desire for Olivia as well as his ethical severity is a mask for a will-to-power:

Fabian O, peace! Now he's deeply in. Look how imagination blows him.

Malvolio Having been three months married to her, sitting in my state—

Toby O for a stone bow, to hit him in the eye!

Malvolio Calling my officers about me, in my branched velvet gown; having come from a day-bed, where I have left Olivia sleeping—... And then to have the humour of state; and after a demure travel of regard, telling them I know my place, as I would they should do theirs, to ask for my kinsman Toby—... Saying, 'Cousin Toby, my fortunes having cast me on your niece, give me this prerogative of speech.'

Toby What, what?

Malvolio 'You must amend your drunkenness'.

(II, v, 40-71)

Malvolio's fantasy reveals that his disciplinary zeal is impelled by a desire to dominate, unlike Viola's gracious deference. His imagined reproof, 'You must amend your drunkenness', is, like his branched velvet gown and his imperious looks, only another means by which he demonstrates his new position of power within the household. Malvolio's imagined reproof of Sir Toby is to be compared to the kindly correction of Orsino by Viola: their motives, according to the play, establish their difference. Malvolio's crime is not that he, as a gentleman, wants to marry a countess, or even that a steward wants to marry his mistress; it is that he will use his new position to disrupt traditional customs and rituals, and that such use of his 'prerogative' will be motivated by an ambition to establish his superiority and to impose his will on others. His sense of being virtuous is actually a desire for supremacy; for this reason, there will be no more cakes and ale, as Toby puts it (II, iii, 116-17). We find during the play that Malvolio has brought Fabian 'out o' favour with my lady' Olivia for bearbaiting, and put Viola's benevolent captain into jail for some unidentified crime (II, v, 6-7; V, i, 275-6). Although Maria calls Malvolio only 'a kind of Puritan', Malvolio's fantasy of power constitutes the play's critique of London disciplinarians, those Puritan aldermen who were perhaps gentlemen but had originally been merchants, who condemned holiday revelry, bearbaiting and the theatre: such a concern for civil rule, according to the play, masks a self-interested desire to govern, an unwillingness to accept traditional social bonds, and a willingness to disrupt rather than harmonise the social order. London Puritans and
Malvolio are like the 'politicians' and 'Brownists' that Sir Andrew fears (III, ii, 30-1): each is a type of 'separatist', one who does not respect the bonds that tie the community together, bonds which may be flexible and fluid, but which must continue to hold if society is to survive.

In 'Pierce Pennilesse: His Supplication to the Divell' (1592), Thomas Nash, Gent., attacks those newly rich men who have no respect for the 'noble' virtue of liberality, which he feels is the main source of income for struggling writers. The contempt for tradition on the part of these 'new men' is the result of a frenetic upward movement of tradesmen and lawyers, who dress 'as brave as any . . . Nobleman'. He makes it clear that he does not oppose social mobility per se, but only that worthy men are left impoverished, whereas the undeserving obtain higher estates through 'delicious gold' or are unjustly promoted like 'some such obscure upstart gallants, as without desert or service are raised from the plough, to be checkmate with Princes'. Indeed, such social advancement would be appropriate if granted to writers whose talents make them superior to their patrons: 'This is the lamentable condition of our Times, that men of Arte must seeke almes of Cormorants, and those that deserve best, be kept under by Dunces.' Like Twelfth Night, Nash questions the traditional notion that social superiors are necessarily better than those they govern, but he also attacks merchants and tradesmen who have no respect for the traditional nobility and no respect for the theatre. 'Pierce' claims that the ethical severity of those citizens who condemn playgoing only masks a desire to usurp the place of the traditional nobility:

I will defend [the theatre] against any Collier or clubfooted Usurer of them all, there is no immortalitie, can be given a man on earth like unto Playes. What talke I to them of immortalitie, that are the only underminers of Honour, and doe envie any man that is not sprung up by base Brokerie like themselves. They care not if all the ancient houses were rooted out, so that like the Burgomasters of the Low-Countries they might share the government amongst them as States, and be quarter-maisters of our Monarchie . . . [They respect] neither the right of Fame that is due to true Nobilitie deceased, nor what hopes of eternitie are to be proposed to adventurous mindes, to encourage them forward, but only their execrable luker, and filthie unquenchable avarice.

Social advancement is appropriate for 'adventurous mindes' and 'men of Arte', but not for those who seek to mount upward for the wrong reasons: a hunger for money and power over others. Such as these not only have no respect for the ancient houses of nobility, they want to cast society into a different form, so that, like the 'Burgomasters of the Low-Countries', they will be 'quarter-maisters of our Monarchie'. According to the treatise, this disruption of the social order is caused by the devil himself, 'Nicalao Malevolo . . . the great mister maister of hell'.

In 'Pierce Pennilesse', Nash reacts against Puritan attacks on the theatres and against the influence of the London city government on the Privy Council. Twelfth Night (1602) was produced only a few years after the office of the Master of the Revels had affirmed its capacity to license theatrical companies and restrict the days of their performances, as well as the bearbaiting that occurred nearby. Such courtly and civic control over theatrical revelry mirrored the repression of holiday pastimes in the Countryside in places like Shakespeare's Stratford. Local Puritan elites were prohibiting many village festivities, including the church ales, in the name of a more thorough 'civil rule' (II, iii, 122).

Nash's pamphlet illuminates one of the most important contexts for Twelfth Night: urban satire, including the Harvey-Nash quarrel, in which 'Pierce Pennilessse' figures, but also including the war of the theatres, occurring during this period and referring at times to this play. What You Will is one of John Marston's volleys in the war, and its connections to Twelfth Night, or What You Will clarify that, for these playwrights, the intersection between disguise and the problem of fluid social relations is commonplace. In a society where status categories are flexible, apparel becomes a 'god', and opinion, or 'what you will', according to Marston, determines all social value, including personal rank and identity. One of the central characters in Marston's
play, Albano, is a merchant who for a time loses his wife, his property and his name because people assume
that he is dead and the living person standing before them is an imposter. Whether *What You Will* appeared
before or after *Twelfth Night*, the attributes they share suggest that *Twelfth Night* was not only about revelry or
carnival, but about the difficulties of estimating the value of individuals when the externals of identity,
including rank and gender, are so easily imitated. It is therefore relevant that Shakespeare's play and probably
Marston's were put on before an Inns of Court audience, incipient lawyers, well versed in urban satire and
preparing for the successes and dangers of social advancement in the city. 'What you will' for Marston refers
to opinion, and for Shakespeare to desire, but both playwrights testify to a world in which individually
initiated attitudes and acts have replaced a shared consensus about appropriate behaviour and the rules for
evaluating it. Both plays fear such a world, in which every man and woman can be a phoenix; *Twelfth Night*
offers us women and servants who exchange their independence for a willing desire for another and so
preserve 'all relation'.

Malvolio may be a kind of Puritan, but he is also the conventional butt of urban satire, the social climber who
becomes obsessed with the externals of rank, 'the habit of some sir of note' (III, iv, 77-8), without a sense of
'true' worth and its significance for the community. Viola's decision to trust the Captain at the beginning of the
play takes on new importance in this context, because she, like all members of society, must learn to accept
and analyse a difference between external appearance and internal value:

> There is a fair behaviour in thee, captain,
> And though that nature with a beauteous wall
> Doth oft close in pollution, yet of thee
> I will believe thou hast a mind that suits
> With this thy fair and outward character.
>
>(I, i, 47-51)

Viola's trust in the Captain is a matter of judgement and of will, an opinion not a fact. The problems of
disguise in *Twelfth Night* take the play into the world of Ben Jonson's exploration of character and the
ambiguous relationship in his plays between inner worth and social rank.

For Jonson, the nobility are to be revered, but only if they

> Study the native frame of a true heart,
> An inward comeliness of bountie, knowledge,
> And spirit that may conforme them actually
> To God's high figures.
>
>(28)

In *Cynthia's Revels, Or the Fountayne of self-love* (1600), the Jonsonian surrogate Crites unmasks the
narcissism that motivates decadent aristocrats as well as ambitious courtiers; the play uses terms that look
forward to Shakespeare's presentation of the Duke and Malvolio. But unlike Shakespeare, Jonson proceeds to
define a positive version of self-love, which transforms narcissism into an honourable method of establishing
publicly one's inner value: 'allowable Self-love' quickens 'minds in the pursuit of honour', and impels
individuals to reach a social position which will justly match 'that true measure of one's self (V, vii, 26-35). In
the play, Cynthia the Queen singles out for promotion her playwright Crites, whom she describes as one
'whom learning, virtue, and our favour last / Exempteth from the gloomy multitude' (V, viii, 32-3).

In *Twelfth Night*, Shakespeare pokes fun at a notion of 'allowable self-love' which results in the preferment
of its author. He associates such self-love with the colour yellow theatrically attributed to it in *Cynthia's Revels,*
and with an overly pretentious, censorious steward, who is convinced that his lady will thrust greatness upon him. Malvolio's 'self-love' satirises Jonson's version of individual value not only as self-indulgent but as socially divisive, because it privileges censuring the faults of others and praising the self over the more difficult task of preserving the harmony of social relations. *Twelfth Night* suggests that Jonson's version of merit is just as 'separatist' as the Puritans he derides in his comedies. The 'railing' that Viola's social music tames is not only that of the Puritans but that of the satirists.

Shakespeare is as interested as Jonson in the relationship between the 'name' and 'nature' of nobility, but he explores the issue through 'Viola' rather than 'Crites'. The name of the Duke, Orsino (or 'the little bear'), indicates that the Duke as well as Malvolio is the subject of the play's bearbaiting. Marston's Duke in *What You Will* is blatantly frivolous and sensual; audiences must have understood that Orsino's attitude towards love and women was not presented uncritically by *Twelfth Night*. But such criticism never becomes biting satire in Shakespeare's play: 'there is no railing in a known discreet man, though he do nothing but reprove' (I, v, 95-6).

In *Twelfth Night*, Shakespeare celebrates the social arts, very like his own, which can turn a servant into a master, a glove-maker's son into a gentleman, a woman into a man, a man into a woman. Nevertheless, he reproves those who would use this social fluidity for their own benefit or as an opportunity to reorder the traditional structure according to new ethical and political principles. Such ethical and political blueprints, he suggests, are simply fantasies of power, which exchange the community good for private profit.

The play links the issues of gender and status in order to make marriage, with its inclusion of desire and its commitment to permanence, the model of all social bonds. The Priest's description of Olivia's marriage betrothal to Sebastian represents the play's dream of a perpetual community, in which each member willingly takes his or her place:

> A contract of eternal bond of love  
> Confirmed by mutual joinder of your hands,  
> Attested by the holy close of lips,  
> Strengthened by interchangement of your rings.

(V, i, 156-9)

It is not a coincidence that in the last act, as the cases of mistaken identity mount up, willing service is coordinated with the contract of marriage, and the dangers of infidelity to such a contract are considered: Olivia's sense of her husband Cesario's betrayal is followed by Antonio's sense of his master Sebastian's betrayal, and then by Orsino's sense of his servant Cesario's betrayal. Antonio, of course, is the model for the new servant imagined by the play, since his service is based on desire rather than duty or reverence:

> I could not stay behind you. My desire  
> (More sharp than filed steel) did spur me forth;  
> . . . My willing love . . . Set forth in your pursuit.

(III, iii, 4-5, 11-13)

The marriage bonds that certify the socially acceptable 'willing love' of man and woman are forged by the 'true' priest in the play, who is opposed dramatically to the 'false' priest-fool, Sir Topas, who baits Malvolio. This carnivalesque figure reproaches others in society who have 'dissembled in such a gown' (IV, ii, 5-6), but also members of the aristocracy, who, like Chaucer's Sir Thopas, provide only an empty image of aristocratic superiority. Such an image becomes ridiculous when engendered by a non-aristocratic author-fool, like the narrator of the *Canterbury Tales*, who cannot get a tale of nobility quite right, but also when manipulated by a
Sir Toby, whose name is so close to the Sir Topas he concocts that he becomes implicated in his own critique. Such satirists as Sir Toby miss the point when they bait Malvolio: blood is not the issue, but rather some mysterious quality of inner nobility which Sir Toby himself does not possess.

Viola's 'courtesy' is evidence not only of this inner nobility, but of her willingness to use her performative talent for unselfish purposes, to spin out the modes of social behaviour that can preserve the ties that bind. Orsino and Olivia think nostalgically about 'the old age' or the 'merry world' before true love and loyal servants were replaced by 'these most brisk and giddy-paced times' (II, iv, 48; II, i, 100-1). *Twelfth Night* is plagued by a fear that when the witty whirl that is its surface and its plot shuts down, no trustworthy social order will remain: 'with hey, ho, the wind and the rain' (V, i, 391ff).

Perhaps this is one reason why the play so relentlessly excludes the figure of the merchant, although in the sources, the father of Viola and Sebastian is almost always a merchant, and frequently the father of Olivia is so as well. In Marston's play, Albano the merchant most forcefully represents the fragility of an identity based on fortune or chance, since he has achieved his status in the community through the power of wealth rather than the tradition of family lineage. In *Twelfth Night*, a play that is filled with imagery of the sea, merchants are never mentioned, although the play does refer to a new map of the world which includes the West Indies, and which is used to describe the lines on Malvolio's smiling face as he pursues his hopes with Olivia (II, ii, 76-8). The play evokes the sense of treasure that can be obtained from the sea, as well as the riches that can satisfy a desire which is as infinite as the sea. But the treasure from the ocean in this play is Viola and Sebastian; like aspirations for social ascent, commercial interests are turned into romantic appetites.

The play cannot afford the figure of the merchant because such a social role does not fit clearly enough into the traditional hierarchical order of servant and master. The relations of the commercial classes to the classes above them could not easily be described in terms of feudal norms—they are not mentioned in the homily on obedience—since they were constituted more by monetary exchange than by the traditional ideals of reverence and duty. Shakespeare has to consider Malvolio as 'a kind of Puritan'; a real Calvinist merchant would upset the delicate balance of a play which explores the issue of social mobility through the lens of willing servants rather than successful entrepreneurs.

The play solves the problem of self-interested desire through Viola's harmonious social bonding, and so projects anxieties about status relations onto gender relations. The play's fear of independent women is implicated in its fear of independent servants, since Viola's dependence is constituted in opposition to Malvolio's self-interest. Therefore sexual-familial structures are linked rather explicitly to socio-economic structures, as Kelly puts it, in such a way as to suggest that Viola's attitude to her labour as a servant to the Duke is praiseworthy because it partakes of her attitude towards her beloved, Orsino. As such, loving male-female relations mediate master-servant relations: both partners may be quite equal in intelligence and moral capacity, or indeed the subordinate may be superior to his or her master; nevertheless, an appreciative love should tie both together. Such a formula redefines traditional hierarchical bonds as more flexible in themselves, but also turns anything but the most loving commitment to one's superiors into 'self-love'.

The play's superimposition of labour relations onto marital relations results in a model of 'willing service' formed in the image of the 'mutual consent' required in the marriage contract. The history of the various kinds of contract during this period demonstrates that Shakespeare's model of contract is a selective one, since such an agreement could act as either a conservative or a disruptive force. At the time that the play was produced, changes in the law were eroding traditional restraints on business contracts, and strengthening the individual's control over these transactions. Such agreements required voluntary and mutual consent at the cost of feudal models of obligation, since deference to status was replaced with an interest in the market and personal profit. But such 'freedom' was not extended to labouring individuals, whose tendency to move throughout the country in pursuit of work had resulted in the passing of the Statute of Artificers (1563), which prohibited the sudden termination of contracts between employer and employed, and made illegal a horizontal mobility of
workers responsive to new commercial developments. Through its labour-contract clauses, the Statute sought to place labourers under the firm control of a 'master', and often within the structure of the employer's family and paternal authority. *Twelfth Night* also mediates between a status and a market society through marriage and the family: it dramatises voluntary consent and 'free' will as mitigating the rigidity of the master-servant relationship, but also as preserving this traditional bond at a time when market forces were wearing away its feudal foundations. Shakespeare may have taken his cue from the marriage manuals of the period, which employ the language of contractual 'freedom', but nevertheless hedge it about with a concern for status and authority: 'consent' includes parental agreement and 'equality' requires likeness in rank; both consent and equality fade quickly away before the customary necessities of male authority and female submission. Like the manuals and marital law during this period, Shakespeare attempts to negotiate between individual interests and those of traditional society. He follows Perkins by making marriage the model for 'the commonwealth'.

*Twelfth Night* imagines a world in which one's social estate is a matter of desire or will rather than birth or title. Such desire is innocent and successful to the extent that it moves one to be bound unselfishly to another. Shakespeare divides and conquers in his play not only by praising Viola and condemning Malvolio, but also by obscuring what Viola and Malvolio share in the play's various literary and social sources: a connection with a commercial class whose access to money has the power to upset the traditional link between high birth, wealth and status. The ideal that is set before women, servants and merchants in the play is that of loving and willing service, a Viola who chooses her man, but who also chooses to correct gently rather than dethrone the tyrant who will rule over her in the future. We might imagine a play about Mal-Viola (or Jane Anger), who does not wish the Duke well and says so, and whose female desire cannot so easily be presented as 'good will'. Just as Jonson in *Cynthia's Revels* presents himself in Crites, Shakespeare in *Twelfth Night* presents himself in Viola, that figure so well versed in the 'arts' of social behaviour, far more intelligent than her superiors, who elects to preserve the social harmony rather than 'put down' her masters.

Notes

3 'An exhortation concerning good order, and obedience to rulers and magistrates,' and 'An homilie of the state of matrimonie', in *Certaine Sermons or Homilies appointed by the Queenes Majestie, to be declared and read by all Parsons, Vicars, and Curates . . .* (London, 1595), 13 and Gg7.

4 Of course, several Renaissance critics have already discussed quite successfully the relationship of gender and status in Renaissance drama. Frank Whigham's 'Sexual and social mobility in *The Duchess of Malfi* (PMLA, 100 [1985], pp. 167-86) is the best of this sort, and I am indebted to his discussion of social mobility. Nevertheless, in his essay, the gender issues tend to collapse into the status issues: 'the duchess's enterprise is not primarily private and romantic: it is, rather, a socially adaptive action that extends to the zone of gender conflict a maneuver actively in play in the arena of class conflict' (p. 171). Whigham's quotation from Kenneth Burke on *Venus and Adonis* at the beginning of the essay clarifies this: 'The real subject is not primarily sexual lewdness at all, but "social lewdness" mythically expressed in sexual terms.' If feminist
writers in the 1970s ignored problems of class (Paula Berggren, 'The woman's part: female sexuality as power in Shakespeare's plays', and Clara Claiborne Park, 'As we like it: how a girl can be smart and still popular', both in Carolyn Lenz, Gayle Greene and Carol Neely, eds., The Woman's Part: Feminist criticism of Shakespeare [Urbana: University of Illinois Press, 1980], pp. 17-34, 100-16), then new historicists and cultural materialists in the 1980s often reduced gender concerns into a symbolic means of articulating what is 'the real subject': status, or issues of power in general. See Leonard Tennenhouse, Power on Display: The politics of Shakespeare's genres (New York and London: Methuen, 1986) for a fascinating discussion of 'Staging carnival', which attends to the role of women and Queen Elizabeth in the process of inheritance, but which finally defines the comedies and Petrarchan literature as 'presenting us with a political crisis which must be understood and resolved in sexual terms' (p. 19). This is the problem, I think, with focusing exclusively on Queen Elizabeth in discussing these issues: the sexual-familial questions can too easily disappear before the political or socio-economic concerns. Jean Howard avoids this difficulty in 'Crossdressing, the theatre, and gender struggle in early modern England', (SQ, 39 [1988], pp. 418-40), in which she discusses the 'various manifestations of crossdressing' as 'an interlocking grid through which we can read aspects of class and gender struggle in the period', and the particularity with which she does so is enlightening and refreshing. She interprets Twelfth Night quite differently from the way I do, however, because she sees Viola's crossdressing as 'in no way adopted to protest gender inequities' (p. 431).

5 In an essay in this collection, 'The world turned upside down: inversion, gender and the state', Peter Stallybrass argues that 'there is no intrinsic connection between inversions of class [and] gender . . . Politics is precisely the work of making such connections.' I argue in this essay that Twelfth Night performs such work by coordinating the interests of women and servants, and by making female 'good will' the model for socially ambitious men.

6 It is not a coincidence that the centrality of 'will' to the play reproduces the role of 'will' in the sonnets, in which Shakespeare represents his own peculiar linking of love and the potential rewards of patronage. For a largely psychoanalytic account of will in the sonnets, see Joel Fineman, Shakespeare's Perjured Eye (Berkeley: University of California Press, 1988). My analysis of traditional and emergent attitudes in the play is indebted to Raymond Williams' discussion of his terms 'dominant', 'emergent' and 'residual' in Problems in Materialism and Culture (London: Verso, 1980), pp. 31-49, and in Marxism and Literature (Oxford: Oxford University Press, 1977), pp. 121-8.

7 I disagree with those critics who diagnose and/or dismiss Viola's successes in this play as the result of her noble rank (Tennenhouse, Power on Display, p. 66; Elliot Krieger, A Marxist Study of Shakespeare's Comedies [London: Macmillan Press, 1979], pp. 105-30).

8 As with several other characters, the play confuses us about the status of Maria: she is represented by Sir Toby as 'my niece's chambermaid' (I, iii, 50), but is identified by Olivia as 'my gentlewoman' (I, v, 162). But the play continually groups her with the 'lighter people', as Malvolio puts it (V, i, 341). In her forged letter to Malvolio, Maria herself delineates the line she will eventually cross: 'Be opposite with a kinsman, surly with servants' (II, v, 149-50).

14 Cressy, 'Describing the social order', pp. 34-5.

17 See Whigham, 'Sexual and social mobility in The Duchess of Malfi'

18 See Catherine Belsey's illuminating and convincing reading of this scene in 'Disrupting sexual difference: meaning and gender in the comedies', in John Drakakis, ed., *Alternative Shakespeares* (London: Methuen, 1985), pp. 166-90. Belsey argues that Viola-as-Cesario calls 'into question that set of relations between terms which proposes as inevitable an antithesis between masculine and feminine, men and women' (p. 167). I am arguing that the difference between the categories of servant and master are also questioned by the play, and that Viola's success and 'good will' in disrupting these differences in scene iv are compared to Malvolio's failure in scene v. Viola's noble rank, like her role as a wife, is affirmed at the end of the play, and, as Belsey says, closes off 'the glimpsed transgression . . . But the plays are more than their endings' (pp. 187-8).

23 For discussions on individual choice in marriage, see Stone, The Family, Sex and Marriage in England, 1500-1800, pp. 85-93, 117, 178-95, 270-95; Wrightson, English Society 1580-1680, pp. 70-88; Susan Dwyer Amussen, An Ordered Society: Gender and Class in Early Modern England (Oxford: Basil Blackwell, 1988), pp. 70-6, 105-8; and William and Mallevile Haller, 'The Puritan art of love', Huntington Library Quarterly, 5 (1941-2), pp. 254-6, 265. Cleaver insists on the 'consent of the heart' (p. 115) and includes discussions on choice, consent, and contract (pp. 96-129). Perkins includes chapters entitled 'Of the Contract', 'Of the choice of persons fit for marriage' and 'Of consent in the Contract' (pp. 18, 23, 68). See Tilney, D4, for Lady Julia's advice on the choice of husbands and the practicality of love after the marriage has occurred.

29 I am not the first to entertain the notion that Malvolio may represent Jonson; John Hollander considers the possibility for reasons quite different from my own in his insightful and informative essay, Twelfth Night and the morality of indulgence', The Sewanee Review, 68 (1959), pp. 220-38. Hollander dismisses the possibility, but reminds us that Marston's What You Will 'devotes much effort to lampooning Jonson' (p. 238). See V, vii, 26-35 in Cynthia's Revels for the yellow colour of 'allowable self-love', which later turns up as Malvolio's stockings.
30 As Hollander points out, the Duke's name and na-ture are affirmed as equally 'noble' (I, ii, 25), but the name 'Orsino' suggests quite another character. Jean Howard offers a different interpretation of Shakespeare's treatment of Orsino in her article 'Crossdressing' (p. 432).

31 Antonio is also the character left without a clear social position at the end of the play, since Sebastian never explicitly claims him as his man, nor frees him from Orsino's indictment. The play's tentative sympathy for this homoerotic relationship cannot save it from an exclusion from the community produced at the end of the play and most literally from the social legitimacy of marital bonds. Like that of the other characters, the 'desire' of Antonio for Sebastian begins by flowing into the traditional bonds of master and servant; therefore accounts of its homoeroticism have to be historicised. Nevertheless, Antonio is left at the end of the play a 'masterless' man.

Douglas E. Green (essay date 1992)

[In the following essay, Green discusses the portrayal of love and gender in Twelfth Night, maintaining that while the play exposes the narcissism and self-centeredness of masculine love, its ending—with Viola still costumed as Cesario—reinforces the idea that men are the only trustworthy objects of desire.]

However much we may argue about Shakespearean texts, we never doubt that they mean something—and they do, although not quite in the way the old introductory Shakespeare course descriptions once implied. Because "Shakespeare is," according to Alan Sinfield, "one of the places where ideology is made," 1 we have
lately had a proliferation of multiply explicated Shakespeares, deconstructing and deconstructed Shakespeares, Marxist Shakespeares, psychoanalytic Shakespeares, new historicist Shakespeares, and feminist Shakespeares. In her book *The Social Production of Art*, the Marxist-feminist theorist Janet Wolff discusses the implications of this sort of "interpretation as recreation": "What is far more important than the fact that, as a literary critical exercise, we may attempt to recover an author's meaning, is the fact that this meaning is effectively dead. What an author intended, or even meant to his or her contemporary public and first readers, is only of interest insofar as that original meaning has historically informed the present reading of the text." For many Shakespeareans that is a par-ticularly bitter pill. But as much recent feminist and new historical criticism has shown, the various constructions of gender in Shakespeare's plays do not transcend their historical determinants. In connection with *Twelfth Night*, the kind of romantic comedy still admired for the pluck of its heroine, I shall suggest at least one of the dangers of persisting in the myth of a transcendent Shakespeare.

The construction of gender in *Twelfth Night* raises special issues for the modern reader or audience, which the mere insertion of women into roles originally written with boy-actors in mind does not eradicate, but further complicates. Stephen Greenblatt has recently argued that "licit sexuality in *Twelfth Night*—the only craving that the play can represent as capable of finding satisfaction—depends upon a [natural] movement that deviates from the desired object straight in one's path toward a marginal object, a body one scarcely knows." Thus, fortunately for Olivia and Viola, Sebastian and Orsino (or rather Antonio?), this deviating "nature is," according to Greenblatt, "an unbalancing act." But even if we endorse wholeheartedly Greenblatt's intertextual conjunction of Renaissance medical discourse and *Twelfth Night*'s construction of gender and identity, we modern readers still face our own problematic transcription of the text's construction of gender: how do our diverse re-constitutions of the women's roles, usually without regard to the textual residue of the original mode of production, affect the representation of women on the stage, not to mention their place in the world? The question reminds us that, for feminist critics as well as others, interpretation has present, as well as past, historical and political import. In her provocative psychoanalytic account of gender and genre in Shakespeare, Linda Bamber has claimed that, even in the comedies, "insofar as the Self is within drama and human, it counts itself a member of the dominant social group," whereas "the feminine is Other to society's rules and regulations, to its hierarchies of power, and to the impersonality of its systems and sanctions." But if, as Luce Irigaray asserts, "any theory of the subject has always been appropriated by the 'masculine,'" then Shakespeare's*Twelfth Night*, insofar as it aims to represent versions of woman as desiring subject, not only suggests anxiety about feminine identity and desire, but ultimately denies any Other consciousness at all—that is, any consciousness not constituted in masculine terms. Thus, unlike her literary cousin Rosalind, Viola never returns from boyhood to even the illusion of womanhood; instead she remains Cesario—a colony of that "little Caesar," the boy-actor inscribed in the text, sign of the masculine as prototype of subjectivity.

*Twelfth Night* essentially exiles all but traditionally deceptive and erratic images of women from the stage; the puckish Maria, weaver of Toby's beloved "device," is the rule, not the exception. Her deceptive letter to Malvolio replicates various postures and disguises of Olivia and Viola, but with a difference: it exposes the dangers of feminine wiles and desire, as do Maria's appeal to Sir Toby and her own attraction to him. On the one hand, as her handwriting indicates, Maria is her mistress's diminutive double; as such, she suggests problems with Olivia's rule over the house and indirectly implicates her mistress in the deception of Malvolio. Though her household seems to respect and even fear Olivia, the chaos of the subplot undermines the illusion of her governance. And since Maria uses her mistress's "being addicted to a melancholy" as part of the ruse, Olivia's own excesses are at least tangentially linked to Malvolio's cruelly comic imprisonment.

On the other hand, like Viola, Maria masquerades, albeit in the written word only. As in the obvious anagrammatic play among the names Viola, Olivia, and Malvolio, there is in Maria's writing a material illustration of the slipperiness of words that Viola and Feste note and employ in witty quibbles:

Viola. Thy reason, man?
Furthermore, like Viola but with greater impetus, Maria maneuvers her way into marriage through her clever deception. True, she uses a "device" (2.5.182), whereas Viola merely assumes a disguise. Still, the audience's sense of Viola's cleverness derives at least in part from her convincing masquerade; subliminally, Viola's clever deception belies her virginal innocence, which has to be reintroduced through the duel manque with Sir Andrew. Finally, the anti-romantic marriage between Maria and Toby exposes many of the artificial conventions of Twelfth Night's romantic main plot—both its chaotic courtships and its protean marital resolutions. Though I do not wish to overstate the importance of Maria, I do want to unmask the disguised implications of the sub-plot for issues of gender in the main.

Needless to say, the subplot's innuendoes hardly tell us everything we need to know about characters in the main plot; in particular, they seem to cast but a shadow of a doubt on Olivia, that remarkable characterization of a woman in love. Olivia recognizes and, unlike Orsino, takes responsibility for the swiftness and instability of her own passion and acknowledges that under its influence "ourselves we do not owe" (1.5.296). From her first encounter with Cesario, Olivia recognizes the pitfalls of the path down which she is headed: "I do not know what, and fear to find / Mine eye too great a flatterer for my mind" (312-13). In each successive encounter, she articulates her own precarious position as a female suitor and yet persists in her desires: "Under your hard construction must I sit, / To force that on you in a shameful cunning / Which you knew none of yours. What might you think?" (3.1.117-19). Like Viola, she submits to her fate as an unrequited lover (1.5.314-15); but, unlike the disguised female orphan and rather like Maria, she exercises her powers—feminine (she unveils her face [1.5.237]) and aristocratic (she arranges the betrothal [4.3] and later calls the priest as witness [5.1])—to get what she wants. Olivia is adept both at disguise and deferral—just why has she adopted that excessive posture of mourning that she so readily discards when the right love comes along? —and at assertive forthright action—her most effective commands to Toby and his cohorts occur when having mistaken the besieged Sebastian for Cesario, she defends her beloved: "Rudesby, be gone!" (4.1.50).

But repressed anxiety about such headstrong women surfaces in the text. Finally, Olivia's attraction to the gentlemanly but impoverished Cesario also indicates a desire to retain the kind of authority in marriage that union with Orsino, a social superior, precludes; as Sir Toby remarks, "She'll none o' the' Count; she'll not match above her degree, neither in estate, years, nor wit; I have heard her swear't" (1.3.106-8). Olivia's superior social standing seems to guarantee, if not an equal place in the marriage she wants (Sebastian does, after all, beat her kinsman [5.1.207]), at least a better place than most married women could hope for. As we shall see, though this nearer equality between husband and wife is offered as an ideal, the final scene casts some doubt on its extra-theatrical efficacy and, from the masculine perspective of one such as Orsino, even on its desirability.

The debate between Viola and Orsino addresses the issue of difference between feminine and masculine desire. As a lover, Orsino claims at times an imaginative capaciousness and mutability as great as the "sea" (1.1.9-15; 2.4.101-2), an image whose feminine associations many critics have noted. If Olivia has to adopt the uncharacteristic role of female suitor, Orsino often speaks of being in love as a feminine disposition: "Our fancies are more giddy and unfirm, / More longing, wavering sooner lost and worn / Than women's are" (2.4.33-35). By universalizing aspects of the love experience traditionally associated with one or the other gender, Shakespeare seems to eradicate the difference between men and women in love. What Viola, in a moment of solitary candor, says of the smitten Olivia applies equally to the masculine fancy of Orsino: "How easy it is for the proper false / In women's waxen hearts to set their forms!" (2.2.28-29). In this instance, both man and woman are erratic, unstable, unpredictable—in other words, conventionally feminine.
But Viola's remark is only half the story; it belies her later claim, in the person of Cesario, that women "are as true of heart as we [men]" (2.4.105). Though the play suggests that men in love are as erratic as women—we should note that Orsino, like many another Renaissance misogynist, considers fickleness essential to women whether or not they are in love—Shakespeare is also claiming in turn that women can be as faithful as men: "She [Cesario's fictive sister] sat like Patience on a monument, / Smiling at grief. Was not this love indeed?" (2.4.115-16). By conjuring up the Patient Griselda—that feminine prototype of steadfastness—Viola-Cesario and Shakespeare undercut the masculinist sentiments of Orsino. In this way, virtue in love is extended to women; love's transforming power is made universal. The fact that the contradictory statements about women's faith and fickleness in comparison to men's come from the girl-boy Viola-Cesario helps to create the illusion that, at least in matters of the heart, men and women are more or less on an equal footing. Through the boy-actor masquerading as a woman imitating a man, Shakespeare attempts to erase sexual difference: "I am all the daughters of my father's house, / And all the brothers too" (2.4.121-22).

But because this illusion of universality requires the skills of a boy-actor, the mode of production itself accords the masculine a peculiar privilege. Here we see a very basic sense in which "any theory of the subject has always been appropriated by the 'masculine'": in this Elizabethan script, subjective experience is constituted in masculine terms by men. Thus, afflicted with his own version of Malvolio's self-love, Orsino too claims the "trick of singularity" in love (2.5.151), by defining himself as lover in the very manner that men in patriarchal society have defined themselves, the self, and subjectivity itself—as not feminine. Indeed, in the key exchange with Cesario, cited earlier, Orsino predicates the depth of his desire and his very being on his difference from the woman, the mere object of desire. In contrast to Olivia's, Orsino's passion makes him more himself: "Make no compare / Between that love a woman can bear me / And that I owe Olivia" (2.4.100-102).

Of course, it is not quite so simple; as we have seen, Orsino likes to have it both ways. Even his appropriation of the oceanic capacity of the feminine exposes the extent to which this "man is the measure of all things," including femininity. There is no lack of self-possession here, but a fruitless attempt to possess or appropriate all through the imaginative capacity (often for roleplaying or at least posturing) that love occasions. Unfortunately for Orsino, who seems to believe his protestations at least as much as he presumably believes that Olivia is the only socially suitable match in town (5.1.110 ff.), his love's fancy does not extend much beyond the Petrarchan conceits and conventional courtly attitudes of the masculine, lover. Moreover, since Orsino's various declarations, unlike Olivia's or for that matter Viola's, are made in absentia and in isolation or in company supposedly of his own sex, they underscore masculine self-absorption and self-affirmation in love.

Certainly, given Orsino's rather sudden change of heart at the end, Viola's comment on women's being "as true of heart as we [men]" (2.4.105) suggests the instability of all desiring subjects, masculine as well as feminine. But it is through the image of woman that Shakespeare figures this lack of control, as we see in Orsino's long-awaited confrontation with Olivia in the final scene. Only when he has been repeatedly and undeniably thwarted, does he come in person and then prove the depth of his unrequited love by the will to murder—not the unfaithful woman herself but the object of ostensibly feminine desire: "But this your minion, whom I know you love, / And whom, by heaven, I swear I tender dearly, / Him will I tear out of that cruel eye / Where he sits crowned in his master's spite" (5.1.123-26). Orsino's violent verbal attack on Olivia and his threat against Cesario reveal almost as much as the play's omission of Cesario's transformation back into Viola. Most obviously, they cast all responsibility for his troubles on women, actual or disguised. They expose, furthermore, what Coppélia Kahn calls "his fear of losing himself in passion." That fear—particularly masculine, as I see it—is underscored by the threat against Cesario, the annihilation of Orsino's own ambiguous object of desire; Orsino unmasks once again his need to "defend against Eros as a threat to the integrity and stability of the self." Whereas Olivia hauls forth a priest to declare and ratify the love relation she wants (a marital one both we and undoubtedly Queen Elizabeth might question), Orsino's anti-social behavior, which culminates in the threat of violence against the boy-girl he loves, exposes masculine paranoiac
about the loss of self in love and about the indefiniteness of his own desire. Indeed, the indeterminacy of his own desire is suggested by Cesario (the boy playing a girl playing a boy), the target standing in for Olivia—who by the way is also played by a boy. Though the play certainly exposes many of the inconsistencies and contradictions of masculine love like Orsino's, the Shakespearean solution, the play's resolution, is nonetheless problematic, especially from a modern perspective.

The problems derive in large part from the comedy's mode of production; the boy-actor who plays Viola-Cesario remains a boy even after Orsino has declared his "share in this most happy wrack" (5.1.258). I cannot quite agree with Coppélia Kahn about "what Viola herself never forgets: that no matter how the duke and countess see her, she is not androgynous but irreducibly a woman."22 In fact, Viola's witty disclaimer—"a little thing would make me tell them how much I lack of a man" (3.4.307-9)—is a two-edged sword, not only undercutting the female character's masculine bravado but also underscoring the boy-actor's irreducible, or at least incipient, manhood.23 Though Orsino seems to deny it in his last lines, he finds his "mistress and his fancy's queen" in the boy Cesario, and not in Viola (5.1.377)—at least in terms of the visual tableau, a fact somewhat obscured in Phyllis Rackin's excellent article.24 The theatrical presence of the boy-actor as a boy manifests what, in The Daughter's Seduction, Jane Gallop calls "homosexuality" or the "sexuality of sames"—precisely the effect that Lisa Jardine claims the boy-players generally evoked, according to Renaissance commentators, both homophobic and otherwise.25 The dramatic resolution of the sexual play and the sexual tensions belies any acceptance of an Other by Orsino; it still relies on what Peter Erickson sees in As You Like It as the "security of male bodies mirroring and confirming a common physical identity."26 Oddly enough, by having Orsino accept his lover untransformed (in some ways a radical move compared to As You Like It's conservative ritualism and mystification of marriage),27 Shakespeare replicates the very narcissism and self-absorption of masculine love that the play supposedly unmasks. In this sense, the self-expulsion of the ill-willed, vengeful, self-loving Malvolio is the text's greatest deception.

Furthermore, Erickson's claim that the comedies' narcissistic mirroring "depends precisely on relief from the specifically genital demand associated with the opposite sex" is especially applicable to Twelfth Night, where the appearance of Viola's male twin Sebastian underscores the all-male mode of production.28 According to Kahn, "In Twelfth Night ... the twin and other doubles function at first as projections of emotional obstacles to identity and then, in Viola and Sebastian, as the fulfillment of a wish for a way around the obstacles."29 But the all-male Elizabethan production and its textual inscription in Orsino's remarks—that in Cesario "all is semblative a woman's part" (1.5.34) and that only "other habits" make the woman (5.1.386)—complicate the fulfillment of Viola's, the play's, and the critic-reader's wish that "imagination . . . prove true" (3.4.384). As Phyllis Rackin explains, "without the illusion (Viola's disguise as a boy), the right characters would not have fallen in love; without the reality, they could not have married. In the figure of Sebastian, gender and sex correspond, both within the play world and between the play and the audience."30 Sebastian apparently re-solves the play's problems because in him theatrical and actual sexual identity are one and the same; for the same reason, I maintain, the object of Orsino's transferred affections never transforms himself from Cesario back to that theatrical illusion—the girl Viola. Even though the transformation only requires the boy-actor's resumption of his "woman's weeds" (5.1.271), there is in a meta-dramatic sense more truth in the undisguised Viola's remaining Cesario, in her showing herself—like Sebastian, but in another way—both "maid and man" (5.1.261).

The uneasy Renaissance conflation of two "contradictory accounts of the origin of gender" that Greenblatt outlines in his discussion of the play may underlie some of the "slippage" in identities. In one version, the domination of male or female seed determines identity; "a double nature becomes single." In the other theory, "the unitary genital structure," conceived as essentially male, "divides into two distinct forms, internal [female] and external [male];" "a single nature becomes double."31 But how do we explain the relative values the play assigns to and by gender? Along with Malvolio's accusations of "Notorious wrong" by Olivia (5.1.327-28), who is at the end the one theatrically disguised boy remaining on stage, the image of Orsino with Cesario corroborates the traditional privilege the text accords to masculinity, as well as its imputation of
duplicity to femininity. The bias of the text in this case is not nature's "bias" (5.1.258), but the culture's—akin
to men's age-old wish for a singlesex utopia, a world without women. The minor Sebastian-Antonio plot
exposes this sub-text. Antonio's homoerotic infatuation with Sebastian, his "willing love" (3.3.11), is an
unmasked version of Orsino's attraction to Cesario and, again, given the mode of production, even of the
relationship between Sebastian and Olivia. In fact, it brings to the fore the all-male mode of production. When
Antonio mistakes Viola-Cesario for the adored Sebastian, the error involves an indictment not only of beauty
without virtue, but also of the disjunction between exterior and interior—in other words, of Viola's
masquerade as "unkind" or unnatural: "Thou hast, Sebastian, done good feature shame. / In nature there's no
blemish but the mind; / None can be call'd deform'd but the unkind" (3.4.375-77, 377n). Is it an accident that
Antonio directs his accusations at a female character, who has already acknowledged her disguise "a
wickedness" and herself a "monster"?

The moment recalls Viola's own words to the Captain in act 1, words that conjure up the traditional masculine
suspicion of feminine beauty: "There is a fair behaviour in thee, Captain; / And though that nature with a
beauteous wall / Doth oft close in pollution, yet of thee I will believe thou hast a mind that suits / With this
thy fair and outward character" (1.3.47-51). Indeed, the proof that Viola is a virtuous woman, that she is
worthy to be loved, and that she is everything she claims and seems to be requires not only her reunion with
the brother she imitates to the life (3.4.389-93), but also her conforming to the masculine standards of truth
reiterated by Antonio—an absolute correspondence between interior and exterior, spirit and body, even word
and thing. Is it then an accident that Antonio, whose very presence exposes the inability of the theatrical
illusion to achieve such a correspondence, "is left out in the cold," displaced by a second boy-actor
masquerading as a woman, the Lady Olivia, without any authority calling to "entreat him to a peace" (5.1.379);
emphasis mine)?

The ultimate corroboration of social order and expectations through the mediation of laws
conceived as natural or providential makes this text's intersection with our own culture a problematic one.
Though the "pleasure" of the play is less concerned with "truth of identity" than the "titillation" aroused by the
"dangers that follow from the disruption of sexual difference," this comedy also closes down the
possibilities implicit in Viola-Cesario's admission of sexual indeterminacy—"I am not what I am" (3.1.143)—and in Antonio's undisguised and unresolved homoerotic attraction.

Why then has Shakespeare refused to return to the initial illusion in which boy plays girl, the illusion that
corroborates the traditional social union of male and female in marriage? I propose that, although other
Shakespearean comedies may also manifest uneasiness toward their feisty heroines, Twelfth Night exiles its
heroine—perhaps more thoroughly than it exiles Malvolio himself. Herein lies the danger of a supposedly
transcendant Shakespeare, and herein lies as well the problem for the modern reader (or viewer or performer),
who wishes to avoid complicity in this text's "bias." Ultimately there is not even the pretense of a sovereign
female consciousness. Viola remains in masculine guise because that is the sign of her truth; Orsino can trust
her only insofar as she is "masculine." Indeed, in the end, we realize that the play's model for true love is not
heterosexual, but rather "homosexual" in Gallop's sense—the love of Antonio for Sebastian and, by a
comforting displacement, of Orsino for Cesario née Viola. In contrast to the androgynous epilogue of As You
Like It, the last of Shakespeare's high comedies elevates the heroine by eradicating her, by letting her be
absorbed into the masculine; for as Viola herself says, and as the play's dramatic illusion underscores, women
"die, even as they to perfection grow" (2.4.40).

6 Stephen Greenblatt, *Shakespearean Negotiations: The Circulation of Social Energy in Renaissance England* (Berkeley: Univ. of California Press, 1988), 68. Not long after I had presented the original version of this paper at the CEMERS conference (October 1987), Greenblatt's controversial essay on "Fiction and Friction" appeared in the foregoing collection of essays (66-93, 175-84) and has since become the center of a debate among feminist and new historical critics of *Twelfth Night*, not least for the authority it grants Renaissance medical discourse on gender and for the effect its general acceptance might have on political and, in particular, feminist criticism. (See, for instance, Jean Howard, 422-23.) Therefore, since I am addressing concerns relevant to the current debate, it seems appropriate to note some points of agreement and disagreement between Greenblatt's views and mine.

13 E.g., Kahn, 225.

14 For the reference to Patient Griselda and further implications of this image, see Catherine Belsey's "Disrupting Sexual Difference: Meaning and Gender in the Comedies," in *Alternative Shakespeares*, ed. John Drakakis (New York: Methuen, 1985), 186-87.

Greenblatt notes that "if a crucial step in male individuation is separation from the female, this separation is enacted inversely in the rites of crossdressing; characters like Rosalind and Viola pass through the state of being men in order to become women. Shakespearean women are in this sense the representation of Shakespearean men, the projected mirror images of masculine self-differentiation" (92). But when is Viola seen as a woman again? Whereas she remains Cesario, the boy-actor has undergone the passage through femininity to masculinity—and in this case, he never closes the circle by re-appearing in female guise. At the end of *Twelfth Night* the boy-actor remains true to himself; indeed, even in developing the heroine, the text manifests an unconscious association between individuation and maleness.

Relevant to this point is Toril Moi's discussion of Kristevan "positionality" in *Sexual / Textual Politics: Feminist Literary Theory* (New York: Methuen, 1985), 166-67.

On the issue of Elizabeth and marriage, see Marcus, passim, as well as Greenblatt, 68-69.

Kahn, 228.

In contrast, Rackin notes the boy-player's economic dependency, an extra-dramatic extension of the feminine role, which underscores the indeterminacy of the boy-heroine both on and off the stage (33).

Rackin, 38.

Peter Erickson, 5.

Regarding the ending of *As You Like It* and that play's quite different construction of gender, see my article on "The 'Unexpressive She': Is There Really a Rosalind?," *Journal of Dramatic Theory and Criticism* 2, no. 2 (1988): 41-52.

Peter Erickson, 5. Erickson's insightful comments have meta-dramatic significance that he suggests but often does not discuss in detail.

Kahn, 225.

Rackin, 38.

Greenblatt, 84.
See Greenblatt's explanation of the "metaphor from the game of bowls" and nature's bias; heterosexuality is
conceived as a normal, "happy swerving" (68). Greenblatt's argument is fascinating, and the pattern he
describes does indeed resemble the plot of a Shakespearean comedy (86). But unlike Greenblatt I would argue
that, however problematic the Renaissance accounts of gender, the valuation of the genders is less so; at the
very least the second theory of gender—with its play upon the male organ, the latter's inward or outward,
hidden or open, disposition—is less ambiguous about the primacy of male nature and hence of masculinity.
Indeed, if one combines this view of sexuality with Viola's and Antonio's talk about truth, the correspondence
between interior and exterior, one finds that women are never quite themselves. 

Twelfth Night, as well as the
context that gave rise to it, tends to promote the truth that shows itself—in Sebastian and in Viola-Cesario,
emblem of the theater of boys and men that represents the world of women and men. For a provocative
historicist reading that differs from Greenblatt's, see Howard, 430-33.

Rackin, 37.

Greenblatt notes that, though Renaissance church and state sanctioned only the heterosexual consummation
of desire, "it did not follow that desire was inherently heterosexual. The delicious confusions of Twelfth Night
depend on the mobility of desire. And if poor Antonio is left out in the cold, Orsino does in a sense get his
Cesario" (93). But though Greenblatt mentions also the way in which the all-male cast of Shakespeare's
theater embodies a double-sided Renaissance view of gender, he eschews the implications, for us, of the
inscription in the text of this mode of production and this construction of gender. What values are inherent in
these "delicious confusions," this "set of exchanges and transformations"? To formulate the matter at its most
extreme, do the play's exile of the explicitly homosexual and the enforced masquerade of woman within
marriage (or, in another sense, the absence of women altogether) recommend themselves, as immediately and
unequivocally as Greenblatt implies, to the modern reader? What does it mean to accept Greenblatt's brilliant
"corollary" theory about the play—"that men love women precisely as representations, a love the original
performances of these plays literalized in the person of the boy actor" (93)? Pleasurable, "delicious
confusions" perhaps—but not neutral ones, not ones without present ideological efficacy, given the place of
Shakespeare in our culture.

Belsey, 185.

Irene G. Dash (essay date 1997)

SOURCE: "Challenging Conventions: Twelfth Night" in Women's Worlds in Shakespeare's Plays, University

[In the essay below, Dash stresses the similarities between Viola and Olivia as young, single, upper-class
women who, for a brief period, challenge patriarchal restraints on female independence. She also calls
attention to the textual alternations put in place by generations of theatrical directors which have minimized
the difficulties Viola and Olivia face as they try to resolve the tension between erotic desire and the norms of
society.]

"But if she cannot love you, sir?"
"I cannot be so answer'd."

(II.iv.87-88)

Endowed with wealth, their lives graced by neither fathers, brothers, husbands, nor lovers, the two major
women characters of Twelfth Night briefly challenge patterns of patriarchy. Not revolutionaries, but merely
young women grasping at suddenly available freedom, each would taste independence in her own way. One
retreats behind the garb of mourning for her dead brother while the other, also turning to her supposedly dead
Shakespeare takes the contemporary debate about women's attire, for example, holds it lightly in his hand, turns it like a multifaceted prism, reflecting and refracting the light, then puts it down, revealing the larger issue that it illuminates: women's independence.\textsuperscript{1} With humor and insight, he asks how important is conformity in dress in defining an acceptable woman? Is the woman in breeches really a monster as some of the tracts of the period proclaim because the blurring of fashion could lead to "confusion . . . something that can't be accommodated, a monster" (Shepherd, 1-2)? Or is she related to the tradition of the warrior woman who, like Britomart in Spenser's \textit{Faerie Queene}, fights for virtuous ends (Shepherd, 67)? Denying these extremes and laughing at the debate, the dramatist offers another answer in \textit{Twelfth Night}. In the mode of the modern social scientist, he presents a case and a control, revealing that whether dressed in her own garments—those proper to her sex—or in the borrowed clothes of the other sex, a single woman when young and wealthy faces problems in a patriarchal society, especially if she dares to fall in love and opt for marriage.

Although the play's two major women characters, Viola and Olivia, often have been presented on stage as exact opposites because one wears skirts, the other, breeches, the dramatist has carefully sculpted their roles as parallels—not the wealthy, self-confident, or arrogant Countess in skirts compared with the poor, clever, girl-disguised-as-a-page in breeches, but two bright, literate, young women, each with a sense of herself, each in her own way trying to cope, and each believing she has power. Economic independence and the absence of male authority figures in their families seem to promise self-sovereignty. The play explores the options each woman chooses, the resulting interaction between the two women, and the impact of sexual drives and patriarchal mores on their lives.

And here their difference in attire leads the women into unexpected situations and deflects them on their road to freedom. Disguised as the youth Cesario, Viola wins the heart of the independent Olivia but also, in this disguise, loses her heart to the Duke Orsino. Clothes, rather than freeing her, confine her to silence. In contrast, the woman in skirts forthrightly expresses her desire, overtly pursuing the "youth" Cesario.

As a result, Olivia suffers both in criticism and staging. Since patriarchal values favor the compliant woman over the aggressive one, Viola's breeches, ironically, appear far less threatening than Olivia's decision-making and husband-wooing. By endowing the young women with so many similar attributes with the potential for independence, the dramatist not only explores the limits on that independence for women, but also illuminates what is acceptable and unacceptable in women's behavior.

Even in the twentieth century, acceptable behavior for a young woman has been linked with her loss of independence. According to Simone de Beauvoir, women's "erotic urges" in a male-dominated society cause the problem. She writes of the decision women reach at maturity after having struggled during adolescence with the choice between self as primary and self as "Other." Using the term \textit{subject} to refer to a person's perception of herself as central, or primary, de Beauvoir writes: "For the young woman, . . . there is a contradiction. . . . A conflict breaks out between her original claim to be subject, active, free," and the pressure of "her erotic urges" which dictates that she "accept herself as passive object" (314).\textsuperscript{2} In \textit{Twelfth Night} Shakespeare lightly dramatizes the shift in goals for both women. Because this is a comedy, the painfulness of the dilemma is not stressed as it is, for example, in a tragedy such as \textit{Romeo and Juliet}, where Juliet has not yet recognized the necessity to "accept herself as passive object" and struggles to retain her self-sovereignty even while expressing her "erotic urges."\textsuperscript{3} Here, in the comedy, Viola says merely, "O time, thou must untangle this, not I. / It is too hard a knot for me t' untie" (II.ii.40-41). But the dramatist's choice of opposite-sex twins, the weakness of Viola's argument for donning disguise, the basic social equality between the two women, and the subsequent hasty desire of each to discard the protective pose she has chosen suggest
the applicability of de Beauvoir's comment.

The difference, however, in the ways the two women react to their "erotic urges" explains their "acceptability" in the eyes of critics, directors, and audiences. Unlike Viola, Olivia refuses to perceive herself as "Other," seeking instead to solve her problems by aggressively taking charge. After having claimed fealty to her dead brother's memory and adopting a vow of seven years of mourning, a period meant to discourage all the suitors who do not appeal to her, she then changes her mind about marriage when an attractive young "male" arrives at her door. Still retaining that sense of self as "subject, active, free," she nevertheless pursues Cesario, the disguised Viola. Thus in some ways, Olivia resembles Helena of All's Well That Ends Well But Shakespeare has not only endowed Olivia with freedom, wealth, and power, he has also created an alternative double to her in Viola. Unlike Viola, however, Olivia refuses to leave everything for time "to untangle." Thus, while partially illustrating de Beauvoir's thesis—of the effect of "erotic urges" on women's decision-making—Olivia fails to conform to the properly acceptable behavior for a woman.

Behavior is ultimately more important for society than appearance: the debate on women's dress withers before that larger issue of woman's forwardness. Stage productions and criticism of Twelfth Night attack Olivia's violation of conformity in a variety of ways. First, they blur or ignore the many similarities between the women, magnifying Viola's role as a servant, and excising lines indicating her wealth and class. Thus, she becomes the "poor servant girl" as contrasted with the wealthy, aggressive Countess. In criticism, a blatant example of bias appears in William Winter's introduction to Augustin Daly's large souvenir promptbook of the 1893 production of the play. Winter writes that "Viola is Shakespeare's ideal of the patient idolatry and devoted, silent self-sacrifice of perfect love" (5). In contrast, Olivia draws the following comment:

The poet has emphasized his meaning, furthermore, by the expedient of contrast between the two women. Olivia—self-absorbed, ostentatious in her mourning, acquisitive and voracious in her love, self-willed in her conduct, conventional in her character, physically very beautiful but spiritually insignificant—while she is precisely the sort of woman for whom men go wild, serves but to throw the immeasurable superiority of Viola into stronger relief.

(6)

This hardly defines the Olivia whom we meet in the play—the young woman who graciously speaks of Orsino's virtues although she "cannot love him" (I.V.257); who good-naturedly accepts the criticism of her fool; and who even apologizes to the disguised Viola.

Although extreme in its language, Winter's reaction is not isolated. It had both predecessors and successors. Mrs. Inchbald's edition (1808), for example, faults Olivia for another aspect of her behavior, citing the "impudence of women in placing their affections, their happiness, on men younger than themselves" (4). For Inchbald the text itself warns against this in the Duke's words to Viola:

Let stil the woman take
An elder than herself; so wears she to him
So sways she level in her husband's heart, & C

(4-5)

Unfortunately, the editor lifts the speech out of context—a humorous context. The lines occur during a conversation between Duke Orsino and Cesario. Attempting to express herself as a man, Viola describes the person she loves (the Duke) as one "About your years, my lord" (II.iv.28). This leads to his swift reply that Cesario should choose a woman younger than "himself." The humor of the exchange is apparently lost on the indignant editor who even censures Olivia's treatment of her glum steward, the egocentric, puritanical
Malvolio. He, like the Duke, has dreams of marrying her. Misreading his role in the play, Inchbald recommends him:

It might nevertheless be asked by a partizan (sic) of Malvolio's, whether this credulous steward was much deceived, in imputing a degraded taste, in the sentiments of love, to his fair Lady Olivia as she actually did fall in love with a domestic; and one who, from his extreme youth, was perhaps a greater reproach to her discretion, than had she cast a tender regard upon her old and faithful servant.

Prejudice against a strong woman who fails to conform to accepted societal patterns leads the editor astray. She forgets that Cesario is not a youthful domestic but a young woman whose background very much resembles Olivia's, as the dramatist subtly informs us.

Using a sophisticated theatrical methodology, Shakespeare introduces each woman in a different way—playing upon potential audience bias even while revealing the similarities between the women. Shipwrecked in a foreign land, Viola strides ashore, speaks in her own voice, paints a picture of her misfortunes, and quickly decides how to deal with them. During her first appearance, in scene 2, she also reveals her background. In contrast, hearsay precedes Olivia's entrance. In scene after scene a variety of characters evaluate her decision to mourn her brother's death for seven years. Some of these characters also raise questions about the proper behavior for a young countess. Through this technique, the dramatist employs a series of incomplete vignettes by others to suggest the obstacles confronting her.

Critics and actor-managers—or directors—often fall into the trap. They accept the hearsay about Olivia then find the lovesick Duke Orsino—whom we meet in the opening scene—just as irrational as the woman he so passionately wants to marry but who emphatically rejects him. Herschel Baker, for example, calls them "a pair of high-born lovers [who] indulge a set of attitudes untested by experience" (xxiv) and writes of "Orsino's egomania" and "Olivia's silly posture of bereavement" (xxx). Geoffrey Bullough, too, observes that "by the end of the first scene we know by Olivia's oath to spend seven years grieving indoors that she is akin to [the Duke] in sensibility" (2:278). Actually, we never see Olivia weeping or miserable; the closest she comes to discussing her mourning is in her opening scene when her clown berates her, and she responds by commending his cleverness. Hearsay, primarily, reveals her "silly posture of bereavement." On the other hand, Orsino exhibits his foolishness through his own actions and words in the play's opening scene although many of his lines are frequently cut from productions to make him seem less silly.4

That opening scene appears to have a purpose—to establish the world of Illyria, a mythic, ancient, unavailable world. Again we witness the dramatist's skill. For while he offers realistic reasons to suggest the kinds of options available to women who might freely move in society as equals of men, he quickly withdraws those options by creating this world. Though not inhabited by otherworldly creatures, this land of Illyria derives its magic from the sequential arrangement of scenes, keynoted by Orsino at the start. Unlike Hippolyta and Theseus, who provide a frame through which we, the audience, move into the enchanted wood on a midsummer's night, or the weird sisters who set the mood for Macbeth, here the lovesick Duke sets the distinctive tone and establishes the particularities of place.

The opening scene not only immerses us in that unrecognizable and slightly skewed world of Illyria but also provides the first glimpse of Olivia through the eyes of the Duke. In love with love as well as the Countess, he seeks solace in music. "That strain again," the Duke commands, noting, "it had a dying fall" (I.i.4). And then abruptly, three lines later, "Enough, no more, / 'Tis not so sweet now as it was before" (7-8). He stops the instrumentalist then continues, his lines a mockery of the Petrarchan sonneteer's lyric to his love. Although the comedy later ranges between low, raucous farce and sophisticated verbal jousting, this opening scene carries
the audience to that mythical land where both women seek to understand the meaning of freedom.

Recounting how he lost his heart, including a pun on the word *hart*, the Duke speaks in labored metaphors. Languishing in adoration of Olivia, he offers a portrait of the lover according to the most exaggerated sonnet conventions:

O, when mine eyes did see Olivia first,  
Methought she purg'd the air of pestilence!  
That instant was I turn'd into a hart,  
And my desires, like fell and cruel hounds,  
E'er since pursue me.

(I.i.18-22)

Poor Orsino, transformed into a hart, has been pursued by his desires. Enhancing the otherworldly quality of this scene, Shakespeare dubs the courier "Valentine." He, too, contributes to the portrait of Olivia by admitting his failure to deliver Orsino's message. Denied an audience, Valentine reports on Olivia:

The element itself, till seven years' heat,  
Shall not behold her face at ample view;

(25-26)

Since the message was conveyed by Olivia's "handmaid," whom we later discover to be Maria, a woman with a tendency to trickery and a love of giving instructions, we cannot be certain whether Valentine's language and delivery characterize the speech patterns in Illyria, or whether they belong specifically to Valentine, Maria, or Olivia. The message has been sifted through two messengers; thus we are twice-removed from Olivia. Valentine continues his report:

... like a cloistress she will veiled walk,  
And water once a day her chamber round  
With eye-offending brine;

(27-29)

Once again an overblown metaphor colors the speech as the reporter describes a woman constantly weeping, a condition never to be witnessed by the audience. Shakespeare has begun the portrait that he will develop in each succeeding scene. Here, indeed, we might agree with Baker's evaluation, until we meet the young Countess.

In this dual portrait—of Orsino as well as Olivia—our sympathies hardly go out to the fatuous Duke even while we wonder what sort of woman would make such a vow. Shakespeare's audience may have recognized the satire on the Renaissance courtier—as we do not; however, Orsino's method of wooing proved as unconvincing to the young Countess as it does to us today. As for her seven-year vow, while it seems an extreme measure, it certainly should have discouraged this persistent wooer. Like the women of *Love's Labour's Lost* and Queen Elizabeth herself, Olivia chooses to postpone marriage. Unlike the women of the earlier play, whose one-year wait may imply later acceptance, Olivia's drastic seven-year postponement should prove sufficiently discouraging to send all her suitors elsewhere.

Ironically, at this early moment in the play, Orsino admires her decision even while wondering how she will respond when she does fall in love:
O, she that hath a heart of that fine frame
To pay this debt of love but to a brother,
How will she love when the rich golden shaft
Hath kill'd the flock of all affections else
That live in her.

(32-36)

Despite the awkwardness of this metaphor, as critics have noted, Orsino's shaft hits the mark. Olivia will soon offer love, gifts, and marriage to Viola disguised as the Duke's page, Cesario.

Lyrical, musical, with a touch of melancholy as well as humor, this first scene, with its shimmering surface, quickly dissolves before the next in which we hear the simplicity and directness of Viola's language. Differing in style and tone from Orsino, she tramps ashore and immediately questions the sea captain who has rescued her from shipwreck: "What country, friends, is this?" (I.ii.1) "This is Illyria, lady" (2), he replies. This is the land where she is unknown, where the Duke Orsino rules, and the young Countess Olivia rejects his advances. This is the land where Viola, herself, will seek new identity. In language revealing her skill with words and sensitivity to puns, she continues: "And what should I do in Illyria? / My brother he is in Elysium" (3-4). Even while she captures the resonances in language between "Illyria" and "Elysium"—between life and death—she attempts to sum up her own situation at this moment. We may be in the distant land of Illyria, but we are listening to a realistic young woman with practical wisdom, an ear for words, and a sense of the ludicrous in contrasting Illyria with Elysium.

This short exchange reveals a good deal about her: her concern for her brother, her obvious upper-class background and education through her reference to "Elysium," and her positive attitude: "Perchance he is not drown'd—what think you, sailors?" (5). In five lines, she poses three questions. And when the captain suggests that her brother may also have survived—tied "To a strong mast that liv'd upon the sea," (11-14)—Viola answers with the directness already evident:

For saying so, there's gold. (18)

This first impetuous offer of gold springs from her reaction to his words of hope. She will reward his reassurance with money, a learned pattern, indicating her upper-class background. Later, a second, more considered promise grows from her resolve to conceal her true, female identity and pose as a eunuch. "I'll pay thee bounteously" (52), she vows.

Viola's social status emerges again when, in seeking to convince the captain to recommend her (in her disguise) to the Duke, she lists her musical skills.

... For I can sing
And speak to him in many sorts of music
That will allow me very worth his service.

(57-59)

Critics have noted that she never does sing in the play. They therefore cite this as one of the many inconsistencies that tend to thwart audience expectations. M. M. Mahood writes in an otherwise perceptive analysis: "A further puzzle created by the second scene is that it leads us to expect Viola will sing to the Duke, but she never does so" (17). Nor is Mahood alone. Others, including W. W. Greg in his bibliographical and textual study The Shakespeare First Folio, had earlier seemed to establish this expectation as a fact:
It is almost certain from the insistence on Viola's musical accomplishments at I.ii.57-58 that she was meant to be a singer, and from the awkward opening of II.iv that the song "Come away, come away death" has been transferred from her to Feste.

(297)

More likely the insistence on musical training was meant to strengthen her class identification. As Warnicke points out, at this time upper-class young women frequently received a limited musical education (117 and passim). Nor would such an education qualify Viola as a professional—the role of Feste in this play. Rather she is providing one of her several "job qualifications" even if she does not use them once she is employed.

Scene 2 must be understood as Shakespeare's swift, frank introduction of Viola—one that will not be repeated. Rather than anticipating specific later actions, it sketches in her upper-class background. Not only her offers of money and reference to Elysium, but her indication of a musical education, would have been familiar clues to contemporary audiences. In addition, despite its ambiguity, her quick response to the captain's mention of Orsino, "I have heard my father name him" (I.ii.28), followed by the delightful specific, "He was a bachelor then" (29)—leading audiences to believe that the Duke and her father knew one another (never actually confirmed in the text)—seems to reinforce the class connection. Not until the play's closing moments does she refer to her earlier life again, except in momentary lapses, such as her lines:

My father had a daughter lov'd a man
As it might be perhaps, were I a woman,
I should your lordship.

(Il.iv. 107-9)

Or it surfaces in her boast of her parentage to Olivia: "Above my fortunes, yet my state is well: / I am a gentleman" (I.v.278-79). In that instance, however, the gender shift masks her identity. But at this point in the play, scene 2 prepares the audience for the combat of wits that will ensue between the two women of similar backgrounds when they finally confront one another three scenes later.

Yet societal values and accepted stereotypes about women blur those similarities and stress the women's differences. As I pointed out earlier, hostility to the young woman who would defy conventions creeps into the criticism just as sympathy for Viola, who suffers in silence, develops. Like the critics, editors and actor-managers, too, prefer to sharpen the contrast between this shipwrecked young woman soon to masquerade in breeches and the wealthy young Countess Olivia who exercises nonconformist attitudes towards men.

To strengthen the difference between the women, staged versions help reshape Viola by excising her line "For saying so, there's gold" (I.ii.18) and deemphasizing her class through costuming. The excision has persisted from the eighteenth century into the twentieth. The Bell edition (1773), for example, which claims to record the play "As Performed at the Theatres-Royal," jettisons Viola's offer of gold to the captain, suggesting what audiences saw at Drury Lane and Covent Garden after 1741. Mrs. Inchbald (1808), >as we have seen, refers to Olivia's falling in love "with a domestic" (4-5) and John Philip Kemble, whose acting version, first published in 1810, becomes the standard for theatrical productions for close to a century, also excises the reference to gold. By >the end of the nineteenth century, Henry Irving creates his own version, one which stresses his role of Malvolio. Nevertheless, Irving adopts many of Kemble's excisions, including Viola's offer of a reward. In the twentieth century, Herbert Beerbohm Tree, among others, also excises the line, perhaps thinking it unseemly for a young woman to be so comfortable with money. More likely, Tree is following a tradition both in text and attitude towards Viola.
As well as introducing her, scene 2 further develops the portrait of Olivia through hearsay. The captain narrates and Viola listens. A down-to-earth and non-involved spectator, he responds to Viola's query about Orsino's bachelorhood with uncertainty, assuring her only that a month earlier, before the captain left, Orsino was seeking Olivia's hand:

And then ’twas fresh in murmur (as you know
What great ones do, the less will prattle of)
That he did seek the love of fair Olivia.

(I.ii.32-34)

In scene 1, Orsino had provided the emotional background; in scene 2, the captain fills in many of the publicly known details about the young woman. A "virtuous maid," the phrase identifying her youth and unmarried status, she is also:

. . . the daughter of a count
That died some twelvemonth since, then
leaving her
In the protection of his son, her brother,
Who shortly also died;

(36-39)

Alone and wealthy, Olivia has much in common with the young woman listening. Malcolmson makes a similar point although she leaves Viola's exact status in doubt: "The scene does not explicitly define Viola's status as either noble or gentle; rather, her rank is veiled from us just as Viola veils it from the people she will meet. . . . [W]e, and the characters, will know her through her role-playing and her 'intent" (37). Although staging tends to obscure Viola's status, I believe that the dramatist offers sufficient clues both in her speeches and her actions to indicate her upper-class background.

As the captain continues, he also helps identify Illyria's social system, one that places an unmarried woman under the governance of a male in the family. Finally, the captain speaks of the Countess's actions now that her brother's protection has ceased. In deference to the love she bore him: "'They say, she hath abjur'd the company / And sight of men" (40-41). Omitting any reference to the seven-year limit on the mourning period, relayed by Orsino's messenger in scene 1, the captain's "they say" confirms his general reliance on hearsay and his distance from Olivia. When, therefore, Viola resolves to serve this countess, the captain quickly discourages her:

That were hard to compass,
Because she will admit no kind of suit,
No, not the Duke's.

(44-46)

Obviously, if the Duke has failed, Viola should not even consider such an option. Accepting the captain's advice, she quickly shifts her objective and decides on wearing breeches: "I'll serve this duke; / Thou shalt present me as a eunuch to him" (55-56).

Critics have questioned the ease with which Viola changes her mind, considering her later persistence and success in meeting Olivia. As Ruth Nevo observes, although Viola, upon hearing of Olivia's loss, exclaims, "O that I served that lady," she "does not fly to the Countess Olivia for succour, woman to woman, despite her
sympathy for a fellow-mourner. Instead she chooses to be adventurously epicene in the Duke's entourage" (205). Nevo believes that Viola makes a sacrifice here by asking to be presented as a eunuch, a rational explanation for her high voice and feminine appearance. More importantly, the young woman's transformation permits her to enjoy the freedom of action allowed her twin brother, and formerly denied her because of her sex. The speed of her decision also leads C. L. Barber to comment that "the shipwreck is made the occasion for Viola to exhibit an undaunted, aristocratic mastery of adversity—she settles what she shall do next almost as though picking out a costume for a masquerade" (241). He is less concerned with the reason for her choice than with her free and easy manner, her language in making the decision. Unlike these modern critics, Samuel Johnson expresses disdain for Viola's actions and considers this a plot weakness:

Viola seems to have formed a very deep design with very little premeditation: she is thrown by shipwreck on an unknown coast, hears that the prince is a batchelor, and resolves to supplant the lady whom he courts.

(7:312)

The play, however, refutes this theory, as we discover later on when Viola, having fallen in love with the Duke, bemoans the limitations placed on her by disguise then courts the Countess for him.

Differing from Johnson, most actor-managers and directors, as well as critics, favor Viola over Olivia. To focus more sharply on the disguised young woman, these men often transpose the first and second scenes. Again Kemble's influential version dominates. It opens with noise, thunder, and lightning, heralding Viola's arrival on the shores of Illyria. Beerbohm Tree, in 1901, dramatizes Viola's weakness on arrival although the text offers no such suggestion. Sailors bring her ashore "as if insensible. She is put reclining on the steps. Wet dress. Sailors with chest and bundles." Winthrop Ames, in 1906, also has the sailors "supporting a woman, then carrying in a child" (a character added for pathos, I suspect). Augustin Daly, the famous American manager at the end of the nineteenth century, goes even further. He opens the play with the arrival of Viola's brother on the shores of Illyria, eliminating all suspense as to whether or not her twin has survived.

Despite Daly's more radical alteration of sequence, it was only a temporary aberration whereas Kemble's pattern has persisted. As recently as the summer of 1986, New York audiences were treated to a Kemble format under the aegis of Joseph Papp, the production opening with Viola's arrival in Illyria. Possibly the drive for realism and interest in plot development contributed to the decision to open with the second scene. More likely, however, the uncreased emphasis on the heroic Viola in contrast to the foolish Olivia was responsible.

Unfortunately, that transposition sacrifices the airy, wistful tone of the first scene with all its implications and resonances—a scene as important to the play as the three witches who open Macbeth or the ghost on the ramparts who chills the air with foreboding in Hamlet. In Shakespeare's sequence, Orsino's impassioned pleas and posing in the first scene add credibility to Olivia's decision whereas when the play opens with scene 2, she sounds arbitrary and unreasonable since the sea captain warns Viola of the impossibility of meeting this woman.

Shakespeare's scene sequence (as Clifford Leech observed) has its own specific validity and dictates a pattern of relationships (36-37). The patterns in the plays usually affect and often heighten the impact of the work on the audience. Shakespeare's method resembles that of the painter who establishes positive and negative areas of a painting, each helping to illuminate the other while through both he weaves color, line, and design that unify the whole. In Twelfth Night, Orsino's opening scene provides the background (or negative) area—of fantasy—against which Viola's realistic approach proves refreshing. Woven through both is the slowly developing character of Olivia.
Scene 3 intensifies the portrait of the Countess. This time the dramatist takes us closer to her world, introducing us to the ebullient and varied characters who inhabit her home. There, the multidimensional, and skewed, characterization continues to grow as others' words fill in the blank spaces of the sketch first begun by Orsino. The robustious, roaring, frequently drunk Sir Toby, identified in the cast list as "uncle to Olivia," introduces us to the comic characters even while he stews, "What a plague means my niece to take the death of her brother thus? I am sure care's an enemy to life" (I.iii.1-3). Maria, the serving woman, rather than answering, sharply reprimands, "Your cousin, my lady, takes great exceptions to your ill hours" (5-6), bearing witness to a more dynamic Olivia than thus far promised by either Orsino or the sea captain. With these two speeches, Shakespeare has catapulted us into Olivia's household and established the firmness of the mistress's control. She has accepted the obligations of her position. A life of mourning has led neither to a retreat from reality nor to an abdication of responsibility, merely an affirmation of the single life.

Challenges to that single life, however, seem endless. Suitors spring up everywhere. Even Sir Toby has a candidate—his drinking companion, the foolish Sir Andrew Aguecheek, a gull easily separated from his money. Nevertheless, Sir Andrew, skeptical of his chances, would withdraw from the field, admitting, "Your niece will not be seen, or if she be, it's four to one she'll none of me. The Count himself here hard by woos her" (I.iii.106-8). For the third time, we hear of the Count's persistent wooing. Anxious to prevent the departure of his wealthy drinking mate, Sir Toby confidently insists, "She'll none o' th' Count. She'll not match above her degree, neither in estate, years, nor wit" (109-10). Although his motive is suspect, Sir Toby, while he ultimately will prove wrong about the "degree" of Olivia's intelligence, or wit, is correct about her rejection of the Count and probably about her youthful age. Sir Andrew does not contradict him.

Interestingly, critics, too, have wrestled with the question of her age while directors have indicated their opinion through dress, make-up, and stage movement. They usually decide in favor of seniority, thus emphasizing the ways in which an older woman can be bested by a younger, more conventional one. The hostility to the older, aggressive woman on stage remains; she is a subject for laughter and audience mockery. And here the language of the text may inadvertently contribute to this misreading, for whereas Olivia is acting herself, a young single woman, Viola, playing a man's role, is described as "not yet old enough for a man, nor young enough for a boy" (I.v.156-57). Leo Salingar in 1958, for example, considers the Countess, "psychologically an elder sister to Viola" (125). Although not censorious, as was Mrs. Inchbald in 1808, Salingar resembles Inchbald in stressing an age differential between the two women. However nowhere, neither in the language nor actions, does the text indicate an Olivia chronologically older or more psychologically mature than Viola. On the contrary, perhaps because of her disguise and the challenges it poses, Viola reveals keen insights into both her condition and Olivia's, insights unavailable to the deceived Countess.

In fact, Sir Toby's comment supports the notion that the two young women were approximately of the same age, thus reinforcing the similarities introduced at the start. Only later, when trapped in a comic relationship and engaged in wit combats built on disguise does confusion arise as to their respective ages. This, however, may result from costuming and staging. For example, an illustration of an older Olivia actually appears in the pages of costume designs in an Augustin Daly souvenir promptbook. Her face looks a bit pinched as well as haughty, in contrast with the illustration for Viola, who, with blonde, curly hair worn in a version of a wide pageboy, has an innocent, inquiring, friendly look on her face and stands in a deferential pose. Although both illustrations seem to have provided the basis for the women's costumes, they must also reflect perceptions of the characters in the nineteenth century.

Occasionally, of course, some independent thinking occurs and we read in a promptbook, "Olivia's youth should be emphasized in every way possible to make her love affair with so callow a stripling as Viola convincing" (Ames prompt, facing I.v.294-95). The comment is sparked by Olivia's soliloquy at the close of the scene where she first meets Viola. Again in a 1988 production at Stratford, Ontario, Olivia's youthfulness was stressed when she giggled with delight at discovering this new young "man," then subsequently discarded
her black dress for a pink one.

As the play moves towards this moment when the two women meet, their divergent introductions continue: Olivia's through hearsay, Viola's through direct presentation. In scene 4 Orsino describes his passionate love for the incomparable Olivia, meanwhile confessing to his new page, the disguised Viola, "I have unclasp'd / To thee the book even of my secret soul" (I.iv.13-14). Incredibly, she has won her way into his confidence in a mere three days. Despite her brief period of service, Orsino is revealing all his innermost thoughts to her. The ease with which she accomplishes this suggests that she had no trouble being accepted in an aristocratic household because she could draw on the mores of her upper-class background to adjust to her new situation. But Viola has lost her heart to him even as he is entrusting her with his most precious errand, the wooing of Olivia. Shakespeare thus presents the first challenge to a wealthy young woman who would gain freedom from her sexual identity by donning male attire. Breeches have their drawbacks; but so do skirts, as Olivia too will soon discover.

When she finally sweeps onto the stage in scene 5, in all her grandeur or loneliness, certainty or uncertainty, age or youth, arrogance or self-confidence, she has been thoroughly characterized by the conflicting impressions passed on by others. John Russell Brown writes of the silences in the play—the moments when words are not spoken but audience attention is riveted to a character (28). Surely audiences are waiting to see just what she looks like, how she carries herself, and how she behaves. But the tendency to tamper with the text again changes the portrait. Just as the transposition of the play's first two scenes combined with the omission of many of the Duke's foolish self-pitying lines alter audiences' perceptions of him, and excision of Viola's reference to gold masks her upper-class background, so standard cuts in scene 5—some going back to the early nineteenth century—affect our first impression of Olivia.

Although the scene opens with twenty-five lines of teasing conversation between Maria and the Clown—lines preparing the audience for the Countess's annoyance with him—they seldom reach the stage. Henry Irving, John Philip Kemble, Augustin Daly, and Herbert Beerbohm Tree, among others, chopped off some or all of the exchange. As a result, Olivia usually sounds arbitrary and arrogant at her entrance. To the Clown's "God bless thee, lady!" (I.v.36-37), she replies, "Take the fool away" (38). Nor does his "Do you not hear, fellows? Take away the lady," (39-40) amuse her. Olivia angrily charges, "Go to, y' are a dry fool; I'll no more of you. Besides, you grow dishonest" (41-42). In the conversation usually omitted, however, Shakespeare provides an explanation for this behavior. Officiously acting as her mistress's surrogate, Maria reprimands the Clown for his several absences. In their exchange lies the rational basis for Olivia's opening speeches, particularly her anger at the Clown. The excision contributes to a one-sided and distorted impression of her.

In fact, in the full text, she proves a tolerant manager of this conglomerate household. We glimpse her reasonable governance particularly when she allows the Fool his famous argument against mourning for her brother. "I think his soul is in hell, madonna" (68), he begins, quickly contradicted by her, "I know his soul is in heaven, fool" (69), leading to his conclusion, "The more fool, madonna, to mourn for your brother's soul, being in heaven" (70-71). The reasoning wins her admiration. "What think you of this fool, Malvolio? doth he not mend?" (73-74), she laughingly concedes. But her steward, a somber man with a great sense of self-importance, is not amused. Olivia then criticizes him, offering astute character analysis in her reprimand: "O, you are sick of self-love, Malvolio, and taste with a distemper'd appetite. To be generous, guiltless, and of free disposition, is to take those things for bird-bolts that you deem cannon-bullets" (90-93). Shakespeare has endowed her with a directness of language that matches Viola's. But in some promptbooks, such as those based on the Daly edition (p. 16, 77V 21; p. 22, TN 10), the second sentence, with its analogy to "bird-bolts" and "cannon-bullets," has been excised. As written, the full text reveals Olivia's strengths. During the brief time that she is on stage, she appears neither unintelligent, intolerant, nor humorless. Nor does she exhibit any extremes of grief.
Rather, the young Countess appears well qualified for the battle of wits that will follow between her and Viola—two women who have, in their own ways, built their independent personas on the death (or seeming death) of their brothers, one through mourning, the other through disguise. The equality of their verbal gifts emerges at their first meeting. Sent to woo Olivia for Orsino, Viola combines flattery with insolence. "Most radiant, exquisite, and unmatchable beauty—I pray you tell me if this be the lady of the house. . . . I would be loath to cast away my speech; for besides that it is excellently well penn'd, I have taken great pains to con it" (I.v.170-74), she complains. When Olivia answers only "Whence came you, sir?" (177), Viola persists in her emphasis on the prepared speech being spoken to the properly identified Olivia: "I can say little more than I have studied, and that question's out of my part" (178-79).

Seeming to be aware of what Viola is doing, Olivia queries next, "Are you a comedian?" (182). To this Viola somewhat saucily responds, "No, my profound heart; and yet (by the very fangs of malice I swear) I am not that I play" (183-84). Why the expression "by the very fangs of malice"? What is its relevance? Does it have an underlying message or reveal her envy of Olivia? For surely, a suitor would not be using the "fangs of malice" to support an argument. Rather while the phrase may suggest an arrogance and a pose of self-confidence on Viola's part, it may also reflect her attempt to simulate male assertiveness first by swearing and then by calling up this strange phrase, perhaps a substitute for "by the devil." In closing, she repeats her request, "Are you the lady of the house?" (184-85). Finally Olivia gives an almost direct answer—although still equivocating—"If I do not usurp myself, I am" (186). But Viola responds in kind. "Most certain, if you are she, you do usurp yourself (187-88). And then once more she refers to her memorized speech "in praise" of Olivia, the suggestion being that not Olivia herself, but the conventions of love are responsible for this praise.

This short exchange is usually reduced on the stage. Since drama is built on the interaction between characters—in other words, since dialogue helps define personality—the omissions alter the portraits of the women. The section leading to Olivia's question "Are you a comedian?" and Viola's mixed answer with its "fangs of malice" are frequently excised. What remains is Olivia's simple "If I do not usurp myself, I am." Nor do audiences usually hear Olivia's sardonic ad-monition to Viola to "Come to what is important in't. I forgive you the praise" (192-93), indicating her sense of humor and awareness of the verbal battle under way. In the subsequent conversation, the cuts in Olivia's lines are rather curious. "Speak your office" (207) is all that remains of a speech that includes "Sure you have some hideous matter to deliver, when the courtesy of it is so fearful" (206-7). Eliminated too is the contretemps touched off by Viola's "I hold the olive in my hand" (209-10)—an offer she finds difficult to sustain after Olivia's simple observation "Yet you began rudely" (212). Viola immediately takes up the challenge, "The rudeness that hath appear'd in me have I learn'd from my entertainment" (214-15).

Their verbal combat continues, intensified by Viola's request that Olivia raise her veil although as the Countess notes, "You are now out of your text" (232). Nevertheless, she agrees to "draw the curtain, and show . . . the picture" (233), challenging, "Is't not well done?" (235) A too-quick response springs from the woman in breeches, "Excellently done, if God did all" (236). Just as sharply, however, Olivia retorts, "'Tis in grain, sir, 'twill endure wind and weather" (237-38). But much of this verbal jousting disappears from the stage, and Viola's speech begins instead with the flattering, "'Tis beauty truly blent" (239).

Consider too, the exchange triggered by Olivia's wonderful speech outlining the "divers schedules" of her beauty:

> It shall be inventoried, and every particle and utensil labell'd to my will: as, item, two lips, indifferent red; item, two grey eyes, with lids to them; item, one neck, one chin, and so forth. Were you sent hither to praise me?

(I.v.245-49)
Undaunted, the page Cesario/Viola disapprovingly comments: "I see what you are; you are too proud; / But if you were the devil, you are fair" (250-51). And then, as if remembering her mission, she jumps from critical direct address to her major subject, "My lord and master loves you" (252). Promptbooks, reflecting stage productions, tend to retain only the last line, omitting Olivia's "schedule" of her beauty as well as Viola's accusation of pride. Thus the text, mocking the ideal of courtly love, emphasizes pertness and honesty over flattery. These excisions rob the portrait of Viola of irony and reduce Olivia to a stolid, unimaginative woman.

Finally, cut too is her gracious observation:

- Your lord does know my mind, I cannot love him,
- Yet I suppose him virtuous, know him noble,
- Of great estate, of fresh and stainless youth;
- In voices well divul'd, free, learn'd, and valiant,
- And in dimension, and the shape of nature,
- A gracious person. But yet I cannot love him.

(257-62)

The speech indicates Olivia's sensitivity as she lists his specific strengths. It is a remarkable statement to give to a young woman, since it suggests less an emotional reaction than a thoughtful evaluation of the man she rejects. She mentions none of his weaknesses but bases her decision only on her own taste: "I cannot love him," implying also that nothing in the future will change her mind. Adamant in her insistence that she will never love Orsino, the Countess repeats the words yet again near the scene's close. Viola understands and later attempts, unsuccessfully, to explain Olivia's point of view to Orsino.

Historically, most of the speech disappears from the stage. Kemble's version, setting the pattern for those to follow, combines the single opening line with the speech's closing, resulting in the cryptic, abbreviated message: "Your lord does know my mind, I cannot love him: / He might have took his answer long ago" (Kemble, 1810, p. 19). Conforming to the developing portrait of her in criticism, an arbitrary Olivia emerges here. Other acting texts follow Kemble's lead. Beerbohm Tree (1901) retains the first line of the speech. Augustin Daly (1893), Henry Irving (1884), and others retain its first three lines. These productions span almost an entire century and surely must have affected criticism.

In fact, in 1865, decrying this omission, Spedding writes:

These lines are left out in the acting, which is surely a great mistake. As addressed by Olivia to Viola, they have a peculiar and pathetic meaning, and it is strange that the mixed emotions which they must have excited in her should not have been made one of the "points" in the play.

(Fraser's Magazine; quoted in Variorum Twelfth Night, 90)

The lines not only affect Viola, who herself would like to "be his wife" (I.iv.42) but also illuminate the character of Olivia. She knows her own heart and mind; she can recognize virtue in others, even someone who is a bit foolish, like Orsino. Of course, she has only seen that side of him which is tangled in the conventions of wooing. Viola, on the other hand, hears a more relaxed man confiding his ideas not only about wooing and women but also about life generally. Employed as his page, she has also found him generous and trusting, having given her, an unknown youth, a position and quickly taken her into his confidence. Like Hermia and Helena, who encounter two different aspects of Demetrius in the early scenes of A Midsummer Night's Dream, Viola and Olivia encounter two different Orsinos.
Unmoved by the Orsino she knows, Olivia is captivated by his envoy, Viola. In this disguised woman of comparable background and wit, Olivia finds the perfect wooer—the one who verbalizes her own dream of what wooing should be: a challenging wit exchange between equals; honesty; and an absence of posing. Direct language can open a path to the heart. In scene 5, Viola adopts this method. Without realizing it, she once again departs from her "text" (232). This time she delivers an impassioned love lyric. Though meant to win Olivia for Orsino, it also reveals something of Viola's own feelings for the Duke: "If I did love you in my master's flame, / . . . I would. . . . / Make me a willow cabin at your gate, / . . . Hallo your name to the reverberate hills, / And make the babbling gossip of the air / Cry out 'Olivia'" (264-74).

The speech overwhelms the young Countess as it does the audience. Here are lines that differ from Orsino's flowery words; familiar images flood the language. One need not search for hidden meanings, merely visualize the youth standing before a simple cabin and hear him hallowing the name "Olivia." The air and the hills echo the name; the speaker captivates the listener, who admits in soliloquy after the young page leaves:

    How now?  
    Even so quickly may one catch the plague?  
    Methinks I feel this youth's perfections  
    With an invisible and subtle stealth  
    To creep in at mine eyes. Well, let it be.

(294-98)

But she doesn't "let it be." Instead, Olivia immediately sends Malvolio on a false errand, to return to the young Cesario a ring he never gave her. Each woman has been caught in an emotional response that will alter her self-perception and her desire for anonymity or privacy. No longer thinking of the brother she was mourning, Olivia seeks only to assure a return visit from Orsino's youthful page.

Perhaps squeamish about the possible impact of individual lines or simply choosing to cut at this point, actor-managers excised and revised. Charles Kean, the mid-nineteenth-century manager, for example, crossed out some of Olivia's speech above, specifically those lines expressing admiration for "this youth" (296-98). The intention was probably to remove any suggestion of Olivia's being homosexually attracted to Viola. In this comedy of mistaken identity, however, Shakespeare, not only suggests such an attachment, but then, through the sequential arrangement of scenes quickly offers an alternative possibility.

Olivia's startling emotional discovery precipitates an immediate scene change to the lost Sebastian, Viola's twin brother, who has survived the shipwreck. Derrida argues that the meanings of words are constantly being modified by the next signifier (Moi, 105-7). Building on Derrida's insight, I propose that meaning in drama derives not only from verbal signifiers, particularly the interaction of characters as they speak on stage, but also from the sequence of scenes as they unfold. This arrangement affects both our first, immediate response as well as the modification of that response. Moreover, because theater differs from the written text in at least one significant detail, it addresses a captive audience who must listen and react as the play progresses, this "deferral of meaning" occurs to a far larger extent with drama than with written literature since a reader may put down a book and stop reading.

The young Countess's comment about the disguised youth now takes on a different perspective with the introduction of Sebastian. His presence holds the promise of a possible new pairing, although audiences will have to wait to see when, and if, Sebastian meets Olivia and how that meeting will develop. The striking physical similarity between the twins will eventually resolve Olivia's dilemma. She will later woo Sebastian as Cesario although, as Heilbrun points out, Shakespeare, himself the father of opposite sex twins, surely
knew such an indistinguishable resemblance to be impossible (37).

Similarities do, however, exist. Like Viola, Sebastian is first introduced with a sea captain, Antonio, who rescued him. Also like her, Viola's brother arouses intense feelings of affection, in his case from Antonio, who would serve the youth. And again like her, Sebastian stubbornly resists. "If you will not undo what you have done, that is, kill him whom you have recover'd, desire it not" (II.i.37-39), the young man insists before departing. Left alone on stage, Antonio, in soliloquy, first blesses the youth: "The gentleness of all the gods go with thee!" then reveals the intensity of his feelings.

I have many enemies in Orsino's court,  
Else would I very shortly see thee there.  
But come what may, I do adore thee so  
That danger shall seem sport, and I will go.  

(II.i.44-48)

The speech suggests a strong, even if one-sided, affection. The captain will risk capture for the pleasure of following Sebastian.

Brother, like sister, rejects an implied homosexual relationship. Unlike Viola, however, Sebastian is not suffering from a misreading of his sexual identity since no disguise exists. And so the soliloquy is seldom heard on stage. The Bell version retains only a form of the first line, "The gentleness of the Gods go with thee!" (335), after which the two men "exeunt severally" (335). Kemble's text, followed by the French edition (TN 18) and others, transforms Antonio's first line into part of a brief dialogue, Sebastian answering with an invented line, "Fare ye well."

This first scene between Sebastian and Antonio often changes not only its shape, but also its place in the sequence. Despite its importance in the pattern of alternating scenes that illuminate the development of the two principal women characters, actor-managers and directors have often reshuffled the text—sometimes to simplify plot, sometimes to stress Malvolio's role (although it is shorter than those of Viola and Olivia), and sometimes to sustain a contrast between the women, favoring the disguised youth in breeches. Again Kemble's text set the example, transposing the Folio sequence by placing Malvolio's scene with Viola immediately after Olivia's order to "return the ring," although the introduction of Sebastian interferes with such a smooth narrative sequence.17 Other directors, such as Irving, who played Malvolio, have withheld Sebastian's surprise appearance until later in the play.18 Focusing on his own role, Irving also abbre-viated the women's lines.19 Other actor-managers tended to fall into similar patterns, sometimes stripping the scene of most of its intense lines with their homoerotic implications, sometimes transposing the sequence, and often doing both.

Occasionally, as in the Sothern and Marlowe production at the beginning of the twentieth century, the scene was even merged with the second brief Sebastian-Antonio scene even though each of these functions differently. The first creates that happy shock of recognition of the physical resemblances between the twins; it also introduces the relationship between the two men. The second adds important plot elements: the captain decides to remain in Illyria, despite the hazards, then lends his purse to Sebastian, later seeking to retrieve it from Sebastian's double, Viola. The scene also testifies to the intensity of Antonio's affection for the youth. Sequentially, the second scene separates Maria's description of Malvolio in yellow garters from his actual appearance on stage.

In contrast, the Sothern-Marlowe merged scene (II.ii. in typescript—TN 31) retains only the factual information necessary for the plot's later development. It begins with the opening of Shakespeare's second of the two scenes (III.iii.1-15) where Antonio reveals his decision to accompany the young man, but it excises
specific references to his love for Sebastian. Next follows the youth's disclosure of his identity, plucked from the earlier scene (II.i), thus confirming as well Viola's upper-class background. Finally, returning to the later scene, this new mongrel concludes with Antonio giving his purse to Sebastian. Sequentially, it follows Malvolio's outburst to the drunken Sir Toby and Sir Andrew (II.iii) and precedes Viola's debate with Orsino on love (II.iv). Although in many ways the Sothern-Marlowe version defeats the purposes of the two separate scenes, it does not subvert the play's ability to construct strong parallels between two wealthy, young, single women who have lost father and brother. That was Daly's contribution and he achieved it by opening the play with Sebastian's arrival in Illyria. This assured audiences that the relationship between Olivia and Viola was just a game and that Viola's early quest for independence had no reality since her brother lived.

Shakespeare, however, not only raises this issue of independence but also further develops it in Viola's retort to Malvolio when he delivers the ring. For the dramatist here offers a significant example of women bonding. Knowing she never gave Olivia a ring, the disguised page nevertheless answers the steward: "She took the ring of me, I'll none of it" (12). Although the line has puzzled some editors, it seems consistent with Viola's constant makeshift attempts both to conceal her disguise and to reveal her insights as a woman into another woman's actions. This will occur again two scenes later when she attempts to explain to the Duke Olivia's feelings for him, but instead nearly trips over her own identity. Clearly in her scene with Malvolio, Viola understands what has occurred, as her soliloquy, following his brusque departure, indicates: "I left no ring with her. . . . / Fortune forbid my outside have not charm'd her" (II.ii.17-18). Indeed it has. But Sebastian's arrival may promise a "happy ending," even while the play continues to explore the women's struggles, whether in breeches or skirts, to assert their sense of self.

In the scenes that follow, Olivia's struggle once more comes to the fore, again through hearsay and inference as Shakespeare thrusts us ever more intimately into the dynamics of her household. Again the challenge to her independence grows out of her position as a marriageable, wealthy young woman. When the drunken Sir Toby and Sir Andrew wobble in, raucously singing, Maria first reprimands them, invoking the name of her mistress, but then later joins them. Less flexible, Malvolio, awakened from sleep by this boisterous crew, more vehemently chastises them, again invoking Olivia's name:

My lady bade me tell you, that though she harbors you as her kinsman, she's nothing allied to your disorders. If you can separate yourself and your misdemeanors, you are welcome to the house; if not, and it would please you to take leave of her, she is very willing to bid you farewell.

(II.iii.95-101)

Since he never carries out the threat but is himself bested, his lines indicate his misreading of Olivia, exhibiting his lust for power and his method of exercising it. Betraying his ambition as well as his vulnerability to the gulling he will later suffer, his speech illuminates the extent and intensiveness of another of Olivia's pursuers. He will readily adopt cross-garters and attempt to smile in his effort to win her hand and, with it, permanent power as her husband. Little disappears from this comic scene in staged versions—only the songs. First omitted from the Bell edition, they are later excised by Kemble and Irving who substitute other, briefer drinking songs.

A far different fate on stage meets the scene which follows: the debate between Viola and Orsino on men's and women's capacity for love. The scene loses much of its substance through cutting. It is full of inconsistencies and contradictions in Orsino's arguments while stressing at the same time the complexity of Viola's position as she strives to convey to the Duke something of a woman's point of view. Filled with humor and further mockery of the conventions of the Petrarchan lover, it continues the portrait of Orsino begun in the first scene—a silly lover drowning in self-pity. Again, his desire for music opens the scene:
that piece of song,
That old and antique song we heard last night;
Methought it did relieve my passion much,
More than light airs and recollected terms
Of these most brisk and giddy-paced times.

(II.iv.2-6)

Still seeking to "relieve" his passion, Orsino sounds very much like the melancholy character we met earlier. But this request for music does not appear in the Bell edition, the Kemble edition, or the French edition, basically covering a century of staging. Instead, in those editions, the scene opens with Orsino attempting to warn his page of what to expect from love. "Come hither boy," the Duke instructs, "If ever thou shalt love, / In the sweet pangs of it remember me" (15-16). Observing Cesario/Viola's downcast expression, her master quizzes her about her beloved's appearance: "Of your complexion" and "about your years" (26, 28), confesses the disguised woman.

Her lines trigger Orsino's first dissertation on love, which will eventually be contradicted by his second. 
"[H]owever we do praise ourselves, / Our fancies are more giddy . . . Than women's are" (32-35), he claims, advising Cesario to choose a woman younger than himself. Later, however, when describing his own love for Olivia, the Duke contradicts himself, insisting, "no woman's heart / So big, to hold so much; they lack retention" (95-96). He also compares a woman's love which "may be call'd appetite" (97) with his own, which is "all as hungry as the sea" (100). Kemble and Bell omit the first assertion and Kemble, Bell, Irving, Daly, and Sothern and Marlowe omit its contradiction. As a result of these excisions, the Duke sounds consistent, a quality that Shakespeare denies him. The elimination of both groups of quotes by Bell and Kemble alters the scene's emphasis, losing much of its irony.

In these editions, reflecting stage performances, not only do the contradictions disappear, but also Orsino turns into a fairly direct, attractive man. Reduced, the text's long lecture on love becomes merely a brief comment to Viola/Cesario on her beloved, "too old, by heaven" (29), followed immediately by the direction: "Get thee to yond same sovereign cruelty" (80), Olivia. Covering a mere two pages in the Kemble text, the scene fails to develop the portrait of a melancholy and self-pitying Orsino resembling Shakespeare's Duke. Instead, it becomes a brief interlude of disagreement between the disguised page and the man she loves in which she stumbles when trying to fictionalize her love for him.

Juxtaposing the young page's clearly reasoned defense of Olivia against the Duke's confused and contradictory comments on men's and women's capacity to love, Shakespeare in this scene once again illustrates women bonding and also gives Viola rational arguments favoring a woman's right to free choice. Furthermore, the scene reaffirms Viola's sense of her own identity; she is always emotionally and intellectually clearly a woman. Attempting to deliver Olivia's message and sensitive to its intention, Viola tries to convince Orsino of its finality, transposing Olivia's words. "But if she cannot love you, sir?" (II.iv.87, emphasis added here and throughout this paragraph). In response, the Duke retains only the original "cannot." "I cannot be so answer'd" (88), he insists. Viola then cites the parallel of an imaginary woman (herself) in love with him. Suppose "You cannot love her" (91). The pronouns have shifted from that first expression by Olivia but the body of the line has been restored. The debate surrounding a woman's right to express or reject love on a plane equal to a man's is given clear expression through Viola as Cesario, the young lad, while the refusal of the man, Orsino, to respect Olivia's wishes resonates through the text.

In this scene, Viola seems torn between revealing her identity and maintaining her disguise. Earlier she had decided, "Time, thou must untangle this, not I" (II.ii.40). But here that resolve weakens, when, in trying to convince the Duke, she says, "My father had a daughter lov'd a man / As it might be perhaps, were I a woman, / I should your lordship" (II.iv.107-9). "And what's her history?" (109) the Duke quickly asks. Surely her
answer, "I am all the daughters of my father's house, / And all the brothers too" (120-21), should have led to a full revelation. But the Duke is so self-absorbed in his own feelings that his ear is not keyed to Viola's words. And so she continues in her role as his messenger.

Having chosen her disguise almost whimsically, she finds its advantages quickly fading. First, her success in winning a place with the Duke has led to her appointment as his surrogate wooer although she confesses, in soliloquy: "Whoe'er I woo, myself would be his wife" (I.iv.42). Then her enchantment of Olivia further intensifies Viola's problem. Next, when she tries to explain the other woman's position to the Duke, he refuses to listen. Later, despite her protests, Sir Andrew challenges her to a duel for Olivia's hand, leading Viola to muse to herself: "A little thing would make me tell them how much I lack of a man" (III.iv.302-3). And finally, she must confront the issue of a dual identity, having become embroiled in the circle of pursued and pursuer. The problems Viola faces caused by her disguise are, if less life threatening, more subtle and emotionally complex than those that confront Shakespeare's other women in breeches: Rosalind of *As You Like It*, Imogen of *Cymbeline*, and Jessica of *The Merchant of Venice*, who choose disguise to evade pursuit; Julia of *The Two Gentlemen of Verona*, who concealed herself to pursue her lover; or Portia and Nerissa, who dress as lawyer and law clerk to save their husbands' friend.

If, however, Shakespeare were less interested in realistic reasons for the disguise than in the larger concept—the relationship of sexuality to women's economic independence—the silliness of the breeches controversy would be exposed by the similarities between the women's plights. Although differently dressed, both must revise their self-perceptions, modifying them to accommodate erotic urges as these affect women's lives in such a society. Viola's choice of disguise, like Olivia's choice of mourning, tests the limits of self-sovereignty when supported by economic independence.

Thus their new erotic interests conflict with their development of independence. Nevertheless, both women persevere in their chosen direction. Viola remains in service to Orsino, wooing Olivia, while she, in turn, continues her forthright pursuit of Cesario. Two other brief exchanges mark the women's time alone together. In the earlier one (III.i.93-164), Olivia apologizes for sending the false message and the ring and quite directly declares her love. In the second (III.iv.201-17), an exchange of less than twenty lines within a much longer scene, she acknowledges having compromised herself:

I have said too much unto a heart of stone,
And laid mine honor too unchary on't.
There's something in me that reproves my fault;
But such a headstrong potent fault it is
That it but mocks reproof.

(201-5)

Recognition but not retraction leads to her next speech, "Here, wear this jewel for me, 'tis my picture" (208), promising Viola, "it hath no tongue to vex you" (209). Olivia is ready to embark on what appears to be a cross-class marriage to a young page. Is she using her wealth to lure a husband, who, in fact has the virtues of a woman and is, perhaps, therefore attractive? In the text, ambiguity then prevails. Does Viola accept the jewel? No hint appears in the language. Her response, like so many of her answers to Olivia, evades the subject, asking instead, "your true love for my master" (213).

Further evasion appears in promptbooks, many of which excise this brief moment between the disguised woman and the lady who openly vows her love. For example, the encounter is crossed out by Charles Kean, who used a Kemble text (*TN* 14). And the Irving version retains only the last four lines of the women's conversation. Their brief moment is then over: no apologies for having declared her love, and no giving Viola "this jewel" that contains Olivia's picture (*TN* 15, p. 52). Was Viola's behavior not exemplary enough for the
adaptors? Was the intensity of Olivia's passion, directed as it was to a woman, embarrassing? Probably both. In the text, the exchange amplifies their portraits, which have been acquiring dimension with each new scene.

Like a juggler, Shakespeare keeps aloft the atmosphere of romance as well as the realities of drunks and duels and always, whether directly or through hearsay, he illuminates the challenges facing the two women. Perhaps nowhere more clearly than in the middle section of the play are we witness to this balancing act. Act 3, scene 2 includes the conning of Sir Andrew (into penning a challenge to Cesario) and the report on Malvolio's appearance (wearing yellow cross-garters)—both men wishing to win Olivia through their actions.

Opening in her garden, scene 4 of act 3 shows the Countess ranging from one interest to another in quick succession.

    I have sent after him; he says he'll come.  
    How shall I feast him? What bestow of him?  
    For youth is bought more oft than begg'd or borrow'd.  
    I speak too loud.  

(1-4)

The excitement generated within this speech, even including the suggestion that it is spoken in a whisper reveals an altered Olivia—one neither disinterested nor in mourning. The Bell edition contains a footnote on her appearance: "Olivia should possess beauty of countenance, elegance of figure, grace of deportment, and sensibility of speech" [bottom, p. 357, vol. 5, of Bell edition]. The edition also records a seemingly slight alteration in the opening line, but one which changes the idea. It reads: "I have sent after him; say he will come. / How shall I feast him? What bestow on him?" (emphasis added, p. 357). The conditional here contradicts the straight assertion in the Folio. Her lines reflect her excitement.

She then changes the subject, "Where's Malvolio?" (5). Asking for him and commenting that his sad state suits her well, Olivia learns from Maria that he is as one "possessed." When he appears before her in yellow garters and smiling, she attempts to understand this sudden change, but the arrival of Cesario cuts short the interview, leading Olivia to assign Malvolio to Maria and Sir Toby—thus asking his gullers to be his handlers. After the steward's triumphant soliloquy celebrating what he believes to be his new status—the prospective husband to Olivia—the scene moves without a pause to Sir Andrew's timidly worded letter of challenge to Cesario. Here both Viola and Olivia are the subjects—the one's problems created by her disguise, the other's by her lack of disguise, but clearly her marriageability. Thus both illuminate challenges to the women's pursuit of their own independence. The brief interlude between the two women follows.

The focus then shifts to Viola. Suddenly her resemblance to her brother fades as she faces the "terror," Sir Andrew, an equally reluctant adversary. Their swords at the ready, both participants back off from one another, even as Antonio, mistaking Viola for Sebastian, interrupts their duel, finds himself under arrest by officers, requests his purse of "Sebastian," and denied, offers Viola her first inkling that her brother lives.

    He nam'd Sebastian. I my brother know  
    Yet living in my glass; even such and so  
    In favor was my brother, and he went  
    Still in this fashion, color, ornament,  
    For him I imitate.  

(379-83)
We discover how completely Viola has mimicked her brother and are prepared for the confusion that will result.

The dramatist next adds depth and shading to the design, for the following scene has the cinematic quality of a "double take." "Will you make me believe that I am not sent for you?" (IV.i.1-2), challenges the Clown to Cesario's double, Sebastian. But we have already witnessed the interview between Viola and Olivia. Replaying an earlier moment, the Clown's confrontational attack seems to precede the previous scene. But the take is skewed. The line is addressed to Sebastian, not Viola/Cesario, and the outcome differs from the expected. We are caught in Shakespeare's double time as he confirms, through witnesses, the extraordinary resemblance between the twins. Sir Andrew and Sir Toby provide the next testimony. Again challenging the character they assume to be Orsino's page, they little realize they are encountering a different adversary. Finally, Olivia rushes out to save one she believes to be Cesario, but instead overwhelms Sebastian: "Let fancy still my sense in Lethe steep; / If it be thus to dream, still let me sleep!" (IV.i.62-63). Brother, like sister, uses a classical allusion. Just as a painter places small dabs of similar colors strategically throughout his painting to orchestrate its parts and help unify it, the writer paints resemblances through language and literary references.

Culminating in Olivia's "Would thou'dst be rul'd by me!" (64), this scene has carried the accidental disguise motif to its climax, when Sebastian replies, "Madam, I will," and Olivia joyously exclaims, "O, say so, and so be!" (65) and departs to plan a wedding. In contrast, a scene of intentional disguise follows, its darkness contrasting with the light of the previous scene as well as the subsequent one. Both literally and figuratively, darkness prevails as Sir Toby, Maria, and the Clown seek to frustrate Malvolio and convince him he is mad while keeping him imprisoned in darkness and calling it light. Again, Olivia, though absent is present: hearsay and hope, Malvolio's hope of marriage, keep her in the audience's consciousness.

Darkness then gives way to light. "This is the air, that is the glorious sun" (IV.iii.1), Sebastian marvels in soliloquy at Olivia's gifts, then later follows her to church to exchange vows. The soliloquy wanders over several topics, but always with Olivia at its core. Wondering what has happened to Antonio and wishing for his advice, the youth speculates,

\[
\begin{align*}
\text{For though my soul disputes well with my sense,} \\
\text{That this may be some error, but no madness,} \\
\text{Yet doth this accident and flood of fortune} \\
\text{So far exceed all instance, all discourse,} \\
\text{That I am ready to distrust mine eyes,} \\
\text{And wrangle with my reason that persuades me} \\
\text{To any other trust but that I am mad,} \\
\text{Or else the lady's mad.}
\end{align*}
\]

(9-16)

Debating with himself as to whether she is mad, he concludes this to be impossible—else she could not run her house, command her followers, and manage her affairs with such skill and "stable bearing" (19). Here in the testimony of a stranger who has observed the lady in action we are told of her ability.

But again the glorification of Olivia falls before the actor-manager's or director's pen. Since she is here challenging patterns of patriarchy, these producers of the play seem to assert that her more positive features need not be emphasized. Cuts in Sebastian's soliloquy appear in early promptbooks or acting versions and continue well into the twentieth century although they outline her skills. Clearly, the lines testify to her never having left this world, but merely having divorced herself from availability to suitors. And so, acting texts excise. Kemble omits the lines as do the Oxberry and the French texts (TN 9). By the time we reach the
Sothern-Marlowe version the soliloquy has been reduced to its first four lines, followed by its last two. With only its skeleton remaining, this abbreviated scene is then attached to the beginning of the closing scene (V.i) without a break.

Meanwhile, Viola is confronting the clear possibility that her brother lives. Although a joyous prospect, it will end her adventure into independence just as Olivia's decision to marry will end hers. In the single scene in act 5, Shakespeare, for the last time, presents the challenges the two single young women face and weaves together fact and fantasy, for this is Illyria.

Maria, too, has won her objective. Although she does not appear in the scene, we learn that through her successful plot to ensnare Malvolio "at Sir Toby's" wish, he hath "In recompense . . . married her" (363-64). A strong character, Maria differs from the other two women, having persistently sought marriage. Viola and Olivia, however, have had a momentary chance at self-ownership.

The conflict between the qualities referred to by de Beauvoir—the sense of the self being primary, and the "erotic urges and social pressures" to conform—is dramatized. By refusing to sacrifice the sense of self being primary, Olivia wins a husband; but he is only a facsimile of the "man" she pursued. However, because Sebastian's easy compliance to Olivia's proposal of marriage sharply contrasts with the passion of his rejection of Antonio earlier, one must question its reality. It is almost as if the dramatist were sending a signal to the audience to observe the character of the twin so as to realize the challenge to realism in the ending.

Critics have noted the weakness of this ending—its basic disregard for logic. Anne Barton, for example, observes that in *Twelfth Night* "Shakespeare began to unbuild his own comic form at its point of greatest vulnerability: the ending" (171). The brief scene between Antonio and Sebastian at the beginning of act 2 contributes to the absence of logic in the ending. In the earlier scene, the youth exhibits qualities clearly out of character with his impulsive actions near the comedy's close. One need only compare the attitude of Bertram to Helena with that of Sebastian to Olivia, a total stranger who asks him to marry her thinking he is Cesario, to see Shakespeare's lack of interest in a realistic ending. Nor do audiences react negatively to this strange and speedy marriage where the characters do not know one another. Because this is a comedy and because the young man himself does not object, we accept the convention of marriage as the outcome and delight that here in Illyria, Viola's twin brother shows up at just the right moment.

We also realize that the relationship between the two people to be married is inconsequential in this play, as is the need for a realistic reason for Viola's decision to disguise. Rather, the comedy seems to concentrate more closely on the changes in the women's self-perception from "primary" to "other" as they accept their identities as sexual beings in a male-dominated world. Attire, whether breeches or skirts, fades in importance as the dramatist explores the potential for independence by single women with wealth when unhampered by brothers or fathers.

Notes

1 Louis B. Wright, 491-507 and passim. Juliet Dusin-berre ascribes the debates on women's rights in the late sixteenth century to the rise of Puritanism, which encouraged mutual respect between husband and wife. See especially the introduction and 231-40. Linda T. Fitz, although less optimistic about women's achieving new rights, believes that the magnitude of the literature dictating what women should do indicates that they were not following prescribed paths: "the irrepressible spirit of those Renaissance English women . . . made sober treatises necessary" (18). Preceding the earliest production of *Twelfth Night*, works such as Jane Anger's (1589) appeared and, as late as 1620, the John Chamberlain letter records the king's "express commandment . . . to inveigh vehemently against the insolencie of . . . women." See Edward Phillips Statham, 182-83. See also Lisa Jardine, 9-36, where she also discusses the censuring of boys playing women's roles. She also quotes a letter of John Rainoldes in 1592 citing Scripture that says: "a woman shall not weare that which pertaineth to a
man, neither shall a man put on women's raiment: for all that do so are abomination to the Lord thy god" (14).

As Linda Woodbridge writes:

> In 1620, a controversy about women which had been simmering for nearly fifty years came to a boil in two essays, "Hic Mulier," an attack on women who wear masculine clothing, and "Haec-Vir," an answering defense which attacks male foppishness. In the unpromising context of fashion, the two essays really joined combat on the nature of the sexes... The transvestite controversy began, as nearly as we can tell, in about the 1570s, when some women began adopting masculine attire.

(139)

Woodbridge then cites George Gascoigne's satire *The Steele Glas*, 1576; Phillip Stubbes's *Anatomy of Abuses*, 1583; and William Averell's *A mervailous combat of contrarieties*, 1588 (Woodbridge, 140). She concludes that because the movement received no attention in the 1590s and early 1600s it "was apparently quiescent," comments not arising again until 1606 when Henry Parrot's *The Mous Trap* and Richard Niccols's *The Cuckow* appeared. According to Woodbridge, the movement then gained momentum, "climaxing between 1615 and 1620" (141). This supposes that because we have no literature during the intervening years, either none existed or women suddenly gave up this attire only to don it again around 1615 when Swetnam's *Arraignment of Lewd, Idle, Froward and Unconstant Women* appeared, followed by the anonymous *Hic Mulier; or, The Man-Woman: Being a Medicine to cure the Coltish Disease of the Staggers in the Masculine-Feminines of our Times*, 1620, and the anonymous response a week later, *Haec-Vir; or, The Womanish Man: Being an Answere to the late Booke intituled Hic-Mulier. Exprest in a briefe Dialogue between Haec-Vir the Womanish Man, and Hic-Mulier the Man-Woman* (Woodbridge, 142-46).

2 Although some critics use the terms self and other to describe Shakespeare's relationship to, or perception of, his male and female characters, my reference is to de Beauvoir's use of these terms as they describe the self-perceptions of men and women.

3 See the chapter "Growing Up," on *Romeo and Juliet*, in *Wooing, Wedding, and Power*.

4 Aside from the scene transposition, which I discuss later, the following lines are excised in these works: the Bell edition; the Kemble edition and those deriving from it; the Irving edition where the scene is compressed with the later scene 4; the French edition; *TN* 21 (listed as "Ada Rehan's" but using the French text, not that of Augustin Daly, her manager); and the Southern-Marlowe typescript—among others:

> O spirit of love, how quick and fresh art thou,  
> That notwithstanding thy capacity  
> Receiveth as the sea, nought enters there,  
> Of what validity and pitch soe'er,  
> But falls into abatement and low price  
> Even in a minute. So full of shapes is fancy  
> That it alone is high fantastical.

(I.i.9-15)

Also frequently cut are the scene's closing lines also spoken by the Duke:

> Away before me to sweet beds of flow'rs,  
> Love-thoughts lie rich when canopied with bow'rs.
5 See Stephen Booth's article ("Twelfth Night: 1.1") on the verbal incongruities in this scene and the ways in which these incongruities prepare us for the rest of the play.

6 Robert Kimbrough, in an excellent article on androgyny, theorizes that Viola adopts male disguise to prevent being sent home immediately by the Duke (her father's friend) if she appear at his palace in her own attire ("Androgyny," 29).

7 Several versions that barely resembled Shakespeare's were presented during the seventeenth and early eighteenth centuries. However, no acting edition of the play appeared before 1750 although Hogan records productions, referring to several of these as "the original" (1:545-57). I suspect, however, that the Bell edition recorded what had been performed during the 1740s, prior to its publication. Odell notes only that: 'both the Clown's songs, 'O Mistress mine,' and 'Come away, come away, Death,' with their surrounding context are omitted, more's the pity, but nothing of importance, otherwise, is cast aside" (II.29). Obviously, to Odell, Viola's reference to gold was unimportant; to paraphrase Odell, "more's the pity."

8 As well as productions that used Kemble editions of 1810, 1811, and 1815 into the late 1850s, the Modern Standard Drama edition published by William Taylor and Company with Samuel French as general agent includes many of the same inserts and textual changes as do the Kemble editions. Because the French publications hardly ever bear a date, one must usually date them by the cast list for a particular production, which is printed in the edition. Among the books I have seen are those of William Burton, 1852, and Miss Neilson, dated 2/78. Thomas Hailes Lacy (1867) also followed Kemble's format. Charles Kean altered Kemble's 1811 edition of Twelfth Night, for the performance of 28 September 1850. See also Folger prompts TN 16, TN 17, 73V 4, TN 5, TN 3, TN 18; also Shattuck, 469-89.

9 While Henry Irving's adaptation differs somewhat from Kemble's, it contains many of the same excisions and follows Kemble by beginning at scene 2. Irving, however, does not introduce scene 1 until after I.iv.7. Thus Viola is present during his mooning for Olivia although the scene itself is much abbreviated, containing only lines 1 to 8 and 16 to 38. See Folger promptbooks TN 13, TN 15.

10 See Schochet, 65-66, for a discussion of the hierarchical structure in the patriarchal family in Renaissance England. Obviously the dramatist was drawing on generally accepted patterns in his society. In this play, however, both Viola and Olivia have temporarily been freed from this pattern.

11 Salingar's article has many fine insights, particularly where he compares Shakespeare's play with his sources. As a matter of fact, Salingar may have made this statement because he was transferring the identity of a source character for Olivia to Shakespeare's Olivia.

12 The illustration is taken from Cassell, Petter & Galpin (G. Greatbach, Sculpt, [i.e. engraver]; C. Green, Pinxt [this word means he drew the original illustration]). Greatbach flourished in mid nineteenth century.

13 Daly's illustrations of the performance have a warmer and younger looking Olivia than appears in the designs for the role.

14 Folger prompts: 16, 17 (Kemble); 15 (Irving); 10, 21, 29 (Daly). University of Bristol: HBT 138 (Tree).

15 Excised by Irving (TN 15).

16 Although some critics have read this phrase as an indication that she has formerly been weeping and now her eyes are tearing for joy, I believe that she is referring to the image of Cesario that is creeping into her heart
through her eyes. The language is ambiguous.

Daly, Irving, Tree, and others followed Kemble's lead although often slightly altering the exact sequential revision. Henry Irving, after first adopting Kemble's opening with Viola's I.ii, then moved immediately to "Court-yard of Olivia's house" (11), with Sir Toby's line "What a plague means my niece, to take the death of her brother thus?" Since Irving played Malvolio, the play was reshaped to emphasize the comedic scenes, while yet retaining Viola's role, played by Ellen Terry. Orsino's Palace, the setting of the third scene, opens as does I.v., where Viola as Cesario has already won her way into the Duke's favor. Only after having established this time sequence, does Irving insert Shakespeare's opening lines, "If music be the food of love, play on" (15), continuing with abbreviated material from that first scene, and then moving on to Orsino's conversation with Cesario and his assignment to her to woo Olivia.

It follows the second interlude between Viola and the Duke (H.iv), where she almost discloses her identity (III.ii in Irving's version—TN 15).

According to the Concordance, Viola has 13.0 percent of the speeches, 13.0 percent of the lines and 13.2 percent of the words; Olivia has 12.7 percent of the speeches, 12.0 percent of the lines and 11.8 percent of the words. Actually the longest role belongs to Sir Toby who has 16.5 percent of the speeches, 14.0 percent of the lines, and 13.8 percent of the words, whereas Malvolio trails with 9.4 percent of the speeches, 11.0 percent of the lines, and 11.4 percent of the words. However Malvolio's role has frequently been taken by a lead actor since it allows for great antics and hamming. Spevack, Concordance 1:1162-1213.

Irving begins his scene here, eliminating the earlier reference to Cesario. Sothern-Marlowe too delete the reference although it clearly anticipates the later intense interview between the two young women. Rather, in the Sothern-Marlowe typescript Maria's description of Malvolio (in the text's III.ii) immediately precedes his actual appearance (in the text's III.iv) without a break.

Acknowledging the foolishness of excising the last six lines (16-21), the editor of the Bell edition even comments, "Why omit these lines? to us they seem necessary" (338), then prints them in small type at the bottom of the page. Daly also omits them. The entire soliloquy is crossed out in the Irving prompt, while Charles Kean (TN 14) cuts the entire scene.

Several critics have recently written on the importance of the impact of the full text rather than of the ending, noting an overemphasis on closure. See, for example, Belsey, 187-88, and Jensen, 99-117.

**Twelfth Night Literary Criticism (Vol. 46): Further Reading**

Evaluates the characters in *Twelfth Night* with reference to the theme of constancy versus flexibility. On one hand, Bellringer contends, Sir Toby and the other members of Olivia's household are each ruled by a single passion; by contrast, Orsino, Feste, Sebastian, and Viola demonstrate a willingness to modify their behavior and adapt to changing circumstances.

Offers textual evidence to support the notion that Fabian is a member of the landed gentry, not one of Olivia's serving men. Brewer sees Fabian as a dramatic type or stock character—a humorous older gentleman who is contemptuous of parvenus and social climbers.

A psychoanalytic evaluation of Olivia's steward and his connection to the main plot. From Cahill's perspective, Malvolio's confusion of identity and desire reflects the principal characters' search for love and selfhood.

Callaghan, Dymphna. "'And all is semblative a woman's part': Body Politics and *Twelfth Night.*" *Textual Practice* 7, No. 3 (Winter 1993): 428-52.

A feminist reading of the play's representations of the female body. Focusing on the scene in which Malvolio parses the forged letter, Callaghan asserts that both here and throughout *Twelfth Night*, the female body—as well as men who try to improve their social status—are ridiculed and disciplined because they threaten the patriarchal system.

Analyzes the linguistic and dramatic expressions of double perspectives in *Twelfth Night*. Carroll compares the characters who rigidly resist change with those whose capacity for self-transformation permits them to achieve redemption. His discussion of *Twelfth Night*
appears on pp. 80-102 of this chapter.

Assesses the application of the Aristotelian concept of anagnorisis to modern European dramatic theory—specifically to literary analyses of Corneille's Héraclius and Shakespeare's Twelfth Night. Translating anagnorisis as "recognition," Cave reads Twelfth Night as a comedy that both exploits and exposes rhetorical tricks, creating cognitive confusion of form and meaning.

Traces the structural development of the principal and secondary plots as well as Shakespeare's elaboration on the theme of love.

Discusses Feste as an emblem of the humanist tradition of Folly, which satirized human pretension and self-delusion. As Feste points out the affectations of all the other characters on stage, Davies notes, he implicitly mocks the audience's own hypocrisies and poses.

Argues that Viola's fleeting reference to emasculation—"present me as an eunuch" (I.ii.56)—is rich in significance for the play as a whole. Elam lays out the long tradition of the theme of castration—from Terence to Italian Renaissance commedia to post-Reformation English comedy—which Shakespeare drew on and reworked.

Uses Twelfth Night to compare semiotic and mimetic approaches to literary criticism. In Freund's judgment, the play illustrates the indeterminacy of language and is a perfect example of the challenge of recovering meaning from a text.

An analysis of the direct and indirect theatrical notation that governs the gestures, grouping, and movement of characters in the play's final scene. Hasler calls attention to the series of entrances that culminate in the appearance of Sebastian; the jarring interlude with Malvolio; and, most importantly, the way Cesario/Viola remains the focus of attention despite the fact that she is given few lines to speak.

Evaluates allusions in the play to Christian and other religious doctrines. In Hunt's view, the play satirizes the Puritan notion that Providence can be relied on to operate directly in human affairs and instead demonstrates that Providence works obliquely, through such natural agents as Time and Fortune.

Discerns in Twelfth Night a reflection of the sexual vulnerability of boys and young women in early modern England. The financial dependence of Viola and Sebastian leads each of them into household service, Jardine notes, and because of their subservient status both are objects of general erotic desire until they are safely married.

Praises Twelfth Night as the capstone of Shakespearean romantic comedy and comments particularly on its fully rounded characterization, the play's uniquely lyrical atmosphere, and the masterful way in which various plot strands are instigated.

Priest, Dale G. "O r else this is a dream': Ambivalence and Madness in Twelfth Night” CLA Journal: Official Quarterly Publication of the College Language Association XXXIV, No. 3 (March 1991): 371-83.

Focuses on the "darkhouse" scene—Feste's badgering of the imprisoned Malvolio—and the play's ambiguous treatment of comic madness. Priest claims that Twelfth Night demonstrates that madness can be a carnivalesque release from social decorum, a psychological delusion, or a perceptive vision of the illogical nature of human existence.

Assesses the significance of Malvolio's repetition of "C. . .U. . .T. . .P" as he reads the forged missive in II. v. Elizabethan audiences would have enjoyed the bawdy implications of these initials, she remarks—"cut" was a vulgarism for the vagina, and "p" a slang abbreviation for "piss"—but this sequence of letters would also remind them to safeguard their wallets against cutpurses and pickpockets, who found golden opportunities in theatrical playhouses.

Compares Twelfth Night's depiction of Cesario/Viola with other English plays of the Elizabethan and Jacobean eras that also feature a heroine disguised as a male. Shapiro contends that Shakespeare's treatment of the homoerotic possibilities inherent in this role is both fresh and subtle.

Suggests that the design of Twelfth Night is governed by the principle of reciprocity—the continuing process of give-and-take that binds individuals together in a healthy community.
Slichts asserts that the action of the play moves from isolation and self-absorption toward each character's recognition of the necessity for mutual obligation and dependency in human society.

Theorizes that Shakespeare heavily revised Twelfth Night after its completion and early staging. Smidt believes that the role of Feste is an interpolation, written to bring the famous Elizabethan stage clown Robert Armin into the cast, and that when Shakespeare added this character he overlooked the resulting textual anomalies—especially the mix-up of parts between Fabian and Feste.

Maintains that in this play Shakespeare shows folly as a positive value, indeed the principal means of coming to terms with human frailty and the harshness of the world. Tromly points out that it is delusion itself, created by Viola's disguise, that liberates Orsino and Olivia from their self-absorption and draws them into human society.

Remarks on the nature of Feste's foolery, calling attention to the differences between Feste and Shakespeare's other court jester clowns.

An extensive overview of the play. The editors discuss a variety of issues, including Twelfth Night's stage history, its Latin and Italian models, its complex presentation of romantic love, its characterization, and its dramatic structure.

Views Twelfth Night as Shakespeare's most graceful and mellow comedy, but acknowledges an undertone of poignancy as well. Emphasizing Shakespeare's mature artistry Weiss proceeds through the play scene by scene to demonstrate its author's surehanded control of tone, characterization, and dramatic effects.

Examines the paradoxical nature of time in Twelfth Night and As You Like It. Westerweel argues that each character in these two comedies inhabits a different and distinctive world of time; in the case of Twelfth Night, he calls particular attention to Orsino's fanciful image of a pastoral golden age, Feste's solid footing in the present, and Viola's belief in providential time.

Finds consistency in the characterization of Orsino and Olivia, and contends that the apparently sudden shifts in their affections in the final scene are psychologically plausible. Westlund proposes that Orsino and Olivia are initially narcissistic and lack self-confidence, but Viola's receptivity to their needs helps them gain less idealistic appraisals of themselves, so they can recognize appropriate objects of desire.

Analyzes the gulling of Malvolio in relation to both the prevailing theme of festivity and the underlying tone of melancholy in Twelfth Night. In Willbern's judgment, the steward is punished for three reasons: his rationality, his social-climbing, and his latent desire to sleep with Olivia.

Twelfth Night Literary Criticism (Vol. 62): Introduction

Twelfth Night

Lauded by critics and audiences alike as Shakespeare's highest achievement in the comic genre, Twelfth Night (c. 1600-01) is an intricate inquiry into the nature of love, gender roles, and the intertwining of life's tragic and comic experiences. A number of critics remain particularly fascinated with the complexity of the play's exploration of gender identity, as there are numerous layers to the characters' gender roles, as well as to their sexual attractions. Referred to as a subplot, the story of Malvolio and those who seek to punish him for his puritanical ways threatens to steal the show, as some critics have pointed out. The relationship between the main plot and this subordinate plot is therefore the focus of much critical examination. Additionally, the play's ending—in which so much confusion is undone in so short a time—also attracts a great deal of scholarly attention, particularly since Viola remains dressed as a male right up to the play's end, becoming Shakespeare's only cross-dressed heroine to do so.

The sexual relationships and gender roles in Twelfth Night are multi-layered. For example, Viola, a female character (who was played by a male in the Elizabethan theater), is dressed as a male, Cesario, throughout most of the play. As a male, Viola woos Olivia for Orsino, resulting in Olivia falling in love with Viola-as-Cesario. At the same time, Viola, though dressed as a man, falls in love with Orsino. Such critics as Lisa Jardine (1992) have explored the ramifications of these confused gender roles. Jardine focuses in particular on how the relationship between economic dependency and sexual availability in Elizabethan England informs the play's attitudes towards cross-dressing. Both Viola and Sebastian, observes Jardine, are forced to seek dependent positions in households outside the circle of family relations, making Viola/Cesario sexually available to Orsino, and Sebastian sexually available to Olivia. In his analysis of gender issues in Twelfth Night, Michael Shapiro (1996) emphasizes the Elizabethan theatrical practice of men playing women's parts. Shapiro studies the psychological “anxiety” resulting from the theatrical portrayal of both sexual and emotional intimacy, examining in particular the relationship between Viola and Olivia, in which the audience witnesses the intensity of the exchanges between two women, played by two men, and the relationship between Orsino and Viola, in which Orsino is drawn to the feminine qualities of Viola's Cesario. Like Shapiro, Casey Charles (see Further Reading) maintains that the relationship between Viola and Olivia is a significant one, more central to the play than many critics have acknowledged. The relationship between the two women, along with the attractions between Antonio and Sebastian and Orsino and Cesario, emphasize that homoerotic desire is a primary concern in the play. Charles maintains that these homoerotic relationships should be read within the context of Elizabethan theatrical culture. The critic continues with a discussion of...
the way the dramatization of homoerotic attractions criticizes the social ideal of “imperative heterosexuality” by underscoring the way sexuality is socially constructed through gender identity.

The subplot, centering on the punishment of Malvolio, highlights some of the darker aspects of *Twelfth Night*. Many critics have noted the severity of Malvolio’s punishment—he is humiliated, imprisoned in a dark chamber, and made to feel as if he has lost his sanity. This is perhaps more than he deserves, some audiences and critics feel. Harry Levin (1976) examines Malvolio’s role in the play, commenting that the character is not present in Shakespeare's sources, yet his role becomes a “stellar” one. Arguing that Shakespeare’s primary concern was to highlight the triumphant comic spirit, Levin suggests that the darkness integrated into Malvolio’s story, much like the tragedy and death that inform the circumstances of the lovers in the main plot, serves the purpose of intensifying the victory of the comic spirit. Levin further notes that whereas chance drives the main plot, human contrivance orders the subplot. Jane K. Brown (1990) also explores the differences between the main plot and subplot. The critic finds that the two plots correspond to the two worlds depicted in the play—one ruled by Orsino and one governed by Olivia. Brown goes on to discuss the way Shakespeare represented the two realms differently, through the use of allegorical language in Olivia’s world, and metaphorical discourse in Orsino’s. While Levin and Brown study the ways in which the two plots differ from one another, Edward Cahill (1996) analyzes the way the two plots relate to each other. Cahill contends that both explore similar issues, such as identity and desire, both use disguise and performance, and both feature the pursuit of marriage. The critic also observes that the failure of the subplot to resolve itself injects a bit of tragedy into the play’s otherwise comic ending.

The ending of the play has also been a focus of criticism. The fact that Viola remains dressed as Cesario at the play’s end has been noted by a number of critics, who suggest that Shakespeare allowed this in order to heighten the effect of the denouement, or to make a statement about gender identity. Jörg Hasler (1974) studies the influence of Shakespeare’s earlier comedies on the ending of *Twelfth Night*, examining the dramatic form of Viola’s ordeal at the play’s end and comparing it to the endings of *Much Ado about Nothing*, and *Measure for Measure*. Hasler finds that all three plays end similarly, with the heroines standing in the center of the chaos. The critic also examines the endings of other Shakespearean plays for cases of mistaken identity, shipwreck stories, and similar patterns found in *Twelfth Night*. Yu Jin Ko (see Further Reading) begins an analysis of the play’s ending by noting the similarity between Viola’s rejection of Sebastian’s embrace and Jesus’s resisting Mary Magdalene’s embrace after his resurrection. Ko demonstrates that this Biblical allusion serves to heighten the sense of longing, and argues that this intensified yearning is exploited throughout the play, largely in sexual terms. Ko explores how Viola’s cross-dressing prolongs the sexual yearnings of both Olivia and Orsino, and examines the “curiously absorbing” nature of longing as it is dramatized in *Twelfth Night*.

**Twelfth Night Literary Criticism (Vol. 62): Criticism: Overviews And General Studies**

[In the following essay, Mangan focuses on Shakespeare’s extensive reworking of themes, characters, and situations used in *Twelfth Night*, noting that Shakespeare revised his previous attitudes toward many of the ideas explored in the play.]

‘GIVE ME EXCESS OF IT’

*Twelfth Night* is a play characterized by excess. In the first few lines Orsino calls for an excess of music, and from that moment on the play stages a variety of excesses. On the most mundane level there are the literal
excesses of Sir Toby and his drinking partners and their revelries. There are the excessive and obsessive emotional states of Orsino and Olivia; the one overwhelmed by his unrequited love for the other, who is herself trapped in mourning for her dead brother and sworn to wear a veil for seven years. People act and react excessively, too: the trick which Maria and Sir Toby play against Malvolio is funny to begin with, but eventually turns sour. Audiences frequently find the ‘mad-house’ scene, in which Feste torments the imprisoned steward, uncomfortable, and even Sir Toby thinks that things have been taken too far and says that he ‘would we were well rid of this knavery’. The play encompasses an extraordinary range of tones and moods, from melancholy to revelry. There is even an excess of characters in the play: Fabian seems to appear from nowhere and for no apparent reason in Act II Scene v, and then takes over the part which Feste seemed about to play in the early stages of the plot against Malvolio.

As for the plot, Shakespearean comedy is typically complicated in its narrative structure: even so, *Twelfth Night* is unusually ambitious in the number of narratives which it sets going simultaneously, and the complexity with which they need to interrelate. It attempts simultaneously to create both the accelerating fugue-like structure of a good farce, and also a series of characters who are allowed their own space to develop emotionally complex or subtle relationships with each other and with the audience. There are so many narratives going on at the same time that it is easy for an audience to lose track of everything that is happening. Plots of disguise and cross-dressing become interwoven with stories of mistaken identities, separated twins and (again) lost brothers; tricks are played on several characters simultaneously; and there is not one love-story but many.

As in *As You Like It*, all sorts of variations are played upon the theme of love and desire. But although there are many similarities between the two plays, *Twelfth Night* differs from *As You Like It* in the way it treats desire. In *As You Like It* a single kind of love-relationship, romantic love, was parodied in a variety of ways up and down the social classes. But the triangle of desire in which Viola is caught does not involve low-life shepherdesses like Phoebe, patently minor characters who can be relegated at the end of the play to their proper station in the sub-plot: she is adored by the Lady Olivia. Moreover, in *Twelfth Night* love takes on a greater variety of forms. Apart from Orsino's and Olivia's obsessive states there is also Viola's unspoken longing for Orsino; Olivia's impossible desire for Cesario (finally translated into possibility by the appearance of Sebastian); Orsino's fondness for ‘Cesario’ (which changes quite peremptorily into a willingness to marry Viola); Malvolio’s self-interested pursuit of his mistress, which leads to its own kind of excess as he dresses in his ridiculous costume; Sir Andrew's hopes of marriage with Olivia; Antonio's adoration of Sebastian; the fictional sister invented by Viola and her male counterpart, the flamboyant and imaginary lover in the ‘willow cabin’ at the gate; Sir Toby's marriage to his partner-in-crime Maria; and not least the filial love of Sebastian and Viola, which is as intense as any relationship in the play. *Twelfth Night* is clearly concerned to show how many faces love and desire can have.

Perhaps, too, how many faces comedy can have. It seems at times that there is more material here than can be accommodated in a single play—and this is not entirely surprising, for into *Twelfth Night* Shakespeare cram a whole series of themes, characters, scenes and situations which he has already used in several previous plays.

*Twelfth Night* re-works, for example, the cross-dressing plot from *As You Like It*, with Viola following Rosalind's lead in donning male attire as protection, and then having to deal with the contradictions which arise from that disguise once people start falling in love with each other. Like another cross-dressed Shakespearean heroine, Julia in *The Two Gentlemen of Verona*, Viola becomes page to the man she loves, and then finds herself in the uncomfortable position of having to plead his cause to another woman. The cross-dressing plot is then interwoven with the ‘identical twins’ plot which was the central narrative of *The Comedy of Errors*. As in that earlier play, twins are separated by storm and shipwreck; one of them arrives in a strange city to find an unknown woman who lays claim to his love; people are confined in lunatic asylums; misunderstandings arise about ransoms and gifts of gold; and old enmities between cities put at risk the lives...
of men who are seeking the person they love. From *Much Ado About Nothing* comes the scene in which someone is tricked into believing that someone else is in love with them, while the tricksters look on. From *As You Like It* again comes the slightly dissonant ending: just as Jaques in the earlier play refused to join in the celebrations and return to court with the rest of the company, so Malvolio here, much more harshly, rejects the apologies and attempts at reconciliation, storming off-stage with threats of revenge.

Characters reappear, too. The figure of the jester, of course, has been used before, and Feste bears more than a slight resemblance to Touchstone, as Shakespeare and Robert Armin continue to develop the specialized clown rôle as a trademark of the Lord Chamberlain's Men. Several other stock characters, too, probably bear witness to the particular skills or comic routines of other actors: the inept lover Master Slender from *The Merry Wives of Windsor*, for example, reappears as Sir Andrew Aguecheek; the witty female servant Maria has antecedents in Hero's waiting women, Margaret and Ursula in *Much Ado About Nothing*, and Viola, as we have seen, replays Rosalind's breeches part. It has often been pointed out that Sir Toby is an Illyrian equivalent of Falstaff: like the fat knight of the *Henry IV* plays and *The Merry Wives of Windsor*, he is a descendant of the figures of misrule from seasonal entertainments. Like Falstaff, Sir Toby has gathered round him a group of like-minded revellers, with the result that Malvolio accuses him of trying to turn Olivia's house into an 'ale-house'—as if Falstaff's Eastcheap haunts were to be imported into Illyria. Even *Hamlet* finds echoes in *Twelfth Night*, although this is perhaps less surprising than it might seem at first, since the comedy and the tragedy were written very close together in and around 1600-1. At any rate, both of them start with a figure displaying all the signs of mourning: Hamlet's 'inky cloak' is worn in mourning for his father, Olivia's veil is in memory of her brother. In this respect Olivia may also remind readers and audiences of Portia in the early phases of *The Merchant of Venice*, as both are potentially prevented from loving by the influence of a dead relative.

The list could go on. Nor is there anything unusual in itself about the fact that this play contains reworkings of old stories, characters and situations. Throughout his career Shakespeare continually re-uses material, adapting not only other writers' works for the stage (as was common enough in Elizabethan playwriting practice), but reworking his own ideas and narratives, giving new meanings to the stories he tells. What makes *Twelfth Night* special is the relentlessness of these reworkings, the (again) excessiveness of them. It is true that shipwrecks, lost relatives, mistaken identities and love-triangles are standard fare in romantic comedy, but in *Twelfth Night* Shakespeare seems to be attempting—almost desperately—to cram everything in. *Twelfth Night* is a compendium of Shakespearean comedy, and in it it is possible to see Shakespeare taking further, revising and rethinking his attitudes to some of the ideas which comedy had already been a vehicle for expressing.

‘AT OUR FEAST WE HAD A PLAY’

It may seem that this spotting of sources and intertextual relationships is a rather academic exercise: relevant to the classroom, perhaps, but not to the stage. Would Shakespeare have expected his audience to pick up references like these? Would they have noticed, or bothered about, the similarities between one play and another? As it happens we can answer this question with a qualified ‘yes’. While we have no way of knowing how Elizabethan audiences in general reacted to the play, or what sort of expectations or understandings they had of it, we do have evidence of the response of one spectator at a performance of *Twelfth Night*.

*Twelfth Night*, like most of Shakespeare's plays, was written with various possible audiences in mind. It was to be performed at the still-new Globe Theatre, of course, but the Lord Chamberlain's Men would also have hoped, like Bottom and his friends, to be commissioned for performances at court on the occasion of various festivities and celebrations. There is even a tradition that the play was first performed before the Queen on 6 January 1601, on *Twelfth Night* itself, although there is little or no evidence for such a performance (indeed there is no record of a performance of this play at the court of either Elizabeth or James until 6 April 1618, two years after Shakespeare's death). There was, however, a performance at another prestigious, and possibly
better-paying, venue in 1602. A student of law at the Middle Temple, John Manningham, kept a commonplace book in which he noted all sorts of details about his life. This book is known as ‘Manningham's Diary’, and the first entry for February 1602 reads:

At our feast we had a play called ['mid' crossed out] Twelve Night or What You Will, much like the Comedy of Errors or Menaechmi in Plautus, but most like and near to that in Italian called Inganni. A good practice in it to make the steward believe his Lady widow was in love with him by counterfeiting a letter, as from his Lady in general terms, telling him what she liked best in him and prescribing his gesture in smiling, his apparel etc. And then when he came to practice making him believe they took him to be mad.  

This diary entry suggests something of the nature of the audience for which Shakespeare was writing, by showing us something of the mind of one Elizabethan play-goer: not a statistically relevant sample, of course, but useful nonetheless. It is a mind which is extremely well-stocked: Manningham, clearly, is well-read in both contemporary English, recent Italian and classical Latin drama. He not only picks up the resemblance to the Comedy of Errors, but is also able to trace both Shakespearean plays back to their common source in Plautus's Menaechmi. In addition there is the interesting slip of the pen in Manningham's first line: the word 'mid' is crossed out—as if he might have been about to write 'A Midsummer Night's Dream', briefly confusing one Shakespearean play with another (which also has a title referring to one specific night of the year). It is unlikely to have been pure coincidence that led Manningham to make the link with the earlier Shakespeare comedies. It would seem that Shakespeare as a writer had made enough of a name for himself by 1602 for an informed play-goer like Manningham to be able to discern an oeuvre. Manningham, it seems, was aware not merely of watching a play but of watching a play by a particular writer, William Shakespeare.

Manningham is judicious in his spotting of sources. Having recognized the twins' plot from The Comedy of Errors and Menaechmi, he goes on to consider the cross-dressing plot, which he correctly traces back to Italian comic traditions. Here, in fact, he may be conflating memories of two plays: the play which he names, Gl'Inganni (The Deceptions), tells the story of a woman who cross-dresses and takes the masculine name of Cesare, just as Viola in Twelfth Night becomes Cesario. It is also possible, however, that Manningham is actually thinking of another play, the anonymous Gl'Ingannati (The Deceived), which resembles Twelfth Night even more closely. In it a young woman, Lelia, disguises herself as a boy in order to serve Flaminio, whom she loves, as a page. Flaminio employs her as a messenger to Isabella, the woman he loves unrequittedly, and Isabella then falls in love with Lelia. Like Viola, Lelia is saved from these complications by the appearance of her long-lost brother Fabrizio, who falls in love with Isabella, leaving Flaminio and Lelia free to marry each other.

We should not assume that the sophisticated awareness of intertextuality which Manningham shows was typical of play-goers in Shakespeare's London. Clearly, though, Shakespeare was writing for an audience which included a proportion of very well-informed aficionados of the theatre, spectators whose experience of one play could be immediately related to memories of others. He might well have been able to expect that the self-referential and intertextual elements of Twelfth Night would not have been altogether lost on his audience.

Other things about Manningham's diary entry deserve comment. There is his evidence, for example, that Twelfth Night was performed at a feast. This particular play is especially suited to such an occasion: Sir Toby and his fellow-revellers in particular enact a story-line which is in itself ‘festive’, and the play bears the title of a feast. It would have been nice if Manningham's diary had provided evidence of the play being performed at some Twelfth Night celebrations; however, the feast at which Twelfth Night was presented to the Middle Temple seems, from the date of Manningham's diary entry, to have been to celebrate Candlemas rather than Twelfth Night.
The diary entry also gives a sense of what Manningham remembered most vividly from the performance. The romantic plot is mentioned only as it relates to sources, but what seems to have stuck in Manningham's mind is the trick played on Malvolio by Maria, Sir Toby and Feste. What Manningham carries away from the play is precisely the opposite of what the editors of the Arden edition of the play, J. M. Lothian and T. W. Craik, speaking for twentieth-century scholarship, say the modern reader is likely to experience:

It is probably true to say that a twentieth-century reader, suddenly invited to recall *Twelfth Night*, will think first of Viola's scene with Olivia and Orsino (I. iv and II. iv), and in particular of her 'willow cabin' and ‘Patience on a monument’ speeches.²

They compare this with a typically nineteenth-century perspective on the play, represented by the words of the Victorian scholar F. J. Furnivall, writing in 1877, who saw the below-stairs plot as a rather irritating distraction, behind which the beauties of the romantic plot might be glimpsed:

The self-conceited Malvolio is brought to the front, the drunkards and the Clown come next; none of these touches any heart; and it's not till we look past them, that we feel the beauty of the characters who stand in half-light behind.⁴

Manningham's memories are different again from this. He is not particularly interested in the shadowy half-light of romantic beauty; for him the ‘self-conceited’ Malvolio's smiling, his yellow cross-gartered stockings and the tricks played upon him by Sir Toby and his companions are what make the greatest impression:

A good practice in it to make the steward believe his Lady widow was in love with him by counterfeiting a letter, as from his Lady in general terms, telling him what she liked best in him and prescribing his gesture in smiling, his apparel etc. And then when he came to practice making him believe they took him to be mad.⁵

These varying responses provide some useful information about the diversity of ways in which different ages have related to the ‘same’ play. The changing structures of feeling over the centuries, and the changing expectations both of art and life which people have brought to the text in various ages has meant that different generations have privileged different parts of the story. In addition, though, it is worth noting how the Arden editors resolutely talk about ‘the reader’ rather than ‘the spectator’ or ‘the audience’. Manningham's response, on the other hand, is to a performance rather than to a text. It may be that the differences in perspective which exist between Manningham and the Arden edition owe something to the difference between reading *Twelfth Night* and watching it.

A play is a paradoxical kind of literary hybrid, one whose ‘success’ is in part measured by the number of times the text gets staged and re-staged. In the course of this process, of course, the play gets altered from its original appearance. *Twelfth Night*‘s history on the English stage between the 1600s and the mid-twentieth century includes such radical transformations as a version played at James I's court in 1623 entitled merely *Malvolio*; a Restoration adaptation by William D'Avenant; an incorporation of sections of it in Charles Burnaby's *Love Betray'd: or the Agreeable Disappointment*; an 1820s musical version by Frederick Reynolds containing ‘Songs, Glees and Choruses’ from other Shakespeare plays.⁶ Just as Shakespeare cannibalized previous plays (including, as we have seen, his own) to create his texts, so his texts are cannibalized by later generations of theatre practitioners. But it is not only a matter of rewritings and adaptations. For each new staging, each new stage, each change of cast or venue means a different experience for the audience.

Manningham's diary entry tells us about an early staging of *Twelfth Night*, and reflects accurately an important theatrical dimension of the play which is not always obvious to the reader: the way in which the apparent main plot, the romance involving Viola, Orsino and Olivia, frequently has trouble holding its own in competition with the ‘sub-plot’, and the below-stairs activities of puritanical stewards and drunken knights.
threaten continually to take centre stage. As with that 1623 performance at court, *Twelfth Night* can easily metamorphose into *Malvolio*.

‘I SMELL A DEVICE’

Let us focus, then, on the below-stairs plot. Act II Scene iii sees the ‘low-life’ characters of the play, Sir Toby Belch, Sir Andrew Aguecheek, Feste and (after a little persuasion) Maria holding a late-night party. They drink, they sing—and they disturb Malvolio, who bursts into the scene full of righteous indignation:

*Malvolio* My masters, are you mad? Or what are you? Have you no wit, manners, nor honesty, but to gabble like tinkers at this time of night? Do ye make an alehouse of my lady's house, that ye squeak out your coziers' catches without any mitigation or remorse of voice? Is there no respect of place, persons nor time with you?

(II, iii, ll. 33-9)

His diatribe has little effect on the revellers. Despite Malvolio's attempt to quieten them, they continue with their drinking and singing. Sir Toby retorts, ‘Art any more than a steward? Dost thou think because thou art virtuous there shall be no more cakes and ale?’ (II, iii, ll. 109-11).

In this below-stairs plot of *Twelfth Night* Shakespeare stages once again the battle between Carnival and Lent. The confrontation between Sir Toby and Malvolio is emblematic: on the one side Malvolio's ‘virtuous’ mean-spiritedness, on the other Sir Toby, the representative of revelry, with a surname which speaks for itself, and a first name which is pointedly and familiarly English in this alien world of Illyria. As in the famous painting by Bruegel, the personifications of Carnival and Lent confront each other directly.

The title of the play itself draws attention to this confrontation. In Elizabeth's court, as elsewhere in Europe, the Feast of the Epiphany on 6 January, Twelfth Night, was the occasion of the final phase of Christmas-time celebrations, and

… one of the most brilliant and joyful court occasions. Before stepping down, the Lord of Misrule would announce his desire to round off with a kind of apotheosis and a whole succession of spectacular displays of music, dancing and feasting bursting like fireworks one after the other … *Twelfth Night* provided a fine occasion to hand out these titles of king and queen, which appear to have been very popular amongst the rites and traditions of folklore. It was a mimetic ritual of royalty that was probably a survival from the old Saturnalia, giving the king of the evening a chance to masquerade as the monarch, derisively aping his authority … Masquerades and fancy-dress mummings are another feature of the lavish amusements of *Twelfth Night* … *Twelfth Night* was the festival which brought to an end the long, eventful period of ‘Yuletide’ revels …?  

The ambiguous nature of these *Twelfth Night* celebrations is significant. It was a time of revelry, a carnival time at which the world might be turned upside-down, a celebration presided over by the Lord of Misrule and the ‘King of the Bean’ (a mock king elected by means of a dried bean hidden in the festive cake: whoever found it in his portion was elected ‘king’). Yet it also marked the end of revelling: the Christmas holiday was almost over and a return to work and the realities of midwinter imminent. We retain a memory of this in present-day Christmas customs: *Twelfth Night* is the night the decorations come down. The confrontation between the riotous world of Sir Toby and the sober world of Malvolio could hardly take place in a more fitting context than that of *Twelfth Night*.  

738
Sir Toby and his drinking companions comprise an carnivalesque underworld, an alternative society to the ‘official’ world of Olivia and Orsino. This world has all the essential characteristics of Bakhtin's definitions of carnival. The pleasures of the body are paramount; language—especially in Feste's hands—runs riot; and traditional hierarchies and class boundaries have become virtually irrelevant. Knights carouse with servants, fools and other unspecified members of the household. Sir Toby breaks all the rules of Elizabethan decorum by marrying his sister's ‘waiting-gentlewoman’, thus honouring at one remove Falstaff's promise of marriage to Mistress Quickly. The analogy with Falstaff works theatrically as well as socially. While the social details of the fictional settings are different, the dramatic functions of the two figures are so similar that it is difficult to imagine that the part of Sir Toby was not played by the same actor who created Falstaff.

There are important differences, it is true. Whereas in the history plays Falstaff had to carry the main weight of the plays' foolery, with Pistol, Bardolph, Nym and Mistress Quickly very definitely supporting rôles, Twelfth Night spreads the comic burden more evenly. There is a fully-developed fool rôle in the character of Feste, and another excellent comic part in Sir Andrew Aguecheek; Maria, too, is a more interesting and better-established part than Mistress Quickly—indeed she has inherited some of the attributes not only of the witty servant, but also of Shakespeare's witty heroines such as Rosalind and Beatrice. Another important distinction between Twelfth Night and the Henry IV plays is geographical: in the history plays the world of Bankside was physically as well as socially distant from the court, whereas in Illyria Sir Toby's alternative world exists within the same household as the official one. In Twelfth Night the confrontation between the forces of authority and those of licence is played out on a domestic scale. It is not a class conflict, nor is it strictly to do with law and order. There is no opposition between the so-called ‘respectable’ world and a criminal ‘class’. Sir Toby is Olivia's kinsman and the revellers are of her household.

The significance of these similarities and differences between Falstaff and Sir Toby Belch can be seen if we view the confrontation between Sir Toby and Malvolio as a reworking of the confrontation between Falstaff and the Lord Chief Justice in Henry IV Part 2. In that play, which was first acted a year or two before Twelfth Night, the main narrative concerned the way in which Prince Hal, re-fashioning himself in heroic mode in order to become the warrior-hero Henry V, distanced himself from Falstaff's subversive carnival influence, and aligned himself with the forces of authority, sobriety, law and order, represented in their most extreme form by the Lord Chief Justice. In an early scene in the play the Lord Chief Justice encounters Falstaff and reprimands him, just as Malvolio reprimands Sir Toby. But whereas Malvolio is routed, the Lord Chief Justice is not: Falstaff attempts to answer him, but cannot get the better of him. Eventually, in Henry IV Part 2 the forces of authority triumph over those of revelry, and Falstaff is banished and imprisoned. Twelfth Night replays the same contest but with a different result: here it is the forces of revelry which prevail, and Malvolio who is imprisoned, ridiculed and tormented.

In production it is tempting to represent Malvolio as a stereotyped Puritan figure while Sir Toby becomes the Cavalier of popular imagination: aristocratic and rather dissolute. Such a staging has some historical justification. One of the main social and economic tensions of early-seventeenth-century England involved the shift of real power away from the established but by now fading nobility, whose influence was based on land and tradition, towards the rising middle classes. They were much influenced by Puritan thought, and they were the sector of society which would, on the whole, profit most from the emerging capitalist economy. Thus the confrontation between Carnival and Lent might also be seen as a confrontation between the old order and the new, with Sir Toby representing the traditional values of an already-sentimentalized ‘Merrie England’ which is being challenged by the likes of the socially ambitious Malvolio. Since, historically, this was a tension which finally erupted in civil war, it gives a sinister power to Malvolio's final line in the play. Humiliated and enraged he exits, vowing ‘I'll be revenged on the whole pack of you’ (V, i, l. 374). That revenge was forty years brewing and when it came it brought with it Oliver Cromwell.

Caricature Puritans, with names such as Zeal-of-the Land Busy and Tribulation Wholesome, appear on the London stage during this period in Ben Jonson's plays, and Malvolio is a recognizable kinsman to these
stereotyped figures: self-righteous, overbearing, a hypocrite and a killjoy. His speech is ostentatiously moralizing and he names ‘Jove’ frequently and self-importantly, exclaiming piously, for example, that ‘Jove, not I, is the doer of this, and he is to be thanked’ (III, iv, l. 81). Some scholars, incidentally, suggest that the word ‘Jove’ is used here, rather than ‘God’, as a later emendation to the text in accordance with the 1606 Act ‘to Restraine Abuses of Players’ which outlawed profanity in plays. Yet the word ‘God’ is used later in the same scene by Andrew Aguecheek, and both the Clown and Viola name ‘God’ directly in Act I Scene v. It is more likely that this slightly pretentious name for God is simply a feature of Malvolio’s idiolect, the function of which is to strengthen the impression of Elizabethan Puritanism: the word contains resonances of the Old Testament ‘Jehovah’ and the Old Testament was a particular source of inspiration for Puritan preachers and pamphleteers. This kind of stereotyped Puritan was an easy and indeed almost an inevitable target for the Elizabethan playwright: Puritan-led attacks on the stage ensured not only the animosity of most playwrights, but also that of the audience, who by definition were not opposed to the theatre.

Yet it is important not to oversimplify. If Malvolio is, in this loose sense of the word, puritanical, the term ‘Puritan’ itself is, as historians repeatedly remind us, a notoriously slippery one. It was used at the time to refer to a whole spectrum of Protestant thought and belief (not all of which was ascetically dismissive of worldly pleasure) and a variety of associated political positions ranging from the moderate to the revolutionary. As David Underdown says, ‘The term is impossible to define with precision, can mean anything its users want it to mean, and there are modern historians who would like to abandon it altogether’. Nonetheless, the historical movement which we know as Puritanism had certain discernible features. When historians use the word ‘Puritan’ they generally mean those people who wished

... to emphasize more strongly the Calvinist heritage of the Church of England; to elevate preaching and scripture above sacraments and rituals, the notions of the calling, the elect, the ‘saint’, the distinctive virtue of the divinely predestined, above the equal worth of all sinful Christians … [Puritanism] gave its adherents the comforting belief that they were entrusted by God with the special duty of resisting the tide of sin and disorder that surged around them. Through preaching, prayer, the study of scripture, and regular self-examination, it provided a strategy for cultivating the personal qualities necessary to these ends.

Shakespeare goes to some lengths to distance Malvolio from this more precise definition of Puritanism. He expressly states that he does not want simply to label him ‘Puritan’. When Toby asks Maria to tell the company something about Malvolio, the following conversation ensues:

Maria Marry, sir, sometimes he is a kind of puritan.
Sir Andrew O, if I thought that I'd beat him like a dog.
Sir Toby What, for being a puritan? Thy exquisite reason, dear knight.
Sir Andrew I have no exquisite reason for't, but I have reason good enough.
Maria The devil a puritan that he is, or anything constantly but a time-pleaser, an affectioned ass that cons state ... grounds of faith that all that look on him love him; and on that vice in him will my revenge find notable cause to work.

(II, iii, ll. 135-46)

Maria characterizes Malvolio as ‘a time-pleaser’, one whose ‘Puritanism’ has nothing to do with belief or faith. Shakespeare typically draws back from commenting on any specific contemporary theological, philosophical or political position, and contents himself with satirizing the more general and traditional vice of hypocrisy, showing how the trappings of religion are manipulated by the likes of Malvolio in order to further their own ambitions and feed their own vanity. But, as Maria sees, Malvolio’s ambition and vanity are the very handles by which the revellers can catch hold of him.

‘ARE ALL THE PEOPLE MAD?’
John Manningham enjoyed the humour of the prank which the revellers play on Malvolio. A ‘good practice’, he called it. Yet the plot against Malvolio calls forth a cruel kind of laughter, the laughter of ridicule. Pulled down from his seat of power and imprisoned ‘in a dark room and bound’, Malvolio is both tortured and humiliated. There is a further psychological torment which Sir Toby and his companions inflict upon Malvolio, however, ‘making him believe they took him to be mad’, as Manningham puts it.

Acting, as he thinks, on his mistress's instructions, Malvolio adopts uncharacteristic dress and behaviour. He appears to Olivia, yellow-stockinged, cross-gartered, talking unintelligibly and wearing a smile; the Lenten figure has put on, in effect, the garb of Carnival. Acting as he does so far out of his accustomed character, it is small wonder that Olivia is made to think he is deranged.

Malvolio 'Remember who commended thy yellow stockings'—
Olivia 'Thy yellow stockings’?
Malvolio, ‘And wished to see thee cross-gartered.’
Olivia 'Cross-gartered’?
Malvolio ‘Go to, thou art made, if thou desirest to be so.’
Olivia Am I made?
Malvolio 'If not, let me see thee a servant still.’
Olivia Why, this is very midsummer madness.

(III, iv, ll. 45-54)

In fact the revellers' aim is crueler than this: it is to make Malvolio doubt his own sanity. The techniques which they use on the hapless steward are the classic techniques of brainwashing: sensory deprivation combined with false or contradictory information designed to throw into doubt the subject's usual ways of making sense of the world. In the guise of Sir Topas the priest, Feste visits Malvolio in his dark room:

Malvolio Sir Topas, never was man thus wronged. Good Sir Topas, do not think I am mad. They have Feste Fie, thou dishonest Satan ... Say'st thou that house is dark?
Malvolio As hell, Sir Topas.
Feste Why it hath bay windows, transparent as barricadoes, and the clerestories toward the south-north ... lustrous as ebony, and yet complainest thou of obstruction?
Malvolio I am not mad, Sir Topas; I say to you this house is dark.
Feste Madman, thou errest.

(IV, ii, ll. 29-43)

Feste describes a reality to Malvolio which is the opposite of what his senses tell him is the truth. The fact that he does so in nonsensical and contradictory terms (‘bay windows, transparent as barricadoes, clerestories toward the south-north ... lustrous as ebony’) only increases the sense of disorientation. Malvolio repeatedly affirms that he is not mad, yet his sanity is under severe attack in this scene.

But it is not only Malvolio who is threatened with madness: a kind of madness seems endemic to Illyria. It is the dominant metaphor of the play. According to Feste, Sir Toby is a ‘madman’ because of his drink (I, v, l. 126); Orsino thinks Antonio's ‘words are madness’ (V, i, l. 95) because of his claim to know ‘Cesario’; Olivia worries that Viola's unconventionally assertive wooing on behalf of Orsino might amount to madness (I, v, l. 191) and, as we have just seen, is later convinced that the yellow-stockinged Malvolio is suffering from ‘midsummer madness’ (III, iv, l. 54). Malvolio himself, on the other hand, sees madness in the riotous living of Sir Toby and his friends, and demands of them ‘My masters, are you mad?’ (II, iii, l. 83). And Sebastian, who finds himself at the centre of the whole network of misunderstandings suspects first of all that in Illyria ‘all the people [are] mad’ (IV, i, l. 26), and then that the madness might be confined either to Olivia or himself:

This is the air, that is the glorious sun.
This pearl she gave me, I do feel't and see't,
[And] though my soul disputes well with my sense
That this may be some error but no madness
Yet doth this accident and flood of fortune
So far exceed all instance, all discourse,
That I am ready to distrust mine eyes
And wrangle with my reason that persuades me
To any other trust but that I am mad
Or else the lady's mad.

(IV, iii, ll. 1-2, 9-16)

These repeated references to madness are hardly surprising in a world where people's sensual impressions are often deceiving, and where identities are not always what they appear. Significantly, this speech in which Sebastian tries to make sense of what is happening to him comes immediately after Malvolio's 'madhouse' scene. For, in an odd way, Sebastian and Malvolio are in similar situations. For both of them normal meanings and the evidence of their senses are not operating. Madness is offered as the most rational explanation!

In comedy a little madness can be a liberating thing. The heroes and heroines of Shakespearean comedies typically go through a series of disorienting experiences which eventually act benevolently upon them. The lovers in A Midsummer Night's Dream are made ‘wood within this wood’, and are unable to tell what is real and what is not, but at the end Jack ends up with Jill. In The Taming of the Shrew it happens more blatantly and cruelly; yet Petruchio engineers the brainwashing of Kate which has her agreeing that the sun is the moon precisely in order to browbeat her into the supposed ‘happiness’ of a conventional marriage. The pattern works more subtly in Twelfth Night: Viola's traumatic ‘loss’ of her brother and the disguise she assumes as a result mean that temporarily she loses her own identity and throws other people's perceptions of reality out of kilter; yet an equilibrium is reinstated at the end with a joyful reconciliation with Sebastian and eventual marriage to the man she loves. The ‘madness’ that Sebastian fears is an example of this comedic pattern in which people lose themselves and find themselves once more, often changed for the better by the experience. For Malvolio, however, the pattern does not offer up its traditional rewards.

Like others in the play, he aspires to Olivia's hand. It is one of the signs of Malvolio's ambition that he yearns to rise above his present station in life by marrying Olivia, and much is made (especially by Sir Toby) of his presumption in so aspiring. But Malvolio is by no means the only one whose desire crosses social boundaries: the question of marriage between socially unequal partners is raised several times in the play, from the moment when Sir Toby first tells Sir Andrew that one of Olivia's reasons for rejecting Orsino is that 'She'll not match above her degree, neither in estate, years or wit' (I, v, ll. 105-6). Actually it is not at all clear that Orsino is above her in any of these things, yet the marker has been set down. From then on a series of relationships is projected between men and women of unequal status. Malvolio's desire for Olivia is treated comically, as something scandalous, yet Olivia falls in love with Orsino's 'messenger' whom Malvolio can look down on socially. Maria herself marries out of her class when at the end of the play she is wedded to Sir Toby. Nobody makes much of this. But for the steward Malvolio, being in 'love', entering the domain of desire, ends in humiliation and fury. When Viola rejects her customary identity and dresses up in male clothing, it works to her good. When Malvolio rejects his, and dresses up as a lover rather than a steward and disguises himself in smiles, he is made to look ridiculous. The ‘madness’ Sebastian experiences is a kind of bliss; Malvolio's is a torment, and his spell in the madhouse leads not to a comedic repentance and reconciliation, but to threats of revenge. Malvolio suffers all the disorientations of comedy, but reaps none of the recompense: what acts upon others benevolently acts upon Malvolio … malevolently.

That complex latinate pun which is Malvolio's name reads both forwards and backwards. ‘Mal’ and ‘volio’ can be put together to suggest ‘I want something badly’ or (more literally) ‘I wish ill’—and both are true of Malvolio. It is also true that he becomes the object of others' malevolence, and that they wish him ill. But further: just as the names of Viola and Olivia echo and rewrite themselves in each other, so Malvolio's name,
too, picks up that same phonetic theme of vowels and consonants: V.L.O.A.I. Malvolio … Mal-Olivia … Mal-viola … Male-viola. He even misreads it himself in his desire to see himself as the object of Olivia's affections:

‘M.O.A.I. doth sway my life’ Nay, but first let me see, let me see, let me see … ‘M.’
Malvolio—’M’—why, that begins my name … But then there is no consonancy in the sequel. That suffers under probation. ‘A’ should follow, but ‘O’ does … And then ‘I’ comes behind … ‘M.O.A.I.’ This simulation is not as the former, and yet to crush this a little, it would bow to me, for every one of these letters are in my name.

(II, v, ll. 109-10, 122-3, 126-8, 135-7)

Malvolio's eagerness is self-alienating: it allows him to mistake even his own name.

The relationships between names and people, and between words and meaning, are continually under a strain in Twelfth Night. They come under such strain because of ambition, subterfuge, trickery and disguise. They are put under strain most notably by the clown, Feste. In the guise of Sir Topas, Feste creates for Malvolio an illusory world of unreliable meanings. Elsewhere in the play his wit and wordplay are aimed at subverting ‘normal’ meanings—at proving, for example, that the Lady Olivia, not he himself, is the real fool. In the following exchange with Viola/Cesario, he turns his attention to language itself:

(Enter Viola as Cesario and Feste the clown, with [pipe and] tabor)
Viola Save thee friend, and thy music! Dost thou live by thy tabor?
Feste No, sir, I live by the church.
Viola Art thou a churchman?
Feste No such matter, sir. I do live by the church for I do live at my house, and my house doth stand by the church.
Viola So thou may'st say the king lies by a beggar, if a beggar dwell near him; or the church stands by thy tabor, if thy tabor stand by the church.
Feste You have said, sir. To see this age! A sentence is but a cheveril glove to a good wit—how quickly the wrong side may be turned outward!
Viola Nay, that's certain: they that dally nicely with words may quickly make them wanton.
Feste I would therefore my sister had no name, sir.
Viola Why, man?
Feste Why, sir, her name's a word, and to dally with that word might make my sister wanton. But I
Viola Thy reason, man?
Feste Troth, sir, I can yield you none without words, and words are grown so false, I am loath to prove reason with them.
Viola I warrant thou art a merry fellow and car'st for nothing.

(III, i, ll. 1-26)

It is a verbal duel, of the kind Shakespeare's comedies revel in. Later in the play Viola/Cesario will be tricked into a duel of weapons with Sir Andrew Aguecheek, and will come out of that little better than he/she comes out of this. The followers of carnival in Illyria, it seems, show scant respect for the romantic hero(ine), and insist on challenging and tricking him/her. Here Feste, the clown, outmanoeuvres Viola at every turn and fulfils the fool's traditional function of being able to reduce everything to meaninglessness. It is a paradox of the play that he does so by virtue of his great skill in playing with meanings. Viola's final quoted remark evinces a frustration but also an analysis. Feste's ability to ‘dally nicely with words’ leads, she is suggesting, not merely to wantonness but to nihilism, to the point where he cares for nothing.

These wordplays about words sound oddly modern. Feste's remarks about the cheveril glove insist on what his own speeches go on to prove, and indeed enact: the slipperiness of language. Signified and signifier do not, in Feste's world, match neatly: it is the truth and also the falsehood of words that allow the anarchic clown to be taken—however briefly—for a churchman. Yet perhaps the ‘mistake’ is not so outrageous after all, for the function of the fool may be allied in many ways, both straight and parodic, to that of preacher. Certainly, this relation is stressed in Twelfth Night: as well as this moment, there is the scene we have already looked at in
which Feste takes on the character of a priest in his impersonation of Sir Topas. Earlier, too, Feste has taken
on the part of a priest in a rôle-play catechism of Olivia, in which he undertakes to prove that she, not he, is
the ‘real’ fool.

In the exchange with Viola the disguised heroine cannot keep up with Feste, and after a couple of attempts to
‘bandy words’ with him becomes reduced to the rôle of straight man (or woman?), feeding him the necessary
questions to allow him to elaborate upon his paradoxes. The speed at which these paradoxes follow one
another demonstrates the truth of Feste’s linguistic scepticism; they encompass philosophy, the law and
sexuality: the falseness of words is linked (with what now seems a depressing inevitability) to the common
Renaissance theme of the falseness of women. This does more than merely imply a link between a world in
which language is no longer to be trusted and one in which sexual licence is paramount. For once again, in the
person of Viola/Cesario the audience have before them an image of another kind of false woman—doubly so
indeed, given the cross-casting of the Elizabethan theatre. What Feste says of his ‘sister’, that ‘her name’s a
word and to dally with that word might make [her] wanton’, has a kind of aptitude to Viola/Cesario, whose
two names themselves denote the duality of her gendered identity.

Feste takes one idea and spins others from it, linking linguistics to economics and changing legal and
mercantile practices: ‘words are very rascals since bonds disgraced them’, says Feste. In the emerging
capitalist economy a person’s promise is invested not merely in the spoken word but in the legality of a written
‘bond’. The legal status of everyday speech is minimal compared to that of the formally drawn-up legal
document, and Feste makes the point that truth can no longer be expected to reside in the mere ‘word’ of a
person. Yet we have already seen in the preceding ‘letter scene’ that the written word is no more to be trusted
than the spoken—and as Shylock discovered in *The Merchant of Venice*, legal bonds are also composed of
words, whose significance may be open to more than one reading.

And Feste’s sceptical inquiry into language is itself a verbal fabric. He concedes as much as he parries Viola’s
request for ‘a reason’, and then goes on, typically, to make the point work for him: if words are not to be
trusted they cannot be used to prove reason. And thus a central paradox of contemporary linguistics is
articulated by a Shakespearean fool: that there is no extralinguistic standpoint from which to analyse language
itself. It is the poststructuralist catchphrase: there is nothing outside the text. And yet, of course, by means of
an elegant double-take the analysis is after all validated. The rascality of words is proved because Feste’s
sentence is both self-reflexive and also demonstrative; even as he speaks his words manifest their own
slipperiness. When Viola asks ‘Thy reason, man?’ she is requesting his motive or his justification for a
preceding remark. When he replies that ‘words are grown so false, I am loath to prove reason with them’ he is
talking about ‘reason’ as logic. Thus the sense of the word ‘reason’ itself hovers uncertainly between the two
meanings, and the very inadequacy of language to act as a logical tool proves its own logical point.

Feste’s job is to destabilize meanings; he claims as much himself:

Viola Art not thou the Lady Olivia's fool?
Feste No indeed, sir, the Lady Olivia has no folly ... I am indeed not her fool, but her corrupter

(III, i, ll. 30-1, 34-5)

In the view of this ‘corrupter of words’, language is—indeed all sign-systems are—deceptive and ambiguous;
and he proves the point by exploiting their deceptiveness and ambiguity. Viola understands this element of
ambiguity well enough, being herself the epitome of ambiguity, the signifier which belies its signified.

‘LIKE PATIENCE ON A MONUMENT’

Viola Disguise, I see thou art a wickedness
Wherein the pregnant enemy does much.
How easy it is for the proper false
In women's waxen hearts to set their forms!
Alas, our frailty is the cause, not we,
For such as we are made of, such we be.
How will this fadge? My master loves her dearly,
And I, poor monster, fond as much on him,
And she, mistaken, seems to dote on me.
What will become of this? As I am man,
My state is desperate for my master's love.
As I am woman, now, alas the day,
What thriftless sigh shall poor Olivia breathe!
O time, thou must untangle this, not I.
It is too hard a knot for me t' untie.

(II, ii, ll. 27-41)

This speech of Viola's shows the difference in tone between *As You Like It* and *Twelfth Night*. Viola is in a predicament not unlike Rosalind's in the earlier play: disguised as a boy she is in close proximity to the man she loves but remains unknown to him; meanwhile Olivia has fallen in love with her boy-persona, as Phoebe did with Rosalind's. *Twelfth Night* and *As You Like It* share the cross-dressing plot, with its destabilizing of gender identities, but the two plays use the same material in very different ways.

Rosalind enjoys her rôle as Ganymede; it empowers her and allows her to improvise rôle-play games with Orlando. Her response to the love entanglement with Phoebe is to stage the masque which makes all clear: she sorts it out. Viola on the other hand, declares that it is all too hard for her and that she will just leave it to time to sort it all out. And so she does. Eventually her twin brother turns up, they are reunited, Olivia and Orsino recognize the ‘true’ objects of their affection and the love-relationships sort themselves out accordingly: time, as Viola hoped it would, untangles things, not she.

Viola is the opposite of Rosalind, who enjoyed rôle-playing to the extent of inventing further rôles within the rôles. Rosalind's male disguise allowed her to take the initiative in wooing Orlando; in her love for Orsino Viola behaves as passively as any Renaissance patriarch could wish. Having taken the single active step of disguising herself, she does little more thereafter than wait for him to notice her. The language of love which she has learnt is one of passivity:

```
Viola My father had a daughter loved a man
As it might be, perhaps, were I a woman
I should your lordship.
Orsino And what's her history?
Viola A blank, my lord. She never told her love
But let concealment, like the worm i' th' bud,
Feed on her damask cheek. She pined in thought,
And with a green and yellow melancholy
She sat like patience on a monument,
Smiling at grief. Was not this love indeed?
```

(II, iv, ll. 107-15)

She is describing herself, of course. Not entirely, but with sufficient accuracy for us to recognize that concealment is working on her, too, ‘like the worm i’ th’ bud’. She can only articulate her love for Orsino in the subjunctive mood.

And so it is not merely that Viola is comparatively passive: she is positively uncomfortable with the disguise she has assumed. While *As You Like It* revelled in the complexities engendered by the cross-dressing plot, *Twelfth Night* continually expresses anxiety about them. Viola considers herself not liberated by her
rôle-playing but trapped by it and doubly unfulfilled. ‘As I am a man / My state is desperate for my master's
love. / As I am a woman now, alas the day …’ (II, ii, ll. 35-8). And although she later argues with Orsino that
women are ‘as true of heart as [men]’, here her assumed masculine identity gives her a voice in which she
articulates misogynistic Renaissance truisms about ‘women's waxen hearts’ and their ‘frailty’. There is little
liberation here. Viola sees herself as a freak and a grotesque; she refers to herself, significantly, as ‘poor
monster’! The moralizing tone of that self-disparaging comment is revealing: Viola finds herself in agreement
with the anti-theatrical propagandists who condemned play-acting as inherently sinful. Disguise, she exclaims,
is ‘a wickedness / Wherein the pregnant enemy does much’. This is the language of the Elizabethan
anti-theatrical pamphleteers, who similarly condemned cross-dressing:

And so, if any man do put on woman's raiment, he is dishonested and defiled, because he
transgresseth the bounds of modesty and comeliness, and weareth that which God's law
forbiddeth him to wear, which man's law affirmeth he cannot wear without reproof … [M]en's
wearing of women's raiment, though in plays, [is] a heinous crime … Players are abomination
that put on women's raiment.¹²

The moralists' usual condemnation was, as it is here, of boy actors dressing up as women. Ironically, Viola's
line about disguise being a wickedness is written to be spoken by a boy actor who is not dressed up as a
woman but who (like the boy actor playing Rosalind in As You Like It) has become visible in his own gender
once more. Once again, a gap has been created between the line spoken and the actor who speaks it. This gap
disturbs any simple acceptance of what Viola says: clearly, on another level, the play does not endorse the
message that disguise is a wickedness—otherwise there would be no play. Even so, cross-dressing in Twelfth
Night has the air of a desperate experiment rather than of the playful risk-taking which it had in As You Like It.
If madness is a central metaphor in this play, then Viola experiences her disguise as something akin to
schizophrenia: it alienates her from herself, creating a split personality. She refers to herself in the third person
(‘My father had a daughter …’) and speaks as a divided self (‘As I am a man … As I am a woman’).

It also gives rise to a set of questions about gender identity which are taken more seriously than they were in
As You Like It. In As You Like It homoerotic attraction tended to be treated quite lightly: Phoebe's crush on
Ganymede never amounted to much dramatically, and the complex rôle-playing between Ganymede and
Orlando was always counterbalanced by the fact that Orlando's attention was continually fixed on the ‘absent’
Rosalind of his imagination. In Twelfth Night, however, Olivia's desire for ‘Cesario’ is depicted as something
much more uncontrollable, powerful and painful. It is the passion which can break the depressive hold which
melancholy has had on her since her brother's death; it is more important to her than her dignity:

Cesario, by the roses of the spring,
By maidhood, honour, truth and everything,
I love thee so that, maugre all thy pride,
Nor wit nor reason can my passion hide.
Do not extort thy reasons from this clause,
For that I woo, thou therefore hast no cause.

(III, i, ll. 147-51)

Another kind of sexual tension exists between Orsino and Viola: charged this time by her desire for him
coupled with his response to her ambiguous sexual persona. While Orsino, like Orlando in As You Like It,
remains infatuated with an absent woman, we are left in no doubt that Cesario is present for him in a way that
Ganymede never is for Orlando. The language in which he addresses Cesario makes the point:

Orsino ... Diana's lip
Is not more smooth and rubious; thy small pipe
Is as the maiden's organ, shrill and sound,
And all is semblative a woman's part.
Viola and her friend the sea-captain had originally agreed that she would be presented at Orsino’s court as a ‘eunuch’, but there is nothing unsexed about the attraction Orsino feels for ‘Cesario’. The physicality of his language is sensuous even without the double-entendres of ‘organ’ and ‘part’. Moreover, the conversation between them is continually about sexual desire: ostensibly about Orsino’s desire for Olivia, but continually charged by the unspoken actuality of Viola’s desire for Orsino.

The gender confusions of *Twelfth Night* are given a context in the portrayal of the relationship between Antonio and Sebastian. In this *Twelfth Night* recognizes, in a way that *As You Like It* does not, a homosexual love-relationship. Antonio’s love for Sebastian is couched time and time again in the language of erotic attraction, language drawn from the registers of Elizabethan love poetry: ‘I do adore thee so’ (II, i, l. 42); ‘My desire, / More sharp than filed steel, did spur me forth’ (III, iii, ll. 4-5); ‘to his image, which methought did promise / Most venerable worth, did I devotion’ (III, iv, ll. 354-5). He talks of the ‘witchcraft’ which led him to follow Sebastian, whom he calls ‘this god’ (III, iv, l. 357) and to whose physical beauty he continually refers. ‘My love without retention or restraint’ (another image of excess!) is how he describes his feelings for Sebastian, and his actions in defence of the young man he says he adores bear out his words.13

Antonio’s adoration of Sebastian gives a depth and a seriousness to the gender confusions of *Twelfth Night*; the stakes here are higher than they were in *As You Like It*. There a fairytale logic was available to make everything fit neatly into conventional patterns, so that cruel brothers repented and became kind, and all the complications of the interwoven love-plots could be sorted out by the stage-managed appearance of Hymen, announcing ‘Peace, ho! I bar confusion’ (*As You Like It*, V, iv, l. 123). The love-plots of *Twelfth Night* are more urgent and there is a continual sense that things could get out of control.

In both the Viola-Olivia and the Viola-Orsino relationships, then, the text toys with the possibility of same-sex eroticism more intensely than was the case in *As You Like It*. By balancing these two relationships the play does not allow the audience to explain away the gender confusions easily. Some critics have rationalized the attraction Orsino manifests for Cesario by arguing that what he is ‘really’ responding to is the woman underneath—but if that is so, the same logic leads to the conclusion that Olivia is also ‘really’ attracted not to Cesario but to Viola. Olivia, faced at the end with the realization that she had fallen in love with a girl, is reassured by Sebastian that her mistake was natural enough:

> So comes it, lady, you have been mistook.  
> But nature to her bias drew in that.  
> You would have been contracted to a maid,  
> Nor are you therein, by my life, deceived.  
> You are betrothed both to a maid and man.

(V, i, ll. 257-61)

Sebastian’s reassurance, however, does not so much dispel ambiguity as reinforce it: Olivia is betrothed ‘both to a maid and man’.

This is typical of the final scene of *Twelfth Night*: like the last scene of so many Shakespeare comedies it both offers and resists closure. Narratives are brought to a climax, yet not everything is resolved: the play leaves a great deal open. The scene contains an immense amount of action: again, it works through excess. It is worth summarizing the scene just to show how much there is going on in it:

Feste teases Fabian about the contents of Malvolio’s letter; Orsino arrives, and Feste goes through a begging routine with him; Antonio is brought on and his story, including background incidents about his battles against Illyria, is told, ending with his accusation...
against Viola; Olivia arrives, and Orsino encounters on stage for the first time the woman he has been obsessed with throughout the play; Olivia encounters ‘Cesario’ and confusion arises—firstly because she now thinks he is Sebastian, and secondly because Orsino begins to suspect that ‘Cesario’ has been wooing Olivia on his own behalf; his disappointment at Olivia's rejection is expressed in threats of violence against Cesario, who still professes faithfulness to him, and they begin to depart together; Olivia prevents their exit by revealing that she and Sebastian (Cesario, as she thinks) are married, and sends for the priest to prove it; the priest arrives and confirms the marriage; Orsino's anger against Cesario turns to disgust and he rejects him; meanwhile Cesario's protestations of innocence are making Olivia concerned about ‘his’ love for her.

At this point the action suddenly switches from melodrama to farce: Andrew Aguecheek arrives with a bloodied head (having been fighting with the real Sebastian off-stage); he espies Viola and panics, reprising an earlier encounter between them; then Sir Toby arrives, also with a bloody head, and in a foul temper, rejecting Sir Andrew's offer of help, and going off-stage again almost immediately.

At this point Sebastian finally comes on. Initially he does not notice Viola, although she sees him. He is joyfully reunited with Antonio, and only after that does he see his sister. Carefully, almost tentatively, they begin to come together, testing each other's identity with details of shared memories; Sebastian refers uneasily to the paradox of Olivia's love for Cesario; Viola explains that the sea-captain who saved her life has been imprisoned by Malvolio's request for some unspecified offence.

This reintroduces the Malvolio plot: Feste arrives with the letter and attempts to make a joke of it; Fabian is given the job of reading the letter, which is sober and serious, and Malvolio is sent for; while he is being fetched, attention turns back to the love-plot, with Orsino offering his hand to Viola; Malvolio arrives and he tells his story; Olivia is shown the letter which originally trapped him, and she explains that it is Maria's handwriting; Malvolio is offered recompense; the moment of potential reconciliation is marred by Feste's spiteful interruption as he quotes Malvolio's own words back at him; Malvolio stalks off with threats against the whole company; Orsino sends somebody off to try and persuade him to a peace; addressing Viola, Orsino promises that they will be lovers when she returns to her female attire. At last, the clown steps forward to sing a final song, with the melancholy refrain ‘And the rain it raineth every day’.

All this in about three hundred and eighty lines!

It is not only the number of different actions within this one scene which is extraordinary (each paragraph of the above amounts to a small scene or routine in itself), but the variety of them, the speed with which they follow on one from another, and the resulting emotional range of the scene. Its tone continually shifts, moment by moment, between intensity and frivolity, violence and tenderness, melodrama and downright farce, celebration and discord, wonder and harshness, laughter and melancholy. It starts with a couple of (by now familiar) clown routines. Antonio's entry picks up the narrative, laying out his part of the story so far in a way which seems to prepare for a dénouement in which all the confusions are unravelled. This is interrupted, though, by the Olivia-Orsino encounter, the climax of another strand of the plot. But far from reaching a resolution, this meeting seems only to complicate things further and threaten the ending with tragedy. These complications are then repeated, but in a different key, as Sir Andrew and Sir Toby pass across the stage. Yet even this tiny scene-within-a-scene contains a sharp tonal shift. It looks as if it is going to be a moment of pure farce; then, without warning, Sir Toby turns to Sir Andrew, insults him, and casts him off with a snarl. The carnivalesque high spirits of their roistering end in a moment of rejection as bitter as that experienced by
The moment at which things do begin to unravel themselves is, of course, the moment when Viola and Sebastian both appear on stage together: from now on, things begin to make sense. Yet some of the surprise value of this moment of revelation was preempted earlier in the play, when Viola first guessed, in Act III Scene iv, that all the confusions were due to her brother's being in Illyria. And then, just as the scene seems set to concentrate on reunions, betrothals and marriages, this, too, is interrupted by the as-yet-unresolved Malvolio plot. The confrontation between Malvolio and his mistress also shifts through a variety of emotional tones, from the comedy of Feste's attempt at 'vox', through the pathos of Malvolio's own account, the offer of reconciliation by Olivia, the interruption of that by Feste, spitefully quoting Malvolio's own words back at him, to the anger of Malvolio's exit. The ending of *Twelfth Night*, in fact, is structured as a series of interruptions. It is this structure which prevents the positive mood of the narrative's romantic-comedy climax from completely dominating the end of the play: the harmony is established and celebrated—but across it can be heard the notes of discord.

Contributing to the same destabilizing effect is the fact that narratives are left unfinished—notably, of course, the Malvolio story itself. Who pursues Malvolio to ‘entreat him to a peace’? With what result? What about the power he still holds over Viola's friend the sea-captain, whose story is so strangely re-introduced in these final moments of the play? Most directly, the audience is left with the question of Malvolio's powerful final threat: what sort of revenge is he envisaging? His exit line contains such a blatant promise of the story's continuance, that if Shakespeare were writing for television or the movies we would assume he was setting up the sequel. But it is not only the Malvolio plot which is left unfinished. The reunion of Viola and Sebastian is not fully celebrated; she says to him:

Do not embrace me till each circumstance  
Of place, time, fortune do cohere and jump  
That I am Viola, which to confirm  
I'll bring you to a captain in this town  
Where lie my maiden weeds.

(V, i, ll. 249-53)

Viola's return to her own female identity is incomplete; unlike Rosalind she never appears on stage again as a woman, and as a result Orsino cannot yet begin to see her as Viola. Even at the very end of the play she is still ‘Cesario’ to him:

Cesario come—  
For so you shall be while you are a man;  
But when in other habits you are seen,  
Orsino's mistress and his fancy's queen.

(V, i, ll. 381-4)

Thus Orsino, like Olivia, leaves the stage without having fully resolved the ambiguities about whom he is actually in love with, and the promised love-relationship between him and Viola is deferred until after the play's ending. Feste's final song trips through a nonsense-version of Jaques' Seven Ages speech, set against the gloomy refrain of wind and rain. Its last stanza perfunctorily shrugs away all the problems and uncertainties of the play’s ending with an insouciant nonsense of its own:

A great while ago the world begun  
With hey ho, the wind and the rain,  
But that’s all one, our play is done,  
And we’ll strive to please you every day.
And so Carnival gives way to Lent, and the play named after the final day of revelling is finally done.

Twelfth Night Literary Criticism (Vol. 62): Criticism: The Ending

[In the essay below, originally published in 1974, Hasler analyzes the influence of Shakespeare's earlier comedies on the last scene of Twelfth Night.]

The final resolution of *Twelfth Night* evolves from a process which engages the whole of the play's last scene. Furthermore, there is no lack of consistent theatrical notation in this scene. Employed with remarkable singleness of purpose, it is instrumental in shaping the build-up towards the strong impact of Viola's revelation. Apart from the unusually extensive control of the action, a study of this ending also invites us to glance back at some features of earlier comedies. The view of *Twelfth Night* as the consummation of Shakespearian comedy is widely accepted. At the same time, few commentators neglect to mention the extent to which Shakespeare here draws on his preceding experiments. Barrett Wendell even went so far as to “recognize the *Twelfth Night*—with all its perennial delights—a masterpiece not of invention, but of recapitulation.” This remark has been much quoted, though it perhaps unduly neglects the transmutations that go with Shakespeare's self-borrowings. Harold Jenkins sums up this particular aspect of *Twelfth Night* when he suggests that

… in however short a time Shakespeare ultimately wrote this play, he had in a sense been composing it during the previous decade.
The final scene begins very quickly. Orsino has decided to go and see Olivia himself. At her house he meets Feste who, irked a little by Orsino's condescension, does a stint of his most artful begging. The mood is relaxed, as so often in Illyria; we get an impression of unlimited leisure and time to jest away. Having exhausted Orsino's bounty, Feste leaves to inform Olivia of her visitor, when suddenly the scene darkens and Viola's trials begin. Antonio is brought in by officers. Viola is first to notice them:

Here comes the man, sir, that did rescue me

V.1.44

she says to Orsino. This is more than the usual formula for putting the spotlight on an actor making his entry. We infer that Viola has obviously told Orsino about the duel Toby inflicted on her. Her reference to that adventure, however, is vague enough to be misunderstood: she thinks of the duel and how this strange seaman got her out of it, but Antonio most likely relates her words to the shipwreck where he rescued Sebastian. To him, her remark sounds like an acknowledgement of their acquaintance, and this can only deepen his grief at her renewed denials later on. As he explains to Orsino why, in spite of the grave risk involved, he exposed himself to “the danger of its adverse town,” he points an accusing finger at Viola:

... A witchcraft drew me hither:
That most ingrateful boy there by your side(5)
From the rude sea's enrag'd and foamy mouth
Did I redeem; ...

70

Antonio very forcefully directs the focus of attention on the young “culprit.” What is more, he “places” Viola at Orsino's side, stressing that at this juncture she is very much the Duke's loyal servant. She is where she most desires to be. This is important in view of the imminent, explosive encounter with Olivia.

Viola's predicament, with Olivia doting on her while she secretly pines for Orsino, is quite enough to have to bear without the puzzling complaints of Antonio. The heavy deictic emphasis is kept up throughout his indictment of the “youth,” and must contribute not a little to Viola's embarrassment.

Did I expose myself, pure for his love,
Into the danger of this adverse town; ...

76

There is no time to investigate the matter further, however. Orsino forgets the moving accents of the seemingly betrayed man when Olivia approaches:

Here comes the Countess; now heaven walks on earth

91

he fatuously exclaims. His hyperbole is too blatantly out of tune with reality: it soon becomes ridiculous in the light of the reception he gets from the Countess, and the childish wrath with which he tries to force her affections. Dismissing Antonio for the time being, he stuns him with his assertion that

Three months this youth hath tended upon me.
Olivia and her attendants are not allowed to obliterate the person around whom everything turns in this scene. Almost immediately “this youth” is back in focus, in preparation for what follows, viz. Olivia’s most astonishing breach of etiquette inspired by her love for Cesario.

Oli. What would my lord, but that he may not have,
Wherein Olivia may seem serviceable?
Cesario, you do not keep promise with me.
Vio. Madam?
Duke. Gracious Olivia—
Oli. What do you say, Cesario? Good my lord—(6)

95

Olivia sees her “husband” at Orsino’s side, still posing, she thinks, as a servant. This sight is enough to make her forget her manners. She begins by addressing Orsino—then she interrupts herself to speak to the page at his side. The baffled Orsino tries to regain her attention, but she is only interested in Cesario. The tension now mounts rapidly, to Viola’s embarrassment. She steadfastly sticks to her rôle as Orsino’s man:

My lord would speak; my duty hushes me.

101

This—almost a rebuke—is all that Olivia gets out of her, and it does not improve the Countess’ temper at all. She adopts a quite unprecedented tone to rid herself of Orsino:

If it be aught to the old tune, my lord,
It is as fat and fulsome to mine ear
As howling after music.

102

Rejected more bluntly than ever, Orsino indulges in positively childish tantrums which, even at this later hour, make one wonder whether he will ever grow up. He elects to try his hand at a new posture, that of “a savage jealousy That sometime savours nobly.” Since Olivia reserves her love for Cesario, he will do away with Cesario:

But this your minion, whom I know you love,
And whom, by heaven I swear, I tender dearly,
Him will I tear out of that cruel eye
Where he sits crowned in his master’s spite.
Come, boy, with me; my thoughts are ripe in mischief:
I’ll sacrifice the lamb that I do love
To spite a raven’s heart within a dove.

119

Viola, still by his side, is ready—“most jocund, apt, and willingly,”—to be sacrificed like a lamb. Olivia now tastes the same bitter cup as Antonio. “Where goes Cesario?” she asks as Viola obediently follows Orsino. Viola’s answer is a passionate declaration of love for the irate Duke, curious enough on the lips of a “youth.” The Countess is brought so low by this that she begins to sound like the adolescent lovers of A Midsummer Night’s Dream in their most plaintive despair:

Ay me, detested! How am I beguil’d!
In her ignorance of Sebastian's existence, let alone of what has occurred between him and Olivia, Viola is bound to appear shamefully, heartlessly, false:

Who does beguile you? Who does do you wrong?

Orsino and “Cesario” have almost disappeared when Olivia finally says the electrifying word that stops them in their tracks:

Whither, my lord? Cesario, husband, stay.

There now develops a tug-of-war between the outraged Duke of Illyria and the injured, deeply disappointed Olivia. They both turn on Viola. Orsino with the vehemence of a nobleman betrayed by his servant (“Her husband, sirrah?”), Olivia lamenting the “baseness” of Cesario’s “fear.” This naturally brings about a visible shift: Viola is no longer at the side of her amazed, incredulous master, but rather half-way between him and Olivia. Duke and Countess both stare at her in disbelief. All eyes, in fact, are on her, the mortified, confused bone of contention. Bernard Beckerman has observed that in the last scene of *Twelfth Night*:

Orsino and Olivia … jointly direct the uncovering of the mystery by calling upon others to act rather than by acting themselves. The focus thus lies between them.7

Between them, until Sebastian appears, stands Viola. Caught in the middle as she is, her situation steadily worsens. In her love of Cesario, Olivia appeals to him to show some manly courage. Ironically, she now actually echoes Maria’s letter to Malvolio urging the steward not to be afraid of greatness:

Fear not, Cesario, take thy fortunes up;

Viola may well begin to doubt her own sanity when the Priest enters. He comes at Olivia’s request to unfold in her words

Hath newly pass’d between this youth and me. ...—what thou dost know

After a glance at “this youth” the Priest promptly asserts that “A contract of eternal bond of love” has indeed been confirmed, attested, strengthened and sealed only two hours ago. The grave Priest’s report, essentially not a narrative but a listing of the symbolic gestures of the formal betrothal, is curiously abstract, drained of all life and devoid of any individualizing details:

A contract of eternal bond of love,
Confirm'd by mutual joinder of your hands,
Attested by the holy close of lips,
Strength'ned by interchangement of your rings;
And all the ceremony of this compact
Seal'd in my function, by my testimony;

753
Since when, my watch hath told me, toward my grave,
I have travell'd but two hours.

150

The whole emphasis is on the awesome solemnity and binding power of the ceremony he performed. Against such testimony Viola is helpless. Meanwhile Orsino has recovered the power of speech, and she has to listen to his wild abuse of her:

O thou dissembling cub! What wilt thou be,
When time hath sow'd a grizzle on thy case?

158

What is worse, he is now quite prepared to give up Cesario, as well as to renounce Olivia:

Farewell, and take her; but direct thy feet
Where thou and I henceforth may never meet.

162

The finality of the closing couplet strongly suggests that Orsino is again on the point of leaving. Viola can only protest, knowing that it is of no avail against the word of the Priest. She follows Orsino in despair:

Vio. My lord, I do protest—
Oli. O, do not swear!
Hold little faith, though thou has too much fear.

164

As “Cesario” walks away from her once again, even the doting Olivia loses patience with him: she interrupts him immediately. The incident causes the three figures to be spaced out more widely across the stage. In view of the sequel it is essential that Viola, in pursuit of Orsino, should move away from Olivia. For one thing, Sir Andrew does not see “Cesario” until he is pointed out to him. What is more, Sebastian does not notice his sister for quite some time. This can only be managed without awkwardness if Viola stands at a sufficient distance from Olivia, quite apart from the symmetrical arrangement of the twins, which also requires some space between them.

This time Orsino is prevented from actually leaving by the comic-pathetic appearance of Sir Andrew with his head “broken,” clamouiring for a surgeon. Like all the preceding arrivals, he has a grievance against Cesario. His case, though, is an amusing variation on this recurrent motif. He is not aware of Cesario's presence—probably he enters with his mauled head bent down. He also assumes that everyone knows whom he is talking about:

Oli. What's the matter?
Sir And. Has broke my head across, and has given
Sir Toby a bloody coxcomb too.

168

Olivia therefore has to ask “Who has done this, Sir Andrew?” and on hearing that it was “The Count's gentleman, one Cesario,” it is Orsino's turn to be amazed. After all, he has long ago declared that “Diana's lip Is not more smooth and rubious” than that of his lovely page, whose whole person “is semblative a woman's
part.” It is therefore with understandable scepticism that he makes sure:

My gentleman, Cesario?

Sir Andrew's reaction indicates that Orsino incredulously points to “Cesario” as he asks the question. The effect on Aguecheek is quite spectacular:

Od's lifelings, here he is! You broke my head for nothing; ...

The foolish knight recoils from the mere sight of Viola—what could be more incriminating? But there is more to come. The pace accelerates as new accusers turn up at ever shorter intervals. Aguecheek is followed by Sir Toby. In contrast to Sir Andrew, he is above—or past—complaining. In answer to Orsino's questions, he will only say:

That's all one; has hurt me and there's th' end on't ...

He can walk only slowly, with difficulty. He has overheard Sir Andrew berating Cesario:

If a bloody coxcomb be a hurt, you have hurt me

before he is near enough to be noticed by his friend: “Here comes Sir Toby halting …” For once there is no accusing finger for Viola. Toby seems too overwhelmed with the fact that the stripling was equal to hurting him—there is certainly no more than a tired nod in the direction of Viola.

This is the last we see of these knights, for Olivia promptly sends them off to bed. The striving for symmetry begins to make itself felt. The two votaries of cakes and ale have played their part; there is no room for them in the final tableau. Moreover, at this stage any confrontation between Toby (or Maria) and Malvolio must be avoided.

While the audience is aware that Sebastian is somewhere about Olivia's house, and bound to turn up sooner or later, Viola has gone from bad to worse. She is caught in a maze from which it must seem to her impossible to extricate herself. On an increasingly crowded stage she finds herself surrounded by accusers. Surveying the portion of the scene we have so far discussed, we see that it definitely belongs to Viola. Until Sebastian's entrance baffles all, Shakespeare consistently keeps the focus of attention on her, in spite of the fact that she has little to say. The situation and the technique employed are reminiscent of Hero's arraignment in church. As in the case of Hero, of course, everybody talks about Viola. She is the target of a general wrath. We have seen how at every stage, the gestic impulses of passionate address, and especially the gestic force of that basic tool, the demonstrative, help to keep Viola at the calm centre of the tornado. The others make all the noise, but while they come, have their say, and then make room for the next plaintiff, Viola remains, always involved, always concerned.

A comedy, in the words of Harold Jenkins, “is a play in which the situation holds some threat of disaster but issues in the achievement of happiness.” This may remind us more immediately of the merchant Antonio or
of Aegon. In *Twelfth Night* the concrete threats against Viola do not materialize before the finale. Viola's experience here is not unlike that of Isabella. In *Measure for Measure* it is the accuser who goes through an ordeal until at last she is taken seriously, listened to, and then vindicated by Mariana's and ultimately the Duke's own testimony.

It is instructive to examine the way in which Viola's ordeal is given its dramatic form. We have observed how every new arrival brings his own, incomprehensible accusations. J. L. Styan has briefly surveyed this technique of “successive entrances” from *Henry VI* to *King Lear*. The ending of *Twelfth Night* he views primarily in terms of control. At the end of *As You Like It* and *Twelfth Night*, he says, Shakespeare orders a crowded stage for a scene of artificial symmetry, the visual pattern acquiring some of the qualities of tableaux. Yet Shakespeare had also to overcome the disadvantage of the confusing impact of a full stage …

One method of controlling the action was to fill the stage by a mechanical procession of entrances. The spectator's attention is taken by each new figure and each new voice.

The final scene of *Twelfth Night* blends this technical advantage of successive entrances with the purpose the device serves in the histories and tragedies, when a series of messengers with progressively worsening news creates a feeling of calamity and imminent doom, or tests the endurance of the hero. We can now see that the passage under review represents an elaborate adaptation of that pattern to the needs of comedy. The mere messengers have been replaced by important figures with whom we are well acquainted, and who all confront the treacherous youth of their imagination in their own characteristic way: the honest, devoted “pirate” Antonio meets Cesario with forthright indignation at his ingratitude; the noble, enamoured Olivia with more restrained, yet deep disappointment; Aguecheek with undisguised terror, Toby still bemused with the shock of being beaten by the young stripling of a gentleman. Furthermore, there is of course a final entrance, Sebastian's, which sets things right again.

An incidental, comic adaptation of the same pattern in its basic form occurs in *The Merry Wives of Windsor*. Dr. Caius and Evans revenge themselves on the Host of the Garter: one after the other, in a sequence bluntly pre-arranged, Bardolph, Evans and Caius appear like messengers at the door, just long enough to shout their increasingly alarming news about the “Germans” who have stolen the Host's horses. There is another succession of entrances, again comically calamitous, at the end of the play. Here, Page and his wife are both thwarted by a counter-plot of their daughter Anne. Slender, Master Page's favourite choice for Anne, first returns with a tale of woe: his white fairy turned out to be “a great lubberly boy.” No sooner has Mistress Page explained the misfortune by revealing her own stratagem in favour of Caius, than the doctor bursts on the scene in one of his rages: the fairy in green was a boy too. Now the successful Fenton brings in his Anne to ask pardon of his good father and mother. To our delight, the parental plotters are outplotted, but we are also pleased to see that resentment is remarkably short-lived.

Earlier, in the finale of *The Taming of the Shrew*, Shakespeare had used a witty inversion of the successive entrances pattern. There the wager between the three husbands causes them, one by one, to send for their wives. Now it is precisely the non-appearance of the first two wives that spells disaster. Lucentio “bids” his mistress to come to him, but Biondello returns alone. Hortensio, though he cautiously “entreats” the widow to come, fares no better: Biondello has only a defiant message for him. Thus the effect is all the more breathtaking when Kate, “commanded” to come, appears in the doorway:

*Bap.* Now, by my holidame, here comes Katherina!

*TS V.ii.99*
In these cases, as in Twelfth Night, the series of entrances strikes us as a formal pattern of more or less transparent artificiality. The sequence works towards a final, important effect. This is not the same as, for instance, the entirely “natural” yet carefully spaced-out returns of Portia and Bassanio, each preceded by a harbinger, from Venice to Belmont.

As Toby and Aguecheek limp away, attended by Feste and Fabian, Sebastian hurries in. There is no time for anyone to mirror his approach, as had been done in the case of Antonio, Olivia and Toby. Yet his is surely the most effective entrance of them all. Eager to justify himself to Olivia, he makes straight for her, ignoring everyone else. This partly explains why he does not notice Viola at first. His entrance, of course, is the one that will undo all the confusion caused by the preceding ones. It sheds light on everything at a stroke. Nevertheless, before meeting his sister, he is made to settle very quickly the various questions, one by one. Almost every line he speaks solves a problem. As the audience knows everything already, no time is wasted in dwelling on this, and Sebastian cannot ignore Viola too long without artificiality.

I am sorry, madam, I have hurt your kinsman.

V.i.201

His apology solves the mystery of Toby's “hurt.” The contrite offender mirrors Olivia's consternation at the sight of this second Cesario:

You throw a strange regard upon me, and by that
I do perceive it hath offended you.

204

His next words confirm the Priest's account of a secret betrothal:

Pardon me, sweet one, even for the vows
We made each other but so late ago.

206

Olivia must begin to grasp that this is her husband. Next, he recognizes a familiar face, and his most affectionate greeting disposes of the riddle which has so oppressed Antonio:

Antonio, O my dear Antonio!
How have the hours rack'd and tortur'd me
Since I have lost thee!

210

Full of joyful emotion himself, Sebastian still spreads nothing but amazement around him. As with Olivia, Sebastian notices the extreme astonishment of Antonio, and again he misunderstands it:

Ant. Sebastian are you?
Seb. Fear'st thou that, Antonio?

213

For Olivia, Orsino, Antonio and Viola everything falls into place in the whirlwind of Sebastian's entrance. His preoccupation with Olivia and then with Antonio must be quite intense and passionate to keep him from noticing Viola. At the same time it is quite likely that the spectators—who do not need to be
enlightened—will not give Sebastian's words their full attention. They are inevitably absorbed by the visual impact of the twins, simultaneously present for the first time. Orsino and Antonio draw our attention to this very emphatically:

One face, one voice, one habit, and two persons!
A natural perspective, that is and is not.
How have you made division of yourself?
An apple cleft in two is not more twin
Than these two creatures. Which is Sebastian?

Both stress the stage-picture created by the resemblance of brother and disguised sister, Sebastian very animated, Viola transfixed. These baffled reactions are not meant as “asides.” At the very moment when Orsino speaks, Sebastian discovers his friend Antonio; it looks as if he is too rapt to heed the strange talk about a “natural perspective.” In contrast to this he does listen to Antonio's stunned comment, and prompted by the deictic “these two creatures” he finally becomes aware of Viola.

When their eyes meet at last, the result is an immediate slowing down of the pace, even a momentary halt, very effective after the tempo sustained since Sebastian's exciting entrance.

Seb. Do I stand there? I never had a brother;
Nor can there be that deity in my nature
Of here and everywhere. I had a sister
Whom the blind waves and surges have devour'd.

There follows the exquisitely beautiful duologue in which the twins gradually identify each other. Their meeting having been put off until now, the positive recognition, viz. the revelation of Viola, is thus further delayed. They are not allowed to race into each other's arms. Nevill Coghill has an excellent passage describing why a delayed recognition can be so particularly moving. He rightly stresses the visual element in this:

It is in the delay that we taste the recognition most feelingly: for with our eyes we see that a longed-for thing is about to happen, even before it has begun: we see the certainty of a joy to come, delayed in order to prolong the thrill of having it in prospect. This is an experience in art that I think can most feelingly be given through the medium of theatre …

As to the peculiar delicacy and restraint of the twins' duologue, Alice Shalvi has observed how

the use of the third person in their mention of Viola is a beautifully subtle method of indicating the way in which neither wants to be overwhelmed by emotion, even while it excellently conveys the emotion that is pent up, and implied by, their words.

As regards gesture and grouping, Viola's speech concluding the recognition-passage is particularly interesting:

If nothing lets to make us happy both
But this my masculine usurp'd attire,
Do not embrace me till each circumstance
Of place, time, fortune, do cohere and jump
That I am Viola; which to confirm,
I'll bring you to a captain in this town,
Where lie my maiden weeds; by whose gentle help
I was preserv'd to serve this noble Count.
All the occurrence of my fortune since
Hath been between this lady and this lord.

241

The desire to withhold the inner surge of joy until the last shadow of a doubt has been removed is most clearly
in evidence when Viola requests her brother not to embrace her. This however seems to pose a real problem in
performance. Whereas scholars may easily take Viola's words at their face-value, there are few producers who
can deny their Sebastian the emotional relief of a brotherly embrace. Alice Shalvi, pursuing her theme of
restraint, finds it significant that

Shakespeare even makes Viola delay her brother's happy embrace until she shall have
abandoned her doublet for a gown, and the same is true of her betrothal to Orsino.16

This is very persuasive, and soundly based on the text. Yet when it comes to producing the scene, Viola's
cautious reserve seems to overtax our strength and even to border on the unnatural. The principle of
postponing the happy celebrations is here driven to its limits. Producers must feel that before Sebastian can
turn to Olivia to stress the lighter side of what has occurred,

So comes it, lady, you have been mistook,

251

“each circumstance …” has surely cohered and jumped. In accordance with this, the beginning of Viola's
critical sentence tends to get slurred over, while the end, “That I am Viola,” is detached from the rest as much
as possible and given the special emphasis of a solemn affirmation.

In Viola's concluding line Shakespeare again hints at the intended stage-picture. During much of the scene,
when she was the bone of contention, and again now, when the twins meet at the centre of the stage, Viola has
been placed between “this lady and this lord.” The dangers inherent in her false position between Orsino and
Olivia had only been latent before this final scene. Now it has all come to a head. Viola's place on stage
therefore symbolizes the “occurrence” of her fortune since she came to Illyria, her ambiguous rôle as a
go-between

... between this lady and this lord.

250

Her last words contain a strong gestic impulse to stress her position in the danger zone between the two proud,
noble personages, at the very point when this scenic image is about to be replaced by a new constellation.
After the arrival of Sebastian and the ensuing revelation of Viola, the happy, permanent equilibrium of two
couples is substituted for the uneasy, precarious symmetry of the triangle.

Sebastian, as we have seen, is a resolving figure par excellence, since his mere entrance at the right moment
disposes of all the confusions at a stroke. To achieve this startling effect, Shakespeare exploits a theme he has
introduced into the play only at a very late stage. Harold Jenkins has pointed out that in Twelfth Night the
dramatist “is, in fact, combining the plots of The Two Gentlemen of Verona and The Comedy of Errors”:

He does not, however, combine them in equal degree. The heartsick heroine who in page's
disguise takes messages of love to another woman provided little more than an episode in the
complicated relations of the two gentlemen of Verona; but in Twelfth Night this episode has
grown into the central situation from which the play draws its life. On the other hand, the confusion of twins which entertained us for five acts in *The Comedy of Errors* appears now as little more than an adroit device to bring a happy ending.\textsuperscript{17}

This hardly overstates the case. The theme of mistaken identity only begins to make its contribution when Sebastian and Antonio have at last found their way to the capital of Illyria. From the first, of course, there is the similarity in the shipwreck stories of *The Comedy of Errors* and *Twelfth Night*, but not before III.iv. does Antonio mistake Viola for Sebastian. In IV.i. Feste for his part believes Sebastian to be Viola. Sebastian's exasperation on that occasion recalls the atmosphere of Ephesus:

Are all the people mad?

*TNIV.i.26*

he exclaims, in a mood of frustration not unlike that of the Syracusan Antipholus when he concludes that

There's none but witches do inhabit here.

*CEIII.ii.154*

In line with Jenkins' observation, however, most echoes of *The Comedy of Errors* occur in the last scene. Antonio's sad experience reminds us most strongly of Shakespeare's first comedy. Like Ategon, he believes himself shamefully betrayed by one he loves.\textsuperscript{18} Just as Duke Solinus of Ephesus confounds Aegeon:

I tell thee, Syracusan, twenty years
Have I been patron to Antipholus,
During which time he ne'er saw Syracusa,

*CEV.i.325*

so Duke Orsino of Illyria reduces Antonio to silence with an unanswerable rebuttal:

...—fellow, thy words are madness.
Three months this youth hath tended upon me—...

*TNV.i.92*

At the point when everyone stands amazed by the likeness of the twins, there is even a literal echo. Duke Solinus, beholding the Dromios and Antipholuses together, had wondered:

One of these men is genius to the other;
And so of these. Which is the natural man,
And which the spirit? ...

*CEV.i.331*

Pointing at Sebastian in disbelief (“So went he suited”) Viola says to Sebastian her brother:

Such a Sebastian was my brother too;
So went he suited to his watery tomb;
If spirits can assume both form and suit,
You come to fright us.
Yet even such a verbal parallel in a similar situation does not necessarily imply the simple repetition of an old idea. In *Twelfth Night*, “spirit” takes on an additional meaning: it is beyond a Dromio or Antipholus to answer, like Sebastian:

```
A spirit I am indeed,
But am in that dimension grossly clad
Which from the womb I did participate.
```

Solinus thinks in terms of *genius* as the attendant spirit of a man, Viola at first fears she has to deal with her brother’s “ghost” returned from the grave, like a Hamlet senior or a Banquo, and Sebastian uses the same word to refer to his immortal soul.

Olivia now faces her real husband, and it is all visibly too much for her. Orsino reassures her with new-found consideration and sympathy:

```
Be not amaz'd; right noble is his blood.
```

Then it is time for him to grapple with the changed situation himself, to address himself to the newly revealed Viola. Whereas Sebastian, having served his turn, is heard of no more, the fate of his sister remains the central concern of the audience. Orsino now gives the first, veiled, and as yet conditional intimation of his intentions towards the girl:

```
If this be so, as yet the glass seems true,
I shall have share in this most happy wreck. (19)
```

Though he could easily be more specific, his meaning is obviously in the spectators' mind when he now faces Cesario/Viola. Addressing her still as a “boy,” he reminds her of her former pledges which, now he knows she is a woman, take on a new significance:

```
Boy, thou hast said to me a thousand times
Thou never shouldst love woman like to me.
```

This gives Viola her second opportunity to express the full depth of her love for him. His response to her fervent and solemn declaration is ambiguous, to say the least: his gestic reaction may give her hope, but his words are strangely guarded and reserved.

```
Give me thy hand;
And let me see thee in thy woman's weeds.
```

Now as before, the writing focuses on Viola. Explicit gestic notation, such as Orsino's imperative (“Give me thy hand”) invariably refers to her. In contrast to this, we do not know what is going on between Olivia and
her husband. In their case, everything is already settled, whereas Orsino quite understandably needs some time to adjust himself: he cannot transfer his affections from Olivia to Viola too fast, or he risks appearing in too comic a light. It is almost as if he reserved his position until he knows whether Viola's true “outside” can charm him as her male disguise had charmed Olivia. The awkwardness of his situation must explain the discrepancy between his instinctive gesture and his noncommittal words.

Nevertheless, things seem to be drawing to a close. Yet there is still that other matter, the strange frenzy of Olivia's steward, who even now languishes in the “dark house.” Orsino's reference to her “woman's weeds” reminds Viola of the captain with whom she left her things in I.ii. That self-same sea-captain, she reveals, “Is now in durance, at Malvolio's suit …” This—Viola's last speech, by the way—in turn reminds Olivia of her steward. The New Cambridge Shakespeare notes that “we have heard nothing before of this lawsuit” and explains: “it is Shakespeare's device for bringing Malvolio back upon the scene.” Yet Shakespeare goes out of his way to show that he does not need the mysterious lawsuit to bring Malvolio back. Before Olivia can even send for the “madman,” Feste comes in, unbidden by anyone, with Malvolio's letter of complaint. Enter Clowne with a letter, and Fabian, as the Folio direction puts it. Evidently there must be some other point to this curious coincidence which led to a case, “Malvolio vs. Captain.” Our recollection of the trusty Captain and of Viola's high opinion of him engages our sympathies on his side. The wrong done to Malvolio, on the other hand, will shortly be so much emphasized that we might mistakenly conclude he was more sinned against than sinning. So Clifford Leech may well be right with his reading:

It is evident that the ambitious steward has exercised authority with a long arm: our realization of that moderates our pity for him.

A sizeable section of the scene is now set aside for the conclusion to the Malvolio-intrigue; the upshot, however, will be that it cannot be truly concluded at all. Olivia and the gull himself must at least learn what really happened. Fabian, who was not among the instigators, is the ideal man to tell them. Viola has had no part in all this, yet Shakespeare does not allow her to be totally eclipsed for such a long time. Having heard Malvolio's letter, Olivia sends for him. While we are waiting, she uses the lull to attend to her own business:

My lord, so please you, these things further thought on,
To think me as well a sister as a wife,
One day shall crown th'alliance on't, so please you,
Here at my house, and at my proper cost.

303

Some reflection has taught her that there is really nothing left to prevent her and Orsino being friends. She moves towards reconciliation. At the same time, she already deals with an important point which is normally part of the closing-speech: she will arrange for the festivities to come. She foresees a double marriage: a curious feature of her speech is the request to Orsino

To think me as well a sister as a wife.

304

She hopes she will be no less acceptable to him as a sister-in-law than she would have been as his wife. Yet Orsino, as we have seen, has not really committed himself to Viola as yet. Could it be that Olivia, sympathizing with Viola in her predicament, indulges in a bit of gentle prompting on behalf of the girl she once fell in love with? If so, it certainly works: Orsino briefly thanks her and then again turns to Viola:

Your master quits you; and, for your service done him,
So much against the mettle of your sex,
So far beneath your soft and tender breeding,
And since you call'd me master for so long,
Here is my hand; you shall from this time be
Your master's mistress.

Now he no longer speaks to “Cesario.” He recognizes and indeed stresses her womanhood and her noble birth, acknowledging all she has done for him. This is not without irony when we remember the vanity with which he used to pontificate about the inferiority of a woman's love to that of a man. He repeats his former gesture, and even here the change from “Give me thy hand” (264) to “Here is my hand” is surely significant. It looks more like a pledge this time—and he comes out with a well-nigh unequivocal proposal. In the case of Viola, we know very well that the Duke's proposal is welcome, but no more than Isabella in Measure for Measure is she permitted to respond. We never hear another word from her after her mention of Malvolio's suit against the Captain. Perhaps the promise in Orsino's words makes her speechless, but there is also the fact that “the madman” now comes in, escorted by the ever-useful Fabian. The investigation of Malvolio's misadventure is resumed.

This short interlude (from Fabian's exit to his return with the steward) inserted into the segment devoted to Malvolio helps to achieve two important effects. It has a bearing on Orsino's switch from Olivia to Viola, which requires to be handled with delicacy and tact. The interlude is a device which allows the change to be effected in three evenly spaced-out steps, so that it appears like a gradual process which is not truly completed even at the end of the play, while assuring us of Viola's future happiness. The other consequence of this insertion concerns Malvolio and his influence on the mood of the ending: many things usually left until the end are already settled before Malvolio enters, so that very little will be left for Orsino's closing-speech. As a result, the totally unreconciled, defiant exit-line

I'll be reveng'd on the whole pack of you

hits the audience as late as possible, only ten lines before everyone else withdraws too, leaving us alone with Feste and his epilogue-song. This harsh and jarring note, placed where it has maximum effect, justifies the view that “the most interesting thing in Twelfth Night is its ultimate drawing back from a secure sense of harmony.” Malvolio's last words reverberate in Olivia's sympathetic reaction:

He hath been most notoriously abus'd

which is doubly effective because it echoes Malvolio's first, solemn (if mistaken) accusation when he came in:

Madam, you have done me wrong,
Notorious wrong.

The sorry business is even allowed to spill over into Orsino's closing-speech:

Pursue him, and entreat him to a peace;
He hath not told us of the captain yet.
It is remarkable how consistently Shakespeare discourages too simple, black-and-white judgements of the issue. In referring to the Captain, Orsino provides an immediate corrective to Olivia's sympathy for her steward. We may already have winced at the word “pack,” and now, lest we feel too much pity, we are further reminded of the nasty streak in Malvolio. With the steward in the “dark house,” Maria's jest has no doubt gone a little too far, but on the other hand Malvolio himself is apparently quite prepared to put decent men in prison. It will not be easy to placate him, but Orsino will at least try.

Even if we avoid the gross mistake of turning Malvolio into a tragic figure, his appearance in V.i. is bound to have a sobering effect on the play's ending. With his furious departure, however, his person at least is removed from sight before the actual conclusion. Shakespeare continues to tidy up the stage for the final speech when Orsino says:

Pursue him, and entreat him to a peace.

Though there is no stage-direction in the Folio, and modern editors refrain from supplying one, it would look absurd if no one stirred at Orsino's command. No doubt the invaluable Fabian, perhaps with one or more of Orsino's men, leaves in pursuit of the “madly-us'd” Malvolio: When therefore Orsino closes the play, the two couples have to share the stage only with Antonio and Feste, who are at a respectful distance with attendants, officers, and possibly the Priest.

After all the thoughtful preparation by Olivia, there are no loose threads left for Orsino to tie up:

He hath not told us of the captain yet.
When that is known, and golden time convents,
A solemn combination shall be made
Of our dear souls. Meantime, sweet sister,
We will not part from hence, Cesario, come;
For so you shall be while you are a man;
But when in other habits you are seen,
Orsino's mistress, and his fancy's queen.
[Exeunt all but the Clown.]

Even at the very end Orsino's tone remains singularly subdued. However beautiful his phrase about “golden time,” he still rather ungraciously insists on checking the truth of Viola's story. We, the audience, shall of course never know the circumstances which delivered the Captain into the power of Malvolio. When Orsino knows, and when Viola sheds her disguise, the marriage will take place. In looking forward to the consummation of Viola's desires, Orsino speaks almost with the gravity of the Priest: “A solemn combination Of … souls” will be made. He avoids all mention of “triumphs,” “mirth,” “revels” or “jollity.” We are not invited, as in earlier comedies, to think in terms of merry-making festivity.

Then he addresses Olivia, and one short sentence now suffices to set all things aright between them. In calling her “sweet sister,” taking up her own word of l.313, he accepts her offer of friendship together with the invitation to stay at her house. “Cesario, come” prepares the imminent departure: most likely he takes her by the hand a third time. He will lead her out. Orsino and Viola leave as a couple, like Olivia and Sebastian. Nevertheless, his restraint keeps the upper hand to the end:

... Cesario, come;
For so you shall be while you are a man.
The last time he spoke to her, he had been mindful of her “soft and tender breeding,” now he playfully reverts to treating her according to her male disguise. Only the final couplet reassures us that Viola will reap her reward. Orsino reiterates his proposal in much the same terms as he had used before:

But when in other habits you are seen,
Orsino's mistress, and his fancy's queen.

In keeping with the theatrical notation throughout the scene, the place of honour belongs to Viola. Orsino's final gesture is addressed to her, and so are the last words of the play.

Notes

1. There has been little change in this since H. B. Charlton, in his *Shakespearian Comedy* (London, 1938) discussed the play, together with *Much Ado About Nothing* and *As You Like It*, in a chapter entitled “The Consummation.”
4. Duke. Belong you to the Lady Olivia, friends?
   Clo. Ay, sir, we are some of her trappings.

5. Italics mine throughout this chapter.
6. Whereas the *New Variorum* edition (1901) says this “probably accompanied by a gesture to the Duke to keep silent and let Cesario speak” (l. 110, n., p. 286), it has become “a polite request to Orsino to let Viola speak first” in M. M. Mahood's *New Penguin* edition of 1968 (l. 104, n., p. 180). The distinction may be a nice one, but Olivia's next speech rather indicates that she is beyond making polite requests.
8. In *The Two Gentlemen of Verona*, Speed and Launce never make it to the forest of the outlaws. In *A Midsummer Night's Dream* the mechanicals are withdrawn first, to make room for Theseus' closing-speech and the incantations of the fairies. In *The Merchant of Venice* Launcelot Gobbo only just fleets across the stage, announcing the return of Bassanio. Even this brief intrusion into Belmont has been much resented. In *Much Ado About Nothing*, Dogberry is remunerated and firmly dismissed before the last scene begins. The elimination of Sir Andrew and Sir Toby has thus numerous precedents. While clowns are withdrawn, however, the fool will return. Feste has a word to say to Malvolio, and he is even entrusted with the epilogue-song. Similarly, *As You Like It* has room for Touchstone and his Audrey.
9. Jenkins, p. 73. One cannot help suspecting that Orsino's extravagant threat to kill Cesario owes something to the desire to frighten us with a sufficiently lurid disaster. Northrop Frye's statement that “comedy contains a potential tragedy within itself” also comes to mind here: “Even in New Comedy, the dramatist usually tries to bring his action as close to a tragic overthrow of the hero as he can get it and reverses his movement as suddenly as possible.” “The Argument of Comedy,” in *Essays in Shakespearian Criticism*, ed J. L. Calderwood and H. E. Toliver (Englewood Cliffs, 1970), p. 53.
12. Styan, p. 111, shows the ultimate refinement of this method in *Lear*, I.i.v., where “the succession of
entrances is used to ... jar upon the nerves of the hero, each entrance a signal for the redoubling of his fury.”

17. Jenkins, p. 73.
18. Aæge. ... but perhaps, my son,
   Thou sham’st to acknowledge me in misery.

*CEV*.i.320

Ant.
Not meaning to partake with me in danger,
Taught him to face me out of his acquaintance,
And grew a twenty years removed thing
While one would wink; ...

*TNV*.i.80

19. The central position of *Twelfth Night* in Shakespeare's work and the peculiar wealth of this play are both illustrated by the fact that while it harks back to his first comedy, it also looks forward to his last plays. Viola's Tempests are kind, and salt waves fresh in love!

*III.iv*.368

and Orsino's reference to “this most happy wreck” evoke an idea which is central to *Pericles* and important in *The Tempest*. Likewise, the delayed recognition between Viola and Sebastian looks like a sketch for the much more protracted, almost painfully moving reunion of Pericles and Marina in *Pericles*, V.i.

21. See I.ii.47:

There is a fair behaviour in thee, Captain;
And though that nature with a beauteous wall
Doth oft close in pollution, yet of thee
I will believe thou hast a mind that suits
With this thy fair and outward character.

23. Malvolio's appearance in V.i. is so important to Shakespeare that he breaks one of his rules. The audience is informed of what it already knows. However, we are rewarded with a piece of authentic, and welcome, news: Toby has married Maria after all.
24. H. H. Furness, in the *New Variorum* edition (1901), l.333, n., p. 308, sees her motive as somewhat more selfish. According to him, Olivia “wishes to silence the Duke's importunities for ever, by marrying him to Viola.” Since Olivia is as good as married to Sebastian, however, it would appear that Orsino is already silenced.
25. Leech, p. 38. In earlier comedies, villains and others who threaten to jeopardize the sense of harmony are either removed long before the end (Shylock), or converted and then allowed to participate in the happy ending (Oliver), or we hear that they will be duly punished (Don John). Some remove themselves because they cannot abide what others call happiness (Jaques). Malvolio is in a quite different category. His case produces a much more subtle effect, as Clifford Leech points out in his account of the peculiar uneasiness we sometimes feel in Illyria:
To put Malvolio on a tragic level is to disregard the general effect of his appearance on the stage: rather, he is one of those comic figures at whom it is too easy to laugh, so easy that, before we know it, we have done harm and are ashamed.

(“Twelfth Night” and Shakespearian Comedy, p. 44).

Even if we add to this the agonizing experience of Antonio, for example, it remains an exaggeration to maintain that “the predominant mood” in Twelfth Night is “one of suffering.” (Shalvi, p. 168). When Malvolio is on stage in V.i., we may be disturbed even while the theatre echoes with our laughter. A comparable incident, though much less disturbing, is Dr. Caius' furious departure at the end of The Merry Wives of Windsor. He too voluntarily withdraws from the festive community, and storms out with the cry: “… be gar, I'll raise all Windsor.” (V.v.198). His exit has however no appreciable effect on the good humour of the ending. It is eclipsed by the generous rehabilitation of Falstaff, the “villain” who threatened the social order of Windsor. Once he is punished and even turned into a victim by the vicious “fairies,” he is invited to Mistress Page's “country fire.”

**Criticism: Gender Issues: Lisa Jardine (essay date 1992)**

[In the following essay, Jardine examines the treatment of crossdressing in Twelfth Night, as well as the relationship between economic dependency and sexual availability in early modern England.]

Viola: He nam'd Sebastian. I my brother know
Yet living in my glass; even such and so
In favour was my brother, and he went
Still in this fashion, colour, ornament,
For him I imitate.

(3.4.389-93)²

[Ingling Pyander]
Walking the city, as my wonted use,
There was I subject to this foul abuse:
Troubled with many thoughts, pacing along,
It was my chance to shoulder in a throng;
Thrust to the channel I was, but crowding her,
I spied Pyander in a nymph's attire:
No nymph more fair than did Pyander seem,
Had not Pyander then Pyander been;
No Lady with a fairer face more grac'd,
But that Pyander's self himself defac'd;
Never was boy so pleasing to the heart
As was Pyander for a woman's part;
Never did woman foster such another,
As was Pyander, but Pyander's mother.
Fool that I was in my affection!
More happy I, had it been a vision;
So far entangled was my soul by love,
That force perforce I must Pyander move:
The issue of which proof did testify
Ingling Pyander's damnèd villainy.

O, so I was besotted by her words,
His words, that no part of a she affords!
For had he been a she, injurious boy,
I had not been so subject to annoy.(3)

This paper\(^1\) tries to accommodate some of the apparently contradictory currents stirred by these two cross-dressing passages, to provide a single, coherent version of the erotic possibilities contained under a kind of rubric of transvestism in the early modern period. For, in the current text-critical literature, we seem to be being told both that these are texts of sexual fantasy, disturbing and transgressive, and that these texts record some ‘actual’ possibility for individualized, subversive affirmation of sexuality.\(^4\) I do not myself believe we shall ever know how many cross-dressed youths and young women were to be found on the streets of London around 1600, but I do believe that it is possible to show that the distinctive ways in which the textual imputation of their existence function in the various narratives which have come down to us can be resolved into a consistent positioning of dominant to dependent member of the early modern community.\(^5\)

I have, of course, spoken about cross-dressing before, in Still Harping on Daughters (Jardine 1983). But that was in the context of an argument specifically focused on the irrelevance of any detectable emotional intensity associated with the cross-dressed boy-player to any reconstruction, on the basis of the drama of the age of Shakespeare, of a peculiarly female early modern intensity of feeling. Here my argument will be differently focused: upon the way in which, in the early modern period, erotic attention—an attention bound up with sexual availability and historically specific forms of economic dependency—is focused upon boys and upon women in the same way. So that, crucially, sexuality signifies as absence of difference as it is inscribed upon the bodies of those equivalently ‘mastered’ within the early modern household, and who are placed homologously in relation to that household's domestic economy. Inside the household, I shall argue, dependent youths and dependent women are expected to ‘submit’, under the order of familial authority, to those above them. And the strong ideological hold of the patriarchal household ensures that, in the space outside the household—in the newer market economy whose values govern the street and the public place—the tropes which produce structural dependency as vulnerability and availability are readily mobilized to police the circulation of young people.

Outside the household, the freely circulating woman is ‘loose’ (uncontained)—is strictly ‘out of place’,\(^6\) and her very comeliness in conjunction with her unprotectedness (no male kin with her) signifies as availability (as it continues, residually, to do today). And outside the household the dependent boy (the ‘youth’) is also constructed, via the patriarchal household, as ‘at risk’—more legitimately in transit on ‘business’, but also, in his transactional availability, sexually vulnerable.\(^7\) In the street, the bodies of the boy and the unmarried woman elide as they carry the message of equivalent sexual availability—male and female prostitution is represented textually (and probably fantasized communally) as transvestism. The boy discovered as a girl reveals her availability for public intercourse; the girl dis-covered as a boy reveals that intention to sodomy for financial gain.\(^8\) The boy who walks the street cross-dressed as that comely girl (whether in reality or in fantasy/grotesque fiction) does not, therefore, misrepresent himself—he conceals (and then reveals) the range of sexual possibilities available. The girl who enters the male preserve (ordinary, tavern or gaming-house) cross-dressed does not misrepresent herself, either. She is, in any case, ‘loose’, and eases the process of crossing the threshold into the male domain—controls the manner of presenting herself in a suitable location for paid sex.\(^9\)

I suggest that the way in which dependency functions in relation to representations of the sexual in early modern English culture is vital to a suitably historicized reading of cross-dressing and gender confusion in Elizabethan and Jacobean drama.\(^10\) Here I shall try to show this set of relations in operation in the complex gender doubling and twinning of Shakespeare's Twelfth Night.

‘The household was the classic form of patriarchy’, writes Alan Bray (1982: 51). In the period with which we are concerned, ‘family’ and ‘household’, as descriptions of the ordered unit for communal living, designate
groupings which include both close and distant kin, and a range of non-kin. There is a constant ‘drift of young persons’ (as David Herlihy calls it), a flow of young adolescents into and out of the wealthier households—both of distant kin, and of non-kin in ‘service’. And, in addition to the body of young well-to-do dependents in the wealthy household, there were numbers of adolescent servants: ‘The great majority of the adolescent population probably entered some form of service or apprenticeship’, writes Ralph Houlbrooke. In Ealing, in 1599, about a quarter of the total population of 427 was in service of some kind (1984: 173). Of the eighty-five households in Ealing, ‘a staggering 34.2 per cent of them contained one or more servants’ (Bray 1982: 50-1). Finally, ‘in the upper and middle ranks of society children were commonly sent away from home to another household’ (Houlbrooke 1984: 150), as part of their education. (Whilst they resided in Calais, the Lisles placed two of their daughters with French families of a wealth and status corresponding to their own (St Clare Byrne 1985: 126-7). ‘The patriarchal household with its servants was an institution that touched the lives of an immense number of people’ (to quote Bray again); ‘it was an institution that necessarily influenced the sexual lives of those who lived within it’ (1982: 51). That patriarchal household exercised its considerable authority and wielded its extensive economic power predominately over young men and women between the ages of 14 and 24.

It is against this kind of background that Susan Amussen locates patriarchal authority at the most fundamental levels of consciousness-formation in the period:

[The catechism] asserted that the family was the fundamental social institution, and that order in families was both necessary for and parallel to, order in the state. In the catechism, this idea is developed in the discussion of the Fifth Commandment, to ‘honour thy father and mother’. The 1559 Prayer Book's catechism … summarized …

My duty towards my neighbour is to love him as myself, and to do to all men as I would should do unto me: to love, honour, and succour my father and mother: to honour and obey the King and all that are put in authority under him: to submit myself to all my governors, teachers, spiritual pastors and masters: to order myself lowly and reverently to all my betters: … to learn and labour truly to get mine own living, and to do my duty in that state of life unto which it shall please God to call me.

(1988: 35-6)

In the middle to upper ranks of society, deference and submissiveness were internalized in the form of ‘good manners’:

In a society in which service was the most important avenue to advancement at all levels, one of the most essential skills was the ability to make oneself acceptable to superiors. … Marks of respect to be shown in conversation with superiors included baring the head, dropping the right knee, keeping silence till spoken to, listening carefully and answering sensibly and shortly. Compliance with commands was to be immediate, response to praise heartily grateful.

(Houlbrooke 1984: 147)

For dependent youth, obedience was both a condition of their economic support, and an internalized state.

In 1630, Meredith Davy of Minehead, was prosecuted for sodomy at the Somerset Court of Quarter Sessions.

According to the evidence of his master's apprentice, a boy ‘aged twelve years or thereabouts’ called John Vicary, with whom he shared a bed, Davy had been in the habit of having sexual
relations with the boy on Sunday and holiday nights after he had been drinking; eventually the boy cried out and Davy ended up before the Justices.

(Bray 1982: 48)

As Bray glosses this:

The young apprentice would have had a lower standing in the household than Davy, who was an adult; and it was presumably this which encouraged him—wrongly as it turned out—to think that he could take advantage of the boy. It is an important point. In a household of any substantial size the distinction in their status would have been only one of a series of such distinctions; it was part of the nature of the household itself. The household was a hierarchical institution, in which each of its members had a clearly defined position. It was also a patriarchal institution, in which the pre-eminent position was that of the master; and the distinction in status between master and servant was in some respects a model for distinctions between the servants themselves.

(ibid.)

And, if we stay with this case just a little longer, once the alleged social transgression had taken place, the outcome of the discovery and prosecution seems to support the view that such activity was regarded as only slightly beyond the boundaries set on allowable demands for ‘submission’ from one considerably lower in the social hierarchy of the household.

Richard Bryant, the servant who slept in the room with Davy and the boy … eventually took the matter to the mistress of the household, but it is striking as one reads his evidence how long it took him to realize what was going on and how reluctant he is likely to appear to us now to have been to draw the obvious conclusions.

(Bray 1982: 77)

Finally, at the end of the boy, John Vinlay's, evidence, he notes: ‘since which time [Davy] hath layn quietly with him’. In other words, household life continued unchanged—the boy continued to share a bed with (hence, to be in a position of submission to) the alleged assaulter. Davy himself ‘denieth that he ever used any unclean action with the said boy as they lay in bed together; and more he sayeth not’ (Bray 1982: 69).

In Twelfth Night the twin siblings, Viola and Sebastian, are of good family and fatherless. They are, therefore, obliged to become dependent on households other than those of their own close kin. Indeed, one might argue that finding a place in the domestic economy of a household other than that of their family of birth is the initiation of the drama—they are shipwrecked on an unspecified voyage, and voyages are (in narrative) conventionally quests or searches. In addition to the careful specification of their being orphaned before the age of majority (‘when Viola from her birth / Had numbered thirteen years’), the audience are persistently reminded of the extreme youth of both twins (since each resembles the other so completely):

Olivia: Of what personage and years is he?
Mal: Not yet old enough for a man, nor young enough for a boy: as a squash is before 'tis a peascod, or a codling when ... man. He is very well-favoured, and he speaks very shrewishly. One would think his mother's milk were scarce out of him.

(1.5.157-64)

After the shipwreck, the first objective of the siblings is to transform their state from vagrancy to service (or, possibly, from wage-labour to service—Sebastian's 'gets' Antonio's purse, while Viola's relationship with the
captain is constructed as a cash-transaction). Both twins make immediately for the court of the Duke who 'governs here'. Both exchange their non-renewable cash assets (Viola's purse; Sebastian's borrowed purse) for the security of 'service' within a wealthy household ('I'll serve this duke' (1.3.55); 'I am bound to the Count Orsino's court' (2.2.41-2)). Viola's cross-dressing eases her way into Orsino's service. Sebastian, mis-taken for Cesario, takes Olivia to be spontaneously offering an invitation to enter her service—an invitation he accepts as the very 'dream' he wished for: 'Go with me to my house ... would thou'dst be rul'd by me!' (4.1.53,63).

The eroticization of Viola/Cesario and of Sebastian is dramatically constructed in terms of their relationship to the domestic economy, and the place they occupy in relation to the heads of their adopted households. In the case of both Cesario's and Sebastian's 'place', this is fraught with erotic possibility in the very process of being established as 'service' (something which by now we might expect, in the light of the discussion of the early modern household at the beginning of this paper). The audience is entirely aware of the ambiguity in Sebastian's 'retention' by Olivia—he reads it as an invitation to enter her service, she offers it as a profession of passionate, sexual love and a marriage proposal. But Orsino's attachment to his new 'young gentleman', Cesario, is no less charged with erotic possibilities:

Val.: If the Duke continue these favours towards you, Cesario, you are like to be much advanced. Viola: You either fear his humour, or my negligence, that you call in question the continuance of his love. Is he inconstant, sir, in his favours? (1.4.1-8)

'Love' here hovers dangerously between the mutual bond of service and passionate emotional attachment. And the confusions possible in the Orsino/Viola service relationship are clinched shortly thereafter:

Duke: O then unfold the passion of my love, Surprise her with discourse of my dear faith; It shall become thee well to act my woes: She will attend it better in thy youth, Than in a nuncio's of more grave aspect. Viola: I think not so, my lord. Duke: Dear lad, believe it; For they shall yet belle thy happy years, That say thou art a man; Diana's lip Is not more smooth and rubious: thy small pipe Is as the maiden's organ, shrill and sound, And all is semblative a woman's part. I know thy constellation is right apt For this affair ... ... Prosper well in this, And thou shalt live as freely as thy lord, To call his fortunes thine. Viola: I'll do my best To woo your lady: [Aside] yet, a barful strife! Who'er I woo, myself would be his wife. (1.5.24-42)

As Orsino eroticizes Viola in relation to Olivia he specifies the possibilities for eroticizing his own attention to the 'small pipe' and the 'maiden's organ' of the preferred youth in his service. As 'pipe' and 'organ' are 'semblative a woman's part' they position Cesario as desired dependent of Orsino—as available for his own sexual pleasure. So that when Orsino takes the hand of Cesario, at the close of the play, and claims her as his sexual partner, he does no more than confirm the terms of his original engagement with his 'young gentleman'.
Duke: Boy, thou hast said to me a thousand times
Thou never should'st love woman like to me.
Viola: And all those sayings will I over-swear,
And all those swearings keep as true in soul
As doth that orbed continent the fire
That severs day from night.
Duke: Give me thy hand,
And let me see thee in thy woman's weeds.

(15.1.265-71)²⁶

Of course, the erotic twist in Twelfth Night is achieved by the irony that it is Olivia—the lady of significant independent means and a disinclination to submit herself and her lands to any 'master'²⁷—whose eroticized relationship of ‘service’ with Cesario is most socially and sexually transgressive. I think critics are right in seeing this as Olivia's ‘come-uppance’—patriarchy’s retribution for mis-taking the conventions both of service and of marriage as a female head of household in an order explicitly designated male in its defining relationships.²⁸

In the resolution of the play, however, the easy redeployment of the erotic possibilities of Viola's and Sebastian's service to the households of Orsino and Olivia, respectively, literally resolves the union of the two lines. At the end of the play, the marriages of the twin siblings to Olivia and Orsino effect what Orsino's courtship of Olivia was originally designed to achieve—the Orsino and Olivia households enter into a kin relationship with one another:

Olivia: My lord, so please you, these things further thought on,
To think me as well a sister, as a wife,
One day shall crown th'alliance on't so please you,
Here at my house, and at my proper cost.
Duke: Madam, I am most apt t'embace your offer.
[To Viola] Your master quits you; and for your service done him,
So much against the mettle of your sex,
So far beneath your soft and tender breeding,
And since you call'd me master for so long,
Here is my hand; you shall from this time be
Your master's mistress.
Olivia: A sister! you are she.

(5.1.315-25)

The happy ending is one in which the erotic potential of service is appropriately contained within the admissible boundaries of the patriarchal household—dependent women 'mastered' by husbands or brothers; dependent boys elevated by marriage into masters and heads of households themselves (even desired dependent girls regulated into dependent younger sisters). But, to return to my opening remarks, this is romance—a fictional resolution in which insuperable problems are superable, convenient twinning can iron out the crumpled social fabric of early modern life. In the street, the problem remains—the troubling possibility, ‘in a throng’, that those who appear to be available in the market place, gender-wise, are not what they seem (either are not available, but in transit between households, or are cross-dressed and marketing sodomy for female prostitution, female prostitution for boy-playing). In the market place, the disreputable sexual favours sought from passing, available ‘youth’ blatantly fail to comply with the procreative requirements of reputable, marital intercourse. And the very confusion which hovers around desirability surely points to the historic specificity of early modern eroticism. Eroticism, in the early modern period, is not gender-specific, is not grounded in the sex of the possibly ‘submissive’ partner, but is an expectation of that very submissiveness. As twentieth-century readers we recognize the eroticism of gender confusion, and reintroduce that confusion as a feature of the dramatic narrative. Whereas, for the Elizabethan theatre
audience, it may be the very clarity of the mistakenness—the very indifference to gendering—which is designed to elicit the pleasurable response from the audience.29

Notes

1. Since I wrote this paper, Alan Bray published his crucial article on homosexuality and male friendship in Elizabethan England (1990: 1-19). I have also benefited from discussion of a draft of this paper with Alan Bray, and wish to express my gratitude to him.

2. All references to Twelfth Night are to the Arden edition.

5. Most of the textual accounts of cross-dressing (whether on the stage or in the street), like the ‘Ingling’ verse just cited and the Rainolds poem I use in Still Harping on Daughters, are clearly already adjusted to the fictional tropes of cross-dressing/illicit desire. Even sumptuary rules (as cited by Howard and others) aspire to control excesses which threaten good order—which is to say, dress which signifies, on which disorder is inscribed. The deposition relating to Mary Frith is a good example of the textual difficulties: in the record (whose narrative shape is controlled by the recording clerk and ‘his Lordship’, the bishop (?) who interrogates), the ‘immodest and lascivious speeches’, and ‘shame of her sexe’ collides with the slender textual traces of her refusal to accept the charge ‘being pressed’, ‘whether she had not bryn dishonest of her body & hath not also drawne other women to lewdnes by her persuasions & by carrying her self lyke a bawde’. To cross-dress is to signify as (to ‘carry onself’ as) a bawd (deposition transcribed in full in Mulholland 1987: 262-3). The spate of ‘Moll Frith’ plays which accompanied her court appearance seize upon the event’s bawdy potential (Mulholland 1987: 13)—for example, by suggesting she might ‘take her own part’ in the play (which ‘part’, and how related to stage cross-dressing?) and that she would play the viol on stage (the lewd possibilities of viol playing are considerable, as Howard points out in her essay for this volume). In a paper for the 1989 meeting of the Shakespeare Association of America, Stallybrass quoted Augustin Philips's will in which he left his apprentice various specified desirable items of clothing, and his ‘bass viol’. Here too it seems possible that the legacy has been adjusted to the tropes of (intimate) devoted service—the bass viol and the shared items of dress connoting the closeness of the master-servant relationship.

6. It is fascinating that this exactly corresponds to Mary Douglas's ‘dirt is matter out of place’ (1966).

7. See R. Ascham, The Scholemaster, and its ‘morals’ source, Xenophon's Cyropaedia. I am extremely grateful to Lorna Hutson for making the vulnerability of the ‘youth’ clear to me, and for all the helpful discussion we had on this paper.

8. Throughout this paper I use the contemporary term ‘sodomy’ rather than the nineteenth-century ‘homosexuality’, or any of its cognates. In this I follow Bray (1982: 13-14), and Bullough in Bullough and Brundage (1982: 55-71).

9. To see how far back this goes as a fictionalizing of ‘loose’ women transgressively entering the male preserve see Knighton's Chronicon (1348), quoted in Rickert (1949: 217). I am grateful to Rob Pope for bringing this passage to my attention.

10. This, I now think, is a more correct version of what I wrote earlier: ‘The dependent role of the boy player doubles for the dependency which is women's lot, creating a sensuality which is independent of the sex of the desired figure, and which is particularly erotic when the sex is confused’ (1983: 24).

11. For a clear account of the consistent use of the terms ‘family’ and ‘household’ to designate those who cohabit under a single roof, as dependants of one adult male in the eighteenth century see Tadmor (1989). In Bray (1982), see especially the clear account on pp. 44-6.

12. ‘The overall pattern in the circulation of members between [households of specified levels of wealth, in fifteenth-century Florence] was similar for men and for women, but there are also some significant
differences in the movements of the two sexes. The richest households tend to gather in both boys and girls as they age, from birth up to their middle teens. At exact age 15, the 25 per cent of wealthy households contain 45 per cent of the boys and 43.5 per cent of the girls (as opposed to 39 per cent and 35 per cent respectively of the cohort of babies, age 0-2). This drift of children primarily means that wealthy households were taking in orphaned relatives. The incoming children probably also included many young relatives who had lost their fathers, and whose mothers had remarried and deserted them [sic]. The mother joined the household of her new husband, but usually did not take her children with her. The kindred of her late husband had to look to their care. … If we had data on servants and apprentices [registered with their household of birth in the Florentine census] we would undoubtedly observe an even more massive drift of young persons into and out of the homes of the wealthy. We know from other sources that “life-cycle” servants were numerous at Florence, as widely in traditional society. These young people, girls especially, spent their years of late childhood in service; they thereby earned their keep and accumulated from their earnings the dowry they needed for marriage’ (Herlihy 1985: 153).

14. Data from Laslett and Wall. See also Beier (1985: 22-6); and Laslett’s introduction, passim, for the complexity of the early modern household or family.
15. See also Bray (1982: 45), and the work in progress on early modern adolescence and service by Paul Griffiths (Clare College, Cambridge), especially his unpublished paper, 1990.
16. For the classic statement see Laslett (1972: 10): ‘The seventeenth century patriarchal family had many of the characteristics of the patriarchal household. It included not only wife and children, but often younger brothers, sisters, nephews and nieces: male superiority and primogeniture were unquestioned. Most striking was the presence of very large numbers of servants, whose subjection to the head of household was absolute.’
17. For a brilliant account of the ambiguities concerning the relationship between service and sexual favours contained within the early modern patriarchal household, see Cynthia Herrup’s paper on the trial of the Earl of Castlehaven. I read this paper while I was working on my own, and Herrup’s argument was tremendously helpful in sharpening my own perception of the relationship between household dependency and the construction of sexuality.
18. On sexual exploitation of servants in general see, most recently, Amussen (1988: 159). In Othello, the shared bed in service, used by Iago to enflame Othello’s jealousy, fully exploits the sexual availability of the bedfellow: ‘I lay with Cassio lately, … In sleep I heard him say “Sweet Desdemona, / Let us be wary, let us hide our loves;” / And then, sir, would he … kiss me hard, / As if he pluck’d up kisses by the roots, / That grew upon my lips, then laid his leg / Over my thigh, and sigh’d, and kiss’d’ (3.3.419-31).
19. There is a steady, interesting insistence in the text on the good birth of the twins, and on their having full purses at their disposal. This seems to place them pivotally between the household economy and that of the market place. Although employment in the former was, historically, as precarious as that in the latter (wage-labour), there is no question that in the play-text only the household is seen as a suitable ‘place’ for Viola and Sebastian. On wage-labour versus service see Beier (1985).
20. ‘My father was that Sebastian of Messaline whom I know you have heard of. He left behind him myself and a sister, both born in an hour’ (2.1.16-19); ‘My father … died that day when Viola from her birth / Had numbered thirteen years’; ‘O, that record is lively in my soul! / He finished indeed his mortal act / That day that made my sister thirteen years’ (5.1.240-6).
21. See also the Duke’s emphasis on the extreme youth of Cesario when he cautions him against marrying an older woman (2.4.24-39). In the same passage the Duke calls Viola ‘boy’. Sebastian (mirror-image of the cross-dressed Viola) is consistently referred to as ‘youth’ (for example 3.4.368).
22. See Beier (1985) for a gloss on the security of service versus the insecurity of waged labour (the temporarily full purse).
23. It perfectly fulfils the trope of serving devotion, as represented in saints’ lives and romance. See Jardine (1983).
In terms of tropes, here is the moralizers' trope of the vulnerable boy captured in service by dominating female householders. See Ascham, and of course, Plautus's *Menaechmi* and Secchi's *Gl'Ingannati* (both of which link this play with *A Comedy of Errors*). In *Two Gentlemen of Verona* the two tropes are run into one, when Julia takes the name Sebastian (a straightforward signifier of male dependency and vulnerability) in order to pursue her fickle lover in faithful service. See Beier (1985: 22): ‘Regarding [living-in service] we are told that the master/servant relationship was the lynch-pin of a patriarchal society in which “every relationship could be seen as a love-relationship”.’

In the source story the heroine, dressed as a boy, fears she may be asked by her master for ‘bedroom favours’. For a related discussion of the ambiguities of ‘love’ in the context of patronage see Barrell (1988: 18-43) on ‘love’ and patronage in Shakespeare's sonnet 29.

I think the ‘woman's weeds’ line is quite close in its possibilities to the seductively transgressive Pyander.

John Manningham's diary (1602) records a performance he saw of the play: ‘A good practise in it to make the steward beleue his Lady widdowe was in Loue w/th him by counterfayting a lett/ / as from his Lady in generall teames telling him what shee liked best in him / and p[re]scribing his gesture in smiling his apparraille / &c./. And then when he came to practise making him beleue they tooke him to be mad’ (Arden *Twelfth Night*, xxvi). Manningham's mistaken memory (‘widow’ when Olivia in fact mourns the deaths of her father and brother) confirms the fact that as a figure she is recognizably the independent woman of means whose own will and desires figure troublingly strongly in choice of husband (and thus, continuation of the paternal line).

Olivia's femaleness is also the cause of her steward Malvolio's mis-taking their service relationship as passionate ‘love’.

So, my final note addresses the vexed question of Middleton's *The Roaring Girl*. On this reading, Moll is neither male nor female, or both male and female, confusing the several traditions which represent economic dependency via cross-dressing in private and in public. So the joke about the promise that Moll herself would come and play her own part in the play, *in place of* the boy who ‘actually’ takes it, is that it simply makes no difference to the ‘performance’. Either way, that figure is replete with erotic potential.

**Criticism: Gender Issues: Michael Shapiro (essay date 1996)**

[In the following essay, Shapiro investigates Twelfth Night's exploration of sexual identity within the context of Elizabethan theatrical portrayals of sexual and emotional intimacy between men and between women.]

Now dated around 1601,¹Twelfth Night, Shakespeare's fourth play with a cross-dressed heroine, continues his variations on this motif. Indeed, after Two Gentlemen each play of this type seems to be a deliberate variation on its predecessor(s). Three earlier plays stress the masculine side of the boy heroine's disguised identity. Two use pert Lylian pages and the third a doctor of the law. In part, the vigor of these male personas supports the assertiveness the heroine needs to control the outcome of the play. In Twelfth Night, Shakespeare enlarged the male persona that the boy heroine assumed along with male disguise. At times, the actor playing Viola displays Ganymed's audacity if not Balthazar's commanding resourcefulness. At other times, the role calls for
different aspects of boyishness—delicacy and shyness. The two sides of Cesario's personality represent Viola's tendencies toward assertiveness and vulnerability, modulated to suit a young male servant. Cesario's double nature is underscored farcically by his terror of dueling but more interestingly by his appearance in highly charged duet scenes both with the man he serves and has come to love and with a woman who has fallen in love with him. In *Twelfth Night*, more explicitly than in previous plays involving heroines in male disguise, Shakespeare exploited the play-boy's dexterous articulation of layered sexual identities by accenting the very sexuality of these identities. Some subsequent playwrights, such as Barry, Middleton, and Brome, picked up this variation and in turn modified it in characteristic ways, while Shirley alone surpassed Shakespeare in exploring the anxieties created by the homoerotic potentialities of the play-boy/female page.

**THE STAGING OF INTIMACY**

Although Viola plays a page who is at different moments both cheeky and shy, who attracts a woman and who is attracted to a man, the complex figure of male actor/female character/male disguise did not, I believe, fuse into a single androgynous entity. The young male performers who specialized in female roles were not genderless but boys or young men, not yet but potentially adult males. They were androgynous only in the sense that they might be sex objects both to some men and to some women. When they played romantic heroines, they must have been capable of representing sexually mature and responsive young women. In plays in which such women adopt male disguise, these same performers probably played female and male identities in contrasting ways. Indeterminacy of gender in disguised heroine plays occurred only when dramatists like Fletcher, Chapman, or Middleton wished to create uncertainty, if not actual surprise, in their audiences by withholding explicit knowledge of the page's female identity. As separate moments in a play highlighted the discrete layers of sexual identity belonging to actor, heroine, and disguised persona, various images of heterosexual and homosexual intimacy crossed the consciousness of individual spectators, arousing types of anxieties peculiar to their own personal histories. Antitheatrical writers object to the images of women being represented on the stage, to the effeminization of the male performer, and to his use as an object of erotic excitement. Given the lack of reliable data and the probable heterogeneity of playhouse audiences, it seems impossible to specify which particular responses were elicited in which spectators by which types of theatrical combinations. Nor is it necessary to do so, for nearly any likely response to the representation of intimacy added excitement and risk to the form of play known as play going.

Some psychoanalysts suggest that spectators respond to theatrical representations of intimacy as primal fantasies, like children imagining that they are watching their parents in sexual intercourse. Such representation in Shakespeare's day might have included scenes of kissing, caressing, and embracing, as well as scenes depicting emotional relations implying or leading to sexual exchange. The psychoanalytic model suggests a rich mixture of responses, possibly including elements of desire, pleasure, jealousy, embarrassment, guilt, or fear. Because the precise components of this mixture vary widely among individuals, I refer to it by the general term *anxiety*.

As readers may recall from their own (early) experience, such moments of theatricalized intimacy may also test spectators' identification with protagonists. Juvenile audiences, one recalls, would snicker, hoot, and groan whenever their role models strayed into love scenes, even if these sexual exchanges were carefully stylized and stopped far short of implying intercourse, let alone representing it. Adult spectators may feel similar anxieties but rarely express them as open derision. Although the precise nature of the anxiety may vary with one's gender, social status, and personal experience, dramatized portrayals of sexual and emotional intimacy can be troubling because exciting and exciting because troubling. One adult defense against such anxieties is to dismiss what is happening on screen or stage as “only a film” or “only a play,” that is, to use aesthetic distance as a psychological barrier.

But one of the theater's most potent effects is precisely the blurring of boundaries between art and life, an effect easily created when spectators are in the physical presence of live actors who are publicly saying words.
and occasionally performing actions usually reserved for secluded situations. By means of conventions and codes, theater also blurs the distinction between physical and emotional intimacy, for what actors do and say onstage may be intended to imply far greater physical or emotional intimacy than what is being enacted.\(^2\)

The codes and conventions of Shakespeare's day, more restrictive than those of the late twentieth century, implied what could not be shown or what one was to imagine might be about to take place offstage. Passionate scenes between lovers and would-be lovers that seem tamely decorous to modern spectators might well have evoked stronger responses in the period and might have served as the equivalent of theatricalized primal scenes. Often the language surpasses the stage action in emotional intensity, as in Robert Greene's *James the Fourth*, where a woman who falls in love with a female page speaks of her "insatiate lust" even though her behavior, to judge from the text, is chastely self-restrained. Because of its unusual reliance on intimate duet scenes, *Twelfth Night*, which even by Elizabethan standards is restrained in the ways it dramatizes sexual attraction, needs to be understood in a context of theatrical representations of both sexual and emotional intimacy.

In the Renaissance theater, cross-gender casting added another set of anxieties because of the culture's official condemnation of homosexuality and the obsessive focusing of Puritan antitheatrical attacks on theatrical transvestism. Scenes of heterosexual physical intimacy in the world of the play could be seen as involving homoerotic acts in the world of the playhouse. How pervasive this view was among actual audiences is debatable, for very few plays do anything to authorize a puritanical response, but it seems likely that many spectators were aware of the condemnation of theatrical cross-dressing expressed in antitheatrical treatises and elsewhere throughout the period.

Addressing just such anxieties over the plays he produced at Christ Church College, Oxford, between 1582 and 1592, William Gager denied that his staging of heterosexual love scenes involved any actions that could be construed as homoerotic:

> As for the danger of kissinge bewtifull boyes, … it is untrwe, … that owre Eurymachus did kisse owre Melantho. I have enquyred of the partyes themselves, whether any suche action was used by them, and thay constantly denye it; sure I ame, no suche thinge was taught. If you conjecture there was kissinge because Melantho spake this verse, *Furtiva nullus oscula Eurymachus dabit*, … yet, therby no kissinge can be proved agaynst us, but that rather, that thinge only in wordes was expressed.\(^3\)

If Gager's attitude is representative, university productions did not *enact* sexual passion but rather *indicated* it through words alone, perhaps accompanied by chastely stylized stage business, as in some scholastic productions today. Gager also differentiated academic productions, ostensibly done for pedagogic purposes, from those of the commercial theater.\(^4\)

Unlike Gager's pupils, Elizabethan professional troupes did not hesitate to dramatize moments of physical intimacy, and apparently did so with greater naturalism and intensity. J. G. B. Streett's catalog of examples suggests that English Renaissance plays call for considerably more kissing, caressing, and fondling than earlier scholars wished to acknowledge.\(^5\) One example comes from Kyd's *The Spanish Tragedy* (c. 1588-90), a play written long before the alleged decadence of the late Jacobean and Caroline periods. In the famous bower scene, Horatio and Bel-Imperia sit down ("for pleasure asketh ease") and then graphically describe their progression from hand-holding to footsie, kisses, close embraces, and finally—just before his killers interrupt them—to Horatio's plea that Bel-Imperia "stay a while, and I will die with thee."\(^6\) Gager's argument, that verbal expressions of emotional and physical intimacy need not necessitate physicalization, would not seem to apply to so explicit a listing of gestures.
It is hard to imagine the actors not doing what the characters say they are doing. By our standards, the actors might have seemed detached, but even if stylized or coded the physical gestures represent the sexual expression of passionate love, in this case a clandestine tryst rather than the simple kiss of Gager's example. Moments like this one aroused the ire of William Prynne, who was hardly an objective source and who probably relied on secondhand reports. Nevertheless Kyd's play provided a graphic example of what a Puritan like Prynne, in his antitheatrical tract entitled *Histrio-Mastix* (pub. 1633), called "those immodest gestures" or "those real lively representations of the actors of venery, which attend and set out Stage-playes."

Such representations of heterosexual sexual activity, however naturalistically staged, probably evoked or accented the presence of the male actors, especially if, as Heywood claims, they were easily recognized by spectators. The aesthetic defense against anxiety caused by scenes of heterosexual intimacy—“it’s only a play”—led to another source of anxiety by activating audiences' dual consciousness of play-boys and female characters and so evoking concern over (and sometimes interest in) what the male actors were doing with their own bodies.

Although most plays do not activate dual consciousness by explicit allusions at such moments, boy-bride plays do so by incorporating female impersonation into the world of the play, so that the audience finds itself in the position of those characters who are in on the joke, that is, watching a boy make other men believe he is a woman. If consciousness of the play-boy was accented by the reflexive effect of male disguise, then any intimate scenes involving a female page may have further underscored the homoerotic nature of the relationship at the metatheatrical level.

**STAGING MALE HOMOSEXUAL INTIMACY: FARRANT'S THE WARS OF CYRUS**

This complex of anxieties over the presentation of intimacy at both mimetic and theatrical levels can be illustrated by the subplot of *The Wars of Cyrus*. The play was probably written by Richard Farrant for the Chapel Children and performed in the first Blackfriars theater in the late 1570s, although it was not published until 1594. Both the subplot, adapted from Xenophon’s *Cyropaedia*, and the main plot are variants of the captive-heroine motif often used in plays performed by the children’s troupes in the 1570s and 1580s. Alexandra, the heroine of the subplot, escapes from captivity by exchanging clothing and identities with her page, Libanio. Both mistress and page are played by two young male actors capable of depicting boys or women equally well. One plays a woman impersonating a boy, a female page; the other a boy impersonating a woman, a boy bride.

Libanio impersonates his mistress well enough to excite Dinon, their guard. As Alexandra, Libanio initially protests that “I am too young to love” (l. 894), while Dinon offers to buy her favors, but she then coyly implies that it is not the offer of wealth but passion itself that makes her “blush to say I love my Lord” (l. 935). When Dinon presses further—“And when thou blushes[t] Dinon's heart is fired; / Therefore to quench it give a gentle grant” (ll. 936-37)—Libanio parries by seeming to redefine “grant” in purely verbal terms: “My honor being preserved, my grant is given” (l. 938).

It is not clear from the text exactly how Dinon understands Libanio's ambiguous reply, nor whether he understands “honor” to mean reputation or virginity. Perhaps verbal capitulation is enough to satisfy him, or perhaps it is intended as a symbolic indication of sexual submission. In either case, he quickly falls into a state of lassitude, asking Libanio to “lull me asleep with sweetness of thy voice” (l. 942). In the context of this play, the song might have functioned as a symbolic indicator of sexual intimacy—the equivalent of the closing of the bedroom door in films of an earlier day. Although the song seems to put Dinon into state of repose, in describing this encounter to other men later in the play, Libanio disingenuously attributes the guard's sleepiness to other causes: “long continued talke, / And heat of sunne reflecting on the bankes, / Or happlie with the ratling harmonie / [of] Euphrates his gliding streames” (ll. 1112-15).
Whether or not the page's sexual submission was symbolically indicated, the boy bride immediately resumes his male identity. Having compromised his manliness by the assumption of female disguise and by allowing Dinon to see and perhaps to use him as a woman, Libanio now moves to redeem his own virility. The moment Dinon falls asleep, Libanio prepares to kill him with the guard's own sword, “the sworde that hangde loose dangling by his side” (l. 1120), but which he appropriates as his own in the soliloquy preceding the murder:

Sleep, Dinon! Then, Libanio, draw thy sword
And manly thrust it in his slumbering heart!
... Now Dinon dies! Alas, I cannot strike!
This habit makes me over pitiful.
Remember that thou art Libanio—
No woman, but a bondman! Strike and fly!

(ll. 944-57)

To reaffirm his own masculine identity, Libanio rejects both compassion and self-pity as feminine attributes induced by his wearing of women's garments, and he commits an act of “manly” violence. Only such an act will cleanse him of the shame of being “taken” as a woman, and permit him to accept the title that other men later bestow on him, “president of manly fortitude” (l. 1128), in which there may have lurked a further irony depending on the age of the play-boy cast in the role.

This subplot betrays considerable uneasiness about the risk to male sexual identity when boys or young men impersonate women too successfully. Within the world of the play, Libanio's impersonation of Alexandra reflects exactly what young male actors often did in the world of the playhouse—portray women who aroused the sexual interest of male characters and, so it was said, of male spectators as well. In most plays, such anxieties are unacknowledged and remain confined to the metatheatrical level. Boy-bride plays like this one, however, bring such concerns to conscious attention. Most of them, like Epicoene, focus ridicule on the man who mistook the boy bride for a woman. The Wars of Cyrus, however, sees the “mistake” from the point of view of the boy, dramatizing underlying concerns about the effects of cross-gender casting on male sexuality. That concern was brought to the surface more subtly in plays like Twelfth Night, where, instead of reinscribing female impersonation within the world of the play, cross-gender disguise reflexively underscored the presence of the male actor in the female role.

STAGING INTIMACY BETWEEN WOMEN: GREENE'S JAMES THE FOURTH

Unlike The Wars of Cyrus, which dramatizes the attraction of a man to a boy bride, Greene's James the Fourth (Queen's? c. 1590) depicts a woman's infatuation with a female page. As such it is a precursor of Twelfth Night, the only one of Shakespeare's disguised heroine plays to explore the relationship between the protagonist and another woman. Greene makes far more of Lady Cuthbert Anderson's desire for the disguised Dorothea, queen of Scots, than Cinthio did in the source (Hecatommithi III.i). Cinthio's novella denies any sexual basis to the relationship between Arenopia and her rescuer by informing the reader that “the wife of the knight [who nurses the female page back to health] liked her very much indeed, not lasciviously but … as a brother.” Greene devotes parts of two scenes to Lady Anderson's “insatiate lust” for the disguised Dorothea, yet does so with restraint. In V.i., the presence of Nano, Dorothea's dwarf, prevents Lady Anderson from wooing her patient too ardent. Six lines before the end of the scene, Dorothea sends Nano away and Lady Anderson is finally alone with the object of her affections for the first time. Their brief dialogue is formalistically intensified by rhymed stichomythia but nevertheless gives intimacy a very wide berth:

L. And. Now, sir, what cheer? Come, taste this broth I bring.
Dor. My grief is past, I feel no further sting.
L. And. Where is your dwarf? Why hath he left you, sir?
Dor. For some affairs; he is not travelled far.
L. And. If so you please, come in and take your rest.
Dor. Fear keeps awake a discontented breast.

(ll. 94-99)

In another context, Lady Anderson’s invitation might sound seductive; here it resembles the professional solicitude of a hospital nurse.

In V.v, Nano is again present and forces Dorothea to reveal her identity by offering to wager with Lady Anderson that “My master here will prove a married wife” (l. 21). Blushing but relieved, Dorothea verifies Nano's claim, while Lady Anderson, deeply stung, modulates from anger to shame and does so not in asides or soliloquy but in conversation with Nano and Dorothea:

L. And. Deceitful beauty, hast thou scorned me so?
Nano. Nay, muse not, madam, for she tells you true.
L. And. Beauty bred love, and love hath bred my shame.
Nano. And women's faces work more wrongs than these;
Take comfort, madam, to cure your disease.
And yet she loves a man as well as you,
Only this difference, she cannot fancy too.
L. And. Blush, grieve, and die in thine insatiate lust!

(ll. 46-53)

Then, in response to Dorothea's offer of friendship, still referring to the queen as “my lord,” she expresses her continued love (“although not as I desired”), acknowledges her “false heart,” and asks “pardon [of her] most gracious princess” (ll. 56-60). These rapid transitions skate quickly over Lady Anderson's complicated emotional states. Her reactions result from her having made amorous advances toward a character she has discovered to be of her own sex, a situation inversely reflected in the fact that both actors were male, as Dorothea's cross-gender disguise would have reminded the audience.

SHAKESPEARE’S STAGING OF INTIMACY BETWEEN WOMEN: VIOLA AND OLIVIA

In Twelfth Night, Shakespeare puts greater pressure on the relationship between mistress and female page than either Lyly or Greene had done. In his earlier disguised-heroine plays, he did not allow any of his female pages to play intimate scenes with female characters, even though the source for Two Gentlemen had explored just such a relationship. In Twelfth Night, Shakespeare keeps Olivia and Viola together alone on stage three times in order to dramatize Olivia's deepening passion.

Each of these encounters begins by announcing a private rendezvous. In their first meeting, I.v, Olivia finds herself intrigued by this stranger, who had been saucy at her gates but who now seems respectful, if resolute. Her interest piqued, Olivia dismisses her attendants: “Give us this place alone, we will hear this divinity” (ll. 218-19). Olivia's scorning of Orsino's suit, coupled with her pride and vanity, drive Cesario to declare what he would do “If I did love you in my master's flame” (l. 264), a declaration that for the first time in the scene diverts Olivia's attention away from her own role as the “cruel fair” and on to the person standing before her: “Why, what would you?” (l. 267). Cesario's answer, the energetic (and perhaps urgent) “willow cabin” speech, keeps Olivia's attention riveted on this audacious youth: “You might do much. / What is your parentage?” (ll. 276-77). In Olivia's next speech, she abruptly modulates from haughtiness toward Orsino to seductive charm toward Cesario:

Get you to your lord.
I cannot love him; let him send no more—
Unless (perchance) you come to me again
To tell me how he takes it.
This first exchange, ending with Olivia's realization that she has caught the "plague," compresses and dramatizes what Shakespeare's probable source, Riche's "Of Apolonius and Silla," reports took place only after Julina (Olivia) had "many tymes taken the gaze of this young youth." Julina is straightforward in revealing her feelings to the duke's emissary: "it is enough that you have saied for your maister; from henceforthe, either speake for your self or saie nothyng at all." In two other duet scenes, Shakespeare dramatized Olivia's growing infatuation, and her attempts both to conceal and expose enough of it to extract a reciprocal response from Cesario.

Privacy is again stressed in the second meeting, when Cesario returns to woo on Orsino's behalf. He asks to speak alone with Olivia, who sends the other characters off: “Let the garden door be shut, and leave me to my hearing” (III.i.92-93). Her next words imply a desire for even closer contact: “Give me your hand, sir.” She asks the servant’s name but becomes angry when Cesario reopens Orsino's courtship, and then—as tactfully as she can—points out that she has virtually thrown herself at Cesario:

To one of your receiving

Enough is shown; a cypress, not a bosom,
Hides my heart.

(II. 119-21)

Unable to make Cesario acknowledge her feelings, let alone reciprocate them, Olivia orders him to leave but then abruptly orders him to “Stay!” (l. 137). In one of the most reflexive moments in the play, each character accuses the other of not being “what you are” (l. 139). In their first meeting, Cesario had denied being a “comedian” but admitted “I am not that I play” (I.v.184), alluding both to the female character and metatheatrically to the performer. Here the line is repeated in revised form—“I am not what I am” (l. 141)—and underscores both of those layers of identity, as well as seeming to point beyond them to more profound ontological realms. But the dialogue returns abruptly to the mimetic level with Olivia's wish that “you were as I would have you be” (l. 142), Viola's “contempt and anger” (l. 146), and Olivia's aside, followed by her formal Petrarchan declaration of passion in rhymed couplets:

Cesario, by the roses of the spring,
By maidhood, honor, truth, and every thing,
I love thee so, that maugre all thy pride,
Nor wit nor reason can my passion hide.

(ll. 149-52)

In matched rhymed couplets, Cesario refuses to accept any woman's love, and the scene ends with one last plaintive appeal from Olivia—“Yet come again.” But the urgent command is retracted, seemingly restated in less imperious but passionate terms (“for thou perhaps mayst move”), until it is masked by the duplicitous hint of her receptivity to Orsino's suit (“The heart which now abhors, to like his love” [ll. 163-64]). Olivia's entreaty to a social inferior plus her sudden abandonment of her vow of mourning, however lightly held, is a sure sign that powerful forces of sexual attraction are stirring in her.

More than in any of the possible sources and analogues, the scene emphasizes the desperation of Olivia's wooing, however restrained by decorum, as well as stressing Viola's confused mixture of embarrassment and anger. An Italian dramatic treatment of the same source material, Gl’Ingannati, avoided such delicate feelings in favor of franker physicalization of the mistress's "insatiable lust" framed by coarse onstage commentary. In II.vi, the only duet scene between Isabella (Olivia) and Lelia (Viola) in her disguise as Fabio (Cesario), the lady reveals her attraction to the page by inviting him to “Come into the doorway a little” (2:308). She kisses
him, just offstage, according to two voyeuristic servants, after which Lelia returns to offer her own cynical and self-absorbed appraisal of the situation: “On the one hand I am having fun at the expense of her who believes me a man, on the other I should like to get out of this scrape” (2:309). Viola is never approached as directly as this, nor is she amused by Olivia's plight: “Poor lady, she were better love a dream” (III.ii.26). Instead of Isabella's advances and Lelia's mockery, Shakespeare offers Olivia's enthrallment by the mysterious servant, an enthrallment she barely checked by her upper-class self-restraint. Less physically explicit than Gl'Ingannati, Twelfth Night suggests deeper wells of sexual passion and adds Viola’s empathy with one she finds no less a victim of this bizarre triangle than herself and Orsino.

The third duet scene between Olivia and Cesario, embedded in III.iv, compresses their encounter into fifteen lines. Olivia does not need to demand privacy, as Fabian sees her coming with Cesario and warns Maria and Sir Toby to “give them way” (ll. 196-97). Jettisoning aristocratic reserve, Olivia complains that she has acted dishonorably in flinging herself at Cesario in order to bind him to her, while Cesario tries to make her empathize with Orsino's feelings of rejection so that he can renew Orsino's courtship. In each of these encounters, insistence on privacy leads one to expect physical intimacy, as in Gl'Ingannati, but Shakespeare dramatizes the emotional entanglements—Olivia's desire, vulnerability, and humiliation; Viola's bewilderment, irritation, and embarrassment. As in James the Fourth, the audience witnesses an intense interaction between two women, while the theatrical level involves the interaction of two male performers.15

MALE DISGUISE AND THE REPRESENTATION OF HETEROSEXUAL INTIMACY

Shakespeare's willingness to explore the problems of intimacy in scenes between a heroine in male disguise and the man she loves is all the more remarkable considering how few precedents he had to draw on in narrative or dramatic treatments of the material. In many narrative versions, particularly those in the chivalric tradition, the disguised heroine serves as faithful page or squire to her lover or husband. The emotional pressure of such proximity is rarely explored, even though she may sleep in the same room or bed, or on the same plot of ground, although Boccaccio and other writers of novelle develop the erotic possibilities of such scenes of intimacy.16

Until the Jacobean period, even when English playwrights dramatized moments of heterosexual intimacy, they rarely did so in scenes involving a heroine in male disguise, probably because of the reflexive power of the assumed male identity to call attention to the gender of the play-boy and so raise the kinds of anxieties alluded to by Gager and exorcised by Farrant in The Wars of Cyrus. Before Twelfth Night, stage heroines in male disguise are denied scenes of emotional intimacy with their husbands, lovers, or other men. Neronis, disguised as a page in Clyomon, meets her beloved, the title character, alone in the woods, but, as he too has concealed his identity, they fail to recognize each other. Once Dorothea, the heroine of James the Fourth, dons male disguise, her only private encounter with a man, the assassin Jacques, is violent but is not sexual. Once Julia and Portia don male disguise, they have no duet scenes with Proteus or Bassanio. As Ganymed, Rosalind has one such moment with Orlando, but, as was noted, it was broken off in part because it suggested more intensity of feeling than either of them wished.

When Italian dramatists brought the disguised heroine and her beloved onstage, they usually sought broad comic effects, just as they did when the disguised heroine is wooed by another woman. In Gl'Ingannati, for example, Flamminio (Orsino) tells Fabio (Cesario) that he once loved “one named Lelia who I have often wished to say is the very image of you” (2:303). But when Flamminio repudiates Lelia in another duet, he fails to grasp the significance of the page's visible reaction:

Flamm. You have lost your colour. Go home; have a hot cloth on your chest and a rub behind the shoulders. … What strange accidents befall us men! … he seems to love me so much that if he were a woman I should think him lovesick for me.

(2:310)
Whereas the author of *Gl'Ingannati* stresses the comic effects of Flamminio's inability to see through Lelia's disguise, Shakespeare achieves quite different effects in *Twelfth Night*, in part because he stresses the female page's femininity rather than her boyishness. Alexander Leggatt observes that such stress on the female page's femininity is unusual: “Normally, when another character describes one of these disguised heroines, the emphasis is on the pert boyishness one imagines as a quality of the boy actor himself.” Viola is also less self-assertive than Julia, Portia, or Rosalind. Although she initially displays a brisk resolve to take control of her life, as the play unfolds she feels herself trapped by events she cannot subdue to her will, and she soon throws herself on the mercy of Time to untangle the knot that is too hard for her to untie.

The circumstances of Viola's disguising also accentuate her relative helplessness. The other three heroines arrange their disguisings. Viola's depends on the cooperation of the captain, and she sees in male disguise no possibilities for parodying male folly. By the end of II.ii, she regards “disguise” as “a wickedness / Wherein the pregnant enemy does much” (ll. 27-28). Neither a doctor of law nor the saucy lackey, Viola instructs the captain to “present me as an eunuch” (I.ii.56).

Viola is also more isolated than Shakespeare's other heroines in male disguise. Her confidant, the captain, never returns after his initial appearance, leaving her with no Celia or Nerissa on stage through whom she can activate her identity as a woman. She therefore speaks in riddles to the other characters—“I am not that I play” (I.v.184), “I am not what I am” (III.i.141), and “I am all the daughters of my father's house, / And all the brothers too” (II.iv.120-21), and she frequently turns to the audience for soliloquies and asides, as neither Portia nor Rosalind need to do. While these moments establish a strong rapport with the audience, they do not “mock or undermine others, as comic asides conventionally do,” but rather express her feelings of impotence and evoke pathos. She may take over the play, but she cannot control the plot.

Intimate moments between the disguised heroine and the man she loves are lightly sketched in Riche's “Of Apolonius and Silla,” where the page rises to the status of trusted valet: “Silvio [Cesario] pleased his maister so well that above all the reste of his servantes aboute hym he had the greatest credite, and the Duke put him moste in trust” (2:350-51). Leslie Hotson suggested that Shakespeare amplified and intensified Riche's narrative to make his Duke Orsino resemble Elizabeth's visitor of the same name from Italy. Whatever the reasons, Shakespeare deviated not only from his source, but also from contemporary theatrical treatments of the heroine in male disguise and from his own previous treatments of the motif. He placed Viola, disguised as Cesario, in two scenes (one of them divided into two subscenes) with Orsino; and he dramatized the duke's growing attachment to his new “male” servant.

These scenes necessarily included material Riche had already narrated in earlier episodes. Silla had fallen in love with the duke when he visited her father and travels by sea to the duke's court so that “she might againe take the vewe of her beloved Apolonius” (2:348). Viola, shipwrecked by fortune, recalls hearing of Orsino when the captain mentions him as the local ruler. By denying Viola any previous involvement with Orsino, Shakespeare had to dramatize her falling in love with him at some point after she had taken on the identity of Cesario.

In fact, Orsino's attraction to Cesario is presented first. In the opening lines of their first scene together, Liv, Valentine, one of Orsino's servants, paraphrases Riche's description of their rapidly developing intimacy:

> If the Duke continue these favors towards you, Cesario, you are like to be much advanc'd; he hath known you but three days, and already you are no stranger.

(ll. 1-4)

He then dramatizes this relationship directly. Orsino's entering line, “Who saw Cesario, ho?” (l. 10), implies a sense of urgency, and his order to his other servants when he notes Cesario's presence—“Stand you awhile
aloof”—is a demand for privacy that emphasizes the intensity of the bond that has suddenly grown between them. His next lines make the point explicitly:

Thou know'st no less but all. I have unclasp'd
To thee the book even of my secret soul.

(ll. 12-14)

The text inscribed in this book is Orsino's self-induced love for Olivia, which Shakespeare parodies as Petrarchist narcissism. In this mode, Orsino three times urges Cesario to plead “the passion of my love” (l. 24) to Olivia, while each time the page tries to point out the futility of the errand. Cesario's appeal to his youth and immaturity calls forth from Orsino a protest that plays reflexively across the various layers of Viola's identity:

For they shall yet belie thy happy years,
That say thou art a man. Diana's lip
Is not more smooth and rubious; thy small pipe
Is as the maiden's organ, shrill and sound,
And all is semblative a woman's part.

(ll. 29-34)

No less a victim than Olivia of Viola's cross-gender disguise, Orsino may without knowing it be responding to the woman beneath the disguise, but he takes Cesario to be what the audience knows the performer is—a pubescent male, or as Malvolio puts it, “not yet old enough for a man, nor young enough for a boy” (I.v.156-57).

As several critics observe, Cesario has the same effect on Orsino that he has on Olivia, drawing both characters out of self-absorption by riveting their attention onto himself. But whereas Olivia was attracted by the audacity of one who dared to be “saucy at my gates” (I.v.197), Orsino finds himself drawn to the feminine qualities of his page. By making Cesario appear both as an effeminate boy and as a saucy lackey, Shakespeare guided the boy actor toward a fresher treatment of the heroine's male disguise. Based on the view expressed by Rosalind that “boys and women are for the most part cattle of this color” (III.ii.414-15), Cesario's feminine male persona, like the image of the master-mistress of sonnet 20, must have made Orsino's attraction to him both more understandable and more troubling.

But unlike the speaker at the end of the sonnet, Orsino never explicitly dissociates himself from a sexual relationship with Cesario, and the actor can choose whether or not to make the duke self-conscious about his attachment to the youth. As elsewhere in the play, the text gives him several opportunities to shift his focus away from Cesario by redirecting the conversation to his “love” for Olivia. Here, the transition from intense focus on the page to the resumption of Petrarchist posturing may occur gradually through the next line and a half—“I know thy constellation is right apt / For this affair”—or may be abruptly signaled by the phrase that follows, an imperiously vague command to his servants—“Some four or five attend him”—which in turn is followed by more Petrarchist self-dramatization—“All, if you will, for I myself am best / When least in company” (Iiv.35-38). After a short exhortation to Cesario, he leaves, allowing Viola an aside, a rhymed couplet that ends the scene and that is the first time the audience knows she has fallen in love with her master: “Yet a barful strife! / Whoe'er I woo, myself would be his wife” (ll. 41-42).

Cesario and Orsino are once again in intimate conversation in II.iv, a scene that has no equivalent in Riche's tale. Riche simply announces that the duke has chosen Silvio [Cesario] “to bee his messenger to carrie the tokens and love letters to the Ladie Julina [Olivia].” In Twelfth Night, this second conversation is interrupted
by Feste's song and then resumed with even greater intensity. Both parts of the conversation, moreover, repeat
the rhythm of II.iv: they begin with Orsino's insistence on privacy with Cesario, they require him to oscillate
between his self-indulgent passion for Olivia and his troubled but intense absorption in Cesario, and they
present that absorption in terms that reflect and activate the spectators' sense of Viola's multiple identities and
hence of desire's possibilities.

In the first part of II.iv, Orsino sends Curio away to seek Feste and then summons Cesario to “Come hither,
boy” (l. 29).  But again, the message he offers in this private moment is in fact a self-indulgent gesture
toward himself as the model for “all true lovers” (l. 17), and again it is Viola/Cesario whose genuinely wistful
response to the music attracts his focus on to him/her rather than on his own alleged passions:

Duke. Thou dost speak masterly.
My life upon't, young though thou art, thine eye
Hath stay'd upon some favor that it loves.
Hath it not, boy?
Vio. A little, by your favor.
Duke. What kind of woman is't?
Vio. Of your complexion.
Duke. She is not worth thee then. What years, i'faith?
Vio. About your years, my lord.
Duke. Too old, by heaven. Let still the woman take
An elder than herself.

(ll. 22-30)

Orsino's interest in Cesario's melancholy response to the music initiates an inquiry into the experience that
underlies it. Dale Priest notes how that experience reaches out to implicate Orsino himself, as when Cesario
implies to Orsino that the “favor” that his eye lingers lovingly upon is the duke's countenance. Cesario's
concentration on Orsino's complexion and years causes the duke to assume an avuncular tone, as if he is
evading or resisting this deepening involvement with this mysterious creature “That can sing both high and
low” (II.iii.40-41).

After Feste's song, Orsino again demands to be left alone with his page: “Let all the rest give place” (II.iv.79).
Once more, his first words are a Petrarchist exhortation to “get thee to yond same sovereign cruelty” (l. 80),
which lead again to an insistence on the preciousness of his feelings:

Between that love a woman can bear me
And that I owe Olivia.

(ll. 101-3)

Viola's incomplete response “but I know—” may be deliberately unfinished or broken off by Orsino. The
choice determines whether his question, “What dost thou know?” (l. 104) indicates rapt curiosity or scornful
dismissal. Viola's next speech introduces herself in thinly veiled form:

My father had a daughter lov'd a man
As it might be perhaps, were I a woman,
I should your lordship.

(ll. 107-9)

As if enchanted, Orsino is drawn further into the story: “What's her history?” Viola tells how “she pin'd in
thought” and how “she sate like Patience on a monument, / Smiling at grief” (ll. 109, 112, 114-15). Like
Rosalind, she breaks the spell herself by abruptly altering her tone, speaking as Cesario, himself “in standing water, between boy and man” (I.v.159), on behalf of “we men.” But Orsino remains spellbound: “But died thy sister of her love, my boy?” Viola's riddling answer alludes to her layered genders:

I am all the daughters of my father's house
And all the brothers too—and yet I know not.

(II.iv.119-21)

She then once more assumes the brisk tones of Cesario—“Sir, shall I to this lady?”—and this time Orsino follows her lead, ending the scene by resuming his Petrarchist guise:

To her in haste; give her this jewel; say
My love can give no place, bide no denay [sic].

(II.iv.221-24)

In the modern theater, the audience's knowledge of Cesario's identity, which gives it the advantage of dramatic irony over Orsino in these duet scenes, is reinforced by the “theatrical irony” of the presence of a female performer in the role of the disguised heroine. Orsino found Cesario “semblative [of] a woman's part” (I.iv.34), but his failure to perceive Viola's female presence often makes him a more absurd figure than he was originally. On the Elizabethan stage, however, where Viola's assumption of male disguise blended with the play-boy's resumption of male identity, Orsino was protected from such ridicule. But the play then generated anxiety about homoerotic intimacy at the metatheatrical level, between an adult male actor and one of the troupe's apprentices.

Similar anxieties were evoked at its mimetic level by Antonio's selfless and reckless passion for Sebastian, which Shakespeare added to the material he adapted from Riche's tale. Antonio echoes Orsino's eroticized friendship with Cesario, and for some spectators probably evoked the homoeroticism that enemies of the stage associated with the playhouse. Although most critics claim that Antonio, like his namesake in The Merchant of Venice, loses his friend to marriage, enabling the play to create “a context in which sexual ambiguity presages fulfillment rather than damnation,” Joseph Pequigney argues that Sebastian never casts off Antonio's love and that a homosexual liaison is consistent with “the diverse bisexual fictions that make up Twelfth Night,” as well as an even more explicit replication of alleged homoeroticism within the acting company.  

TWELFTH NIGHT: THE FINAL SCENE

The intimate scenes between Orsino and Viola contrast sharply with the crowded, bustling farce of the low-comic scenes, as Jean Howard has observed in her study of the play's varying tonalities. They also help to prepare the spectator for the violence of Orsino's outburst when he hears that Cesario has married Olivia. That outburst was anticipated by Antonio's reaction to Sebastian's evident duplicity, in which he compared “that most ingrateful boy” to “a witchcraft” (V.i.76-77). The strength of Orsino's outrage indicates a wound deeper than his alleged affection for Olivia. When she enters, he observes her presence (instead of greeting her) in a single line of Petrarchan cliché, “Here comes the Countess, now heaven walks on earth” (V.i.97). Abruptly resuming his interrogation of Antonio, he then fails to answer her direct question addressed to him (“What would my lord … ?” [l. 101]), a failure that would be either the result or the cause of her immediately turning to Cesario. His first direct address to her in the play, “Gracious Olivia—” (l. 105) either runs out of steam or is cut short by Olivia. By contrast, his discovery of Cesario's apparent betrayal of him elicits an explosion of homicidal vengefulness nominally addressed to Olivia but in fact aimed primarily at his page: “Why should I not (had I the heart to do it), … Kill what I
love?” (ll. 117-28). While Olivia remains the “marble-breasted tyrant” she has always been in his Petrarchist fantasy, Cesario, whom he tendered dearly, has shocked him with an act of betrayal. He then turns to the page, whom he orders to the slaughter:

Come, boy, with me, my thoughts are ripe in mischief.
I'll sacrifice the lamb that I do love,
To spite a raven's heart within a dove.

(ll. 129-31)

Viola/Cesario's reply, matching Orsino's concluding couplet, meets the duke's homicidal threats with a martyr's eagerness:

And I most jocund, apt, and willingly,
To do you rest, a thousand deaths would die.

(ll. 132-33)

Turning to Olivia, the page explains himself in couplets that are the most direct sentiments Viola has uttered about Orsino since the brief soliloquy following their first meeting:

More than I love these eyes, more than my life,
More by all mores than e'er I shall love wife.

(ll. 134-36)

Accentuated by rhyme, these impassioned speeches articulate in public the nature of the relationship Orsino and Viola have played out in and between the lines of their intimate scenes together. As John Russell Brown has noted, Orsino's agonized sense of betrayal arises more from the loss of Cesario than from the loss of Olivia, a reaction that permits the audience to accept his love for Viola when her true sex is revealed.30

Even after that revelation, Orsino twice refers to her as if she were male. On the theatrical level she still was and always would be male, but on another level Orsino wants to establish continuity with their earlier moments of intimacy:

Duke. Boy, thou hast said to me a thousand times
Thou never shouldst love woman like to me.
Vio. And all those sayings will I over swear,
And all those swearings keep as true in soul
As doth that orbed continent the fire
That severs day from night.
Duke. Give me thy hand,
And let me see thee in thy woman's weeds.

(V.i.267-73)

A few lines later, he speaks to her in her female identity, and then offers his own hand (“Here is my hand”) to “your master's mistress” (ll. 325-26). Orsino ends the scene by announcing that “a solemn combination shall be made / Of our dear souls” (ll. 383-84) and turns once more to his beloved:

For so you shall be while you are a man;
But when in other habits you are seen,
Orsino's mistress, and his fancy's queen.

(ll. 385-88)

Although using the page's name may represent a wish to retain the relationship with his male servant, the final couplet restates the desire to see Viola dressed “in her woman's weeds” and can therefore define Orsino’s final attitude more as impatience or relief than as uncertainty or disappointment about her gender.  

Whether Viola removes a hat or releases bound-up hair, like Julia, she remains in male attire despite her resumption of female identity and the performer’s resumption of whatever mannerisms, if any in this case, were used to signify it. Her page's apparel may in fact now accentuate her feminine identity, but Orsino's comment on the gender specificity of her clothing and his use of the name Cesario, whatever his own attitude, underscored the presence of the boy actor for the audience.

Such reflexive allusion to the actor's maleness generated emotional crosscurrents counter to the play's drive toward heterosexual union. This prospect is always potentially present in the world of the playhouse when heterosexual intimacy is portrayed by an all-male company, but usually remains dormant unless something reflexive—like continued verbal reference to the abandoned but still visible cross-gender disguise—calls attention to the principle of layers of gender identity and so keeps spectators alert to all of the layers involved.

In modern productions, the allusions to Viola's male identity are comic rather than reflexive or metatheatrical, and the marriages that end the play seem “natural”; that is, the genders of the characters match those of the performers. But in the original production, these final allusions to the male component of Viola's identity actually underscored the existence of another level of pretense, in which the two brides-to-be in the play were young male actors. Calling attention to that pretense, which the audience had thought it had agreed to accept without question, now threatened to undercut the conventional ending in heterosexual union. For some spectators, the play's exposure of its own artificiality might even have implied another and very different ending based on the gender of the actors, and perhaps on suspicions that boy actors served as catamites within all-male companies. For other spectators, the stress on the play-boy's presence simply demonstrated with more explicitness than usual what they “always knew” a play to be—a theatrical illusion they had paid to see and could see again, along with others like it, whenever they sought diversion from “the wind and the rain.”

In As You Like It, a similar movement toward the world of the playhouse, which also stresses the gender of the boy actor, is delayed until the epilogue. In Twelfth Night, by contrast, Viola remains in male attire, is still referred to as “boy” by Orsino—either out of habit or with self-conscious irony or possibly both, seriatim. In the absence of an epilogue, the audience's final impression of Viola includes her still contending with disguise as “a wickedness.” G. K. Hunter's summation of the general differences between the heroines also applies to the boy actresses in their final appearances: “Rosalind is able to use her disguise as a genuine and joyous extension of her personality; Viola suffers constriction and discomfiture in her role.” Hunter may be right about Viola, but not about the performer, for in the absence of sequential off-layering, the male garb proclaims the simultaneous presence of all three layers of identity. The movement from play to playhouse negotiated by the epilogue in As You Like It occurs in Twelfth Night in Feste's final song. Alone onstage, Feste sings a kind of autobiographical sketch, tracing a few stages in a life cycle to suggest that pain and suffering are as inevitable and relentless as the “rain it raineth every day,” and have been so since “the world begun” (V.i.405). With its surprisingly self-referential third line—“But that's all one, our play is done”—the last stanza sets the song's darker vision in the context of yet another vision—one that redefines the play just performed as a compassionate even if commercial effort to provide solace for the gloominess of the human condition: “And we'll strive to please you every day.”

FEMALE PAGES AND SENSATIONALIZED INTIMACY: FOUR VARIATIONS
Most other English dramatists who took up the heroine in male disguise followed *James the Fourth* rather than *Twelfth Night* in that female pages appear in intimate scenes only with female characters. Within the world of the play there is never any suggestion of lesbianism (evidently too threatening or incredible an idea for the commercial stage of the period), so that the pursuing women are simply foolishly mistaken about the object of their affections. Unlike Shakespeare, other English dramatists not only ridicule the lady's obsessive infatuation with the shy page, but frequently heighten the farcical effects by multiplication and “surprise,” as well as by coarsening the tone of intimate scenes. Four of these plays rework intimate moments or relationships found in *Twelfth Night*.

**RAM ALLEY**

Lording Barry's *Ram Alley* (King's Revels, 1607-8), is one of the first plays to multiply intimate moments by having the female page interact with more than one female character. The heroine, Constantia, who has donned male attire to follow the man she loves, enters his service as a page and beholds him wooing the wealthy Widow Taffeta. Like Orsino, Boutcher does not pursue his intended with genuine fervor, but instead of serving as his emissary, as Viola does, the page, presumably adopting a man-about-town air, advises him to approach the mistress by way of her servant, “for you must know / These waiting-maids are to their mistresses / Like porches unto doors: you pass the one / Before you can have entrance at the other.” The equivalent in *Twelfth Night* would be to have a suavely urbane Cesario urge Orsino to make love to Maria in order to obtain Olivia. The page recoils, however, when the Maria figure, of course depicted by another play-boy, attempts to seduce him:

A pretty knave, i'faith! Come home tonight,  
Shalt have a posset and candi'd eringoes,  
A bed if need be too. I love a life  
To play with such baboons as thou.

(ll. 817-20)

The bawdy tone of these passages typifies the coarseness of the play. For example, Barry makes Constantia fear not that she will be shamed if discovered wearing male attire but that her own sexual excitement at seeing male apparel will give her away:

Lord, how my feminine blood stirs at the sight  
Of these same breeches! Methinks this codpiece  
Should betray me.

(ll. 7-9)

Writing for a minor boy company when the vogue for children's troupes was ending, Barry burlesqued the conventions of cross-gender disguise by turning tactful scenes of intimacy into sexual farce.

**NO WIT, NO HELP LIKE A WOMAN'S**

For the main plot of *No Wit, No Help Like a Woman's* (Lady Elizabeth's? c. 1611), Middleton adapted an Italian academic comedy, Porta's *La Sorella*, but the subplot, which is entirely his invention, is a farcical reworking of the Viola-Olivia relationship in *Twelfth Night*. It is also a female version of his own early city comedies, in which a “prodigal daughter,” Kate Low-water, outwits a greedy widow, Lady Goldenfleece, who, together with her late husband, had bilked Kate and her husband of their estate. Early in this play, Kate enters the widow's house disguised as “a gallant gentleman, her husband like a serving-man after her” (II.i.169). As a swaggering gallant, Kate drives away the rival suitors and hopes to regain her property by winning the widow's heart. The plan goes beyond the verbal audacity with which Viola unintentionally
arouses Olivia's love. Kate will “put her to't, i'faith” (II.iii.94), that is, gain the widow's heart by all but conquering her body. Kate instructs her husband to stand by, ostensibly to rescue the widow from rape but really to prevent the disclosing of Kate's gender. But the widow is taken with Kate's exhibition of macho bravado and declares that she will marry this “beardless youth”: “with this kiss / I choose him for my husband” (ll. 186-87). As in *Twelfth Night*, a twin brother, split off from the heroine, arrives to provide a match for the widow and to facilitate Kate's undisguising: “You can but put me to my book, sweet brother, / And I've my neck-verse perfect, here and here” (ll. 343-44). Exactly where the performer locates his “neck-verse” is not clear from the text. The editor of the Regents edition here adds a stage direction, “Removes her disguise, revealing her bosom,” along with a note to the effect that “Mistress Low-water's neck-verse … is her breasts” (125), without explaining how this effect might have been created by a young male actor.

Far coarser than Shakespeare's duets between Cesario and Olivia, Middleton here achieves broad comic effects: one play-boy oscillates between Kate's feminine modesty and a brazen male persona, while the other depicts the tension between the widow's feigned coyness and her genuine sexual excitement. Kate's impersonation of a brash youth evokes the presence of both male performers, again articulating the separate layers of gender identity in the enactment of both roles, highlighting the artistry required to negotiate them, and exaggerating the well-worn roles of cheeky female page and lusty, avaricious widow into opportunities for theatrical virtuosity.

**ANYTHING FOR A QUIET LIFE**

Further elaboration of situations first found in *Twelfth Night* is illustrated by *Anything for A Quiet Life* (1619), where Middleton used an intimate scene between mistress and page in a drastically abbreviated subplot. To make the page's revelation of gender a surprise to the audience, or at least to cloud it in uncertainty, Middleton does not reveal that Selenger, Lord Beaufort's servant, is Mistress George Cressingham.

Selenger, who is pursued by Mistress Knavesby, is a shy rather than a saucy version of the page, a mere pawn of the clever wench in control of the intrigue. Unlike Olivia, who is truly infatuated with Cesario, Mistress Knavesby is merely using the page to discourage Lord Beaufort from trying to seduce her. She literally entangles Selenger in her intrigue by asking the page to hold a skein of yarn for her to unwind and then grasping it in such a way as to hold him her “prisoner”:

```
for, look you, you are mine now, my captive manacled, I have your hands in bondage.
```

(III.i.42-44)

Both characters use the stage business as a conceit for sexual entrapment and resistance that threatens at one point to become more than a conceit:

```
Mis. G. Cres. ... pray you, release me now.
Mis. Kna. I could kiss you now, spite of your teeth, if it please me.
Mis. G. Cres. But you could not, for I could bite you with the spite of my teeth, if it pleases me.
```

(ll. 47-51)

They spar until Lord Beaufort enters, seeking his prey. He takes in the sight with exquisite politesse, simply observing that “you are busy” (l. 85), and offers to withdraw. Mistress Knavesby frees her captive, who leaves with a smutty masculine retort: “I'll ne'er give both my hands at once again to a woman's command; I'll put one finger in a hole rather” (ll. 92-93).
In the final scene, when Beaufort tells Knavesby that his wife has slept with the page, Mistress Knavesby confesses that “we lay together in bed” (V.ii.218), but Middleton then directs the audience's attention to the presence of “Mistress George Cressingham in female attire” (l. 214), to use the words of the stage direction. The revelation may or may not have surprised the audience, but her undisguising was either cut from the text or, given the audience's familiarity with the motif, could have been assumed to take place offstage.

A MAD COUPLE WELL MATCHED

Richard Brome's *A Mad Couple Well Matched* (Beeston's Boys? 1636?) involves the heroine in male disguise with three different women. Although Brome never informs the audience that “this beardless Bellamy” is a woman, enough hints are furnished to arouse suspicion. In a scene reminiscent of the first meeting between Olivia and Viola, a citizen's wife named Alicia Saleware is the first woman to fall for Bellamy. She receives this “handsome youth,” an emissary of his employer, Lord Lovely, willfully misinterprets his remarks, kisses him, and fawns over him. In a subsequent scene, Lady Thrivewell, who has also fallen for young Bellamy, is seen in intimate conversation with the page. Mistress Crosstill, a widow, is the third woman to fall for Bellamy and tries to woo him even at the same time she herself is being wooed by a widow-hunting gallant.

Toward the end of the play, her brother, Fitzgerald, suddenly appears, demanding that Lord Lovely produce his sister Amy, who left home two years ago to attend his Lordship. Bellamy then enters “in a woman's habit” and explains that she adopted “a masculine boldness” to be near the man she loved but feared she could never marry (V.ii.246-47). Unlike Orsino, Lovely did not find himself attracted to Bellamy, but he is as quick as the duke of Illyria was to propose to his former page.

MALE HOMOSEXUALITY SENSATIONALIZED: SHIRLEY'S THE GRATEFUL SERVANT

Not until Shirley's *The Grateful Servant* (Queen Henrietta's, 1629) did another playwright explore the anxieties that an Orsino might feel about his attraction to his page. To stress the point, Shirley made the audience wait until IV.iii for explicit revelation of the gender of the page, a delicate lad named Dulcino, who attracted not one but two adult males and appeared in duet scenes with each of them.

The first of these Orsino figures is Foscari, whom the page serves out of gratitude for having been “rescued … from the Banditti.” Although Foscari claims to love Cleona, he is so strongly attached to Dulcino, this “sweet-faced thing, … [with whom] some ladies / Might change their beauties” (21). In a scene that recalls Orsino's avuncular advice about women to Cesario, Foscari warns Dulcino against the wiles of “some wanton lady [who] hath beheld thy face” (19), and, fearing that this “boy, so young and beautiful, / [is] apt to be seduced” by some court lady, he promotes him from his servant to “my companion” (20). Dulcino carries Foscari's messages to Cleona, who never becomes infatuated with the messenger as Olivia does with Cesario, and Shirley even has Cleona's comic servant spy upon the lady and the page in order to keep their duet at the level of farce. When Foscari decides to take monastic vows, he insists that Dulcino accompany him. The page agrees and is later extricated from this plight not through the removal of disguise but through the intervention of Father Valentio, who recognizes him as Leonora, the missing princess of Milan.

The second Orsino figure is the duke of Savoy, who had fallen in love with Leonora from her picture and hoped to marry her, but hearing of her father's plans for another match half-heartedly decides to court Cleona, Foscari's beloved. While visiting Cleona, however, he first sees Dulcino and is love-struck by the sight: “What boy is that? … It is no common face” (31). Shirley points up the contrast between the duke's perfunctory wooing of Cleona and his excited discovery of Dulcino with an abrupt midline shift:

There is a virtuous magic in your eye,  
For wheresoe'er it casts a beam, it does  
Create a goodness; [to Cleona] you've a handsome boy.
In act III, when told that Cleona is ill, he first inquires for “the pretty boy I told thee of” before announcing that “we are resolv’d to comfort her” (50-51).

In the opening soliloquy of IV.ii, the duke tries to deny any sexual interest in the missing Dulcino but recognizes the nature of his “foolish passion”:

Our hot Italian doth affect these boys
For sin; I've no such flame, and yet methought
He did appear most lovely; nay, in his absence,
I cherish his idea; but I must
Exclude him while he hath but soft impression;
Being removed already in his person,
I lose him with less trouble.

(64)

Only in Dulcino's absence can the duke maintain a platonic attitude toward the page. Shakespeare hinted at such anxieties in Orsino but never allowed him to pine for Cesario so explicitly nor to express relief when the page he loves turns out to be a woman. Shirley's duke is more direct:

I'll do my heart that justice to proclaim
Thou mad'st a deep impression; as a boy
I loved thee too; for it could be no other,
But with a divine flame; fair Leonora,
Like to a perfect magnet, though enclos'd
Within an ivory box, through the white wall
Shot forth embracing virtue: now, oh now,
Our destinies are kind.

(90-91)

Foscari is astonished—“This is a mystery, Dulcino!”—but resumes his courtship of Cleona, the second choice to Dulcino of both men throughout the play. One almost wishes that Leonora's twin brother would wander on stage to provide a match for Foscari.

In *The Grateful Servant*, as in *Twelfth Night*, adult male characters feel themselves attracted to a shy and delicate page whom they discover to be a female character, played as always by a male actor. Although reflexive allusions to the performer's gender are, as we have seen, inherent in virtually any play with a cross-dressed heroine, these two plays, and some of the others surveyed in this chapter, are exceptional. Their uniqueness lies in their linking the intimacy between characters in the world of the play to possibilities of intimate homoerotic relations between performers in the world of the playhouse.

In Shakespeare's previous disguised-heroine plays, we noted fleeting glances at male homoerotic behavior involving play-boys as cross-dressed female characters, as in the use of the name Ganymed, or in Nerrisa's offstage success while disguised as a clerk in obtaining Gratiano's ring. Given the allegations that play-boys were catamites, such glancing allusions must have produced a modicum of resonance. In *Twelfth Night*, Shakespeare brought these extradramatic resonances more fully into the world of the play than he had in previous works, and he was followed in this regard, albeit in different ways, by such dramatists as Barry, Middleton, and Brome. Shirley went further than Shakespeare by doubling the Orsino figure and by making one of the two worry about his sexual inclinations, thus articulating what in *Twelfth Night* had been confined to a possible subtext of the master-page relationship.
It was at least seven years before Shakespeare wrote another play with a heroine in male disguise, and that work, *Cymbeline*, moved in yet another direction. There the short-lived relationship between eroticized female page and master, that is, between Fidele and the Roman general, Lucius, is treated more explicitly than in the plays before *Twelfth Night*, even if it has less structural and thematic centrality than the mutual infatuation between Cesario and Orsino.

**Notes**

1. For discussions of the date of *Twelfth Night*, see the introductions by Elizabeth Story Donno, ed. (Cambridge: Cambridge University Press, 1985), 1-3; and J. M. Lothian and T. W. Craik, eds. (London: Methuen, 1975), xxvi-xxxv.

2. Performers too feel anxiety when performing scenes that involve or suggest sexual intimacy. In an interview with Leslie Bennetts published in *New York Times*, November 17, 1987, C 11, both Kenneth Welsh and Kathy Bates describe anxieties they felt when performing in Terrence McNally's *Frankie and Johnny in the Clair de Lune*, “a two-character play which begins in Frankie's bed with the frenzied sounds of lovemaking, requiring some discreetly handled nudity.” Mr. Welsh attributed his fear to the fact that “the play demands so much intimacy, not only physical but emotional,” while Ms. Bates ascribed her initial reluctance to take the role to “fear of intimacy … a big one for me.”

5. John G. B. Streett, “Some Aspects of the Influence of the Boy-Actress Convention on the Plays of Shakespeare and Some of His Contemporary Dramatists” (Ph.D. diss., Oxford, 1973), chap. 3. Andrews, *Scripts and Scenarios*, 107-8, suggests commercial troupes were more willing than academic troupes to involve female characters in explicitly sexual stage business because the roles were played by “full time professional apprentices, not gentlemanly youths dragooned into acting just once or twice in their lives.”

7. Pryme, *Histrio-Mastix*, 386, 166. The general problem of equipping male actors to display female breasts is discussed by June Schlueuter, “‘Stuffed, as they say, with honorable parts’: Female Breasts on the English Renaissance Stage,” *ShY* 3 (1992): 117-42. She also cites the ending of John Day's *Law Tricks* (Queen's Revels, c. 1604), ed. John Crow, Malone Society Reprints 89 (London: Malone Society, 1949 [1950]), V.ii, where a female character's “bosome bare” (l. 2168) is supposedly exposed to the view of another character, but not necessarily of the audience, to verify her female identity. (I am grateful to Alan Dessen for supplying both Schlueuter and me with this example.) There are also examples of stage business involving “petting”: in Fletcher's *Love's Pilgrimage*, a woman nursing the wounds of a lecherous man pretending to have been injured in battle, asks him, “What do you mean, why do you kisse my breasts?” (IV.iii.62); in Middleton's *Women Beware Women* (1613-22), ed. Roma Gill (London: Ernest Benn, 1968), the duke tells Bianca that he can “feel thy breast shake like a turtle panting / Under a loving hand that makes much on't” (II.ii.322-23); in Jonson's *The Devil Is an Ass*, the stage direction describes Wittipol's “playing with her [Mrs. Fitzdottrell's] paps” (II.vi.70).

edition.

15. Clifford Leech, “*Twelfth Night* and *Shakespearian Comedy*” (Toronto: University of Toronto Press, 1965), 50, has stressed the affective implications of the audience's awareness of the performers' gender in the scenes between the two boy heroines: “we must remember that in a modern production the use of actresses for the women's parts materially lessens the disturbing quality.” Some modern spectators of either gender might disagree. For example, Sue-Ellen Case, *Feminism and Theatre* (New York: Macmillan, 1988), 25-26, speculates on the detachment of women spectators from scenes of intimacy between female characters played by female impersonators. Matthew H. Wikander, “As Secret as Maidenhead: The Profession of the Boy-Actress in *Twelfth Night*,” *CompD* 20 (1986-87): 352, suggests still another dimension: “What in the first exchanges between Olivia and Viola seems sexual rivalry might … also be construed as professional rivalry, for both ‘ladies’ enjoy the same marginal status in the company of which they are apprentice members.”

18. J. Dennis Huston, “‘When I Came to Man's Estate’: *Twelfth Night* and Problems of Identity,” *MLQ* 33 (1972): 275, notes that despite this line Cesario is always described as a page and never as a eunuch.

22. Joseph Pequigney, *Such Is My Love* (Chicago: University of Chicago Press, 1985), 30-41, regards sonnet 20 as an attempt by the speaker to deny what he is also in the process of acknowledging as homoerotic attraction.

23. As Wikander observes, “As Secret as Maidenhead,” 350, activating the audience's awareness of the gender of the boy actress threatens to make “Orsino's interest in Viola's mouth and throat … not merely bawdy but obscene.” Jan Kott, “Shakespeare's Bitter Arcadia,” in *Shakespeare Our
Contemporary, trans. Boleslaw Taborski, 2d ed. (London: Methuen, 1967), 202ff., reads Orsino's description of Cesario as that of an "ephebe"—what Jardine, Still Harping, 17, quoting the opening lines of Marlowe's and Nashe's Dido (Chapel Children, c. 1586), calls a "female wanton boy." In a more recent work, "Twins and Travesties: Gender, Dependency, and Sexual Availability in Twelfth Night," in E.P., 27-38, Jardine modifies her views significantly by stressing the real or presumed sexual availability of young household servants of either sex, but in my view she again somewhat overstates her case: "Eroticism, in the early modern period, is not gender-specific, is not grounded in the sex of the possibly 'submissive' partner, but is an expectation of that very submissiveness" (34).

24. Alexander Pope's insertion at this point of a stage direction, "Exit Curio," makes sense of "Enter Curio and others" two dozen lines later.

25. Priest, "Shakespeare's Subjunctive Leads," 38. See OED for the range of meanings of "favor," which also includes trinket, beauty, permission, and graciousness, as well as face.

29. Taylor, To Analyze Delight, 93, finds Orsino's agony deepened by allusions to Abraham's intended sacrifice of Isaac, as well as by the folio punctuation of two other passages.

33. Adelman, "Male Bonding," 85-90, sees the addresses to Viola as if she were male as evidence of Orsino's wish for union with an androgynous figure, either to legitimize his bisexuality or to integrate love and friendship. Dusinberre, Shakespeare and the Nature of Women, 267, laments Viola's loss of the androgyne's freedom.

36. Lording Barry, Ram Alley, ed. Peter Corbin and Douglas Sedge (Nottingham: Nottingham Drama Texts, 1981), 5, II. 1-6. All references to the play are to this edition and are cited in the text.

37. For the history of the Children of the King's Revels, see Harold N. Hillebrand, The Child Actors (Urbana: University of Illinois Press, 1926), 220-36.

38. The date is established by Johnson, ed., No Wit, No Help Like a Woman's, xi-xiii. All references to the play are to this edition and are cited in the text. On the source, see D. J. Gordon, "Middleton's No Wit, No Help Like a Woman's and Della Porta's La Sorella," RES 17 (1941): 413-14; and Rowe, Thomas Middleton, 114-30.

The kind of comedy that was practiced by Shakespeare has repeatedly challenged definition. Though his last comedies have been retrospectively classified as romances, most of their components are equally characteristic of his earlier ones: love, adventure, coincidence, recognition, and occasional pathos. The problem is not simplified by the circumstance that his greatest comic character, Falstaff, was far more impressive in two histories than he is in The Merry Wives of Windsor. Traditional definitions of the comic somehow fail to hit the Shakespearean mark, perhaps because they tend to emphasize the spectatorial attitude of ridicule. Shakespeare’s attitude is more participatory; its emphasis falls upon playfulness, man at play, the esthetic principle that Johan Huizinga has so brilliantly illuminated in his historico-cultural study, Homo Ludens. Whereas we may laugh at Ben Jonson’s characters, we generally laugh with Shakespeare’s; indeed, if we begin by laughing at Falstaff or the clowns, we end by laughing with them at ourselves; semantically speaking, they are therefore not ridiculous but ludicrous. The critical approach that best succeeds in catching this spirit, it would seem to me, is that of C. L. Barber in Shakespeare's Festive Comedy. That the same approach can be applied to Plautus, as Erich Segal has convincingly demonstrated in his book Roman Laughter, suggests that “the Saturnalian pattern” may well be universal. Twelfth Night very appropriately marks the culmination of Professor Barber’s argument. Since the play is so rich and the argument so fertile, I am tempted to add a few notes here, encouraged by his gracious recollection that our personal dialogue on comedy has extended over many years.

Any speculation about Twelfth Night might start with its alternative title, which has no counterpart among the other plays in the First Folio. The subtitle What You Will echoes the common and casual phrase that Olivia uses at one point in addressing Malvolio (I.v.109); it would later be used as a title by John Marston; and the German version is simply entitled Was ihn wollt. It is not equivalent to As You Like It, Bernard Shaw would argue; the latter means “this is the sort of play you would like”; the former means “it doesn’t really matter what you call this play.” To designate it by the seasonal dating would have touched off some associations, especially since Twelfth Night signaled the grand finale to the Christmas entertainment at Queen Elizabeth’s court, and sometimes featured a performance by Shakespeare’s company. But the English term seems relatively vague, when contrasted with the overtones of the French and Italian translations. La Nuit des Rois almost seems to promise a visitation of the Magi; Shakespeare anticlimatically gives us, instead, the iconological joke about “We Three” and a clownish snatch of song from Sir Toby, “Three merry men be we” (II.iii.17, 76-7). La Notte dell’Epifania may also hold theological—or at least, in Joycean terms, psychological—connotations. Shakespeare merely seems concerned to promise his audience a pleasant surprise by evoking a winter holiday, even as he did with the opposite season in A Midsummer Night's Dream. Festivals are the matrices of drama, after all, and that “holiday humor” in which the transvested Rosalind invites Orlando to rehearse his wooing sets the prevalent mood for Shakespearean comedy (As You Like It, IV.i.69).

Some of Shakespeare’s other comedies have titles so broadly general that they could be interchanged without much loss of meaning: The Comedy of Errors, Much Ado About Nothing, All’s Well That Ends Well. Twelfth Night, which has figured more prominently in the repertory than most of the others, has frequently been cited by concrete reference to its most memorable characterization. Thus Charles I entitled it “Malvolio” in his inscribed copy of the Second Folio, and a court production for James I was entered into the records under that name. As it happens, five of the other parts in the play are actually longer than Malvolio’s: in order of length,
Sir Toby's, Viola's, Olivia's, Feste's, and even Sir Andrew's. Yet stage history has gradually made it clear that, with slightly less than ten per cent of the lines, this has come to be regarded as the stellar role. The other roles I have listed offer varied opportunities to actors and actresses, and Viola's embodies the special attraction of the hoydenish heroine in tights. That advantage is somewhat lessened by the complication of having to be passed off as identical with her unexpected twin brother Sebastian. Hence the plot "wants credibility," as Dr. Johnson put it, though our incredulity is all but disarmed by the Pirandellian comment of Fabian: "If this were play'd upon a stage now, I could condemn it as an improbable fiction" (III.iv.127-8). Henry Irving, Herbert Beerbohm Tree, and many other stars have absurdly twinkled in the part of Malvolio. There may be a latent significance in the fact that the leading actor of the Restoration, Thomas Betterton, played the adversary role of Sir Toby Belch.

The impression registered in the diary of John Manningham, who had attended a performance at the Middle Temple in 1602, is particularly significant:

At our feast wee had a play called "Twelue Night, or What You Will", much like the Commedy of Errores, or Menechmi in Plautus, but most like and neere to that in Italian called Inganni. A good practise in it to make the Steward beleeeve his Lady widdowe was in love with him, by counterfeyting a letter as from his Lady in generall termes, telling him what shee liked best in him, and prescribing his gesture in smiling, his aparaille, &c., and then when he came to practise making him beleeeue they tooke him to be mad.

It is true that Shakespeare's adaptation from Plautus had likewise dealt with a pair of twins divided by shipwreck and reunited after the contretemps of mistaken identity. Manningham might also have mentioned The Two Gentlemen of Verona, where the heroine disguises herself as a page so that she may serve the man she loves. And Manningham's Italian cross-reference has led the source-hunters to various plays and novelle which are quite analogous to the main plot. But the episode he singles out for praise does not figure in any of them. Malvolio, with no established source behind him, must be reckoned as one of Shakespeare's originals. Efforts to discern an actual prototype in the court gossip about Sir William Knollys, who was Comptroller to Her Majesty's Household, have carried little conviction. Nor is there much topical implication in Maria's qualified epithet, "a kind of puritan," which she herself immediately rejects in favor of "timepleaser" and "affectioned ass" (II.iii.140, 148). There is not very much in common between Jonson's Ananias or Zeal-of-the-Land Busy and this Italianate upstart who aspires to "be proud" and "read politic authors" (II.v.161). He is undoubtedly puritanical in the psychological sense; as Professor Barber perceptively comments, "he is like a Puritan because he is hostile to holiday." William Archer considered him more of a Philistine than a Puritan, more to be approached as a sequence of "comic effects" than as "a consistent, closely-observed type," and therefore somewhat opaquey presented as a personality. "He has no sense of humour," so Archer summed it up, "—that is the head and front of his offending."

In a formal as well as a functional manner, he is thus an intruder into the play. Shakespeare's plot, as its forerunners had shown, could have got along without him. Olivia already had two suitors to be rejected, plus the masculine twin who was ready to replace his sister as the object of Olivia's choice. The lovesick Duke Orsino, after the fiasco of his vicarious courtship, could submit no less quickly and rather more gracefully than she to this sudden change of partners. The odd-man out, Sir Andrew, might have weakly borne the full onus of the underplot, insofar as it burlesques the main plot and has its agor in the reluctant duel. Music sets the keynote at the beginning, at the conclusion, and throughout. Illyria would almost seem to be the idyllic setting for an operetta. Yet, despite the roistering-sorts of melody and the high-kicking capers of the roisterers, the cadence often has a dying fall. "O mistress mine" is balanced against "Come away, death," and the singer Feste—whom G. L. Kittredge called "the merriest of Shakespeare's fools"—shares his concluding refrain with the tragic Fool of King Lear: "For the rain it raineth every day" (II.iii.39ff; iv.51ff.; V.i.392; cf. King Lear, III.ii.77). Even in the sunniest of Shakespeare's comedies, there are shadows now and then, and it is worth remembering that Twelfth Night was probably conceived in the same year as Hamlet. The aura of
melancholy emanates from Olivia's household, but it extends to Orsino's palace because of his unwelcome suit. Widow-like, the veiled Olivia mourns her dead brother; Viola, the go-between, though she depicts herself as the mourning figure of “Patience on a monument,” cherishes justified hopes for her own brother lost at sea (II.iv.114).

Together, these adventurous siblings are destined to dispel the shade that has overcast the Illyrian horizon. Olivia's house of mourning should have been, and will again become, a house of mirth—to reverse the language of Ecclesiastes. Toward the end her kinsman, Sir Toby Belch, and his gregarious crew of what Malvolio will term “the lighter people” have been doing their damnedest to turn the kitchen into a tavern and to obliterate the differences between night and day (V.i.339). Over their eructations the hard-drinking Sir Toby fitly presides as a sort of miniature Falstaff, the local agent of revelry and misrule. “Th'art a scholar,” he tells his eager gull Sir Andrew Aguecheek, the carpet knight whose linguistic accomplishments are as limited as his skills at fencing and dancing. “Let us therefore eat and drink” (II.iii.13-4). Sir Andrew's surname bespeaks his pallid face and quivering figure; all his claims to wit and gallantry and bravado only exist in order to be put down. When Feste asks “Would you have a love-song, or a song of good life?” and Toby responds, “A love-song, a love-song,” Andrew gives himself away by blurring out, “Ay, ay, I care not for good life” (35-8). Akin to Justice Shallow and Master Slender, he is the ancestor of those witless foplings who will strive so vainly to cut a caper in Restoration comedy. And yet this ninny is not without his touch of Shakespearean poignance. When his mentor Toby—who is, if nothing else, a genuine bon vivant—complacently avows himself to be adored by Maria, Andrew sighs, “I was adored once too” (181). Behind that sigh lies some namby-pamby case history, about which we are relieved to hear no more.

Maria, the classic soubrette, is the most effectual of the plotters against Malvolio, and her recompense for forging the letter is marriage with Sir Toby. This provides a comic parallel for the two romantic betrothals, and it is announced by Fabian in the absence of the less-than-joyful couple, Toby having been discomfited along with Andrew by Sebastian. Since Andrew has essentially been a figure of fun, not a funster, he is gradually supplanted among the merrymakers by Fabian. It is Fabian who faces Olivia in the final disentanglement, backed by the festive exultations of the fool. Feste's maxim—“Better a witty fool than a foolish wit”—underlines the implicit contrast between himself and Andrew (I.v.36). One of the jester's assumed personae is that of the Vice, the principal mischief-maker in the old-fashioned morality plays (IV.ii.124). As “an allow'd fool,” he has the privilege of raillery, which we hear that Olivia's father “took much delight in” (I.v.94; II.iv.12). Her father's death, which cannot have happened very long before, has presumably added to her brother's in deepening the gloom of the abode where she now finds herself mistress. Shakespeare has gone out of his way to darken the background of the conventional situation among the lovers, possibly reflecting the widespread preoccupation with the theme of melancholia during the early years of the seventeenth century. If so, his ultimate concern was to lift the clouds, to brighten the effect of the picture as a whole by the deft use of chiaroscuro, to heighten the triumph of the comic spirit by presenting it under attack. And, of course, with the rise of Puritanism, it was increasingly subject to attackers.

Such considerations may help to explain why Shakespeare went even farther by introducing the character of Malvolio—a superimposition so marked that one of the commentators, F. G. Fleay, has argued that the two plots are separable and may have been composed at different times. That seems too mechanical an inference, since Shakespeare has taken pains to unify them; since Olivia is “addicted to a melancholy,” it follows that she should employ a majordomo who is “sad and civil,” as she says, “And suits well for a servant with my fortunes” (II.v.202; III.iv.5-6). Though she tolerates Feste, her first impulse is to dismiss him from her company. His response is both a catechism and a syllogism, demonstrating that she should not mourn because her brother is better off in heaven and proving the fool's dialectical point that his interlocutor must be still more foolish than he: “Take away the fool, gentlemen” (I.v.71-2). She is mildly cheered by the nimbleness of the repartee; but Malvolio is distinctly not amused; and his hostile and humorless reaction is our introduction to him. Gleefully and ironically recalling this exchange, Feste will reveal the natural antipathy that was bound to operate between himself and Malvolio: “‘Madam, why laugh you at such a barren rascal? An you smile not,
he's gagged.’ And thus the whirligig of time brings in his revenges” (V.i.374-7). Malvolio and Feste are brought together and kept at odds by a certain complementarity, like that between the melancholy Jaques and the festive Touchstone in As You Like It or the clowns and the “humorous men” of Jonson and Marston. The pretensions of the Alazon are thus laid open to the exposures of the Eiron.

The issue is sharply drawn by Sir Toby's entrance speech: “What a plague means my niece to take the death of her brother thus? I am sure care's an enemy to life” (I.iii.1-2). As a master of the revels, he and his fellow revelers embody the forces of life, on the one hand. On the other, the interloping Malvolio represents the force of care, which has usurped a temporary control over once-carefree Illyria. It is not for nothing that his name signifies “ill-wisher.” He is the perennial spoilsport, fighting an aggressive rearguard action against a crapulous playboy and his Bacchanalian cohorts. As Olivia's steward, Malvolio's functions are more than ceremonial; he can not only cut off the daily bounties of existence; he can threaten, and he does, to expel the incumbent devotees of good living. After Toby's rhetorical question on behalf of cakes and ale, seconded by Feste's plea for ginger, their prodigal levity takes the offensive against his false dignity. By a convention which is not less amusing because it is artificial, the practical jokers overhear—and react to—the soliloquy expressing Malvolio's fantasies and delusions of grandeur: “To be Count Malvolio! ...” (II.v.35). It brings home the self-love and the ambition to regulate the lives of others that they have resented all along. And it plays into the trap that Maria has baited, the letter that he is obliging enough to read aloud. To act out its malevolent instructions is to betray his solemn and pompous nature. Not only must this non-laugher—this agelast, as Meredith would classify him—doff his somber black for yellow stockings and cross-garters, but he must force his atrabilious features into an unremitting smile.

The romance of the main plot is ordered, or disordered, by the workings of chance: Viola has been saved “perchance,” and so may Sebastian be (I.ii.6, 7). The satire of the underplot is managed by human contrivance, which motivates the duel and fabricates the letter. Malvolio ascribes his prospective elevation to a wise providence (“it is Jove's doing”), but we know that it is a hoax on the part of Maria and her tosspot companions (III.iv.74-5). He is thereby prompted to strut through his grand scene of hubris, all the more ironic in its deliberate reduction of self-importance to silliness. Instead of having greatness thrust upon him, he is thereupon thrust down into a dark room, where he is bound and treated like a madman—like the Ephesian Antipholus in The Comedy of Errors, whose questioners look for symptoms of derangement in his answers. Malvolio's most pertinacious visitor and inquisitor is Feste, who has thrown himself into the persona of the neighboring curate Sir Topas. When the prisoner complains that the house is dark as hell, the pseudocurate replies in Feste's vein of Rabelaisian nonsense: “Why, it hath bay windows transparent as barricadoes, and the clerestories toward the south north are as lustrous as ebony; and yet complainest thou of obstruction” (IV.ii.36-9). At the height of his vainglory, Malvolio has admitted that his sartorial alteration had caused “some obstruction in the blood;” but this was nothing, if the result pleased Olivia; and to her inquiry about the state of his health he has answered, “Not black in my mind, though yellow in my legs” (III.iv.21, 26-7). The trouble was that so black a mind could never have become accustomed to bright colors.

It is therefore fitting that he be plunged into literal darkness, although Feste's paradoxes seem to suggest that brightness may have something to do with the eye of the beholder. Maria had begun by requesting Sir Toby to “confine” himself “within the modest limits of order,” and he had blustered back with a pun: “Confine? I'll confine myself no finer than I am” (I.iii.8-11). When we see Malvolio confined, we may be weak enough to feel sorry for him; Charles Lamb, with Romantic perversity, has even worked up “a kind of tragic interest”, and some of those leading actors who have appeared in the part have made the most of that potentiality. However, though Shakespeare's laughingstocks have a way of enlisting our sympathies, though we may be torn by Prince Hal's repudiation of Falstaff, though Shylock and Jaques may take with them some measure of respect when they make their solitary departures, we should be glad to get rid of Malvolio. Poetic justice prevails in comedy if not in tragedy, and it requires that he be finally “baffled” (V.i.369). Olivia can charitably speak, as his patron, of his having been “notoriously abuses” (379). But his parting vow of revenge has been neutralized by Fabian's wish that “sportful malice”—a combination of the ludicrous and the ridiculous—“May
rather pluck on laughter than revenge” (365-6). Nor, having witnessed his threat of expulsion to Sir Toby and his crew, should we repine at seeing this gloomy interloper expelled. As a sycophant, a social climber, and an officious snob, he well deserves to be put back in his place—or, as Jonson would have it, in his humor, for Malvolio seems to have a Jonsonian rather than a Shakespearean temperament.

What we have been watching is a reenactment of a timeless ritual, whose theatrical manifestation takes the obvious form of the villain foiled, and whose deeper roots in folklore go back to the scapegoat cast into the outer darkness. The business of baiting him is not a sadistic gesture but a cathartic impulse of Schadenfreude: an affirmation of Life against Care, if we allow Sir Toby to lay down the terms of our allegory. We could point to an illustration so rich in detail and so panoramic in design that it might prove distracting, if it were not so sharply focused on the conflict before us, Pieter Breughel's *Battle between Carnival and Lent*. There the jolly corpulent personification of *Mardi Gras*, astride a cask of wine and armed with a spit impaling a roasted pig, jousts against a grim penitential hag carted by a monk and a nun, and flourishing a paddle replete with two herrings. Beggars and buffoons and many others, the highly variegated proponents of revelry and of self-mortification, intermingle in the teeming crowd. Which of the antagonists will gain the upper hand? Each of them, in due season. J. G. Frazer has instanced many analogues for the observance, both in the Burial of the Carnival and in the mock-sacrifice of Jack o' Lent. Shakespeare loaded his dice on the side of carnival, in that hungover hanger-on, Sir Toby, as against the lenten Malvolio, that prince of wet-blankets. But Shakespeare was writing a comedy—and, what is more, a comedy written in defense of the comic spirit. He could commit himself, in this case, to the wisdom of folly and to the ultimate foolishness of the conventional wisdom. But, in his dramaturgy, he was moving onward to care, to death, to mourning, and toward tragedy.

**Criticism: Plot And Subplot: Jane K. Brown (essay date 1990)**

*In the following essay, Brown contends that Twelfth Night has two plots, one ruled by Olivia and one ruled by Orsino. These plots, argues Brown, are dramatized differently and correspond to two distinct worlds within the play.*

Doubleness of all sorts is typical of Shakespearean comedy. Nowhere, however, is doubling so fully worked out as in *Twelfth Night: or, What You Will*, the only play for which Shakespeare himself provided a double title, as Anne Barton points out.1 The play's *dramatis personae* reveals not only the twins at its center, but two rulers (a countess and a duke referred to as count), two sea captains, two authority figures (an uncle and a steward) in the house of the countess (who has lost father and brother), that uncle comically echoed in his friend Sir Andrew, two gentlemen attending on the duke, and even the clown unaccountably split into the figures of Feste and Fabian—a doubling so gratuitous that the roles are often collapsed into one in performance. Theme, structure and plot all turn on the various dualities the play explores, and everything is resolved in a moment of wonder at the doubleness of the play's and our own vision.

For this reason it is a particularly appropriate text in which to explore the kind of doubleness that concerns me today. My argument will be that *Twelfth Night* is a play of two plots corresponding to two worlds in the play, and that these worlds are represented differently. By represented differently I mean that the relation of language to reality in each is different. Thus, I will argue, the play operates in two modes of aesthetic illusion; furthermore, it contains reflections on its own doubleness and on the range of possible dramatic illusions open to it.
I.

We have become so accustomed to “high” and “low” plotting in Shakespeare that I must point out that I am not drawing that distinction here. I will not group Orsino, Olivia, Viola and Sebastian on the one hand, and Malvolio and the clowns on the other, and thus not high characters versus low, aristocrats versus servants, nor romantic lovers versus clowns. Partly, such distinctions do not work here, for clownish as Sir Toby is, as Olivia's uncle he is nevertheless an aristocrat. Indeed, Barbara Everett has remarked both on the interesting proximity of the romantics Orsino and Olivia to the low characters in the play, and also on the discrepancy between the high seriousness of Orsino's dreams of Olivia and what we actually see of her. I am concerned instead with a distinction implied by the way characters interact on stage, and this distinction turns out to be one of style and dramatic mode, not one of content or theme.

In these terms, the two worlds of _Twelfth Night_ are marked by the presence of their two rulers, the Duke Orsino and the Countess Olivia. Orsino would like their worlds to be one, but Olivia is opposed, so their double messenger Viola/Cesario must form the only link between them, except for occasional visits by Feste to Orsino's court. All the action takes place either at Orsino's court, in the absence of Olivia, or in Olivia's house without Orsino. In the first two acts everything happens within these two enclosures, except only the brief symmetrical scenes at the coast between Viola and Sebastian and their respective captains. Only gradually does the play escape these enclosures as Viola or Sebastian encounter other characters on the street, though never very far from Olivia's house. Orsino and Olivia meet on stage outside of Olivia's walls only at the end of the play and only as the cast assembles for the grand finale.

Their separation has less to do with suspense than with the fact that they were never destined for one another. The audience thus has a split view of the play. On the one hand we see the growth of Orsino's relationship with Viola. At Olivia's house, on the other hand, we see developing the relationship that results in the marriage of Olivia and Sebastian. Since Olivia responds only to Cesario's appearance and highly schooled rhetoric, it does not matter that Sebastian's courtship is actually conducted by Viola; in effect, he has wooed Olivia by proxy, as Orsino attempted to do. Viola is supposed to connect the two worlds, but, by virtue of her being a twin, instead divides the play into two plots.

These two plots are parallel to one another. Orsino and Olivia are tied by the initial letter of their Italianate names, by their rank (Orsino is repeatedly referred to in the play as count, not duke), and by their melancholy situations. Within three lines of the opening, the incapacitated Orsino's thoughts of love lead to death (“The appetite may sicken, and so die”, I.i.3; reiterated in the next line with “dying fall”); Feste sings him a song about death (II.iv.73) and invokes the protection of “the melancholy god” for him. His love is a torment, exposing him to the “fell and cruel hounds” (I.i.22) of his desires. Apart from Olivia, only Viola can focus his affections, and only after deciding to marry Viola can he make plans and function as a ruler. He seems like a fairy-tale prince under an enchantment that is finally lifted by Viola. Olivia's melancholy is more obvious. She will mourn the deaths of her father and brother for seven years, and lives in the dubious company of her melancholic steward Malvolio and her riotous uncle, Sir Toby Belch. From this self-imposed imprisonment she is freed by Viola, who wins her trust and love as she did Orsino's. Viola is thus not only the messenger linking the plots, but the redeemer in each, an angel figuratively as well as literally (“messenger” being the root meaning of angel). Viola's identical role in the two plots is the wedge that keeps them separate.

II.

Let me attempt now to characterize the differences in the use of language and therefore in the kinds of illusion that prevail in these two worlds. In Orsino's world we find assertive metaphoric language from the very first line of the play: “If music be the food of love, play on.” The conditional, “If music be the food of love”, makes metaphor the central issue, an issue whose importance is elaborated by the further proliferation: “Give me excess of it, that surfeiting, / The appetite may sicken and so die.” Similarly the rest of the speech bristles
with extended metaphors and similes—“like the sweet sound / That breathes on a bank of violets”, “Receiveth as the sea”, “That instant was I turn'd into a hart”, “like fell and cruel hounds”. This metaphorical language is extremely labile; in his fantastical fancy Orsino moves rapidly from love to death, from Olivia's purity to his own suffering. How do we keep up with the rapid transformations of “like the sweet sound / That breathes upon a bank of violets, / Stealing and giving odor”, with the shifts from sound to breath to the sight of the violets, with the confusion between giving and stealing? Or with the abrupt fall from “validity” to “abatement and low price” a few lines later? Such lavish metaphor and simile and such elaborate transformations of given into fanciful imagery are equally typical of Orsino's speeches and of Viola speaking to or for her master.

The concreteness of language at Olivia's house forms a striking contrast. We first encounter Sir Toby, Maria, and Sir Andrew; they discuss the same topics as Orsino, food (and drink) and love. Maria berates Sir Toby for drinking too much and for bringing Sir Andrew to woo Olivia. Love expresses itself in this scene not in chaste longing for a Diana but in the direct language of “accost”, which Sir Andrew then misunderstands even more concretely as Maria's name. Another parody of Orsino's “food of love” motif appears in Malvolio, who in I.v is “sick of self-love” and tastes “with a distempered appetite”. Here the motif leads not to flights of fancy, but to the comic predictability of the bilious steward. In II.i Feste will join the crew and the music will be as concretely present as the drinking; one will not be a metaphor for the other. Whenever, in Olivia's realm, words are understood to be metaphors, there is sure to be trouble: when Sir Andrew asks after Maria's metaphor in bringing his hand to the buttery-bar, he gets lost; the two knights cannot agree at the end of the scene whether Taurus represents sides and heart or legs and thighs. Things are little different when Olivia comes on stage. Olivia is introduced to us in an exchange with her fool, and she echoes Maria's complaints about dry jests. Indeed, Olivia is surrounded by a whole pack of fools, for Malvolio and Sir Toby enter in quick succession, both unable to dismiss the importunate Viola at the gates. Their language is none of it fluid or metaphorical. It is characterized—again—not by flights of fancy, but by repeated stumbles into the literal: the humor in all these exchanges involves a more literal, more concrete, meaning for a word than the one first assumed or the reduction of word to name. Repetition and a focus on the word as word or object provide the logic and continuity in this wordplay. Consequently it engenders a certain rigidity that accords with Olivia's rigidity in excluding the world in order to mourn the death of her brother, and that contrasts with the lability of Orsino's language. This is the dominant (though not exclusive) linguistic mode of Olivia's world.

Viola participates in the modes of both plots. Her disguise at Orsino's court divorces her from her real self, who loves Orsino. Since she may not love him when she is his page, she must interject hypothetical relatives and elaborate similes between them—“My father had a daughter lov’d a man / As it might be perhaps, were I a woman, / I should your lordship” (II.iv.107-109). All of her conversation with Orsino is in this “as if” mode. But at Olivia's house, Viola's disguise causes her sense of self to be rigid rather than labile. To Olivia she reports her master's love with literal honesty, and repels Olivia's advances with the same literalism: there is nothing metaphoric about her inability to satisfy the countess. Olivia and her followers may fail to understand, but the audience knows that Viola means exactly what she says. In Orsino's house only the fact of disguise was significant, but in Olivia's it is the content that matters; by impersonating her brother Viola smooths the later transfer of Olivia's passion. (The play emphasizes this continuity by showing Antonio's irrational adoration of Sebastian in II.i just after Viola has awakened the same irrational adoration in Olivia.) In Olivia's realm Viola's language is double. When she speaks for Orsino she uses the most beautiful conventional love language in the play. Her exchange with Olivia in I.v is instructive in this regard, for there Olivia undermines Viola's metaphors with her literalizing wordplay, reducing Viola's words “as secret as maidenhead” to heretical text, her own “graces” to objects on a schedule. Viola's speeches on behalf of Orsino continue in his hypothetical, metaphoric mode, but for herself she is equally capable of entering into witty exchanges with Feste and Olivia that depend on their literalizing reductiveness. Thus once again the contrast between the realms is between metaphorical displacement and literal directness. This difference extends beyond spoken language to include dramatic gesture. Let us compare, for example, Orsino's and Olivia's expressions of trust in Viola. In IV.1v Orsino tells Viola/Cesario that he has already opened to him “the book even of [his] secret
soul” (14). Typically, Orsino expresses his confidence in words, and in the metaphor of his soul as book. But when Viola tries to recite his “text” to Olivia in the next scene, Olivia enters into the image as game and reduces the text to heresy (I.v.229). Orsino's metaphor destroyed, Viola nevertheless wins Olivia's heart by asking her to lift her veil, which she does, emphasizing the concreteness of the gesture by itemizing her beauty as a schedule of discrete objects. But Olivia's wordplay should not obscure the significance of her action: removing the veil she had sworn to wear for seven years and revealing herself to (presumably) male eyes is an exact parallel to Orsino’s declaration of trust in the preceding scene. Here it is expressed not metaphorically but concretely, allegorically. Viola has operated in two different modes of illusion in the two scenes.

Finally, the names of the characters, too, operate in alternative modes of representation. The figures unambiguously associated with Olivia's house have speaking or allegorical names. Sir Toby Belch speaks loudly of gluttony. Olivia is an allegory for peace, a meaning that is underlined when Viola says, “I hold the olive in my hand; my words are as full of peace as matter” (I.v.209-210), and again by the constant use of “Peace” as a command for silence among Olivia's rowdy followers. She is an appropriate allegory for a Christmas season play that celebrates “peace on earth, good will to men” by bringing peace out of her disorderly house and driving ill will (i.e. Malvolio) from the stage. Malvolio's name is thus also a simple allegory. Orsino, on the other hand, means “little bear”. A bear is not an abstraction like ill will nor a traditional public symbol like the olive. Orsino is rather, in his melancholy and self-involvement, a little bearish; this is a relation of name to person that is not designation, but similitude, and is thus appropriate to his metaphoric mode.

Viola's and Sebastian's position between the plots is also reflected in their names. Viola means violet, the flower evoked in Orsino's opening speech, and she behaves rather like a shrinking violet in her relation to him. If this is the significance of her name, it is based, like Orsino's, on similitude; it is metaphoric. But the name also evokes music (viol, violin), a sense emphasized by the importance of music to Orsino and by her plan to recommend herself to the duke by her musical ability. She is the singing angelic messenger who makes peace manifest in the world, and in this respect her name is allegorical. Sebastian is similarly double. The Greek root “sebas” means “that which evokes religious awe”. Sebastian's appearance next to his sister evokes the wonder and astonishment of all present. Not only does this event seem supernatural, but it is also part of Viola's message of Christmas, and is thus religious. At the same time, this wonder is buried in a natural man and in a not too uncommon name whose meaning is obscure to those with too little Greek. The association with religious wonder is more likely to be evoked because Sebastian bears the same name as a saint who was widely portrayed as a handsome young man. Thus his name also speaks both allegorically and by similitude.

In summary, we are dealing here with an opposition between metaphorical and allegorical discourse. The first term requires no clarification, but the second may. I mean allegorical in the sense that this language meets the three major criteria recently so clearly specified for allegory by Maureen Quilligan. The language of Olivia's realm is allegorical first because it is profoundly conscious of itself as language, a consciousness manifested in the ceaseless punning, and further even as text, as we will see in the baiting of Malvolio; second it is consistently literal and concrete—it means its own words, not what its words represent or stand for. Third, this language comments on and elaborates its grounding Biblical pretext, “Peace on earth, good will toward men”. As Quilligan insists, allegorical writing is different from allegorical interpretation or allegoresis. Allegoresis will be rejected in Malvolio's misreading of Maria’s note and will in fact be associated with metaphoric language in the play. Thus to refer to the Olivia plot as allegorical is not to deny the reality or the humanity of the characters, nor to say the play is about something other than what it seems. True allegory is literal and does not refer beyond itself; such is the case in Olivia's world.

III.
It is time now to explore the interaction between the modes of illusion associated with the two plots. Let us begin with the play's reflections on the metaphor of "text". As we saw above, the initial confrontation between Viola and Olivia is couched in terms of Orsino's "text". Nevertheless, while the beauty of Viola's language evokes repeated comment, the real damage to Olivia's heart is done by her eye: "Methinks", she says, "I feel this youth's perfections / [...] To creep in at mine eyes" (I.v.296-98). Similarly Olivia's first turn to Viola is marked by lifting her veil and revealing her image, and Antonio later refers to Sebastian/Viola as an "image" that has failed him (III.iv.362; cf. "idol" three lines later). Orsino's imagery of text is defeated by Olivia's image. The baiting of Malvolio attacks metaphorical text at a more parodic level. The joke turns first on mistaking Maria's handwriting for Olivia's, that is, it depends on the literal letters of Maria's note. Second, it depends on Malvolio's misinterpretation of the letters M O A I, which he tries to make "resemble", as he says (II.v.120), his own name, by crushing the "simulation" to make it bow to himself (139-141). His violent interpretation (allegoresis) in terms of similitude parodies the dependence on simile and similarity in the Orsino plot, just as Malvolio himself parodies Orsino's melancholy self-involvement and love for Olivia. Malvolio has, we might say, interpreted the text, but ignored the absurd image of himself cross-gartered in yellow stockings. At the same time, there is all the noise made by the on-stage spectators as they shout "Peace": the ready divorce of word from meaning here points up the inherent danger in reasoning by similitude, linguistic or otherwise.

Feste is the focus for some of the most important reflection on language and dramatic form in the play. As Olivia's "corruptor of words" (III.i.36) he reduces all words to concrete absurdity, to themselves as words and not just as the most concrete object signified by them. Unlike Malvolio or Orsino, he does not need to "corrupt" words by forcing them to resemble other things; he knows that words inherently possess the quality of suggesting things other than themselves. Thus his apparently nonsensical formulation, "that that is is" (IV.i.16), anticipates and prepares the revealed doubleness of Viola and Sebastian that arouses such peace-making wonder at the end of the play—"A natural perspective, that is and is not!" (V.i.216-217). Indeed, Feste's anticipation of Viola's doubleness suggests that he should be understood as a parody of her, just as Malvolio is a parody of Orsino. Except for Viola, Feste is the only link between the two worlds of the play, and like her he is a musician. It is surely to emphasize this likeness that the two have a scene to themselves that does nothing to further the plot, right at the center of the play. Feste, whose name derives from Festus, lord of misrule at Epiphany, and thus suggests perhaps good will, mediates for Malvolio with Olivia just as Viola does for Orsino. He is, finally, the only character in the play beside Viola to appear on stage in disguise. As he virtuosically wavers between the roles of Sir Topas the curate and Feste in Act IV he parodies Viola's fluttering between the roles of Viola and Cesario, preparing, as we have seen, the more miraculous doubleness of Viola and Sebastian. If Malvolio reveals and carries off the ill will implicit in Orsino's bearish love for Olivia, Feste's wise fooling reveals Viola's healing of the madness of Illyria to be the good will of the clown. Unlike Malvolio, Feste remains on stage to speak the final word, appropriately, for he is the figure who embodies the mediating grace of play-acting.

In this regard Feste's position on dramatic art is all-important. What matters in Feste's gay alternation of roles between himself and the curate is not that he is taken for Sir Topas, but the pleasure that he and we take in the act of representation. Malvolio misreads Feste's representation mimetically, taking him to be two people: Sir Topas, on the one hand, and a Feste literally opposed to freeing Malvolio on the other. And Malvolio is, as a result, the one spectator (auditor, actually), who derives no pleasure from Feste's performance. Here the triumphant Feste takes the opportunity to connect himself to an older dramatic tradition, alluding to King Gorboduc (IV.i.13), subject of the first Senecan tragedy in English, and to the Old Vice of the morality in his song at the end of the scene. In Feste's fooling two modes of representation are thus confronted, the mimetic and the festive, and the distinction between them is understood to be historical.

A final reflection on the mode of the play emerges from the allusions to bear baiting. Sir Andrew regrets that he has devoted more of his life to bear-baiting than to the arts (I.iii.93); Fabian is in trouble with Olivia over a bear-baiting. Orsino ("little bear") sees himself as set upon by the hounds of his unrequited desires (I.i.20-22);
Olivia describes her honor as a bear set upon at the stake (III.i.118-120). When Fabian takes revenge on Malvolio (for bringing him out of favor with Olivia over the bear-baiting) by participating in baiting Malvolio, we are once more dealing with a concrete parody of the metaphoric baiting of love. Lest there be any doubt of the implicit context, we are told that Viola flees the equivalent baiting of her by Toby and Fabian “as if a bear were at [her] heels” (III.iv.295). This pattern of allusion is interesting, because bear-baiting was a popular public spectacle of virtually equivalent status to theater, and apparently on occasion used the same facilities. The play is thus laced with references to an alternative, generally older mode of public spectacle; a play that sees itself as a near descendant of public bear-baiting is once again calling attention to its non-mimetic aspects.

Such reflections on the play's own illusions suggest a strong preference for its allegorical over its mimetic mode of representation. And indeed, though I have spoken of two equivalent worlds in the play, much more attention is devoted to the Olivia plot than to the Orsino plot. The play does not just tolerate the allegorical mode, it privileges it. Given this distinction and given the hint from Feste's allusions to the Vice that it is a historical one, I would like to draw it more explicitly as I conclude. I have called Orsino's plot mimetic. In his metaphoric mode every divergence from the literal to the figurative level of meaning is clearly marked. Whenever characters become other than what they appear they express their intention to don a disguise, and repeatedly remind us when they are disguised. Similarly when things become other than what they seem the transition is marked by the rhetorical structure of simile or metaphor. Indeed, it is also necessary to mark when things are just what they seem: Orsino, we are told, is noble “in nature as in name” (I.i.25). Unless signification is marked, things are only what they seem. In this sense we may say the plot is mimetic; it offers us the imitation of nature, the second artificial nature implied in the *ut pictura poesis* tradition of early neoclassicism. Thus what we see on stage is an illusion of reality, and it depends on the prevailing metaphoric diction to import significance beyond the literal into its sphere. Olivia's world, on the other hand, is allegorical precisely because it does not take note of the divergence of the figurative from the literal. There is no divergence, because the figurative is always presumed to be incarnate in the literal. Allegory is always concrete in this sense that what you see is what it means. There can, therefore, be no divergence between name and nature in Olivia's world, and the issue need never be raised; nor can there be disguise, only self-consciously theatrical role-playing.

Historically, then, Orsino stands near the very beginning of the tradition of the modern dramatic character we associate with the neoclassical illusion of reality school, for he is, essentially, a melancholy duke who cheers up at the end of the play. Olivia, on the other hand, is Peace in the garb of a countess, and belongs to the allegorical or non-illusionist tradition, in which characters are embodied significations, and hers is the preferred mode of the play. Such preference is, I would suggest, typical of Shakespeare: even *A Midsummer Night's Dream*, which celebrates the transformative and proliferative power of metaphor above all, moves in the last act to the parodic, concrete, allegorical realm of the mechanicals. And overall Shakespeare's career moves toward the allegorical, non-mimetic four romances, and the most unrealistic history *Henry VIII*. It would be a mistake to see this preference simply as conservatism on Shakespeare's part. The allegorical mode for which he opts has another eighty years of rich development on the continent—in the sophisticated yet popular Jesuit moralities of Jakob Bidermann, in the powerful martyr tragedies of Andreas Gryphius, but most of all in the flowering of allegorical comedies, tragedies, and Corpus Christi plays in Spain that we associate with the names of Lope de Vega, Tirso de Molina, and above all Calderón de la Barca. Rather we should see him as experimenting with neoclassical strategies of representation as he experimented with neoclassical plot structure in *Romeo and Juliet* and *The Tempest*.

In this experimental doubleness resides, I think, the peculiar elusiveness of the play, which is visible in readers' discomfort to attribute to it any meaning at all. It also explains the most popular controversy about the play, that over the degree of sympathy we are to feel with Malvolio. If we respond in the mode of the Olivia plot, Malvolio is ill will personified and we rejoice at his departure; but if we carry over the responses evoked by the mimetic Orsino plot, we are inclined to sympathize with his plight at the end. And since, as we
have seen, Malvolio parodies or reflects Orsino in the Olivia plot, we are indeed tempted to accord him some
of the same dignity we would to Orsino. At the same time, this parodistic linkage invites us to react less
sympathetically to Orsino as personified melancholy. Small wonder there has been confusion. If, however, we
are sensitive to the play of the different modes in the text, part of our pleasure in it derives from our own
agility in discovering and adjusting our responses. Both the play and our response to it thus become
explorations of the complexity of aesthetic illusion.

Notes

3. Kenneth Muir remarks in passing on the “contrast between the levels of reality represented by the two
main plots” in Taming of the Shrew (Introduction to Shakespeare. The Comedies, p. 4). In this respect
Taming of the Shrew seems to me to have most in common with Twelfth Night. Here again the
distinction between plots cannot be social, for the two heroines are sisters; much more important is
the difference in the characters’ relations to their language and therefore in the kind of illusion in each.
4. The play is cited according to *The Riverside Shakespeare*.
5. For detailed discussions of the play as an Epiphany and Christmas season play, see Lewalski:
“Thematic Patterns”, and Hassel: Renaissance Drama, pp. 77-86. I focus here more on the
implications of the literal aspects of the plot than on the implications of character development. As a
result I would not subscribe to Lewalski’s views of Viola and Sebastian as Christ-like (p. 176); Viola
is rather just what she is called in the play, a messenger (Greek: ‘angelos’).
6. I am grateful to my colleague Charles Barrack for this suggestion.
7. I exploit Quilligan’s defining characteristics in The Language of Allegory, although I recognize she
intended to describe a narrative genre, not a general linguistic mode. I have left out her
reader-oriented categories, whose potential application to drama is beyond the scope of this essay.
Elizabeth Freund, in “Twelfth Night and the Tyranny of Interpretation”, has recently explored the
tension between mimesis and semiosis in the language of the play, focusing largely on the clowns.
While Freund sees Twelfth Night as paradigmatic for the functioning of all literary language, the lines
she draws are not unrelated to those drawn here; metaphorical language will be shown below to be
associated with mimetic action, while the definition of allegory used here is essentially a semiotic
one.
10. A striking parallel example of the use of bears to call attention to non-mimetic dramatic form occurs
in Jakob Bidermann’s Cenodoxus (1602), III.viii, where a prank involving a trained bear is connected
to significant discussion of the nature of dramatic illusion. Closer to home is the bear who apparently
eats Antigonus in A Winter’s Tale, III.iii; it is the first figure to appear as the play moves into the
pastoral mode, and thus again associated with the play’s self-consciousness about genre.
11. Cox, in “Henry VIII and the Masque”, for example, argues that it exploits the dramaturgy of the court
masque.
12. Elaborated with particular delicacy and elegance by Barbara Everett (“Or What You Will”), who sees
both the play’s reticence and its ultimate seriousness. Compare also Lewalski’s extreme hesitation to
offer her reading too seriously as allegory (“Thematic Patterns”, p. 177), and Stephen Booth’s
interesting ruminations on the coherence of the play’s language in “Twelfth Night 1.1: The Audience
as Malvolio”.

Twelfth Night Literary Criticism (Vol. 62): Further Reading

CRITICISM

807

Asserts that same-sex attraction—explored in the relationships of Olivia and Viola, Antonio and Sebastian, and Orsino and Viola-as-Cesario—is a crucial issue in Twelfth Night. Charles maintains that the portrayal of homoerotic attraction serves as a way of representing the social construction of sexuality through gender identity.

Explores the ways in which the concept of “madness” is treated in Twelfth Night, noting that words such as “mad” and “madness” are used more often in Twelfth Night than in Shakespeare’s other plays.

Studies the nature of the illicit attractions in Twelfth Night.

Offers an overview of the plot and characters in Twelfth Night.

Argues that through his portrayals of Malvolio and Viola, Shakespeare represented the controversy within the English Church over whether Providence works principally through a primary cause, or through a secondary agent.

Compares the portrayal of gulling in Twelfth Night (in which both Malvolio and Sir Andrew Aguecheek are deceived) with contemporary narratives of “underworld literature” in which deception, known colloquially as cony-catching, cozening, and gulling, is fully treated.

Explores both the trivial and the more significant of the unanswered questions that arise from a reading of Twelfth Night.

Examines the similarity between Viola’s rejection of Sebastian’s embrace and Jesus’s resisting Mary Magdalene’s embrace after his resurrection.

Discusses the textual features of the Folio, contrasting them with later texts, and examines the numerous performance options inspired by “this Shakespearean original.”

Maintains that the play's comic movement from chaos to harmony may be described as a transformation of fragmented isolation to cohesive mutuality.

Twelfth Night Literary Criticism (Vol. 74): Introduction

Twelfth Night

Twelfth Night, considered by many scholars to be one of the finest Elizabethan romantic comedies, offers a penetrating examination of gender roles, sexual attraction, and the nature of love. The play relates the adventures of the shipwrecked Viola, who disguises herself as a male and takes a position in the court of Orsino. The disguised Viola, who calls herself Cesario, falls in love with Orsino. Orsino, however, is in love with Olivia, and sends Viola/Cesario to woo Olivia on his behalf. The situation spins further out of control when Olivia falls in love with the disguised Viola. The play's subplot centers on the puritanical Malvolio and the punishment he endures at the hands of his fellow servants. Modern critics, as well as directors of the stage and screen, are interested in the complexities of the plot and subplot, and the relation between the two, as well as the play's interpretation of gender roles, sexuality, and love. Other areas of critical concern include the play's relationship to Elizabethan culture and issues pertaining to its genre and structure.

Examining Twelfth Night as an example of festive comedy, Elias Schwartz (1967) contends that the play's merriment and celebratory atmosphere reveal a vision of life as good and joyful, despite its admitted limitations. Schwartz also contrasts the play with satiric comedy—in which characters are often disliked and become objects of derision—and emphasizes that the play should not be viewed as satire. In his study of Twelfth Night's structure, Porter Williams, Jr. (see Further Reading) identifies a connection between plot and theme. The mistakes the protagonists make, Williams argues, not only generate the action of the plot, but also reveal aspects of the play's underlying themes, which include deception and the nature of love. As critics attempt to unlock the relationship between the play's plot and subplot, they often focus on Malvolio, who is the center of the play's subplot. In their introduction to Twelfth Night, Roger Warren and Stanley Wells (1994) find that Malvolio serves as a means of binding the plot and subplot, and that his “gulling” provides additional insights into the play's treatment of love and the behavior of the lovers. Similarly, David Willbern (1978) identifies Malvolio with integration. In exploring Malvolio's relationship to the play's festive aspects, Willbern demonstrates that Malvolio's puritanical attempts to deny carnal passion in many ways reflects the illusion of romanticism explored in the main plot. According to the critic “both represent denials and sublimations.”

The play's highly charged sexual atmosphere makes Twelfth Night a popular choice for film and stage adaptation. In 1996, Trevor Nunn directed a film version of Twelfth Night in which he offered his interpretation of the play's sexual and gender issues. Donald Lyons (1997) regards the film as a success, praises the accomplishments of the principal actors, and observes that the film teases the boundaries of “heterosexual decorum” but never oversteps them. Like Lyons, Marla F. Magro and Mark Douglas (2001) find that Nunn's film maintains a heterosexual stance, and note that the film attempts to erase the play's homosexual undertones. Laurie Osborne (2002) also assesses Nunn's Twelfth Night, focusing on the director's reliance on film editing to provide a sense of character continuity. Robert Brustein (1998) reviews Nicholas Hytner's stage adaptation of Twelfth Night, performed at Lincoln Center's Vivian Beaumont Theater. The critic contends that despite its Hollywood casting, including Helen Hunt as Viola and Kyra Sedgewick as
Olivia, the production failed to explore the play's deeper issues and complexities. Brustein also states that Hunt's performance was “clean” and “clear,” whereas Sedgewick's Olivia was overly energetic. Similarly, David Patrick Stearns (1998) describes Hunt's efforts as solid and sincere, but notes that Hunt overlooked the subtextual potential of Viola's character. Like Brustein, Stearns finds that Sedgewick went to comic extremes in her portrayal of Olivia. According to Ted Merwin (1999), the production lacked a sense of eroticism on several levels; for example, the stage design conveyed only languor, and the romance between Paul Rudd's Orsino and Hunt's Viola was never ignited. Merwin applauds the performances of supporting cast members, particularly Philip Bosco's Malvolio, but contends that the production as a whole failed to convey Twelfth Night's emotional disorder and eventual resolution.

Approaching the play's gender issues through an analysis of Viola's disguise, Keir Elam (1996) observes that Viola intends to disguise herself not as a boy, but as a eunuch. Elam explores the cultural history of castration as it relates to drama in general and Viola's role in Twelfth Night in particular. Elam demonstrates that Viola's disguise conveys her desire to hide her own biological sexuality, as well as her apparent masculinity, in order to shield herself entirely from all manner of sexual threats. Elam further describes Viola's eunuch disguise as a gesture of self-effacement with historical and theatrical significance. Critics are also interested in the ways Twelfth Night reflects Renaissance England's society and culture. John Kerrigan (1997) studies the play within the context of the Renaissance conventions regarding secrecy and gossip, finding that gossip is a means—both in early modern society and in the play—of maintaining social bonds. Kerrigan also discusses the affinity between Cesario and Malvolio, noting that as servants both characters are expected to be discreet. Angela Hurworth (1999) explores the representation of deception, or gulling, in Twelfth Night. Hurworth highlights the links between criminal deception as it is described in Elizabethan narratives of the “underworld” and the deception found in the play. Twelfth Night also reflects religious ideas prevalent in Renaissance England. Paul Dean (2001) finds that the play fuses Renaissance Platonic tradition and the theology of St. Augustine relating to the doctrine of the Trinity. Using the device of twins, Dean argues, Shakespeare explored the notion that two individuals are united as one through love, a concept that was understood by Neoplatonists to be analogous to the doctrine of the Trinity.

Twelfth Night Literary Criticism (Vol. 74): Criticism: Overviews And General Studies

[In the following excerpt, Warren and Wells survey Twelfth Night's setting, sources, themes, and major characters. The critics' discussion is often informed by insights gleaned from twentieth-century stagings of the play.]

Twelfth Night is one of the most popular of Shakespeare's plays in the modern theatre, and its success seems to have begun early; the sole surviving reference to it during Shakespeare's lifetime is to a performance. On 2 February 1602, John Manningham, then a law student of the Middle Temple in London, wrote in his diary:

At our feast we had a play called Twelfth Night, or What You Will, much like The Comedy of Errors or Menaechmi in Plautus, but most like and near to that in Italian called Inganni. A good practice in it to make the steward believe his lady widow was in love with him, by counterfeiting a letter as from his lady, in general terms telling him what she liked best in him, and prescribing his gesture in smiling, his apparel, etc., and then when he came to practise, making him believe they took him to be mad.1
This must have been an early performance. The play was probably written in 1601, either immediately before or straight after Hamlet. Both plays were therefore written at the midpoint of Shakespeare's career, when he was at the height of his powers, so their theatrical success is not surprising.

The play has not, however, always been as popular in the theatre as it is today. Although it was among the earliest of Shakespeare's plays to be revived when the London theatres reopened after the restoration of the monarchy in 1660, only three performances in the later part of the seventeenth century are known, and Samuel Pepys attended each of them. On 11 September 1661 he entered the theatre simply because the King was going to be there. ‘So I, against my own mind and resolution, could not forbear to go in, which did make the play seem a burden to me, and I took no pleasure at all in it.’ Nevertheless he saw it again on Twelfth Night 1663, when he found it ‘but a silly play, and not relating at all to the name or day’, and yet again, though with no more enthusiasm, on 20 January 1669, ‘as it is now revived’ (which may imply adaptation, though no alteration survives from his period), this time calling it ‘one of the weakest plays that ever I saw on the stage’.

Pepys seems to have reflected the taste of his age: the play then left the repertory for over eighty years. William Burnaby drew on it for his Love Betray'd of 1703, a very free adaptation, mostly in prose, which retains fewer than sixty of Shakespeare's lines. Only two performances are known, one in February 1703 and the other in March 1705. Twelfth Night shared in the general neglect of Shakespeare's comedies during the early part of the eighteenth century but returned to the English stage in January 1741, with Charles Macklin as Malvolio. After this, while not receiving as many performances as The Merchant of Venice, As You Like It, or The Merry Wives of Windsor, it remained in the repertory of either Covent Garden or Drury Lane for the rest of the century. The acting version printed in Bell's edition in 1774 is substantially Shakespeare's text with a few cuts, including two of Feste's songs; J. P. Kemble's acting edition of 1811 also makes only comparatively minor changes, including the transposition of the first and second scenes, a practice which still occasionally happens at the present time.

In 1820 Frederic Reynolds, along with the composer Henry Bishop, put on at Covent Garden a heavily adapted version introducing 'Songs, Glees, and Choruses, the Poetry selected entirely from the Plays, Poems, and Sonnets of Shakespeare' and adding also the masque from The Tempest. This adaptation, which was indulgently reviewed by Leigh Hunt, continued in performance at intervals over several years; the text has not survived.

Shakespeare's play had been introduced to New York in 1804, and it was the American actresses Charlotte and Susan Cushman, appearing as Viola and Olivia, who brought it back to the London stage in 1846, at the Haymarket Theatre. Other notable nineteenth-century productions included those of Samuel Phelps at Sadler's Wells in 1848, Charles Kean at the Princess's Theatre in 1850, and one at the Olympic Theatre in 1865, in which the text was altered so that Kate Terry could play both Viola and Sebastian. Henry Irving's production at the Lyceum Theatre in 1884, in which he played Malvolio with Ellen Terry as Viola, was not a great success, and Augustin Daly's took remarkable liberties with the text.

These were all performances in the nineteenth-century pictorial tradition, but in 1895 William Poel's semi-professional Elizabethan Stage Society acted the play 'after the manner of the sixteenth century' (though not without abbreviation), impressing Bernard Shaw with 'the immense advantage of the platform stage to the actor'. The winds of change were blowing, even though Beerbohm Tree's version at His Majesty's Theatre in 1901, in which he played Malvolio, reverted to traditional methods. It had what George Odell described as 'the most extraordinary single setting I have ever beheld. It was the garden of Olivia, extending terrace by terrace to the extreme back of the stage, with very real grass, real fountains, paths and descending steps. I never saw anything approaching it for beauty and vraisemblance'—but the disadvantage was that it had to be used 'for many of the Shakespearian episodes for which it was absurdly inappropriate'. This was the last major production of Twelfth Night in the high Victorian style. In 1912 Harley Granville Barker directed it at
the Savoy Theatre, London, in a production which, influenced partly by Poel, laid the foundations for the many twentieth-century stagings of this play, some of whose insights have made an important contribution to the rest of this introduction.12

A ‘TWELFTH NIGHT’ PLAY?

It is interesting that the earliest recorded performance should have been at a celebratory feast: John Manningham saw it on 2 February, which was Candlemas, the festival of the blessing of candles to celebrate the Purification of the Blessed Virgin Mary, a Catholic feast which, like others, survived into post-Reformation England. Both the other early performances we know about were also given privately to celebrate festive occasions: by the King's Men at court on Easter Monday, 6 April 1618, and again at Candlemas, 2 February 1623, before Charles I at Whitehall. This inevitably prompts us to ask whether Twelfth Night was conceived and performed as a play especially suited to private performances on festive occasions. It seems unlikely that such a successful stage play would have been reserved for private performance; but on Twelfth Night 1601 Shakespeare's company performed an unspecified play before Queen Elizabeth I and her chief guest, Don Virginio Orsino, at Whitehall, and Leslie Hotson has argued in The First Night of 'Twelfth Night' (1954) that the play was rapidly put together for this occasion. Although his book sheds much valuable light on details of the text, from which the commentary in this edition has benefited, his main argument has not won general acceptance; it is likelier that the ducal visitor and the festive occasion suggested the name of Shakespeare's duke and the title of his play, which was probably written later that year.

Opinion varies about how far the title provides a clue for interpretation. In spite of Pepys's view that the play was irrelevant to the day, it was often performed on or around 6 January in the later eighteenth century. Like the feast of Candlemas, the elaborate festivities associated with Twelfth Night were a survival of medieval customs into post-Reformation England. L. G. Salingar conveniently summarizes those features of the play which relate to the period of licensed ‘misrule’, revelry, and topsy-turvydom traditionally associated with the Twelve Days of Christmas, of which Twelfth Night was the conclusion and the climax:

The sub-plot shows a prolonged season of misrule, or ‘uncivil rule’, in Olivia's household, with Sir Toby turning night into day; there are drinking, dancing, and singing, scenes of mock wooing, a mock sword fight, and the gulling of an unpopular member of the household, with Feste mumming it as a priest and attempting a mock exorcism in the manner of the Feast of Fools.13

Both the principal actions of the play present reversals of established norms such as the period of misrule encouraged: in the main plot, the Duke Orsino is educated out of his aberrant state of love-melancholy by his servant, who then becomes her ‘master's mistress’ (5.1.317); in the sub-plot, Olivia's steward aspires to become his mistress's master. And during the drinking scene, Sir Toby's quotation of an unidentified song, ‘O' the twelfth day of December’ (2.3.79), may be his drunken version of the carol ‘The Twelve Days of Christmas’, perhaps identifying the party as his own version of a Twelfth Night revel.14

Modern directors have taken diametrically opposed views of the usefulness of the associations of Twelfth Night to performance, as Michael Billington's conversations with some of them in Directors' Shakespeare (1990), a valuable account of the theatrical issues, makes clear. For Terry Hands, ‘Twelfth Night meant just that—the sixth of January, the moment when you take down the decorations and Christmas is over. The festive moment has passed, and this is now the cruelest point of the year’, and the drinking scene is an attempt ‘to put their Christmas tree back up’ (pp. 2, 8).15 On the other hand, John Barton, who directed a long-running and almost universally admired production for the Royal Shakespeare Company (1969-71), finds the play less wintry than ‘autumnal in mood’ (p. 7). In this respect, Barton agrees with Peter Hall, who directed another much admired autumnal staging (Stratford-upon-Avon, 1958-60, and again at the Playhouse, London, in 1991); while for Bill Alexander, director of the RSC's 1987-8 production, ‘the title was a kind of
distraction’ (p. 3).

That title, however, is not simply *Twelfth Night*. Both the earliest sources, John Manningham's diary and the First Folio of Shakespeare's plays (1623), the sole authority for the text of the play, call it *Twelfth Night, or What You Will*; perhaps the permissive *What You Will* is intended to qualify too rigorous an insistence upon *Twelfth Night* and its associations of misrule.¹⁶ Such openness would be entirely characteristic of a play which establishes so subtle a balance between contrasting elements that it has often been characterized as ‘elusive’ in mood and overall effect. John Gielgud, who directed what seems to have been a rather unsuccessful production at Stratford-upon-Avon in 1955, comments: ‘It is so difficult to combine the romance of the play with the cruelty of the jokes against Malvolio, jokes which are in any case archaic and difficult. The different elements in the play are hard to balance properly.’¹⁷ For this reason, as Michael Billington points out in his introduction to *Directors' Shakespeare*, ‘different characters become, at different times, the pivot of the play [but] the quartet of RSC directors suggests that Sir Toby is the motor that drives the plot and Feste the character who determines the mood’ (p. ix).

It may be that one reason why John Barton's and Peter Hall's autumnal versions were so successful in achieving just that elusive balance between contrasting elements that Gielgud mentions, between sweet and sour, laughter and tears, was that autumn itself is a season of contrasts: serene, warm days edged by chilly nights, mist, and lengthening shadows. Keats catches precisely this quality in his ode ‘To Autumn’ where he defines the perfection of the autumn day by reminding the reader of those things that threaten it—the hint of transience in the ‘soft-dying day’ and in the ‘gathering swallows’, about to depart to escape the approach of winter. And he might be describing the quality of *Twelfth Night* itself when he writes in his ‘Ode on Melancholy’ that ‘in the very temple of delight il'd Melancholy has her sovran shrine’. This combination of happiness and sadness, to the point where an awareness of the one is essential to the full experience and appreciation of the other, is characteristic of the mood of *Twelfth Night*, epitomized in the lines in which Orsino and Viola discuss female perfection,

ORSINO

For women are as roses, whose fair flower
Being once displayed, doth fall that very hour.

VIOLA

And so they are. Alas that they are so:

To die even when they to perfection grow

(2.4.37-40),

or in Viola's phrase about her imaginary sister ‘Smiling at grief’ (2.4.115), or in Feste's comparison of Orsino's mind to an opal, an iridescent jewel that changes its appearance in the varying light (2.4.74).

An autumnal mood also suits the revels of Sir Toby and Sir Andrew, which carry a sense of the best days being past, of having to make the most of every moment while it lasts. Feste perfectly catches this mood in the song he sings to them in the drinking scene: ‘Present mirth hath present laughter. … uth's a stuff will not endure’ (2.3.46, 50). Perhaps the need to indulge in ‘present laughter’ explains the rather desperate tone of the revelry in most performances, and more particularly how the joke against Malvolio comes to be pushed to the extreme of attempting to drive him mad. Making the most of passing moments is as much a part of *Twelfth Night*, the end of a period of mid-winter revels, as it is of autumn; and references to other seasons in the text—‘More matter for a May morning’ (3.4.137) and ‘this is very midsummer madness’ (3.4.53)—allude to
other periods of Elizabethan revelry, May Day and Midsummer Eve, not necessarily to a particular season in which the action takes place—although Bill Alexander, the director who felt that ‘the title was a kind of distraction’, departed as far from mid-winter as possible and set his 1987 RSC version in the brightly-lit summer sunshine of a fishing village on the Illyrian coast. This leads naturally to the ways in which various stagings have presented Illyria, and to the more general question ‘Where—or what—is Illyria?’

ILLYRIA

Illyria was the ancient name of an area of the Adriatic coast roughly corresponding to what was for long known as Yugoslavia. In the classical world, Illyria had a reputation for piracy: the Illyrians' attacks on Adriatic shipping led to Roman intervention, and the area became the Roman province of Illyricum. Shakespeare was clearly aware of its reputation since his only other reference to it, in the phrase ‘Bargulus, the strong Illyrian pirate’ (Contention 4.1.108), is a translation of ‘Bardulis Illyrius latro’, from Cicero's De Officiis 2.11, a work used as a textbook in Elizabethan schools. This association of Illyria with piracy may have contributed to the vivid evocation of a ferocious sea-battle between Antonio and Orsino at 5.1.45-70, and to the ambiguous presentation of Antonio in general, discussed in a later section of this introduction.

In Shakespeare's day Illyria was a series of city-states controlled by the Venetian republic. Possibly Shakespeare conceives of Orsino and Olivia as neighbouring rulers of these city-states, for whom a marriage alliance might appear natural; yet Orsino and Olivia seem just as much to be neighbouring Elizabethan aristocrats; Olivia's household is presented in precise detail, complete with steward, waiting-gentlewoman, fool, and sponging elderly relative. The coexistence of the remote and the familiar in Shakespeare's Illyria—nicely characterized in a review by Hugh Leonard as ‘a fairyland with back-streets’ (Plays and Players, August 1966, p. 16)—suggests to some interpreters that it should be ‘magical, romantic, Illyrian in that sense’ (John Barton), or even a country of the mind: ‘The place is defined by the characters and the journey they undertake … which is an emotional journey’ (Terry Hands, in Directors' Shakespeare, pp. 8, 9). Each of these aspects of Illyria—the geographical or Mediterranean, the specifically English, the magical, and the sense of a country of the mind—can be illustrated by the prominence each has been given in notable stagings, though of course to emphasize one aspect need not exclude the others, and in the most balanced productions does not do so.

For Shakespeare's company, working on an unlocalized stage and wearing what was for them modern dress, the question of design choices presumably did not arise; and the staging of the play is exceptionally undemanding of theatrical resources. Later actors and directors, since at least the middle of the nineteenth century, have sought to provide a visual equivalent for the play's poetic and dramatic qualities. In the nineteenth century there was a fashion for elaborately realistic and sometimes would-be ‘historical’ settings. Since Illyria in Shakespeare's time ‘was under the rule of the Venetian republic’, a note in H. H. Furness's 1901 New Variorum edition explains, ‘the custom has long prevailed of treating the piece as a romantic and poetic picture of Venetian manners in the seventeenth century. Some stage managers have used Greek dresses. For the purposes of the stage, there must be a “local habitation”’ (p. 4). In a New York production of 1904, for instance, a kind of ‘Illyrian’ national dress was evolved, using elements of Greek, Balkan, even Turkish costumes. The twins each wore a skirted robe with a sleeveless jacket trimmed with braid, a fez, and a sash around the waist with a scimitar. Harley Granville Barker's Savoy production in 1912 reacted against such ‘realistic’ designs by setting a stylized garden with brightly coloured, cone-shaped formal trees against a yellow and black abstract drop-cloth for Orsino's court; but even he made a concession to prevailing ‘Illyrian’ styles by dressing Orsino in oriental robes, complete with turban.

Although Bill Alexander at Stratford-upon-Avon in 1987 attempted to evoke the actual Illyria of Shakespeare's time, his aim was not the historical but the timeless. 'Those white-washed buildings were the same, arguably, in the sixteenth century as they are in the twentieth century.' The costuming was ‘Elizabethan Illyrian’, that is, ‘Greek-Yugoslav dress of that period’—and in fact it was not far removed from the
nineteenth century's attempts to create an 'Illyrian' style. But Alexander also addressed the important question why, since so much of the society in the play seems so English, Shakespeare bothered to set it in Illyria at all: ‘I think he does it for its compression value: … when people are displaced, their characteristics become heightened’ so that there is ‘an intensification of human behaviour’ (Directors' Shakespeare, pp. 12, 32). His evocation of the historical Illyria, then, was ultimately directed at sharpening the audience's sense of the psychology of the play.

And so, in a completely contrasting style, was Peter Hall's very English view at Stratford-upon-Avon in 1958. Derek Granger in his review pointed out that the play ‘marvellously lends itself to a close pictorial re-working’ and that Lila de Nobili's designs were ‘permissibly explicit; we are in fact in a Caroline park on a sunny late afternoon at the very end of September; the light is gold and gauzy, the shadows are umber, the sunflowers glow against the garden wall and there is just the hint of a nip in the air’ (Financial Times, 23 April 1958). The use of painted gauzes allowed the perspectives of a seventeenth-century long gallery for Orsino's court … to blend swiftly into Olivia's walled garden. The advantage of these designs, as A. Alvarez put it when the production was revived in 1960, was that they provided ‘a kind of visual parallel for the play's complexities’ (New Statesman, 28 May 1960), and in particular reflected its changing moods; as one vista melted into another, the production precisely caught that shifting, ‘elusive’ quality often mentioned in connection with the play, its balancing of happiness and melancholy. That balance was further enchanted by Hall's decision to set the play some thirty years after its probable date of composition, in a Caroline world of lace collars, silks, and plumed hats which recalled Van Dyck's images of Charles I's court, in which autumnal colours often temper court splendour with a hint that the golden moment cannot last. Roy Walker summarized some advantages of presenting Illyria like this: the ‘choice of Cavalier costume gave the maximum thematic contrast with Malvolio's Puritan habit, served the opposition of amours and austerity, and … eased the problem of the identical twins with a hair-style equally suitable to boy and girl’.21

The Illyria of John Barton's RSC production (1969-71) was in some respects a visual distillation of Hall's. Christopher Morley's design was a receding, slatted gauze box which proved very flexible. Set with candelabra and dimly lit, it resembled Hall's in suggesting Orsino's enclosed ducal hall; but when the gauze box was back-lit, it evoked a mysterious world beyond. This was crucial to Barton's view of the ‘magical, romantic’ nature of Illyria, and it was especially effective at the first appearance of Viola: the doors at the back of the gauze box flew open and she suddenly materialized amid swirling spray, rising like Venus from the sea; her long flowing hair also carried a suggestion of Alice in Wonderland. But the magical was balanced with the wittily human as Viola gradually recovered her bearings and resolved on positive action, especially once she assumed her page's disguise. Barton back-lit the gauze not only to suggest ‘magic and the sea and the world outside that they'd come from’ (Directors' Shakespeare, p. 10), but also to intensify moments that were at once mysterious and intensely human, above all for the reunion of the twins …, and he underscored such moments with the recurrent sound of the sea, a device adopted by several directors since. Barton's production was first given in a season that concentrated on Shakespeare's late romances; and one consequence was to make the audience especially aware of the ways in which Twelfth Night anticipates those plays: in the use of the sea as both destroyer and renewer; in the sense of characters undertaking emotional journeys; and in the final renewal of a family relationship which is as important as (or more important than) the coming together of lovers upon which comedy usually concentrates.22

An Illyria very far removed from all these was Peter Gill's at Stratford-upon-Avon in 1974. Here, more than in any other production, Illyria was a country of the mind. The key to this interpretation was a huge, dominating mural of Narcissus gazing infatuatedly at his reflection in the water, suggesting the extent to which the characters are prisoners of their own obsessions. As Irving Wardle put it, Orsino, Olivia, and Malvolio, ‘in his own way the greatest narcissist of the lot (and the only one who finally resists cure)’, are all ‘intoxicated with their own reflections, and the function of Viola and Sebastian is to put them through an Ovidian obstacle course from which they learn to turn away from the mirror and form real attachments’ (The Times, 24 August 1974). But the production was concerned with body as well as with mind: Peter Ansorge focused something
essential about the play as well as the staging when he defined this Illyria as ‘a highly refined, erotic trap … in which the characters must learn to read the subtext of their desires’ (Plays and Players, October 1974, p. 31). So as well as presenting various visual images of Illyria, these stagings used design to focus important aspects of the play to which subsequent sections of this introduction must return.

‘MOST LIKE … THAT IN ITALIAN CALLED “INGANNI”’

In the diary entry describing the Twelfth Night performance he saw in 1602, John Manningham called the play ‘much like The Comedy of Errors or Menaechmi in Plautus' (the principal source of The Comedy of Errors), but added that it was ‘most like and near to that in Italian called Inganni’. He shrewdly identified the main influences on both the twins story and the love story. There were at least two Italian comedies called Gl’Inganni (‘The Mistakes’), one by Nicolò Secchi (performed in 1547, first published in Florence in 1562 and frequently reprinted) and one by Curzio Gonzaga (published in Venice in 1592). Both appear to derive from an anonymous play, Gl’Ingannati (‘The Deceived’), first performed at Siena in 1531 by a literary society called the ‘Intronati’ (‘Thunderstruck by Love’) and published in Venice in 1537. All these dramatize the central situation of Twelfth Night: a girl disguised as a page woos another lady on behalf of the master whom she loves; the lady then falls in love with the ‘page’, but subsequently marries ‘his’ twin brother. The story recurs in two English prose narratives: Barnaby Riche reworks it in Riche his Farewell to Military Profession (1581); and there is a variant in an episode in Emanuel Forde’s romance The Famous History of Parismus (1598). It was, in other words, a story that was ‘in the air’ at the time; and it is worth considering some points of comparison (and contrast) between these works and Twelfth Night, not to ‘prove’ debts which are unprovable, but to indicate the kind of story that Shakespeare is using, and modifying, for his main plot.

After a prologue and two introductory scenes which contain two references to Twelfth Night (la notte di beffana—the Epiphany), the disguised heroine of Gl’Ingannati makes her first appearance and instantly establishes the tone of the play:

It is indeed very rash of me, when I think of it, to come out in the streets so early, considering the wild practices of these licentious youths of Modena. Oh, how awful it would be if one … seized me by force, and, dragging me into a house, wanted to make sure whether I am a man or a woman!

(Bullough’s translation, cited throughout, p. 292)

Here there is a titillating, salacious flirting with the sexual ambiguities of the disguised heroine. To some extent, this is inherent in the situation, however and by whoever it is dramatized; but this bald statement announces the main source of interest in Gl’Ingannati; and a similarly blunt statement occurs later when the heroine describes her master whom she loves: ‘He looked me up and down from head to foot so closely that I feared he would recognize me’ (p. 296). Unlike Viola, this disguised heroine has followed and is now serving a man who deserted her, so there is a double risk of recognition, both of sex and of identity; but even allowing for this, Gl’Ingannati expresses the potential of the situation in a blunter way than Orsino does:

Is not more smooth and rubious; thy small pipe
Is as the maiden’s organ, shrill and sound,
And all is semblative a woman’s part.

Diana’s lip

(1.4.31-4)

All these Italian versions have the heroine hint at her love for her master, as Viola does in her allegory of a sister who died of love (2.4.88-115), but once more this is inherent in the situation: a disguised heroine needs
some statement of her feelings, however reticent. The heroine's assumed name in *Gl'Ingannati*, Fabio, may have suggested Fabian's name to Shakespeare, though another possibility is suggested in the Commentary to 2.5.1. In Curzio Gonzaga's *Gl'Inganni*, the heroine assumes the name ‘Cesare’: this looks like the origin of Viola's choice of ‘Cesario’ for her male disguise. It is interesting that Viola, like the Italian heroines, does not use her brother's name, whereas the heroine in Barnaby Riche's version does, thus making the confusion of the twins much more complete, more ‘plausible’, and, for the brother, even more bewildering.

Shakespeare may have read these Italian plays, or possibly come across the stories through performances by the *commedia dell'arte*, which often drew upon published Italian plays and which was especially fond of plots involving twins (was that where John Manningham too came across *Gl'Inganni*?); but the immediate stimulus was almost certainly provided by Barnaby Riche's story of Apollonius and Silla in *Riche his Farewell to Military Profession*, perhaps by way of Matteo Bandello's version of the story in his *Novelle* (1554) or François de Belleforest's French translation of it (1570).

Riche's narrative sets out to show how lovers drink from ‘the cup of error’:

> for to love them that hate us, to follow them that fly from us, to fawn on them that frown on us, to curry favour with them that disdain us, … who will not confess this to be an erroneous love, neither grounded upon wit nor reason?

(Bullough, p. 345)

This sentence might even have been the spark that set off Shakespeare's choice of main plot; he echoes its phrasing at Olivia's declaration of her love for ‘Cesario’: ‘Nor wit nor reason can my passion hide’ (3.1.150). When Riche's Duke Apollonius courts Lady Julina ‘according to the manner of wooers: besides fair words, sorrowful sighs, and piteous countenances, there must be sending of loving letters [to] become a scholar in love's school’ (p. 351), he anticipates not only Orsino's formal wooing of Olivia, but still more the lesson in courtship given by Proteus in *The Two Gentlemen of Verona*:

> Say that upon the altar of her beauty
> You sacrifice your tears, your sighs, your heart.
> Write till your ink be dry, and with your tears
> Moist it again …

(3.2.72-5)

And when Duke Apollonius (Orsino) sends Silla (Viola) to woo Lady Julina (Olivia), and Julina falls ‘into as great a liking with the man as the master was with herself’ (pp. 351-2), the phrasing is close to Olivia's ‘Unless the master were the man’ (1.5.284) and to Viola's soliloquy on the complicated situation (2.2.33-9). Closer still is the similarity between Julina's ‘it is enough that you have said for your master; from henceforth, either speak for yourself or say nothing at all’ (p. 352) and Olivia's

> I bade you never speak again of him;
> But would you undertake another suit,
> I had rather hear you to solicit that
> Than music from the spheres.

(3.1.105-8)

Riche's handling of the crisis of the story is closer than the Italian plays to *Twelfth Night*. Julina protests to Duke Apollonius that she is married to Silvio/Silla, ‘whose personage I regard more than mine own life’ (p. 356), a phrase that Shakespeare transfers to Viola/Cesario, who protests that she loves Orsino ‘more than my
life’ (5.1.131); Julia urges Silla ‘Fear not then … to keep your faith and promise which you have made unto me’ (p. 358), as Olivia urges Viola: ‘Hold little faith, though thou hast too much fear’ (5.1.167). But Shakespeare's revelation of the heroine's sex is necessarily very different from Riche's, since he was using a boy actor. Riche says: ‘And here withal loosing his garments down to his stomach’, the ‘page’ ‘shewed Julina his breasts and pretty teats, surmounting far the whiteness of snow itself’ (p. 361). Riche's handling of this revelation, with its somewhat titillating lingering over the heroine's breasts, is a measure of the important difference between Riche's tone and Shakespeare's, despite the similarities of plot and the verbal echoes; and still more is Riche's suggestive address to the 'gentlewomen' readers to avoid Julina's example: ‘For God's love take heed, and let this be an example to you, when you be with child, how you swear who is the father’ (p. 359). Although in some ways Riche is more romantic than the Italians, his tone here is much closer to theirs than to Shakespeare's—as it is also in the treatment of the relationship between the equivalents of Sebastian and Olivia: whereas Olivia's predecessors take the heroine's twin to bed, and in Secchi's and Riche's versions become pregnant and so precipitate the crisis of the story, Olivia marries Sebastian.

In some respects, Shakespeare's tone is closer to the other work that may have provided him with his immediate stimulus, Emanuel Forde's *Parismus* of 1598. This narrative seems to have given him the names of his two heroines. Prince Parismus, about to be married to the daughter of Queen Olivia, sleeps with Violetta, who under cover of darkness mistakes him for 'her accustomed friend'; she subsequently follows Parismus disguised as the page Adonius and, while staying at a hermit's cell, has to share a bed with Parismus and his friend Pollipus:

> Poor Adonius with blushing cheeks put off his apparel, and seemed to be abashed when he was in his shirt, and tenderly leapt into the bed ..., where the poor soul lay close at Parismus' back, the very sweet touch of whose body seemed to ravish her with joy: and on the other side not acquainted with such bedfellows, she seemed as it were metamorphosed with a kind of delightful fear.

*(Bullough, p. 367)*

Forde's alternation between 'he' and 'she' when describing Violetta/Adonius underlines the ambiguity of the disguised heroine. Her 'delightful fear' is again something that is inherent in the relationship of the heroine and the master she loves, as most performances of the Viola/Orsino scenes bring out. For example, Hilary Spurling, reviewing the RSC's 1966 production, noted how ‘an aura of desire, narrowly and deliciously averted, hangs over all the scenes between Orsino and his “dear lad”, Viola/Cesario. At one point, as his page, she undresses him, draws off his gloves, half-caressing, half-shrinking from the touch’ (*Spectator*, 24 June 1966).

But then *Parismus* takes a surprising turn. Parismus himself is reunited with the daughter of Queen Olivia, and Violetta sympathetically looks after Pollipus, who is in love with her but does not recognize her in her page's disguise, and she gradually comes to love him:

> Often time he would spend many hours in secret complaints and protestations of his loyal love. ... [She] beheld the ... constancy of his resolution, for that he determined to spend his life in her service, and also the pleasure she took in his company, being never from him in the day time, and his bedfellow in the night, that she was privy to all his actions, using many kindnesses, which he full little thought proceeded from such affection.

*(Bullough, pp. 368-9)*

While the situation is not exactly the same as in *Twelfth Night*, since Pollipus' constant resolution is to Violetta herself rather than to another woman, and Violetta, unlike Viola, only gradually falls in love, the
image of a disguised heroine attending and ultimately curing her beloved's love-sickness, while their relationship matures without the man being aware of it, is very likely to have had its effect on the genesis of Twelfth Night. And both Forde and Shakespeare share a quality notably absent from Riche and the Italian plays: tenderness.

A CENTRAL COMEDY

If Forde, Riche, and the Italians provided Shakespeare with different elements of his main plot, those features were modified through the experience of writing his own earlier plays. In The Two Gentlemen of Verona, for instance, Julia follows her lover Proteus in boy's disguise, only to find that he has transferred his attentions to Silvia, and she becomes an agent in his wooing. There is a bittersweet exchange between Proteus and Julia which anticipates both Viola's expressing her love obliquely and her 'ring' soliloquy (2.2.17-41). Disguised as the page Sebastian, Julia refers to herself as a woman:

She dreams on him that has forgot her love;
You dote on her that cares not for your love.
'Tis pity love should be so contrary.

(4.4.79-81)

But in this version, as Harold Jenkins points out, 'the lady fails to fall in love with the page at all, which is really a little surprising of her, since she had done so in Shakespeare's source [Montemayor's Diana]. It is almost as though Shakespeare were reserving this crowning situation, in which the mistress loves the woman-page, for treatment in some later play'.

John Manningham recognized that Twelfth Night was also 'much like The Comedy of Errors or Menaechmi in Plautus'. Although Shakespeare derived the central scenes of confusion over the twins from Plautus' Menaechmi (and from another Plautus play, Amphitruo), he also placed these within a framework story of a family separated by shipwreck and ultimately reunited after much wandering, which was drawn chiefly from the story of Apollonius of Tyre that he used again much later in his career for the main plot of Pericles. He introduced other material into The Comedy of Errors which is relevant to Twelfth Night. He moved the setting from Epidamnus in Plautus to Ephesus, partly because, as the centre of the cult of Diana, Ephesus had a reputation for witchcraft and the occult in the ancient world (and in the Bible), and would therefore provide an apt context for scenes of apparent madness and exorcism; this is much developed in Twelfth Night both in the way in which Orsino, Olivia, and Malvolio seem to be suffering from various kinds of madness, and in the mock-exorcism of Malvolio by Feste as Sir Topaz. By setting the action of the two plays in Ephesus and Illyria, Shakespeare located them, however approximately, on Mediterranean sea-coasts. The Comedy of Errors opens under the shadow of bloody inter-city trade war, and this reappears in Twelfth Night to sharpen the acrimonious confrontation between Antonio and Orsino at the start of the final scene.

But of course the most important connection between The Comedy of Errors and Twelfth Night is in the handling of the twins. In Plautus, as in Errors, they are the same sex. The Italian plays, and commedia dell'arte scenarios based on them, established a new tradition by making them a boy and a girl, and Shakespeare may have been attracted to this variant for personal reasons: he was the father of boy and girl twins, Hamnet and Judith. However that may be, the twins introduce a vein of particularly intense emotion into Twelfth Night. Shakespeare's son Hamnet died in 1596 at the age of eleven, and Shakespeare may have known what modern research into bereaved twins has demonstrated: that the death of a twin seems to cause a sense of desolation different in kind from other bereavements, and the surviving twin often tries to 'compensate' for the loss by attempting to assume the other's identity. Shakespeare had already touched on a twin's sense of lost identity when separated from a brother in The Comedy of Errors:

I to the world am like a drop of water
That in the ocean seeks another drop …
So I, to find a mother and a brother,
In quest of them, unhappy, lose myself.

(1.2.35-40)

Such perceptions may have helped to sharpen the poignancy of Viola's initial reaction to her brother's loss—

And what should I do in Illyria?
My brother he is in Elysium

(1.2.2-3)—

and to her decision to assume her brother's persona for her disguise:

In favour was my brother, and he went
Still in this fashion, colour, ornament,
For him I imitate.

(3.4.371-4)

This speech has another, more down-to-earth function: Shakespeare takes care to make the twins' identical clothing seem plausible here, while in *Errors* two pairs of twins separated since infancy wear identical clothes on one particular day.

In fact, the treatment of the twins is one measure of the difference between the two plays. *The Comedy of Errors* is basically a comedy of situation with psychological touches, *Twelfth Night* a comedy of character built upon a comedy of situation. In *The Comedy of Errors*, despite the fact that Antipholus of Syracuse has come to Ephesus specifically *looking* for his brother, he still fails to make the obvious deduction when everybody appears to recognize him and calls him by his name—although it is true that Shakespeare has to some extent prepared for this by making Antipholus aware of Ephesus' evil reputation as a centre of

    nimble jugglers that deceive the eye,
    Dark-working sorcerers that change the mind,
    Soul-killing witches that deform the body

(1.2.98-100),

so that he half-expects strange things to happen to him. By contrast, when Antonio mistakes Viola for Sebastian, she immediately deduces the facts: 'He named Sebastian. I my brother know t living in my glass' (3.4.370-1). Yet she conceals this information from others, pretending at the start of the final scene that Antonio's words to her seem merely 'distraction' (5.1.62), until the truth is confirmed by Sebastian's appearance. This holding-back greatly intensifies both the pathos and the ecstasy of their climactic reunion.

There are also important resemblances, not so much in story-line as in mood and technique, between *Twelfth Night* and another of Shakespeare's earlier comedies, *Love's Labour's Lost*. Like Orsino and Olivia, the young lords in this play are idealists, swearing to renounce the world (and specifically the company of women) for three years' secluded study. The play is about their growing up. The ladies of the French court lure them from their idealism to an acceptance of a more down-to-earth reality, as Viola lures Orsino and Olivia from theirs. Although this involves the lords in breaking their oaths to study, and Olivia breaks her promise to retire for seven years in mourning for her brother, at least these forswearings are on the side of life. The lords, like Orsino and Olivia, begin an emotional journey to maturity, but this is not necessarily a solemn thing: in *Love's
Labour's Lost, its first stage culminates in the brilliant tour de force of a multiple eavesdropping scene, in which the lords overhear one another admit their love for the ladies—a scene which in its technical bravura anticipates Malvolio's letter scene in Twelfth Night.

The climax of the lords' journey to maturity in Love's Labour's Lost is much more sombre, as a black-clad messenger interrupts the festivities at the end of the play with news of the death of the Princess's father. Faced with such a harsh intrusion of reality, and with parting from the ladies, the lords are compelled to drop the conventional forms of wooing they have used so far and say just what they feel. But the shadow of death has been cast across the brilliant surface of the play on several earlier occasions, from the King's urge in his opening speech to evade mortality by seeking an immortality guaranteed through the achievements of learning, to Catherine's poignantly simple statement about her sister who died of love: Cupid 'made her melancholy, sad, and heavy, so she died' (5.2.14-15); this anticipates Viola's expression of her own love through an allegory of a sister who died of love:

She pined in thought,
And with a green and yellow melancholy
She sat like patience on a monument,
Smiling at grief.

(2.4.112-15)

In some respects the treatment of death in Love's Labour's Lost is tougher than in Twelfth Night: Catherine's sister actually died, whereas Viola leaves the issue of death ambiguous, for obvious metaphorical reasons. But Love's Labour's Lost anticipates in important ways the persistent vein of melancholy and awareness of mortality that shadows the revels in Twelfth Night and deepens the happiness achieved. It is as if Shakespeare feels that the resolutions of comedy must be put to the test of being set against harsher experience if they are to be convincing.

In its emphasis upon the emotional journeys of the characters; in making the reunion of the members of a family as important as the love story; in the use of storm and of sexual disguise; and in setting ultimate happiness against harsher experiences, Twelfth Night looks forward to the late romances as well as back to the earlier comedies. At the climax of Pericles, Shakespeare even reworks Viola's image of her sister sitting 'like patience on a monument' in order to express the way in which Marina lures Pericles from the 'extremity' of his violent despair by her smiling patience:

Like patience gazing on kings' graves, and smiling
Extremity out of act.

(Scene 21. 126-8)

In Cymbeline, Shakespeare creates a heroine, Imogen, who closely resembles Viola in her candid integrity but who is put through much harsher, more extreme experiences, and who expresses her sense of utter desolation at the apparent death of her husband with a spare simplicity which is a further paring-down of Viola's direct style: 'I am nothing; or if not, thing to be were better' (4.2.369-70). And when at the end of Twelfth Night Orsino shows to Viola 'a savage jealousy at sometime savours nobly' (5.1.115-16), he anticipates the far more explosive sexual violence of Posthumus in Cymbeline and Leontes in The Winter's Tale. Leontes in particular goes on an emotional journey from a jealousy which borders on sadism to a spiritual 're-creation' performed in a 'wide gap of time' (5.3.155), that time in which Viola also puts her trust (2.2.40-1). The sea which separates but also reunites the twins in The Comedy of Errors and Twelfth Night is an instrument both of destruction and restoration in The Tempest too: 'Though the seas threaten, they are merciful. have cursed them without cause' (5.1.181-2). Twelfth Night is a central comedy in more than just its chronological position.
half-way through Shakespeare's working life.

KINDS OF LOVE

In reviewing Peter Hall's 1991 production of *Twelfth Night*, John Gross began by glancing briefly at academic criticism of the play:

*Twelfth Night* is about deception, about the difference between true love and its egocentric counterfeits. Orsino is in love with love, Olivia is in love with grief, Malvolio is in love with himself. So say the textbooks, and up to a point they are obviously right.

But when you put it that way, half the magic evaporates. The play's moods are much too various to be summed up in a formula, its colours much too delicate; the lessons it teaches are less important than the world it creates, and its language races ahead—magnificently—of anything that the plot requires.

(*Sunday Telegraph*, 3 March 1991)

The tension which Gross focuses here between what the ‘textbooks’ say and the rich experience that the play offers in performance may be demonstrated by considering Orsino's opening scene.

Gareth Lloyd Evans conveniently reflects a common critical view of Orsino. His ‘first speech has all the languid self-indulgence of a man [who lives] in an illusion of love’. But when Alan Howard actually played the part like that at Stratford-upon-Avon in 1966, Lloyd Evans complained, because Howard gave the impression ‘of high-class petulance, inbred stupidity and self-indulgence’. It is interesting, however, that even a performance of Orsino which, reflecting critical fashion, verged on caricature, nevertheless suggested more than caricature, at least to Hilary Spurling in her review: this Orsino stands

listening in an attitude of conscious ecstasy, a rose in one outstretched hand, [and his] delivery of the famous first speech … shows a Renaissance delight in luxury and artifice.

Also more than a hint, in his glistening eyes and sensuous lips, of Renaissance barbarity—‘my desires, like fell and cruel hounds, er since pursue me.’

(*Spectator*, 24 June 1966)

What she focuses here is the sheer range of Orsino's language. In speaking of its ‘Renaissance delight in luxury and artifice’, she points out that Orsino's opening speech starts off from an artificial Renaissance code of behaviour like that followed by Riche's Duke Apollonius or recommended by Shakespeare's Proteus in the passages quoted on p. 17 above: to that extent, he exemplifies the traditional melancholy lover; but as John Gross puts it, the language ‘races ahead’ of this basic situation, and complicates it:

If music be the food of love, play on,
Give me excess of it, that surfeiting,
The appetite may sicken and so die.

(1.1.1-3)

Orsino's desire to be fed by the music to the point where he becomes sick of it can be interpreted as an expression merely of self-indulgence; but the additional implication that the music acts as a stimulus for, as much as a satiation of, the appetite is clarified by an illuminating parallel usage in Sonnet 56, where Shakespeare uses the same metaphor of feeding, not to express delusion, but to suggest that love needs to be
constantly stimulated in order to avoid killing ‘The spirit of love with a perpetual dullness’ (7-8):

Sweet love, renew thy force. Be it not said
Thy edge should blunter be than appetite,
Which but today by feeding is allayed,
Tomorrow sharpened in his former might.

(1-4)

It is this stimulus that Orsino seeks in his opening speech; and if his lines suggest excess, they also suggest an emotional responsiveness, a potential for feeling, which is developed in the sensuous beauty of the following lines about the music:

O, it came o'er my ear like the sweet sound
That breathes upon a bank of violets,
Stealing and giving odour.

(1.1.5-7)

It is true that he quickly tires of the music—‘Enough, no more, is not so sweet now as it was before’—but at least his changeableness ensures that he will not ‘kill e spirit of love with a perpetual dullness’, as the Sonnet puts it. His language does not only indicate limitation or absurdity.

Nor is his ensuing comparison of the ‘spirit of love’ to the sea simply extravagant. As Harold Jenkins says, ‘if the spirit of love is … as unstable as the sea, it is also as living and capacious’:

O spirit of love, how quick and fresh art thou,
That notwithstanding thy capacity
Receiveth as the sea, naught enters there,
Of what validity and pitch so e'er,
But falls into abatement and low price
Even in a minute!

(1.1.9-14)

The image has a vigorous life as well as extravagance. So, to an even greater extent, has Orsino's subsequent comparison of himself to the huntsman Actaeon, torn in pieces by his own hounds (see fig. 3), to which Hilary Spurling alludes in her account of Alan Howard's performance:

O, when mine eyes did see Olivia first
Methought she purged the air of pestilence;
That instant was I turned into a hart,
And my desires, like fell and cruel hounds,
E'er since pursue me.

(1.1.18-22)

This speech, even more than Orsino's first one, demonstrates the double effect of the language. On the one hand, Orsino's image of Olivia as a purifying goddess and his comparison of himself to a classical huntsman might be thought simply examples of what Hilary Spurling calls ‘Renaissance artifice’; but the use to which they are put is not artificial at all. The ‘pestilence’, plague, was an everpresent threat to the audience listening to Orsino; and the ferocity of the ‘fell and cruel hounds’ makes real and immediate the pangs of frustrated desire—and this ferocity lurking beneath the artifice prepares, incidentally, for Orsino's homicidal outburst when he thinks himself betrayed in the final scene. So from the start of the play, the language is two-edged: if
it is artificial and even satirical in that it draws upon fashion and convention, that fashion is tempered by an immediacy and vigour which suggest that Orsino is at least capable of powerful feeling and, most important, of development under Viola's influence.

A further dimension is given to the scene by the music. It is almost as if the printed text is a blueprint for the total experience of words and music together—which of course is how Shakespeare has conceived it, ‘hearing’ the musical phrases, played and repeated, blending with the spoken text. The music can take many forms. In the first performances it may have been a single instrument or a consort, but the plangent sound of the lute blends particularly well with the language, especially in expressing the ‘dying fall’ of line 4. In any case, the combination of musical beauty and sensuous language is a crucial part of an audience's experience of the scene, and further complicates any view that Orsino is being satirized or caricatured.

There is, however, a further suggestion of artifice and the following of convention in Valentine's account of Olivia's mourning for her dead brother:

The element itself till seven years' heat
Shall not behold her face at ample view,
But like a cloistress she will veiled walk
And water once a day her chamber round
With eye-offending brine—all this to season
A brother's dead love …

(1.1.25-30)

The word ‘element’ seems to have been a fashionable affectation; it is used by Malvolio to express superiority (3.4.119) and mocked by Feste as ‘over-worn’ (3.1.58): whether the affectation here is Olivia's own or Valentine's veiled criticism of her is not clear, but such subsequent phrases as ‘like a cloistress’, ‘water … her chamber’, ‘eye-offending brine’, and ‘season’ also suggest affectation. It is good to mourn the dead, but not to carry mourning to extremes; and there could be no greater contrast than with Viola's style as she arrives on stage a mere ten lines later, shipwrecked and mourning the brother she has lost:

And what should I do in Illyria?
My brother he is in Elysium.

(1.2.2-3)

Elysium is the heaven of classical mythology, but there is nothing artificial or ‘literary’ about the lines: Viola expresses her sense of bereavement with a direct simplicity which is characteristic of much of her language, except when she is being consciously ‘poetical’ (discussed in the next section), and which differs sharply both from Orsino's elaborate style and from the language used by Valentine to describe Olivia. That contrast swiftly and economically sets up the main line of the romantic plot: as Orsino and Olivia come into contact with Viola, her unaffected directness draws them from their affectations, and reveals the positive qualities that those mannerisms partly conceal.

The process has begun in Viola's very next scene, now in her disguise as the page Cesario. Orsino's first words to her are:

Thou know'st no less but all: I have unclasped
To thee the book even of my secret soul.

(1.4.13-14)
In noticeable contrast to the language he used to describe his love for Olivia, he now comes quickly to the point. He has met somebody whom he trusts, and has simply opened his heart to his page without fuss. Their relationship, and the foundation of their ultimate marriage, based not on wooing from afar but on getting to know one another, is established in a mere two lines.

Shakespeare also does a great deal of work in a short space of time in the scene where Olivia first appears (1.5). Here he introduces no fewer than three major characters—Olivia herself, Malvolio, and Feste—so that the audience can compare Olivia's and Malvolio's reactions to Feste. When Feste proves Olivia a fool 'to mourn for [her] brother's soul being in heaven' (1.5.65-6), she is able to accept the 'proof' and to laugh at herself. Shakespeare specifically invites the audience to compare Olivia's reaction with Malvolio's by having her ask Malvolio for his opinion, and he is not amused: 'I marvel your ladyship takes delight in such a barren rascal' (1.5.78-9)—words that Feste does not forget, and turns back upon Malvolio in the final scene. Olivia shrewdly characterizes Malvolio: 'O, you are sick of self-love, Malvolio … There is no slander in an allowed fool, though he do nothing but rail; nor no railing in a known discreet man, though he do nothing but reprove' (1.5.85-91). By equating Malvolio's faults with Feste's, Olivia delicately but firmly puts Malvolio in his place; and by allying herself with the wise fool rather than with the repressive steward, she emerges as a much more complex and interesting character than the first scene has led us to expect. Far from being either the purifying goddess described by Orsino, or the cloistered idealist shutting herself away for seven years described by Valentine, she is a great lady in charge of her household whom grief has not deprived either of a sense of humour or of a capacity to size up other people. Both stand her in good stead in her first encounter with Viola.

‘MAKE ME A WILLOW CABIN’: VIOLA AND OLIVIA

The Viola/Olivia scene opens with an exchange about the most appropriate expression for a declaration of love, and so recalls the complexities of Orsino's language in the first scene, appropriately enough since Viola is his ambassador. Unable to recognize Olivia, or pretending not to recognize her, Viola launches into Orsino's prepared speech, 'Most radiant, exquisite, and unmatchable beauty', only to break off and ask anticlimactically 'if this be the lady of the house, for I never saw her' (1.5.162-4), thus drawing attention to the risk of inappropriateness in conventional compliments. Far from being in any way thrown by Viola's irony, Olivia is quick to catch her tone and to match her in distrusting cliché:

VIOLA

... I will on with my speech in your praise, and then show you the heart of my message.

OLIVIA

Come to what is important in't, I forgive you the praise.

VIOLA

Alas, I took great pains to study it, and 'tis poetical.

OLIVIA

It is the more like to be feigned, I pray you keep it in.

(1.5.181-9)

Viola and Olivia are equals in poise and wit, and as so often Shakespeare uses wit to suggest relationship, or potential relationship. The two characters strike up an immediate rapport, which during the course of the scene develops on Olivia's side into interest and finally love; as with the Viola/Orsino relationship, Olivia's love has
its origins in their compatible personalities.

Once Olivia has got rid of her attendants, what she calls a ‘skipping … dialogue’ (l. 193) begins to intensify. First, when she unveils at Viola's request and asks ‘Is't not well done?’, Viola's witty quip ‘Excellently done, if God did all’ is countered by Olivia's unperturbed, equally quick-witted reply: ‘Tis in grain sir, 'twill endure wind and weather’ (224-7). And when Viola goes on to suggest that Olivia must not die without leaving a ‘copy’ of her beauty, a child, Olivia wittily plays upon the word ‘copy’, taking the scene back into prose as she does so. Now it is she, not Viola, who deflates poetic compliments, mockingly reducing the various aspects of her beauty to a list of items on a ‘schedule’ or inventory, ‘as, item, two lips, indifferent red; item, two grey eyes, with lids to them; item, one neck, one chin, and so forth’ (ll. 235-7). The two of them are more clearly matched than ever in witty presence of mind.

The major transition in the scene comes when Viola, ironically in view of what is to happen, raises the idea of herself, as Cesario, loving Olivia, and demonstrates how she would go about her wooing in her famous ‘willow cabin’ speech (ll. 257-65). This is the perfect example of a passage which starts off from a basis of fashion and convention but goes far beyond the merely extravagant. As Harold Jenkins points out, ‘the willow is the emblem of forsaken love and those songs that issue from it in the dead of night … are easily recognizable as the traditional love-laments’. But as he also says, the parody ‘is of the kind that does not belittle but transfigures its original’ and Olivia ‘starts to listen’.33 The situation is again two-edged. Part of the reason that Olivia starts to listen is that she is susceptible to this kind of language when delivered with this power, and an atmosphere of erotic ambiguity is established which dominates the Viola/Olivia scenes as it does the Viola/Orsino ones. The dramatist Simon Gray writes illuminatingly about this ambiguity: the speech ‘is not a classic of romantic persuasiveness for nothing. If it is ironic in its exaggerations, it is also insidiously enticing in its rhythms … and consequently the comedy in [Viola's] relationship with Olivia is both intensely erotic and dangerous’ (New Statesman, 28 August 1969).

Olivia registers the power of the willow cabin speech with the simple phrase ‘You might do much.’ She then takes the scene on to its next stage by asking ‘What is your parentage?’, the significance of which is that she is attempting to find out if ‘Cesario’ is of the rank that would qualify ‘him’ as a potential husband. Her defences are down, her interest clear. In the soliloquy at the end of the scene, Shakespeare has given her a valuable sense of self-mockery: she herself is surprised at the speed and suddenness with which she has fallen in love: ‘How now? en so quickly may one catch the plague?’ (ll. 284-5). At the same time the comparison of love to the ever-threatening plague, echoing the first scene, gives a touch of sombre reality to her situation, and this duality is further developed in her second scene with Viola. There is certainly comedy of situation in Olivia's declaration of love to the ‘page’, but it is balanced by the lyrical freshness and beauty of her imagery, and then by her increasing desperation:

Cesario, by the roses of the spring,
By maidhood, honour, truth, and everything,
I love thee so that maugre all thy pride,
Nor wit nor reason can my passion hide.

(3.1.147-50)

As so often in Shakespearian comedy, an event is seen from more than one perspective: what may appear humorously incongruous to an onlooker is no joke to the person experiencing it. The language takes the character well beyond mere confusion of situation. Olivia's emotions have been roused and fired, and moreover she is aware both of the pain and the irony of her situation as an oncoming wooer.

But the moment needs careful handling, and the age of the character (and of the actress) is an important consideration. In an account which emphasizes the openness of the text to a variety of interpretations,
particularly in the matter of the characters' ages, John Russell Brown points out that Olivia can be of 'mature years', a gracious lady of the manor, or 'a very young girl' who forgets 'her “discreet” bearing in breathless eagerness' as she falls in love with Cesario. But the limitations of this openness have often been rather sharply demonstrated in performance. At the 1980 Canadian Shakespeare Festival in Stratford, Ontario, for instance, a mature Olivia threw herself at a young Viola only to be greeted by a strident comment from a woman in the audience, 'That's really quite embarrassing'—perhaps because Olivia appeared to be cradle-snatching, perhaps because one woman was making love to another. Olivia, of course, falls in love with the 'boy'; but it is part of the sexually ambiguous potential of the scene, as Trevor Nunn privately suggests, that Olivia unconsciously senses and responds to the feminine qualities of the 'boy'. Nunn argues particularly from the impression given by the matching youth, compatible personalities, and sympathy beneath the wit-combats, of Dorothy Tutin and Geraldine McEwan at Stratford-upon-Avon in 1958; but extreme youth can also bring its problems, as Robert Speaight explains: 'Olivia must, at least, be the competent mistress of a great household; a serious young woman capable of sudden silliness, or—if you prefer—a silly young woman capable of sudden seriousness. To make her incapable of any seriousness whatsoever blunt[s] the impact of Viola on her fantasy.' A careful balance needs to be struck between youth and maturity, between innocence and experience.

‘SHE NEVER TOLD HER LOVE’: VIOLA AND ORSINO

The long scene between Viola, Orsino, and Feste (2.4) is the emotional heart of the play. It is also the scene which best exemplifies the play's 'elusive' quality, its shifting, bittersweet mood; and as in the first scene the music makes a powerful contribution. The scene falls into three clearly defined sections: Feste sings 'Come away death' in the middle of the scene, with intimate conversations between Viola and Orsino on either side. But the song permeates the first section of the scene as well, since Orsino asks the musician or musicians to play the tune before Feste arrives, and the characters' reactions to it focus the changing moods of the scene—by turns melancholy, heartfelt, humorous, ironic—and especially the steadily developing relationship of Orsino and Viola. For example, Viola's 'masterly' description of the music—'It gives a very echo to the seat ere love is throned' (2.4.20-1)—leads Orsino to ask questions about Viola herself and with whom she is in love. Her oblique replies, and witty puns like 'by your favour', implying both 'by your leave' and 'someone who resembles you', establish the only way in which her disguise allows her to speak of her love—through hints and half-truths; and Orsino's reactions, like 'She is not worth thee then' and 'Too old, by heaven', show a valuable capacity to laugh at himself, a significant development from his first scene (ll. 22-8).

The second phase of the scene begins with Feste's arrival and the discussion of the song. There is a slight problem here. Orsino calls it 'old and plain', a folk-song such as people sing when sitting at work in the sun, about 'the innocence of love'. But the text is actually quite elaborate. The point is probably that the sentiment of the song, concerning a lover who is about to die of unrequited love and who asks to be buried uncommemorated and forgotten, is about primal emotions. It is certainly perfectly suited to the singer, as Feste's songs always are: it fuels Orsino's love-melancholy, but it is also very relevant to Viola, who no doubt thinks that she may well go to her grave without being able to declare her love. So for all its elaboration, the song celebrates unspoken emotion and is thus absolutely relevant to the content of the scene. It is easy when reading to forget the reactions of characters who are not speaking, which of course staging brings out: Ronald Bryden, for instance, wrote of the 'glimpses of unspoken tenderness' in John Barton's production, such as Judi Dench's Viola 'biting her lip as she watches the effect of Feste's hymn to death on Orsino' (Observer, 24 August 1969). But the song is relevant to Feste too: since he is almost certainly of an older generation—'a fool that the lady Olivia's father took much delight in' (2.4.11-12)—a song that is 'old and plain' suits this singer as it does his audience, for different reasons, and its melancholy fits the wry manner he displays elsewhere.

The impression that the song is suited to the singer also derives from the enjoyment Feste gets out of it—'I take pleasure in singing, sir'—and it is his involvement in his art which motivates his barbed reaction when
Orsino offers to pay him: ‘pleasure will be paid, one time or another’. Feste is not slow to accept—or to ask for—money elsewhere (2.3.25, 30-4; 3.1.42-53; 4.1.20-2; 5.1.22-43), but here he seems to bridle at Orsino's assumption that art is simply something to be used and that it can be switched off and on to order. And when Orsino dismisses him, Feste delivers one of the most remarkable speeches in the play:

Now the melancholy god protect thee, and the tailor make thy doublet of changeable taffeta, for thy mind is a very opal. I would have men of such constancy put to sea, that their business might be everything, and their intent everywhere, for that's it that always makes a good voyage of nothing.

(ll. 72-7)

Here Feste openly criticizes Orsino's moody changeableness: ‘changeable taffeta’ was a standard Elizabethan term for shot silk, which keeps changing colour with the light, as the opal also does (see the notes to 2.4.73-4). He then accuses Orsino of lacking constancy—something that Orsino specifically prided himself upon at l. 18. Not surprisingly, Orsino is stung by this and dismisses everyone except Viola. While Feste's ‘opal’ and ‘changeable taffeta’ are apt descriptions for at least a part of Orsino's personality, they might also serve as apt images for the shifting moods of both the scene and the play as a whole.

Partly, no doubt, because he is smarting at Feste's criticism of his inconstancy, Orsino is at his most self-centred when he proclaims that no woman's love is like his (ll. 92-102). Such male chauvinism is too much for Viola, the living denial of it, and she bursts out ‘Ay, but I know—’. This was a particularly memorable moment in Dorothy Tutin's performance in Peter Hall's 1958-60 production, well caught by Michael Billington as ‘a soaring cry from the heart halted just in time and brought down in the vocal scale to a more moderate “Too well what love women to men may owe” (Directors' Shakespeare, p. xviii).’ This impassioned broken line is very characteristic of Viola. In her candour, she cannot bear to hear Orsino going on about what is not true, and has to stop him even at the risk of almost revealing her identity. And the half-line emphasizes that in her page's disguise she is frustrated from making the declaration of love she longs to make. But her impassioned outburst also reawakens Orsino's interest in Viola herself and her feelings expressed at the start of the scene, and this leads to the emotional climax, Viola's oblique statement of her love in the allegory of an imaginary sister.

Once more, as in her ‘willow cabin’ speech, Viola starts off from convention but transforms it: the traditional Elizabethan comparison of ladies' skin to damask roses, and the proverb, which Shakespeare also uses in Sonnet 35, that the ‘canker’ (worm) 'lives in sweetest bud' (l. 4), perfectly express the hidden grief eating away at her heart:

She never told her love,
But let concealment, like a worm i'th' bud,
Feed on her damask cheek.

(ll. 110-12)

Viola then proceeds to transform the traditional image of the pining, melancholy lover into something more complex:

She pined in thought,
And with a green and yellow melancholy
She sat like patience on a monument,
Smiling at grief.

(ll. 112-15)
That final phrase, with smiles and tears inseparable, is very characteristic both of the play and of Viola herself: she can see the humorous as well as the sad side of situations. In her earlier soliloquy when Malvolio gave her Olivia's ring, for instance, she was able to combine sympathy for Olivia with a witty appreciation of the irony of her situation:

Poor lady, she were better love a dream!
... As I am man,
My state is desperate for my master's love.
As I am woman, now alas the day,
What thriftless sighs shall poor Olivia breathe!

(2.2.26-39)

Viola's speech draws Orsino from his self-absorption to an interest in her and her story: ‘But died thy sister of her love, my boy?’ Her reply is packed with a variety of emotional implications:

I am all the daughters of my father's house,
And all the brothers too; and yet I know not.

(ll. 119-21)

G. K. Hunter brings out some of these implications:

the doubleness of expression involves more than a pattern of wit; it evokes Viola's complex relationship of frustration and fulfilment, which is what the page role allows to her, at the same time as it reminds us of her brother, and her aloneness in the world. ... Viola says, ‘a woman may die of love’, ‘I may die of love for you’, ‘I am alone in the world—but I am not even sure of that’, ... and no doubt other things as well.37

Performers naturally seize upon this potential. Judi Dench, for instance, has a vocal characteristic, a little break or catch in the voice, which she can exploit to great expressive effect; she used it here on ‘brothers’, with a slight hesitation before the word: she was clearly thinking of Sebastian.

But Viola does not simply sit and pine: in the scene's final change of mood, she snaps out of her sorrow and has to remind Orsino, who is now absorbed in her and her story, of Olivia: ‘Sir, shall I to this lady?’ This moment, with Orsino more interested in Viola than Olivia, makes it clear that the basis of their relationship and ultimate marriage is fully established. One reason why Orsino has no more scenes until the finale is that no more are needed; Shakespeare's economical craftsmanship has done the work. As Gareth Lloyd Evans wrote of Orsino in John Barton's production, he ‘has mewled about ideal love and compromises with a sweet actuality which, unknown to him, is as near to the ideal as he will ever achieve’.38 He and Viola are friends first, lovers subsequently; at the end of the play, he marries someone he has come to know.

The final moments of this scene are usually highly charged in performance, as Orsino becomes more engrossed in Viola, and this interest is often expressed in physical ways which arise naturally out of the intensity of the scene. At Salzburg in 1972, for instance, Klaus Maria Brandauer actually kissed ‘Cesario’; and in Peter Gill's 1974 RSC production, John Price's Orsino clasped Jane Lapotaire's androgynous Viola sympathetically to his bare chest, thus making the moment even more difficult for her; behind them, on the walls of William Dudley's set, was scrawled a line from Sonnet 23: ‘O learn to read what silent love hath writ’ (l. 13). This Viola was the perfect image of ‘silent love’. Since she was also very convincing in her boy's disguise, and since Orsino responded so physically to ‘Cesario’, this staging focused attention on the sexually ambiguous potential of the relationships in this play, not only those between Orsino and Viola, and Viola and Olivia, but more particularly that between Antonio and Sebastian, which was also very physically expressed,
with passionate embraces between them at parting and at reunion.

ANTONIO AND SEBASTIAN

The relationship between Antonio and Sebastian is another of the differing ‘kinds of love’ depicted in the play; but Shakespeare has dramatized it in a way that makes it hard to focus precisely. The difficulties begin in their first scene (2.1). It is surprising that this is in prose; even if the scene is regarded as a simple narrative link, the usual medium for that in a Shakespeare play is blank verse, as in the next scene for these two characters (3.3). Moreover, it is very unlike the vigorous, energetic prose so far spoken, being formal, even mannered, with its abstractions and balanced cadences, as in Sebastian's ‘The malignancy of my fate might perhaps distemper yours’ (ll. 4-5). It is possible that this style is meant to suggest a sense of strain in the relationship. Antonio loving Sebastian but being uncertain how best to express it, Sebastian half-aware of this, perhaps partly reciprocating it, while also preoccupied with his grieving for Viola. The verse lines embedded in the prose, for instance ‘though it was said she much resembled me’ (ll. 22-3), may suggest intense emotion reined in by the controlled, contained style, and Sebastian is close to tears at ll. 37-8. Strong feeling beneath the formal surface is also implied in Antonio's phrase ‘If you will not murder me for my love, let me be your servant’ (ll. 31-2), which employs the Petrarchan conceit of the cruel mistress murdering her loving servant; and once Sebastian has left, the constraint of prose gives way to the liberation of verse as Antonio expresses his love directly: ‘I do adore thee so at danger shall seem sport, and I will go’ (ll. 42-3).

Some of the tensions beneath the prose in this scene may linger beneath the verse of their next conversation. In Sebastian's

> I can no other answer make but thanks,
> And thanks; and ever oft good turns ...

(3.3.13-15),

the third line is two syllables short, which may suggest an embarrassed pause after ‘And thanks’, Sebastian appreciating Antonio's generosity but implying that he is trying to find the right way of telling Antonio that he cannot fully reciprocate his love—before the conversation turns to the less emotionally fraught topic of seeing the sights of the town. Antonio's generosity emerges again when he gives Sebastian his purse; and this motivates his outraged sense of betrayal when ‘Cesario’ subsequently denies him the purse in the scene of his arrest. This moment is typical of the technique of the play: the comedy of situation created by the mock duel draws from Antonio an outburst of intense suffering, and a public declaration of his love for Sebastian, whom he relieved with ‘sanctity of love’ and to whose ‘venerable’ ‘image’ he offered ‘devotion’. His passion is summed up in the intense phrase ‘O, how vile an idol proves this god!’ (3.4.352-6). Here Antonio uses not so much the language of Petrarchan conceit as the expression of intense love in terms of religious devotion such as Shakespeare uses in some of his most powerful Sonnets:

> How many a holy and obsequious tear
> Hath dear religious love stol'n from mine eye

(31.5-6)

or

> Let not my love be called idolatry,
> Nor my beloved as an idol show ...

(105.1-2)
And although Viola has caused his statement of anguished disappointment through her apparent ingratitude, it is a nice irony that in fact she agrees with Antonio in being generous and hating ingratitude (3.4.344-7). This obliquely makes the point that, like Viola, Antonio provides a kind of emotional ground bass for the declarations of love in the play—often wrung from him by the twists of the plot, both here and in the final scene, which will be considered later.

At the same time, the play does not sentimentalize Antonio. The suspicion of piracy, for instance, which hangs about him is never conclusively dispelled. The evidence centres on two accounts of the sea-battle between Antonio and Orsino at 3.3.26-37 and 5.1.45-70. While not denying that he is Orsino's enemy, Antonio does deny that he is 'thief or pirate' (5.1.68-70); yet earlier he admits to Sebastian that the quarrel might have since been answered in repaying

What we took from them, which for traffic's sake
Most of our city did. Only myself stood out ...

(3.33-5)

This is presumably intended to communicate Antonio's stubborn integrity; but if he alone did not return the spoils, was he not technically guilty of piracy? Moreover, there is a noticeable discrepancy between Antonio's claim that his participation in the sea-fight was not of ‘a bloody nature’ (3.3.30), and the Officer's accusation that in the battle Orsino's 'young nephew Titus lost his leg' (5.1.57), implying that this was Antonio's fault. The truth probably lies somewhere in between, Antonio attempting to play down his ferocity and perhaps piracy to Sebastian, his enemies exaggerating both. Even so, the discrepancy suggests that Antonio is not being wholly candid with Sebastian, though his basic integrity is not in doubt.

There is a discrepancy of a different kind, a double time scheme, involving Sebastian's and Viola's rescue and arrival in Orsino's city. At 1.4.3, it is stated that ‘three days’ have elapsed since Viola arrived at court, but in the final scene both Antonio and Orsino refer to ‘three months’ elapsing since the shipwreck (5.1.89, 94). This seems to be Shakespearian sleight of hand, in order to underline the maturing affection of Orsino for Viola and Antonio for Sebastian, but Joseph Pequigneys uses this ambiguity as part of his attempt to ‘secure the homoerotic character of the friendship’:

for months [Sebastian] has continuously remained with an adoring older man who is frankly desirous of him, who showered him with ‘kindnesses’ [3.4.341] and who, moreover, saved him from death at sea and nursed him back to health. It is the classic homoerotic relationship, wherein the mature lover serves as guide and mentor to the young beloved.39

He further suggests that Sebastian's use of the alias Roderigo (2.1.15) is ‘unexplained’ but that it can be ‘seen as a means to hide his identity, his true name and family connections, during a drawn-out sexual liaison with a stranger in strange lands’. The alias can equally be explained as Sebastian's circumspection while unsure how far he could trust Antonio (perhaps because of the suspicion of piracy), or simply as a common motif in myth or folk-tale that to reveal your identity places you in other people's power. This is, for example, one of the reasons why Marina is so reluctant to reveal her identity in Pericles (Scene 21, 90-130, 175-7). But even if the arguments put forward by Pequigneys and others do not ‘secure’ the Antonio/Sebastian relationship as homoerotic, it is certainly true that the text permits, even if it does not demand, a homoerotic interpretation.41

THE GULLING OF MALVOLIO

Yet another aspect of love and lovers' behaviour is dramatized in the Malvolio story. By presenting Malvolio as an extravagant wooer of Olivia, the play provides a perspective on the Orsino/Olivia/Viola story and binds the main plot and the sub-plot tightly together, with Olivia at the centre of both, wooed by Orsino,
Viola/Cesario, Sir Andrew, and Malvolio.

Malvolio has made a big impact from the beginning. In his account of the earliest recorded performance, John Manningham thought it ‘a good practice’—a good practical joke—‘to make the steward believe his lady widow was in love with him’ (Olivia's mourning black must have misled Manningham into forgetting that she was mourning a brother, not a husband). He also seems to have found the later stages of the gulling—‘making him believe they took him to be mad’—all part of the fun: Shakespeare's contemporaries were notoriously cruel in their attitude to madmen. Manningham's account does not necessarily imply that Malvolio was played exclusively for broadly humorous effect; but when, in a commendatory poem to Shakespeare's *Poems* written before 1636 and published in 1640, Leonard Digges says that

*The Cockpit galleries, boxes, all are full
To hear Malvolio, that cross-gartered gull* (ll. 59-60),

the word ‘gull’ (fool) does not suggest that much sympathy was wasted on Malvolio. But after the only major gap in the play's post-Restoration performing history, Charles Macklin revived the play in 1741 and played Malvolio himself; he was also a famous Shylock, but none of the reviews suggests that he emphasized the strong vein of humour in Shylock's part, so it is possible that the tendency of leading actors (and commentators) to look for pathos, sympathy, or quasi-tragedy in Malvolio began with Macklin.

The first firm evidence for such an interpretation, however, comes in Charles Lamb's description of Robert Bensley as Malvolio in his essay ‘On Some of the Old Actors’. Lamb argues that ‘Malvolio is not essentially ludicrous’ but the ‘master of the household to a great Princess’ and that the humour derives from the incongruity between his puritanical rectitude and the context in which he finds himself: ‘his morality and his manners are misplaced in Illyria.’ When Robert Bensley's Malvolio was lost in his fantasies of greatness, Lamb ‘rather admired than pitied the lunacy’, and he ‘never saw the catastrophe of this character, while Bensley played it, without a kind of tragic interest’.

Lamb's essay was published in 1823, but Bensley's last performances as Malvolio were in 1792, when Lamb was only seventeen, so it is possible that the ‘tragic interest’ was Lamb's rather than Bensley's, especially since Sylvan Barnet provides evidence that Bensley's performance contained grotesque elements too; but it represents a reading of the character that has been attempted by many actors since. Henry Irving, for instance, seems to have drawn upon Lamb's essay for his quasi-tragic Malvolio in 1884, a performance widely regarded as a failure.

Even so, while most actors have seized upon the opportunities for broadly comic effect in the part, they have also striven for something ‘human’ and complex.

A notable example of this approach was Laurence Olivier’s Malvolio at Stratford-upon-Avon in 1955. In a lecture given in Stratford at the time, Olivier said that since the part must be funny and yet ‘tragic, too’, he had chosen to play Malvolio as a social ‘upstart’ so that the notion of Olivia being in love with him would be absurd yet also pathetic (quoted in *The Times*, 27 August 1955). Ivor Brown described the result: ‘a diligent, self-made domestic official, over-eager to keep order, a common, uneasy [social] climber with a tortured lisp. … The actor, not so much over-weening as under-weening, provided a plausible and untheatrical Malvolio, brilliant in many details.’ Some of those details, however, seemed to offer moments of farce that were at odds with the search for a plausibly human characterization, as when Olivier fell backwards off a bench in his ecstasies during the letter scene, or when his trousers fell down from under his nightshirt in the drinking scene. The relative disappointment with which this performance was received may have derived from the uneasy alternation between farcical gags and a striving for sympathy. It is worth trying to assess how far the text itself strikes a balance between these two extremes.
The first point to make is that Malvolio's name is against him. ‘Malvolio’ means ‘ill-will’, formed from Italian *mal* (bad) and *voglia* (desire) on analogy with, and in contrast to, ‘Benvolio’ in *Romeo and Juliet* who is Romeo's good friend and a would-be peacemaker. The name Shakespeare has created for him carries a suggestion of adverse criticism and even of caricature. Leonard Digges's allusion to ‘Malvolio, that cross-gartered gull’ quoted above is given in the modernized spelling of the Oxford *Complete Works* of Shakespeare. But the original spells the name ‘Malvoglio’, so if this is the author's spelling rather than the compositor's, Digges had clearly grasped the significance of the name; this *may* imply that the part was performed as a caricature in the first half of the seventeenth century, and support John Manningham's relish of the ‘practice’ against Malvolio. However that may be, Shakespeare reinforces the negative implications of the name when he introduces Olivia and Malvolio together and contrasts her generous reaction to Feste with Malvolio's dismissive one (1.5.68-93). Yet it is interesting that what were by general consent the two outstanding Malvolios of recent years, Donald Sinden (in John Barton's production) and Eric Porter (in Peter Hall's), both got a big laugh on their very first word in answer to Olivia's ‘What think you of this fool, Malvolio? Doth he not mend?’, which is ‘Yes’ (1.5.68-70). This is not something which anyone is likely to *pick up from reading alone*; it marks the distance between text and performance. Nor did either actor impose anything upon the line; each simply packed into that monosyllable the censorious sourness of the whole sentence—‘Yes, and shall do, till the pangs of death shake him’—and of Malvolio's attitudes in general. Charles Lamb was right to say that Malvolio is ‘cold, austere, repelling’—but he is also very funny. In this part, as often elsewhere, Shakespeare makes his points through laughter.

Lamb was also, however, right to stress that Shakespeare establishes Malvolio as a reliable, even essential, steward in a great household: his repressiveness and lack of generosity need not interfere with his efficient discharge of his duties, and may even help them. He is obviously useful, for instance, in dealing with unwelcome embassies from Orsino, as Olivia's casual instructions imply: ‘Go you, Malvolio. If it be a suit from the Count, I am sick, or not at home—what you will to dismiss it’ (1.5.103-4). Malvolio will cope. If he fails to do so in this case, that is because he comes up against someone more able than himself, whose positiveness and efficiency make her a more valuable servant for her master than Malvolio is for his. Malvolio is contrasted with Viola as well as Olivia, especially in his encounter with her over the ring (2.2). With the ring, Olivia has sent an invitation: ‘If that the youth will come this way tomorrow, I'll give him reasons for't’ (1.5.295-6). But Malvolio's version of this characteristically turns a positive suggestion into a negative one, ‘that you be never so hardy to come again in his affairs, unless it be to report your lord's taking of this’ (2.2.9-11). For all his efficiency, or officiousness, on Olivia's behalf, he actually does her a disservice here because he is not sensitive to what Olivia means, as Viola is: quickly sizing up the situation, with characteristic generosity she conceals Olivia's rash indiscretion from her steward: ‘She took the ring of me, I'll none of it’ (2.2.12). This tiny exchange points the difference between an ungenerous nature and a generous one with brilliant economy.

When Malvolio breaks up the drinking party (2.3), he is again legitimately exercising his stewardship. Maria makes the point just before his entry: ‘If my lady have not called up her steward Malvolio and bid him turn you out of doors, never trust me’ (2.3.68-70); and sure enough Malvolio says ‘My lady bade me tell you …’ when he does appear (ll. 89-90). But other evidence suggests that his representing Olivia will not be among the audience's main impressions of the scene. First, there is the nature of Malvolio's entry. The Folio text's direction is merely a terse ‘Enter Malvolio’, but that gives no idea of the size and impact of the theatrical moment. The drunken singing has been escalating; Maria's attempt to check it only intensifies it; and then Malvolio appears, the man who runs the household dragged out of bed in the middle of the night. In Granville Barker's 1912 production, Malvolio appeared in his normal severe garb with its white puritan collar …, but most productions dress him in a nightshirt, usually with his steward's chain over it, and sometimes with a dressing-gown and a nightcap, or his steward's hat, as well; at Stratford-upon-Avon in 1966, Ian Holm had his hair in curlers beneath the nightcap. … The audience's chief impression is of an incongruity, more or less riotous depending on the staging, between Malvolio and the others, in which they are unlikely to think of him primarily as Olivia's representative.
What is more, Malvolio does not mention Olivia at first. He accuses the others of madness and calls them ‘tinkers’, an extremely abusive term. He only mentions Olivia in order to threaten Toby with dismissal: ‘she is very willing to bid you farewell’ (2.3.94). This is the cue for Sir Toby and Feste to adapt a lover’s song of farewell in order to raise the question of Malvolio himself, rather than Sir Toby, being dismissed (ll. 95-105). Then the scene turns ugly as Sir Toby rises to Malvolio’s challenge—spurred into doing so, it is interesting to note, by Feste’s jibe ‘you dare not’ —and pulls rank on Malvolio: ‘Art any more than a steward?’ (ll. 106-7). The crucial point about Malvolio's stewardship here is that it is used to emphasize the personal conflict between Malvolio and Toby, which leads directly into the next major development of this area of the play—the plot against him. As she conceives this, Maria makes the point that he is only ‘a kind of puritan’, implying that his puritanism is a façade: ‘The dev’l a puritan that he is, or anything constantly but a time-pleaser, an affectioned ass …’ (ll. 130, 136-7). What lies behind the efficient steward and repressive puritan emerges in Malvolio’s most extended scene, his discovery of the letter.

Before Malvolio enters, Maria tells the others that he ‘has been yonder i’the sun practising behaviour to his own shadow’ (2.5.14-15), and it is important that Malvolio should be entertaining fantasies of greatness, and specifically about being married to Olivia, before he even reads the letter: he is thus the more susceptible to its contents. Fantasizing about being ‘Count Malvolio’, he cites an instance where the barriers of class were crossed—‘the Lady of the Strachey married the yeoman of the wardrobe’ (ll. 32-7)—in the process revealing his interest in salacious gossip beneath his puritan exterior. The letter itself begins with a short poem and an ‘alphabetical position’ which draws upon the Elizabethan love of verbal games and acrostics:

‘I may command where I adore, 
But silence like a Lucrece knife
With bloodless stroke my heart doth gore.
M.O.A.I. doth sway my life.’

(ll. 100-3)

The quatrain is a parody of those Elizabethan love poems which are more intent on displaying ingenuity than on expressing feeling. Both the yellow stockings and the cross-gartering are also associated with traditional lovers’ behaviour (see the Commentary to 2.5.144-5), and in his enthusiasm to wear them ‘even with the swiftness of putting on’ (l. 162), Malvolio allows his hitherto concealed fantasies of being a courtly lover to take over from the severe fronts of steward and puritan that have so far concealed them. The crowning touch in this transformation comes with his sudden address to Jove (ll. 162-8), and his assumption that the ruler of the classical gods, famed for his amorous exploits, is the perfect patron deity for him in his moment of triumph. That it should be a ‘kind of puritan’ who talks like this only emphasizes the incongruity between Malvolio the puritan steward and Malvolio the courtly lover.

This incongruity is much developed when he amazes Olivia by appearing before her wearing the yellow stockings and cross-garters, and quoting phrases that mean nothing to her (3.4.14-61); in the process, his place in the total scheme of the play becomes clear. As Irving Wardle wrote of Eric Porter’s performance, Malvolio becomes the play’s ‘supreme victim of erotic delusion’ (Independent on Sunday, 3 March 1991); so his love-delusions, as Harold Jenkins points out, ‘fall into perspective as a parody of the more delicate aberrations of his mistress and her suitor. Like them Malvolio aspires towards an illusory ideal of love, but his mistake is a grosser one than theirs, his posturings more extravagant and grotesque’. Olivia herself makes the point just as he appears: ‘I am as mad as he, sad and merry madness equal be’ (3.4.14-15). The strong element of sheer fantasy he expresses in the letter scene and repeats in his soliloquy after Olivia has left in this one, when he once more attributes his success to Jove (3.4.72-80), makes the crucial point that as a lover he is so much more extreme in his behaviour than Olivia and Orsino that by comparison with them their ‘delicate aberrations’ seem modest and susceptible of cure. We have already seen the start of Orsino's cure in his involvement with ‘Cesario’; Malvolio's seems much less likely in view of the element of sheer fantasy involved in his love...
delusions. In this soliloquy, these fantasies are expressed with stewardly logic, working out how everything fits: ‘Why, everything adheres together that no dram of a scruple, no scruple of a scruple, no obstacle, no incredulous or unsafe circumstance—what can be said?—nothing that can be can come between me and the full prospect of my hopes’ (3.4.75-9). This is where the real importance of Malvolio's stewardship emerges: the more the actor makes Malvolio a steward of genuine capacity and substance in the early scenes, as Eric Porter for instance did, the greater the incongruity here; the more seriously Malvolio takes himself, the funnier he is—a basic principle of Shakespearian comedy, or any comedy.

There is no hint so far of potential heartbreak or quasi-tragedy in the presentation of Malvolio. But just after his exit in 3.4, the gulling plot takes another and more sinister turn. Maria's ‘device’ has completely succeeded, but when she proposes to pursue it still further, Fabian says ‘Why, we shall make him mad indeed’, and Sir Toby seizes upon the idea: ‘Come, we'll have him in a dark room and bound’ (3.4.126-30). Before we see that (4.2), however, the attention shifts to the other major intrigue of this section of the play, the mock duel between Viola and Sir Andrew; and these scenes of intrigue raise some problems which have not affected the course of the play so far. …

Notes

1. The document is reproduced in S. Schoenbaum, *William Shakespeare: A Documentary Life* (Oxford, 1975), p. 156. Presumably the actors were Shakespeare's company, the Lord Chamberlain's Men; they were unlikely to relinquish a new play to anyone else, and in any case the text was not generally available, since it was not published before the First Folio of 1623, and was only then entered in the Stationers' Register, on 8 November 1623. See Wells and Taylor, *Textual Companion*, p. 32.

2. Other pointers to this date are: (i) references to ‘the Sophy’—the Shah of Persia (2.5.170; 3.4.269)—probably postdate Sir Robert Shirley's return from Persia, in a ship named *The Sophy*, in 1599; (ii) an apparent allusion to the Arctic voyage of William Barents in 1596-7 (3.2.24-6); an English account was entered in the Stationers' Register in 1598, the earliest surviving edition dated 1609; (iii) ‘the new map with the augmentation of the Indies’ (3.2.74) appears to be one published in Hakluyt’s *Voyages* in 1599 and reissued in 1600; (iv) some of the snatches of song in 2.3 probably draw on Robert Jones's *First Book of Songs or Airs* (1600). See Wells and Taylor, *Textual Companion*, p. 123, for a more detailed discussion of the dating.

4. The play was reprinted by the Cornmarket Press in 1969. Charles Molloy's *The Half-Pay Officers*, of 1720, listed by e.g. Campbell and Quinn in *A Shakespeare Encyclopaedia* (1966) as an adaptation of *Twelfth Night*, bears scarcely any relation to Shakespeare's play. It is described by George C. D. Odell, *Shakespeare from Betterton to Irving*, 2 vols. (New York, 1920), 1.248, and was reprinted by the Cornmarket Press in 1969.

5. Full information on performances from 1660 to 1800 is given in *The London Stage*, 11 vols. (Carbondale, Illinois, 1965-8).

11. Odell, 2.455.

14. In Shakespeare's Festive Comedy (Princeton, 1959), C. L. Barber argues that Shakespearian comedy draws on the forms and traditions of Elizabethan holidays (not just Twelfth Night) to create a pattern of festive release leading to psychological clarification: ‘People are caught up by delusions or misapprehensions which take them out of themselves, bringing out what they would keep hidden or did not know was there’ (p. 242).
16. Barbara Everett argues that ‘the “sub-title” is really no sub-title, but a generic, perhaps primary, and certainly important part of the title’ (‘Or What You Will’, EC 35 (1985), 294-314; p. 304). She points out that ‘Marston's What You Will, though not published till 1607, was almost certainly written and first performed not long before the first performance of Shakespeare’s comedy’, so this may have necessitated a change in Shakespeare's title (p. 313).
19. There is a photograph of the twins in SS 32 (Cambridge, 1979), facing p. 88.
20. There are several photographs in Dennis Kennedy, Granville Barker and the Dream of Theatre (Cambridge, 1985), pp. 136-47.
23. Several of these texts are conveniently gathered together in Geoffrey Bullough, Narrative and Dramatic Sources of Shakespeare, vol. 2 (1958), pp. 286-372. They are discussed in Bullough, in Robert C. Melzi, ‘From Lelia to Viola’, Renaissance Drama, 9 (1966), 67-81, and in Salingar (see p. 5 n. 1 above).
25. Other interesting verbal similarities are the use of ‘leasing’ (rather than ‘lying’) by Riche (Bullough, pp. 357, 360) and by Feste (1.5.92); and of ‘denay’, rather than ‘deny’ by Riche (pp. 357, 359) and by Orsino (2.4.124). Silla's passions are said to be ‘contagious’ (p. 347), like Feste's singing (2.3.52); Julina's bitterly ironical remark that she has ‘so charily preserved mine honour’ (p. 360) recalls Olivia's that she has ‘laid mine honour too unchary out’ (3.4.195).
27. This means, of course, that they cannot be physically identical, an advantage when casting them.
32. Peter Thomson goes so far as to say that the ‘highly wrought language of his first speech is designed to be a verbal accompaniment to the melody’ rather than the other way round (Shakespeare's Theatre, 2nd edn., 1992, p. 92).
33. ‘Shakespeare's Twelfth Night’ (see p. 20 n. 1), p. 177.
34. Shakespeare's Plays in Performance (1966), p. 209. In an earlier book, Brown emphasizes the youth of the characters. He calculates that since Sebastian is the same age as Viola and ‘still beardless
enough to be imitated’, they cannot be more than about nineteen; Orsino is of ‘fresh and stainless youth’ and believes that the man should be older than the woman, so must be older than Olivia; ‘by the same token Olivia should be younger than Sebastian and hence younger than Viola’. This may, as he says, ‘be pushing consistency too far’; but it is worth remembering at a time when Shakespeare’s heroines are usually played by actresses rather than boy actors (Shakespeare and his Comedies (1957), pp. 176-7).

36. Dorothy Tutin’s performance is preserved in a sound recording (Argo ZPR 186-8 (1961)), as are those of two other members of Hall’s cast, Patrick Wymark (Sir Toby, 1958-60) and Derek Godfrey (Orsino, 1960).
40. Stephen Orgel, for example, calls Antonio and Sebastian an ‘overtly homosexual couple’ (‘Nobody's Perfect: Or Why Did the English Stage take Boys for Women?’, South Atlantic Quarterly, 88 (1989), 7-29; p. 27).
41. In an account of sexual ambiguity and hermaphroditism in the Renaissance, Stephen Greenblatt suggests that the blurring of accustomed sexual distinctions in the play, especially as represented by an all-male cast, is such that Sebastian and Viola become ‘indistinguishable’ figures. Perhaps this pushes the play's sexually ambiguous potential rather far; but his discussion focuses ‘the sexual energies that [are] transfigured in the comedies and the melancholy darkness that lies just beyond the transfiguration’ (Shakespearean Negotiations (Berkeley, 1988), pp. 91, 184).
42. Stephen Greenblatt (see previous note) argues that this slip is the ‘normalization’ of the ‘major male wish-fulfillment fantasy’ of marrying a wealthy widow (pp. 69, 176).
48. ‘Shakespeare's Twelfth Night’ (see p. 20 n. 1), p. 185.

Twelfth Night Literary Criticism (Vol. 74): Criticism: Character Studies

[In the following essay, Willbern relates Malvolio and his downfall to the play's theme of festivity.]

Malvolio, that humorless steward, sick of merrymakers and self-love, seems almost a stranger to the festive world of Illyria. His very first words reveal his acrimonious opinion of Feste, the soul of festivity:

OLI.

What think you of this fool, Malvolio? doth he not mend?

MAL.

Yes, and shall do till the pangs of death shake him. Infirmity, that decays the wise, doth ever make the better fool.

(I. v. 73-77)

Everything about Malvolio's character sets him apart from frivolity.

Even his vocabulary isolates Malvolio. When he chastises a rowdy Sir Toby by demanding “Is there no respect of place, person, nor time in you?” Toby quips, “We did keep time, sir, in our catches” (II. iii. 91-94). For the solemn steward and the carousing knight, the word “time” has different meanings. Malvolio hears only a cacophonous violation of decorum; Toby hears only melody and lyrics. When, a few lines later, Toby and Feste “converse” with Malvolio in song, Malvolio simply does not understand (II. iii. 102 ff.).

But while Malvolio may have no use for festivity, festivity has considerable use for him. In the paragraphs that follow, I shall consider the steward's collision with the merrymakers, the nature of the damage he suffers,
and its relevance to the general theme of festivity.

I

When Malvolio falls into Maria's cunning trap and makes his sole concession to frivolity by donning yellow cross-garters, the desires he has previously hidden beneath a staid composure suddenly emerge exultant. On the surface Malvolio's wish is to be a social climber, “to be Count Malvolio.” Yet there is a deeper desire here, and even though cross-gartering “does make some obstruction in the blood,” as he complains, it does not obstruct an unwitting expression of the steward's strongest yearning: to sleep with his lady Olivia. In the forged letter scene, he alludes to a daydream of “having come from a day-bed, where I have left Olivia sleeping” (II. v. 48-49). And he jumps eagerly at an imagined opportunity when Olivia, thinking that a man who dresses so oddly and smiles so incessantly must be deranged, suggests rest: “Wilt thou go to bed, Malvolio?” she asks. “To bed?” he exclaims. “Ay, sweet heart, and I'll come to thee” (III. iv. 29-31).

But Malvolio's latent sexual wishes are also evident in his reading of the forged letter. While his fantasy of leaving Olivia in their shared day-bed is romantic enough, his remark to Toby about fortune “having cast me on your niece” (II. v. 69-70) may be less so, and his spelling lesson betrays the crudest carnality. “By my life,” he swears,”this is my lady's hand. These be her very c's, her u's, and her t's, and thus makes she her great P's.” After thus spelling out the carnal focus of his fantasies, he sounds out the word itself, hidden within a term of disdain: “It is, in contempt of question, her hand” (II. v. 86-88). It must have been important to Shakespeare that the bawdy secret be heard, for Andrew immediately repeats, “Her c's, her u's, and her t's: Why that?”

Some fine and famous Shakespeareans have been unable or unwilling to hear the answer to this question. Arthur Innes reasoned in 1895 that “probably Shakespeare merely named letters that would sound well.” G. L. Kittredge considered Andrew's question “impossible to answer.” Once the bawdy note is sounded, of course, the question is embarrassingly easy to answer.

In one sense, the event illustrates Shakespeare's insight into the psychology of the bluenose censor, secretly fascinated by and desirous of the eroticism he condemns. But it may also demonstrate Shakespeare's playful insight into his own wordplay, so frequently erotic. As the body lies at the basis of metaphor, bawdiness is basic to much punning: playing around with language.

II

But Malvolio is not playing; he is being played, for a fool. His hidden desire emerges, but only cryptically. Later, Feste, with his characteristically well-disguised perspicacity, mockingly underscores Malvolio's latent wantonness. “Sir Topas, Sir Topas, good Sir Topas,” cries Malvolio from his prison, “Go to my lady.” To which the dissembling Feste replies, “Out, hyperbolical fiend! how vexest thou this man! Talkest thou nothing but of ladies?” (IV. ii. 23-26). Until his surrender to festivity, Malvolio's black suit and anticomic bearing have concealed his “fiend”; now it is out in the open.

Up to the moment of his fall, Malvolio had been able to keep his overt behavior and his covert desires neatly separate, thereby maintaining the condition he had earlier demanded of Toby the reveler: “If you can separate yourself and your misdemeanors, you are welcome to the house” (II. iii. 98-99). But Malvolio's careful division between act and desire, reason and fantasy, collapses when he falls into Maria's trap, even though he himself is certain he has maintained it yet. “I do not now fool myself,” he asserts,” to let imagination jade me, for every reason excites to this, that my lady loves me” (II. v. 164-65). From the inverted perspective in which reason “excites” rather than informs, Malvolio finds the way to shape the letter in terms of himself, and then to reform himself in terms of the letter: “M. O. A. I. … If I could make that resemble something in me!” (II. v. 109-20). It requires only a little “crush” to make the fit. Excited by false reasons, his reason fails him. His
“madness” is thus his conviction that he is not mad, his illusion of maintaining control over circumstances when in fact he has lost control. “O peace!” Fabian cautions the impatient Andrew as they watch Malvolio drawing the net more tightly about himself: “Now he's deeply in. Look how imagination blows him” (II. v. 42-43). As he cleverly decipheres the forged letter, Malvolio believes that his supreme reason is shaping his destiny: “Thou art made,” he reads, “if thou desir’st to be so” (II. v. 155). Instead of making him, however, his desire unmakes him. His efforts to reform his image lead to disgrace: a fall from grace which is not only personal and social, but has spiritual resonance as well.

Feste is not merely joking when he refers to Malvolio's “fiend.” For indeed, the steward behaves, as Toby and Maria maliciously observe, as though he were “possessed.” Maria claims that “Yond gull Malvolio is turn'd heathen, a very renegado; for there is no Christian that means to be sav’d by believing rightly can ever believe such impossible passages of grossness. He's in yellow stockings” (III. ii. 69-73). Malvolio's plight is comical, of course, but there is an undercurrent of seriousness throughout. Malvolio surely means to be saved by believing rightly, but erroneous beliefs and impure desires have placed his soul in precarious balance. A bit of Feste's seeming nonsense clarifies the situation. After paralleling himself and Malvolio (incarcerated) with the medieval figures of Vice and Devil, Feste departs with a song whose final line is “Adieu, goodman devil” (IV. ii. 120-31). A typical Festean riddle, the phrase makes appropriate sense. It is a syntactic representation of the basic Morality Play scheme: “man” is centered between “good” and “devil” and should turn in the right direction, “à Dieu.” This moment of mini-allegory prefigures Feste's later banter with Orsino, when the Duke tells the clown, “O, you give me ill counsel,” and Feste continues: “Put your grace in your pocket, sir, for this once, and let your flesh and blood obey it” (V. i. 31-33). Feste's counsel here echoes the voice of the archdeceiver, perched on his victim's left shoulder: “let your flesh and blood run free,” he advises, “just for this once. Don't worry about your soul, just hide it and the possibility of grace away temporarily, ‘in your pocket, sir.’” Such brief transgressions, however, will not be forgotten. “Pleasure will be paid,” Feste reminds us, “one time or another” (II. iv. 70-71).

III

The underlying seriousness of Malvolio's fall is further suggested by the nature of the punishment he suffers. On one level, he is imprisoned for the “madness” of being rigidly sane in a frivolous world. On another level, his humbling is a direct rebuke to his social-climbing aspirations. On a yet deeper level, he is punished for his hidden concupiscence, with the punishment combining various symbolic “deaths.” Malvolio is not only mortified; metaphorically he is also mortally assaulted, killed, and buried. “I have dogg'd him,” gloats Toby, “like his murtherer” (III. ii. 76). The steward who wanted to possess his lady is instead thrown into a small dark hole: having wished for a bed, he finds a grave. He complains to Feste, the singer of “Come away, come away, death, / And in sad cypress let me be laid” (II. iv. 51-52), saying that “they have laid me here in hideous darkness” (IV. ii. 29-30). Malvolio does symbolically “die,” but not as he had hoped; his is not the sexual death of Feste's ambiguous song, but the comic scapegoat death of a victimized gull.

Even when released from his symbolic cell, however, the unrepentant steward refuses to participate in the lovers' celebrations. Faced again with merriment, he steadfastly clings to sobriety. His letter to Olivia from his cell—signed, accurately, “the madly-us'd Malvolio”—is calm, reasonable, and correctly descriptive of his treatment (V. i. 302-11). His only request is “Tell me why.”

Why have you suffer'd me to be imprison'd,
Kept in a dark house, visited by the priest,
And made the most notorious geck and gull
That e'er invention play'd on? Tell me why!

(V. i. 341-44)
He receives no answer, and although Olivia promises him future justice, he is not appeased. The steward who earlier declared to Toby, Maria, and Fabian, “I am not of your element” (III. iv. 124), is thus alone at play's end. While Feste remains to sing his lovely and melancholy song, Malvolio exits, snarling promised revenge.  

As Malvolio departs, he leaves behind an unresolved conclusion to the play, taking with him the key to any clear resolution. For all its conventional comic devices of repaired unions, the ending of *Twelfth Night* is indeterminate. We look for the settlement of disputes and the reunion of fragmented relationships, “confirm’d by mutual joinder of their hands,” as the priest says of Olivia and Sebastian (V. i. 157). But though the final scene of *Twelfth Night* is in fact constructed so as to allow “mutual joinder,” no such resolution occurs. The prolonged hesitation of Viola and Sebastian to identify each other, which includes a careful scrutiny of all the evidence (names, sex, moles, age, clothing), finally results not in any embrace of recognition but in Viola's odd provision of postponement:

Do not embrace me till each circumstance  
Of place, time, fortune, do cohere and jump  
That I am Viola.

(V. i. 251-53)

One expects a coherence of circumstance, place, time, and fortune at the conclusion of a successful comedy—and *Twelfth Night* has often been viewed as a paradigm of the form. But Shakespeare deliberately defers a denouement, and the play ends before we see one enacted. Viola maintains that the resumption of her true identity depends upon the old captain who brought her to Illyria, the captain who has kept her “maiden weeds.” The captain, however, has been jailed by Malvolio, “upon some action” (V. i. 275-76). Malvolio is therefore essential to a final resolution of the plot; the ultimate coherence of time and circumstance depends upon the mistreated gull. When he stalks out, swearing revenge, he also disrupts the plot, refusing to fulfill his essential role in the final “mutual joinder.” Orsino commands, “Pursue him and entreat him to a peace; he hath not told us of the captain yet” (V. i. 380-81). But we hear no more from Malvolio, nor from anyone else, for the play almost immediately concludes, with the loose ends of its unfinished plot knotted abruptly into Feste's final song.

Similar gestures of irresolution occur at the end of almost all of Shakespeare's comedies—as though he was habitually skeptical of the resolutions the genre typically provided. Whether through hints of failed marriage at the end of *As You Like It*, or the sudden mournful disruption at the end of *Love's Labor's Lost*, or the preposterous rapid-fire revelations at the end of *Cymbeline*, Shakespeare usually complicates the conventional comic ending, stressing the fragility of its artifice. As Feste's concluding song suggests in *Twelfth Night*, the momentary pleasures of plays and other toys are only transient episodes in a larger season of folly, thievery, drunkenness, and old age. To the extent that the tidy finales of conventional comedies deny such larger, extradramatic realities, Shakespeare seems to have been uneasy with them: the ending of *The Tempest* is his final manifestation of this uneasiness.

IV

An aspect of Shakespeare's distrust of romantic conventions underlies Malvolio's spelling lesson, to return to that scene for a moment. I want to ask Andrew Aguecheek's question once more, and offer a speculative answer. “Her c’s, her u's, and her t’s: why that?” Why, indeed? Why does Shakespeare so carefully embed this grossest of verbal improprieties in a play which even Eric Partridge calls “the cleanest comedy except *A Midsummer Night's Dream*”?  

One answer involves what Shakespeare evidently considered the natural and undeniable bases of human behavior. The romantic comedy of *Twelfth Night* transmutes our basic appetites, sublimating carnal hunger
into romantic yearning: food becomes music, as Orsino's opening speech reveals (but melancholy music, with “a dying fall”). *Twelfth Night* enacts an elaborate dance around a central core of carnality, which Malvolio's unconscious cryptogram literally spells out. The idealized festivity of *Twelfth Night* is to its secret erotic core as the innocent Maypole dance is to the symbol around which it revolves—except that the joys and celebrations of Maygames are muted in Shakespeare's play by wintry, “dying” tones of mourning and loss. Erotic desire and symbolic death intermix throughout the play, creating a continuous undertone of romantic melancholy best personified in the figure of Feste. Festivity and loss are presented as reciprocal: carnival is a farewell to the carnal (carne-vale).

What makes *Twelfth Night* ultimately so melancholy, however, is not the sounding of these baser tones in the music of love, but the futile (albeit beautiful) effort spent trying to deny the facts of desire and death with the artificial toys of romantic wish-fulfillment. Finally it won't work. In retrospect, the festive fantasy of innocent indulgence looks like another version of the puritanical Malvolio's effort to deny or repudiate base carnal desire. Illyria's romanticism is psychologically reciprocal to Malvolio's rigidity and restraint: both represent denials and sublimations. Feste's final song seems to admit the futility of both defenses against the real world.

For all their mutual antipathy, Malvolio and Feste are symbolic brothers: both estranged from yet integral to the festive yet melancholy world of Illyria. To achieve a comic world of reunion and restoration, it is necessary to omit or deny or banish their respective melancholies. But, since melancholy preceded and prompted the merriment, this is impossible. Malvolio therefore retreats to his threats of vengeance, Feste to his ambiguous lyric. Finally both characters withdraw from the comic world. But without them and the impulses of restraint and loss they represent, that comic world has no motivation, no “reason” for being.

At Malvolio's fall we laughed all. Yet without the (scape) goat, there would have been no carnival to provide either the fall or the merriment attending it.

**Notes**

2. Specifically, Malvolio complains that the revelers are violating the traditional “three Unities” of Renaissance dramatic criticism. John Hollander has noted this analogy in his excellent essay, “*Twelfth Night* and the Morality of Indulgence,” *Sewanee Review*, 67 (1959), 220-38.
3. For a brief discussion of Malvolio from this point of view, see Frank L. Hoskins, “Misalliance: A Significant Theme in Tudor and Stuart Drama,” *Renaissance Papers 1956* (University of South Carolina), pp. 72-73.
The figure of the despiser of festivity exists, but he does not disappear. As C. L. Barber put it, “in the long run, in the 1640’s, Malvolio was revenged on the whole pack of them.” See Shakespeare’s Festive Comedy (Princeton: Princeton Univ. Press, 1959), p. 257. Just as Malvolio again subdues his imaginative desires and regains his solemn bearing, the Puritans finally suppressed the dramatic imagination and enforced zealous sobriety.

10. Criticism: Production Reviews: Donald Lyons (review date February 1997)

[In the following review of Trevor Nunn's 1996 film version of Twelfth Night, Lyons describes the effort as undeniably successful, and finds that although the film teases the boundaries of “heterosexual decorum,” it never oversteps them. Additionally, Lyons praises the film's principal actors: Imogen Stubbs as Viola/Cesario, Helena Bonham Carter as Olivia, and Toby Stephens as Orsino.]

It is sometimes foolishly asserted—recently, for example, by the critic Anthony Lane in the New Yorker—that Shakespeare “works” better on the screen than in the theater. Those knotty iambic pentameters can be spoken softly, and hence understood; soliloquies can be rendered as voice-overs, and hence made dramatically plausible. But if theater conventions are artificial and limiting, the same is true of film, which is hardly the transparent or naturalistic medium it may appear to be. And quite apart from the issue of technique, there is the issue of interpretation: fashions in filming Shakespeare reflect the day as dimly or as brightly as does the mirror of the stage.

We are now in the midst of a mild movie renaissance for the Bard, with four new movies of different plays having been released in the last months alone. …

In addition to these two failures [Baz Luhrmann's William Shakespeare's Romeo + Juliet and Al Pacino's Looking for Richard], however, the current season has also given us large, bright, intelligent, and relatively straightforward versions of Hamlet and Twelfth Night. …

But that brings us to Trevor Nunn's lovely Twelfth Night, a much more unqualified success. It too is a movie that flirts in passing with contemporary preoccupations, but in the end is content to know, love, and serve the Bard.

Nunn, the longtime head of the Royal Shakespeare Company, and recently appointed director of the Royal National Theater, has previously made two undistinguished films (Hedda and Lady Jane). This time he gets it right. He has set his tale in the same era as Branagh's Hamlet—a generic late-19th century—but his place, the mythical kingdom of Illyria, is much greener and more summery than Branagh's chilly Denmark. Nunn and his cinematographer Clive Tickner have cast a pre-Raphaelite glow over the film, which was shot along the wild coast and in the formal gardens of Cornwall. These settings work beautifully to complement the glow of the central story: a young woman impersonates a man and has to contend with both the attraction of another woman to her male persona and her own attraction to a man who treats her as a guy. Although the film exploits its erotic situations with a knowingness very much of the 1990's, Nunn resists every opportunity to turn sly flirtatiousness into campy gender-bending. Heterosexual decorum is teased but never “subverted.”.
The principals are also right on pitch. Imogen Stubbs, as the disguise-wearing Viola/Cesario, devotes less energy to parodying masculinity than to showing the awkwardness of loving and being beloved in the wrong places. Helena Bonham Carter, a pillar of British costume dramas who herself played Ophelia in the not-bad 1990 Franco Zeffirelli/Mel Gibson Hamlet, makes a surprisingly animated, sexy, and likably foolish Olivia, smitten with Viola/Cesario. Toby Stephens as Orsino, who is besotted with the unreceptive Olivia and shares his fond confidences with an in-turn-besotted Viola/Cesario, engagingly presents the figure of a man who can combine authority and modesty. The final resolution of all these confusions is an immensely pleasing and deft piece of romantic cinema.

This is a Twelfth Night that deserves to be seen and savored. And so, for all its missteps, does Branagh's Hamlet. The two plays had, in the trajectory of Shakespeare's career, some interesting connections. Twelfth Night was the last play of its kind, the last “festive comedy” he wrote; and it came right before Hamlet, which has been seen by scholars as a deliberate abandonment of comedy. As the critic C. L. Barber has noted, in Twelfth Night “the unnatural can appear only in outsiders, intruders who are mocked and expelled,” whereas in Hamlet “it is insiders who are unnatural.”

A mark of the playwright's genius was the ability to hold such antithetical ideas in so close and creative a tension. Likewise, a mark of good Shakespeare productions is to let his stories, ideas, and language breathe. By doing so, Kenneth Branagh and, especially, Trevor Nunn go some way toward redeeming the damage caused by the interposition of cute ideas—whether toxic, like Grunge Shakespeare, or relatively benign, like Method Shakespeare—between ourselves and the plays.

Criticism: Production Reviews: David Patrick Stearns (review date 17 July 1998)

[In the following review, Stearns assesses the production of Twelfth Night directed by Nicholas Hytner, which featured Helen Hunt as Viola. Stearns describes the production as a whole as lavish but not overdone, and comments that Hunt's performance was sincere and strong but failed to fully reveal the subtextual potential of the role.]

In Broadway shorthand, the summer's hot ticket is “the Helen Hunt Twelfth Night.”

That's how much theatergoers are anticipating the Oscar-winning actress' rare stage appearance. But truth be told, Lincoln Center's production (*** out of four) of Shakespeare's misbegotten-love comedy is so sumptuously produced and provocatively cast that she could phone in her performance and no one would be terribly upset.

After so much Shakespeare that's been either low-budget or high-concept (a nice word for gimmicky), it's refreshing that this staging by Nicholas Hytner (The Madness of King George, Broadway's Carousel) treats Shakespeare's comedy with the kind of lavish but well-considered theatricality he delivered in Miss Saigon. Of course, that approach means a bit of vulgarity and some uneven casting—but love it or hate it, this is a major revival that simply must be seen.

Taking a cue from Shakespeare's freewheeling mixture of time, place and style, the production, which opened Thursday and runs through Aug. 30, conjures the imaginary kingdom of Illyria with a mixture of period flavors: Renaissance Italy dominates, though there are hints of the Middle East in the luxurious rugs and lily-strewn pools.
There are encroachments from the 20th century, too, but somehow they never seem jarringly postmodern. These touches mostly arise from interpretation rather than theatrical conceit: If a character walks on in a bow tie, it's a comment on his personality, not just a visual joke.

Water is a major metaphor in Bob Crowley's picturesque set, which is sort of a wading pool with platforms. Much like the forest in *A Midsummer Night's Dream*, the water cleanses, refreshes and transforms characters while driving the plot. After Viola survives the shipwreck that separates her from her brother, she emerges from a dream-like haze of ocean spray: It's a breathtaking effect, and it underscores that the event was a life-changing one—the kind of experience that might prompt bold decisions. Like, say, a woman's disguising herself as a man.

If it's all marvelously cinematic, too many performances have a kind of cinematic restraint. Much of the Act I setup is handled dryly. Even the great character actor Philip Bosco is uncharacteristically buttoned up, playing Malvolio's romantic disappointment more for tragedy than comedy. But most of the cast members blossom at some point, particularly Brian Murray as the sodden Toby Belch and David Patrick Kelly as an unusually scruffy, outspoken court jester.

Hunt (Viola) stays surprisingly earthbound. Though her interpretive choices are solid and sincerely executed, she doesn't dig deeply enough into the subtextual possibilities of a character who passes herself off as a man throughout much of the play. As the countess who mistakenly loves her, Kyra Sedgwick (Olivia) goes to such comic extremes that you'd never know she's an aristocrat. With his pantherlike moves, Paul Rudd makes his imposing Duke a man of unstoppable sexual desires, which lets him dominate a play that keeps him offstage for long periods.

In fact, the production seems so dedicated to his physical enshrinement (was there an executive order that his chest never be covered?) that he's a likely candidate for *People* magazine's “Sexiest Man Alive” moniker. Thank goodness he can also act.

**Criticism: Production Reviews: Robert Brustein (review date 7 September 1998)**

*In the following review of Nicholas Hytner's *Twelfth Night*, Brustein contends that the production failed to explore the play's deeper issues and complexities. Brustein applauds Helen Hunt's solid interpretation of Viola, but notes that Kyra Sedgwick's Olivia is somewhat hyperactive.*

Summer Shakespeare has always been a joy because summer is a season that belongs to Shakespeare. No other dramatist has imagined so vividly the bracing pleasures of life in the woods. A country boy himself, he gave his own name to a rustic in *As You Like It* and his mother's name to the Forest of Arden. The allure of that Arcadian world, where the banished Duke Senior finds “tongues in trees” and “sermons in stones,” not to mention the magical properties of Titania's fairy kingdom, the coastal beauties of Duke Orsino's Illyria, the bumptious rusticity of Polixenes's Bohemia, and other such bucolic sites, provide a storehouse of images that remain an indelible source of comfort through the long winter months. Two recent summer Shakespeare productions lovingly capture those recreational images—not just through verbal metaphors but through the splendors of their physical design.

Nicholas Hytner's version of *Twelfth Night* at the Vivian Beaumont is distinguished by another exquisite setting from Bob Crowley, an Irish scenic artist who is finally receiving the recognition here he has long
deserved. Crowley's last assignment with Hytner was Carousel, a musical the designer turned into a dazzling retrospective of early twentieth-century American art. Enhanced by Catherine Zuber's costumes, Crowley's Twelfth Night is set in an exotic court out of The Arabian Nights, bounded by circular wharves stretching out to a distant sea. Even before the lights come up, Orsino (Paul Rudd)—a bare-chested, long-haired Eastern potentate—is lolling languorously near a bathing pool in a drug-induced torpor, listening to Jeanine Tesori's Oriental melodies being played on bongos and gamelans. Drowsy, languid, overfed on the food of love (music), this Orsino is almost always in the company of musicians. Accompanied by three sailors, Viola (Helen Hunt) enters from far upstage, in a seagreen gown, wading through shimmering water and mist. Accompanied by her ladies in waiting, the Countess Olivia (Kyra Sedgwick) enacts her grief in a large arbor under huge black umbrellas, moving in rhythm to a requiem.

In tune with contemporary fashion, the production is set in no consistent culture, place, or time. Sir Toby Belch (Brian Murray) and Sir Andrew Aguecheek (Max Wright) wear contemporary Western clothes, and, at one point, eat some Chinese takeout. The acid fool Feste (David Patrick Kelly) hops about in a green suit, an orange knitted cap, and sandals, and sings "Oh Mistress Mine" in the style of a soft rock ballad with electric guitar arpeggios. When Malvolio dons his yellow stockings, he attaches them to a pair of shorts.

The problem is that Hytner's inspiration seems to have stopped with the sets and costumes. Certainly, Brian Murray's Sir Toby and Max Wright's Aguecheek are an engaging pair of clowns. Looking and sounding like the old movie actor Cecil Kellaway, Murray plays that renegade sot with all the florid gestures of a classical ham. But his exploitation of Sir Andrew has a streak of mean cunning, suggestive of the way that, later, Iago will gull Roderigo. As for Max Wright, he makes another rich artistic gift to Lincoln Center, following his contribution last year as Lebedev in Ivanov. His voice quavering through his glottis like a constipated bellows, his body jerking through space like a mechanical toy, he becomes the very embodiment of craven idiocy, of false bravado. Terrified by Sebastian, he jumps into Orsino's pool and frantically backstrokes away. I also admired the way David Patrick Kelly managed to emphasize not so much Feste's amiable charm as his bitter foolery. He is largely motivated by a sour vindictiveness toward Malvolio ("And thus the whirligig of time brings in his revenges").

Alas, this gifted acting trio is not helped much either by Amy Hill's flat Maria (cast against type as a buxom Amazon), or by Philip Bosco's humorless Malvolio. I once described Bosco as an American actor who looked like Sir Michael Redgrave and sounded like Sir John Gielgud. Here he seems to be bucking for his own knighthood, giving an elocutionary performance that would not seem out of place at the Royal National Theatre. Bosco's Malvolio is pompous all right, but it's questionable whether that quality belongs more to the character or the actor.

Helen Hunt gives a clean, clear, cool interpretation of Viola. She reads the verse in a controlled, informal manner, and moves with considerable grace and poise. But her air of sangfroid would have been more appropriate in the role of Olivia. Hunt would certainly have given a better account of that proud, regal woman than Kyra Sedgwick, whose brassy, squeaky hyperactivity belongs in a sitcom. (Her charms become more vivid when, having jumped into the pool with Sebastian, she emerges with her dress clinging to her wet body.) Hytner has staged a fine recognition scene where the reunion of Viola and Sebastian rises in an emotional swell, and there are other good things in the evening. But the deeper issues of the play often seem to be scanted, especially the ambiguous sexuality of the relationship between Olivia and Viola. Most of the pleasures of this Lincoln Center Twelfth Night are absorbed through the eyes. …

**Criticism: Production Reviews: Ted Merwin (review date 1999)**

In the following review, Merwin offers a mixed appraisal of Nicholas Hytner's production of Twelfth Night. The critic argues that Hytner and stage designer Bob Crowley failed to create an atmosphere of eroticism, and that the romance between Paul Rudd's Orsino and Helen Hunt's Viola was lukewarm at best. However, Merwin offers high praise for the performances of the supporting cast, particularly Philip Bosco's Malvolio.)

A splashy new production of Shakespeare's Twelfth Night at the Vivian Beaumont Theatre in New York was a feature attraction of the 1998 Lincoln Center Festival last summer. The well-traveled team of English director Nicholas Hytner and Irish stage designer Bob Crowley, who in 1994 brought to the Beaumont, from London's Royal National Theatre, an uncommonly dark and disturbing (and intensely stirring) production of Carousel, this time opted for a strategy of almost total immersion. They turned Twelfth Night into a kind of cross between productions of A Midsummer Night's Dream (beginning with Peter Brook-inspired light bulbs descending from the ceiling) and The Tempest (including a spectacular on-stage rainstorm)—a very wet dream, indeed.

In fact, Viola (played by Helen Hunt, fresh from her Academy Award) emerged dripping wet from the shipwreck to start the play. Water was a constant symbol: a large rectangular pool upstage and smaller pools downstage occupied much of the acting area, so that characters generally made their entrances and exits over flat bridges—curves which united at the end of the play for the two couples to make a grand exit. The water effect reached its zenith with a tension-breaking downpour that nicely formed its own conceptual bridge from the disappointments and cruelties caused by the characters' misunderstandings and mistaken identities, to the final scenes of recognition and reconciliation.

A multitude of Eastern motifs also heightened the play's atmosphere of fantasy. China silk hangings surrounded the stage floor, which was painted with an exquisite blue peacock design taken from Persian carpets and embellished with patterns inspired by Indian illuminated manuscripts. Crowley's set also provided three different perspectives of Olivia's house on different-sized drops, which nicely reminded the audience how far from that anchor-point each scene was taking place. Catherine Zuber's costumes ranged from what appeared to be Turkish harem outfits (for Olivia) to stunning blue and white guards' uniforms. Natasha Katz's lighting was also striking, beginning with the large bulbs which descended from the ceiling, like sacred Buddhist candles, and including a light-induced ripple effect on the upstage pool. But it was the directorial touches which were most impressive: one especially memorable moment was a procession of Olivia's retainers, holding tall Japanese-style umbrellas, over a hanamichi-type ramp.

Unfortunately, if the director and designer were aiming for an overall mood of erotically-charged languor, then for the most part only the languor came through. From the opening tableau, in which Duke Orsino and his men are stretched out on the stage (making it hard to identify, at first, who is speaking the famous opening speech about the relationship between music and love), many of the all-star cast seemed listless. More importantly, the romance between Orsino (played by a long-haired, bare-chested Paul Rudd) and Viola (played with low-key irony by Hunt) never really seemed to catch fire, despite her stripping him almost naked at one point (giving him an excuse to jump in one of the pools). Olivia (played by a glamorous but shrill Kyra Sedgwick) was, quite literally, all over the place; she bounded and lunged over the stage in increasingly revealing outfits which reduced her from supposed sexual unavailability to what seemed more like sexual desperation.

The supporting cast was uniformly superb, from a perfectly fussy and self-deluded Malvolio by Philip Bosco (whose performance in the famous letter-reading scene was a priceless puncturing of vainglory) to precise comic turns by Brian Murray as an almost-Falstaffian Sir Toby Belch, and Max Wright as an unusually doddering Sir Andrew Aguecheek (who, perhaps too predictably, ended up falling into one of the pools). And David Patrick Kelly stole the show as a short, hump-backed Feste, crooning the rhythmic, quasi-Country and Western songs written for the production by Jenine Tesori.
In the first of a “platform series,” inspired by informal talks with theatre artists at the Royal National, Crowley spoke in the lobby of the Beaumont on the evening before the final preview. He explained that the play's use of twins as a metaphor for the self-knowledge that comes from true reflection led him to produce his flooded-stage “environment.” The characters' investment in perpetuating their images of themselves, he said, made him realize the artificiality and affectation which underlay their self-conceptions; this provoked him and Hytner to “ransack the East” for the highly stylized designs and staging methods which the production employed. But if Crowley was happily true to what he called the “anarchy at the heart of Shakespeare,” his stated “dislike for symmetry in stage design” revealed the production's ineffectiveness. Inasmuch as Twelfth Night is preoccupied with the effects of disrupted equilibrium in human affairs, the production ultimately failed to render convincingly this emotional disorder and its resolution.

**Criticism: Production Reviews: Marla F. Magro and Mark Douglas (essay date 2001)**

[In the following essay, Magro and Douglas analyze the treatment of gender issues in Trevor Nunn's 1996 film adaptation of Twelfth Night, and maintain that Nunn's production suppresses the play's homosexual aspects.]

The date of 23 April 2000 was celebrated as usual as St George's Day and the anniversary of Shakespeare's birth in 1564. It was also the feast of Easter in the ecclesiastical calendar. BBC Radio 3 marked this millennial intersection of Christianity, nationality and sanctioned culture by dedicating the day's programming to Shakespeare. One week later, Carol Vorderman, British television's reigning popular intellectual, failed to identify Sir Toby Belch as the comic knight in Twelfth Night when she appeared on the May Day celebrity edition of ITV's top-rating gameshow Who Wants to be a Millionaire? Vorderman's subsequent avowal that the work of Shakespeare is ‘dull as ditchwater’ was widely quoted in the media. Now, it is neither the intention of this chapter to adjudicate between these competing evaluations of the contemporary status and social value of Shakespeare's work nor to engage in questions about the complex aesthetic codes, educational capital and cultural competencies at stake in the making of such judgements. Rather, we aim to examine Trevor Nunn's recent cinematic treatment of Shakespeare's Twelfth Night (1996), which makes claim to the contemporary representation of sexuality despite its period setting and framing. Our concerns here are two-fold. First, we will figure this conservative representation of Shakespeare in the context of the contemporary ascendancy of the costume drama and the nostalgic mood of 1990s television and cinema. Secondly, we seek to establish and contextualise what we argue are politically reactionary naturalisations of white heterosexuality in Nunn's film by placing it within a fin de siècle cultural milieu which insistently promulgates a sexual ideology in which white, heterosexual and, ultimately, monogamous sex is figured as the constitutive model for sexual behaviour and subjectivity.

The current vogue for costume drama genre in television and cinema was initiated by the commercial successes of Merchant-Ivory's sanitised and romanticised reinventions of the past, beginning with the adaptation of E. M. Forster's A Room with a View (1985). In fact, the latter was released in the wake of David Lean's orientalist epic A Passage to India (1984). These soft-focus texts and their proliferating progeny offer preferred strategies of historical understanding by encoding history, colonialism and the aesthetics of English class stratification within seductive codes of linear narrativity, melodrama and visual spectacle. The latter codes obviate historical contradictions, cultural ruptures and social tensions (those moments in which the explanatory power of history as linear and progressive breaks down) and in their place insert the totalising myth of heterosexual romantic love, set, usually, within an exotic, heritage or pastoral mise-en-scène. The
success of these films, we suggest, lies not only in their spectacular appeal (lavish costumes, scenery and locations) but also in the fact that they give the armchair historian facile, easy-to-employ decoding strategies for making sense of the historical process. In this respect Nunn's decision to set his production of *Twelfth Night* in ‘West Barbary’, the wild and romantic landscape of Cornwall (Lanhydrock, Prideaux Place, St Michael's Mount), functions to idealise and abstract the historical context of the film, creating a dispersed sense of nostalgia for the romantic, lyrical countryside. In the same manner the ‘Globe-heritage’ representation of early modern London in John Madden's *Shakespeare in Love* (1998) engages the nostalgic myth of pre-industrial metropolitan life and theatrical community.1

The analysis of *Twelfth Night* in terms of its channelling of erotic desire into heteronormative narration does not in itself represent a particularly new trend in cultural criticism (Butler, Rubin, Sedgwick). What is interesting about this pre-millennial film, however, is the manner in which it seeks to establish a sexual mythology within the cultural framework of late Victorian England. We are interested in both why and how at this particular historical conjunction the Shakespearean texts and author-function are used as cultural masterpieces and paternal author(ity) for legitimating and buttressing what are clearly late twentieth-century discourses on sex. What is of particular interest here is the dramatic mobilisation of *Twelfth Night*, arguably Shakespeare's most provocative text in its representation of ambivalent sexual object-choice and culturally shaped discourses of desire, in creating a nostalgic myth of romantic, courtly love for both popular and middle-brow consumption. In Nunn's cinematic revisioning, moments of gender and sexual ambiguity involving misrecognition and misrepresentation are ultimately used to reaffirm established, normative heterosexuality, rather than asserting the existence and positive cultural value of diverse and multiple sexualities.

The alliance between the Shakespeare sign and narratives of romantic heterosexuality strikes us as a particularly uneasy one. Craig Dionne has pointed out how in the context of North American popular culture the Shakespeare sign is configured as something outside or ‘in excess of heterosexuality’.2 Likewise, the cultural work that Shakespeare and his textual production perform in *Twelfth Night*, while nostalgically presenting a cultural system purged of nonstraight sexualities, overflows its own signifying boundaries. There is a representational surplus in this film and other contemporary representations of Shakespeare and his texts that allows for the deconstruction of their ostensibly homophobic meaning. In other words, the de-queering of Shakespeare suggests that a queer Shakespeare may be lurking uneasily beneath the surface.

**FILM, NOSTALGIA AND SHAKESPEARE**

The proliferation of period and costume drama genres in British and American cinema and television during the 1980s and 1990s is symptomatic of an Anglo-American cultural obsession with the past, reflected too in the rise in the popularity of historical theme parks ranging from Greenfield Village in Dearborn, Michigan, to the web of country houses and gardens making up the British heritage industry. The connections here are mutually reinforcing. Imelda Whelehan has noted, for example, that ‘Lyme Hall in Cheshire, used to represent Pemberley in the 1995 adaptation of *Pride and Prejudice*, is a National Trust property accustomed to around 800 visitors a week late in the season; yet, in the autumn of 1995, 5500 visitors arrived during the final two days of opening’.3 This postmodern commodification of the past signifies a cultural immersion in a nostalgia so thick and impenetrable that, as Frederic Jameson has observed, ‘we are unable today to focus on our own present, as though we have become incapable of achieving aesthetic representations of our current experience’.4 Jameson ascribes this mode of nostalgia to films that not only directly represent the past but also to those films like *Star Wars* that convey the past metonymically. That is, while *Star Wars* is ostensibly a narrative of futuristic intergalactic heroes and villains, its central tropes culturally enact a deep American yearning to return to the innocence of the 1950s ‘Saturday afternoon serial of the Buck Rogers type’,5 a period which for white American cinema and television audiences iconically signifies a moment of pre-lapsarian wholesomeness. Here the nostalgic motive in fact encodes in symbolic forms the political unconscious of a white supremacist culture, the unspeakable desire to return to the Eisenhower era, a time prior to mass
mobilisations in the name of civil rights against racist and sexist power hierarchies.

Germane to this point is Lynn Spigel's research into women's popular memory, 1950s sitcom reruns and nostalgia shows on North American network and cable television. Spigel found that while some of the research participants acknowledged 'these television images were more exclusive to the white middle class than representative of all women', this acknowledgment by no means precluded 'backlash discourses' pitting 'femininity against feminism' and the construction of the 1950s by way of 'nostalgic longing for the “good old days” when girls were girls and boys made money'. It is also worth noting here that Trevor Nunn's decision to place his production of Twelfth Night in the late Victorian era stemmed from a desire to have the film ‘set at a time when, in their silhouette, men were clearly men—no frills and lace—and when conversely women were expected to be very cosmetic, frail and delicate creatures, to be protected from the harsher realities'.

The dialectical logic of Jameson's analysis of film and nostalgia invites possible reconfigurations or reversals of the terms of that analysis. Accordingly if films about the future can convey the past metonymically, then films set in the past can be decoded as metonymic representations of present cultural and political debates. In this context, the political unconscious of the costume drama provides a framework for understanding how the genre functions as a ‘safe’ signifying space for articulating ideas that may not be acceptably aired in contemporary cinema. In other words, the historical milieu of these productions provides an alibi for the industry that produces them; a director can always argue that she is not providing a forum for regressive politics, rather, ‘that's just the way it was back then’. Such a move brings to the fore the issue of history and its relationship to contemporary culture. The question then shifts from why period or costume dramas are so popular with contemporary audiences to how history functions as a sign in cinema and in popular memory. Following Spigel we understand popular memory as those constructions of the past ‘enmeshed in knowledge circulated by dominant social institutions’, particularly by television and cinema. What exactly is the costume drama made to speak that cannot be spoken in films which directly represent contemporary culture? Despite their patently conservative stance vis-à-vis cultural discourses of sexuality, do these films offer the possibility for oppositional readings? And, more to the point of this chapter, how and why are Shakespeare's name and works invoked in postmodern costume dramas? Does Shakespeare as author-function have a stable signifying meaning?

As we noted above, the current ubiquity of costume drama in television and cinema was inaugurated by the commercial success and critical acclaim of films such as A Room With a View (1985), Howards End (1992) and The Remains of the Day (1993), all from the production team of Ismail Merchant and James Ivory. Merchant-Ivory films demonstrated to audiences, the film industry and critics alike that the costume drama was not an obsolescent genre doomed to commercial morbidity. Quite the contrary, as Lynda E. Booth and Richard Burt remark:

Up until the very recent Jane Austen fueled and Merchant-Ivory underwritten revival of period film anything considered ‘classical’ had become equated with a kind of artsy-fartsy cultural elitism that was bound not to make money and was something thus left to the independent film producer aiming at the art houses or the Sundance film festival.

Exotic locales, lavish and ‘authentic’ period costumes and the omnipresent romantic diegesis have an appeal for both middlebrow and popular audiences trained in the conventions of the Hollywood style. History in these films invites audience identification with residual modes of gentility and the melodramatic entanglements of love: the otherness of the past is glossed over and the temporal and cultural distance signified by period costumes and historical locations are foreshortened by familiar narrative discourses, stable actors, intertextual references and the romantic spectacle of heterosexual melodrama.
An exemplary text in respect of this cinematic elision of history is Anthony Minghella's blockbuster adaptation of Michael Ondaatje's *The English Patient* (1996). In the first instance, John Seale's epic desert photography combines with the poignant romance of the plot to mystify the story's colonial setting. Secondly, the narrative of political betrayal—Ralph Fiennes's role as Nazi collaborator—is intersected by the melodramatic narrative of romantic treachery and duplicity and appears to offer a dubious exit from history. In *The English Patient*, then, the complexity and contradictions of history are ironed out; social relations are simplified to be displaced onto the romance of the white, heterosexual main characters. Audiences can leave the cinema (or the sofa) assured, in the slogan of the middlebrow North American Arts & Entertainment cable channel, that this was 'time well spent'. Here they have absorbed a bit of history, been entertained and avoided the sort of ethical complacency encouraged by, say, going to see a shock genre piece like *Scream 3*.

The catalogue of film titles listed above suggests that the nineteenth century remains a popular historical period for the costume drama. Notably, Branagh's *Hamlet*, Hoffman's *A Midsummer's Night Dream* and Nunn's *Twelfth Night* all eschew a Renaissance backdrop for nineteenth- or turn-of-the-century settings. Citing Giddings et al., Imelda Whelehan suggests that recycling of nineteenth-century settings in the historical drama is due, in part, to their historical accessibility; the nineteenth century is, after all, relatively recent history. Whelehan further observes that the craving for images of the nineteenth century on big and small screens 'are all symptomatic of the condition of the national psyche which is shedding layers of modernity and reverting to its own past tones under the stress of contemporary economic, political and social crisis'. Similarly, Spigel found in her research into women's popular memory and reruns of 1950s sitcoms widespread 'nostalgia for a better past' represented in the worlds of *Leave it to Beaver* and the 1950s pastiche *Happy Days*.

However, what do we make of recent films dealing with either the Renaissance or the Shakespeare author-function and their critical and commercial popularity? Nunn's *Twelfth Night*, *Elizabeth* (Shekhar Kapur, 1998) and *Shakespeare in Love* bear witness to the increasing popularity of the Renaissance and Shakespeare as tropes amenable to the commercially lucrative codes of the costume drama; *Shakespeare in Love* was nominated for an impressive thirteen Academy Awards and won seven, including Best Picture, Best Actress and Best Original Screenplay, while *Elizabeth* was nominated for Best Picture and Best Actress. All of this at a time when pundits are bemoaning the decline of Shakespeare in the classroom and the 'dumbing down' of university and college English Literature curriculum, and when the G2 section of the *Guardian* featured a cover picture of the Bard overlaid by a multiple-choice question text, *à la Who Wants to Be a Millionaire?* 'Question: “Who is this Very Famous Man?” Possible answers: A: William Shakespeare, B: William the Conquerer, C: William Hague, D: Who Cares?’

Unlike the nineteenth century, neither the Renaissance nor Shakespeare has the advantage of historical proximity. Indeed, for the majority of contemporary viewers Elizabethan England must seem oddly foreign, another world. A symptomatic reading of nostalgia in film and television productions in which representations of Elizabethan England or the Bardic voice signal crises in the national psyche is one mode of understanding the putative nostalgia these texts evince. Another, complementary mode, we suggest, is to interrogate the meaning(s) these films create through their formal techniques and diegesis and ask why those meanings were rendered in the format of the costume drama. In other words, what kind of alibis do the costume drama and Shakespeare as legitimating author-function provide? What are adaptations of a text like *Twelfth Night* saying about contemporary sex and gender issues? Could the same meaning be created in an adaptation of the play that had a contemporary setting? And finally, what are the relationships between questions of nostalgia, authenticity and fidelity in adaptations of Shakespearean texts?

**GENDER TROUBLE IN ILLYRIA: TREVOR NUNN’S TWELFTH NIGHT**

Trevor Nunn’s adaptation of *Twelfth Night* sees itself as offering a sophisticated and even postmodern interpretation of Shakespeare's complex rendering of Renaissance gender confusion. The website for the film's
video release boldly proclaims that ‘[b]efore Priscilla crossed the desert, Wong Foo met Julie Newmar, and the Birdcage was unlocked, there was Twelfth Night’.\(^{18}\) Through the invocation of contemporary films that treat matters such as cross-dressing, homosexuality and gender misrecognition the website suggests that the Renaissance text of Twelfth Night historically precedes them. Nunn's adaptation of Twelfth Night, the publicity proposes, is both modern and true to the integral meaning of Shakespeare's text. For Nunn Twelfth Night ‘is an examination of gender; Shakespeare is fascinated with what is attractive about the woman in man and the man in woman. “Gender-bending” we call it these days.’\(^{19}\) Presumably the gender and sexual issues in the primary text are retained in this film version. According to this logic Nunn's film satisfies the opposing demands of authenticity and postmodern sophistication without sacrificing either. Nunn's valorisation of authenticity is evinced even in the casting of the film. Accordingly, Telluride's corporate publicity for the film announces the superiority of British theatre-trained actors and their mannered speech over Hollywood stars who are unable to ‘speak Shakespeare's lines’: ‘the film succeeds in part due to Nunn's decision to ignore the box-office lure of Hollywood stars, and to cast all the parts with outstanding British actors who can actually speak Shakespeare's lines with proper cadence and clarity’.\(^{20}\) If the casting decisions signify Nunn's fidelity to the aural style of British Shakespearean performance, his alteration of dialogue, scenes and historical setting of the primary text positions him as an experimental director who is willing to take liberties with the source material.

Following from this assumption, the publicity material and Twelfth Night itself draw on contemporary understandings of gender and non-straight sexualities, suggesting that the Renaissance text understands gender and sexuality in a manner similar to the late twentieth century. The historical distance between Shakespeare's text (c. 1601) and contemporary models of gender and sexuality is telescoped to the point where difference is put under erasure. Drawing on the familiar humanist assumption that human nature is essentially the same across historical epochs and cultural milieus, both publicity material and film represent sexuality as fundamentally unvarying. This counter-factual assumption projects the same universal sexual scheme across widely divergent cultural contexts in the name of the tranhistorical and transcultural Bard. Under the auspices of this false universality, three drag queens crossing the Australian outback and confronting often violent homophobia is equivalent to a pastoral romp in the fictional land of Illyria. Shakespeare is the universal signifier who does the cultural work of aestheticising what are political issues. It is precisely because of the social legitimacy of Shakespeare as a sign of high culture that adjacent universalising tropes come into play.

Contrary to the ahistorical construction of sexuality and gender posited above, the aligning of sexuality and gendered subjectivity with identity is a nineteenth-century phenomenon. In modern Western culture sex has had an increasingly privileged relationship to truth about the self. In the first volume of The History of Sexuality, Michel Foucault argues that the Christian tradition of sexual confession gradually evolved into a scienta sexualis:

> nearly one hundred and fifty years have gone into the making of a complex machinery for producing true discourses on sex: a deployment that spans a wide segment of history in that it connects the ancient injunction of confession to clinical listening methods. It is this deployment that enables something called ‘sexuality’ to embody the truth of sexuality and its pleasures.\(^{21}\)

Sex, then, has since the nineteenth century been framed as an epistemological issue from which two processes emerge: ‘we demand that sex speak the truth … and we demand that it tell us our truth, or rather, the deeply buried truth of that truth about ourselves which we think we possess in our deeply buried consciousness’.\(^{22}\) It is significant, then, that Nunn's Twelfth Night poses problems of sex and gender as problems of truth. Here the problem of truth is metonymically played out through the truth of Viola's identity as a woman and the socially sanctioned couplings that resolve the gender confusion.\(^{23}\)
The opening scene of Nunn's Twelfth Night is suggestive of the gender confusion touted in the website publicity material. Dressed as veiled harem girls, the identical twins Viola (Imogen Stubbs) and Sebastian (Steven Macintosh) are shown entertaining the other guests on a ship with the musical number 'O mistress mine'. As they sing, the sound of a baritone male voice (Sebastian's) gives the lie to the illusion that both performers are female soprano or mezzosoprano singers. This auditory effect 'is actually achieved by alternately overdubbing two female voices and one male voice'. However, since both performers are veiled and heavily made-up it is impossible at the visual level to ascertain which harem girl is really a man. The humour of the scene derives from a regressive striptease in which Sebastian turns to Viola and removes her veil. Viola, however, is wearing a moustache and so appears at first to be the female impersonator. To the delight of the other passengers, Sebastian tears off Viola's moustache, exposing her impersonation of a man impersonating a woman. Viola then removes Sebastian's veil, revealing another moustachioed harem girl. Just as Viola prepares to expose the 'true' impersonator by attempting to remove Sebastian's (real) moustache, the ship founders.

As Richard Burt has pointed out, this scene 'raises the possibility of an infinite regress of false revelations in which any gender marker always has to be put in quotation marks as a performative signifier'. The stripping away of accretive layers of gender signifiers (voice, veil, moustache) illustrates Judith Butler's point that gender is a performance whose signifying gestures posit an originary or authentic sexual identity. 'Gender is the repeated stylisation of the body, a set of repeated acts within a highly rigid regulatory frame that congeal over time to produce the appearance of substance, of a natural sort of being.'

The drag sequence in the opening scene raises the prospect that the film will perform a critique of the fixity of sexual identity and the 'naturalness' of gender. However, this expectation is soon undermined by two contrary performative elements. At the same time that the film uses a technological apparatus to undercut the assumption that voice is an essentially gendered characteristic, it invokes the sovereign author-function, the anchoring voice of the patriarchal Bard-as-storyteller. Speaking in 'pseudo-Elizabethan verse', the male voiceover of the prologue begins: 'I'll tell thee a tale. Now list to me …' As the opening credits appear on the screen the voiceover is interwoven with the film's thematic music—the nostalgic 'The Rain It Raineth Every Day'. The male voiceover interpolates the drag scene and subsequent shipwreck for the film audience. The authoritative voice of the omniscient narrator, Shakespeare as storyteller, guides the spectator's vision through the title sequence by steering our attention away from the gender-bending of the preceding drag sequence to the 'real' genders of the twins and the high drama of the shipwreck. Absurdly, though the ship is in imminent danger of sinking, Sebastian still has time to wipe off his make-up and don masculine attire—a naval officer's uniform—while Viola hurriedly removes her long black wig to reveal 'natural' long blond hair. The suggestion here is crucial to the logic of the narrative: the prologue must establish the authentic genders of the twins before the film proper can begin.

The male voiceover also provides a distraction from the second element of the scene that we wish to foreground—the Antonio character. In many readings of the play, Antonio is singled out as a gay character, the Antonio/Sebastian frustrated love story serving as a parallel to the other 'false' romances in the narrative based on gender misrecognition (Cesario/Olivia), obsessive desire (Orsino/Olivia), social promotion (Malvolio/Olivia) and comic courting (Andrew Aguecheek/Olivia). Excluded from the heterosexual economy and potential procreative plenitude of the play's final scene, Antonio's desire for Sebastian is frequently interpreted as having no place in the traditional comedic finale, the pairing-off of the principal characters. The text of the play, however, is vague concerning Antonio's actions, demeanour and physical positioning in this final scene, offering no stage direction. Taking into consideration the play's silence on this matter, the way in which a production deals with the Antonio character can provide an index to how that production envisages the sexual meaning and possibilities of the narrative.

The opening sequence of Nunn's film is organised by a shot/reverse-shot camera movement that links the performing twins by a long-shot to medium close-up of Antonio (Nicholas Farrell). This establishes an
(homo)erotic triangulation which the film will eventually disavow. As the ship breaks upon the rocks, Viola is thrown overboard. While Antonio attempts to hold him back, Sebastian desperately throws himself into the water to save his sister. The twins are temporarily reunited under water in a moment of amniotic oneness, only to be separated by a strong current that ‘divides what naught had ever kept apart’. Though the voiceover insists that the strong currents and sinking boat are responsible for severing Viola and Sebastian, the visual logic and dramatic action of the scene position Antonio as the dividing element between the twins. Antonio tries to stop Sebastian from jumping in after Viola and, at the moment the twins are separated, he is preparing to jump into the water to save Sebastian (Viola has already been rescued by the captain). This complex visual diegesis combines with the matrimonial parlance of the voiceover—’what naught had ever kept apart’—to suggest that Antonio is a dramatic bar between the twins and symbolically disruptive of stable heterosexual relations.

The climatic pairing-off sequence in Nunn's *Twelfth Night* restores the ‘natural perspective’ (V.i.217)\(^{29}\) by which all the plot's misunderstandings and misrecognitions are resolved into authentic genders and desire is demonstrated to be essentially heterosexual. In this heteronormative context, as Olivia (Helena Bonham Carter) and Sebastian and Viola and Orsino (Toby Stephens) pair off happily, Antonio looks on with a slightly poignant but accepting smile, an attitude of resigned tolerance in the face of the inevitable romantic closure of the narrative. Along with Feste (Ben Kingsley), Sir Andrew Aguecheek (Richard E. Grant) and Malvolio (Nigel Hawthorne), Antonio is shown leaving Olivia’s house to clear the way for the finale in which the couples, dressed according to their appropriate genders, perform a nuptial country dance. This pairing-off scene echoes the drag scene at the beginning of the film by having Sebastian peel away Viola-Cesario's moustache to reveal the ‘real’ Viola underneath. The pairing-off scene, however, enacts a closure that is only partially achieved by the interruption of the shipwreck in the early drag scene. In fact, the entire narrative structure of the film pushes toward the ultimate closing down of radical possibilities for gender identification and sexual identity.

The audience is given privileged knowledge about Viola's transformation into the male courtier Cesario. After the shipwreck, Viola finds herself on the foreign and hostile shores of Illyria and, believing her brother to have been drowned, strategically dons masculine attire and presents herself at the all-male court of the Count Orsino. With the aid of the captain who saved her, Viola transforms herself into a dashing if slightly fey young man. Her spectacular transformation involves the casting away of her feminine garments (dress, corset, shoes, jewellery), cutting her hair, binding her breasts stuffing her trousers with a rag, and learning to walk and talk like a male courtier. Her masquerade works so well that she is accepted into Orsino's court and becomes Olivia's object of desire.

It is significant that, as Richard Burt argues, there is never any question of the articulation of lesbian desire in Nunn's *Twelfth Night*. Olivia's attraction to Cesario and Cesario's resultant consternation is played ‘strictly for laughs’\(^ {30}\). During the scene in which Olivia declares her love for Cesario, the camera lingers on Cesario's discomfiture and since we are in on the trick of her disguise we are forced to identify with Cesario's comical distress. The foreclosure on lesbian representation and desire in Nunn's *Twelfth Night* (like the ‘gender-bending’ twentieth-century films with which it is favourably compared) and exclusive concern with homoerotic possibilities between men is ultimately symptomatic of its sexual conservatism. That is, unlike *Priscilla Queen of the Desert*, *Twelfth Night* finally attempts to contain the very potential for same-sex desire it has explored.

The moment of negation of same-sex desire occurs in a sequence in which Cesario and Orsino are being serenaded by a guitar-playing Feste. Notably, the film comes teasingly close to allowing for same-sex desire on the part of Orsino. As Feste sings a romantic tune Cesario and Orsino lean close together and Cesario slowly tilts up his head to kiss Orsino. At the moment their lips are on the point of touching, Feste (who the film suggests is aware that Cesario is a woman; he has seen her emerge from a cave following the shipwreck and will return her cast-off necklace in the revelation scene) ends the song and Cesario and Orsino abruptly
separate. Feste’s reaction is one of feigned unawareness. This scene repeats the erotic triangle set-up at the beginning of the film between Sebastian, Viola and Antonio. This triangulation, however, sets the heterosexual structure of the narrative to rights. Rather than Antonio's intervening and destabilising homoerotic gaze, here the voyeuristic gaze of Feste brings Orsino and Cesario together. It is significant that, like the audience, Feste is in on the joke and hence his gaze functions to bring about the heterosexual resolution of the film. Notably, in the shot/reverse-shot movement that structures this scene, the camera’s point of view is both that of Feste and an omniscient observer. As he plays the guitar, Feste is seated to the left of and below Cesario and Orsino. The camera is initially positioned over Feste's left shoulder. We see what he sees: the developing intimacy between Orsino and Cesario. However, as the scene unfolds, the camera observes Cesario and Orsino in profile, a point of view that Feste clearly cannot possess. The viewer is thereby also drawn into the erotic triangulation as voyeur as well. Knowing what Feste appears to know, that Cesario is a woman, the audience can safely indulge in some homoerotic titillation without guilt. Importantly, it is the male gaze (Feste's and the camera's) that orchestrates the heterosexual rapprochement of the film. In brief, not only does Nunn’s *Twelfth Night* attempt to put homosexuality under erasure but it also legitimates the authority and potency of the male gaze.

What is particularly interesting here is that the terms of this legitimisation of the male gaze are predicated upon Feste's nonparticipation in the heterosexual discourse of romance. That is, the voyeuristic economy depends expressly upon Feste's diegetic role as narrator; Feste observes and orchestrates the erotic triangulation, functioning as narrative copula but never as the subject or object of desire. This voyeuristic quality, the structures of observation, vision and narration, are in fact the characteristics ascribed by Viola to the professional fool:

This fellow's wise enough to play the fool;
And, to do that well, craves a kind of wit:
He must observe their mood on whom he jests,
The quality of the persons, and the time;
And, like the haggard, check at every feather
That comes before his eye. This is a practice
As full of labour as a wise man's art.

(III.i. 60-66, emphasis added)

Viola’s soliloquy, of course, is also a metacommentary on the attributes of the professional playwright. At several points in Nunn’s *Twelfth Night* there is the suggestion that Feste occupies the position of the Shakespeare author-function. The film's theme song ‘The Rain It Raineth Every Day’ is a framing vehicle whereby the author-function is articulated through Feste as performer. To reiterate, the title sequence establishes and connects an authorial voice with the musical theme while the closing shots link Feste's rendition of the theme song with the insistent heteronormativity of the dance finale. Similarly, Richard Burt has noted that the voyeuristic character of the Shakespeare persona is a recurrent trope in pornographic treatments of Shakespearean texts. Here he is present only to oversee but never to participate in the sexual economy. This nonproductive, one might even say queer sexuality, can be opposed to the Romantic and Freudian rendition of Will’s erotic persona in Madden’s *Shakespeare in Love*. In this volume, Elizabeth Klett rightly observes that Will's authorial productivity is represented in ‘stereotypically phallic imagery’:

Will himself seems painfully aware that his writer's block is intimately connected to his sexual performance; in his session with Dr Moth, he describes his problem in terms that make the connection abundantly clear: ‘It’s as if my quill is broken. As if the organ of the imagination has dried up. As if the proud tower of my genius has collapsed … Nothing comes … It is like trying to pick a lock with a wet herring.’

857
In light of the foregoing discussion, what are we to make of Nunn's *Twelfth Night* as an ironic postmodern production that simultaneously guarantees the legitimacy of heterosexual relations? The film mobilises notions of the literary text, Shakespeare author-function and history to create a myth of heterosexual romantic love that is stable across the centuries. As Simon Shepherd points out, Shakespeare's life and his texts have become 'national cultural property' and as such academic critics and the film industry construct both the texts and the Shakespeare biography as transcending history rather than being products of the historical process.³³ So, despite disclaimers to the contrary, *Twelfth Night* is not about 'gender-bending' but rather an authorisation of heterosexual romance.

What we find of particular note in this film is the manner in which it rehearses homosexual desire and then disavows it in order to postulate the naturalness and transparency of heterosexual relations. The film's status as a potentially destabilising text in its treatment of sexuality and gender makes it an optimal instance of the rehearsal/disavowal configuration built into its narrative structure. The moments of homoeroticism signify much more than gender-bending titillation. Rather, they represent and enact homosexual desire in order to construct heterosexuality as natural and definitive, drawing attention to the very queerness they are meant to purge. By deconstructing the hetero-homo opposition we can see that not only is the transparency of heterosexuality spurious but it is heterosexuality that is the dependent concept, relying on homosexuality to provide it with its seeming authenticity. Following Harold Beaver's influential essay 'Homosexual Signs' we believe that

the aim must be to reverse the rhetorical opposition of what is ‘transparent’ or ‘natural’ and what is ‘derivative’ or contrived by demonstrating that the qualities predicated of ‘homosexuality’ (as a dependent term) are in fact a condition of ‘heterosexuality’; that ‘heterosexuality’, far from possessing a privileged status, must itself be treated as a dependent term.³⁴

Given the recent *furor* over Section 28 (actually Section 2A of the 1986 Local Government Act), legislation installed by the Thatcher government that forbids local authorities from intentionally promoting homosexuality and New Labour's 'on message' policy that schools must now positively promote marriage and the family, the mobilisation of England's national author to naturalise heterosexuality and erase homosexuality from history seems particularly pernicious. Perhaps it is intellectually naïve to expect the film industry, particularly a film industry in which Hollywood studios are hegemonic, to present us with politically savvy and interesting filmic texts that appeal to the culturally disenfranchised. As Elayne Tobin has pointedly remarked, to continually assume the posture of being 'gatekeepers of positive representation',³⁵ cultural critics who expose the bad faith of the film industry are being disingenuous: why, after all, should we expect Hollywood, or the film industry in general, to be sympathetic to our concerns? Tobin offers an important consideration here. However, we believe that cultural critique need not serve merely a negative function. We hope our analysis has demonstrated that Nunn's film contains ideological complexities and ambiguities, demonstrating that every representation contains within itself an oppositional or subversive reading. Though *Twelfth Night* may sound the trumpet of nostalgia for a heterosexual historical past that never was, this representation is always equivocal and will always attempt to cover its tracks. It is in these ghostly footprints that we can find the evidence for a counter-reading that suggests that maybe there is something queer about Shakespeare after all.

**Notes**

1. For brief consideration of the uses of the Elizabethan London *mise-en-scène* in *Shakespeare in Love*, see Elizabeth Klett's chapter 'Shakespeare in Love and the end(s) of history' in this volume.
5. Ibid., p. 16.
7. Ibid., 28.
10. The latter point is partly rhetorical because the variability in the meaning of Shakespeare can be anecdotally illustrated. The writers of this chapter were driving west on the M5 on Sunday, 23 April 2000 listening to the Easter bank holiday Shakespeare programming on Radio 3 and also discussing Richard Burt's *Unspeakable ShaXXXspeares* (1998). Burt's study is in part concerned with pornographic representations and uses of Shakespeare in such film productions as *Tromeo and Juliet* (1996), a text which alludes to imagined pornographic interactive CD-ROMs including *As You Lick It, Et Tu Blow Job* and *Much Ado About Humping*. *Tromeo and Juliet* and the middle-brow homage to Shakespeare broadcast on Radio 3 are suggestive of the heterogeneous range of connotations and values signified by the contemporary Shakespeare sign.
12. Branagh's Hamlet is set in an opulent *fin de siècle* Denmark, while Hoffman's *A Midsummer Night's Dream* is set in late nineteenth-century Italy, complete with the newly invented bicycle as an index to the film's turn-of-the-century setting.
15. Spigel, 29.
16. As the final draft of this chapter was finished, Sarah Hall of the *Guardian* reported that Cambridge University was considering demoting the Bard, abolishing the examination paper on Shakespeare to make room for modern literature. Frank Kermode, one of the country's foremost literary critics, quickly responded to this threat against Shakespeare's canonical supremacy, arguing that 'the whole of our literature has to be estimated in relation to him. This [the scrapping of Shakespeare] seems to me a foolishness. It would certainly change the whole balance of the course and would be a net loss to put it mildly.' 3 May 2000, G2, 8.

22. Ibid., p. 69.
23. Similarly in *Shakespeare in Love* the truth/sex dyad is enacted through the terms of Queen Elizabeth's wager ‘can a play show the very truth and nature of love?’ The answer at both the diegetic and extra-diegetic levels is an emphatic ‘yes’. Shakespeare as universal literary genius can reproduce the nature of love because he himself has felt it, and this itself is an anachronistic projection of Romantic expressive ideology. And, more importantly perhaps, Shakespeare can demonstrate the ‘very truth and nature of love’ because he is one of us, a modern subject in search of the truth of love (for ‘love’ read ‘heterosexual love’), the truth of which will also reveal something about himself. For further discussion of *Shakespeare in Love*’s satirical treatment of Freudian tropes, see Elizabeth Klett’s chapter in this volume.
25. Ibid., p. 177.
29. The text used is *The Riverside Shakespeare*, ed. G. Blakemore Evans (Boston: Houghton Mifflin, 1974). Further references are incorporated into the text.
31. Interestingly, there is a corresponding scene in Madden's *Shakespeare in Love* in which Will and Thomas-Viola are observed by a third person, the boatman as voyeur. For a fuller description of this scene, see Klett in this volume. To Klett's description we want to add that, like Feste, the boatman legitimizes heterosexuality precisely to the extent that he functions as a voyeur. In fact, the playwright as voyeur is enacted in a comic manner by the young John Webster whose pubescent sexual desire is articulated through an economy of espionage, sadism and bloody spectacle. Here any notion of perversity is displaced onto the comic figure of the young Webster whose later cultural production will enact the dark night of the Jacobean soul as opposed to the ‘golden age’ of Elizabethan courtly heterosexuality.

Criticism: Production Reviews: Laurie Osborne (essay date 2002)

*[In the following essay, Osborne studies the ways in which Trevor Nunn's film adaptation of Twelfth Night adopts a heavy-handed approach to film editing and textual rearrangement in order to produce the effect of character continuity.]*

After contrasting traditionalist readings of continuous, interiorized Shakespearean characters and poststructuralist analyses of their fragmentation and discontinuity, Alan Sinfield concludes that “some Shakespearean dramatis personae are written so as to suggest, not just an intermittent, gestural, and problematic subjectivity, but a continuous or developing interiority or consciousness; and we should seek a way of talking about this that does not slide back into character criticism or essentialist humanism.”¹ Sinfield pursues this new way of talking about character, or rather “character effects,” by noting the history of responses to particular figures; he argues that a character such as Macbeth, for example, “is not a mysterious natural essence. Rather he is situated at the intersection of discourses and historical forces that are competing, we might say, to fill up his subjectivity.”² Recent Shakespearean films speak directly both to critical concerns with discontinuity or inexplicable characterizations in Shakespearean plays and to readings of “a continuous or developing interiority or consciousness.” To put it another way, these films help us see how we also produce “coherent characters” from discontinuous fragments.
Specifically, the radical use of crosscutting and intercutting in such recent works as Trevor Nunn's *Twelfth Night* (1996) and Al Pacino's *Looking for Richard* (1996) reveal how film editing produces cinematic fragments that paradoxically “fill up” the subjectivity of early modern characters. Although this essay concentrates primarily on Nunn's *Twelfth Night, Looking for Richard* is perhaps most blatant in using cutting and fragments to create continuity in character. The film presents only brief scenes of *Richard III* in its quest to explore whether Richard is relevant today. For example, the crucial and critically vexed scene of Richard's wooing of Anne is spliced into a series of cross-cut scenes in which the actors worry, first, about the scene itself and whether it can work and, second, about which actress is best suited for the part.

By juxtaposing the crosscut scenes discussing the play with act 1, scene 2, Pacino suggests that looking for Richard requires looking for Anne. Although critics have not necessarily been kind to Winona Ryder as the choice for this very difficult scene, the action itself takes on a compelling continuity in contrast to the intercut scenes that precede and follow it. Set against the talking heads of scholars discussing Anne's dilemma and the earnest round robin of actors debating the scene's purposes, this scene, like many chosen by Pacino for inclusion here, seems at first to play continuously. However, Pacino uses startling cutaway shots to himself—outdoors, out of costume, and without Anne—to maintain attention definitively on Richard. Three interruptions mark the scene. Her spitting at him cuts away to his fierce declaration, “I'll have her.” At her announcement of contempt, Pacino inserts a brief of image of himself, smiling, in the same visual context as the declaration—a swift reminder that he will have her. Her capitulation and rejoicing “to see you are become so penitent” (2.2.220) yields immediately to the alternate setting and Pacino's bark of laughter.

These cutaways are all the more effective as emphasis on Richard's coherence of purpose because of the startling shift from the darkened, seemingly interior and somber lushness of the “performance” to the bright daylight, exterior shots of just Pacino, unkempt with his characteristic backwards baseball cap, leaning on what looks like a contemporary metal sculpture. In a scene that is labeled “Lady Anne” and that presents such a provocative reversal in Anne's responses, Pacino uses cutaways to underscore Richard's single-minded focus and coherence. Moreover, like so many of the play's characters, Anne does not need continuity beyond this scene within the structure of Pacino's film because the quest here is for Richard's character, itself a monster of discontinuity, broken into by actors, critics, and crucial scenes. Even Kevin Spacey's Buckingham or Alec Baldwin's Clarence, who appear more than once, may command our interest but do not survive the obsessive attention to Richard himself as a character.

In *Twelfth Night*, Trevor Nunn also uses extensive film editing and rearrangements to elaborate character. Because of his cinematic choices, *Twelfth Night* has provoked radically contradictory reviews that often extend their critique to filming Shakespeare generally. Stanley Kauffmann laments the film as a disaster and concludes that “the film medium is like an x-ray that enlarges the flaws in plays,” in his assessment, the flaw of Malvolio's treatment. At the opposite extreme, John Podhoretz suggests that “Trevor Nunn's *Twelfth Night* is a glorious piece of work, and one that brings to mind a heretical question: Is it perhaps the case that the cinema is the ideal medium for Shakespeare?” My answer to that question is that cinema is certainly the ideal medium for Shakespeare in the twentieth century, largely because film both creates and reinscribes our ideologically based expectations about character.

In *Twelfth Night*, Trevor Nunn also uses extensive film editing and rearrangements to elaborate character. Because of his cinematic choices, *Twelfth Night* has provoked radically contradictory reviews that often extend their critique to filming Shakespeare generally. Stanley Kauffmann laments the film as a disaster and concludes that “the film medium is like an x-ray that enlarges the flaws in plays,” in his assessment, the flaw of Malvolio's treatment. At the opposite extreme, John Podhoretz suggests that “Trevor Nunn's *Twelfth Night* is a glorious piece of work, and one that brings to mind a heretical question: Is it perhaps the case that the cinema is the ideal medium for Shakespeare?” My answer to that question is that cinema is certainly the ideal medium for Shakespeare in the twentieth century, largely because film both creates and reinscribes our ideologically based expectations about character.

Other critics of Shakespearean film have made comparable claims, often using the structures of stage criticism to justify film's suitability for the plays. In *Shakespeare, Cinema, and Society*, John Collick effectively demonstrates that early film developed out of Victorian stage display in ways that persisted even until the BBC Shakespeare plays. Peter Donaldson places the great film auteurs implicitly in the crucial interpretive place that actor/directors have held since the late eighteenth century. Critics from Barbara Hodgdon to Douglas Lanier look to the valuable and provocative interpretations that individual films, like individual stagings, have brought to the text. My argument here follows these in several features: it draws upon the continuity from the play's stage traditions as they are reworked in the film, it analyzes Nunn's approach as an auteur's vision, and it concentrates on the cinematic potential for Shakespearean performance, which this film
My discussion actually runs closest to Lorne Buchman's analysis of how film techniques relate to and rewrite Shakespearean dramaturgy. In particular, I share Buchman's interest in how spectators interact with the temporal display allowed (or disabled) by film; however, I do not agree that difficulties in analyzing time in Shakespearean film arise because “Shakespeare's own temporal structure is so close to that of the film medium itself.” In fact, what I find most intriguing about the current trend of restoring the text in films like Nunn's *Twelfth Night* and Kenneth Branagh's *Hamlet* (1996) is the implicit affirmation that fuller texts require very aggressive film editing—less cutting of the text requires more elaborate cutting in the film. In Nunn's *Twelfth Night*, twentieth-century constructions of character emerge from within ideologies of romantic love and gender; moreover, these constructions thrive through film cuts rather than the textual cuts used in earlier centuries.

Since film editing most obviously influences the audience's sense of time, I find Franco Zeffirelli's description of that effect compelling: “You see, cinema creates a different chemistry, a different taste, and the attention of the audience moves so fast. Really, fantasy gallops in the audience in movies. They know all before the image is finished.” The speed Zeffirelli notes is everywhere in cinematic editing of late twentieth-century Shakespearean films, ranging from Baz Luhrmann's *William Shakespeare's Romeo + Juliet* (1996) to Branagh's *Hamlet*. From a postmodern perspective, these quick cuts—or “flash cuts,” as Branagh calls them in his screenplay edition—offer the interplay of surfaces without depth. However, as Buchman points out, the spectator's interaction with these disruptions of expectation, like that of Iser's readers interacting with the disruptive text, produces a dynamic sense of time in film. And, I argue, this dynamic is produced in *Twelfth Night*'s film editing to invoke depth of character for the twentieth-century spectator. The resultant “galloping fantasies” significantly extend and revise the stage practices that produced the “character effects” of earlier centuries. Nunn's cinematic solutions for apparent problems in the Shakespearean text on stage actually reveal the ideological imperatives of character construction in both the early modern and twentieth-century versions.

In his *Twelfth Night*, Nunn clearly draws upon changes made in performances since the late 1700s and often recuperates what typically was excised from the text. The film recasts in a modern idiom of crosscutting and the short take both the discontinuity of character produced by the twinning in the Renaissance text and the “character problems” that eighteenth- and nineteenth-century critics discovered within the play. As a result, far from agreeing with one of Nunn's detractors, who claims problems “can be laid at the feet of the director, who's hugely experienced in the theater but has his limitations when it comes to … the camera,” I see Nunn's film growing from stage conventions into quite thorough cinematic practice.

His *Twelfth Night* continues traditional theatrical changes, for example, opening the play with Viola's landing (1.2) rather than Orsino's speech (1.1). However, that reversal is translated through film convention: Viola's landing functions as part of the opening credits, as Nunn points out, “before the work proper, which would still begin with one of the most famous opening lines in the canon, ‘If music be the food of love, play on.’” Moreover, Nunn also employs a cinematic flexibility of setting and sequence to enact extreme revisions of the scenes between Orsino and Viola. Thus, his construction of these characters both draws on current cinematic models for displaying “depth” of character and on the Renaissance strategy of creating character through onstage relationships, suggested in the variable early speech headings. The interactions between Orsino and Viola are clearly key in the creation of both characters in the film; Nunn's several elaborations and elongations of that association actually emphasize the hierarchical connections between master and servant that underlie their mutual attraction in the Folio text. In this way, the Renaissance investment in the hierarchical nature of erotic involvement serves as the occasion for living up to twentieth-century assumptions that “true love,” as opposed to lust, develops over time.

Nunn not only draws out Viola's involvement with Orsino, but also he brings her into the play early. Viola appears in act 1, scene 1, as the hapless musician first called upon to play “that strain again” and then
forestalled because “‘tis not so sweet now as it was before” (1.1. 4, 8). However, her presence is silent, unlike earlier stage performances, including those of Charles Calvert and Henry Irving, who combined and condensed act 1, scenes 1 and 4; none that I know have registered Viola's silent presence in Orsino's first scene. Moreover, Orsino connects with this musician specifically, first by walking over to stop his piano performance (“No more” [1.2.7]) and second by addressing Cesario directly in close-up before the premature ending of the scene. Whereas the early modern text exploits the conventions of the patronage system and the favoritism obvious in Orsino's confiding in Cesario after just three days, Nunn chooses to show the early moments of Cesario's service in order to mark out Orsino's awareness of his page from the start of the film and to track the development of their intimacy.

In a move that recuperates the closeness displayed in the Folio text, Nunn also restores a large proportion of the lines typically cut from act 2, scene 4, where Orsino once again sends Cesario off to woo Olivia. From the early nineteenth century on, 2.4 has undergone radical cutting, including the omission of all of Feste's role in the scene as well as the excision of Orsino's discourse on men's wavering love and its causes. Not only does Nunn retain Orsino's advice to Cesario about why “he” should choose a woman younger than himself, he also keeps the call for Feste to sing as well as the song itself. However, Nunn revises the scene just as radically as those early performances did: he intercuts act 2, scene 3, and act 2, scene 4, and disperses the remaining conversations between Orsino and Cesario throughout the film. The song that plays behind their initial conversation in 2.4 is the one that Feste sings to the below-stairs crowd in 2.3. And the song of the “fair cruel maid” is shifted well into act 3, the occasion for the near-kiss between Orsino and his page in the barn, which is the prelude to Orsino's perhaps overly vehement command: “once more, Cesario, / Get thee to yond same sovereign cruelty” (2.4.79-80). No other performance, not even John Dexter's inventively reordered 1968 television production, has so radically dispersed the various moments and moods of Cesario's second scene with Orsino. Nunn effectively keeps Viola and Orsino right before our eyes almost right up until the denouement.

These choices for Twelfth Night yield significant insight into characterization as reworked in cinematic productions of Shakespeare. In film, fragments paradoxically produce coherence and apparent depth of character within the sustained development of a relationship that critics since the eighteenth century have found both crucial and difficult. Samuel Johnson's early objections to Viola as an “excellent schemer” found their way into Francis Gentleman's commentary in Bell's 1774 edition of Shakespeare's plays: “Viola—it is very singular that a young lady, just escaped from a shipwreck, under apprehension for her brother, should so suddenly form a design upon the duke, whom she had never seen: But when Shakespeare wanted to push on his plot, he was not very ceremonious with probability.” By the mid-nineteenth century, Mrs. Elliott, whose praise for Viola is unstinting, finds Orsino problematic as the object of her affection: “It is earnestly to be hoped that Viola won as good a husband as she deserved. Orsino is no hero.” In the 1888 introduction to the Henry Irving Shakespeare, Arthur Symons offers the following brutal assessment of the problems posed by Orsino and Viola together:

The great defect of Twelfth Night as an acting comedy lies, no doubt, in the fact that the love interest never takes very much hold on our sympathies. Viola is a charming young woman and makes a pretty boy; but who can possibly sympathize with her in her ardent pursuit of such a lover as Orsino, a man whose elaborate sentimentality reminds one of those delicacies which cloy rather than delight the appetite, and whose plastic readiness to transfer his affections makes one suspect they were, after all, scarcely worth such trouble to win.

The distaste that Symons displays for the crucial love between Viola and Orsino reveals the difficulties caused by nineteenth-century perception of Viola's character: idealizing her constancy throws Orsino's “weakness” into sharp relief. Orsino's apparent inconsistencies, especially in 2.4, were anathema in the nineteenth century because of the high value set on coherence and consistency in characters. The result was that Viola's relationship to Orsino became the radical flaw in the play.
Nunn takes a distinctively cinematic approach to the “problem,” which he frames specifically in terms of theater: “the biggest problem of the play in stage performance is that Orsino, who dominates the early part of the work, drops out at the end of Act Two and doesn't return again until the last scene of Act Five.” Nunn reworks the relationship between Orsino and Viola through the distinctive temporal strategies of film and edits their scenes together in three ways: he films continuous scenic sequences across a series of settings; he crosscuts pairs of scenes, like 2.3 and 2.4, so that continuous action becomes discontinuous by virtue of apparently simultaneous interactions; and he literally divides up both of the scenes between Viola and Orsino and spreads them throughout the film. Nunn uses these several strategies to earn the emotional impact of Viola's most famous, self-revelatory speech about her imaginary sister and the poignancy of her voice-over declaration “Whoe'er I woo myself would be his wife” (1.4.42), which he has moved to the end of their penultimate meeting in the film. As a result, the fragments and combined scenes produce a coherence in their developing relationship that a twentieth-century audience both “reads” and helps to produce as the film progresses.

The first of the displaced moments from the theatrical text emphasizes Viola's “tending” to Orsino and underscores what Nunn argues are the crucial difficulties of Cesario's disguise: “It was important to me that Viola, converting herself into her brother, Sebastian (who she believes has drowned), should have to face considerable physical and temperamental challenges.” For example, Cesario's appearance in act 1, scene 1, follows directly from the emotional trauma of shearing her locks and the physical pain of confining her breasts in the disguise; the difficulties of playing the piano and passing as male in this scene, which seems to include all of Orsino's court, abruptly gives way to the emotional pain of remembering her brother's death when Orsino looks straight at her in praising Olivia—”She that hath a heart of that fine frame / To pay this debt of love but to a brother” (1.1.34-35). Her brief flashback to the scene of her drowning brother vividly invokes the parallels between Viola and Olivia's situations while beginning to reveal what Viola might find so appealing about Orsino—his speech makes it seem that he knows the book of her secret soul. This first scene marks Viola's literal repositioning in the text and initiates the almost subliminal expansion of their relationship.

Nunn's strategies reveal an investment in the relationship developing over time, especially in contrast to the concentrated interactions between Orsino and Viola in the Folio. Love, according to current assumptions evident in film, television, and even romance novels, both arises from and generates continuous interaction. Nunn's *Twelfth Night* displays and reproduces this ideology. However, this film also, paradoxically, demonstrates that the impression of such “continuity” can only be achieved through the fragmentation and dispersal of scenes between the two.

When Nunn breaks Viola's encounters with Orsino into smaller, separate scenes, the time that will untangle Viola's dilemma becomes three months of service most convincingly, especially when scenes that run continuously are filmed in different locations and situations. For example, act 1, scene 4, plays continuously, but its temporal frame is visually extended. Orsino first interrupts Cesario's fencing lesson, “Who saw Cesario, ho?” (1.4.10) and then leads him out to the seaside to ask his help. Nunn's screenplay even registers an imagined length of time in this cut: “ORSINO is sitting by the sea, with the castle in the background, next to CESARIO, having told the whole story of his love for OLIVIA.” After Orsino teases him about his near-girlishness, inadvertently threatening both the false mustache above the lip “more smooth and rubious” (1.4.32) and her concealed breasts by grabbing the front of Cesario's jacket, Cesario punches him to get free and knocks Orsino over onto his injured arm. Nunn then cuts to Orsino, reclining as in the opening scene on his couch with his arm in a sling, as he reaches for Cesario's hand: “I know thy constellation is right apt / For this affair” (1.4.35-36). Although the scene's lines flow without interruption, the three complete scene changes and interaction of injury and forgiveness elongate the exchange. The abandonment of Orsino's sling by the middle of the film serves as a further subliminal reminder that, as Orsino puts it, “Three months this youth hath tended upon me” (5.1.97).
Beyond revisions in setting which nonetheless maintain textual continuity, Nunn also uses interwoven scenes to create “character effects” in Viola and Orsino. Although some critics have complained that “the film compulsively cross-cuts among the characters, rarely allowing a scene to build,” in fact that film strategy accomplishes several things. First, like extending a single scene across several settings, the crosscutting stretches out the conversation between Orsino and Cesario. Second, the strategy of intercutting the two scenes, uses specific aspects of the text, for instance, Feste's song, to illuminate the content of the scenes as well as Nunn's interpretation. All in all, Nunn fleshes out the verbal and thematic connections between sequential scenes—a cinematic underscoring of the diptych/triptych structure that Mark Rose has discussed in Shakespearean scenic construction. Nunn portrays as simultaneous the actions in two plots that explore the yearning singled out by some critics as the central insight of Nunn's production.

As Podhoretz's glowing review suggests, “two scenes are combined into an exquisitely edited expression of the way in which sister and duke and noblewoman pine for each other,” but the intermingling of act 2, scenes 1 and 2, is actually even richer, given the backdrop of Feste's song. “Oh Mistress mine” is the song that the twins originally sing on the boat before the shipwreck. Whereas their voices combined jest with the line “that can sing both high and low” during the boat scene because they do sing both high and low, in the middle of the film that line marks a cut to Olivia half-sleeping as she hears the singing from the kitchen. The scene thus foreshadows the replacement of Sebastian's low voice for Viola's high one in her affair of the heart.

Nunn also uses songs to mark significant parallels linking 2.3 and 2.4. For example, when Andrew Aguecheek and Sir Toby ask for a song, the scene cuts immediately to Orsino's request for a song. The account of this missing singer that Curio gives—“Feste the jester, my lord, a fool that the Lady Olivia's father took much delight in” (2.4.11-12)—cuts back to Feste's question to the revelers in the kitchen about what kind of song they would like. The song itself makes a vivid bridge between the two scenes, underscoring both the ambivalently voiced lover and the invocation of transitory youth in both scenes. For example, “high and low” not only functions as voice-over for Olivia but as the cue to cut back to Orsino's music room with the same tune playing in the background and his question to his page “How dost thou like this tune?” (2.4.20). Viola's “masterly” (2.4.22) response yields to Feste's verse “Every wise man's son doth know” (2.3.45). The “present laughter” (2.3.49) of the song then becomes Orsino's laughter at Cesario when perceiving that the youth's eye “hath stay'd upon some favour that it loves” (2.4.24). During their entire exchange, the music of Feste's song plays in the background, creating aural continuity between the interleaved scenes. When Orsino's comments on women as roses culminate in Cesario's lament, “alas, that they are so: / To die, even when they to perfection grow!” (2.4.40-41), the song's response in the cut back to the kitchen is that “what's to come is still unsure” (2.3.50). As Maria begins to sing with Feste, they arrive at the carpe diem motif in song, expressing her longing and the lament that “youth's a stuff will not endure” (2.3.53). That echo of Orsino's and Cesario's comments about women becomes a refrain repeated four times and a commentary on Maria's lost youth and palpable longing for Sir Toby in this production.

Nunn uses Feste's role rather than cutting it, as the nineteenth-century productions did, in order to emphasize part of what he thinks the play is about: “It's about mortality, the transience of youth, the transience of the happiness that we associate with youth.” Nonetheless, he has changed the song that Orsino requests at the beginning of act 2, scene 4, from “Come Way, Death” to “Oh, Mistress Mine,” in effect doubling the number of scenes that use song and lyrics to elaborate Orsino's relationship with Cesario. The impression of unrequited longing created by “Oh, Mistress Mine” is reinforced by a very brief, final, silent cutaway first to Cesario looking at Orsino and then to Orsino looking at Cesario after the song closes. Even Andrew Aguecheek, whose face on film supplies us with powerful emotional cues when, for example, he says, “I was adored once” (2.3.181). These images, especially the silent close-up, implicitly refute Mark Rose's contention that “the presentation of character in Shakespeare is perhaps less like a modern film in which the figures are in constant motion than an album of snapshot stills to be contemplated in sequence, each photo showing the subject in a different light, a different stage of development.” Shakespearean filmmakers incorporate these visual parallels without sacrificing the “constant motion”: the cut itself becomes the constant motion that
engages the audience in comparing different views of a single character or comparing different characters entirely.

Although the entire sequence takes place continuously over the card table, the conversation is extended and builds audience involvement. The two scenes also become mutually interpretive. For example, the overt clues marking out Maria's painful longing for Sir Toby underscore the more subtle hints of Viola's apparently futile desire for Orsino—even though we have not yet heard about her love in the film. With this crosscutting, Nunn teaches his audience to expect and to “read” the brief scenes between Orsino and Viola with which he has seeded the rest of the film. Feste's song effectively situates the brief encounters between Orsino and Viola as evidence of desire functioning below everyday activities. Thus this scene prepares the audience still more thoroughly to perceive the “depth” of character in the yearning that underpins Viola's subsequent brief scenes with Orsino.

This strategy works especially well since Nunn creates a series of dislocated, composite scenes that flesh out and elaborate the closing conversations of act 2, scene 4. One pair of scenes interpolated into act 3 offers Viola the combination of “physical and temperamental challenges” I have already mentioned in the opening scene. Cesario's appearance, riding hard and jumping her horse with the Duke's court, leads directly to Orsino's calling for the “boy” to help him in the bath. Cesario's response to the physical difficulty of jumping the hedge (“cries of distress welling up in her”) yields to “the most compromising position so far.” The actual summons is taken from 2.4—“Come hither, boy” (2.4.15)—but the speech Orsino gives from his bath continues his early meditation about how Olivia's love for her brother augurs well for her later love, while Cesario, at first embarrassed and then bemused, bathes his back:

How will she love, when the rich golden shaft
Hath kill'd the flock of all affections else
That live in her. When liver, brain, and heart,
These sovereign thrones, are all supplied and fill'd
Her sweet perfections with one self king.

(1.1.35-49)

This speech, completing the one interrupted in act 1, scene 1, applies as vividly to Viola as Olivia, as Nunn once again draws out the parallels implicit in the Shakespearean text and allows Viola to hear this meditation. The accompanying action, the lingering intimacy of Cesario sponging Orsino's back, shows Viola in just the position that Orsino is imagining for Olivia—having taken him as her “one self king.”

What the Renaissance text implies in scenic parallels between act 1, scenes 1 and 2, Nunn's film interweaves explicitly for a twentieth-century audience. When Viola herself breaks off this moment, she reverts to act 2: “Sir, shall I to this lady?” (2.4.123). His response, though lacking the jewel he sends in the Folio text, follows directly: “Ay, that's the theme, / To her in haste; [Give her this jewel;] say, / My love can give no place, bide no delay” (2.4.123-25—bracketed material has been omitted). The physical challenge of riding like a man is juxtaposed here with the emotional challenge of acting the page to the man she loves and recalling the death of her brother. The two are spliced together in a scene that combines one speech from 1.1 with fragments from 2.4. Such brief sequences encourage an awareness of Viola's hopeless desire operating “beneath” her direct service to the Duke throughout the film, creating the sense of a coherent character through carefully dispersed fragments.

In a second reworked and relocated scene from 2.4, Nunn offers yet another location—the billiards room—and a useful separation of Orsino's contradictory representations of love. In this encounter, shifted still later in act 3 after Sebastian's meeting with Antonio in Illyria (normally 3.3), the film explicitly stages Orsino's advice to Cesario in the context of the two “men” playing billiards:
If ever thou shalt love, remember me;  
For such as I am, all true lovers are,  
He takes his shot and misses badly.  
Unstaid and skittish in all motions else,  
Save in the constant image of the creature  
That is beloved.

(Nunn 74; 2.4.15-20)

In this context, Orsino's comment is a laughing excuse for his failed motion—he has missed his shot. Nunn thus displaces and recasts Orsino's claim of constancy well away from his account earlier in the film of wavering male affection that must choose a younger woman to “hold its bent” (2.4.37). The scene also offers Cesario the first chance to present her greater constancy; to her surprise, her motion is not skittish, and she makes her shot.

Moreover, this brief scene introduces the remainder of 2.4, which, like 1.4, emphasizes different moods by stretching the encounter across different settings. After Cesario successfully sinks his ball, Nunn cuts away to the two rushing down to the barn to solicit the song from Feste. The scene then resumes where it left off several sequences before with Orsino's request to the fool for “that old and antic song we heard last night” (2.4.3). The actual song from 2.4 that Feste sings provides the backdrop for the growing closeness of the two characters listening, as first Orsino crosses the room and places his arm behind Cesario and, next, in an over-the-shoulder shot, Nunn shows Cesario gradually leaning back as if to kiss Orsino. At Feste's final line of the song, the point of view cuts to a head-on two-shot of the pair, startled out of the intimate moment. Feste's reactions both during the song and immediately thereafter draw direct attention to the near-kiss—the measure of the intimacy the pair achieve by “act 3” of Nunn's film.

The scene continues directly from there, but only after Orsino and Cesario abruptly rush outside to stand by the sea. Shouting to be heard above the surf (much louder now than ‘twas before), both Orsino and Cesario seem pushed beyond the “normal” friendly interaction of the game of billiards. In Orsino's case, the abrupt command, “Once more, Cesario” (2.4. 80) seems an almost desperate attempt to gain heterosexual equilibrium; moreover, Cesario both reveals and hides her love simultaneously in the story of her sister. Her speech serves both as a forceful defense for women “as true of heart as we” and a self-revelation that paradoxically seems to promise silence about “his” feelings for Orsino—“she never told her love” (2.4.107, 111). Through these sequences, Imogene Stubbs fully earns the poetry and poignancy of the “Patience on a monument” speech as she smiles at grief with a tear flowing down her cheek. Only after this scene, in fact the next morning when Cesario returns to Orsino still on the battlements, does Nunn produce Viola's telling comment from the end of 1.4: “Who'er I woo myself would be his wife” (1.4.42). The filmed fragments of her scenes with Orsino have effectively built up the conflict between her “interior” grief and love and her “exterior” participation in Orsino's household.

Thus Nunn elaborates the growing closeness between Orsino and his page by elongating the interactions of the playtext through filmic time. He claims to “alter the chronology so that the Viola/Orsino story could continue developing throughout, by being interleaved between Olivia scenes and Malvolio scenes, so that we never lose sight of the relationship about which we are required to be so joyously happy at the end.” This development actually builds the relationship in a variety of ways. Music room, seaside, riding country, bath, billiards room, battlements—all these varied settings demonstrate how thoroughly Cesario tends upon her lord. The dispersal of their concentrated time together illuminates Viola's life in Orsino's court while expanding Orsino's character and separating some of the startling, even incoherent reversals in his various speeches about love in 2.4. Most important, even continuous scenes, especially the crucial last one hundred lines of 2.4, spread across a variety of settings and an array of sounds—silence, song, surf—display the evolving relationship between Orsino and Cesario in visual and aural variations that justify the changes in tone and Orsino's sudden changes of attitude.
In fact, through film editing, Nunn resolves the inconstancy that leads Arthur Symons ultimately to dismiss Orsino as “a sentimental egoist.” Symons's distaste for Orsino's character derives from the scene he describes as “Shakespeare's judgment on him,” namely, Orsino's “shallow words on woman's incapacity for love (2.4), so contradictory with what he has said the moment before, an inconsistency so exquisitely characteristic; both said with the same lack of vital sincerity.” In the twentieth century such inconsistencies of character have been attributed to Shakespearean scene structure or even Renaissance ideology. Rose suggests that “a Shakespearean scene, when it is concerned with ‘character,’ will show us a figure in a given emotional posture, or assuming one, switching from joy to grief”; more recently, Sinfield argues that “when critics believe they find a continuous consciousness … [in Shakespearean characters], they are responding to cues planted in the text for the initial audiences.” In planting film cues for a twentieth-century audience, Nunn separates Orsino's inconsistent assertions across space and time; he disperses Orsino's emotional postures rather than radically cutting an already comparatively small role as the nineteenth-century performances did. In Nunn's version, Orsino's inconsistency in act 2, scene 4, becomes less striking because his conflicting comments occur in different locations, even at different times. Moreover, these interactions in the film's configuration register his complex responses to Cesario as their relationship develops.

The success of these techniques suggests that such fragmentation—or intimations of fragmentation in changing settings—functions as the twentieth-century technique for developing character. Whereas the lengthy sustained intimacy of 2.4 in the Folio marks out the mutual definition of the two principals in the Renaissance theatrical context, and the eighteenth- to nineteenth-century versions simply cut Orsino's role to promote character consistency and ameliorate his suitability as Viola's love object, in twentieth-century film we can have almost all of the complicated interaction between the two characters, but only if those varied interactions extend across the surface of the action and allow us to supply their imagined depths. In both the seventeenth-century play and the twentieth-century film, the conventions registering the mutual attraction of Orsino and Viola expose ideologies of erotic union. The playtext stages multiple emotional postures that show Orsino's influence over Viola, displaying erotic alliance as hierarchical at its core; the film deploys fragments to convey long-term, continuous interaction. As a result, each in different ways and at different times produces “character effects.”

At the same time that the film editing of Orsino's and Cesario's relationship and characters exploits twentieth-century ideologies of romantic love, Nunn's treatment of the twins invokes ideologies of gender. As a result, he tests the limits of creating character complexity through cinematic fragments. Viola's abilities, developed through her tenure in Orsino's court, match her brother's, offering a version of gender equality in her mirroring of him. However, his appearances and their addition to Cesario's character and activities ultimately make Cesario an unreadably complicated figure, whose “depth” becomes obscurity when too many pieces of cinematic behavior are attributed to “him.”

In the process, Nunn uses the same strategies of intercutting and expansion in elaborating the relationship between Olivia and Sebastian as he has between Viola and Orsino. However, the later crosscutting, which mingles 3.4 and 4.1 and again 4.2 and 4.3, more significantly exposes, in the first pair of scenes, the potential to confuse the twins and, in the second pair, the madness that seems to result. Cesario's resistent reactions to Olivia's household are, at first, mirrored explicitly in her brother's responses. Cesario's final plea that Olivia love Orsino leads into Feste's question of Sebastian: “Will you make me believe that I am not sent for you?” (4.1.1). However, Sebastian's response is limited to “Go to, go to, thou art a foolish fellow”(4.1.2) before Nunn returns to Cesario listening to Olivia, who declaims, “Come again tomorrow. [Fare thee well;] / A fiend like thee might bear my soul to hell” (3.4.218-19). Cesario's attempt to depart cuts to and echoes Sebastian trying to shake Feste's persistence: “Let me be clear of thee” (4.1.2-3). After Sebastian walks off, with Feste swaggering along behind, Nunn then cuts quickly back to 3.4 and a side shot of Cesario walking, collar up and in the same coat as her brother, just before she is stopped by Toby for the duel. In addition to establishing the twins' parallel reactions to Olivia's solicitations, this scenic juxtaposition invites our confusion of the two characters as well as Feste's.
This echoing effect develops further in the unexpected interruption of Cesario's duel at the end of act 4, scene 1, when the mistaking of the twins for each other becomes part of Viola's experience as well. When Antonio is dragged off, pleading for the money Sebastian has been holding for him, Nunn cuts to Sebastian denying that he knows Feste yet a third time: “I prithee, foolish Greek, depart from me, / There's money for thee, if you tarry longer, / I shall give worse payment” (4.1.18-20). Unfortunately, as he denies that he knows Feste, he performs the same sleight of hand that Cesario did earlier when giving money to the fool. In this context the switch of hands in the coin trick not only further convinces Feste that Sebastian is Cesario but also resonates thematically with the money that Antonio has given into the other twin's hand. In effect, the twins embody the coin trick. Viola's purse is almost empty but Sebastian's is full; the hand that appears to hold the money is empty, while the identical but opposite hand actually does have the coin. The comparable abilities of the twins as entertainers from before the shipwreck emerge here as the sign that they are a single person.

This doubling underscores the emergent and contested Western ideas about gender equality that prove almost as significant to Viola's character as is her relationship with Orsino. Of all the Twelfth Night films I have seen, this one best creates the twinning of brother and sister. Viola's “training” in Orsino's military court gives her rough equality to her brother that extends beyond dress. This Viola plays cards and billiards as well or better than a man; she rides and jumps obstacles successfully, even if she gives muffled cries of distress; “Cesario” even (for once) acquits himself well in the duel. Although Antonio still interrupts to fight on “Sebastian's” behalf, Viola is at that point putting her fencing tuition into practice and fighting well against Aguecheek. This Viola is not only “as true of heart” as a man; she is also as competent as a man in several pursuits that face her during her adoption of male attire. Like the coin trick, which convinces Feste that the twins are the same person, Viola's skills as well as Sebastian's arrival make their ultimate confusion for each other unavoidable. By encouraging the audience to share the bemusement of the doubling, Nunn adds layers to Viola's character, playing upon twentieth-century gender ideologies as well as romantic ideologies in his construction of her plausibility as a character.

As Nunn very carefully places Sebastian in a world going mad even before Olivia lays claim to him, the film produces the Illyrians as the audience to the twins as a single character. The wholly unexpected assault by Aguecheek becomes the penultimate oddity in a series of strange encounters that Sebastian experiences. His question, “Are all the people mad?” (4.1.26), and his aggressive response to Aguecheek and Toby are all the more justified because his interactions with Olivia's household and his confusion at misidentification not only parallel Viola's final solo visit to Olivia (duel for no cause, strangers claiming to know her) but also immediately echo that experience. The simultaneity of the twins' experiences, “both born in an hour” (2.1.19), is restored cinematically as simultaneous experiences registered in crosscutting. At the same time, the audience becomes more aware of the confusion arising from mistaking the twins for each other as Olivia pleads, “Be ruled by me” (4.1.63). His acceptance of her and his willingness now to keep the madness or dream that has overcome him find an echo transported from 3.4 as Nunn cuts away to Viola, sitting by the sea: “Prove true, imagination, O prove true” (3.4.384). On the one hand, from the audience's privileged position, “reading” Cesario's character at the end of the film apparently presents no problem; on the other hand, the discontinuities perceived by the Illyrians, most notably Orsino and Olivia, disrupt that character completely, in part because “Cesario” is a product of their imaginations supplying the “interior” logic of “his” character according to their own assumptions about servants and young gentlemen.

However, Nunn also significantly challenges the audience's superior knowledge in his filming of the twins. He provokes his audience's confusion by substituting Imogene Stubbs for Steven Mackintosh when Olivia spies Feste and “Cesario” outside her window just after this exchange. He also uses the same sleight of film several other times, interchanging Mackintosh for Stubbs when “she” rides away from Olivia's house after her second visit and again when Malvolio, crossgartered and convinced of her regard, peers through the window at Olivia and “Cesario” walking from audience right to left outside the window. In turn, Stubbs stands in for Mackintosh at the start of the first scene between Antonio and Sebastian on the quayside and outside the church where Feste spies “him” with Olivia. When asked about this cinematic indirection, Nunn
acknowledges that “the twin trick was played on the audience several times, though that wasn’t quite my intention—rather to imprint swift physical images on the audience’s collective retina so that the final moment of re-union would be credible and moving.” In fact, Nunn himself is not sure how many times Cesario was filmed for Sebastian or vice versa. Whenever such substitutions occur, the film audience occupies the position of the Illyrians: they see the twin that they expect to see, projecting the identity of the actor-as-character into the situation that should present one or the other twin in terms of filmed and filial coherence.

The dangers attached to believing the imagination, to projecting a complete character from a partial view, become the core of the next pair of intercut scenes, foreshadowed by a brief cutaway to Malvolio (“they have laid me here in darkness. The world shall know it”). The crosscutting interleaving 4.2 and 4.3 hinges on the madness that Malvolio denies and Sebastian suspects. Malvolio’s certainty that Olivia loves him finally rests on far less direct evidence than does Sebastian’s; as a result, their responses prove different yet interrelated.

The intercutting of these two scenes, while again drawing out the encounters with the Illyrians, explicitly uses references to madness as the cinematic pivot linking the gulling of Malvolio to the good luck of Sebastian. After all, Malvolio’s insistence that the house is dark and that he is not mad leads immediately into Sebastian’s opening speech in 4.3, in which he tries to determine who is mad:

This is the air, that is the glorious sun,
This pearl she gave me, I do feel it, and see it,
And though ’tis wonder that enwraps me thus,
Yet ’tis not madness.

(4.3.1-4)

Unlike Malvolio, Sebastian wavers on the subject of his own sanity; he is “ready to distrust [his] eyes” (4.3.13) as he looks at his reflection in one of Olivia’s mirrors. His reflection, echo to the doubling that makes the twins so confusing throughout the last two acts of the play, leads him to “wrangle with my reason that persuades me / To any other trust, but that I am mad” (4.3.14-15). Not so Malvolio whose immediate line following the cut back to 4.2 is “I am not mad” (4.2.41). Malvolio’s encounter with Feste offers another possibility besides madness for the confusion that both Sebastian and Malvolio are experiencing. After Malvolio begs Feste to “convey what I will set down to my lady” (4.2.115-16), Nunn cuts back to Sebastian in 4.3: “Or else the lady’s mad” (4.3.16). But the proof of Olivia’s sanity surrounds him in her well-ordered gardens and household. As Sebastian notes, if she were mad, “She could not sway her house, command her followers, / Take and give back affairs, and their dispatch, / With such a smooth, discreet, and stable bearing” (4.3.17-19). Of course, the crosscutting underscores that at least one of her followers is not being swayed or commanded with “smooth, discreet and stable bearing.”

As in the previous scene, where Sebastian accepts confusion and follows Olivia, here he again abandons his attempts to reason out his situation and promises, “I’ll follow this good man, and go with you, / And having sworn truth, ever will be true” (4.3.32-33). Nunn then cuts away to Feste and Malvolio on truth and madness:

CLOWN.

[I will help you too’t.] But tell me true, are you not mad indeed, or do you but counterfeit?

MALVOLIO.

Believe me I am not, I tell thee true.

(4.2.116-18)
This telling interchange happens before Sebastian's promise of truth in the Folio; Nunn's filming and cuts make the parallels more direct and pointed. Sebastian's primacy apparently sets his logic as the more valid one, but “truth” itself is suspect since Sebastian, like Malvolio, is caught up in mistaken identity.

The extensive elongation of the very short 4.3 by crosscutting it with one of the play's longest scenes, 4.2 (even though substantially cut here), sets the evolution of Sebastian's mistaken involvement with Olivia against the consequences of Malvolio's erroneous belief that she loves him. Not only does Sebastian's hesitancy show well against Malvolio's unyielding self-delusion, but also the extended time frame and parallels develop both Sebastian's character and his relationship with Olivia beyond the two brief encounters they have before their marriage in the Folio text. In this way, the striking fragmentations and rearrangements of the play's text in Trevor Nunn's Twelfth Night not only answer the critical queries about Viola's sudden affection for Orsino, which extend from the eighteenth century, but also attempt comparable effects in making Olivia's mistake more acceptable. Nonetheless, this development is not and cannot be as thorough as the elaboration provided by the combination of 2.3 and 2.4 and by the dispersal of composite scenes between Viola and Orsino. Even though this mingling of 4.2 and 4.3 does extend Olivia's involvement with Sebastian and sets the level of confusion between the twins as high as possible, the layering of these fragments actually exposes how characters in Illyria interpret and try to make coherent their encounters with Cesario in assessing “his” character. Their mistaken reactions to the partial views offered them by Viola and Sebastian underscore how expectations set by gender and romantic ideology produce “Cesario” ultimately as an impossible character.

The twin relationship in Nunn's film calls into question the emerging fullness of “Cesario's” character by displaying Viola as complexly grounded in shifting ideologies of gender. Extending from the seventeenth-century text through the British nineteenth-century setting (“where the differences between men and women were at their greatest … the last years of the previous century took those attitudes to extremes exemplified in the dress silhouettes of the two genders”) to a twentieth-century audience, Nunn's film emphasizes Viola's abilities, once driven, to enact and dress the male part. The plausibility of mistaking one twin for the other derives not just from the excellent casting or even the camera tricks, but from the establishment of male and female characters whose talents, tricks, and even abilities prove closer to interchangeable than in any previous Twelfth Night film. In fact, the casting here is even more effective than those films that use a single actress for both roles and are consequently compelled to emphasize gender differences. Nunn's film as a whole works through the equality and blend of genders predicted in their opening performance, largely because this Twelfth Night reflects a particularly twentieth-century Western set of assumptions about gender equity—given equal opportunity. Sebastian's incursions into Cesario's Illyria expose how the Illyrians' mistaken constructions of Cesario mirror our investment in “reading” Viola's character within her extended association with Orsino.

Trevor Nunn's Twelfth Night reveals our twentieth-century investment in character as a complex weave of gender identity and erotic alliance. The “depth” of Viola's character proves inextricably linked to the depth of her love, which can only be shown through her ongoing relationship with Orsino. The paradox, of course, is that both her character and their relationship are signaled by dispersed fragments of the text, echoed and emphasized by the comparable strategies applied to Sebastian's interactions with Olivia. As a result, the film exposes a peculiarly twentieth-century “filling up of subjectivities”: scenic parallels both confuse and establish gender identity, and only short, disjointed interactions can produce the required continuity. In Nunn's Twelfth Night, our “natural perspective” on the twins, like that in Shakespeare's play, proves at once fragmented and continuous—and therefore ideological rather than “natural.”

15. In “‘The very names of the Persons’: Editing and the Invention of Dramatick Character” in *Staging the Renaissance: Reinterpretations of Elizabethan and Jacobean Drama*, ed. David Scott Kastan and Peter Stallybrass (London and New York: Routledge, 1991), Randall McLeod examines the variations in stage directions in *All's Well* in order to argue that characters on stage seem to be reconfigured—and renamed—according to their relationships to other characters on stage. Such variable naming does not appear in the 1623 Folio *Twelfth Night*, except insofar as Orsino wavers between being called “Count” and “Duke.” Some textual critics have taken this variation as a sign of textual revision in the play, but the naming has implications for characters as well since the counts in Shakespeare's plays have less authority and more involvement with love than do the dukes.
16. This distinction between “true love” and lust is a common feature in popular romance fiction, as analyzed by Janice Radway in *Reading the Romance: Women Patriarchy and Popular Literature* (Chapel Hill: University of North Carolina Press, 1984).

**Criticism: Themes: Elias Schwartz (essay date April 1967)**

[In the following essay, Schwartz presents Twelfth Night as an example of “festive” comedy, in which the atmosphere of merriment expresses a vision of human life that focuses on life's joy, not its limitations. Schwartz additionally contrasts festive comedy with satiric comedy, emphasizing that the play should not be viewed as satire.]

Although Aristotle does not take up the nature of comedy in the *Poetics*, he does throw out a few remarks which are as intelligent and useful as anything that has been said on the subject. Comedy, he says, differs from tragedy in imitating men worse, rather than better, than we are. And he defines the laughable as a species of ugliness: “a mistake or deformity not productive of pain or harm to others.” We may derive from these remarks a fairly clear account of one kind of comedy—what might be called the satiric type. In satiric comedy, the characters are worse than we are, so that we do not identify ourselves with them. Even when painful things happen to these characters, we remain detached enough for these events to be painless for us. The activities of these characters, furthermore, never eventuates in pain for those with whom we do sympathize. Should this occur, the comic mood of the play would evaporate.

To such an esthetic disaster Ben Jonson comes perilously close in *Volpone*. I refer to the moment when it appears that nothing can prevent Volpone from ravishing Celia, one of the two decent people in the play. While Volpone is gulling the avaricious birds, we identify ourselves in some degree with Volpone. But here our concern for Celia, her helplessness, and the apparent certainty of her fate, make the scene painful rather than funny.

The sort of comedy Aristotle has in mind when he makes his few remarks is the kind where—as in Jonson and Molière—the satirized characters depart more or less from what author and audience assume to be proper behavior. This departure constitutes a kind of deformity which is not painful, and it makes us laugh. The norm from which such characters depart is usually the social code of a dominant class; the laughter is socially binding, promoting a sense of solidarity among the laughers and reinforcing the code by ridiculing any departure from it.

In Shakespeare's gay comedies, this Aristotelian formula does not work. His characters—the important ones, at any rate—are not worse than we are; on the contrary, they are better than we are or on the same level. They may be foolish, but only in the way that the best of men are foolish. The laughter they evoke is not satiric laughter, but indulgent laughter. We laugh, in a way, at ourselves, because we do not stand apart from, or look down on, these characters, but identify ourselves with them.

What keeps such a comedy from being painful? Chiefly plotting and tone. In Shakespeare's gay comedies, the plot and tone are so finely controlled that we never anticipate a serious outcome; we know that everything will turn out well in the end, no matter how foolishly these people behave. Their foolishness, moreover, is not a falling away from some implicit social code; it involves, rather, the inherent foolishness of human nature, the
inborn limitations of human existence. And this foolishness is not ridiculed, but accepted, celebrated. The concerns of this life are viewed as ultimately trivial and foolish in the light of the next one; yet the joys of this life are acknowledged as real. Indeed, it is not only foolish but prideful to reject these transient delights, because this means rejecting one's humanity, setting oneself up as more than human.

This is the sort of comedy of which Shakespeare is the greatest master. He could write the satiric type too, but he was most at home in what C. L. Barber has called “festive” comedy. It was probably this type that Dr. Johnson had in mind when he remarked that Shakespeare was by nature a comic, rather than a tragic, writer. In any case, it is important to understand the distinctions I have made in order to interpret properly such a play as Twelfth Night, the most nearly perfect festive comedy that has come down to us.

For Twelfth Night is not a satiric comedy; nor is it a patchwork of inane revelry. Its meaning is commensurate with, and depends upon, its festive form and feeling. Its very merriment and festive ambience convey a profound and genial vision of human life. It is a vision of the goodness and joy in life despite its limitations—almost because of them; a vision of the foolishness of men and a full acceptance of folly, because such acceptance establishes man's proper place in the world, pulls down his vanity, makes the fullest enjoyment of life possible. The play is also touched with a curious, elusive sadness, deriving from the implicit recognition of the shortness of human life, an awareness that the best of worldly goods will soon be gone forever.

This complex attitude is eminently fitting in a play given the name of, and probably performed on, Twelfth Night, the last of the great Christmas holidays. It was a day climaxing the joy and license traditional on these days, a final moment of merriment before the days of order and sobriety to follow. “Holiday, for the Elizabethan sensibility,” writes C. L. Barber,

implied a contrast with “everyday,” when brightness falls from the air. Occasions like May-day and the Winter Revels, with their cult of natural vitality, were maintained within a civilization whose sad-brow view of life focused on the mortality implicit in vitality. The tolerant disillusion of Anglican or Catholic culture allowed nature to have its day, all the more headlong because it was only one day. But the release of that one day was understood to be a temporary license, a “misrule” which implied rule, so that the acceptance of nature was qualified. Holiday affirmations in praise of folly were limited by the underlying assumption that the natural in man is only one part of him, the part that will fade.

(Barber p. 601)

Orsino, Olivia, and Sir Toby are each foolish in their own way. Yet they are all lovable because they never take themselves too seriously; they are redeemed by an awareness of their own affectation. It is this elusive quality—shared by all the chief characters except Sir Andrew and Malvolio—which at once sets them apart as deserving their good fortune and guarantees that nothing really bad will happen to them. What makes Malvolio the “enemy” is not only his pharisaical egoism, but his lack of self-awareness, what we call today a sense of humor. In the festive world of Twelfth Night, this is the greatest, almost the only, sin.

The most prominent “device” of the play is a form of dramatic irony. Usually we associate dramatic irony with tragedy, especially Greek tragedy, where it serves to elicit a sense of bitter mockery at man's aspirations. When Oedipus says to his supplicant Thebans: “You have your several griefs, each for himself; / But my heart bears the weight of my own, and yours / And all my people's sorrows,” we discern a truth that he does not intend. We respond with mingled fascination and horror, for we know that this truth will be his undoing. In the Agamemnon, the irony is usually intended but the fictive hearer is unaware of it—as in Clytemnestra's double-edged assurance to Agamemnon: “Of pleasure found with other men, or any breath / Of scandal, I know no more than how to dip hot steel.”
Both these modes are used in *Twelfth Night*, but the effect is quite different. Instead of bitter mockery, we get a genial acceptance of the way things are. Instead of reluctantly acquiescing in the apparently inevitable but inscrutable order that directs an Oedipus or an Agamemnon to his doom, we whole-heartedly accept the order which brings the foolish to their senses.

This peculiar use of dramatic irony is closely related to the play's thematic heart. Everyone in the play is to some degree foolish, and everyone is to some degree fooled. Orsino is fooled by Viola, Olivia by Viola and Sebastian. Sir Toby and Fabian fool Viola and Sir Andrew, and the three men are fooled by her. Malvolio, of course, is fooled to the top of his bent, and, since he is the greatest fool of all, this is as it should be. Much of our pleasure in the play comes from our godlike knowledge of the truth of things as contrasted with the ignorance of those in the play. Such a double vision reinforces our sense of the generic folly of men, for those in the play are, after all, like us.

The most charming moments of the play involve this sort of light-hearted irony. In the fourth scene, the Duke (whom we suspect from the start to be falling in love with Cesario-Viola) sends Viola to Olivia for the first time. When Viola protests that she is not suitable for such a commission, the Duke replies:

> ... they shall yet belie thy happy years  
> That say thou art a man. Diana's lip  
> Is not more smooth and rubious; thy small pipe  
> Is as the maiden's organ, shrill and sound,  
> And all is semblative a woman's part.  
> And thou shalt live as freely as thy lord  
> To call his fortunes thine.  
> ... Prosper well in this,  
>

We know, of course, that Cesario is Viola (being played by a boy). So we take the Duke's first words in a sense that he does not intend—as, in this case, Viola herself must take them. There is a two-fold irony in his describing her as “semblative a woman's part,” because she is playing a role, just as the boy actor is playing her. The Duke's reference to Viola's voice—“as the maiden's organ, shrill and sound”—involves a whimsical *double entendre*: she *is* a maiden in the technical sense, and “organ” refers not only to her voice. There is, finally, some beforehand ironic pointing in the Duke's last lines: Viola will, as we know she longs to do, eventually call the Duke's fortunes hers.

An even more brilliant instance of the method occurs at II.iv.15ff. Here the Duke's tenderness, his ease in opening his heart to Cesario-Viola hints at submerged love, as though the loveliness of Viola has affected him in spite of her disguise, as though he responds unwittingly to Viola's love for him. Our full awareness of the situation lends the whole passage a kind of solemn whimsicality, the mood which the Duke has up to now merely affected. “If ever thou shalt love,” Orsino tells her, “In the sweet pangs of it remember me.” Viola does love and she has no need of reminders from her beloved. When the Duke almost guesses her secret:

> My life upon 't, young though thou art, thine eye  
> Hath stay'd upon some favour that it loves,  
> Hath it not, boy?  
>

the “boy” replies: “A little, by your favour.” (“Favour” is a three-way pun.)

**DUKE.**

What kind of woman is 't?

**VIOLA.**

Of your complexion.
DUKE.

She is not worth thee then.

The charm of this is dramatic, not merely verbal. The “boy” tells the Duke that she loves him, and the Duke comes close to revealing his love for her in his estimate of the “boy's” worth. A woman of Orsino's temperament is not good enough for Cesario—so highly does Orsino regard his “boy.” But we know that a man of his temperament is good enough for Viola, because she already loves him, and, besides, his own humility makes him worthy.

When the Duke hears that Cesario's beloved is “About your years,” he objects: “Too old, by heaven!” But his judgment is affirmative as well as negative, for, if a woman of the Duke's age is too old for Cesario, a man of his age is just right for Viola. Viola listens with pounding heart as Orsino goes on to confirm her belief that he is for her:

Let still the woman take
An elder than herself: so wears she to him,
So sways she level in her husband's heart;
For, boy, however we do praise ourselves,
Our fancies are more giddy and unfirm,
More longing, wavering, sooner lost and won,
Than women's are.

His acknowledgement of the fickleness of men's love is encouraging. But at the end of the passage we are brought back to the sweet melancholy of Viola's present predicament: she must, the Duke with unwitting cruelty reminds her, gather her rose buds while she may, women being

as roses, whose fair flow'r,
Being once display'd doth fall that very hour.

At which, Viola, with the charming candor about sexual fulfillment that appears in Shakespeare's most maidenly maidens, laments:

And so they are; alas, that they are so!
To die, even when they to perfection grow!

Which conveys, not only her love-longing for Orsino, but her awareness that her time is flying.

On a more general level, the passage expresses a sense of the ultimate sadness of human life: that it is folly not to make the most of life's joys, folly not to seize the day which will endure but the twinkling of an eye. In the emotional logic of the play, this is the feeling that underlies the more explicit one that life is to be rejoiced in. This, indeed, is the burden of Feste's song in the previous scene:

What is love? 'Tis not hereafter;
Present mirth hath present laughter;
What's to come is still unsure:
In delay there lies no plenty;
Then come kiss me, sweet and twenty!
Youth's a stuff will not endure.

All the “wise” people in the play have this attitude; if they depart from it, their lapse is temporary. In Viola the attitude is manifest in the quality of the verse she speaks, as well as in her actions. And Orsino ought not to deceive us. His pangs of unrequited love are qualified by his affectation, by his parodying of Petrarchan attitudes and rhetoric:
O, when mine eyes did see Olivia first,
Methought she purged the air of pestilence;
That instant was I turned into a hart,
And my desires, like fell and cruel hounds,
E'er since pursue me.

We are aware, therefore, that he does not take his own postures seriously, that he secretly smiles at his own affectation. He knows and accepts and so redeems his folly.

This ought to be made clear in the performance. Even while he protests his pain and eternal love for Olivia, it ought to be apparent that he is falling in love with Cesario-Viola. This will give the proper ironic touch when he protests (to Viola, who truly loves him) that

There is no woman's sides
Can bide the beating of so strong a passion
As love doth give my heart ...

... Make no compare
Between that love a woman can bear me
And that I owe Olivia.

Viola replies with delicate pathos and irony that she knows

Too well what love women to men may owe.
In faith, they are as true of heart as we.
My father had a daughter lov'd a man
As it might be perhaps, were I a woman,
I should your lordship.

And she goes on to tell the sad tale of her own situation, in the course of which she glances at the true nature of Orsino's present passion:

We men may say more, swear more; but indeed
Our shows are more than will; for still we prove
Much in our vows but little in our love.

Orsino, in effect, is being upbraided for his departure from the norm of wisdom, for affecting a love he does not feel. Yet he never departs so far that he needs more than gentle correction by the whirligig of time. When the time comes, he will make an easy transition from Olivia to Viola.

Olivia, too, is gently chastised. She is more errant than Orsino, but she, too, is fundamentally wise. This is certified for us by her defense of Feste and the Fool's function and by her outspoken censure of Malvolio. Her fault, like Orsino's, consists in a kind of pride or egoism. It is exemplified early in the play by her attitude toward her brother's death. Viola, who serves throughout the play as a kind of norm of human wisdom, has also lost a brother—or so she believes. Her attitude is the proper one: saddened by his loss, she tempers her grief with the knowledge that he is in Elysium. And she sets out to make the most of life in spite of death by searching for love and marriage. She thus stands in emphatic contrast to Olivia, who, because death has taken a brother and a father, rejects not merely Orsino's suit, but life itself. “I see you what you are,” Viola tells her, “you are too proud.” And this, of course, is the point of Feste's witty proof that Olivia is a fool to mourn for a brother she believes is in Heaven.

Olivia will learn to accept and rejoice in life, and Viola in the garb of Cesario will be her teacher. It is right that she should learn of her limitations as a human being through a love which she cannot control. And it is right, too, that the one she loves should be a woman in disguise: this suggests the narcissistic streak in her nature which, ironically, assists in its own destruction. Olivia falls at first sight, overpowered by love and
suddenly aware that she is no longer a master of her fate. “Ourselves we do not owe,” she says at the end of Act I. “What is decreed must be—and be this so!” In a way she is rationalizing her passion, but she is also speaking truer than she knows: she is becoming acquainted with the inherent irrationality of human nature, and when she accepts it in herself, she will be a fully human person, possessed of the wisdom appropriate to one. At first, as Viola discerns, she thinks she is not what she is. But we will see her happy yet, for her sin is venial, and, having atoned for it, she will receive her reward in Sebastian, a male Viola.

Though Sir Toby carries to an extreme the attitude of wanton revelry, he is never, in the world of the play, felt to be culpable. One reason for this is that he is intelligent and, even when far from sober, fully aware of what he is doing. Another is that he is deliberately opposing his niece's foolish attitude toward life and death. “What a plague means my niece to take the death of her brother thus? I am sure care's an enemy to life!” These are the first words we have from Sir Toby, and the play as a whole demonstrates that he is right. He is furthermore, Malvolio's natural and symbolic antagonist: his inebriate irresponsibility “becomes” in the dramatic context something positive; he is the leader of the forces opposing proud sobriety and pompous, priggish “virtue.” It is Sir Toby who speaks the famous sentence that might serve as epigraph for the play: “Dost thou think, because thou art virtuous, there shall be no more cakes and ale?”

Sir Andrew Aguecheek is in one sense separate from the group I have just discussed; in another sense he is part of it. Utterly lacking in intelligence and self-awareness, Sir Andrew is yet never the object of satirical laughter—only Malvolio is. The laughter he evokes is indulgent, almost grateful; it is very close to the sort of laughter evoked by the blunders of children. Such laughter cannot be satirical, because the blunderer is not culpable. Sir Andrew's stupidity is natural: he was born that way and therein he is not guilty. He is a pure embodiment of that irrationality and blindness which, in the others, is but one of many traits.

He is, moreover, without guile or malice. One feels, indeed, that he would be incapable of performing a malicious act, even should he so desire. Our attitude toward him therefore approximates that of Sir Toby and his friends: they do not make fun of him, but have fun with him, all the while rather liking than despising him. It is his stupidity and cowardice and ineptitude, joined to his naive belief that he excels in all noble accomplishments, that provokes laughter, especially when he is expertly managed by Sir Toby. Is Sir Andrew a good dancer? “Wherefore,” exclaims Sir Toby, “are these gifts hid? … Why dost thou not go to church in a galliard and come home in a coranto? My very walk should be a jig. I would not so much as make water but in a sinka-pace.” Picture the hopelessly clumsy Sir Andrew affecting courtly grace, dancing a lively cinquepace while making water, as Sir Toby fancies him—such comic incongruity needs no analysis.

Perhaps the best instance of the peculiar comic effect Sir Andrew provides is the challenge he composes for Cesario-Viola. It is not merely the absurd nonsequiturs that are funny, but the fact that they have a kind of rationale in the character of Sir Andrew: they are at once stupid and pretending to wit, at once a revelation of cowardice and an attempt at courtly bravado. “Thou com'st to the Lady Olivia, and in my sight she uses thee kindly. But thou liest in thy throat; that is not the matter I challenge thee for. … I will waylay thee going home; where if it be thy chance to kill me—thou kill'st me like a rogue and a villain.” This has the form of a challenge, but it is really a plea that the recipient spare the life of the challenger. The absurdity is compounded in the wonderful Chaplinesque scene where the coward and the terrified Cesario-Viola perform their duel-dance of terror, neither one capable of hurting a fly.

Aguecheek's character, as Dr. Johnson puts it, is “that of natural fatuity, and is therefore not the proper prey of a satirist.” Malvolio, on the other hand, is the satirist’s proper prey: he is the only one satirized in the play. Those who would sympathize with him, who would regard him as shabbily treated, ought to re-read Olivia's retort to Malvolio's attack on Feste. It is perhaps the only time that Olivia really bristles. “O, you are sick of self-love, Malvolio, and taste with a distemper’d appetite. To be generous, guiltless, and of free disposition, is to take those things for birdbolts that you deem cannon bullets.” But that is just what Malvolio will never learn. It is what Orsino and Olivia know both by social inheritance and natural endowment. It is a kind of
natural nobility of soul, and its possession justifies the socially advantageous marriages of Viola, Sebastian and Maria. Aguecheek, who is too stupid to know about such matters, and who aspires to Olivia's hand, has, quite rightly, no chance at all.

But Malvolio is not stupid and he also aspires. This is why he is culpable: he ought to know better. But he is sick of self-love and tastes with a distempered appetite. He is further away than anyone in the play from that generous, guiltless, free disposition which constitutes the ideal of the play. If Olivia and Orsino are touched with egoism, Malvolio is sick of it. The trick that is played upon him is eminently appropriate, for he is, quite literally, mad. To take things for cannon bullets that are really birdbolts is to be out of touch with reality—and so to be mad. To regard folly and festivity as improper to this life is to be out of touch with truth—and so to be mad. To regard oneself as without defect is to think of oneself as more than human—and so to be mad.

Maria's trick is not, as is often assumed, the beginning of Malvolio's belief that he is loved by Olivia and that he eminently deserves her love. He believes this beforehand. As Samuel Johnson perceived, Malvolio “is betrayed to ridicule merely by his pride.” In II.iii Maria characterizes him as “so cram'd, as he thinks, with excellencies that it is his grounds of faith that all that look on him love him.” Just before she plants her letter, she tells us that he has been “yonder i' the sun practising behaviour to his own shadow this half hour.” And he has been obsessed by the idea of his elevation to the nobility through marriage. “'Tis but fortune; all is fortune. Maria once told me she did affect me; and I have heard herself come thus near, that, should she fancy, it should be one of my complexion.”

The truth is that Malvolio is mad: he is a classic instance of what the psychoanalyst calls erotomania. His treatment for madness is therefore well deserved, though apparently it is unsuccessful and the prognosis is bad. His attitude toward life—his self-love, his “seriousness”—are inexcusable in the world of the play, and we should never pity him. He profits not at all from his experience. When Feste twits him good-humoredly about his gulling, Malvolio is as straight-laced, as mean-minded, as ever: “I'll be revenged on the whole pack of you!” he growls.

But the others have learned enough about their own foolishness to accept it wisely, and their reward, as it should be, is marriage. Viola has Orsino, Olivia has Sebastian, Maria has Sir Toby. Aguecheek has but a cracked pate and an empty purse, but everyone, we feel, has what he deserves. Feste has his revenge—and a song to sing, one that sums up with charming inanity that genial acceptance of human joy and sorrow which is the pervading motive and feeling of the play.

When that I was and a little tiny boy,
With hey, ho, the wind and the rain,
A foolish thing was but a toy,
For the rain it raineth every day.

But when I came to man's estate,
With hey, ho, the wind and the rain,
'Gainst knaves and thieves men shut their gate,
For the rain it raineth every day.

But when I came, alas! to wive,
With hey, ho, the wind and the rain,
By swaggering could I never thrive,
For the rain it raineth every day.

But when I came unto my beds,
With hey, ho, the wind and the rain,
With tobspots still had drunken heads,
For the rain it raineth every day.
A great while ago the world begun,
With hey, ho, the wind and the rain;
But that's all one, our play is done,
And we'll strive to please you every day.

Satiric comedy, as we have noted, involves our dislike of those who are the objects of our laughter. Now such antipathy severely limits the possibilities of the form both as to thought and feeling. The characters in satiric comedy tend to be types, embodiments of particular vices or social aberrations, rather than “real” human beings. Festive comedy, on the other hand, deals with fully human creatures, with whom we sympathize and in whom we see ourselves—see, not just particular vices, but our complex humanity in all its richness and mortal foolishness. And we accept this with mind and heart. Shakespeare's comedy, Enid Welsford remarks, “is not a judgment but an embrace.” It presents a vision, not of types which depart from some social code or rationalized moral system, but of the ultimate absurdity of human life. It sees human beings, even at their best, as limited mortal creatures, and rather than lamenting this truth, celebrates it, rejoices in it.

It is often said that satiric comedy is a highly intellectual form. What this means, no doubt, is that the response of the audience to such a play is mainly cerebral. Aware of the code implicit in the play, the audience perceives the precise nature of departures from it and sits in judgment on the sinners. This is, of course, an intellectual response. Yet it is a very limited one. Compared to the profound—one might say, metaphysical—vision at the heart of Shakespeare's comedy, and to the whole-souled response elicited by it, satiric comedy seems not merely limited, but superficial.

Notes

1. C. L. Barber in “The Saturnalian Pattern in Shakespeare's Comedy,” Sewanee Review, LIX (Oct. 1951), 593-611, has convincingly argued for the formal dependence of Shakespeare's comedies upon the kind of feeling and attitude embodied in the traditional festivals of the Christian year.
2. Theodor Reik (The Need to be Loved, New York, 1963, pp. 53-54) observes that the trick played on Malvolio may be considered a device for projecting “mental processes cast on the external world. … If we think of the statements in the forged letter as externalizations of Malvolio's thoughts and emotions, we have a remarkably clear picture of erotomania with all its symptoms. … When … the inevitable disappointment occurs and Malvolio lands in prison, he is full of accusations against his mistress who has given him so many unmistakable signs of her love.”

Criticism: Themes: Keir Elam (essay date spring 1996)

[In the following essay, Elam uses Viola's reference to her cross-dressing, in which she states she will play the role of a eunuch, as an entry point for discussing the cultural history of castration as it appears in literature and the theater.]

I. FORWARD TO THE PAST

This essay is like Hamlet's crab: it goes forward only by going backward. Or, to put it another way, it is a work in progress that has turned irresistibly into a work in regress. A work in progress because the historical and textual ground I cover here is too vast to allow anything resembling definitive results. And a work in regress because, while my original aim was to investigate the representation of social intercourse in Twelfth Night within the context of early modern codes of behavior, the further I proceed with the project, the more I
find myself having to work my way back through the play's long theatrical ancestry. The difficulty—appropriately enough for this comedy—lies in the mediation between its twin modes of historicity: one social and synchronic (its place within the early modern context), the other dramatic and diachronic (its theatrical ancestry). The problem of reconciling these not altogether compatible twins is especially acute in the case of Twelfth Night but is certainly not limited to this play and indeed raises certain issues regarding the historical reading of Renaissance drama in general. What follows is therefore offered, inter alia, as a contribution to the debate concerning the historical contextualization of Renaissance dramatic texts.

The particular site of this meeting or clash between different kinds of historicity is Viola's enigmatic reference to her transvestism on her first appearance in the comedy. Viola, in planning to take on a new identity, refers to her disguise not as a form of crossdressing or a change of gender roles but as an actual canceling of biological sexuality. She is to play the part not of a boy but of a castrate:

VIOLA

Thou shalt present me as an eunuch to him.

It may be worth thy pains; for I can sing,

And speak to him in many sorts of music,

That will allow me very worth his service.

What else may hap, to time I will commit;

Only shape thou thy silence to my wit.

CAPTAIN

Be you his eunuch, and your mute I'll be:

When my tongue blabs, then let mine eyes not see.

(1.2.55-63)\textsuperscript{1}

Twelfth Night is a play full of enigmas. Some of these, such as Feste's riddles, take the form of local verbal games. Others, beginning with the play's title, are of a broader interpretative kind, posing questions about meaning or reference which the events of the comedy do little to resolve. Viola's “as an eunuch” statement belongs to this second category in that its referential force apparently fails to correspond to later developments within the plot: “No further reference,” we are told, “is made to this part of [Viola's] plan,” since “in fact, Viola disguises herself as a page.”\textsuperscript{2} And if Viola explains her choice of role with “for I can sing,” the explanation itself has been considered problematical, as it makes “a proposal which is never realized in the play”\textsuperscript{3} given that Viola does not sing. What, then, is she referring to, or indeed talking about, in the earlier scene?

There are two broad ways of looking at Viola's statement, one literal and the other figurative. Both imply some kind of loss. If the statement is literal, paraphrasable as “in the guise of a eunuch,” then there seems to be something missing or “castrated” in the play itself. It has often been suggested that Viola's proposed mimesis of a castrate is merely the result of a Shakespearean change of plot or even simple absentmindedness, because no further mention is made—or so it is said—of her putative eunuchhood or of her musical ability: “Since this first idea is not picked up, some argue for a revision of the text.”\textsuperscript{4} But, as we will see, this may
well not be the play's only allusion to the image of Viola as castrated male, and perhaps we should not be
overhasty in assuming that Viola, or Shakespeare, merely abandons the announced role.

If we read the statement figuratively, as a species of simile—"as if I were a eunuch"—then we hypothesize
not a missing plot but rather a notionally missing or castrated part, a part that Viola does not literally possess
to begin with. But then why should she posit disfigurement and loss, in the form of castration, as a mode of
gain, something to her advantage? From either point of view, the literal or the figurative, it remains one of the
more intriguingly cryptic moments in the comedy. A moment that leads, I would argue, in the two quite
different historical directions I mentioned: out to early modern society and back to the dramatic and theatrical
past.

II. PRIVATE INHIBITIONS, PUBLIC EXHIBITIONS

Let us begin with early modern society. Recent criticism of Shakespeare's comedies has made considerable
advances in recovering their historical sitedness. One of the more promising and still open areas of
exploration is what we might term the plays' microhistorical matrix, that is to say, the modes and codes of
early modern social intercourse insofar as they constrain interpersonal "behavior" in the plays. What seems
to lend itself especially well to the investigation of social intercourse in the drama, and in Twelfth Night in
particular, is the abundant body of recent enquiry into the forms and norms of conduct in Renaissance Europe,
especially the (predominantly French) brand of microhistoriography dealing with what is variously known as
the vie privée or the vie quotidienne, and focusing on the development of privacy, of intimacy, and of
minimal or minimalist modes of behavior within the boudoir, the walled garden, and the studiolo.

A pertinent case in point is the third volume of the Philippe Ariès-Georges Duby History of Private Life,7
dedicated to the spaces, signs, and conventions of the early modern "civility" that found its chief expression
precisely in new forms of exchange: the exchange of gifts, of letters, of love tokens but also of conversational
formulae, courtesy rituals, and codified gestures. The development of such intimacy rites in the Renaissance is
part of what Norbert Elias terms the Proces der Zivilisation, the "civilizing process," and of what Ariès calls
"privatisation," the privatizing process, which he defines as the "transition … from a form of sociability in
which private and public are confounded to one in which they are distinct, and in which the private may even
subsume or curtail the public." The primary sign of this new civilized privacy is the formation of a mode of
one-to-one symbolic exchange that encompasses both the verbal and the corporeal.

Twelfth Night, with its twin Renaissance domestic settings, its intricate plot of "private" passions, and its
correspondingly intimate discursive mode, seems a particularly suitable case for microhistorical treatment in
Ariès's terms for early modern civility—the more so as it is a comedy intensely and constantly preoccupied
with the very business of one-to-one symbolic exchange. The giving and interpreting of letters (Sir Andrew's
challenge to Viola, "Olivia's" cryptic billet doux to Malvolio); of money (Sir Andrew's financing of Sir
Toby, Viola's reward to the Captain, Antonio's entrusting of his purse to Sebastian); and of gifts, the
traditional exchange-objects of Twelfth Night celebrations (Olivia's ring to Viola, Orsino's jewels to Olivia,
Olivia's pearl to Sebastian), constitute the main stuff of the dramatic action.

The first of the comedy's exemplary exchanges of civility in Ariès's terms for Renaissance minimalism occurs
in the second scene, in which the shipwrecked Viola, having just escaped death by drowning, is comforted by
the ship's gentlemanly Captain and, in exchange for his kindly and encouraging discourse, gives him money
("For saying so, there's gold" [1.2.18]). The courteous Captain proceeds to praise first Orsino's perfect
nobility, then Olivia's perfect virtue; he, in turn, is complimented by Viola for his "fair behavior" (l. 47), his
linguistic and gestural signs of gentility. This ultrapolite dialogue is as close as one can get, given the
dramatic circumstances, to Ariès's "literature of civility [which] reveals how the chivalric customs of the
Middle Ages were transformed into rules of conduct and etiquette."
It is in this context of conversational etiquette or “fair behavior” that Viola announces her intention to assume a disguise, one that has itself been seen as an expression of early modern civility. “What enables Viola to bring off her role in disguise,” writes C. L. Barber, “is her perfect courtesy, in the large humanistic meaning of that term as the Renaissance used it, the *corteziania* of Castiglione. … [G]entility shows through her disguise as does the fact that she is a woman.”

This brings us to the first possible interpretation of Viola's enigmatic reference. It is quite plausible to see Viola's “as an eunuch” allusion, in its figurative guise, as a manifestation of the corporeal decorum or inhibition that constituted an essential ingredient of early modern codes of civility: in Ariès's words, “A new modesty emerged, a new concern with hiding certain parts of the body and certain acts.” Viola intends to hide (“conceal me what I am” [1.2.53]) not only her innate sexuality but also her assumed masculinity, thereby ensuring a double barrier of chastity against potential sexual dangers in the world of Orsino's court and a doubled *privatisation* (through the self-privation of her “private” parts) in her personal dealings with the courtiers. “What I am, and what I would,” she tells Olivia, “are as secret as maidenhead” (1.5.218-19).

Barber's reference to Castiglione's *corteziania* is appropriate in this respect, since it is in the first great Renaissance courtesy book, *The Courtier* (1528), within the context of conversational exchange at the idealized court of Urbino, that both the rules of the new civility and the modes of female decorum are codified. As Michael Curtin suggests, “What was essential to courtesy-book conduct was the emergence of a pacified and orderly civil society out of the relatively violent and chaotic Middle Ages.” This pacified and orderly civil society in a sense “feminized” medieval militarism. It is fitting, therefore, that at the center of the courteous exchanges in *The Courtier* is a woman, the Countess Elisabetta Gonzaga, who exemplifies the virtues of wit and modesty, honesty (in the sense of chastity) and self-restraint. Cesare Gonzaga praises Elisabetta's selfless acceptance of the sexual importance of her husband, Duke Guidobaldo: the duchess “has lived with her husband for fifteen years like a widow, and … has not only steadfastly refused ever to tell this to anyone in the world but, after being urged by her own people to escape from this widowhood, chose rather to suffer exile, poverty and all kinds of hardship.”

Other episodes in *The Courtier* confirm the virtues of female sexual abnegation. Cesare Gonzaga tells the “true” story of tragic self-sacrifice by a young girl who, being in love with a lord forced to marry another, pines from her unexpressed and unrealized desire,

> “though the girl wisely concealed it and sought in every way possible to rid herself of desires which were now hopeless. All the while, she never faltered in her determination to remain chaste; and seeing that there was no honourable way in which she could have the one whom alone she adored, she chose not to wish for him in any way. … And with that firm resolve, the wretched girl, overcome by the most bitter anguish and wasted by her lingering passion, died after three years, preferring to renounce the joys and satisfaction for which she pined, and finally life itself, rather than her honour.”

Gonzaga's story of death as erotic self-sacrifice is particularly pertinent to Viola's “as an eunuch” repression of her own sexuality, since it bears more than a generic resemblance to the story Viola later tells Orsino of her “sister”-self, who similarly wastes away from unexpressed desire:

---

VIOLA

My father had a daughter lov'd a man,

As it might be perhaps, were I a woman,

I should your lordship.
ORSINO

And what's her history?

VIOLA

A blank, my lord: she never told her love,

But let concealment like a worm i' th' bud

Feed on her damask cheek: she pin'd in thought,

And with a green and yellow melancholy

She sat like Patience on a monument,

Smiling at grief. Was not this love indeed? ...

ORSINO

But died thy sister of her love, my boy?

VIOLA

I am all the daughters of my father's house,

And all the brothers too: and yet I know not.

(2.4.108-22)

Viola's celebrated “blank” suggests her emptied or castrated subjectivity through the cutting asunder of her desire for Orsino; it also suggests the virtual nature of her history, which remains to be written or performed, and in which her “concealment” might or might not end tragically, like Gonzaga's narrative. Moreover, the context of Viola's tale of female self-“castration” is analogous to that of Cesare Gonzaga's narrative: both stories are told in response to misogynistic affirmations of women's biological inferiority and incapacity for self-restraint. Gonzaga responds to Gaspare Pallavicino's argument that women are mistakes of nature, mere males *manqués*: “Nature … would, if possible, constantly bring forth men; and when a woman is born this is a mistake or defect, and contrary to Nature's wishes.” Such biological imperfection can be remedied, claims Pallavicino, only through sexual intercourse, whereby the woman receives what, thanks to nature's bungling, she lacks (the phallus): “because in the sexual act the woman is perfected by the man, whereas the man is made imperfect.” At the same time, the desperate search for the perfection that only intercourse can provide leads women to destructive promiscuity: “don’t believe that men are more incontinent than women ... countless evils arise from the incontinence of women which do not so from the incontinence of men.”

Viola similarly responds to Orsino's contention that women are biologically and morally inferior because “they lack retention”—in the two senses that they lack the capacity for real love and that they lack self-restraint (with a possible third allusion to women's incontinence or uncontrollable menstrual flows)—and are at the same time dominated by mere animal “appetite” (2.4.97, 98). The irony in Viola's situation, of course, is that in order to exercise the very capacity for love and restraint she attributes to women, she must dress as a man, albeit an imperfect or “castrated” man; her male disguise itself represents the self-punishing bridling of her sexuality. She is in danger of unwittingly confirming Pallavicino's contention that women aspire to be males in order to attain the perfection (or phallus) denied to them at birth: “every woman wants to be a man, by reason of a certain instinct that teaches her to desire her own perfection.”
Viola's disguised entry into Orsino's court and her behavior once there seem, then, to embody, or perhaps
disembody, the Renaissance codification of the feminine in her renunciation of exterior sexuality, or in her
renunciation of self in favor of her lost male alter ego, her “dead” twin, Sebastian.

But the Freudian implications of the Courtier connection suggest that one can take the figurative reading of
Viola's self-“castration” a good deal further. In her “as an eunuch” speech Viola prefigures her castrato
performance as a musical mode of verbal persuasion: “I can … speak to him in many sorts of music.” On one
level this is a precocious dramatic insight on Viola's part, predicting how her civilized discourse will prove
fatally attractive first to Olivia and then to Orsino. But on a broader cultural level it can be seen as a
precocious psychoanalytical insight, bearing in mind that, for post-Freudian psychoanalysis, the castration
complex is, in the words of Laplanche and Pontalis, “the a priori condition that governs interhuman exchange
as the exchange of sexual objects.”

In Freudian theory “castration” is an indispensable, if potentially snare-ridden, rite of passage towards
adulthood: “The castration complex … is of the profoundest importance in the formation alike of character
and of neuroses.” And it is a rite common to both sexes. In a 1920 footnote added to his 1905 essay on
infantile sexuality, Freud affirms, “We are justified in speaking of a castration complex in women as well.
Both male and female children form a theory that women no less than men originally had a penis, but that
they have lost it by castration.” Freud's notion of castration anxiety as the founding moment of adult
subjectivity and sociality becomes for Lacan the causative principle not only for gender differentiation but for
the very possibility of intersubjective desire and interpersonal exchange.

Given that for Lacan “the phallus is a signifier,” indeed the signifier, it is only the symbolic interchange of the
phallus that permits both signification and love; here lies the role of the woman in assuming or “becoming”
the phallus, signifier of the Other's desire, through the castration of her femininity: “paradoxical as this
formulation might seem, I would say that it is in order to be the phallus, that is to say, the signifier of the
desire of the Other, that the woman will reject an essential part of her femininity, notably all its attributes
through masquerade. It is for what she is not that she expects to be desired as well as loved.” This is as close
a description as one can find of Viola's eunuch role with regard to its effects on Olivia and Orsino: rejecting
“an essential part of her femininity” through “masquerade,” Viola achieves precisely the paradoxical result of
becoming the signifier of the Other's desire. She is loved for—or through—what she is not, as she hints in her
teasing revelation / hiding of her “real” gender both to Olivia (“I swear I am not that I play” [1.5.185]; “I am
not what I am” [3.1.143]) and to Orsino (“My father had a daughter loved a man. … I am all the daughters of
my father's house, / And all the brothers too”).

At the same time, Lacan makes castration responsible for the institution of the Symbolic order, of the Law, of
the Name of the Father, and thus of signification itself. “It is in the name of the father that we must recognize
the support of the symbolic function which, from the dawn of history, has identified his person with the figure
of the law.” The castration threat, effecting the incest taboo, is anthropologically and historically responsible
not only for the maturation of the child but for the acculturation of human society, replacing “natural” sexual
exchange with symbolic exchange: “The primordial Law is therefore that which … superimposes the kingdom
of culture on that of a nature abandoned to the law of mating.”

The castration complex is thus synonymous with the process of discursivization, which in turn constitutes the
process of civilization. The “natural” law of coupling gives over to the law of symbolic interchange. Sexual
relationships, says Lacan, do not exist, there being no real complementarity between the sexes. They are
substituted for by discursive relationships. Love is exclusively an effect of language, a cultural event. This
process involves a loss both physical—that is, the necessary diminution of natural libido—and personal—the
loss of what Lacan terms “an essential part of [the woman's] femininity.” Loss is the price paid for cultural
gain, namely for language itself.
Here, then, is where Viola's own pre-announced loss becomes her potential gain: her participation in the intimate rituals of speech-, letter-, and gift-exchange—in a word, in the new amorous and “civil” symbolic order—is made possible only by her temporary assumption of a castrated or “blank” role. As Laurie E. Osborne writes, with reference to the deferrals and deviations of desire in the comedy, “The love tokens, letter or jewel, addressed to the beloved throughout this comedy establish the symbolic order linking the lover to the beloved creating two blanks or positions to be filled.”28

In its figurative force, therefore, Viola’s “eunuch” lends itself to both a historical and a psychoanalytical reading in terms of the privatizing and discursivizing of intercourse, within the bounds of Elias's “civilization” and Lacan's “kingdom of culture.” Given the close correspondence between behavior in Twelfth Night and the private-life codes of courtesy and intimacy, there is a strong temptation to make an unmediated leap from the civilized tête-à-têtes of the historians’ Renaissance domestic interiors to the textualized interchanges of the comedy and back. There may, however, be hidden dangers in this direct move from the boudoir to the Globe (or Middle Temple). The first danger is what we might term the privacy fallacy, taking Shakespeare's representation of vie-priveée intimacy for the real thing, as if the two spheres of exchange belonged to a single cultural common market with all customs barriers removed. This entails ignoring the mediation of that other set of early modern conventions which governed not domestic but theatrical interaction. The process of privatisation identified by Ariès, in which “the private may even subsume or curtail the public,” is in certain respects the opposite of what took place on the Elizabethan stage, which, in representing scenes of intimacy, enacted a publicization of the private sphere, taking it into a public arena where the collective subsumed the individual rather than the reverse. We should not be seduced into forgetting that the close encounters conducted within the courts of Orsino and Olivia are at the same time open displays obeying quite different rules of communicative transaction.

A second and related peril in passing from the whispered sweet nothings of the historians' Renaissance walled garden to the discursive delicacies of Olivia's hortus conclusus is the risk run by some recent historical criticism of naïve mimeticism. This annihilates another potent source of mediation, namely the conventions of comic drama, with their own vitality, their own longue durée that does not necessarily bend to every change in what Ariès and his colleagues term cultural mentalité. If Viola’s ways of using, disguising, and describing her body are closely related to Renaissance conventions of corporeal and behavioral exchange, it is equally true that such verbal and bodily intercourse is a primary constituent of the dramatic and theatrical conventions the play inherits. The problem—a theoretical but also an eminently interpretative problem—is, therefore, how to place the comedy within the network of early modern social constraints without doing violence to its powerful theatrical and dramatic mediacy.

There is more to Viola’s “eunuch” conceit, both historically and theatrically, than a civilized gesture of self-effacement or self-disembodiment. Her apparent private inhibition is also, in more ways than one, a public exhibition. And in order to understand both the full contemporary historicity and the full theatricality of her reference—in its literal as well as its figurative force—it is necessary to look at the comedy's use of dramatic history and, in particular, at its reworking of the castration topos that Viola brings into play.

III. THE MAN WITHOUT QUALITIES

In order to go ahead in this discussion, therefore, we need to go back in time some 1,762 years from the first performance of Twelfth Night. Viola's plan to become an unmanned man signaled to its more learned spectators the play's debt to the New Comedy prototype of all crossdressing drama, Terence's Eunuchus, revered by Shakespeare's contemporaries as a classical model and imitated in many Tudor and Jacobean plays, from Udall's Ralph Roister Doister to Jonson's Epicoene. Together with Plautus's plays of twins and doubles, it is also the primary model for the original version of the Viola story, the Sienese Ingannati, as well as many another sixteenth-century Italian comedy. Eunuchus has never been considered one of Shakespeare's sources, and it is not the primary purpose of this essay to demonstrate a direct derivation, although I believe
that traces of such a derivation are present in *Twelfth Night*. What is at stake, rather, is the theatrical and cultural history of the eunuch trope itself and the ways in which Shakespeare reworks this history.

Viola’s “present me as an eunuch” request finds two different kinds of parallel in Terence’s comedy: the literal and the fictitious. The play offers a “real” castrate in the guise of Horus, a slave presented as a gift to the courtesan Thais. The main plot, however, hinges on the ploy of a young lover, Chaerea, who, in order to gain access to his beloved, the slave-girl Pamphila—likewise owned by Thais—takes Horus’s place as castrate servant in the courtesan’s household. Chaerea thus presents himself at Thais’s court “as an eunuch” and so as his own negative image, a minus sign standing for what is in fact an emphatic plus, as he goes on to demonstrate when he finally gains access to Pamphila’s bed and thus to her sleeping body.

Why this doubling of eunuchs, this redundancy of castration in Terence’s play? *Eunuchus*, as Terence admits in the prologue, is itself a “double,” being largely derived from a lost play of the same title by Menander, who in turn inherited the castration topos from the Old Comedy. Indeed, castration might be said to be a founding trope of comedy as dramatic genre. This is probably due historically and anthropologically to the derivation of comic drama from the phallophoria, the fertility-invoking phallic procession, for which castration represented a negative, fertility-threatening force. Terence’s *Eunuchus* revives this tradition, rendering the topic fully explicit and doubly central, and greatly elaborating its social and theatrical implications.

The immediate reason for the play’s redundant emphasis on castration lies in the occasion of its first performance. As with symbolic castration rites in the Old Comedy, the performative context for Terence’s “eunuch” was one of religious festivity. The comedy was first staged in 161 bc during the Megalensian games in honor of the Great Mother Cybele. The cult of the Asiatic goddess Cybele had been introduced into Rome by Elagabalus in 204 bc and was inextricably connected with castration rituals. Attis, the vegetarian god associated with the cult, died and was resurrected after castrating himself; Cybele’s priests were traditionally eunuchs, while Elagabalus himself was notorious for having his friends’ bodies symbolically shaved and his own testicles tied up when celebrating the rites of Cybele and Attis. In this ritualistic and surgical context, focusing on the literal or symbolic removal of the testicles rather than on the phantasmic missing phallus, the fruits of castration are direct: unmanning is synonymous with self-transcendence and with “rebirth” in the guise of regression to a pure infantile state. In offering the spectacle of an oxymoronically potent castrate, Terence seems to be dramatizing, and perhaps burlesquing, the Roman cult of self-mutilation as the supreme or “divine” form of sexual self-realization. “Self-denial,” as Carlin A. Barton observes with reference to Roman culture, “becomes the culmination of the spiral of desire. … As a result, self-castration, what we would think of as an extreme act of asceticism or self-sacrifice, is often categorized as a form of self-indulgence by the Romans, and the castrated as extreme libertines.”

Terence’s eunuch play is thus an ambiguous homage to Cybele, and the kinds of transcendence celebrated in the comedy have less to do with religious rebirth than with the more worldly representation or realization of (masculine) desire. The extraordinary influence of Terence’s play seems to lie largely in the vertiginous reversal at the center of the main plot, whereby what looks like the neutralizing of male sexuality turns out instead to be a triumphant assertion of virility. It is only by transcending his male identity through self-“castration” that Chaerea is able to realize his desire for the slave-girl. In narrating his offstage triumph, Chaerea relishes the ironic contrast between his assumed role and his actual performance:

CHAEREA

... I boult the dore.

ANTIPHO

What then? ...
Admitted into Pamphila's bedroom as eunuch-guard, Chaerea “boult[s] the dore” (“pessulum ostium obdo”), a metonymy for the act that he is employed not to (be able to) perform.

Here lies the central dramaturgic tension within Eunuchus and an important legacy for later crossdressing comedies such as Twelfth Night. What Chaerea's account enthusiastically underlines is the irresistible theatrical competence of his performance, transforming his secret transgression into public display. Eunuchus sets up two antithetical performatve modes in presenting the same scene: one enacted but hidden in the offstage bed chamber, the other narrated and publicized in Chaerea's onstage account. Chaerea's fictitious sexlessness thereby becomes not only a means to the fulfillment of personal desire but also an allegory for the boastful professional self-transcendence of the actor in playing his part, his capacity to become at will a man without qualities, able to conquer helpless and perhaps—like Pamphila—sleepy audiences by sacrificing his personal and physical attributes. It is in part this histrionic force of the eunuch device—neutered sign of an “empty” signifier (compare Viola's “blank”), namely the actor and his body—that contributed to its longevity as theatrical topos.

As he carries out his plan, Chaerea's performance takes on further theatrical implications, involving the role of the audience as witness. His main activity as eunuch, namely that of guarding or ogling his beloved in her toilette, becomes an unflattering icon of the male gaze and thus of the (masculine) spectator as pornophilic voyeur.

As Paul Veyne notes in the first volume of A History of Private Life, voyeurism is the social condition not only of the eunuch-slave but of the slave tout court in ancient Rome: “With nothing else to guide them, slaves shared the values of their master, admired him, and served him jealously. Like voyeurs they watched him live his life with a mixture of admiration and scorn.” There is more than a suggestion in the play that Terence's own audience is complicit in a scopophilic “enslavement” to vicarious sexual pleasure, ogling in turn the antics of Chaerea.

Eunuchus enacts, therefore, a movement from the bed chamber to the platea and simultaneously from individual sexuality to collective sociality. In addition to the doubling or splitting of the eunuch figure into the “real” castrate and his “fictional” other, nearly all the play's characters participate in the “as an eunuch” condition in its figurative sense: the miles gloriosus Thraso, presented as the reverse of Chaerea, a braggart about sex but lacking in actual sexuality; the somewhat androgynous parasite Gnatho; the raped Pamphila, “castrated” of her freedom, her subjectivity, and her virginity, not to mention her social status; even the prostitute Thais, deprived of citizenship and of political rights. Eunuchhood constitutes the play's “controlling metaphor,” whereby the condition of sexual mutilation comes to stand for quite different forms of social and psychological dispossession. Castration thus becomes a kind of internal epidemic or contaminatio, spreading out from the play's neutered center. As the Pseudo-Servius observed in the ninth century, “This one as a eunuch who deflowered that virgin is the principal subject-matter in this comedy. If other persons are brought in, they are subordinated to the eunuch, and all parts of the fable in some way have reference to the eunuch.”

This contagion principle constitutes, as we will see, an important model for later “castration” plays.

Thus Terence's ambiguous eunuch is a figure for social as well as sexual and theatrical intercourse, the more so since Chaerea knowingly exploits a particular form of symbolic interchange (particularly prominent, as we
have seen, in *Twelfth Night*), namely the giving of presents. In offering himself as a devirilized body, Chaerea becomes a literal exchange-object within the master-slave economy that governed second-century Republican Rome and that regulates the somewhat sordid world of the play. In an act of precipitous social self-relegation or -castration, Chaerea, at the suggestion of his own servant Parmeno, doubly depersonalizes himself as eunuch and slave, offering himself as one in a whole series of presents—jewels, money, as well as other servants such as Pamphila herself—that the *bona meretrix* Thais receives in exchange for her desired favors.

Gift-exchange becomes the play's central economic and semiotic paradigm. The governing social framework here would seem to be the one outlined in Marcel Mauss's classic 1925 essay on the gift, in which the French anthropologist states “that the spirit of gift-exchange is characteristic of societies which have passed the [archaic] phase of ‘total prestation’ … but have not yet reached the stage of pure individual contract, the money market.” In such postarchaic societies the gift is the primary symbolic token of a reciprocal system that includes the exchange of “courtesies, entertainments, ritual military assistance, women, children, dances, and feasts; and [participation] in fairs, in which the market is but one element.”

Here lies the dazzling success of Chaerea's self-election to the status of gift. In a “natural” exchange economy suspended between archaic rites and modern market negotiation (an economy that levels the distinction between subjects, physical objects, and symbolic objects), Chaerea-the-gift-item is able to exploit his zero subjectivity, his invisibility as *persona*, in order to fool the courtesan and her court. Terence figures the brutality of this economy in the violence of Chaerea's return to malehood, as he possesses the sleeping Pamphila, herself deprived of rights, personality, and volition:

**PITHYAS**

O what stirre hath the Eunuch made which thou gauest us! he hath deflowered the damsell which the Captaine bestowed on my mistres.

**PHAEDRIA**

Thou art out of thy witts. How could an Eunuch doe this thing?

**PITHYAS**

I know not who he was, this which he hath done, the thing it selfe will shewe.

Chaerea, in turn, is rewarded for his pains by a social as well as sexual gift, since he nobly agrees to take Pamphila's hand, but only once her “good” blood has been proven.

Terence's “eunuch” is in all senses at the middle, albeit a surgically mutilated middle, of a paradoxical system of signification through opposition—minus for plus, loss for gain, private for public—and establishes himself as a successful dramatic topos precisely because he is already a disfigured figure for social and theatrical exchange as such, a metasemiotic vehicle that can be resemanticized and rehistoricized in later contexts. All of the personal, erotic, social, and theatrical implications of castration become part of the history of comedy. And the transmission of the topos from Roman New Comedy to Elizabethan comedy, via—as we will see—the Italian *commedia*, is itself a passing on of a model of mediation and exchange that is progressively modified within the different historical and theatrical conditions to which it is subjected. Each recontextualization of the topos in its various sexual, social, and theatrical aspects will bear the indelible traces of the eunuch's own stage history.

**IV. “BEN SI CASTRA”: SIENESE RAPTURES AND MANTUAN RUPTURES**

As a result of his versatility and indeterminacy, Terence's castrate turns out to be not only unexpectedly virile but also hyperbolically fertile, disseminating an almost interminable series of sixteenth-
seventeenth-century progeny. … Indeed, it is fair to say that comedy as dramatic genre is “reborn” in early modern Europe through the good offices of the castrate. When reworked within the Italian Renaissance *commedia*, however, the eunuch topos is drastically modified—or, in Freudian terms, further castrated—in that Terence's disguised male is more often than not transformed into a crossdressed female, the mimesis of the unmanned into the imitation of a (non)man. This change is in part due to altered theatrical circumstances, since in certain performances of erudite comedy in the Italian courts and academies, female roles were performed by actresses rather than boy-actors. But it is also a measure of a radically changed social context: just as the performative situation of Italian disguise plays is no longer that of religious ritual, so the exchange system within which the disguise operates is no longer the master-slave economy of Republican Rome but the mercantile economy of early modern Italy, with its burgeoning individualism, its power struggles between rival city-states, and its new codification of civility and courtesy, including, as we have seen, the rules of female decorum.

The Renaissance legacy of Terence's *Eunuchus* is twofold. It serves as a model for any number of disguise plots from which the real and/or feigned eunuch as such has disappeared. At the same time, the *eunuchus* survives as a powerful verbal and stage trope, or “theatergram,” within disguise comedy itself. This double legacy corresponds to Louise George Clubb's definition of Renaissance dramatic *contaminatio* as a mixture of borrowed plots and figures or topoi. As Clubb notes, the first Italian dramatist to make use of this mixed *contaminatio* is Ariosto, who proudly declares in the prologue to *I suppositi* (1509) his debt to *Eunuchus*, although it is mainly the secondary Thraso plot that Ariosto borrows and adapts. The castration topos is itself disguised and displaced to other parts of the play, notably Filogono's story of being robbed during his sea voyage from Catania to Ferrara. Here is George Gascoigne's 1566 version of Filogono's maritime mishap: “Jesus! How often they untrussed my male, and ransacked a little capcase that I had, tossed and turned all that was within it, searched my bosom, yea, my breeches, that I assure you I thought they would have flayed me to search between the fell and the flesh for farthings.” Filogono's untrussed male and little ransacked capcase figure the robbery as a mode of rape (“searched … my breeches”) but also as a form of physical disfigurement (“flayed me alive”), which suggests the main metaphorical force that castration will assume in the Italian *commedia*, namely material deprivation. These details also suggest a significant shift in the primary icon of castration itself in Renaissance comedy: no longer the surgically removed testicles of the ancient eunuch-slave but the absent or truncated phallus of modern psychosexual fantasy. Perhaps for this reason Ariosto's emasculating sea voyage becomes a recurrent subtopos in comedy.

A key text in the transmission of the castration topic in its phallic guise—and indeed in the development of Renaissance comedy in general—is the first modern crossdressing play, *La calandria*. First performed at Urbino in February 1513 during a municipal festival, the comedy stands in a dialectical relationship with the development of the humanistic ideology of *corteziania*. Indeed its author, Cardinal Bernardo Dovizi da Bibbiena, is one of the main speakers in Castiglione's *The Courtier*, set in the Urbino ducal palace where *La calandria* probably had its first performance. Castiglione is also credited with writing the prologue to the comedy.

The Urbino connection between the new Renaissance *civiltà* and the new Renaissance *commedia* is quite explicit. In the second book of *The Courtier*, Bibbiena offers a long defense of laughter as the distinctive feature of human nature and identifies theatrical performance as a legitimate source of mirth. Bibbiena's speech makes explicit what Wayne A. Rebhorn describes as “the theatre metaphors structuring Castiglione's view of the world and of his ideal courtier,” who “produces an endless series of brilliant performances, pausing only long enough to exchange one mask for another.” The relationship between court and theater is thus bilateral: if the ideal courtier is a performer, the performance of comedy becomes the court's public double.

In reality *La calandria* is far removed dramaturgically and discursively from Urbino's courtly civility. Derived from a *contaminatio* of Terence, Plautus, and Boccaccio, the comedy's plot centers on different-sex twins and
two-way transvestism. The twins, Lidio and Santilla, separated at birth, grow up apart; and while Lidio spends his time searching for his sister, the latter, by way of self-defense, disguises herself as her brother, whom she believes dead. Crossdressing here combines with cross-desire: Lidio falls in love with Fulvia, wife of the foolish Calandro, and in order to gain entry into Fulvia’s house dresses as a woman. This constitutes Bibbiena’s most immediate debt to Eunuchus. Calandro, meanwhile, falls in love with the crossdressed Lidio. Fulvia likewise crossdresses in order to go to Lidio. Inevitably, Santilla is mistaken for her transvestite twin and is taken to the appointment with Fulvia. Thus a transvestite woman has an amorous encounter with another woman whom she takes to be the crossdressed man who at the same time is the object of her husband’s desire.

It is Fulvia’s erotic (dis)appointment with Santilla that brings the castration theme to the surface. Stunned at her discovery of Lidio’s missing link, Fulvia blames the go-between necromancer, Ruffo: “Alas! you have transformed my Lidio from male to female. I’ve handled and touched everything; but cannot find any of the usual things except his external appearance [presentia] … restore to him the knife of my sheath, you understand?”

Fulvia registers the shock of the absent phallus, perceiving female sexuality, in classic Freudian terms, as a lack (her being dressed as a boy underlines the point). Here lies the comedy’s main ideological link with The Courtier. The play dramatizes relations not only between the sexes but between genders, defining the female primarily in terms of missing or lost masculinity. It also offers opposing models of female behavior in relation to this lack. The crossdressed Fulvia’s frenetic search for the phallus is a perfect anticipation of Pallavicino’s thesis regarding women’s erotic overcompensation for their “imperfection.” Santilla, on the contrary, expresses her femininity through the self-abnegation that will be championed by Castiglione’s Gonzaga, using her masculine disguise as a mode of self-protection and as a reinvocation of her lost brother.

Between the opposed extremes of gender lies an indeterminate middle ground, that of the eunuch (Santilla as unmanned Lidio) or, alternatively, of the hermaphrodite. Santilla’s servant Fannio leads the necromancer Ruffo to believe his mistress is double-sexed, able to adopt whichever organ proves appropriate to the occasion:

FANNIO

You should know that my master Lidio is a hermaphrodite [hermafrodite].

RUFFO

And what does this flowering shit [merdafiorito] mean?

FANNIO

Hermaphrodite, I say. … Hermaphrodites are those that have both sexes … with Fulvia he will use only the female sex for ...

So, in a sense, it turns out: the revirilized Lidio takes the place of Santilla in Fulvia’s bed; but when they are caught in flagrante by Calandro, Santilla saves her brother by re-substituting for (re-castrating) him. Like Aristophanes’s hermaphroditic halves, the twins finally come together and recognize each other.

The threat or promise of castration is disseminated throughout the play. The gulling of Calandro is figured in the vivid “theatergram” of a trunk in which he is to hide in order, so he believes, to be conducted to his beloved Lidio-Santilla. In a surreal apocalyptic fantasy Calandro’s servant Fessenio warns him that to fit a man into a trunk, certain bodily parts must be amputated. Fessenio’s sadistic surgical delirium imagines cuckoldry as eviration: Calandro’s amputated organ will be replaced by “a member which is bigger than his own.” The servant underlines the point later when he takes his master to an appointment with a prostitute: “I’ll
go and unite the castrated sheep \textit{[castron = fool]} with the sow \textit{[troia = whore].}” And the gull himself is later forced to admit, “Oh what a simpleton/castrated sheep \textit{[castron]} am I!”

\textit{La calandria} is at all its levels a comedy of the disappearing member. The question naturally arises as to why a cardinal and leading courtier should engage with such dubious material. One answer might be that it is precisely through the Terentian castration topic that Bibbiena attempts to mediate between the enclosed world of the court and the wider world of public intercourse, especially theatrical intercourse. The play's vigorous variations on the missing phallus stage a ritual subtraction of sexuality that enables the frank public representation of eros without, at least in theory, betraying the strict codes of the new civility. It also enables the new comic drama to negotiate its own representational rights within that new civility. But in (theatrical) practice the erotic verve of the play far exceeds any notional decorum or courtesy. In fact the comedy, in dramatizing and publicizing private sexual congress, takes on its own joyfully generative and liberatory life, independent of, and perhaps even in opposition to, courtly decorousness. Its life empowers later plays, such as \textit{Twelfth Night}, to reap the fruits of castration.

It is evident that the \textit{Calandria} story, with its separated twins (and the presumed death of the male twin), crossdressed heroines, and erotic confusions, contains the \textit{Twelfth Night} story. It also contains the plots of the majority of Renaissance disguise comedies, such as Machiavelli's \textit{Clizia} (1525), with its substitution of a crossdressed servant for the heroine in the bed of the lecherous old Nicomaco, and Pietro Aretino's transvestite plays, including what at first sight appears to be an “anti-Bibbienian” burlesque, \textit{La cortigiana} (also 1525), in which the ingenuous Venetian Maco arrives in a corrupt and whore-ridden Rome, determined to become a courtier and cardinal (à la Bibbiena), and ends up being punished by symbolic castration and sodomization.

In Aretino's later \textit{Il marescalco} (The Stablemaster [1533]), set at the ducal court of Mantua, the duke himself puts in motion a plot—contaminated from \textit{Eunuchus}, Plautus's \textit{Casina}, and Machiavelli's \textit{Clizia}—in which his misogynistic, misogynamic (and probably pederastic) stablemaster is punished by being “married” to a crossdressed boy. The play is thus on one level an aristocratic entertainment at the expense of a lower-class figure and an assertion of the duke's absolute power as both director and principal spectator of the practical joke, forcing the stablemaster to make a public spectacle of his “deviant” private life. At the same time, the beffa against the stablemaster expresses anxieties concerning female sexuality and the assimilation of women within what is presented as a primarily homosocial community. The stablemaster's sense of relief and release at discovering he is a castrone and not a husband underlines the fact that, unlike \textit{Eunuchus}, the play's dominant force is not desire but its specular image, namely revulsion. In this homosocial context women are perceived as a repugnant Other, heterosexual relations as perilous, and marriage as a perverse mode of self-punishment. The stablemaster, the most virile character in the play because un-effeminized by contact with the opposite sex, represents matrimony as a form of financial as well as sexual loss and women as repulsive, leaky vessels (their sexual organs good only for devouring and urinating).

\textit{Il marescalco} offers two further social variations on the castration topos: heterosexual bonding is represented as material deprivation and as political and military rape. While the stablemaster fears the complete erosion of his money, identified with his phallus, Ambrogio's comparison of marriage with “the devastation of Rome and Florence” reminds the audience of the most violent events in recent Italian political history: the Sack of Rome (1527) and the siege of Florence (1530), both perpetrated by the penetrative troops of Emperor Charles V. Aretino's violent publicization of private sexuality, taking the castration topos into the contemporary political and economic sphere, can be understood only in terms of two crucial structural characteristics of early Renaissance Italy: the dominance of a monetary economy and the prevalence of rival city-states. Renaissance Italy was a society of mercatores in which the circulation and accumulation of money created the first approximation of a modern consumer culture. What distinguished Italy from the rest of early modern Europe was, as Richard A. Goldthwaite has shown, the precocious rise of conspicuous consumption. The distinctive
objects of this newly fashioned consumption were luxury items, especially works of art and forms of entertainment, such as theater itself. The development of Italian Renaissance art, literature, and drama was directly related to the development of conspicuous consumption, which produced new sources of patronage. This was especially true in those city-states in which the mercantile economy and the circulation of money were most dynamic—Milan, Venice, Florence, and Genoa—and in the great centers of banking, above all Siena. Associated with this twin cultural flowering—the monetary and the artistic—was the rise of the academies which, in a sense, mediated between the two.

Siena, the birthplace of modern banking and thus one of the first great junctions of the circulation of capital, rivaled Florence as a venue for artistic endeavor, including drama, and as home to the new cultural academies, notably the Accademia degli Intronati, created around 1525. Among the Academy's activities, in addition to the cultivation of humanistic arts and civil conversation, was the writing and performing of plays. The first of these was the unfortunate allegory Il sacrificio, performed as a dubious Twelfth Night offering to the ladies in 1531 and consisting in the male performers' ritual burning onstage of the Epiphany gifts received from their female audience. Such was the outrage among the spurned ladies that the academicians were obliged to present, two years later, a reparative offering, Gl'ingannati, a comedy with a winning female protagonist.

The Intronati's Gl'ingannati, prototype of the Viola story and source of Twelfth Night, is thus the product of the cultural mediation between money and art, between the warring sexes, and likewise between rival city-states. Set in Rome immediately after the Sack of 1527, Gl'ingannati probably marks the decisive shift in Renaissance comedy towards female transvestism as the dominant mode of dramatic crossdressing. The reasons for this shift, apart from the reparative circumstances of the original performance and the play's consequent dramatization of a putative female revenge on men, may also have to do with the make-up of the company itself. A retrospective 1572 account of the Academy's recruitment of actors suggests that female roles were assigned to women. If this is the case, then the appearance of actresses in place of the more familiar boy-actors employed in the performance of early erudite comedy may have created the irresistible temptation to center a comedy on the plight of a crossdressed girl.

Gl'ingannati is a contamination of Terence's Eunuchus, Plautus's Menaechmi and Casina, and Bibbiena's Calandria, with a little help from Boccaccio. While borrowing the female-to-male-disguise device from Calandria, the play, unlike Bibbiena's comedy, places it at the center of the main plot, which is closer to Eunuchus. Indeed, Lelia, the Viola figure, might be said to merge the roles of Terence's lover, Chaerea, and his slave-girl, Pamphila, becoming simultaneously principal subject and principal object of desire and thus of the play's intricate series of physical and symbolic exchanges. Lelia, separated from her twin brother, Fabrizio—“lost” in the Sack of Rome—is desired by the old merchant Gherardo, to whom her merchant father, Virginio, has promised her in marriage. Lelia in turn loves young Flaminio, who, however, is enamored of Gherardo's daughter, Isabella. Lelia crossdresses—from her first appearance in the comedy—in order to enter Flaminio's service. Here, the new protagonist of the transvestite woman, who pursues her desires while she is herself the target of aggressive heterosexual and homoerotic attention: the amorous quadrangle is completed when Isabella (the Olivia figure) falls in love with the crossdressed Lelia.

As in La calandria, the emphasis of Gl'ingannati remains on the phallus, here as instrument of financial as well as erotic transactions, which become more or less synonymous. The sexual potency of Lelia's twin is represented by his hyperbolic member: “he's male enough to make two men” says Isabella's envious and voyeuristic merchant father (and indeed in a sense it must make two men, Fabrizio himself and his transvestite twin sister). This potency translates directly into the financial reward of Isabella's conquered dowry. Fabrizio, substituting for his “eunuch” sister, reaps Chaerea's sexual and social (which here means pecuniary) reward. In this hyperphallic and monetary context, the eunuchus topos marks a castration anxiety that is above all an economic-dispossession anxiety.
The society represented in the post-Sack Rome of *Gl’ingannati* is a fierce merchandise system, populated by avid old *mercatores* who dispose of their children as goods, and in which intercourse of all kinds has a primarily financial goal. The *castrato* is no longer a gift but a deprivation, no longer the signifier of its opposite but a direct omen of material loss: loss of the kind that the merchant Virginio has suffered in the play's opening and that the merchant Gherardo, Isabella's pantaloon father, finally suffers at the hands (or other bodily parts) of the well-endowed Fabrizio. It is the same kind of loss that Rome suffers in the play's contemporary historical setting at the hands of the all-penetrating Emperor Charles V. Siena smirks while Rome loses its manhood.\(^6^0\)

The model of exchange embodied in *Gl’ingannati* is one of sexual, financial, and military assault *disguised* as conversational courtesy and gentility. This, perhaps, is the real *inganno* or deceit of *Gl’ingannati*: namely the (successful) attempt by the Intronati academicians to pass it off as an exercise in Sienese cultural refinement, offered, so they claim in the prologue, as a gift to the ladies in the audience, as if the exchanges it dramatizes were all part of that humanistic *civile conversazione* to which the academy was officially dedicated. But its tribute to feminine protagonism and subjectivity turns out to be questionable at best. Lelia's one “private” soliloquy, in which she confesses unease at playing her male role, seems to be an early instance of feminine interiority in the Italian drama.

Oh, how I would deserve it [*come mi starebbe bene*] if one of these young rakes took me by force and, dragging me into some house, tried to find out whether I am male or female! That would teach me to go outdoors at this hour. … Oh what a cruel destiny is mine!\(^6^1\)

On closer inspection, Lelia's fantasy of having her gender verified through rape proves to be the projected desire of the salacious voyeurs in the play and the audience. In her one moment of apparent subjectivity, Lelia can define herself only as object of potential sexual violence.

Lelia's fantasy revisits from a supposedly female perspective Terence's dramatization of the pornographic gaze. The comedy likewise takes up the Terentian legacy of the slave as voyeur, although the servant role has been split from that of the lover and moved definitively to the margins, no longer central counter but envious spectator of these blatantly corporeal exchanges. The key episode—equivalent both to Chaerea's rape of Pamphila (with Lelia in the “passive” position) and to Viola's encounter with Olivia—is the frankly physical seduction scene between the passionate Isabella and the reluctant Lelia, which climaxes in a prolonged, passionate kiss between the two girls. The whole scene is framed by a grotesque *mise-en-scène* of the male gaze, as the couple is watched by two gaping servants who provide a running commentary on their own uncontrollable sexual response to the spectacle:

SCATIZZA

[Referring to Lelia] Kiss her, or may you get a cancer! …

CRIVELLO

[Seeing the girls kiss] Oh, oh, damn it, do the same to me. …

SCATIZZA

God's body, my leg is so swollen [*m’è infiata una gamba* = I have such an erection], I'm about to …

The servants' pornographic pleasure reworks Chaerea's slavish ogling of Pamphila's toilette and represents in turn a metonymy for the impossible phallic role Lelia has to perform: Scatizza's swollen “leg” acts out what Isabella supposedly desires but what Lelia cannot deliver until replaced by her twin brother. The dominant theatrical activity in *Gl’ingannati* is not performing but watching: it is male spectatorship as vicarious pleasure.
that determines the apparent freedom of the new female-to-male role-playing.

In later Italian versions of the story, the mercantile and mercenary nature of social *conversazione* is further accentuated by the restoration of Terence's courtesan figure and the consequent upscale bordello setting. The agents of exchange are no longer the lovers themselves but bawds and pimps, who manage a flourishing economy of present-giving and favor-selling in an open (street) market which travesties private amorous transactions. As Paul Larivaille has shown, the bawd was an indispensable figure of mediation, especially in Rome with its sixty-percent male population and its correspondingly vast numbers of prostitutes.\textsuperscript{63} In the *commedia* the bawd's mediation becomes a degraded version of courtly politeness, allowing the lovers and clients to reach their sexual goals without having to discuss the subject directly.

Thus Niccolò Secchi's *Gl'inganni* (1547), first performed in Milan before the duke but set in a colorfully vice-ridden Naples, adopts “conversation” as a euphemism for bartered sex, as in the plea of young Gostanzo, in love with the upper-class whore Dorotea: “I’ll do my best to find you sixty *scudi*, but on express condition that no one else be allowed to converse with Dorotea.” The obliging bawd responds: “And if that isn't enough, I'll have your rival castrated [io farò castrone] so you can be doubly sure.”\textsuperscript{64} The bawd's threat to castrate Gostanzo's rival, a rich old *dottore*, is a reminder of the extreme penalties for unpaid *conversazione* in a world where verbal intercourse is a simulacrum of real sex and its dangers. For the play's libidinous *signori* there is really no way out of their dire destiny, given that the longed-for and bartered-for sexual engagement turns out to be nothing other than a means of removing male possessions. Despite her promise to Gonzago, the bawd encourages Dorotea to milk the rich *dottore* both sexually and financially, freeing him of all his worldly attributes:

\begin{quote}
Well castrated [ben si castra], well milked,
Old man, mad man, who pricks [*pugne*] for love,
It's time for the nails to strike
And cut off his lard [*tagliarli giu le sugne*].\textsuperscript{65}
\end{quote}

Here the connotations of castration change again: it is no longer an omen of financial loss but, on the contrary, a metonymy (effect for cause) for sex itself as a mode of scrotum(= pocket)-emptying and perhaps also for syphilis, one effect of which is the erosion of the genitals.\textsuperscript{66}

Similarly, in *Gl'inganni* (1592), the version by the Mantuan Curzio Gonzaga, the courtesan Doralice, referring to the old merchant who brings her gifts, brags of her castrating ability as a professional skill: “The castrated beef [*il buò castronaccio*] drinks it all.”\textsuperscript{67} In Gonzaga's comedy castration is a risk that males run from birth. He doubles the story's doubles by having two sets of twins and by having one of each couple—one male and one female—crossdressed. The male twin's transvestism has been enforced since birth because of a bet between his father and a friend: whichever of them fathered a male child was to pay two thousand florins to the other if he in turn fathered a female. One of the friends fathered a boy, Leandro, while the other fathered different-sex twins, Scipione and Lucrezia; in order to win the bet, the twins' father cheated by disguising the male twin as a girl. Here the monetary implications of eviration are explicit: girls—luxury commodities—mean money, while boys risk surgery in the name of the father's wallet. The “losing” male child, Leandro, failing to distinguish between the real and the false Lucrezia, eventually falls in love with them both. The female twin in turn falls in love with Cesare, a refugee from Siena who is himself a crossdressed girl, Ginevra (the Viola figure).

The father figures in the comedy are also multiplied, there being three *vecchi*, all rich merchants, to be overcome by the young lovers. As a result, in Gonzaga's Rome there is among the younger males an understandable epidemic of castration anxiety, which begins to take on some Lacanian implications. The danger faced by Leandro is the knife-wielding wrath of Lucrezia's vengeful *papà* when he finds the young man “coupled” (*a coppiati*) with the biologically female twin: “Oh, poor Leandro,” exclaims Lucrezia's maid...
Filippa, “I think that old traitor, arriving at the wrong moment, will make a capon of him.”

Within this disconcertingly misandristic patriarchy, in which fathers mutilate boys and valorize girls, but only in terms of their cash value, it is not surprising that the crossed dressed Viola figure has some difficulty in acting the part of either sex. Ginevra makes a hash of playing Cesare because she is constantly fearful of getting caught out on one side or the other, her choice of destinies being either unappealing prostitution or a biologically redundant emasculation. Finally she is caught in the middle, perceived by the go-between maid as either hermaphroditic or already castrated:

CESARE

Maybe you thought I was a woman?

FILIPPA

Look, Cesare, if I didn't believe you to be a girl, I judged at least from your behavior that you were facesti del doppio, or that you were a eunuch.

CESARE

A eunuch? Ha, ha, you were really crazy, don't you think so now?

FILIPPA

I don't know what to think; if you let me touch it with my hand, I'll know I'm not talking nonsense.

In a sense this is Ginevra's salvation, since as a eunuc she avoids the dangers that await each sex. At the same time, however, the castrato topos, in contrast to its function in Terence, becomes a sign of the actor's failure, her inability to embody her chosen (phallic) role in a phallus-threatening community.

Ginevra's difficulties create the occasion, at least, for a more persuasive interiorization of the castration theme than Lelia's rape fantasy and thus for a more convincing mimesis of private passion. In the play's one ironically subjective moment Ginevra laments to herself that her financially ruined father, having forced her to play a masculine role, failed to provide her with the sexuality that would allow her to reciprocate Lucrezia's (homoerotic) desire: “[your father] made you dress as a man, without inducing you also to ardently love a female [una femina] such as this Lucrezia, victim of this wretched disguise [questo maledetto habito], while she, taking me to be a male, seems to pine for love of me.” Ginevra defines both her gender and her sexuality in terms of the lack of masculinity and thus herself as ineluctably Other in the brutally penetrative world into which she has intruded.

For all its subterranean violence, Gonzaga's play does display psychological insight and a dialogic agility that bring it close to Bibbiena's Calandria and also to Twelfth Night: among all the Italian analogues it is the play that most resembles Shakespeare's comedy in its discursive verve. If Bibbiena's play, and indeed Shakespeare's play, are dialectically related to The Courtier, Gonzaga's has genetic links both with Castiglione (who was himself related to the Gonzaga family and three of whose speakers, Cesare, Elisabetta, and Margherita, are Gonzagas) and with the later classic of Renaissance courtesy literature, Stefano Guazzo's La civile conversazione, published in 1574 and dedicated to Guazzo's patrons, the Gonzagas.

Like Castiglione, Guazzo posits as his discursive ideal the combination of courtesy and witty affability: “curteous language multiplieth friendes, and mitigateth enemies. … And as that is a signe of curtesie, so this is a token of wit”. And like Castiglione, he represents courtly conversazione in terms of the performance of comedy and, vice versa, defends comedy as one of the possible manifestations of “civility.” Thus La civile conversazione seems to take up all the courtly behavioral ideals of The Courtier, cast once more in a
dialectical relationship with comedy as their cultural double. Gonzaga's play, both culturally and geographically, seems to be the closest theatrical alter ego of Guazzo's Mantuan conversazione.

In reality, Guazzo's late-sixteenth-century Mantua was quite different from Castiglione's nostalgically reconstructed Urbino. Guazzo had to mediate between the court and the powerful mercantile middle classes, and his behavioral rules were directed less towards the cortegiano than towards the gentiluomo. Gonzaga's play similarly mediated between the aristocracy—written for a courtly elite and dedicated to the Mantuan Donna Marfisa da Este—and the wider society of mercatores represented in the comedy itself. Gonzaga's "conversational" reworking of the eunuchus topos seems to have allowed this social mediation to take place. But as in the case of La calandria and—as we will see—Twelfth Night, the play took on a frank erotic vitality of its own that far exceeded any merely decorous or conciliatory "diplomatic" function.

V. "I LACK YET AN HEADPIECE": NO SEX, WE'RE ENGLISH

The intimate, if conflictual, Italian dialogue between courtesy books and comedy about the representation of a new "civilized" culture was transmitted to Renaissance England, and the link between the two discursive genres remained the eunuch. The first and most important English courtesy book, Thomas Elyot's The Boke named the Gouernour (1531), in keeping with its recommendations of sexual abstinence and constancy, cites Terence's Eunuchus as a prime example of the educative and civilizing value of comedy:

First, comedies, which they suppose to be a doctrinal of ribaldry, they be undoubtedly a picture or as it were a mirror of man's life, wherein evil is not taught but discovered; to the intent that men beholding the promptness of youth unto vice, the snares of harlots & bawds laid for young minds, the deceit of servants. … And that by comedies good counsel is ministered, it appeareth by the sentence of Parmeno, in the second comedy of Terence. …

Between Elyot and Castiglione lie the effects of the Reformation. Elyot here follows Melanchthon's moralistic defense of Terence's comedy, whereby the vicious behavior represented in the play becomes an antidote to similar temptations in life. This homeopathic theory of comedy in a sense restores Terence's system of signification by opposition but reverses its terms: not eviration for lust but lust for the repudiation of desire. It also reverses responsibilities for the events: it is not Chaerea's rapist libido that is to blame but the snares of harlots and bawds.

This moral rehabilitation of the play as neutered source of the dulce et utile prepared the way for imitations in the vernacular. It may not be an exaggeration to claim that whenever comedy emerges as a genre within a given Western culture, it does so courtesy of castration. Not incidentally, the first "regular" comedies in English are all directly or indirectly derived from Terence's play: Nicholas Udall's Ralph Roister Doister (c. 1553) is based on Terence's secondary plot (Thraso's wooing of Thais); Nicholas Udall's Ralph Roister Doister (c. 1553) is based on Terence's secondary plot (Thraso's wooing of Thais); John Jeffere's The Bugbears (c. 1566) derives partly from Gl'ingannati and thus indirectly from Terence; and George Gascoigne's Supposes (1566) adapts Ariosto's Terentian commedia.

But where Italian comedy fully exploits, albeit with sprezzatura, the sexual energy of the Terentian model, post-Reformation English comedy allegorizes and domesticates it. Udall's prologue promises "under merry comedies secrets" the disclosure of "very virtuous lore" of a kind that "neither Plautus nor Terence did spare." Symptomatically, the object of Ralph Roister Doister's desires is not Thais or her Italian cortigiane equivalents but the English morality-play widow Dame Christian Custance. The traces of Eunuchus, apart from the braggart wooer himself, are the rituals of present-giving (Doister's rejected ring), the activities of go-between servants, a possible isolated and futile threat of rape, and the mild questioning of Roister Doister's capacity to "play the man's part." Playing the man's part is what Roister Doister is constitutionally unable to do. "I lack yet an headpiece," he confesses prior to the "women's war" in which he is definitively routed.
Ralph Roister Doister rewrites Eunuchus as a moral allegory on the vanity of male desire and the Elyotian value of female “custance,” or chastity. But not all sixteenth-century English readings of Terence's play were so benevolent. The Oxford moralist and antitheatrical polemicist John Rainolds, in one of the most incisive critical commentaries ever written on the play, takes the opposite view, namely that The Eunuch represents the dangerous sexual potency or potentiality of transvestism; and that, far from encouraging private virtue, it is an exhibition of, and incitement to, public vice:

If you can; then ought you beware of beautifull boyes transformed into wom putting on their raiment, their feature, lookes and facions. For men may be ravished with the louse of stones, of dead stuffe, framed by cunning grauers to beautifull womens likenes; as … Chaerea, arrayed like an Eunuch onely, did move the beastlie lust of him who was lasciviouslie giuen in the Comedie.81

Rainolds, writing in 1599 with the professional all-male theater companies in mind, makes the valid point that it is Chaerea's very disguise that releases his “beastlie lust,” a metatheatrical interpretation Rainolds develops in his acute analysis of the rape scene:

For let malefactours bee never so ready to practise any wickednes of their owne corrupt and lewde inclination: the circumstances of maner, season, place, and so foorth, commodious to performe it doe more entise them therevnto. Weapons them selves (saith Homer) doe draw men to fight: and opportunitie maketh theeves. … as Chaerea could not haue defiled Pamphila, no not in Thais house, without his Eunuches raiment.82

Chaerea's supposed lack of “weapon” becomes his tool: the actor's crossdressed performance creates the occasion for the representation and transmission of desire, the moving of beastly lust in performer and spectator alike.

Here, then, are two opposing views of the Terentian castration legacy: as private moral purification or as public erotic provocation. However unpleasant Rainolds's conclusion to avoid the theater, there is little doubt that he has understood better than Renaissance apologists for Terence the potentially transgressive force of the castrate ploy, which he rightly identifies as a trope for performance in general. Rainolds's Th'overthrow of stageplays appeared the year after Bernard's English translation of Eunuchus and two years or so before the first performance of Twelfth Night, a comedy that did not, perhaps, altogether assuage his qualms regarding the perilous ambiguities of the “Eunuches raiment.”

VI. SMALL PIPE, BIG VOICE

Viola's fleeting “as an eunuch” allusion thus bears the unsuspected weight of a cultural history in which, according to the social context and ideological values of the drama, castration comes to figure by turns the threat or exorcism of infertility; the crossing of gender boundaries; the transcendence or realization of sexual desire; the condition of slavery; the “archaic” economy of total prestation; the modern economy of symbolic exchange; financial, political, or military dispossession; the practices of sodomy or prostitution; the effects of venereal disease; the perils of matrimony and the humiliation of cuckoldry; the virtues of female chastity; the socioeconomic development of the adolescent; and the hierarchical separation or vertical mobility between the social classes. At the same time, the stage castrate takes on more strictly theatrical or performative values within the history of comedy itself: the performance of a fictional role; the professional skills of the actor; the voyeuristic gaze of the audience; and the seductive eroticism of histrionic crossdressing. Above all, the eunuchus is a point of tension or mediation between these two competing and sometimes conflicting histories, the social and the dramatic.
The final mediation of the castration topos on its journey towards Twelfth Night comes about through the narrative versions of the Viola story, particularly Barnaby Riche's romance “Of Apolonius and Silla” in Riche His Farewell to Militarie Profession (1581), perhaps the play's most immediate source. Riche, via Bandello and Belleforest, provides two variations on the castration topos. The first revisits the Ariostan scenario of dismemberment during a maritime voyage by narrating the failed rape of Silla by the Sea Captain. The Captain's unfulfilled infatuation with Silla is first figured in the familiar trope of disarmament: “My captaine … was like to bee taken prisoner aboard his owne shippe, and forced to yeeld hymself a captive without any cannon shot.” The planned rape is then thwarted through the deus ex machina intervention of a storm, in which Silla is saved from drowning by a floating “cheste that was the captains.”

Riche's second, more explicit re-elaboration of the eviration topos takes the opposite form—the attribution of improbable powers of penetration and impregnation to Silla herself. Charged with impregnating Julina (the act of her twin brother, Silvio), Silla reflects bitterly on the “impediment” that disables her from doing so in fact: “was not this a foule oversight of Julina, that would so precisely sweare so greate an othe that she was gotten with childe by one that was altogether unfurnishte with implements for suche a tourne?” Silla, accused of being a fertile eunuch, seems to regret being “unfurnishte with implements” as much as she does Julina's accusation. Ironically, by way of revenge against her accuser, it is she—or rather “he,” the false “Silvio”—who delivers the narrative's equivalent of the misogynistic Pallavicino-Orsino speech on female sexual incontinence: “… halfe in a chafe he [sic] saied. What lawe is able to restraine the foolishe indiscretion of a woman that yeeldeth herself to her owne desires? … with what snaffell is it possible to holde her backe from the execution of her filthinesse?”

Revelation of the phallus's absence is comically explicit in Riche, whose Silla-Silvio performs a striptease for Julina to show her what he both possesses (“his breasts”) and lacks (the guilty “partie”): “And here with all loosing his garmente doune to the stomacke, and shewed Julina his breasts and pretie teates … saiyng: Loe, Madame! behold here the partie whom you have chalenged to bee the father of your childe.” For Julina this display is disconcerting; if Silla perceives herself/himself as merely “unfurnishte,” or furnished only with pretty teats, Julina, who has already verified Silvio's virility, finds herself in the embarrassing position of Bibbiena's Fulvia, convinced that her lover is a hermaphrodite: “Julina did now thinke her self to be in a worse case then ever she was before.”

In Twelfth Night, by contrast, there is no striptease, since Viola remains dressed as a “boy” until the play's end; no dismembered predatory sea captain (transformed into the chivalric Captain of the “as an eunuch” exchange); no Ariostan trunk; and no imprisoning of the fertile eunuch (this fate is reserved for Malvolio). Twelfth Night similarly does away with sodomitic fireworks, vengeful voyeuristic merchant fathers, erectile scopophilic servants, devouring whores, busybody bawds, and the whole commedia apparatus of more or less brutal physical engagement and crude sexual bartering.

So what remains of this cultural history beyond Viola's single cryptic allusion? What appears to remain is discourse. Twelfth Night seems to enact a discursivizing—one is tempted to say a “civilizing”—of the often violent sexual and social intercourse of its antecedents. Indeed, from this point of view, Twelfth Night might be said to be more Italian than its Italian models, closer to the ideal of “civil conversation” as the interplay of ironical and persuasive wit. The relation of the play's discourse to the conversational and ideological texture of The Courtier is in many ways more direct than that of La calandria or its commedia offspring.
As a result the comedy's mimesis of intimacy is more persuasive than that of its Italian analogues, especially because it greatly extends the interiorization or privatisation of desire sketched out in Gl'ingannati and developed in Gl'inganni. Viola's dismay at the erotic effects of her disguise in 2.2 echoes the moments of confessional solitude in which her predecessors reveal their unease at playing their disguise role (Lelia's rape fantasy and, more closely, Ginevra's complaint at her maledetto habito):

I am the man: if it be so, as 'tis,
Poor lady, she were better love a dream.
Disguise, I see thou art a wickedness,
Wherein the pregnant enemy does much.

(2.2.24-27)

But in fact her reflection on the incongruity of her role goes much further than Lelia's ambivalent wish to be found out or Ginevra's lamented deficiency of male desire. As her “male” performance begins to vacillate—appropriately enough, when she is faced with the phallic task of fighting a duel (albeit with the scarcely macho Sir Andrew)—Viola wittily signals her inadequacy in terms of the absent phallus: “Pray god defend me! A little thing would make me tell them how much I lack of a man” (3.4.307-9). Viola's gentle allusion (“little thing”) suggests the sophisticated self-awareness of her discourse compared to the heavy sexual allusions of the play's forebears, just as her symbolic substitution by her twin (who takes her place as sword-wielding duellist) is far subtler than the appearance, say, of the literally hyperphallic Fabrizio in Gl'ingannati.

Twelfth Night may therefore be said to effect the definitive Lacanian passage from the “natural” law of coupling to the law of symbolic interchange. And yet this may not be the whole story of Viola and her eunuch, whose impressively Castiglionic credentials may themselves disguise more public, less polite aspects of her role and its cultural history. First, the social and ideological implications of Viola's performance extend far beyond the restricted confines of courtly civility. Indeed, the very closeness of the play's relations with The Courtier and later courtesy books such as La civile conversatione has a negative social fallout regarding Viola's own social position. Castiglione's concept of feminine corteziania is strictly limited to the class of people present at the Urbino conversations, namely the aristocracy or, at the least, the highest of the landed or clerical classes, just as Guazzo's “civility” is restricted to the gentry. Viola, instead, enters Orsino's court not as his social peer—not as an Elisabetta Gonzaga or indeed as an Olivia—but as a servant (“I'll serve this duke”). Although her own social origins are somewhat fuzzy, there are clear indications that she and Sebastian, as Olivia suspects, are of “gentle” blood, and that her disguise is thus a dressing-down rather than a dressing-up, a form of cross-class as well as cross-gender transvestism; as Barber puts it, “gentility shows through her disguise.”

In a play dominated by the compulsive drive towards upward social mobility (the efforts of Malvolio, Sir Andrew, Maria), Viola knowingly, if necessarily, steps down on the social scale at the very moment in which she approaches its apex, the court of Illyria. It is this act of social self-disguising that most immediately realizes her “as an eunuch” plan, the eunuch being by tradition a (usually low) servant within a (usually high) household. It is also Viola's closest “political” link with Terence's Chaerea, who makes the same temporary move down the social scale.

The implications of Viola's downward mobility are accentuated by the dramatic history of her inherited story. For all its “Italian” discursive wit, the play, unlike many other Shakespearean comedies, is not set in Italy. As has often been noted, and frequently translated into stage practice, the mythical Illyria unmistakably resembles the rural England of landed gentry and country mansions far more than it does any Mediterranean court society. We are even further removed from the mercantile society of the city-states that in the Italian analogues gives the castrato trope its energy and its peculiar monetary coloring. Shakespeare eliminates the
commedia merchants and their frenetic sexual-financial transactions: in Cristina Malcolmson's words, “the play relentlessly excludes the figure of the merchant, although in the sources, the father of Viola and Sebastian is almost always a merchant, and frequently the father of Olivia is so as well. … The play cannot afford the figure of the merchant because such a social role does not fit clearly enough into the traditional hierarchical order of servant and master.”

The world of Twelfth Night is a society not of Italian mercatores but of thinly disguised English possessores, a rigidly hierarchical order dominated by landowners (specifically, Orsino and Olivia) that reflects the far more static socioeconomic reality of early modern England compared with that of early modern Italy. As Richard A. Goldthwaite comments, “Italian society was subject to a dynamic of change unlike that of any other in Europe. Elsewhere, wealth was predominantly in land and therefore less subject to instability; it was largely in the hands of a closed caste that experienced less mobility.” “Elsewhere” means England above all. Thus Viola's self-enrollment in the ranks of the “English” servant classes is more restricting and more dangerous—because potentially more permanent—than the interclass comings and goings of Lelia and Ginevra within their more mobile social contexts. If the stakes of the disguise game are higher, so are the rewards: as in Eunuchus, self-relegation translates, finally, into self-promotion, since Viola is presumably destined to become “duchess” or “countess” of Orsino's Illyria.

Within this relatively static hierarchy of actual and would-be possessores, however, Viola is not alone in her dispossession. In addition to the focusing of the eunuch topos on Viola, there is in Twelfth Night, as in Eunuchus, a dissemination or contaminatio of the castration topic outward from the center, involving particularly the comedy's gulls. Thus the financial milking and fall from illusory social grace of Sir Andrew Aguecheek—a specular image of Viola's movement from self-relegation to social promotion—is figured in a series of insinuations regarding his impotence and effeminization, from Maria's “dry jest” and “now I let go your hand, I am barren” (1.3.75, 78) to Sir Toby's ambiguous description of Sir Andrew's lank hair (1.3.99-101), which seems to evoke an erotic encounter but in fact equates the flaccid Aguecheek with the distaff, symbol of the female. Sir Andrew confirms these innuendoes in his “thrasonical” reluctance to use his masculine weapon in the duel with Viola-Sebastian.

As for Malvolio, the clues to his “castrate” status are more cryptic, like the letter in which they are hidden. As John Astington has recently pointed out, the “some are born great” passage in the false billet doux from Olivia (2.5.145-46) seems to be modeled on Christ's speech to his disciples on marriage, with its distinction between three kinds of “eunuch,” that is, three kinds of impotence or celibacy. The implicit suggestion is that Malvolio himself—who, like Sir Andrew, will fail to marry Olivia and thus to achieve social promotion—belongs to this category, and indeed his public humiliation can be read, in Astington's words, as “a displaced gelding.”

Castration therefore takes on in Twelfth Night some of the broader significance that marks its dramatic career and that establishes it as a point of contact and attrition between opposing social forces. But the comedy also bears traces of that other, more strictly theatrical or metatheatrical history of the eunuchus as triumphant self-transcending performer, as shameless seducer of audiences, as ambiguous object of the desiring gaze. And these traces are present from Viola's first appearance in her male disguise. Viola's second scene, 1.4, in which she has already successfully established her place in Orsino's court and Orsino's affections, is usually taken to indicate her immediate abandonment of her “eunuch” role, since Orsino addresses her as “good youth” (l. 15) and “dear lad” (l. 29), just as he later calls her “boy” (2.4.14 and passim) and treats her as a young male servant: “The Duke's attitude to Cesario … shows that Viola has not entered his service in this [eunuch] character but as a page.” This raises the question, however, as to how Orsino, or for that matter the audience, is to distinguish between a young woman dressed as a young boy (or, on the Elizabethan stage, a boy dressed as a woman dressed as a boy) and a young woman dressed as a young castrated boy. What signs might mark out one from the other? And why, in any case, should Orsino not treat Cesario as a male servant, which—whether as page or as eunuch—is what he is? Should he address Viola as “good castrate” or “dear
eunuch”?

But Orsino's, and our own, perception of Cesario as fully “male” is open to question on more than negative grounds (lack of contrary evidence); in fact Orsino does refer quite overtly to Cesario's dubious manhood, calling our attention to the very ambivalence of the “good youth's” appearance:

For they shall yet belie thy happy years,
That say thou art a man; Diana's lip
Is not more smooth and rubious: thy small pipe
Is as the maiden's organ, shrill and sound,
And all is semblative a woman's part.

(1.4.30-34)

Orsino's description of Viola's corporeal and vocal ambiguity is itself strikingly ambiguous. His questioning of her manhood is stated initially in terms not of gender but of age (“belie thy happy years”): it is Cesario's transitional adolescent state that belies his manhood: “Not yet old enough for a man, nor young enough for a boy,” as Malvolio puts it in the following scene (1.5.158-59). A great deal of recent critical commentary, however, has stressed Orsino's barely disguised interest in the androgyny of Viola-Cesario's body as object of his charmed gaze.99 And yet what is most prominent in Orsino's depiction of his servant is not so much the object of his fascinated gaze, Cesario's body, as the object of his enchanted audition, Cesario's voice: “Thy small pipe … shrill and sound.” This brings us back once more to Viola's earlier speech.

Although, as we are constantly being told, it is never put literally to the test, Viola's claim “for I can sing” associates her eunuch role with a specific early modern performative (not to mention surgical) practice. Viola's musical concept of her disguise suggests that what she has in mind is not, as is sometimes supposed, an eastern slave but rather a contemporary Western evirato, a category of soprano singer much in vogue in turn-of-the-century Europe,100 as, for example, in the Sistine Chapel, where the castrati singers had by 1600 virtually replaced all the old falsettisti or male sopranos. The “sacred capons” had arrived in church choirs in Spain, Portugal, Germany (at the Munich chapel), and possibly in England, although officially banned.101

Castrato singers were operated on before puberty, thereby preventing both the thickening of the vocal cords and the development of the primary sexual organ. This cultural and medical phenomenon was due originally to the fact that women—following a restrictive interpretation of St. Paul's First Letter to the Corinthians enjoining women to be “silent” in church—were prohibited from singing in places of worship and later, by extension, on the early operatic stage. It then rapidly became a fashion, thanks in part to the castrato's unique combination of wide vocal range with greater volume and agility than women or boy sopranos could rival; and thanks especially to the undoubted fascination that the androgynous singer, endowed with male/female body and voice, exercised over auditors of both sexes. Given the spectacular success of the castrati, it is fair to suppose that Viola's goal of self-elected unsexed “singer” is not a form of impotence but a mode of power, an irresistible appeal for her dramatic and theatrical audiences.

It is at this point that Viola's disguise as a metaphor for the privé becomes, on the contrary, a mode of public exhibition. As well as focusing attention on her voice and offering a plausible explanation for its unmusical highness,102 Viola's self-unfashioning as castrato foregrounds her role as a particular and novel form of theatrical performance. The evirato was practically synonymous with operatic theater, which arose partly in order to put the new professional castrato singers on public display. Iacopo Peri's Euridice, for example—first performed at the Pitti Palace in Florence on 6 October 1600 to celebrate the marriage of Maria de' Medici to Henri IV of France—was composed for and around two castrati, pupils of the opera's music director, Emilio del Cavalieri: one (probably “Fabio”) in the roles of Venus and Persephone, the other (“Giovannino”) in the role of Tragedy.103 What Viola seems to be laying claim to, in any case, is a similarly important role in what is, in effect, an intensely musical piece of entertainment.104
Orsino, duly captivated by Viola's discursive music, comments on her body and voice in appropriately musical terms, playing, in a series of stunning multilayered puns, on Viola/Cesario's state of suspension between the conditions of prepubescent male (as actor), fully grown female (as dramatis persona), and castrato singer (her disguise role): Cesario’s “small pipe” is at once the treble voice and undeveloped member of the boy actor, which is simultaneously “as a maiden's organ,” female vocality and genitality together; and the overall effect (“all”) is that of a woman’s “part,” that is, sex, voice, and dramatic role. But at the same time, the peculiar combination of small pipe (Viola’s “little thing” revisited from an anatomical rather than psychological viewpoint105), shrill voice, and “semblative” a woman's part or maiden's organ—an absence of other visible male appendages—is precisely the somatic and professional privilege of the evirato singer.

Orsino’s punning infatuation with Viola's small pipe recalls, or perhaps anticipates, the many sexual legends that grew up around the castrati as much sought-after heterosexual and, still more, homosexual fetish objects.106 The fact that Olivia is equally captivated by Cesario's corporeal and vocal charms (“Thy tongue, thy face, thy limbs …” [1.5.296]) doubles the stakes of the game and confirms the spectacular triumph of Viola’s “musical” seduction. The very scenes in which Viola puts into effect her abnegation and self-mortification—concealing her desire for Orsino or acting as go-between for Orsino's desire towards Olivia—are the scenes in which she achieves erotic dominion over both as captivating castrato. Her eviration is simultaneously an act of sexual self-denial and an exercise in irresistible sexual allure.

The evirato allusion not only rehistoricizes the emasculation topos in terms of early modern performance but restores something of its Terentian force, shifting our perspective from the figurative to the literal, from the imaginary missing phallus of the castration complex to the surgically removed testicles of the unmanned servant. Moreover, it recuperates the full theatricality and centrality of the eunuch role itself with all its paradoxical erotic force. Viola, like Chaerea, becomes an exchange or gift-object, expression of another's desire—Chaerea's eunuch-gift is the expression of Thraso's supposed desire for Thais—but she is able to use her “sexless” servant role to realize her own desire towards her master. Not by chance, Twelfth Night is the first comedy after Eunuchus whose protagonist declares explicitly and voluntarily at the outset her intention to adopt this challenging and dangerous “part.”

Thus Shakespeare presents two apparently opposed behavioral and performative models in Twelfth Night—one private, polite, disembodied, the other public, theatrical, and erotically corporeal—which come together, courtesy of Viola's castrato, to form a single, extraordinarily dense piece of role-playing. The two kinds of historicity mediated by Viola's “eunuch,” the social-synchronic and the dramatic-diachronic, prove to be reciprocally enriching dimensions of symbolic exchange. To collapse one into the other, and thereby reduce the problematic complexity of the comedy's intercourse, would surely be an act of critical castration.

27. As Barbara Freedman says, “What Lacan refers to as ‘castration’ is the loss in sexuality resulting from the inevitable mediation of desire by signification” (“Frame-Up: Feminism, Psychoanalysis,
30. See, for example, Aristophanes's literary burlesque Thesmophoriazousae (411 bc), which includes what is in effect a farcical symbolic castration rite: the protagonist Euripides has his own kinsman Mnēsiloχus ritualistically depilated so that he may impersonate a woman at the thēsmophoria (festival of women) and thus rescue the playwright from a death sentence imposed for his misogynistic treatment of women in his tragedies. The Thesmophoriazousae sets up a conflict between the phallophoria, dedicated to Dionysus, and the thēsmophoria, dedicated to Demeter and Persephone, who preside over a “carnival” parenthesis of female power. And indeed the women gathered for the religious festival take up the castration theme in a mocking assertion of their superiority: while they have kept their distaff (κανόν), the men have lost their spear shaft (κανόν) and shield (σκιαδέιον). Here the “castrate” becomes an object of political mediation and of cultural exchange. What the comedy, and in particular its unmanning trope, seems to enact is a mode of social transformation that foreshadows the early modern process of Zivilisation or privatisation. At the same time, the castration topos takes on clear theatrical implications, representing the actor's surrender of his subjectivity in taking on a role, especially a female role in an all-male mode of performance such as that of the Greek stage: “The play with castration,” as Froma I. Zeitlin puts it, “is appropriate enough to the inversion of roles, but the ambiguities of role-playing involve both this and that, even for Mnēsiloχus, who plays so ill and, by his misplaying, exposes, when the women expose him, the limits of mimesis” (“Travesties of gender and genre in Aristophanes' Thesmophoriazousae” in Reflections of Women in Antiquity, Helene P. Foley, ed. [New York and London: Gordon and Breach Science Publishers, 1981], 169-217, esp. 179).
33. Carlin A. Barton, The Sorrows of the Ancient Romans: The Gladiator and the Monster (Princeton, NJ: Princeton UP, 1993), 72-73. Compare Quintilian's proverb “Libidinosior es quam ullus spado”: “You are more libidinous than any eunuch” (quoted in Barton, 72). Basil of Ancyra in the fourth-century De virginitate warns virgins not to trust eunuchs, saying that those castrated in adulthood “burn with greater and less restrained desire for sexual union, and … not only do they feel this ardour, but they think they can defile any woman they meet without risk” (quoted in Rousselle, 123).

44. Giorgio Padoan has suggested that “Castiglione's” prologue is really by Bibbiena himself; see Clubb, “Castiglione's Humanistic Art and Renaissance Drama” in *Castiglione: The Ideal and the Real in Renaissance Culture*, Robert W. Hanning and David Rosand, eds. (New Haven, CT, and London: Yale UP, 1983), 191-208.
45. Castiglione, 154ff.
48. See Freud's account of the little boy who discovers his mother's or sister's lack of a phallus: “It is self-evident to a male child that a genital like his own is to be attributed to everyone he knows, and he cannot make its absence tally with his picture of other people” (*Three Essays on Sexuality: II. Infantile Sexuality*, trans. and ed. James Strachey [New York: Basic Books, 1979], 60).
49. Bibbiena, k1v-k2v.
50. “Fessenio: … they don't fit if you don't cut off their hands, arms, and legs according to need. … Then once you get into the port, anyone who wants to takes back his member and screws it back on. It often happens that, inadvertently or maliciously, someone takes another's member and puts it where he likes best; and sometimes it doesn't work out because he takes a member which is bigger than his own” (Bibbiena, e4r).
51. Bibbiena, g2v and k4v.
52. “Maco: I'm dead. Escape, escape, the Spaniards have made a hole in my behind with their sword: where shall I go? where shall I flee? where shall I hide? … The Spaniards have cut me to pieces” (*La cortigiana* in *Tutte le commedie*, ed. G. B. De Sanctis [Milan: Mursia, 1968], 113-223, esp. 207 and 219, my translation). Aretino's closest adaptation of *Eunuchus* is *La Talanta* (1537), in which the courtesan Talanta—directly modeled on Terence's Thais—is courted by three *innamorati*: the earnest young Orfinio (the Phaedria role), the *miles gloriosus* Captain Tinca (Thraso), and the old Venetian miser Vergolo (Aretino's addition), receiving gifts from each suitor. The play's derivation and departures from Terence are raised explicitly by Orfinio's disclaimer to Talanta: “I who am not Thais's Phaedria …” (*La Talanta* in De Sanctis, ed., 335-462, esp. 365, my translation).
53. Ben Jonson's *Epicoene* (1609) revisits *Eunuchus* via *The Stablesmaster*, reworking the duke of Mantua's prank against his stablemaster in the form of the marrying-a-boy trick played by Dauphine on his uncle, Morose. From Terence, via Aretino, Jonson inherits the trope of castration as social epidemic: not the political corruption of Rome or the universal sodomy of Mantua but the generalized gender reversal that afflicts contemporary London. The play's transvestite plot, presided over by the ominously named Cutbeard, who finds Morose a silent “wife,” enacts such reversals through the exchange of the play's floating signifier, the phallus. Like the stablemaster, Morose is obliged, in order to be free of his wife, to make a public confession before the “Ladies” of his congenital (or perhaps nongenital) lack of attributes (*Ben Jonson*, ed. C. H. Herford and Percy and Evelyn Simpson, 11 vols. [Oxford: Clarendon Press, 1925-52], 5:141-271, esp. 264-65). Jonson might be said to extend the castration trope to the audience, keeping his spectators in the dark regarding Dauphine's trick until
the very end and thereby leaving them as disarmed as Morose himself; see Laura Levine, *Men in women's clothing: Anti-theatricality and effeminization, 1579-1642* (Cambridge: Cambridge UP, 1994), 76-77.

54. The Sack of Rome, in which German soldiers besieged the Papal stronghold of Castel Sant'Angelo before being forced to withdraw due to the plague, was perhaps the most traumatic event in early modern Italian history and is described by Aretino himself in the *Sei giorni* (1534) precisely as the mass rape of nuns by invading soldiers, caused by the pope's sodomistic predilections. As James Grantham Turner has commented with reference to the *Sei giorni*, “The ‘public’ realm of the Sack and the ‘private’ realm of sexuality encode one another. The violated woman became a figure for the devastation of the city, while the Sack itself was conceived in sexual terms; before and after the event, Rome was represented as a new Sodom destroyed on account of the pope's affairs with men” (“Introduction: A history of sexuality in *Sexuality and Gender in Early Modern Europe: Institutions, texts, images*, James Grantham Turner, ed. [Cambridge: Cambridge UP, 1993], 1-9, esp. 2).

58. The Academy was devoted to “exercises in vulgar as well as Greek and Latin letters, reading, disputing, composing, interpreting, writing, and doing everything one usually does in order to learn. … And with the firm resolution to pretend not to understand or care about anything else in the world, they were pleased to take the name *Intronati*” (Prologue to the constitution of the Academy, quoted in *Teatro del Cinquecento*, Vol. 2 of *Il teatro italiano*, Guido Davico Bonino, ed., 19 vols. [Turin: Einaudi, 1977-91], 444, my translation).

59. “[The academicians] said that this woman would have imitated well the part of a servant, this other a matron, that young man a parasite, that other a lover, and so went around distributing all the parts that are required in a comedy” (G. Bargagli, *Dialogo dei Giuochi che nelle vegghie senesi si usano di fare* [Siena, 1572], 84-85, quoted in Bonino, ed., 445).

60. It might be noted that the Intronati performed Piccolomini's comedy *L'amor costante* for the “invader” Charles V on his visit to Siena in 1536.

86. Compare Rosalind's equivocation in her/his epilogue: “I am not furnished like a beggar” (As You Like It, ed. Agnes Latham [London: Methuen, 1975], 5.4.206-7).
89. Riche in Bullough, ed., 361.
91. The trunk is discursivized in Viola's implicit reference at the end of the play: “The captain that did bring me first on shore / Hath my maid's garments” (5.1.272-73). Kemble introduced the trunk as
stage property, adding the lines “That trunk, the reliques of my sea-drown'd brother, / Will furnish man's apparel to my need” —which Kemble changed to “as a page”—speech (John Philip Kemble Promptbooks, ed. Charles H. Shattuck, 11 vols. [Charlottesville: UP of Virginia for the Folger Shakespeare Library, 1974], 9:6).

92. According to Barbara Freedman, Sebastian “replaces her as the ultimate possessor of the maternal object” (“Separation and Fusion in Twelfth Night” in Psychoanalytic Approaches to Literature and Film, Maurice Charney and Joseph Reppen, eds. [Rutherford, NJ: Fairleigh Dickinson UP, 1987], 96-119, esp. 115).

94. See Jones in Romano and Vivanti, eds., 200-229.

95. Goldthwaite, 671.

96. “For there are some eunuchs, which were so born from their mother's womb: and there are some eunuchs, which were made eunuchs of men: and there be eunuchs, which have made themselves eunuchs for the kingdom of heaven's sake” (The Holy Bible [Oxford: University Press, 1970], Matthew 19:12). See John Astington, “Malvolio and the Eunuchs: Texts and Revels in Twelfth Night,” Shakespeare Survey 46 (1994): 23-34.

97. Astington, 26. Compare Laurie E. Osborne's Lacanian reading of the letter, which arrives at a similar conclusion from a quite different perspective: “In possessing the letter, Malvolio is feminized, losing his masculine attributes without knowing it while taking on himself the mystery of the signifier” (74).

98. Lothian and Craik, eds., 1.2.56n.

100. Among other explicit Shakespearean references to eunuchs, there are two allusions to the castrated singer, one in A Midsummer Night's Dream (ed. Harold F. Brooks [London: Methuen, 1979], 5.1.44-46): “Theseus: [Reads.] ‘The battle with the Centaurs, to be sung / By an Athenian eunuch to the harp’? / We'll none of that”; and the other in Cymbeline (ed. J. M. Nosworthy [London: Methuen, 1955], 2.3.27-31): “Cloten: So get you gone: if this penetrate, I will consider your music the better: if it do not, it is a vice in her ears, which horse-hairs, and calves'-guts, nor the voice of unpaved eunuch to boot, can never amend.” Note, in this context, the probable pun on penetrate.

101. On the evirati singers, see in particular Angus Heriot, The Castrati in Opera (London: Secker and Warburg, 1956), and Patrick Barbier, Histoire des castrats (Paris: Éditions Grasset et Fasquelle, 1989); other relevant studies include E. Celani, I cantori della Cappella Pontificia nei secoli XVI-XVIII (Turin: Bocca, 1909); G. Monaldi, Cantanti evirati celebri del teatro italiano, secoli ...

104. It may be merely historical coincidence that among the aristocratic auditors present at this performance was Orsino, Duke of Bracciano, who shortly thereafter set out for the court of Elizabeth I, and whose relationship to the Orsino of Twelfth Night has long been the subject of controversy; see Leslie Hotson, The First Night of Twelfth Night (London: Rupert Hart-Davis, 1954), 47-49. Hotson's suggestion that Twelfth Night was performed on the occasion of Orsino's visit to Elizabeth has not been widely accepted.

105. Compare Sonnet 20, in which the poet blazons the fair youth as a woman—“And for a woman wert thou first created”—to whom Nature has added “one thing to my purpose nothing.” Stephen Booth glosses “thing” as “(2) generative organ” and “nothing” as “vulva” (Shakespeare's Sonnets [New Haven, CT, and London: Yale UP, 1977], 21 and 164). There may also be a pun on “Gilding/gelding” (l. 6). The poet, as it were, mentally “castrates” the youth, whose situation—as simultaneous object of the desiring male gaze and of female passion (“Which steales mens eyes and womens soules amazeth”)—recalls Viola's two-way “seduction.”

106. See Barbier, 125-44. The (continuing) sexual as well as musical fascination exercised by the evirati is attested to by Gerard Corbiau's recent film Farinelli (1995).

Criticism: Themes: John Kerrigan (essay date 1997)

[In the following essay, Kerrigan studies Twelfth Night within the context of the Renaissance conventions regarding secrecy and gossip, finding that gossip is a means—both in early modern society and in the play—of maintaining social bonds. Kerrigan also discusses the affinity between Cesario and Malvolio, noting that as servants both characters are expected to be discreet.]

Renaissance secrecy is no longer quite as secret as it was. Art historians and iconologists have returned to the myths and emblems explored by Panofsky and Edgar Wind, and reassessed (often sceptically) their claims to hermetic wisdom. Thanks to Jonathan Goldberg and Richard Rambuss, we now have a better understanding of the early modern English secretary,¹ and of how his pen could produce, in Lois Potter's phrase, Secret Rites and Secret Writing.² Not just in popular biographies of Marlowe and Shakespeare,³ but in such Foucauldian accounts of high culture as John Michael Archer's Sovereignty and Intelligence,⁴ the world of Renaissance espionage is being analysed afresh. William W. E. Slichts has written at useful length about conspiracy, fraud and censorship in middle-period Jonson.⁵ And, though the tide of Puttenham studies has now begun to ebb, students of Elizabethan England are still profiting from the work done by Daniel Javitch and Frank Whigham⁶ on what The Arte of English Poesie calls ‘false semblant’ or ‘the Courtly figure Allegoria’⁷—a line of enquiry
which leads back to the civilized dissimulation advocated by Castiglione, but also to the politic ruthlessness of
‘l’art machiavélien d’être secret’.\(^8\)

These investigations have not advanced in a state of mutual ignorance, but they have, inevitably, suffered
from a degree of exclusive specialism. What interests me, on the other hand, is how different modes of
concealment operated together. Certainly, I have found it impossible, in thinking about *Twelfth Night*, to
separate iconography from secretarial inscription (as when Malvolio unpicks the Lucrece seal of silence on
Maria's riddling letter), or to divorce Sebastian's intelligence-gathering, among ‘the memorials and the things
of fame’ in Illyria,\(^9\) from that rhetorical discretion in him which is equally recommended in courtesy
literature.\(^10\) At the same time, *Twelfth Night* pushes one's perception of Renaissance secrecy beyond the usual
categories. It makes one return, for instance, to courtesy literature to notice what it says about that irregular
but ubiquitous practice, the circulation of secrets as gossip, and to wonder how the gendered speech-patterns
which Castiglione and his successors discuss might bear on the reticences and self-concealments involved in
the construction of sexual identity.

By gesturing towards social practice, I am, of course, begging questions, and it is worth saying, at once, that
Elizabethan London was not, in my view, full of cross-dressed maidens in love with Dukes. There is plainly
much to be said against the current historicist tendency to discount the made uniqueness of particular
Shakespearian play-scripts for the sake of readily meshing them with circumstantial contexts. Formalist
criticism had its drawbacks, but its respect for the artful integrity—for the shifting, secret coherence—of such
elusive works as *Twelfth Night* remains, in my view, admirable. On the other hand, there is no doubt that, as
Richard Wilson (among others) has shown with *As You Like It*,\(^11\) mature Shakespearian comedy goes much
further in internalizing and articulating political conflict than traditional criticism realized. Good productions
of *Twelfth Night*—such as John Barton's in 1969—have always been alert to the tensions which arise between
kin-status and the dignity of office (Sir Toby vs. Malvolio), to the insecurity of a figure like Maria, whose
social rank is ambiguous, and to the importance, in Illyria, of jewels and cash changing hands. Above all, in
this connection, *Twelfth Night* is interested in service. It explores the fraught relations which often held, in
early modern households, between employment and eroticism. This dialectic is most active in the
Viola-Orsino plot,\(^12\) but it also significantly contributes to the misfortunes of Malvolio. Too often, critics view
his gulling as an incidental intrigue. When he asks his mistress, however, in Act 5, ‘tell me, in the modesty of
honour, / Why you have given me such clear lights of favour’ (5.1.334-5), he lands on a complex word which
catches his outraged feeling that his preferment (both real and imaginary) cannot have stemmed from nothing
in Olivia's heart. The play punishes the steward for believing that the more precisely he obeys his mistress's
wishes the more he will deserve her favour (in every sense), even while it allows, in Cesario/Viola's relations
with Orsino, a ripening into love of what is erotically problematic in Elizabethan ideas of service.

One way of developing these claims is to make an oblique approach to *Twelfth Night* through the
autobiography of Thomas Whythorne: the Tudor poet and musician who was employed in a series of noble
households before his death in 1596. Though the memoir which he compiled in the late 1570s lacks great
events, it is altogether enthralling because of its attentiveness to social detail, its intricacy of self-criticism and
rationalization, and its almost neurotic sensitivity to the role of flirtation, deceit and gossip in the politics of
favour. Like Gascoigne's *Adventures of Master F. J.*—a work which probably suggested to Whythorne how
his occasional poems could be linked by commentary and narrative—the *book of songs and sonnets, with long
discourses set with them* is particularly alive to the use and abuse of secrecy. Thus, as autobiographical
writing starts to emerge from the commonplaces which begin the memoir, Whythorne describes a friend who
once told a woman ‘the very secrets that were hidden in his heart’, only for her to ‘blaz[e] abroad that which
he had told her to keep in secret’.\(^13\) Similarly, the first of many love intrigues in which he played a part
involves a girl who wooed him by leaving a note threaded through the strings of his gittern. His typically wary
reply praised her for proceeding 'secretly', but gossip made the affair ‘known all about the house’ and the girl
was promptly discharged (pp. 22-3). Throughout his memoir, Whythorne describes situations in which
secrecy and dissimulation shadow-box with each other and attempt to evade the tattling which his epigram,
‘Of secret things’, calls ‘blab’ (p. 224).

The episode which bears most interestingly on *Twelfth Night*—though it can only be loosely contextual—comes shortly after the dismissal of the gittern girl, while Whythorne was still at the age which he calls ‘adolescency’ (p. 11). Like the young Cesario waiting upon Olivia, Whythorne found his way to the household of a beautiful young widow. Even before he accepted a position as her tutor and ‘servingman’, he was wary of enduring ‘the life of a water-spaniel, that must be at commandment to fetch or bring here, or carry there’ (p. 28). His resentment mounted when he discovered how manipulative his mistress could be. Whythorne vividly describes the sort of emotional pressure which could be brought to bear on a man whose position as a servant resembled that of a biddable suitor:

Many times when I was not nigh unto her, although she had appointed me to wait on her cup when she sat at meat, she would bid me come nigher unto her. And therewithal scoffingly she would say to those that were with her, ‘I would fain have my man to be in love with me, for then he would not be thus far from me, but would be always at mine elbow.’ And then would she sometimes put a piece of good meat and bread on her trencher, and forthwith bid me give her a clean trencher, for the which I should have that of hers with the bread and meat on it.

(p. 29)

The problem for Whythorne, however—as he chooses to remember the situation—was that, while he disliked these coercive games, he had to flirt with a mistress towards whom he was clearly attracted (not least in her exercise of power) because ‘open contempt might breed such secret hate in her toward me’ (p. 30). Innured, like F. J., to duplicity, and hoping for advancement, he recalls deciding that, ‘if she did dissemble, I, to requite her, thought that to dissemble with a dissembler was no dissimulation … But and if she meant good will indeed, then I was not willing to lose it, because of the commodities that might be gotten by such a one as she, either by marriage or otherwise’ (pp. 30-1). As a result, when the widow told him ‘how she would have me to apparel myself, as of what stuff, and how she would have it made’ (though cross-gartering is not specified), he ‘feathered his nest’ by accepting money from her to buy clothes and other finery (p. 32). He also wrote to her in secret, and was, like Malvolio, deceived by an encouraging letter which, he later discovered, had been written by her ‘waiting gentlewoman’ (p. 34). By now, of course, gossip was rife (the attempt at secrecy assured that)—‘our affairs were not so closely handled but they were espied and much talked of in the house’ (p. 36)—and the problem of his mistress having to disguise any signs of love which might, in themselves, be dissimulated, added to Whythorne's difficulty in deciding whether she could be won. The ‘comical’ affair (as he calls it) reached its climax when he appeared before her, not exactly in yellow stockings, but in ‘garments of russet colour (the which colour signifieth the wearer thereof to have hope). And one time I did wear hops in my hat also; the which when my mistress had espied, she in a few scoffing words told me that the wearing of hops did but show that I should hope without that which I hoped for’ (pp. 40-1). Thanks to his quibbling wit, Whythorne was able to deflect this rebuff, but his suit thereafter cooled.

If one moves too hastily from this material across to Viola and Malvolio, the contrasts are overwhelming. Where Whythorne describes his affair in such calculating and duplicitous terms that even an impression of mutual vulnerability cannot offset his cynicism, *Twelfth Night* shows Viola concealing what she is to persist in faithful service. Unlike Rosalind, who seems, at least initially, pleased by the experimental scope which men's attire affords, she speaks of frustration and self-division, and the dissembling which her disguise entails is not embraced with relish. Malvolio, rather similarly, is constrained by the habit he adopts. His alacrity in putting on yellow stockings may smack of the self-promotion which infuriates Sir Toby, but his inability to see (as Whythorne instantly would) that he is being made a fool of stems as much from his eagerness to obey Olivia as from ingrown pride. Yet these differences between the memoir and *Twelfth Night* should not distract attention from their shared early modern fascination with the ambiguities of service, and their interest in how secrecy relates to what Cesario calls ‘babbling gossip’ (1.5.277).
Certainly these issues are prominent in Viola's opening scene. When she questions the Captain about Illyria, he can tell her of the Duke's love for Olivia—that obsession of his 'secret soul' (below, p. 72)—because 'murmur' has put it about. 'What great ones do,' he observes, 'the less will prattle of' (1.2.32-3). Gossip is equally active around the countess's reclusive life. The Captain knows of her resistance to Orsino because, again, of report: '(They say) she hath abjur'd the company / And sight of men' (40-1). Olivia's withdrawal into mourning for the death of her father and brother naturally attracts Viola, because she fears herself equally bereft, and she cries out for a position in her household which she imagines will bring emotional consonance: 'O that I serv'd that lady' (41). Though the motif is merely incipient, the play is beginning its exploration of the knot which ties employment to love. Hence the Captain's reply, 'That were hard to compass, / Because she will admit no kind of suit, / No, not the Duke's' (44-6), where the idea of suing to serve is inextricable from a lover's suit.

In Shakespeare's chief source, Barnabe Riche's novella 'Of Apolonius and Silla', the Captain is a villain whose designs on Silla's virtue are only foiled by tempest and shipwreck. Early audiences of Twelfth Night may or may not have recalled this when they saw Viola come on stage with the Captain, but Shakespeare alludes, through the heroine, to the possibility that he might be as he is in Riche:

There is a fair behaviour in thee, Captain;  
And though that nature with a beauteous wall  
Doth oft close in pollution, yet of thee  
I will believe thou hast a mind that suits  
With this thy fair and outward character.  
I prithee (and I'll pay thee bounteously)  
Conceal me what I am, and be my aid  
For such disguise as haply shall become  
The form of my intent.

(47-55)

This is touchingly complex because Viola's youthful moralism about appearances slips into an equally youthful trust, while she raises doubts about dissimulation in the same breath as she proposes concealment. But their deeper interest lies in their showing us how secrets are made: produced through interaction with possible or actual disclosure. For what is only known to yourself cannot be a secret, except in so far as its potential for disclosure anticipates that disclosure, or in so far as you might feel (as Viola/Cesario will later feel) that you are sharing the secret with your self as with another person.

Unlike Silla, Viola does not explicitly disguise herself in men's clothes to avoid sexual predators. While she may share this motive, the scene points towards a practical desire to secure a court position and an impulse to escape from herself. It is as though, by becoming Cesario, she hoped to leave Viola to grieve in secret. That is, paradoxically, why her suit to serve the Duke can resemble Olivia's immurement. Just as the countess resolves to withdraw into a nun's asexuality, and thus becomes a 'cloistress' (1.1.28), so Viola proposes to be a eunuch—if not for the kingdom of heaven, then at least to sing at court. 'I'll serve this duke', she says:

Thou shalt present me as an eunuch to him.  
It may be worth thy pains; for I can sing,  
And speak to him in many sorts of music,  
That will allow me very worth his service.

(55-9)

These lines have baffled editors not least because they seem to go from singing to speech but then return to music. What Viola is saying, however, in a play which is much concerned with that branch of rhetoric which Feste calls vox (5.1.295), is that she is not only musically competent but has the flexible promunicatio of a
courtier. ‘The pleasure of speech,’ writes Stefan Guazzo, in Pettie's 1581 translation of The Civile Conversation, ‘so wel as of Musicke, proceedeth of the chaunge of the voyce, yea … the change of the voice, like an instrument of divers strings, is verie acceptable, and easeth both the hearer and the speaker’.14 ‘If Nature haue denied you a tunable accent,’ James Cleland urges in Hb.pi ![b.alpha! elta! alpha!], or The Institution of a Young Noble Man (1607), ‘studie to amend it by art the best yee maie’ (p. 186). Interestingly, when Viola concludes the scene by urging ‘silence’ on the Captain (61), he sustains her rhetorical concerns by promising to avoid the speech-style which Thomas Whythorne calls ‘blab’: ‘Be you his eunuch, and your mute I'll be: / When my tongue blabs, then let mine eyes not see’ (62-3).

At once the blabbers enter, as Maria, Sir Toby and, a few lines later, Sir Andrew come on stage. Maria is eager for Toby to avoid expulsion from Olivia's household by moderating his behaviour, but when she urges, ‘confine yourself within the modest limits of order’, he replies: ‘I'll confine myself no finer than I am’ (I.3.8-10). We have by this point become so accustomed to characters seeking confinement—Orsino lying ‘canoped with bowers’ (I.1.41), the countess's enclosure in mourning—that Toby's quibbling excess, as he sprawls through the play's first prose dialogue, is bound to appeal. As the scene goes on, however, the superb inconsequentiality of Maria's wit, when she toys with Sir Andrew, and his stupefying inability to get a grip on language, test the audience's patience. We feel assailed as well as amused by the prattle and networking chat which conduct books typically chastise by citing Plutarch's De Garrulitate. This challenge to the audience mounts. As the RSC director John Caird has noted, it creates problems in production that Sir Toby ‘goes on and on and on’ during Acts 2 and 3.15 Even in I.3, Shakespeare points up the garrulity of networking. Sir Andrew's reputation has reached Maria, for instance, from those she refers to as ‘the prudent’ and Toby calls ‘scoundrels and subtractors’ (32-5). Where report is offered sceptically by the Captain, gossip is here the stuff of life.

Anthropological work on gossip has stressed the importance of verbal trivia in maintaining social bonds. Max Gluckman, for instance, argues that scandalous chat draws participants together while serving to exclude others because access to conversation depends on inside knowledge. ‘The right to gossip about certain people is’, he says, ‘a privilege which is only extended to a person when he or she is accepted as a member of a group.’16 This account can be squared with the way the lighter people network in Twelfth Night in opposition to the aloof Malvolio. But Gluckman's critics are right to insist that gossiping is by no means always collective, and that a group can turn out, once inspected, to be full of conversational partitions.17 In that sense, the garrulous in Twelfth Night form an interestingly fractious set, with Fabian and Feste as satellites, and Sir Toby prepared to bamboozle Andrew with what sounds like friendly chat, in ways which make it easier for him to scorn and reject him in Act 5. But Sir Andrew is not the only one left behind in the conversational flow. Everyone who works on gossip would agree that the morsels of information and rumour which it retails must have some element of obscurity, some secret component worth disclosing, since they would otherwise not be passed on. Twelfth Night respects this principle to the point, almost, of defiance, by including material which may well have been written to exclude early audiences from what the play's in-crowd knows, and which certainly excludes us now. Who, for instance, is Mistress Mall, and why should we care about her picture?

In the drinking scene of Act 2, the obscurities of prattling accumulate. What is Sir Toby on about when he says, ‘My lady's a Cataian, we are politicians, Malvolio's a Peg-a-Ramsey’ (2.3.76-7)? The clown calls this ‘admirable fooling’ (81), and it does, indeed, resemble the patter of Feste, which rings in Andrew's empty head, and which he now babbles out: ‘thou wast in very gracious fooling last night, when thou spok'st of Pigrogromitus, of the Vapians passing the equinoctial of Queubus’ (22-4). This replication of proliferating nonsense recalls Plutarch's comparison of gossip to the porch or gallery at Olympia which ‘from one voice by sundry reflections and reverberations … rendered seven ecchoes’. When speech comes ‘to the eares of a babbler,’ he says, ‘it resoundeth again on every side … insomuch, as a man may well say: That the conducts and passages of their hearing reach not to the braine … but onely to their tongue.’18 Babbling of this sort climaxes in the drinking scene for obvious reasons. It hardly needs Plutarch to tell us (though he does so more
than once) that drunkenness provokes ‘much babbling and foolish prattle’ (p. 194). What we can misunderstand, historically, is that the folly of babbling was—partly because of Plutarch—so routinely associated with drink that when a commentator such as Thomas Wright seeks to explain garrulity, he gravitates to talk of ‘foolery’ and ale-house metaphors: ‘he that wil pourre forth all he conceiueth, deliuereth dregges with drinke, and as for the most part, presently men apprehend more folly than wisdom, so he that sodainely uttereth all he vnderstandeth, blabeth forth more froath than good liquor’. This is the mixture of assumptions which Malvolio provocatively ignites when he stalks in and rebukes the drinkers for choosing ‘to gable like tinkers’ (88-9).

It should now be clear why the Captain's word ‘blab’ refers as much to a style of speech as to the betrayal of secrets. Early modern accounts of the psychology and practice of gossip start, as it were, from rhetoric. The blabber was a verbal incontinent, whose itch to gable whatever was in his mind would lead (as Plutarch warned) to rash disclosure. Avoid making friends, advises Wright, with the ‘blabbish, and … indiscreet’ because they will not ‘keep secret, or conserue thy credit, and so with one breath they blow all away’ (pp. 119-20). The corresponding virtue to this vice was called ‘discretion’—a word which, symptomatically, has etymological and semantic links with ‘secrecy’. Time and again, in conduct books, gentlemen are advised to be discreet. The courtier, Castiglione says, ‘shall be no carier about of trifling newes … He shall be no babbler [but keep] alwayes within his boundes.’ In Guazzo, who is almost anticourtly, at moments, in his mistrust of easy eloquence, there is an equally firm resistance to what Cleland calls ‘pratling’ and ‘Babling’ (p. 189). ‘Blaze neuer anie mans secret,’ Cleland says, ‘nor speake of that which discretion commandeth you to conceale, albeit it was not commended to your silence’ (p. 190).

This has a gendered aspect, in that, while gentlemen are encouraged discreetly to converse, women are incited to a discretion which can be absolute. It is the anti-feminist Lord Gaspar who maintains, in Castiglione, ‘that the verye same rules that are given for the Courtier, serve also for the woman’, and the sympathetic Julian, who argues that ‘in her factions, maners, woordes, gestures and conversation (me thinke) the woman ought to be muche unlike the man’ (pp. 215-16). Like the courtier, he argues, women should be ‘discreete’ and avoid ‘babblinge’, but they should concentrate, further, on cultivating ‘sweetnesse’ and reticence (pp. 216-18). English writers were as confident as Guazzo that ‘a young man is to be blamed, which will talke like an olde man, and a woman which will speake like a man’ (1, p. 169). Nor was it just the fools, including Sir John Daw in Epicoene, who believed that ‘Silence in woman is like speech in man.’ In The English Gentlewoman (1631), Richard Brathwait pushes his praise of ‘Discretion’ to the point of insisting that ‘bashfull silence is an ornament’ in women (p. 89). Against the background of a prejudice which assumed (as it still does) that women are more garrulous than men, he writes: ‘It suites not with her honour, for a young woman to be prolocutor. But especially, when either men are in presence, or ancient Matrons, to whom shee owes a ciuill reuerence, it will become her to tip her tongue with silence’ (ibid.).

In ‘The Table’ to The English Gentlewoman, Brathwait cites the apothegm, ““Violets, though they grow low and neare the earth, smell sweetest: and Honour appeares the fallest of beauty, when she is humblest”” (††2). As Gerard's Herball confirms, the Latin word ‘Viola’ was used in Elizabethan England as another name for the violet, a flower which, in general, was associated with modesty. What Cesario inherits from Viola is the discretion which a female upbringing made second nature to gentlewomen. What he gains, as it were, over Viola is permission to speak out—even when men are present. These claims are not in conflict with traditional accounts of the role, but they do, I think, point up the hybridity of Viola's performance. To think about her in relation to courtesy literature is to notice those comical moments when she overplays the courtly rhetoric—as when Cesario impresses Sir Andrew (always a bad sign) by praying for the heavens to ‘rain odours’ on Olivia, or, more oddly, when Andrew surprises us by speaking French, and exchanges such exquisite salutations with Cesario that both are satirically construed. As strikingly, to look at Viola in the light of Guazzo, Cleland and other conduct writers is to recognize the acute importance of discretion in the play.
While describing his affair with the widow, Whythorne glumly notes: 'It is a common matter among servants, … if any one of them be in favour with their masters or mistresses above the rest, by and by all the rest of the servants will envy him or her, and seek all the means and ways that they can imagine to bring them out of credit' (p. 36). Again, it would be wrong to read too directly from this into Twelfth Night. Because critics have neglected the politics of favour, however, they have missed the edginess of Viola's first exchange as Cesario, when s/he comes on stage with Valentine, who was trusted, in I.1, with the task of visiting Olivia, but who is now losing his influence. ‘If the Duke continue these favours towards you,’ Valentine says, ‘you are like to be much advanced: he hath known you but three days, and already you are no stranger.’ This could be spoken neutrally, but Cesario's reply indicates that the actor playing Valentine should give his words some salt: ‘You either fear his humour, or my negligence, that you call in question the continuance of his love. Is he inconstant, sir, in his favours?’ (I.4.1-7). The question is fascinatingly pitched, given the erotic range of ‘favour’, since the constancy which Cesario hopes for in his master is not one which Viola, who now loves the Duke, would unambiguously welcome—at least in Orsino's relations with Olivia.

One thing is clear immediately, though: Valentine is right to envy Cesario's progress with Orsino. As soon as the Duke appears, his cry is for Cesario, and for the rest to stand ‘aloof’ (12). Drawing his servant down-stage, no doubt, into the theatre-space which signifies and facilitates intimate conversation, he says:

Thou know'st no less but all: I have unclasp'd
To thee the book even of my secret soul.
Therefore, good youth, address thy gait unto her,
Be not denied access …

(12-16)

In the Italian comedy Gl’Ingannati—a probable source for Twelfth Night—the Viola-figure says to Clemenzia, when asked why she attends her lover in disguise, 'Do you think a woman in love is unhappy to see her beloved continually, to speak to him, touch him, hear his secrets … ?' Shakespeare's emphasis is more on the intimacies of disclosure than on the content of those ‘secrets’ which are, in any case, the stuff of Illyrian gossip. This is not a process which can be represented, entirely, through dialogue. It depends on proximity and touch between actors, and on the boy or woman playing Cesario having a demeanour which promises that discretion described in Bacon's ‘Of Simulation and Dissimulation’: ‘the Secret Man, heareth many Confessions; For who will open himselfe, to a Blab or a Babler? But if a man be thought Secret, it inviteth Discoverie.’

Cesario gains access to Olivia by means of stubborn pertness, but his suit is then advanced because he is a ‘Secret Man’. As Bacon adds, with worldly acumen: ‘Mysteries are due to Secrecy. Besides (to say Truth) Nakednesse is uncomely, as well in Minde, as Body; and it addeth no small Reverence, to Mens Manners, and Actions, if they be not altogether Open’ (ibid.). If there is a technology of mystery, Cesario exemplifies it. Olivia's veil of mourning cannot but advertise the celebrated beauty it conceals, and she is right (though her modesty is false) to worry about prosaic nakedness when the lacy screen is lifted to reveal ‘two lips indifferent red … two grey eyes, with lids to them’ (I.5.250-1). Cesario, whose ‘smooth and rubious’ lips are so meshed into gender ambiguity that their very nakedness tantalises (I.4.32), has a nature more covert and estranged, which, because of Viola's recessive psychology, is not just disguised by clothes. His embassy goes in stages. At first, he attracts attention by presenting himself as a forward page-boy, seeking to recite a script of compliments, but he intrigues Olivia by modulating into a more inwardly performative role which plays on the comeliness of secrecy while expressing, with a twist of pathos, Viola's sense of being mysterious to herself as she comes to terms with loving the Duke: ‘and yet, by the very fangs of malice I swear, I am not that I play’ (184-5). Orsino has told his servant to ‘unfold the passion of my love’ (I.4.24), but, as Cesario quickly discovers, that secret is too open to entice. It is almost an objection to the Duke, for Olivia, that his qualities are manifest and talked of: ‘Of great estate, of fresh and stainless youth; / In voices well divulg'd’ (I.5.263-4).
Cesario, by contrast, has a secret allure—the allure of secrecy; and he uses it to secure a private audience by promising revelation: ‘What I am, and what I would, are as secret as maidenhead: to your ears, divinity; to any other’s, profanation’ (218-20).

These lines are alive with risk. As Georg Simmel has noted, in his classic account of secrecy: ‘the secret is surrounded by the possibility and temptation of betrayal; and the external danger of being discovered is interwoven with the internal danger, which is like the fascination of an abyss, of giving oneself away.’ Cesario's mention of a ‘maidenhead’ produces secrecy from what is hidden by anticipating disclosure. He alludes to the ‘she’ in Cesario, and ‘she’ alludes to something so essentially intimate that her feelings for Orsino come to mind. Yet the process of tempting Olivia into private conference, of enticing her (and the audience) with intimations of a sexual secret more real than maidenheads merely talked of, goes along with an urge on Viola's part to be done with her intolerable disguise and give herself away by blabbing. For as Simmel adds: 'The secret puts a barrier between men but, at the same time, it creates the tempting challenge to break through it, by gossip or confession—and this challenge accompanies its psychology like a constant overtone' (ibid.).

The overtone is most audible, a few lines later, in the willow cabin speech. If I loved you, Cesario tells Olivia, I should

Make me a willow cabin at your gate,
And call upon my soul within the house;
Write loyal cantons of contemned love,
And sing them loud even in the dead of night;
Halloo your name to the reverberate hills,
And make the babbling gossip of the air
Cry out 'Olivia!' O, you should not rest
Between the elements of air and earth,
But you should pity me.

(272-80)

The speech is emotionally electric because, by positing herself as Orsino wooing Olivia, Viola is imagining what it would be like to woo the Duke, while seducing Olivia into imagining what it would be like to be wooed by Cesario. But the energy of the utterance, as it moves through double, endstopped lines to the suddenly freed enjambment and exclamatory caesura after ‘gossip of the air’, also stems from her frustrated impulse to babble out what she is. Given the fact that Shakespeare varied his characters' names from those in the sources, it can hardly be accidental that, if ‘the babbling gossip of the air’ did cry out ‘O-liv-ia’, the rebounding echoes would reverberate into something very like ‘Vi-o-la’—a word which is, for innocent audiences, a secret within the secret until, near the end of the play, Sebastian greets Cesario by saying “Thrice welcome, drowned Viola” (5.1.239).

Characterization in mature Shakespeare is angled into complexity by what holds between roles as well as by what is written into them. The lucid symmetries and parallels which shape such early comedies as Errors and Love’s Labour’s Lost give way, from Much Ado onwards, to a recognizably more mannerist procedure in which analogies are elliptical and overdetermined, and characters who seem unlike can be, in fluctuating ways, related. No case is more extreme, perhaps, than the coupling of Cesario and Malvolio. Yet the resemblances are there. Both gentlemen are upwardly mobile suitors (respectively unwelcome and coerced) of Olivia. In the echoing cluster of names which lies at the heart of the play, ‘Malvolio’ is more involved with ‘Olivia’ and ‘Viola’ than is, for instance, ‘Orsino’. And this reflects, perhaps, a similarity rooted in source-material, given that, in ‘Of Apolonius and Silla’, the Viola-figure is thrown into the dark house reserved, in Twelfth Night, for Malvolio, when the Duke gathers, from gossip among servants, that the countess has fallen in love with his man.
It is in their role as servants, however, that the two are most closely aligned. As I noted in relation to Whythorne, both are equally subject to the politics of favour. At first, Malvolio is as successful as Cesario. If Orsino finds it natural to turn to his discreet young servant when thoughts about Olivia well up, Olivia calls for that ‘known discreet man’, her steward (I.5.95), both in sending Cesario her ring, and, later, in 3.4, when she comes on stage with Maria, but talks, rather, to herself about how to win the Duke’s handsome ambassador. ‘I speak too loud’, she says, checking her own indiscretion: ‘Where’s Malvolio? He is sad and civil, / And suits well for a servant with my fortunes: / Where is Malvolio?’ (4–7). The word ‘sad’ here does not mean ‘gloomy’, as in modern English. The steward is grave and close. He can observe the decorum which Puttenham praises when he says that a man should be ‘secret and sad’ in counsel (p. 292). This quality is defined, of course, against the babbling indiscretion of Sir Toby and his friends. Towards the end of 3.4, Cesario will say that he hates ‘babbling drunkenness’ (364). It is a trait which Malvolio shares, as we know from his denunciation, in the drinking scene, of those who ‘gabble like tinkers’ and keep ‘uncivil rule’ (2.3.89, 122).

To insist that Malvolio feels the same urge as Viola/Cesario to disclose a hidden nature through babbling would be false to the glancing way in which parallels work in Twelfth Night. His yellow stockings and forced smile do involve an element of disguise, since they belie his ‘sad and civil’ self; but they owe more (I shall argue) to adornment, and they cannot be patly compared to the costume which stirs up in Cesario a desire to reveal the Viola in him. Yet the steward is not as indifferent to ‘babbling gossip’ as he would like the world to suppose. Even before he reads the forged letter, he is fantasizing about Olivia by recalling, ‘There is example for’t. The Lady of the Strachy married the yeoman of the wardrobe’ (2.5.39-40). This snippet from Illyrian gossip columns is every bit as trivially topical, or, more likely, pseudo-topical, as Sir Toby's allusion to Mistress Mall. Indeed the plot against Malvolio can be understood, in early modern terms, as designed to bring out the babbler in the discreet man, by emptying his language. ‘My masters, are you mad?’, the steward asks the drinkers (2.3.87). When denounced as a madman and locked up, he is not just confined as finely as Sir Toby Belch could wish: his words—once so commanding in the household—are discredited and trivialized, then mocked as empty verbiage. ‘Malvolio,’ Sir Topas cries, ‘thy wits the heavens restore: endeavour thyself to sleep, and leave thy vain bibble babble.’

It is easy to see how the courtesy literature which sheds light on Cesario can also illuminate his double, Sebastian. In the elaborate, even stilted idiom of his first exchanges with Antonio, in the reserve and sturdy valour with which he engages Sir Andrew and Sir Toby, and in his discreet handling of the secret betrothal to Olivia, he conforms with the ideals laid out in such texts as Henry Peacham's Compleat Gentleman (1622). The plot against Cesario's more eccentric co-rival, Malvolio, might seem harder to relate to conduct books. In practice, though, even the courtly Castiglione is more tolerant of what Fabian calls 'sportful malice’ (5.1.364) than a modern reader might expect. The Book of the Courtier describes, indeed, a series of 'Meerie Pranckes' which bear comparison with Twelfth Night. In one of them, an unfortunate man is persuaded by his companions that the dark room in which he has been sleeping is illuminated by the—actually, unlit—candles which they carry. Like Sir Topas visiting Malvolio, they cry, with incredulity, ‘Say'st thou that house is dark?’ (4.2.35) until—lacking the steward's resilience—the poor man is convinced of his blindness, repents his sins and prays to Our Lady of Loreto, whereupon his friends undeceive him (pp. 193-5). Almost as cruel is the tale told by Monsieur Bernarde about the occasion when he fell a-wrestling, in sport, with Cesar Boccadello on the Bridge of Leo. When passers-by made to separate them, Bernarde cried ‘Helpe sirs, for this poore gentilman at certein times of the moone is frantike, and see now how he striveth to cast himselfe of the bridge into the river’ (p. 197). Cesar was instantly set upon, and the more he struggled and protested, the more apparently justified and inevitable his confinement (like Malvolio's) became.

There are, Castiglione says, ‘two kyndes of Meerie Pranckes … The one is, whan any man whoever he be, is deceyved wittilie … The other, whan a manne layeth (as it were) a nett, and showeth a piece of a bayte so, that a man renneth to be deceyved of himself’ (p. 191). The plot against Malvolio is a fine example of this latter, more sophisticated form of joke. It is always surprising, when one returns to the play, to discover just
how deeply the steward is mired in fantasies about Olivia before he finds the letter. Yet Malvolio does need some enticement to run himself into the net, and Maria's letter is well-judged to appeal not only to his ambitions but to his pride in managing secrets. It is relevant, in this regard, that her writing parodies secretaryship—or, as likely, abuses a secretarial office which she has discharged on other occasions—by conducting the sort of covert correspondence with a suitor which such a servant might expect to handle for her lady (as when the devious secretary in Gascoigne writes to F. J. on Elinor's behalf). In a secretary, discretion was essential. Indeed, as Angel Day notes, in The English Secretary, ‘in respect of such Secrecie … the name was first giuen to be called a Secretorie’. Equally integral, however, was the idea of imitative substitution. The secretary, Day reports, will be ‘a zealous imitator’ of his master, down to the ‘forme and maner’ of his penmanship. This is the context of Maria's announcement, ‘I can write very like my lady your niece; on a forgotten matter we can hardly make distinction of our hands’ (2.3.160-2). She is indicating that her letter will not be a forgery so much as a duplicitous secret.

The hermeticism of the missive is compounded, for it is wrapped in mysteries—ornamented by secrets—from the tantalizing address on its outside (‘To the unknown beloved …’ (2.5.92)), through the seal which closes it up (but which also dis-closes its matter, by hinting that Olivia is the author), into the enigmas of its message:

I may command where I adore;
But silence, like a Lucrece knife,
With bloodless stroke my heart doth gore;
M.O.A.I. doth sway my life.

(106-9)

This ‘secrete conceit’—to use Puttenham's phrase for the posies and anagrams of amorous courtiers (p. 102)—is a sub-plot version of those riddles which elsewhere in the play (and especially in Cesario/Viola's lines) have an ontological aspect. And it does, more locally, raise the thought that Malvolio's cultivated discretion (his chosen mode of being) is a form of self-advertisement. For the ornate secrecy of the letter is calculated to command attention: it engages in a covert exhibitionism which the steward finds congenial. To that extent it recalls Simmel's insight, that ‘although apparently the sociological counter-pole of secrecy, adornment has, in fact, a societal significance with a structure analogous to that of secrecy itself’ (p. 338). In other words, the secrecy of the letter has much in common with the yellow stockings, cross-gartering and fixed smile which it encourages its recipient to adopt.

This claim may sound unlikely, but I am encouraged to advance it by the cogency of Simmel's observation that, while man's desire to please may include outward-going kindness, there is also a

wish for this joy and these ‘favors’ to flow back to him, in the form of recognition and esteem, … [B]y means of this pleasing, the individual desires to distinguish himself before others, and to be the object of an attention that others do not receive. This may even lead him to the point of wanting to be envied. Pleasing may thus become a means of the will to power: some individuals exhibit a strange contradiction that they need those above whom they elevate themselves by life and deed, for they build their own self-feeling upon the subordinates' realization that they are subordinate.

(ibid.)

Even before he finds the letter, Malvolio's attentiveness to Olivia and his contempt for those like Sir Toby exemplifies a powerseeking desire for ‘favors’. His attraction to the countess has less to do with eroticism than with a longing for the unruly, over whom he elevates himself, to become his subordinates: his day-dream about Toby curtsying to him, and being required to amend his drunkenness, shows that he cannot imagine life
in the household (certainly not an agreeable life) without having the lighter people to condescend to. In preparation for the happy day when he will be made Count Malvolio, he distinguishes himself before others by means of a singular discretion (so unlike their collective gabbling) which is actually a form of ostentation. We are not surprised when Maria reports that Malvolio ‘has been yonder i’ the sun practising behaviour to his own shadow this half hour’ (2.5.16-18) because he is that recognizable type: a secret exhibitionist. The invitation to put on yellow stockings, cross-gartered, is, in one sense, ludicrous and improbable, because it contradicts those ‘sad and civil’ qualities which attract Olivia's praise. But it is hardly surprising that Malvolio takes the bait, because, as Simmel says, ‘Adornment is the egoistic element as such’ (p. 339), and the strange garb—which the steward claims he already owns, and which he may indeed have worn, at least in fantasy (2.5.166-8)—amplifies and gives expression to his desire for singularity without compromising his attentiveness to Olivia: on the contrary, it is a way of ‘pleasing’ her.

Simmel goes on to notice that adornment does not express the organic nature of the person adorned, but depends on superfluousness and impersonality. Jewels and precious stones are typical of its highly external relationship with the person, but yellow stockings and cross-garters work to similar effect because they divide up and cut into the wholeness and ease of the body (they obstruct, indeed, Malvolio's circulation (3.4.19-20)). One might compare Simmel's example of new clothes as against old: the former ‘are particularly elegant’, he says, ‘due to their being still “stiff”; they have not yet adjusted to the modifications of the individual body as fully as older clothes have’ (p. 341). There is a vein of comedy here, of course, because, as Bergson points out in Le rire, laughter is provoked by superimpositions of mechanical rigidity on the organic flow of the body. The ornaments seemingly requested by Olivia, the clothes which Malvolio puts on to mark his new status, are laughable even as—and for precisely the same reason that—they signify advancement. For adornment is a mark of status regardless of the materials used, and Malvolio's attire shares the usual property of adornment in bringing together, or parodying (since Olivia cannot bear yellow), what Simmel calls ‘Aesthetic excellence’ and the ‘sociological charm of being, by virtue of adornment, a representative of one's group’ (p. 343)—with the added delight, in this case, for Malvolio, that, by becoming a count, he will represent the dignity of Olivia's house to the consternation of Sir Toby and his ilk. Beyond that, and underwriting it, is secrecy: the ultimate bait. To assume yellow stockings and be cross-gartered puts Malvolio's discretion on display, without abolishing it, because the new garb allows him, as he thinks, to share a secret with Olivia, to signal an ambition and grasp of courtly intrigue (hence ‘I will read politic authors’ (2.5.161-2)) which she will understand and appreciate while the drinkers and babblers will not.

That this exhibitionistic secrecy is designed to please Olivia only with the intention of gratifying Malvolio is compatible with the sickness of self-love which she diagnoses when he first comes on stage (1.5.89). From a psychoanalytical perspective, indeed, the yellow stockings are narcissistic fetishes while the cross-gartering looks auto-erotic. This line of enquiry could bear a Lacanian twist, given that the anagrammatic relations which hold between ‘Olivia’ and ‘Malvolio’—pointed up by the disjunction of those names (‘M.O.A.I.’) in the letter—register, at the level of the sign, her role in reflecting Malvolio's constitutive desire back on himself.

Freudian speculation aside, there is certainly something masturbatory about the steward's complacent cry, as Sir Toby and the rest move in to take the yellow-stockinged madman away: ‘Let me enjoy my private’ (3.4.90). This recoil into self-pleasuring is not restricted, of course, to the steward. Critics often call Orsino (rather loosely) a narcissist, and his early remark—before Cesario's charms get to work—‘for I myself am best / When least in company’ (1.4.37-8) would have suggested to an Elizabethan audience, with its inherited disapproval (to simplify somewhat) of solitariness, a similarly troubling mind-set. The conduct literature is emphatic in its insistence on affective sociality. ‘Self-Loue is the greatest disease of the minde,’ according to James Cleland, and it has ‘beene the cause of manie Narcissus his changing among you Nobles’ (p. 241). There is, in other words, an important Renaissance distinction between the socially produced (and socially productive) quality called secrecy and suspect, anti-social solitude.

It is entirely in line with this that Stefan Guazzo celebrates discretion but bends his dialogue towards showing how arguments for civil conversation can persuade his brother, William Guazzo, from abandoning society:
'And now my joye is the greater', William's interlocutor, Anniball Magnocavalli, says at the end, 'that I understande how readie and willinge you are to caste of the obscure and blacke Robe of Solitarinesse, and in liew of that to revest and adorne your selfe with the white and shininge garment of Conversation' (ii, p. 215). The danger was, inevitably, that discretion could become exaggerated into self-absorption. Malvolio's anti-social vanity bears out Nashe's observation in Pierce Penilesse his Supplication to the Divell (1592): ‘Some thineke to be counted rare Politicans and Statesmen, by being solitary: as who would say, I am a wise man, a braue man, Secreta mea mihi: Frustra sapit, qui sibi non sapit [My secrets are my own; he is wise in vain who does not know his own business], and there is no man worthy of my companie or friendship.’

Much is now being written about the way Renaissance culture developed modern ideas about privacy by building and exploring the uses of secluded chambers and closets. This emergent mentality is reflected in the appeal which Twelfth Night makes to varieties of privy space. Somewhere off-stage Andrew has his ‘cubiculo’ and Toby his own retreat. But it matters that we should learn of the former by Toby saying, ‘We'll call thee at thy cubiculo’ and of the latter by his remark (to Feste or Maria) ‘Come by and by to my chamber’ (3.2.50, 4.2.73-4). The babblers are social in their privacy, where Malvolio seeks to be private even in the open spaces of Olivia's great house. That is why the ‘dark room’ (3.4.136)—that dramatically overdetermined locale—is such an apt punishment for his pretensions: locked up there he is both cast out of society and thrown in upon himself. He is forced into a solitude which represents, but which is also maliciously designed to induce, asocial derangement. But he is also given a chance—I shall end by suggesting—to reassess the value of what Nashe calls ‘companie or friendship’.

I referred, a little earlier, to ontological riddling. What I mean by that is the presence of, and counterpoint between, such claims, in Cesario/Viola's part, as ‘I am not that I play’ and ‘I am not what I am’ (1.5.185, 3.1.143). As disguise and confusion mount, even simple indicative statements such as ‘I am the man’ (when Viola deduces that Olivia has fallen for Cesario) are deceptive, twisting into dubiety and delusion: ‘if it be so, as ’tis, / Poor lady, she were better love a dream’ (2.2.24-5). ‘Nothing that is so, is so’, the clown will later quip (4.1.8-9). Sebastian calls this ‘folly’, but Olivia is alert to the instability of so-ness when, a few lines later, she thanks him for agreeing to be ruled by her by saying, quite simply, but, by now, with some perplexity, ‘O, say so, and so be’ (64). This line of enigmatic quibbling, of instability in the indicative of being, runs all the way through the play to its perhaps redemptive reformulation when Cesario meets Sebastian: ‘A natural perspective, that is, and is not!’ (5.1.215). It matters to the Malvolio plot because, in his attempt to subvert the steward's sanity, Feste turns such riddling against him. ‘“That that is, is”’, he tells Sir Toby (with the assurance that, by this point, what is is not): ‘so I, being Master Parson, am Master Parson; for what is “that” but “that”? and “is” but “is”?’ (4.2.15-17).

Malvolio does not doubt that Master Parson is Master Parson, even when Feste presents himself in that guise without disguise—just in a different voice. By the same token, however, he persists in a stubborn belief that ‘that’ is ‘that’ and ‘is’ ‘is’. He has a self-centred clarity about what he credits which carries him with some dignity through Feste's peculiar questions about Pythagoras' metempsychosis, and whether the soul of one's grandam might haply inhabit a bird. No audience can entirely warm to Malvolio's self-assurance, unchanged since the letter scene, but his persistent protestations of sanity seem the more admirable as his opponents' pranks become redundantly sadistic. Their cruelty is particularly marked in respect of the motif of ‘companie or friendship’, because, if the plot to incarcerate Malvolio is justified in so far as it obliges him to confront what it means for a man to be truly solitary, it abandons any claim to the moral high ground when Feste assists the steward by bringing him writing materials and agreeing to take a letter to Olivia, but then suppresses the missive—an event of such moment that Shakespeare underscores it in that otherwise null episode where the clown refuses to divulge the letter's contents to Fabian (5.1.1-6).

I have touched, several times, in this paper, on the social dimension of secrecy, and stressed how it is produced, in the early modern period, out of civil intercourse. It should be clear, in consequence, at this late stage, why ‘companie or friendship’ is so important in Twelfth Night. Obviously, in this play of cross-dressing
and variant sexuality, there is an interest in the mergings of heterosexual love with same-sex friendship, and with the friendship in heterosexual love as well as the eroticism of same-sex amity. But secrecy impinges on, and gives rise to, friendship (as in the shaping confidences shared between Sebastian and Antonio) because, although the period knew that—as the cynical commonplace put it—three can keep a secret when two of them are away, it was also aware that not to confide a hidden thing was to go the readiest way to public exposure or self-destruction. In trying to ‘keepe love secrete’, says Lord Julian in The Book of the Courtier, it is bad to be ‘over secrete’ and better to trust a friend with your feelings so that he can help you conceal what you will otherwise, certainly, betray (pp. 284-5). Recall Duke Charles the Hardy, Bacon advises, in his essay ‘Of Friendship’, who, because he ‘would communicate his Secrets with none’, damaged his wits. ‘The Parable of Pythagoras is darke, but true; Cor ne edito; Eat not the Heart. Certainly, if a Man would give it a hard Phrase, Those that want Frends to open themselves unto, are Canniballs of their owne Hearts.’

Bacon's fable from Pythagoras is not the same as Feste's, but something close to what the clown says can be found in Cleland's Institution, where, immediately after explaining why a man's friend should not be ‘a great pratler’, he enthuses:

O how much am I bound to Gods bounty amongst al the rest of his benefits towards me, in sending me such a friend! … In the very first daie of our meeting … I found my minde so changed and remooued into the place of his, which before that time was in me. Hitherto I could neuer excogitate anie reason why I shoulde loue him, but Pythagoras his , and that hee is another my selfe.

(p. 197)

Why is a friend so valuable? Cleland's answer is typical of the period: because he is a person ‘in whom I dare better trust, and vnto whom I dare discover the most secret thoughtes of my minde with greater confidence then I am able to keepe them my selfe’ (ibid.). So the dialogue between Feste and Malvolio about the steward's grandmother and a woodcock is not just random nonsense, and more than an insult to the old lady's intelligence. It contributes to the close texture of Twelfth Night a riddling reminder that, notwithstanding the resistance of the self-centred steward, the soul can be said, at least in amity, to migrate from one body to another. This is what Viola/Cesario means when s/he speaks of calling ‘upon my soul within the house’ (above, p. 73), and what Orsino invokes when he promises the assembled lovers that ‘A solemn combination shall be made / Of our dear souls’ (5.1.382-3).

Malvolio is often seen as excluded from this finale. In one of the best essays on Twelfth Night, Anne Barton stresses the fragmentariness of its ending by pointing out that, like Sir Toby and Sir Andrew, the steward ‘comes as a figure of violence and leaves unreconciled’. At the end of As You Like It, ‘Jaques had walked with dignity out of the new society; Malvolio in effect is flung.’ This is largely true. Yet the charmed circle of amity does not actively dismiss Malvolio: if anything, Olivia and Orsino do the opposite, acknowledging, in an echo of his own words, that ‘He hath been most notoriously abused’ and commanding, ‘Pursue him, and entreat him to a peace: / He hath not told us of the captain yet’ (5.1.378-80). What Orsino reminds the audience of here is that Malvolio is holding ‘in durance’, at his own suit, the Captain who arrived with Viola in the third scene of the play. This character, almost forgotten, is now freshly important, because he holds Viola's 'maiden weeds' (272ff., 251ff.). I am not myself persuaded that clothes were so constitutive of identity for Shakespeare's original audience that Cesario cannot become Viola until those very clothes are recovered from the Captain. Even Orsino, piquantly intrigued at being affianced to a boy, only says that ‘Cesario’ will keep his masculine name until ‘in other [unspecified] habits you are seen’ (386). Yet the gesture of deferral—as against fragmentation—is unmistakable, and compatible with a denouement which straggles its endings out, from the pre-emptive coupling of Maria and Toby, through the betrothal but delayed marriage of Olivia and Sebastian, to the as-yet-unrealized resolution of the Cesario/Viola-Orsino romance. In that delayed conclusion, space is made for Malvolio, his hold over Viola's weeds confirming what his anagrammatic link
with her name implies. These characters belong together. Until the steward is reconciled, comedy will not be consummated. Just how he will be persuaded remains one of the secrets of the play.

Notes

31. Compare (but also contrast) lines 169-96 with Mote at Love's Labour's Lost 5.2.158-74, addressing the Princess and her ladies.
34. To woo, that is, as Viola (if a woman might be so assertive), rather than compoundingly, as in 2.4, where the attraction of Cesario/Viola's eye to 'some favour that it loves' (which riddlingly means the Duke's 'favour' (24-5)), prompts him/her to utter the half-betraying speech about 'concealment', ‘My father had a daughter lov’d a man …’ (108-19). Symptomatically, in the exchange which follows, Bacon's observation, 'he that will be Secret, must be a Dissembler, in some degree. For Men are too cunning, to suffer a Man, to keepe an indifferent carriage … They will so beset a man with Questions, and draw him on, and picke it out of him’ (p. 21) is ratified both by Orsino's leading interrogation ('But died thy sister of her love, my boy?' (120)) and by Cesario/Viola's dissimulation (‘I am all the daughters of my father's house, / And all the brothers too’ (121-2)), which slurs into poignant honesty, as s/he hopes for Sebastian's survival (‘… and yet I know not’ (122)), but which remains sufficiently in touch with the deviousness of his/her opening ploy to recall (for instance) the explicitly seductive discretion of F. J. when he woos Dame Elinor with a lute song composed by ‘My father's sister's brother's son' (Gascoigne, The Adventures of Master F. J., in Paul Salzman (ed.), An Anthology of Elizabethan Prose Fiction (Oxford, Oxford University Press, 1987), pp. 3-81 (p. 28)).
36. Folio punctuation mostly conforms to the rhetorical shape of the passage, though, as routinely, it divides the run-on 'air / Cry' with a comma.

**Criticism: Themes: Angela Hurworth (essay date 1999)**

In the following essay, Hurworth explores the representation of deception, or gulling, in Twelfth Night. Hurworth highlights the links between criminal deception as it is described in Elizabethan narratives of the “underworld” and the deception found in the play.

The age-old ploy of practising deception upon one’s fellow for material profit and/or vindictive amusement, known as gulling, cozenage or cony-catching in the rogue literature of the Elizabethan period, figures prominently in the contemporary drama where its principal exponent is, of course, Ben Jonson. In Volpone and The Alchemist deception is treated as an art-form in itself. This is gulling on a grand scale, where the theatricality of deceiving and the deception inherent in the theatrical illusion find their finest expression. In Shakespeare’s plays, gulling rarely occupies centre-stage as in Jonson (Othello may be the one exception to this), although it frequently surfaces as an incident in the main plot, for example, the double gulling of Beatrice and Benedick in Much Ado About Nothing, or the cozening of Falstaff by Hal after the Gadshill episode in 1 Henry IV. The term itself, however, occurs infrequently in Shakespeare’s plays. Unusually, in Twelfth Night the text designates two characters, Malvolio and Sir Andrew Aguecheek, as ‘gulls’, the instigator of the trap set for the steward, Maria, is addressed as ‘my noble gull-catcher’ by Fabian (2. 5. 180), and there may be an implicit reference to ‘gulling’ in the title of the play, since the prologue of Gl’Ingannati, a likely source, has a reference to la notte di beffana, a phrase usually rendered as ‘Epiphany’ or ‘Twelfth Night’ in English but which, literally translated, may be understood as The Night of Gullings.

The gulling of Malvolio which results in his transformation from dour Puritan to ridiculous suitor is the comic highlight, if not the centre, of the play. In fact Malvolio’s comment that he is the ‘most notorious geck and gull / That e’er in vention played on’ (5. 1. 340-1) may be read as a meta-theatrical prophecy of his box-office popularity, initially commented upon by Digges:

The Cockpit Galleries, Boxes, all are full
To hear Malvoglio, the cross-garter’d gull.(4)

And the propensity of the comic sub-plot to upstage the main plot has characterized the play ever since Charles I wrote ‘Malvolio’ against the title in his copy of the Second Folio. Indeed we may note that the term
'gull' in its ornithological sense is interchangeable with 'cuckoo' in Shakespeare's usage: 'As that ungentle gull, the cuckoo's bird, / Useth the sparrow' (I Henry IV, 5. 1. 60-1), so that there is a semantic association between the cuckoo-like sub-plot in Twelfth Night and gulling. The secondary intrigue's appropriation of the place normally accorded to the main plot functions as a metatextual paradigm of the patterns of deception, substitution and metamorphosis in the play.

I wish to compare the representation of gulling in Twelfth Night with the narratives of underworld literature where such deception, known as cony-catching, cozenage or gulling, receives its fullest treatment. In his study of the Elizabethan underworld, G. Salgado noted the affinities between the deception practised in the narratives of rogue literature and the Elizabethan stage:

The paraphernalia used in this form of cheating had all the imagination, energy, sense of timing and understanding of character that we find in the Elizabethan drama itself …

However it should be remembered that these narratives are every bit as fictive as their onstage representation and should not be read as documentary evidence of criminal activity in Elizabethan London. My aim therefore is not to establish a relationship between Shakespeare's play and criminality in Elizabethan London but to draw attention to the contact between the two different representational modes. Firstly I shall relate the dramatic syntax and lexis of gulling in Shakespeare's play to the lexis and syntax of gulling in the underworld literature; I shall then show how the definition of gulling as a game with rules influences the configuration of the gulling in Twelfth Night, and note the theatricality of gulling, as presented in these pamphlets.

Malvolio may be the play's most 'notorious geck and gull', but he is certainly not alone in the part. Twelfth Night is replete with gullings, albeit of different degrees and durations. Andrew Aguecheek is by nature a gull (as he virtually admits), and he is gulled from first to last. It is no secret that he is fleeced financially throughout, that he is deceived into 'supposing that Toby's dry gullet is the way to Olivia's heart', and then cozened into challenging Viola/Cesario by Sir Toby, as the latter's boast, 'Marry, I'll ride your horse as well as I ride you' (3. 4. 281), proclaims for all to hear.

But gulling is not merely exemplified by those designated as 'gulls' nor is its functioning simple. The dynamics of gulling is centripetal and draws many of the characters into its force field. For instance, we observe a spiral of gulling in the activities of Sir Toby Belch. He gulls Andrew into providing him with money, and inveigles Viola/Cesario into a farcial duel, but his control of its energy falters when Sebastian appears, and his duping backfires on him. Indeed, gulling shows itself to be a reversible game since Toby himself is gulled most effectively by Maria. Such is the implication of Fabian's comment when Sir Toby, carried away by his delight in the spectacle of Malvolio's humiliation, says:

SIR Toby

I could marry the wench for this device

[...] Enter Maria ...

FABIAN

Here comes my noble gull-catcher.

SIR Toby

(to Maria) Wilt thou set thy foot o' my neck?

(2. 5. 175-81)
This moment is an example of the intersection of two trajectories of gulling: that of Malvolio by Maria and of Toby by Maria. This mistress of the game is also expert enough to synchronize two moments of gulling when, immediately prior to Malvolio's appearance before his mistress in yellow stockings, she represents him to Olivia as unhinged: ‘Your ladyship were best to have some guard about you if he come, for sure the man is tainted in's wits.’ (3. 4. 11-13), thereby tricking Olivia, just as she has duped her steward. It should be noted however that there are different varieties of gulling. The trick played on Malvolio is of the savage, vengeful kind (known in the commedia dell'arte as a beffa) whereas Maria's gulling of Olivia and Sir Toby is essentially harmless (thus, in Italian terms, a burla).11

Although as a ‘waiting gentlewoman’ Maria is socially and dramatically marginal to the play, her part in concocting the plot and stage-managing the gulling game in its opening stages reveals her to be at the centre of the secondary intrigue, the mainspring of the action. She is responsible for unleashing forces which bring about hugely comic situations before spinning out of control. In spite of J. W. Draper's exhaustive and perceptive character sketch of Mistress Mary, she nevertheless remains something of an enigma.12 She never makes any comment on her role as a gull-catcher: all we are shown is her evident enjoyment in devising and executing her own schemes, and her apparent desire to please Sir Toby. Draper's conjectures regarding Maria's reasons for wanting to marry Sir Toby are plausible enough in terms of the social ambitions of Elizabethan waiting-women, for him the play's main theme is ‘the Elizabethan pursuit of social security’,13 but Maria is as much a dramatic construct as a representative of Elizabethan society. Her role is steeped in comic tradition: adept at the classic techniques of duping associated with the commedia dell'arte, she is also the trickster figure of classical comedy, the clever slave figure found in Plautus.14

Early in the play, the object of her desire, Sir Toby, apparently sees her in terms of sexual opportunity rather than wedlock. Feste comments on Sir Toby's failure to appreciate Maria: ‘If Sir Toby would leave drinking, thou wert as witty a piece of Eve's flesh as any in Illyria’ (1. 5. 24-6). This reveals to her the need to curb Sir Toby's carousing if she is to succeed in capturing his attention, hence her readiness to devise a scheme to be revenged on Malvolio for his disapproval of their drunken antics. The knight has to be brought to a realization of her worth as a wife. To use Leo Salingar's phrase, it is the experience of ‘the pleasure of contrivance’ that awakens Sir Toby to Maria's eligibility: ‘She's a beagle true bred and one that adores me’ (2. 4. 173-4). This appreciation of the pleasure of intrigue leads Sir Toby to want to emulate his better half, to become a master of the game himself, but forces beyond his control make his gulling misfire, whereas Maria not only emerges unharmed, but is rewarded, as Fabian reminds us: ‘Maria writ / The letter, at Sir Toby's great importance, / In recompense whereof he hath married her’ (5. 1. 359-61).

The case of Malvolio demonstrates how a gulling trajectory may be subject to inversion, for not only is the steward gulled by the plotters, but he is also in the grip of ‘self-gulling’. In his egoism, Malvolio unwittingly appropriates the discourse of gulling. After reading the forged letter, he believes that he has in fact become a gull-catcher, having snared Olivia like a bird on a branch:15 ‘I have limed her’ (3. 4. 75). This reveals the steward at the centre of a web of real and imagined gullings: ‘self-gulled’, about to be gulled, he believes himself to be the gull-catcher. To complicate matters, Olivia is, of course, ironically enough, the victim of a gulling, but not by Malvolio, by Viola/Cesario instead (an unwilling and unwitting gull-catcher). Thus various instances of gulling may coincide or intersect, spiral or reverse one another.16

But gulling may also be linear and sporadic, in contrast to the density of gulling trajectories enmeshing Malvolio. Thus in the course of the gulling of Malvolio, the cozening of Sir Andrew surfaces from time to time in the text, as when Toby tells Andrew baldly:

SIR Toby

Thou hadst need send for more money.
SIR Andrew

If I cannot recover your niece, I am a foul way out.

SIR Toby

Send for money, knight. If thou hast not her i' th' end, call me cut.

(2. 3. 176-81)

Likewise, later, Sir Toby refers unabashedly to his fleecing of Sir Andrew:

FABIAN

This is a dear manikin to you, Sir Toby.

SIR Toby

I have been dear to him, lad, some two thousand strong or so.

(3. 2. 51-3)

This follows the broad outlines of the typical relationship between the would-be gallant and his gull described in Dekker's *The Guls Horne-book* (1609). The author claims to write as the arbiter of advice to the man-about-town—as opposed to his opposite, a gull—but the syntax of the title *The Guls Horne-book* is ambiguous, since 'gulls' may function as either a possessive plural or a genitive plural here. The choice of construction determines the meaning. Is it a manual of instruction for the gull-catcher or the gull? If the title has the sense of the possessive plural, then it is a manual destined for use by gulls, in order to avoid being gulled. Conversely, if the genitive plural construction is intended, then it is a work describing gulls, a manual for the would-be gallant whereby he may identify a gull (and take advantage of him). Furthermore, the grammatical ambiguity of the title is never elucidated by the hornbook's content, which implicitly ridicules the activities of the would-be gallant, so that there is only a difference of degree between his foolishness and that of his victim, the gull.

Sir Toby and Sir Andrew fit the categories of the would-be gallant and his gull to a nicety. Sir Toby is a 'kinsman' of Olivia's, apparently dependent on her hospitality. Salgado suggests that part of the underworld society was composed of precisely this kind of rootless person, probably knighted in the wars and discharged from the army after some expedition against Spain (the gallants in *The Guls Horne-book* are frequently posited as soldiers). Demographically the lesser gentry were increasing in numbers in the second half of the sixteenth century, but decreasing in wealth; enclosures, the abolition of the monasteries had swollen the ranks of vagrants; court faction also meant that today's great man (and his retinue) could be down on their luck tomorrow. If Sir Toby Belch conforms to the portrait of the gallant in Dekker's manual, and Sir Andrew Aguecheek is a perfect example of a gull, then their association may be no accident, for Dekker recommends that every gallant should find a foil to accompany him:

Select some friend … to walk up and down the room with you. Let him be suited if you can worse by far than yourself: he will be a foil to you, and this will be a means to publish your clothes better than Paul's, a tennis-court or a playhouse.

To be a successful gallant, it is desirable to practise a perfectly hedonist life-style, adopting revelling and drinking as primary occupations: 'your noblest gallants consecrate their hours to their mistresses and to revelling'. And as in *Twelfth Night*, life consists not of the four elements but of eating and drinking, so
Dekker advocates joining forces with a fellow roisterer and getting drunk in public:

And if any of your endeared friends be in the house and beat the same ivy-bush that yourself does, you may join companies, and be drunk together most publicly.\textsuperscript{24}

Moreover the gallant lives by his wits, never paying for his drink if he can avoid it,\textsuperscript{25} and the advice given by the hornbook is that gallants with empty purses should have recourse to gulling:

and, no question, if he be poor he shall now and then light upon some gull or other whom, he may skedler, after the genteel fashion, of money.\textsuperscript{26}

Even though \textit{The Guls Horne-book} was written in the decade following Shakespeare's play, it is possible to see it as an intertext to \textit{Twelfth Night}, for it describes a category of person well known in Elizabethan London (or at least, in its fiction). Dekker's syntax of gulling has much in common with Shakespeare's: we see Sir Toby's strategies mimic the behaviour of the would-be gallant in the \textit{Horne-book}. The reversibility of gulling is also suggested by Dekker, both in the title and in his advice to impecunious gulls that they should ‘skedler’ other gulls of money. In \textit{Twelfth Night} the gulling game is reversed in the case of Sir Toby Belch, as we have noted. Equally, the term denoting his relationship to Olivia contains a certain semantic ambivalence, an inversion of its apparent meaning. At first Sir Toby is known as ‘kinsman’ to Olivia, but she later calls him ‘Cousin’ (1.5.113, 119) and subsequently ‘my coz’ (1.5.130), terms which may indicate a closer degree of relationship as well as suggesting that she is aware of his taking advantage of her hospitality, since the terms ‘cousin’ and ‘cozen’ were considered cognate by Cotgrave (1611): ‘to clayme kindred for advantage, or particular ends; as he, who to save charges in travelling, goes from house to house, as cosin to the owner of every one’.\textsuperscript{27} Toby is therefore acknowledged by Olivia as the swindler in their midst, but as we have already seen the word ‘cousin’ can equally well designate the victim of a cozenage, the ‘practice or habit of […] cheating, deception’,\textsuperscript{28} and this reversibility is replicated in his portrayal as both guller and gull.

Gulling, as represented in the literature of the underworld, is an essentially ludic activity, and, as such, rule-bound. A survey of early rogue pamphlets reveals its division into two main sub-genres: beggar-books such as the anonymous \textit{Fraternity of Vagabonds} (1561) or Thomas Harman's \textit{A Caveat or warning for Common Cursitors} (1566), and cony-catching tracts which were ostensibly written to expose underworld activities whereby the unwary were deprived of their worldly goods. One of the earliest exponents of this sub-genre was Robert Greene. His pamphlets span the early 1590s, and the first, \textit{A Notable Discovery of Cozenage} (1591), contains narratives describing elaborate methods of cheating at cards. This is based on \textit{A Manifest Detection of Dice Play} (1552), a tract attributed to Gilbert Walker. This narrative sets out a paradigm for cheating at cards which is subsequently expanded by Greene to provide formulaic accounts of other forms of cozening in \textit{The Second Part of Cony-Catching} (1591), and \textit{The Third and Last Part of Cony-Catching} (1592). There are also plays directly drawn from the rogue narratives of the pamphlets, such as the anonymous \textit{A Knack to Know a Knave} (1592) where the protagonist is the arch cony-catcher Cutbert Cutpurse.

\textit{A Manifest Detection} demonstrates the organization and codification of card-sharping crime, which functions according to specific rules just like an inverse form of law:

And thereof it riseth that, like as law, when the term is truly considered, signifieth an ordinance of good men established for the commonwealth to repress all vicious living, so these cheaters turned the cat in the pan, giving to divers vile patching shifts an honest and godly title, calling it by the name of a law; because by a multitude of hateful rules, a multitude of dregs and draff (as it were good learning) govern and rules their idle bodies, to the destruction of good labouring people.\textsuperscript{29}
There are many kinds of the ‘art’, but cheating is the common ground of them all and this is based on the cozeners's capacity to dissemble effectively:

the first and original ground of cheating is a counterfeit countenance in all things, a study to seem to be, and not to be indeed.\textsuperscript{30}

—a phrase which evidently evokes Viola's 'I am not what I am' (3. 1. 139). The rules for cheating with dice are set out in detail, and a frequent configuration described by Walker is that four accomplices lure a victim to participate in an elaborate game:

a jolly shift, and for the subtle invention and fineness of wit exceedeth all the rest, is the barnard's law which … asketh four persons at the least, each of them to play a long several part by himself.\textsuperscript{31}

Greene takes up the same distribution of roles:

There be requisite effectually to act the art of cony-catching three several parties, the setter, the verser, and the barnacle [the fourth element being the cony himself].\textsuperscript{32}

The narrative describes the complex interaction of the three rogues in extracting money from their prey: the plot is set in motion as soon as a suitable prey comes into view, typically:

a plain country fellow, well and cleanly apparetled, either in a coat of homespun russet or of a frieze, and a side-pouch at his side.\textsuperscript{33}

and then the victim is duped into taking wine with the rogues:

then ere they part, they make a cony and so ferret-claw him at cards, that they leave him as bare of money as an ape of a tail.\textsuperscript{34}

The ingenuity of such rogues is stressed: 'they do employ all their wits to overthrow such as with their handy thrift satisfy their hearty thirst'.\textsuperscript{35} This same configuration surfaces in the gulling of Malvolio; there are three main gullers: Maria, Toby and Feste or Fabian (this may explain the mutual exclusivity of the last two in the gulling scenes), but Maria plays the most elaborate role, like the ‘barnard’ or the ‘barnacle’,\textsuperscript{36} and she is careful to observe the tripartite pattern of the game:

I will plant you two—and let the fool make a third—where he shall find the letter.

(2. 3. 167-68)

Indeed the ludic dimension of the tricking of Malvolio is underlined by its designation as 'Sport royal' (2. 3. 166), and it is alluded to as ‘sport’ several times (2. 5. 173; 2. 5. 191). In the last scene, when the Duke is about to pass judgement on the affair, Fabian pleads for this view of gulling as essentially ludic to be upheld:

How with a sportful malice it was followed
May rather pluck on laughter than revenge
If that the injuries be justly weighed
That have on both sides passed.

(5. 1. 362-65).
We may equally question whether the inversion of values in the underplot of *Twelfth Night* where Sir Toby Belch functions as the Lord of Misrule, and honest everyday activity is absent, does not replicate the inversion of the rules of honest society demonstrated by the description of the cheating ‘laws’ in the underworld pamphlets.\(^{37}\)

Nevertheless ‘justice’ is not always done, for as the authors of rogue literature recognize, the game can sometimes turn against its instigator, and biters can also be bit:

> Thus we may see, *fallere fallentem non est fraus*: every deceit hath his due: he that maketh a trap falleth into the snare himself, and such as covet to cozen all are crossed themselves oftentimes almost to the cross, and that is the next neighbour to the gallows.\(^{38}\)

This mutability of fortune can be seen to apply to Sir Toby: his gulling Sir Andrew into a duel results in a bleeding head, and, as already demonstrated, he is comically ‘caught’ by Maria as a consequence of her success with Malvolio.

If gulling is a game, this implies performance, and, as such, it constitutes a spectacle. For example, the metamorphosis is verbally and visually an essential characteristic of the gulling process. In the table of words published in the *Notable Discovery of Cozenage* (1591), Greene informs us that in highway robbery the victim is called ‘a martin’; in cony-catching law, the victim received the designation of ‘cony’. In *The Black Book’s Messenger* (1591), the same Greene lists the terminology used by Ned Browne, ‘one of the most notable Cutpurses, Crossbiters and Cony-catchers that ever lived in England’, which emphasizes the cynegetic transformation of all involved in the gulling process:

> He that draws the fish to the bait, the beater.
> The tavern where they go, the bush.
> The fool that is caught, the bird.\(^{39}\)

Dekker, in *Lantern and Candlelight* (1608) appends a list of those necessary to execute a swindle in a game of cards where all the participants are designated as varieties of birds:

> In this battle of cards and dice are several regiments and several officers: …

> He that wins all is the ‘Eagle’.
> He that stands by and ventures is the ‘Woodpecker’.
> The fresh gallant that is fetched in is the ‘Gull’.
> He that stands by and lends is the ‘Gull Groper’.\(^{40}\)

The *OED* records ‘to grope a gull’ as being synonymous in 1536 with the expression ‘to pluck a pigeon’.\(^{41}\) Thus the lexis of rogue literature represents gulling as the transformation of a human victim into an animal species, often into birds.

Similarly the representation of gulling in *Twelfth Night* recognizes that transformation is, by definition, inherent in cozening: Maria expresses her intention to transform Malvolio into his very opposite: to ‘gull him into a nayword’ (2. 3. 130); later she notes the success of her ambition, saying ‘Yon gull Malvolio is turned heathen, a very renegado’ (3. 2. 65-6). To be revenged on the steward for his reproval of their revelry, the plotters seek to change Malvolio into a creature of farce; like Bottom in *A Midsummer Night’s Dream*, he is to be transformed into an ass, as indicated by Maria's comment ‘Go shake your ears’ (2. 3. 121). Sir Andrew, for once, manages a real witticism in this respect, for when Maria says: ‘My purpose is indeed a horse of that colour’, he replies: ‘And your horse now would make him an ass’ (2. 3. 161-3).
When Malvolio takes up the forged letter, this process of transformation is marked by his metamorphosis into a whole range of native woodland animals. Already, in anticipation he has been designated ‘the niggardly rascally sheep-biter’ (2. 5. 4-5), ‘the trout that must be caught with tickling’ (2. 5. 20-1), and, as the extent of his self-delusions is revealed, the tricksters turn him into ‘a rare turkeycock’ (2. 5. 29). Then, just as he approaches the letter he is seen as a game bird (of a proverbially stupid nature): ‘Now is the woodcock near the gin’ (2. 5. 81); immediately after opening the letter he becomes a badger—‘Marry, hang thee, brock’ (2. 5. 102)—then a bird of prey—‘And with what a wing the staniel checks at it!’ (2. 5. 112)—then a hound sniffing at a scent while he wrestles with the conundrum of MOAI:

SIR Toby

... he is now at a cold scent.

FABIAN

Sowter will cry upon't for all this, though it be as rank as a fox.

(2. 5. 119-21).

This process of metamorphosis (of the *basse-cour*) echoes that of the real court (i.e. the *haute-cour*) where Orsino is changed into Actæon, the stag devoured by his own hounds, and Olivia compares herself to a bear chained to the stake, attacked by her own desires (3. 1. 117-19). Malvolio too is transformed into a bear, as Sir Toby says:

To anger him we'll have the bear again, and we'll fool him black and blue, shall we not, Sir Andrew?

(2. 5. 8-10).

What is more, in his comic transformation, Malvolio may well change himself into a grotesque bird before our very eyes, when he says to Olivia: ‘Not black in my mind, though yellow in my legs’ (3. 4. 24-5). This kind of grotesque transformation intersects with the disguises adopted as part of Carnival, where the sober black and white garb of the Puritan is transformed into motley, the garb of the Fool, by the garish addition of yellow; his identity is inverted and subverted by the force of comedy. The imposition of a symbolic animal identity on an individual, as E. Le Roy Ladurie notes, was characteristic of late sixteenth and seventeenth-century Carnival and the person thus disguised was king of his *reynage* or faction: thus in Romans in 1580, the representative of the upper classes adopted the identity of an Eagle, that of the lower classes, a capon, a castrated cock. There are references to Malvolio’s provisional castration in the constriction imposed by cross-gartering; and by exposing him to the force of satire, *via* visual and mental metaporphosis into a gull, we recognize one of the typical forces unleashed by Carnival, that of seeking to purge society of evil—indeed Maria refers to her gulling as *physic* (2. 3. 166). Such evil is formulated in *Twelfth Night* as self-love, hypocrisy, social ambition, elements united, for the gullers and for the play-goers too, in the guise of Puritanism. Indeed in this play deliberate trickery exposes hidden truth, evidence of a dialectic between truth and untruth noted elsewhere by Shakespeare, for instance when Polonius says: ‘Your bait of falsehood takes this carp of truth’ (*Hamlet*, 2. 1. 62).

It is possible that this visual transformation of Malvolio also contains a reference to the iconography of melancholy since the *OED* records as late as 1600 the adjective ‘gull’, meaning yellow: ‘Thou was full blyth and light of late ... / And art now both gool and green’: thus yellow stockings may also be the symbolic markings of a melancholic. Malvolio has therefore been metamorphosed into the comic double of Orsino, whose narcissism he reflects and comically amplifies.
Nevertheless metamorphosis is not the only element borrowed from the performance aspect of gulling as presented in the narratives of underworld literature. Other characteristics include putting on an entertainment for the sake of others—this is what Maria achieves by making Malvolio into ‘a common recreation’. A typical cony-catching story demonstrates how the enjoyment of the spectacle of a victim's discomfiture constitutes an integral part of the action:

A kind of foist performed in St Paul's:

There walked in the middle walk a plain country farmer, a man of good wealth, who had a well-lined purse, which a crew of foists having perceived, their hearts were set on fire to have it, and every one had a fling at him, but all in vain, for he kept his hand close in his pocket, and his purse fast in his fist like a subtle churl. Well, however, it was impossible to do any good with him he was so wary. … At last one of the crew … spoke to fellows … went to the farmer and walked directly before him … swooned … the poor farmer, seeing a proper young gentleman, as he thought, fall dead afore him, held him in his arms … the foist drew the farmer's purse and away … coming to himself, staggered out of St Paul's to join his crew and there boasted of his wit and experience.47

The ingenuity required to devise a plan to rob this particular farmer of his money commands the admiration of the co-plotters: a similar concern for and delight in plotting is evident in the play, as Sir Toby says, gleefully: ‘Excellent, I smell a device …’ (2. 3. 156)

The ‘play-acting’ in St Paul's with the elaborate charade of the mock fainting emphasizes the incident's status as a dramatic interlude, and in The Guls Horne-book, Dekker describes how ‘plotting’ is one of the activities which occupy the gallant's leisure hours:

The Duke's Tomb is a sanctuary … There you may spend your legs in winter a whole afternoon: converse, plot, laugh and talk any thing.48

In Twelfth Night the plot to gull Malvolio introduces a theatrical mise en abyme, the intradramatic doubling of all the aspects of performance. It is an additional layer of reflexivity in a play whose plot turns upon the confusion engendered by the existence of twins, where narcissism creates its own double(s), and where disguise inverts notions of sameness and difference.

In the sub-plot of Shakespeare's comedy, energy and appetite—characteristics of gulling49—are meshed with farce. Although the origins of farce are ancient, it was an essential component of Mystery and Morality plays and flourished in medieval France as a dramatic genre in its own right. In La Farce ou la Machine à rire, Bernadette Rey-Flaud argues that medieval farce was not an intrigue following a linear scheme but a tripartite mechanism, comparable to a syntactic group centred on a verb.50 In her view, whatever the specificity of the verb according to the individual farce, its essential significance must be ‘to dupe’. One of the expressions for ‘to dupe’ in Middle French farces, especially La Farce de Maistre Pathelin, was ‘manger de l'oie’.51 It is striking that the paradigmatic image of the goose contains the same elements as we have seen in ‘gull’, i.e. a bird and the victim of a stratagem. Moreover, ‘gull’ in the dialect of Warwickshire and Worcestershire could, until relatively recently, have the meaning of ‘an unfledged bird, especially a gosling’: a sense found in Shakespeare: ‘for I do fear / When every feather sticks in his own wing / Lord Timon will be left a naked gull, / Which flashes now a phoenix.’ (Timon, 2. 1. 29-32); the word ‘gull’ here is cognate with ‘goose’. In medieval fabliaux, the goose is an object of desire, thus an object of theft, an easy prey and a silly victim. These characteristics are codified in 1597 in a game entered by John Wolfe in the Stationers' Register as A new and most pleasant Game of the Goose (sometimes also known as Fox and Geese).
The association of duping with the image of a bird is therefore common to both gulling literature and farce. If we examine the lexical ramifications of the term ‘gull’ in detail, a further clue to the dramatic syntax of the subplot may emerge. There are earlier attestations of the word where the seabird—a prominent meaning of the term here—figures allusively as an image of appetite. Crowley in *A Way to Wealth* in 1550 has it that: ‘Men that would have all in their own handes … Comerauntes, gredye gulls, yea men that would eate up mene, women and children’. This meaning can be extrapolated to include the other sense of ‘gull’, i.e. throat or mouth, and which occurs as a verb, from the French *engouler*. Palsgrave (1530) glosses ‘I gulle in drinke as great drinkers do’, as ‘je engoule’. There exists a further attestation (1607): ‘O you that gull up the poysioned cup of pleasure’. In the seventeenth century, this sense is apparently always associated with revelry and indulgence in drink: ‘They are roystering and gulling in wine with a dear felicity’ (a phrase which admirably describes the knights' activities in this play). On a semantic level Sir Toby and Sir Andrew inscribe themselves as ‘gulls’, so that the dramatic and linguistic ramifications of ‘gulling’ reinforce one another in the play.

In the last Act, the limit of comedy is attained with the denunciation of gulling. Of the tricking of Malvolio, Orsino remarks: ‘This savours not much of distraction’ (5. 1. 311), the pun on *distraction* indicating that he finds not only that the steward is sane but that as Duke and ultimate authority, he fails to appreciate the humour of gulling. Here the designation of the various victims as ‘gulls’ can be seen as the final stage in the dramatic syntax, since for Malvolio and Sir Andrew the term ‘gull’ is the culmination of previous insults: Malvolio refers to himself as the ‘most notorious geck and gull’; and Sir Toby turns on Sir Andrew, stripping away any pretence of friendship, calling him ‘an ass-head, and a coxcomb, and a knave; a thin-faced knave, a gull’ (5. 1. 203-4). The ultimate metamorphosis bears no face, and as such it is the *ne plus ultra* of grotesque metamorphosis which marks the limit of carnivalesque transformation.

Examination of the context, or of the intertexts, of gulling in *Twelfth Night* might reveal an instance of what Stephen Greenblatt calls ‘the circulation of social energy’, when he argues that the theatre appropriates the energy of other kinds of discourse and adapts them for dramatic purposes. I would argue instead that the gulling game has affinities with theatrical representation since the simple narratives of the pamphlet literature enact fictive deceptions, in which comedy is often latent. To use Feste's expression (5. 1. 292) we observe how drama allows *vox* to the potential of these narratives, the result being an amplification of the dramatic dimension of gulling and a release of comic energy, as palpable on the twentieth-century stage as in the seventeenth-century playhouse.

But this is not to say that the loss of the Elizabethan context does not, in some sense, weaken the impact of the gulling on the spectator. The playhouse itself was the site of much nefarious activity: cut-purses, pickpockets and prostitutes thrived in the vicinity, if not on the premises themselves. Leah Scragg goes as far as reading into *Twelfth Night* a meta-textual warning against pickpockets: she argues that Malvolio's reference to Olivia's Cs, Us, Ts and her great Ps spells out the beginning of the word *CUTP*—, that is, cutpurse. The bear-baiting imagery associated with the treatment meted out to Malvolio may also allude to the proximity of the Elizabethan playhouse to the Bear Garden. ‘Yon gull Malvolio’ may then be designated as the most notorious of gulls, but certain of those looking on are gulled too, so the text reflexively implies that being a spectator to a gulling is to run the risk of becoming a gull oneself. Indeed the onstage gulling may have held a mirror up to cozenings in progress within the confines of the playhouse. Moreover, if the spectator has been led to believe in the innocuousness of gulling on account of its place in the comic underplot, the final moments of the play when Malvolio departs vowing ‘I'll be revenged on the whole pack of you’ (5. 1. 374) demonstrate that gulling takes comedy to its limit, and that in fact the playgoer may have been gulled into an assumption of its inoffensiveness.

In *Twelfth Night* gulling is allied with farce, but is also a means of exposing the truth. Malvolio, the pious Puritan, is revealed as an abominable hypocrite and a libidinous *arriviste*. But Maria is replaced by Feste as the master of the game, and the ‘sportful malice’ turns its perpetrators into sadistic persecutors in its latter
stages, and demonstrates that gulling may unleash evil impulses in apparently good-natured characters. Malvolio has committed no crime, he is appreciated by Olivia for the quality of his stewardship and, if his humiliation may appear as poetic justice, his imprisonment and virtual torture cannot be justified; as Hazlitt remarks, ‘poor Malvolio’s treatment is a little hard’. It has often been observed that Malvolio's refusal to participate in the festivity ends points to the tragic potential of gulling, but the corrupting influence of the ‘sport’ on its agents passes without comment.

The darker implications of this ostensibly ludic activity may anticipate the Machiavellian appropriation of the sport by Iago in *Othello* (1604). Here there is but a single player, an infinitely more sinister master of the game than Maria, who nevertheless acquires diabolic associations by setting events in motion, being apostrophized as ‘thou most excellent devil of wit’ (2. 5. 199-200). But in *Othello*, the pleasure of contrivance is a private, perverted pleasure experienced only by Iago, whose gullings exceed the force of the *beffa* in their savagery. Like his counterparts, Iago takes delight in gulling, but unlike them, he revels in evil for its own sake; there is no satisfactory explanation for his obsessive desire to destroy, whereas we understand, and even sympathize with, the plotters' desire for revenge on Malvolio. Iago's prey, Othello, although not without failings, does not deserve to be cozened into murdering his wife, forfeiting his self-respect and taking his own life; thus the balance of sympathy is wholly on the side of the victims in this play, and the consequences of cozening result in the deaths of most protagonists. In *Twelfth Night* Malvolio's predicament awakens only tardy and partial sympathy and his refusal to join in the general celebration does not have any incidence on the comic dénouement; he emerges unscathed and unchanged from the gulling game. But the gulling of Malvolio (and even of Sir Andrew Aguecheek) has revealed that this is potentially, if not necessarily, a cruel game. Othello undergoes tragic metamorphosis, the efficient soldier being transformed into a jealous monster, and the moment of anagnorisis is reached when (as in *Twelfth Night*) the victim is called a ‘gull’ to his face. Emilia says to Othello:

*O gull, O dolt,*

As ignorant as dirt! ...

(*Othello, 5. 2. 170-1*)

The depiction of gulling in *Twelfth Night* progressively reveals its latent forces, for the game's centripetal energy corrupts the players: Feste's sadistic treatment of Malvolio in the dark contrasts with Maria's innocent enjoyment of a ridiculous spectacle. In *Othello*, the latent energy of gulling is unleashed and we witness the extent of its capacity for destruction. But the game's forces, multiple trajectories and dramatic syntax are identifiably the same in both plays. Hence the difference between ‘comic’ and ‘tragic’ gulling as exemplified by *Twelfth Night* and *Othello* is one of emphasis and not of essence.

**Notes**

1. G. Bullough, *Narrative and Dramatic Sources of Shakespeare*, vol. 2 (1958), p. 287, says: ‘If we believe that Shakespeare used *Gl’Ingannati* as a source we may also believe that he took his title from a phrase in its prologue.’ However, he fails to make the connection between the sense of *beffana* and the comic gullings which figure in *Twelfth Night*: ‘Yet even if Shakespeare had read the passage and had recognized “la notte di beffana” as meaning “Twelfth Night”, there is nothing in the context of that prologue to lead him towards choosing this title for his comedy.’

2. In 1602 John Manningham’s comments record his impression of the gulling of Malvolio being the play’s most memorable feature; see *The Diary of John Manningham of the Middle Temple (1602-3)*, edited by Robert Parker Sorlien (1976), p. 48. Many modern critics have concurred with the view that Malvolio is the play’s central attraction, for example, Mark Van Doren, ‘The center is Malvolio’, *Shakespeare* (1939), p. 169 and Milton Crane, ‘*Twelfth Night* and Shakespearean Comedy’, *Shakespeare Quarterly*, 6 (1955). For a counter-view, see Harold Jenkins, *Shakespeare’s *Twelfth

5. Quoted by E. Story Donno, Twelfth Night, p. 8. The play was performed before Charles I at Whitehall on 2 February, 1631.

8. Bertrand Evans, ‘The Fruits of the Sport’ in Shakespeare's Comedies (Oxford, 1960), p. 130: ‘Of the race of Bottom, Sir Andrew would be at a disadvantage if he were not being gullied; being gullied, he is doubly “out”.’

9. Nashe, in The Terrors of the Night (1594), qualifies the gull in the following terms: ‘Lives there anie such slowe yce-brained, beefe-witted gull’ (OED, sb. 3, 1., quoted from Grosart, 111, 257) and we note that Andrew Aguecheek inadvertently advertises his own gullibility by applying the epithet ‘beef-witted’ to himself: ‘I am a great eater of beef, and I believe that does harm to my wit’; to which Sir Toby replies: ‘No question’ (1. 3. 80-1).

11. According to B. Rey-Fland, La Farce ou la Machine à rire. Théorie d'un genre dramatique 1450-1550. Droz (Geneva, 1984), the former is ‘un bon tour pour rire’ (a good-natured trick to arouse laughter), and the latter ‘un mauvais tour’ … ‘pièce au déroulement complexe, articulée sur une tromperie fondée sur le jeu d'un mécanisme déterminant strictement les rapports entre les personnages’ (a nasty trick … whose progression is complex, involving a deception based on the action of a mechanism determining the relations between characters); p. 218, n. 50. The beffa is typically used to obtain reparation for insult or injury, as D. Boilet notes in ‘L'usage circonspect de la beffa dans le Novelino de Masuccio Salernitano’, Formes et significations de la ‘Beffa’ dans la littérature italienne de la Renaissance, 2 vols. (Paris, 1972-5) vol. 2, p. 101. See also K. M. Lea, Italian Popular Comedy. A Study in the Commedia dell'arte 1560-1620 with special reference to the English Stage, 2 vols. (New York, 1962).

13. Draper, The ‘Twelfth Night’ of Shakespeare's Audience: ‘Twelfth Night is rather the comedy of the social struggles of the time. Orsino wishes to fulfill his duty as head of the house and prolong his family line by a suitable marriage; Maria wants the security and dignity of marriage to a gentleman—a difficult accomplishment in view of her lack of dowry. Feste and Sir Toby want the security of future food and lodging; Viola and Sebastian hope to reassume their doffed coronets; and Sir Andrew and Malvolio are arrant social climbers … In short, this is Shakespeare's play of social security’, pp. 249-50.

14. Leo Salingar, Shakespeare and the Traditions of Comedy (Cambridge, 1974), p. 84: ‘The lesson of classical “art” for the comic playwright was the pleasure of contrivance. And the other leading motif Roman comedy, readopted and constantly diversified by Shakespeare and his renaissance predecessors, was deception—the irony of the trickster.’

16. This may be another example of what L. G. Salingar calls ‘points of contact between characters’ which is a constant theme in the play; ‘The Design of Twelfth Night’, Shakespeare Quarterly, 9 (1958), 117-39.

21. Draper in *The 'Twelfth Night' of Shakespeare's Audience*, chapter on ‘Sir Andrew Aguecheek’, comments on the ‘fellowship between Sir Toby and this foolish knight, the archetype of the contemporary dupe’: ‘Such gulls as Sir Andrew feathered the nests of many a rare bird in Elizabethan London’, p. 61.

Criticism: Themes: Paul Dean (essay date 2001)

[In the following essay, Dean analyzes Twelfth Night as the union of Renaissance Platonism and Augustinian theology, contending that Shakespeare employed the device of twins in order to explore the notion that two individuals are united as one through love, a concept that was understood by Neoplatonists to be analogous to the doctrine of the Trinity.]

One cannot read far into Twelfth Night without noticing the extent to which Shakespeare is fascinated, in this play, by triads and their possible resolution into monads. Olivia’s ‘liver, brain and heart’ are to be supplied, in Orsino’s imagination, with ‘one self king’ (I. i. 36-8); the Captain was ‘bred and born t three hours’ travel from this very place’ (I. ii. 20-1); Sir Toby tells Maria that Sir Andrew ‘has three thousand ducats a year’, to which she replies, ‘Ay, but he'll have but a year in all these ducats’ (I. iii. 20-1); Sir Andrew wishes he had ‘bestowed that time in the tongues that I have in fencing, dancing, and bear-baiting’ (I. iii. 88-9); Olivia will ‘not match above her degree, neither in estate, years, nor wit’ (I. iii. 102-3); Orsino has known Cesario ‘but three days’ (I. iv. 3); a drunkard is like ‘a drowned man, a fool, and a madman’ and Sir Toby is ‘in the third degree of drink’ (I. v. 125-30); Olivia possesses a ‘most radiant, exquisite, and unmatchable beauty’ yet remains a ‘good gentle one’ (I. v. 162, 171); Olivia’s ‘schedules’ of her beauty proceed in three stages, ‘item, two lips … item, two grey eyes … item, one neck, one chin, and so forth’ (fourth?) (I. v. 236-7); Viola sets
out the infernal triangle in which she, Olivia, and Orsino are trapped (II. ii. 33-5); Feste asks Sir Toby and Sir Andrew ‘Did you never seee the picture of “we three”? ’ (II. iii. 15-16); Sir Toby proposes to sing ‘a catch that will draw three souls out of one weaver’ (II. iii. 56-7), and the catch when sung is for three voices; Sir Toby also sings ‘Three merry men be we’ (II. iii. 72); Malvolio asks the roisterers whether they have ‘no wit, manners, nor honesty’ (II. iii. 83); Maria schemes to ‘plant you two—and let the fool make a third’ in the box-tree (II. iii. 161-2, cf. II. v. 83); Orsino charges women’s affections with suffering ‘surfeit, cloyment, and revolt’ (II. iv. 98); Sir Toby dallyies with the idea of marrying Maria with ‘Shall I play my freedom at tray-trip? ’, a dice game in which the winner was the one who threw a three (II. v. 179); Sir Toby, impressed by Cesario's courtly vocabulary, recapitulates “Odours”, “pregnant” and “vouchsafed”—I'll get 'em all three all ready’ (III. i. 88-9); Viola insists ‘I have one heart, one bosom, and one truth’ (III. i. 156); Sir Toby says of Sir Andrew's challenge, ‘If thou “thou'st” him some thrice, it shall not be amiss’ (a miss?) (III. ii. 41-2); Malvolio declares, ‘Please one, and please all’ (III. iv. 22); Sir Toby warns Cesario of Sir Andrew that ‘souls and bodies hath he divorced three’ (III. iv. 229); Feste attempts to beg a third coin from Orsino with a set of variations on triplets (V. i. 32-5); Antonio is as certain that he has been with Cesario/Sebastian for ‘three months’ as Orsino is that ‘three months this youth hath tended upon me’ (V. i. 89, 94); Sebastian says that if only Cesario were a woman he would say, ‘Thrice welcome, drowned Viola’ (V. i. 235).

There are of course other numbers in the play, and nobody would want to hang an argument on such evidence alone, but it seems indisputable that Shakespeare, like other writers of the period such as Spenser or Donne, was prepared to play teasing Neoplatonic, numerological games with ones and threes. A triad in Neoplatonism is not the same concept as the three-in-oneness of the Christian Trinity, but Shakespeare's non-dramatic poetry offers firm evidence that he was interested in the paradoxes of the latter doctrine. Commenting on Sonnet 105 (‘Let not my love be called idolatry’) in her recent study of the Sonnets, Helen Vendler notes that it depends first of all on the reader's recognizing the speaker's inventive transmutation of Christian Trinitarian theology and of the doxology. But this substantial piece of cleverness is accompanied by others. First of all, by identifying his beloved's qualities (fair, kind, and true) as those of the Platonic Triad (the Beautiful, the Good, the True), the poet opposes to his accuser's Christian Trinity an equally powerful, but classical, cultural totem as an emblem of the divine. The early Christianizing of the Platonic Triad had somewhat muted the contrast between classical and Christian values, but Shakespeare here restores them to full opposition.¹

She goes on to note the structuring of the poem in Trinitarian terms, the octave concentrating on oneness, the first three lines of the sestet on threeness, and the last three on three-in-oneness, so that the sonnet ‘is what it describes: a combination of one and three to make up three-in-one’.² I agree with Vendler that Shakespeare is juxtaposing Neoplatonism and Christianity in this sonnet, although I am not as sure as she is that he is concerned only with the opposition between them, and I certainly do not believe that to be the case in Twelfth Night.

A further key piece of evidence from the poetry, The Phoenix and the Turtle, was written about the same time as Twelfth Night and published in 1601 in the collection Loves Martyr, edited by Robert Chester. It is, in the words of its recent editor John Roe, a poem about ‘the paradox of pure eros’³ which equally expresses itself in terms of the monad-triad relationship:

So they loved, as love in twain
Had the essence but in one:
Two distincts, division none;
Number there in love was slain.

(II. 25-8)
The love engendered between the two birds becomes a third term in the equation: ‘Either was the other’s mine’ (l. 35), a word which I would see as an extraordinarily bold use of the pronoun requiring mental inverted commas (‘Either was the other’s “mine”’). J. V. Cunningham has argued that the doctrine of love put forward in this stanza is Trinitarian, a position to which Roe is sympathetic. The stanza which has received most recent attention runs:

Property was thus appalled  
That the self was not the same;  
Single nature's double name  
Neither two nor one was called.

(ll. 37-40)

An exchange between Christianne Gillham, Peter Milward, and James H. Sims has sought to relate this stanza to Plato's Symposium and to Aquinas and Augustine on the Trinity, works which I shall also cite as important for our understanding of Twelfth Night. In passing from the anthem to the threnos, as Roe observes, ‘two-in-one becomes three-in-one’, as in Sonnet 105; and when he praises the poem for ‘The curious effect of producing a mood of triumph and exhaleration in treating of loss and disillusionment’ I am irresistibly reminded of the peculiarly precarious comic mood of Twelfth Night, steeped as it is in a melancholy which could have turned to something more painful. Indeed, perhaps it shortly afterwards did so; Stephen Medcalf has drawn attention to the strain of Platonic argument, which he derives from The Phoenix and the Turtle, in Troilus and Cressida, while if E. A. J. Honigmann is right, as I believe he is, in his suggestion that Twelfth Night and Othello were acted by the same cast, the remarkable ‘infernal trigonometry: a perfect, highly complex pattern of incongruent triangles’ which A. P. Rossiter discerned in the later play could be seen as a kind of diabolical inversion of Trinitarianism.

Twelfth Night itself has been linked to Plato, although its Trinitarianism has scarcely been remarked. That unprecedentedly audacious Shakespearian coup de théâtre, the reunion of Viola and Sebastian, offers a moment of stasis, of contemplative wonder, in a play full of comings and goings; a moment, too, which challenges the other characters', and our own, faith in the evidence of the senses, as Orsino remarks, ‘One face, one voice, one habit, and two persons, natural perspective, that is and is not’ (V. i. 209-10), and Antonio's question to Sebastian—‘How have you made division of yourself? apple cleft in two is not more twin an these two creatures’—is echoed by Sebastian himself: ‘Do I stand there?’ (V. i. 216, 220). Barbara Everett, in her fine essay on Twelfth Night, remarks that at this point ‘the language deliberately but signally takes on what can only be called metaphysical dimensions’, so that Shakespeare ‘is asking questions almost too profound and philosophical for a romantic comedy’, and she cites by way of analogy the discussion of the origins of gender in Plato's Symposium. At the same time, the echoic closeness of ‘twin’ to ‘twain’ was likely to raise biblical and liturgical echoes for Shakespeare and his audience: when the Pharisees question Jesus about divorce,

he answered and said vnto them, Haue ye not read, that he which made them at the beginning,  
made them male and female. And said, For this cause, shall a man leaue father and mother,  
and cleeve vnto his wife, and they which were two, shalbe one flesh? Wherefore they are no  
more twaine, but one flesh.

(Matthew 19: 4-6)

In this passage Jesus alludes to Genesis 1: 26-7: ‘Furthermore God said, Let vs make man in our image  
according to our likenesse … Thus God created man in his image: in the image of God created he him: he  
created them male and female.' Shakespeare and his audience also knew these passages from the marriage  
service (which probably underlies the opening of Sonnet 36, ‘Let me confess that we two must be twain,
though our undivided loves are one’), and Augustine several times quotes the words ‘Let us make man in our image’, in his treatise on the Trinity, as evidence that the doctrine was already latent in the Old Testament. 

If Shakespeare read Plato it was almost certainly in Latin; Stephen Medcalf speculates that he might have had access to Jonson’s copy of Serranus’s edition and translation. However that may be, Shakespeare had a close knowledge of the Platonic tradition as it had been transmitted by the Renaissance, and, I think, was also well acquainted with Augustinian theology, if not specifically with the treatise on the Trinity. *Twelfth Night* is a characteristic fusion (rather than a Vendlerian opposition) of these ideas. My argument in what follows will be that Shakespeare uses the device of the twins, two individuals with, as it were, one flesh in Cesario, to explore the mystery of human love whereby twain become one, understood Neoplatonically as an analogy of the doctrine of the Trinity.

II

In the *Symposium* Plato puts into the mouth of Aristophanes the myth that originally human beings were spherical in shape: ‘each human being was a rounded whole, with double back and flanks forming a complete circle’, with each bodily organ and feature doubled; there were three sexes, male, female, and hermaphrodite which was a compound of the other two. The male sprang from the sun, the female from the earth, and the hermaphrodite from the moon, ‘which partakes of the nature of both sun and earth’. Fearing that the power of the human race posed a threat to the gods, Zeus bisected each person in order to dissipate its energies. Love, and its physical expression in sex, are thus explained as ‘the desire and pursuit of the whole’, the longing of human beings to recover their original spherical shape (we remember Othello and Desdemona ‘making the beast with two backs’). Halves derived from hermaphrodites, Aristophanes adds, are heterosexual in orientation, halves derived from male spheres homosexual, and halves derived from female spheres lesbian. The relevance of this to the biologically impossible existence of identical twins of opposite sexes, Viola and Sebastian, and of the composite Cesario for whom each is at various times mistaken, seems clear. When Viola defines the incongruous and incongruent triangles which she finds so frustrating, she recognizes the dilemma of hermaphroditism in which she has unwittingly placed herself by her disguise—which, we may remember, she expected, in a strikingly Neoplatonic phrase, to ‘become e form of my intent’ (I. ii. 51-2):

> How will this fadge? My master loves her dearly,  
> And I, poor monster, fond as much on him,  
> And she, mistaken, seems to dote on me.  
> What will become of this? As I am man,  
> My state is desperate for my master's love.  
> As I am woman, now alas the day,  
> What thriftless sighs shall poor Olivia breathe!  
>  
> (II. ii. 33-9)

The ‘as’ in ‘As I am man … As I am woman …’ means both ‘in so far as’ and ‘since’. Her plight is made worse if she has, as she requested, been presented to Orsino by the Captain ‘as an eunuch’ (I. ii. 53). Shakespeare does not follow out this idea, perhaps wisely; at any rate the word suggests the frustrating denaturing which Viola must undergo in her disguise.

At the rediscovery of the Platonic corpus during the Italian Renaissance, the *Symposium* was frequently condemned as immoral, for instance by Antonio Panormita in his book *Hermaphroditus* (1425), although it found powerful defenders such as Leonardo Bruni and Cosimo de’ Medici. In 1469 Cardinal Bessarion's treatise *In calumniatorem Platonis* rehabilitated the dialogue by placing it in what James Hankins calls ‘a tradition of metaphysical eros’, setting out the doctrines of Platonic love. Bessarion was buttressed by Marsilio Ficino's commentary on the *Symposium*, also published in 1469, which, like Bessarion, leaned on
Augustine and recognized that Plato had evolved his own kind of Trinitarian thinking.\textsuperscript{17}

Ficino's \textit{Convivium} is undoubtedly the most important of these works,\textsuperscript{18} since it was widely known in England through its restatement by Castiglione in \textit{Il Cortegiano}, translated into English in 1561 by Sir Thomas Hoby as \textit{The Book of the Courtier}, a work Shakespeare knew. The \textit{Convivium} is itself cast in the form of a symposium, whose participants take turns to comment on the speeches in Plato. There are numerous points of interest for a reader of \textit{Twelfth Night}; for example, the remark that Platonists are supposed to think in triplets (p. 43 n. 7), or the belief of the Pythagoreans that ‘the Trinity was the measure of all things’ (p. 45)—Malvolio, we recall, was to ‘hold th'opinion of Pythagoras’ concerning transmigration before Feste would believe him sane (IV. ii. 57-9); or the statement that the soul dwells in the body as in the Lethe (p. 76), just as Sebastian prays, ‘Let fancy still my sense in Lethe steep’ (IV. i. 60—the preceding line, quoted earlier, was ‘Or I am mad, or else this is a dream’). On a broader canvas, the speeches of the commentators frequently offer illuminating glosses on the relationships in \textit{Twelfth Night}. Here, for example, is Cavalcanti commenting on Pausanias:

\begin{quote}
O wondrous contact in which he who gives himself up for another has the other, and does not cease to be himself! O inestimable gain, when two become one in such a way that each of the two, instead of being only one, becomes two, and, as if he were doubled, he who had one life, with only one death intervening, now has two lives. For a man who dies once and revives twice has acquired for a single life a double, for a single self two selves. … The soul of the love becomes a mirror in which the image of the beloved is reflected. For that reason, when the beloved recognises himself in the lover, he is forced to love him.
\end{quote}

(pp. 56-7)

Or here is Cristoforo Landini commenting on that very speech of Aristophanes to which I referred at the outset. He allegorizes it, equating the male hemispheres with courage, the female with temperance, and the hermaphrodite, because of its impartial nature, with justice. Souls were created originally with two lights, one innate, whereby they perceived inferiors and equals, and one infused, whereby they acknowledged superiors. Division came when they turned to innate light alone:

\begin{quote}
When souls, already divided and immersed in bodies, first have come to the years of adolescence, they are aroused by the natural and innate light which they retained (as if by a certain half of themselves) to recover, through the study of truth, that infused and divine light, once half of themselves, which they lost in falling.
\end{quote}

(p. 73)

If you are the lover, another speaker adds, you must be near the beloved in order to be near yourself, since all your striving is to ‘ransom your captive self’ (p. 129).

The trap of narcissism is also considered by Ficino. The inexperienced soul achieves in the body a beauty which is really its own shadow, so its desire is directed upon itself, but not realizing this it remains eternally unsatisfied (pp. 140-1). One thinks of Malvolio ‘practising behaviour to his own shadow’ (II. iii. 14-15), although the Echo and Narcissus myth has far wider applicability to the play.\textsuperscript{20} Medieval interpretation of Ovid had thrown up one detail which, as far as I know, is not paralleled elsewhere outside Shakespeare: Pausanias speculated that Narcissus might have had a twin sister who died, and that he drowned himself believing it was she whom he saw in the pool. It would follow from this, of course, that they were identical twins.\textsuperscript{21}
Castiglione refers to the Symposium explicitly and allusively, as when he gives the following comments to Lord Julian de Medicis:

Truth it is, that Nature entendeth alwaies to bring forth matters most perfect, and therefore meaneth to bring forth the man in his kind, but not more male than female. Yea were it so that she alwaies brought forth male, then should it without peradventure bee an unperfectnesse: for like as of the bodie and of the soule there ariseth a compound more nobler than his partes, which is man: Even so of the felowship of male and female there ariseth a compound preserving mankinde, without which the partes were in decay, and therefore male and female by nature are alwaies together, neither can the one be without the other: right so he ought not to bee called the male, that hath not a female (according to the definition of both the one and the other) nor she the female that hath not a male.

And so for much as one kinde alone betokeneth an imperfection, the Divines of olde time referre both the one and the other to God: Wherefore Orpheus saide that Jupiter was both male and female: And it is read in scripture that God fashioned male and female to his likenes. And the Poets many times speaking of the Gods, meddle the kindes together.22

Lord Julian then becomes embroiled in a complicated discussion with Lord Gaspar Pallavicin about the similarity of male and female to Platonic Form and Matter respectively, until they are both rebuked by the umpire of the discussion, Lady Emilia Pia: ‘for love of God (quoth she) come once out of these your Matters and Formes and males and females, and speake so that you may bee understood’.23 The case is, however, even more complicated than Lady Emilia supposes.

Ovid's treatments of the myths of Echo and Narcissus in Book III, and of Salmacis and Hermaphroditus in Book IV, of the Metamorphoses lodged in the minds of Shakespeare and his contemporaries. As Leonard Barkan observes, the stories are thematically paired, that of ‘one being who becomes two lovers’ with that of ‘two lovers who are fused into one being’.24 Both, too, are narratives about the process of psychological and sexual maturation, showing that the discovery of the self is also the discovery of its limitations. Narcissus will live to old age, Tieresias predicts in Golding's translation, only provided that ‘him selfe he doe not know’.25 Cold and disdainful, he scorns women and men alike, one of the latter praying that he may know the agony of unrequited love, as Viola prays for Olivia (I. v. 276). The plight of Echo, ‘trapped’, in Barkan's phrase, ‘in imitation and reflection’,26 strongly anticipates that of Viola, who must ‘act’ Orsino's ‘woes’ and reduces herself to a voice in the ‘willow cabin’ speech. Narcissus, both ‘the party whom he woos, and suitor that doth woo’, states his dilemma in words which Shakespeare must have recalled when he gave Viola the ‘How will this fadge?’ speech I quoted earlier: ‘What shall I doe? Be wood or wo? whom shall I wo therefore? e thing I seek is in my selfe’.27 As for the story of Salmacis and Hermaphroditus, that evokes the Symposium myth, and supplies a source for the denouement of Twelfth Night, when the lovers are fused into a single creature so that

The bodies of them twaine
Were mixt and joyned in one. To both them did remaine
One countenance. 
......They were not any lenger two; but (as it were) a toy
Of double shape: Ye could not say it was a perfect boy,
Nor perfect wench: it seemed both and none of both to beene.(28)

‘A toy double shape’ must be ‘A natural perspective, that is and is not’. Shakespeare would also have known Marlowe's use of the story in Hero and Leander (registered 1593), which credits Leander's lips with a beauty 'exceeding his at leapt into the water for a kiss his own shadow' (I. 73-5),29 so that 'some swore he was a maid in mans attire' (I. 83), just as Orsino will say of Cesario (I. iv. 30-4), while Leander's argument that Hero's refusal to propagate is a selfish waste (I. 234-48) is also urged by Viola to Olivia (I. v. 230-2). Hero is ‘Venus nun’ (I. 45), a cloistered solitary like Olivia; she is compared to Salmacis (II. 46) and Leander's flirting
with her is said to be ‘as a brother with his sister toyed’ (II. 52), perhaps picking up ‘toy’ from Golding. Chapman accepted these ambiguities in his continuation of Marlowe's poem (1598); Hero deflowered is ‘even to her selfe a stranger’ (III. 203), and feels ‘As if she had two soules: one for the face, e for the hart’ (III. 271-2). She addresses Leander as ‘my selfe’ (III. 412) and the narrator summarizes, ‘Hero Leander is, Leander Hero: ch vertue love hath to make one of two’ (III. 357-8). Chapman's treatment is more elevated and Neoplatonic than Marlowe's, and Shakespeare would surely have found congenial the conclusion that ‘Where Loves forme is, love is, love is forme’ (V. 227).

III

It was at the Council of Nicea in 325 that the credal statements that Jesus was ‘begotten, not made, being of one substance with the Father’ and that the Holy Ghost ‘proceedeth from the Father and the Son’ were framed. These formulas were the Church's response to the questions of the relationship between Christ's divinity and humanity, and of his relationship to those he called the Father and the Comforter. In his treatise On the Trinity, completed around the year 420, St Augustine, as Henry Chadwick engagingly puts it, ‘showed effortlessly that the concept of being both one and three is so far from being gobbledygook that simple reflection on the nature of human personality offers an immediate example’. Augustine defended the doctrine both in mathematical terms, with a sequence of arguments based on the ratio 1:2, and in relational terms, giving a whole series of analogies from our own experience, of which the most relevant one here is the triad amans, quod amat, and amor: the lover, the beloved, and the love which each has for the other. I shall say a little more about each of these positions in turn.

First, the mathematical arguments. The number 3 consists, Augustine observes, of itself and also of the sum of the two preceding numbers. The number 6 is a perfect number

because it is made up of its parts, of which it has three, a sixth, a third, and a half; nor has it any other part which is a simple fraction of it. Its sixth part then is 1, its third part 2, and its half part 3. But 1, 2, and 3 added together make the same number 6.

(On the Trinity, IV. 2. 158)

I cannot help wondering about the relevance of this to Twelfth Night, which in the Christian liturgy commemorates the visit of wise men who early in tradition, although not in Scripture, numbered three, to adore the baby who was both a single child with two human parents, and a Person of the Trinity. (Furthermore, the sum of the two digits in the number 12 is itself 3—which may be seen as too neat but is no more so than much in Augustine's treatise.) The title of Shakespeare's play has often been dismissed as arbitrary; ‘a silly play, and not at all relating to the name or day’, Samuel Pepys thought. He could not have been more wrong. Although Leslie Hotson's argument that the play was originally staged on Twelfth Night 1601 ‘has not won general acceptance’—the only recorded performance of it in Shakespeare's lifetime was on Candlemas, 2 February 1602—this does not mean that the Feast of the Epiphany is irrelevant to the play, as a glance at the passages appointed to be read for that feast and its season in the 1559 Prayer Book indicates. Augustine allegorizes the story of the Magi into a narrative of the human condition: just as they, ‘after they were warned of God in sleep that they should not go again to Herod … returned into their own country another way’, so we journey towards our homeland in Paradise, not by the way of death but by the way of life (IV. 3. 163). So, too, Viola and Sebastian journey to their reconciliation by an indirect and apparently circuituous path. The paradigm statement of this Christian romance is Gonzalo's in The Tempest: that each of the travellers found ‘ourselves, en no man was his own’ (V. i. 215-16).

The second great plank in Augustine's argument, the analogies with human personality, considers the nature of sexual love in markedly Platonic terms:
Now bodies of course grow by being joined together. Although it is true that whoever cleaves to his wife is one body, nevertheless it becomes a bigger body than the man's alone or the woman's alone.

(VI. 2. 211)

Yet even this does not approach the unity of the Persons of the Trinity, which Augustine states in what the translation renders as a staggeringly powerful series of monosyllables: ‘They are each in each and all in each, and each in all and all in all, and all are one’ (VI. 2. 214). In Book VIII he considers the triad referred to earlier, _amans, quod amatur, amor_: ‘What does spirit love in a friend but spirit? So here again there are three, lover and what is being loved, and love’ (VIII. 5. 255). This would fit the friendship of Sebastian and Antonio just as much as the more obviously sexual relationships in _Twelfth Night_. Meeting the objection that if I love myself there will be only two terms in the equation, Augustine asserts that ‘it is not the case that anyone who loves himself is love except when love loves itself’ (IX. 1. 272), a remark which conjures up the different narcissisms of Orsino, Olivia, and Malvolio. But if the mind knows and loves itself, there is the triad mind, love, and knowledge, ‘and so you have a certain image of the Trinity, the mind itself and its knowledge, which is its offspring and its word about itself, and love as the third element, and these three are one’ (1 Jn 5: 8) (IX. 3. 282).

Attacking what he calls academic philosophy, which adopts a proto-Cartesian scepticism, insisting that we can know nothing for certain, Augustine maintains that the most fundamental knowledge we have is of our own existence. If an academic philosopher objects that our belief that we exist is caused by the fact that we are dreaming, or insane, we can retort that dreaming or insanity can be predicated only of existing beings: ‘So someone who says he knows he is alive can never be lying or be deceived’ (XV. 4. 412). These matters are reflected in _Twelfth Night_ in both serious and light-hearted ways. Malvolio, whose love for Olivia is an illusion, really only love of self, is driven nearly mad by Feste in the prison scene (IV. ii), Viola realizes that, if Olivia has really fallen in love with Cesario, ‘she were better love a dream’ (II. ii. 27), while Sebastian, in his bewilderment following his meeting with Olivia, declares ‘Or I am mad, or else this is a dream’ (IV. i. 59), although he later becomes certain that ‘though ’tis wonder that enwraps me thus, t ’tis not madness’ (IV. iii. 3-4). The wonder is that Olivia did love a dream, whose name was Cesario, but that the dream had a correspondent reality; in Platonic terms Cesario is the Form of which Viola and Sebastian are the material embodiments, just as in Christian terms Viola, Sebastian, and their relationship, which is so strong that it has its own separate existence as Cesario, are the Trinity of this play of love. And if we agree with Linda Woodbridge that ‘the central mystery of _Twelfth Night_’ is that ‘Cesario is a being made up of both Viola and Sebastian—a hermaphroditic symbol of wholeness that calls forth love from Olivia and Orsino alike’, we can add that such a procedure is a characteristic Shakespearian fusion of Augustinian Trinitarian theology and the parallel Neoplatonic tradition of number symbolism which constructs a triangle of the two lovers and the third self which they become through their love.

**IV**

Finally I should like to consider what light may be thrown on these issues by contemporary theological thinking about the Trinity. I shall focus on a recent stimulating book, Colin Gunton's 1992 Bampton Lectures. He regrets the fact that

The _Symposium_, with its systematic downgrading of bodily sexuality and of sexual distinctions—with some of which Augustine and other Christian thinkers unfortunately colluded—reveals an evasion of what I believe to be the fact that the whole person, body, mind and spirit, and not merely a part, is definitive of human being.
Professor Gunton offers his lectures as an extended commentary on the first chapter of Genesis in opposition to those, among whom he names Augustine, whose interpretation of it was Platonic, seeing Adam and Eve as universal archetypes. Against this Gunton argues that the creation was of particulars, and that the neglect of this truth, paradoxically, lies at the heart of postmodernist relativism and subjectivity: for while ‘everything may be what it is and not another thing … it is also what it uniquely is by virtue of its relation to everything else’. In their uniqueness and diversity, human beings are images of the creative Trinity whose ‘persons do not simply enter into relations with one another, but are constituted by one another in their relations’.

I see this as a profound and timely application of Augustinian thought rather than as antagonistic to it, and it certainly accords with what Shakespeare gives us. The first leader in The Times for 24 May 1997, which was the day before Trinity Sunday, well states that ‘At the heart of the doctrine of God as Trinity, is the conviction that God is a communion of persons’, a communion for which the writer, like Professor Gunton, reminds us that the ancient name is perichoresis, beautifully glossed as ‘a divine round-dance of mutually indwelling love’. All Shakespeare's comedies are like this, even if, as with Malvolio, Shylock, Jacques or Don John, there are always those who are ‘for other than for dancing measures’. One of the greatest representations of the perichoresis, the fifteenth-century icon ‘The Hospitality of Abraham’ by Andrei Rublev, is based, like much Trinitarian thinking in the Eastern tradition, on the interpretation of the visit of the three angels to Abraham in Genesis 18 as a figura of the Trinity. Augustine explains the passage in this sense (On the Trinity, II. 4. 111, II. 7. 121, III. 4. 142), so resolving the apparent contradiction that the angels are sometimes spoken of as though there were only one of them.

I do not claim that Shakespeare knew the Rublev icon, but I am sure he knew its tradition, and I regret the refusal of editors of Twelfth Night to take that tradition seriously as an explanation of ‘the picture of “we three”’ (II. iii. 15-16). For instance, Warren and Wells simply note on that phrase, ‘A caption to a trick picture showing two fools' or asses' heads; the third was the viewer.’ However, in the Rublev icon, as in some medieval and Renaissance depictions of the Trinity or Holy Family, there is a vacant space at the table as though to be filled by the viewer, who is then a participant in as well as an interpreter of the picture. Similarly, Orsino and Olivia are both in love with images rather than substances; Viola's vocation is to be their therapist, to bring them from illusion to reality. Orsino's images of love as the amorphous and devouring sea (I. i. 10-11, II. iv. 99-100) are at odds with his claim that he is the archetypal lover, ‘unstaid and skittish in all motions else ve in the constant image of the creature at is beloved’ (II. iv. 17-19). Orsino sends Cesario to Olivia not only as his ambassador but as his substitute, who is to ‘act [his] woes’ (I. iv. 26), and his reason is not Cesario's asexuality but ‘his’ femininity: ‘all is semblative a woman's part’ (I. iv. 34), so that Olivia may listen as though to another woman. Olivia cannot love Orsino simply because she cannot (and, after all, what better reason could there be?), yet she falls in love with the image of Orsino embodied in ‘this youth's perfections’ (I. v. 286). Similarly, Cesario confesses that he has loved a woman who resembles Orsino (II. iv. 24-7), and plays a masochistic game of ‘Let's pretend’:

Say that some lady, as perhaps there is,
Hath for your love as great a pang of heart
As you have for Olivia
.....My father had a daughter loved a man
As it might be, perhaps, were I a woman
I should your lordship ...

(II. iv. 88-90, 107-9)

In the neutral space created by Viola's disguise, that may be spoken which must otherwise be stifled, yet only by analogy; hypotheses multiply, triangles become blocked off, emotional frustration results. Viola declares that ‘I am all the daughters of my father's house, d all the brothers too’—adding, more truly than she intends, ‘and yet I know not’ (II. v. 120-1). If she is all the daughters and all the brothers she is a hermaphrodite, yet her circular perfection is barren: what will release her lies beyond her control; she has already committed it to
Time (II. ii. 40), and Time, directed by a benevolent Providence, casts her twin upon the Illyrian shore. She is never called Viola until Sebastian so calls her (V. i. 123); for us she has always been Cesario, and only Sebastian can restore to her her rightful name and the freedom to be herself. She at first assumes he is a ghost, ‘If spirits can assume both form and suit’, and has to be reassured: ‘A spirit I am indeed, t am in that dimension grossly clad ich from the womb I did participate’ (V. i. 229-31). Sebastian is no Neoplatonic Form, unlike Cesario; he is Form embodied in Matter.

In the parallel dialogue with Olivia in II. i, Viola speaks more openly, if more bafflingly. She has earlier stated that ‘I am not that I play’ (I. v. 176). Now she goes further: ‘I am not what I am’ (II. i. 139)—a line, incidentally, which she shares with Iago. Warren and Wells explain this by ‘I am not what I seem’, but it means what it says, and its wording must recall the self-naming of God in Exodus 3: 14, ‘And God answered Moses, I am that I am’, a verse cited by Augustine as an affirmation of God's eternal being and his defiance of further definition (On the Trinity, V. 1. 190, VII. 3. 228). Viola-as-Cesario brings no epiphany for Olivia, but rather a dangerous delusion; Viola's own true being is in suspension, awaiting its awakening, while she is forced to play Echo to everyone else's Narcissus—not only Orsino's and Olivia's, but Antonio's, who, mistaking her for Sebastian in the moment of his arrest, admits that he felt ‘sanctity of love’ and offered ‘devotion’ to Sebastian's ‘image’ (III. iv. 352-4), and exclaims:

But O, how vile an idol proves this god!  
Thou hast, Sebastian, done good feature shame.  
In nature there's no blemish but the mind.  
None can be called deformed but the unkind.  
Virtue is beauty, but the beauteous evil  
Are empty trunks o'er-flourished by the devil.

(III. iv. 356-61)

These lines do not often receive much comment, but Antonio's recognition that he has been performing a kind of idolatry in his attachment to Sebastian is couched in Neoplatonic terms (cf. Viola's words to the Captain in I. ii. 44-8). Sebastian, after all, had entrusted Antonio with his true name (II. i. 13-15); Antonio is the only other person who knows that Sebastian is still alive, and his addressing Viola by her brother's name here reveals that fact to her (III. iv. 370). Antonio begs to be Sebastian's ‘servant’ and declares, though not to his face, that he ‘ador[es]’ him (II. i. 31, 42). To call Sebastian and Antonio ‘an overtly homosexual couple’, as Stephen Orgel has done is to commit a peculiarly naive piece of political correctness. To repeat Colin Gunton's point, personal relationships are constitutive of the persons related, so that it is only through our relationships that we come to understand ourselves. Not only theologians but philosophers such as John MacMurray and Michael Polanyi have stressed this anti-Cartesian point, which Olivia states when she acknowledges that ‘ourselves we do not owe’ (I. v. 300).

The movement from image to reality is a commonplace in discussion of Shakespeare, but we need, in this context especially, to give to the word ‘image’ an unusually strong meaning. The verse in Genesis 1: 26, ‘Furthermore God said, Let vs make man in our image according to our likenesse’, with its plural pronouns, had traditionally been taken, as I mentioned earlier, as evidence that the doctrine of the Trinity was latent in the Old Testament. Augustine had so taken it (On the Trinity, I. 3. 75, VII. 4. 231, XII. 2. 325, XIV. 5. 390), while cautioning that each human being is made in the image of the Trinity as such, not of any one of the Persons. The marriages which close Twelfth Night are evidence of the attainment of such a reality by the partners, summed up in the words of the Priest:

A contract of eternal bond of love,  
Confirmed by mutual joinder of your hands,  
Attested by the holy close of lips,  
Strengthened by interchangegement of your rings,  
And all the ceremony of this compact

949
Sealed in my function, by my testimony;
Since when, my watch hath told me, toward my grave
I have travelled but two hours.

(V. i. 152-9)

The great surprise is that he does not say ‘three hours’, but that would be inappropriate; Shakespeare wants to emphasize two persons becoming one here, rather than one person reflecting three. Sebastian remarks to Olivia:

You would have been contracted to a maid,
Nor are you therein, by my life, deceived.
You are betrothed both to a maid and man.

(V. i. 255-7)

—a line of thought echoed by Orsino when he calls Viola ‘your master's mistress’ (V. i. 317, cf. Sonnet 20, 1. 2) and insists on retaining the name Cesario for her ‘while you are a man’ (V. i. 376). The notes in the current editions are less than helpful here. The lines, I take it, have to be understood as referring to the hermaphroditic wholeness of Cesario and to the completeness of the creation: ‘Thus God created the man in his image: in the image of God created he him: he created them male and female’ (Genesis 1: 27), quoted by Jesus in Matthew, as I mentioned earlier, just before he says, ‘For this cause, shall a man leave father and mother, and cleave unto his wife, and they which were two, shall be one flesh’ (Matt. 19: 5)—‘as though’, the Geneva Bible wonderfully adds in the margin, ‘they were glued together’.

If we are created in the image of the Trinity, and the mutual love of the marriage partners is the highest analogy for the communion of the Persons of the Trinity, then reality is Trinitarian, human life a perichoresis. The natural perspective ‘is, and is not’, because, like God, it simply is what it is. When Sebastian says ‘Nor can there be that deity in my nature here and everywhere’ (V. i. 221-2) he is in a sense right, but in another sense Shakespeare, I have tried to show, wants to say emphatically that that is just what there can be.

Notes

2. Ibid. 446. Not that this Neoplatonic view of friendship was Shakespeare’s alone. In the refrain of a poem first printed in 1602, for example, Sidney celebrated his friendship with Dyer and Greville in Trinitarian terms, as attesting the existence of ‘one Minde in Bodies three’: The Poems of Sir Philip Sidney, ed. W. A. Ringler Jr. (Oxford, 1962), 260-1.
7. Ibid. 54.

14. Medcalf, ‘Shakespeare on Beauty, Truth and Transcendence’, 118. As he reminds us, Jonson was one of Shakespeare's fellow-contributors to *Loves Martyr*.
18. I quote from Sears Jayne's translation of Ficino, *Commentary on Plato's 'Symposium on Love'* (Dallas, 1985); subsequent references are given in the text.
23. Ibid. 200.
28. Ibid. iv. 462-4, 468-70. ‘Toy’ here must mean a perspective (not cited in *OED*), providing a further link with Orsino's words in Act V. Shakespeare takes this idea from Golding, not from Ovid, who compares the couple's closeness to that of a twig grafted on to a tree.
30. Chapman has numerological digressions in his continuation (e.g. V. 323-40). Marlowe had commented on the paradox that ‘one is no number’ (I. 255), which Shakespeare pursues in Sonnets
34. For details see B. K. Lewalski, ‘Thematic Patterns in Twelfth Night’, Shakespeare Studies, 1 (1965), 168-81; M. B. Smith, Dualities in Shakespeare (Toronto, 1966); R. C. Hassel Jr., Renaissance Drama and the English Church Year (Lincoln, Nebr., 1979), 82-5. I have followed out some of the implications in ‘The Harrowing of Malvolio: The Theological Background of Twelfth Night, Act 4, Scene 2’, Connotations, 7/2 (1997/8), 203-14. Steve Sohmer has recently taken a different view of the evidence in Shakespeare’s Mystery Play: the Opening of the Globe Theatre 1599 (Manchester, 1999), pp. 199-216. Setting Shakespeare’s work in the context of the refusal of Protestant England to adopt the Gregorian calendar in place of the old Julian one, he suggests that the play’s title in fact refers to 12 December (mentioned by Sir Toby at II. iii. 79), which would have been Christmas Day under the reformed calendar.
36. L. Woodbridge, Women and the English Renaissance: Literature and the Nature of Womankind, 1540-1620 (Brighton, 1984), 141. My approach offers a different perspective on the role-playing to that which sees it mainly in terms of cross-dressing and gender ambiguity. The question whether a boy actor dressed as a girl had pederastic or homosexual appeal for some men in an Elizabethan audience is of course impossible to settle. In her pioneering Shakespeare and the Nature of Women (London, 1975) Juliet Dusinberre argued against this supposition, and was challenged by Lisa Jardine in Still Harping on Daughters: Women and Drama in the Age of Shakespeare (Brighton, 1983). A recent contribution to the debate is M. Shapiro, Gender in Play on the Shakespearean Stage: Boy Heroines and Female Pages (Ann Arbor, 1994).

Twelfth Night Literary Criticism (Vol. 74): Further Reading

CRITICISM

Reviews the Royal Shakespeare Company's production of Twelfth Night at the Royal Shakespeare Theatre in Stratford-upon-Avon. The critic finds the production, directed by Adrian Noble, to be unmoving and palatable at best.

Examines the dramatic style Shakespeare used in Twelfth Night, demonstrating the ways in which Shakespeare employed simple lyricism as well as artistic prose dialogue.

Explores the ways in which productions of Twelfth Night can fully explore the play's potential, and asserts that the entire text, complete and in the order in which Shakespeare composed it, must be utilized by a production's director.

Studies Feste's song, delivered at the end of Twelfth Night, and comments on its obscene implications.

Reviews the New Jersey Shakespeare Festival's production of Twelfth Night, directed by Joseph Discher. In Klein's appraisal, the production failed at both comedic and romantic interpretations of the play.

Reviews in detail the stage design of the production of Twelfth Night directed by Nicholas Hytner and designed by Bob Crowley.

Analyzes a passage of Twelfth Night (I.v.1-30) between Maria and Feste and offers an interpretation of the text that reveals Feste's nature and the dangerous potential of his wit.

Attempts to answer the riddle concerning the initials “M.O.A.I.” presented in Act II, scene v. of Twelfth Night. Smith surveys solutions suggested by other critics and employs Renaissance semantics in order to propose his own reading of the scene.

Examines the mistakes made by the protagonists of Twelfth Night, maintaining that the errors these characters make are not only part of the overt mechanisms of the plot, but also serve to reveal aspects of the characters' psychological motivations as well as the play's underlying themes of deception and love.

Twelfth Night Literary Criticism (Vol. 85): Introduction

Twelfth Night

Viewed as one of Shakespeare's finest romantic comedies, Twelfth Night (c. 1600-01) continues to be praised by scholars as a fascinating and evocative study of love, sexual desire, and personal discovery. Its central plot concerns a love triangle between the Illyrian nobleman Orsino, his beloved but unattainable Olivia, and the shipwrecked Viola. After disguising herself as the male page Cesario, Viola takes a position in Orsino's court and swiftly becomes enamored of her patron even as he sends her to woo Olivia on his behalf. Olivia, in turn, falls in love with Viola, whom she believes to be a man. The play also features a subplot centered on the priggish Malvolio, steward to Olivia, and the punishment he endures at the hands of his fellow servants.

Modern critical assessments of Twelfth Night have tended to focus on the drama's captivating characters as well as on its themes of love, gender, and sexuality. Regarding Twelfth Night's place within the Shakespearean canon, S. Musgrove (see Further Reading) describes the work as the last in a series of harmoniously resolved festive comedies that includes the plays As You Like It and Much Ado about Nothing. J. M. Gregson (see Further Reading) distinguishes Twelfth Night as the epitome of Elizabethan romantic comedy, and finds in its skilled blending of disparate and contradictory elements “an almost perfect play.”

Critics have long acknowledged the appeal of Twelfth Night's principal characters, particularly the play's protagonist Viola and the abused Malvolio, who are both considered to be among Shakespeare's most outstanding comic characterizations. Lydia Forbes (1962) examines Shakespeare's vivid portraits of the self-assured and charming Viola, the courageous and forthright Sebastian, the narcissistic and self-serving Malvolio, and the bawdy, witty, and wise Feste. In Forbes's estimation, these and the remaining personalities in Twelfth Night intricately combine to produce a highly satisfying symphony of language and character. Larry S. Champion (1968) also examines the complexity of character in Twelfth Night. According to the critic, the characters' true but hidden identities are revealed over the course of the play as they experience a deepening sense of their own self-knowledge. Cynthia Lewis (1986) questions the traditional assumption that Viola is the moral center of Twelfth Night. Instead, she maintains that Antonio, rather than Viola, is consistently portrayed as the ideal moral figure in the drama, but acknowledges that the play is principally concerned with Viola's moral development. Edward Cahill (1996) concentrates on the figure of Malvolio in Twelfth Night. Much-maligned by his compatriots, Malvolio has generally been a favorite of audiences and critics precisely because of his combined tragic and comic potentiality. Cahill examines this intriguing mix by delving into the psychology of this character, noting his narcissism and painful identity crisis as well as his thwarted and obsessive desires for sexual, social, and personal fulfillment.

Twelfth Night remains among the most popular of Shakespearean comedies on the stage. While some directors stress the comic aspects of the drama, others have emphasized the play's more troubling undertones. Robert Brustein (2002) reviews Brian Kulick's 2002 production of Twelfth Night at the open-air Delacorte Theatre in New York City's Central Park, starring Julia Stiles as Viola and Christopher Lloyd as Malvolio. The critic observes that the production relied too heavily on facile visual conceits and contends that Kulick and his star-studded cast barely explored the depths of character and theme offered by Shakespeare's text. While light comedy was the focus of Kulick's staging, director Sam Mendes's 2002 Donmar Warehouse Theatre production stressed the play's darker elements. Appraising Mendes's work, critic John Mullan (2002) contends that an overemphasis on the erotic and sensual aspects of the drama, as well as on the suffering of Malvolio,
obscured its comic elements and proved detrimental to the production. Reviewing the 2002 Holderness Theater Company production of *Twelfth Night* directed by Rebecca Holderness, Kenneth Gross (2002) praises the minimalist staging of the play and calls attention to its fine dramaturgical effects, including the setting, lighting, dance, and music. In his appraisal of the 2001 to 2002 Royal Shakespeare Company season, Russell Jackson (2002) comments on director Lindsay Posner's *Twelfth Night*, which was set in the artistic milieu of fin-de-siècle aestheticism. The critic observes the erotic and decadent qualities of the production and highlights several individual performances, including Guy Henry's strangely empathetic Malvolio and Mark Hadfield's touching Feste.

Contemporary scholars continue to be interested in *Twelfth Night*'s themes concerning love, gender, sexuality, and self-discovery. A. Fred Sochatoff (see Further Reading) concentrates on the play's presentation of love in its many manifestations, including obsessive, fickle, self-pitying, narcissistic, buffoonish, and true. The critic also provides a survey of character in relation to the drama's theme of love, noting in particular how Feste frames the various love and pseudo-love relationships of the play through his witty observations on the events that unfold before him. Camille Slichts (1982) maintains that *Twelfth Night* illustrates the thematic principal of reciprocity as the foundation of successful human relationships. The critic notes that the characters in the play achieve personal fulfillment and social accord through generosity, compassion, service, alliance, and awareness of the restrictions imposed by personal ambition and self-absorption. F. B. Tromly (1974) suggests that Shakespeare combined a comic and moral purpose in *Twelfth Night* by allowing his characters to learn of the hardships and dangers of the world through the spirit of folly. According to Tromly, folly is a positive force in the play, one that allows the characters to come to terms with life by learning to accept “delusion, vulnerability, and mortality.” In his 1982 essay, Thad Jenkins Logan claims that *Twelfth Night*—despite its ostensible depiction of a festive and happy resolution—contains glimpses of the darker side of human desire. Lastly, Marcus Cheng Chye Tan (2001) discusses the relationship of music to the play's theme of sexual ambivalence, focusing in particular on the character of Viola/Cesario and the motifs of cross-dressing, bisexuality, and androgyny.

**Twelfth Night Literary Criticism (Vol. 85): Criticism: Overviews And General Studies**

*[In the following essay, Hartman examines Shakespeare's use of poetic language, punning, and wordplay in Twelfth Night.]*

1

Writing about Shakespeare promotes a sympathy with extremes. One such extreme is the impressionism of a critic like A. C. Bradley, when he tries to hold together, synoptically, Feste the fool and Shakespeare himself, both as actor and magical author. Bradley notes that the Fool in *Lear* has a song not dissimilar to the one that concludes *Twelfth Night* and leaves Feste at the finish-line. “But that's all one, our play is done …” After everything has been sorted out, and the proper pairings are arranged, verbal and structural rhythms converge to frame a sort of closure—though playing is never done, as the next and final verse suggests: “And we'll strive to please you every day.” Bradley, having come to the end of an essay on Feste, extends *Twelfth Night* speculatively beyond the fool's song, and imagines Shakespeare leaving the theater:

the same Shakespeare who perhaps had hummed the old song, half-ruefully and half-cheerfully, to its accordant air, as he walked home alone to his lodging from the theatre or even from some noble's mansion; he who, looking down from an immeasurable height on
the mind of the public and the noble, had yet to be their servant and jester, and to depend upon their favour; not wholly uncorrupted by this dependence, but yet superior to it and, also determined, like Feste, to lay by the sixpences it brought him, until at least he could say the word, “Our revels now are ended,” and could break—was it a magician's staff or a Fool's bauble?2

The rhetoric of this has its own decorum. It aims to convey a general, unified impression of a myriad-minded artist. Shakespearean interpreters have a problem with summing up. Leaning on a repeated verse (“For the rain it raineth every day”), and more quietly on the iteration of the word “one” (Lear: “Poor Fool and knave, I have one part in my heart / That's sorry yet for thee”; Feste: “I was one, sir, in this interlude; one Sir Topas, sir, but that's all one”), Bradley integrates Shakespeare by the deft pathos of an imaginary portrait. Today's ideological critics would probably purge this portrait of everything but Shakespeare's representation of power-relations and hierarchy. Such critics might note that the portrait's final question serves only to emphasize the artist's marginality, his loneliness or apartness, as if by a secret law of fate being an artist excluded Shakespeare from social power in the very world he addresses.

The relation of “character” in the world (domestic or political) to “poetical character” (the imaginary relations to that same world which make up our image of a particular artist) is always elusive. Especially so in the case of Shakespeare, of whose life we know so little. A myth evolves, given classic expression by Keats, that the mystery or obscurity enveloping Shakespeare's life is due to the fact that a great poet has no “identity,” that he is “everything and nothing”—as Bradley's evocation also suggests. John Middleton Murry's book on Shakespeare begins with a chapter entitled “Everything and Nothing” in which Murry explores his reluctant conclusion that “In the end there is nothing to do but to surrender to Shakespeare.” “The moment comes in our experience of Shakespeare when we are dimly conscious of a choice to be made: either we must turn away (whether by leaving him in silence, or by substituting for his reality some comfortable intellectual fiction of our own), or we must suffer ourselves to be drawn into the vortex.”3

The focus moves, in short, to the character of the critic, determined by this choice. Can we abide Shakespeare's question? Does the critic have a “character” of his own, or is he simply a bundle of responses accommodated to a special institution or audience: university students and dons, or other drama buffs, or the general public? Unlike Eliot, say, or Tolstoy, Murry has no body of creative writing to back up the importance of his interpretive engagements. There is, nevertheless, a sense that the critic's identity is formed by his selfless encounters with artists of Shakespeare's stature.

The “vortex” that threatens readers, according to Murry, includes the fact that Shakespeare delights as much in Iago as Imogen (Keats's words); and to shuffle off our ordinary conceptions of character—in Murry's phrase, the “mortal coil of moral judgment”—is both painful and necessary. Always, Murry claims, “when Shakespeare has been allowed to make his impression, we find the critic groping after the paradox of the poetical character itself as described by Keats.” In an earlier essay, closer to Bradley's era, Murry had already put the problem of Shakespeare criticism in terms that showed how aware he was of reactions to the “vortex.” He rejects the “idea'-bacillus” that reduces Shakespeare to universal themes or the creation of character-types, yet he refuses to relinquish his rigorous quest for “the center of comprehension from which he [Shakespeare] worked.” Programmatic as it is, Murry's statement of 1920 remains relevant:

Let us away then with ‘logic' and away with ‘ideas’ from the art of literary criticism; but not, in a foolish and impercipient reaction, to revive the impressionistic criticism which has sapped the English brain for a generation past. The art of criticism is rigorous; impressions are merely its raw material; the life-blood of its activity is in the process of ordonnance of aesthetic impressions.4
The rejection of impressionism leads, if we think of Eliot, and of Murry himself, simply to a more rigorous formulation of the paradox of the impersonal artist. For Murry it meant comparing Christian and post-Shakespearian (especially romantic) ways of annihilating selfhood. Blake becomes even more crucial for such a formulation than Keats. G. W. Knight also joins this quest. Other rigorous escape routes, that lead through impressionism beyond it, make Shakespeare's language the main character of his plays, the everything and nothing. Empson's colloquial fracturing of Shakespeare's text, from Seven Types through Complex Words, as well as Leavis's emphasis on the “heuristic-economic quality of the diction” avoid, on the whole, totalizing structures. Rigor consists in having the local reading undo an established symmetry.

Another form of rigor, historical scholarship, can be outrageously speculative. (The trend was always there in the work of editors who unscrambled perplexing expressions or normalized daring ones.) One might escape the Shakespearean vortex by discovering a firm historical emplacement for the plays, by clarifying their occasion as well as the characters in them. The work of referring the plays back to sources mysteriously transformed by Shakespeare (minor Italian novelas, or poetics derived from Donatus and Terence, such as the “forward progress of the turmoils”) gives way to an ambitious reconstruction of a particular, sponsoring event. The quest for the identity of W.H. or the Dark Lady or the exact festive occasion of Twelfth Night exerts a prosecutory charm that attests to the presence of character in the critic-investigator (that stubborn, scholarly sleuth) as well as in Shakespeare the historical personage. Consider what the ingenious Leslie Hotson does with the “jest nominal,” or play on names. It is as intriguing as anything ventured by newfangled intertextualists.

Hotson claims in The First Night of Twelfth Night that the figure of Malvolio is a daring take-off of a high official in Elizabeth's court: Sir William Knollys, Earl of Banbury and Controller of her Majesty's household. This aging dignitary, we are told, had become infatuated with a young Maid of Honor at Court, Mall (Mary) Fitton. In the “allowed fooling” of Twelfth Night festivities, “old Beard Knollys,” suggests Hotson, “is slaughtered in gross and detail.” Here is his description of how it was done:

while exposing both the Controller's ill-will—towards hilarity and misrule—and his amorousness in the name Mala-voglia (Ill Will or Evil concupiscence) Shakespeare also deftly fetches up Knollys' ridiculous love-chase of Mistress Mall by a sly modulation of Mala-Voglia into “Mal”-voglio—which means ‘I want Mall,’ “I wish for Mall,” “I will have Mall.” It is a masterpiece of mockery heightened by merciless repetition, with the players ringing the changes of expression on “Mal”-voglio … it will bring down the house.6

The play becomes a roman à clef, and so delivers us from a verbal vertigo it exposes. Shakespeare's improvisational genius, moreover, his extreme wit and opportunism, may recall the methodical bricolage by which earlier mythmakers, according to Lévi-Strauss, sustained their tale. Here it explicitly pleases or shames the ears of a court-centered audience. Yet this shaming or delighting is not necessarily in the service of good sense or the status quo, for it can subvert as well as mock and purge. The one thing it does, as in the case of the Controller, is to acknowledge the law of gender—of generation and succession—which, as Erasmus saw, compels us to play the fool. Such allowed slander, whether or not reinforced by Elizabethan festivities, by periods of compulsory license, also penetrates Shakespearean tragedy:

Even he, the father of gods and king of men, who shakes all heaven by a nod, is obliged to lay aside his three-pronged thunder and that Titanic aspect by which, when he pleases, he scares all the gods, and assume another character in the slavish manner of an actor, if he wishes to do what he never refrains from doing, that is to say, to beget children. … He will certainly lay by his gravity, smooth his brow, renounce his rock-bound principles, and for a few minutes toy and talk nonsense. … Venus herself would not deny that without the addition of my presence her strength would be enfeebled and ineffectual. So it is that from this brisk and silly little game of mine come forth the haughty philosophers.7
Generation and Succession are so fundamental to almost all classes and types of humanity that to reduce them to their verbal effects might seem trivializing. Yet, as Erasmus's Folly hints, the very category of the trivial is overturned by these forces. The “striving to please every day,” which is the fate of the player, is equally that of lover and courtier. It quickens even as it exhausts our wit. It points to a relentless need for devices—words, stratagems. More is required than a “tiny little wit” to sustain what every day demands.\footnote{8}

There exist eloquent characterizations of Shakespeare's understanding of the common nature of mankind. As Bakhtin remarks of another great writer, Rabelais, there are crownings and uncrownings at every level.\footnote{9} No one is exempt, at any time, from that rise and fall, whether it is brought on by actual political events or social and sexual rivalry, or internalized pressures leading to self-destructive illusions and acts. The vicissitudes of Folly and Fortuna go hand in hand. Yet no conclusions are drawn; and it does not matter what class of person is involved—a Falstaff, a Harry, a King Henry; a clown, a count, a lady; a usurper, a porter. What happens happens across the board, and can therefore settle expressively in a language with a character of its own—apart from the decorum that fits it to the character of the person represented. The pun or quibble, Shakespeare's “fatal Cleopatra,” is a quaint and powerful sign of that deceiving variety of life. Hazlitt, following Charles Lamb, remarks that Elizabethan “distinctions of dress, the badges of different professions, the very signs of the shops” were a sort of visible language for the imagination. “The surface of society was embossed with hieroglyphs.”\footnote{10} Yet the showiest and most self-betraying thing in Shakespeare is the flow of language itself, which carries traces of an eruption from some incandescent and molten core, even when hard as basalt, that is, patently rhetorical.

Structurally too, the repetitions by which we discover an intent—a purposiveness—do not resolve themselves into a unity, a “one” free of sexual, hierarchical or personal differentiation. Feste's “one” is an Empsonian complex word, which seeks to distract us, by its very iteration, into a sense of closure. Yet there is never an objective correlative that sops up the action or organizes all the excrecent motives and verbal implications. Feste's phrase is found, for example, in the mouth of another clown figure, Fluellen, in a scene one could characterize as “Porn at Monmouth” (Henry V, IV.vii). The scene, through the solecisms and mispronunciations of Fluellen, his butchery of English, makes us aware of what is involved in the larger world of combat, to which he is marginal. The catachresis of “Kill the Poyes and the luggage!” expresses the cut-throat speed with which matters are moving toward indiscriminate slaughter. An end penetrates the middle of the drama; the grimace (if only linguistic) of death begins to show through.

Yet even here, as the action hits a dangerous juncture, as decisions become hasty and bloody, this verbally excessive interlude slows things down to a moment of humorous discrimination. Fluellen draws a comparison between Harry of Monmouth and “Alexander the Pig” of Macedon (Henry V, IV.vii). That “big” should issue as “pig” is a fertile and leveling pun, which the macabre turn of this near-graveyard scene could have exploited even more; but the uncrowning of Alexander in Fluellen's mouth leads to a series of images (mouth, fingers, figures) that suggest a “body” less mortal than its parts. Harry's transformation into King Henry, and Fluellen's comparison in his favor—that Harry's bloodthirsty anger is more justified than Alexander's—appear like a jesting in the throat of death, a vain distinction already undone by the battlefield context that levels all things, as by an earthy vernacular, or quasi-vernacular, that can slander all things in perfect good humor.

It seems impossible, then, to describe the poetical character of Shakespeare without raising certain questions. One concerns the character of the critic (choices to be made in reading so strong and productive a writer); another what happens to language as it nurtures a vernacular ideal that still dominates English literature. A third, related question is whether what that language does to character and to us can be summed up or unified by methodical inquiry. Does an “intellectual tradition” exist, as Richards thought, to guide us in reading that plentiful “Elizabethan” mixture? “The hierarchy of these modes is elaborate and variable,” he writes about sixteenth- and seventeenth-century literature. To “read aright,” Richards continues, “we need to shift with an
at present indescribable adroitness and celerity from one mode to another."

By “modes” Richards means different types of indirect statement, which he also characterizes as “metaphorical, allegorical, symbolical,” yet does not define further. In some way they are all nonliteral; at least not directly literal. Like Coleridge, whom he quotes, Richards is impressed by the role that “wit” plays in Shakespeare’s time, although he does not discuss the complicit or antagonistic and always showy relation between wit and will. He simply accepts Coleridge’s thesis on wit and Shakespeare’s time:

when the English Court was still foster-mother of the State and the Muses; and when, in consequence, the courtiers and men of rank and fashion affected a display of wit, point, and sententious observation, that would be deemed intolerable at present—but in which a hundred years of controversy, involving every great political, and every dear domestic interest, had trained all but the lowest classes to participate. Add to this the very style of the sermons of the time, and the eagerness of the Protestants to distinguish themselves by long and frequent preaching, and it will be found that, from the reign of Henry VIII to the abdication of James II, no country ever received such a national education as England.

Yet Coleridge’s notion of “national education” may be too idealistic—Arnoldian before the letter. It downplays the subverting character of Shakespeare’s wit, one that is not put so easily in the service of the nation-state and its movement toward a common language. The “prosperity of a pun,” as M. M. Mahood calls it, in what is still the most sensitive exploration of the subject, offended rather than pleased most refiners of English up to modern times. “Prosperity” may itself covertly play on “propriety,” which is precisely what a pun questions. The speed and stenography, in any case, of Shakespeare’s wordplay in the comic scenes undoes the hegemony of any single order of discourse, and compels us to realize the radically social and mobile nature of the language exchange. And, unlike the novel (which allows Bakhtin his most persuasive theorizing), these scenes display less a narrative or a pseudonarrative than oral graffiti. Verbally Shakespeare is a graffiti artist, using bold, often licentious strokes, that make sense because of the living context of stereotypes, the commedia dell’arte, and other vernacular or popular traditions.

Is it possible, then, to see Shakespeare sub specie unitatis, as the younger Murry thought? “There never has been and never will be a human mind which can resist such an inquiry if it is pursued with sufficient perseverance and understanding.” Yet in this very sentence “human mind” is fleetingly equivocal: does it refer only to the object of inquiry, Shakespeare’s mind, or also to the interpreter’s intellect, tempted by the riddle of Shakespeare? The later Murry too does not give up; but now the unity, the “all that’s one,” is frightening as well, and associated with omnia abeunt in mysterium: all things exit into mystery.

It seems to me there is no mystery, no Abgrund, except language itself, whose revelatory revels are being staged, as if character were a function of language, rather than vice versa. More precisely, as if the locus of the dramatic action were the effect of language on character. Twelfth Night will allow us to examine how this language test is applied. If we admire, however ambivalently, the way lago works on Othello by “dannable iteration” (cf. Falstaff: “O, thou hast dannable iteration, and art indeed able to corrupt a saint” (I Henry IV, I.ii.90), or the way Falstaff shamelessly converts abuse into flattery, we are already caught up in a rhetoric whose subversive motility, moment to moment, can bless or curse, praise or blame, corrupt words or (like Aristotle’s eulogist) substitute collateral terms that “lean toward the best.” It is this instant possibility of moving either way, or simultaneously both ways, which defines the Shakespearean dramatic and poetical character. In Twelfth Night, with Feste a self-pronounced “corrupter of words” (III.i.37), and Malvolio’s censorious presence, the verbal action challenges all parties to find “comic remedies,” or to extract sweets from weeds and poisons.
“Excellent,” says Sir Toby Belch, “I smell a device.” “I have't in my nose too,” Sir Andrew Aguecheek echoes him (II.iii.162). Toby is referring to the plan concocted by Maria, Olivia's maid, of how to get even with the strutting and carping Malvolio, steward of the household. The device is a letter to be written by Maria in her lady's hand, which will entice Malvolio into believing Olivia is consumed with a secret passion for him, his yellow stockings, cross-garters and smile. The device (not the only one in the play—Bertrand Evans has counted seven persons who are active practisers operating six devices) succeeds; and Malvolio, smiling hard, and wearing the colors he thinks are the sign commanded by his lady, but which she happens to detest, is taken for mad and put away.

The very words “I smell a device” contain a device. Toby, mostly drunk, knows how to choose his metaphors; and Andrew, not much of a wit (“I am a great eater of beef, and I believe that does harm to my wit”), merely echoes him, which makes the metaphor more literal and so more absurd. A device is also a figure, or flower of speech; both meanings may be present here, since the content of the device is literary, that is, a deceivingly flowery letter. Flowers smell, good or bad as the occasion may be. “Lillies that fester smell far worse than weeds” (Sonnet 94). Sometimes figures or metaphors fly by so thick and fast that we all are as perplexed as Sir Andrew:

ANDREW:

Bless you, fair shrew.

MARIA:

And you too, sir.

TOBY:

Accost, Sir Andrew, accost. (…)

ANDREW:

Good Mistress Accost, I desire better acquaintance.

MARIA:

My name is Mary, sir.

ANDREW:

Good Mistress Mary Accost—

TOBY:

You mistake, knight. "Accost" is front her, board her, woo her, assail her.

ANDREW:

By my troth, I would not undertake her in this company. Is that the meaning of “accost”?

MARIA:

Fare you well, gentlemen.

TOBY:
And thou let part so, Sir Andrew, would thou might'st never draw sword again!

ANDREW:

And you part so, mistress, I would I might never draw sword again. Fair lady, do you think you have fools in hand?

MARIA:

Sir, I have not you by th' hand.

ANDREW:

Marry, but you shall have, and here's my hand.

MARIA:

Now, sir, thought is free. I pray you bring your hand to th' buttery bar and let it drink.

ANDREW:

Wherefore, sweetheart? What's your metaphor?

MARIA:

It's dry, sir.

(I. iii. 46-72)

Awkward Andrew starts with a mild oxymoron and compounds the error of his address to Mary by a further innocent mistake—the transposition of a common verb into a proper noun, which not only unsettles parts of speech but creates a parallel euphemism to “fair shrew” through the idea of “good Accost.” The entire scene is constructed out of such pleasant errors—failed connections or directions that hint at larger, decisive acts (accosting, undertaking, marrying). At line 62 the verbal plot becomes even more intricate, as Andrew strives to “address” Mary a second time. “Marry” (66) is an oath, a corruption of the Virgin’s name; but here, in addition to echoing “Mary,” it may be the common verb, as Andrew tries to be witty or gallant by saying in a slurred way (hey, I too can fling metaphors around!), “If you marry you'll have me by the hand, and here it is.” (He forgets that that would make him a fool, like all married men.) Maria bests him, though, suggesting a freer kind of handling, with a new metaphor that—I think—may be licentious. What is that “buttery bar”? Probably, in function, a bar as today, for serving drinks; but could it be her breasts or … butt? That same “bar,” by a further twist or trope, echoes in Maria’s “marry, now I let go your hand, I am barren” (77). No wonder Andrew, out of his range, stutters, “Wherefore, sweetheart? What's your metaphor?”

Somewhere there is always a device, or a “hand” that could fool just about anyone. Nobody is spared, nobody escapes witting. Yet it remains harmless because all, except Malvolio, play along. There is rhetoric and repartee, puns and paranomasia, metaphor upon metaphor, as if these characters were signifying monkeys: the play expects every person to pass the test of wit, to stand at that bar of language. Yet “wherefore?” we ask, like simple Andrew.

That question returns us to the poetical character. It “is not itself,” Keats wrote, “it has no self—it is every thing and nothing—It has no character.” He says other things, too, which make it clear he is thinking mainly of Shakespeare. “It lives in gusto, be it foul or fair, high or low, rich or poor, mean or elevated—It has as much delight in conceiving an Iago as an Imogen. What shocks the virtuous philosopher [a Malvolio in this respect] delights the chameleon Poet. It does no harm from its relish of the dark side of things any more than
for its taste for the bright one; because they both end in speculation” (letter to Richard Woodhouse, October 27, 1818).

Much depends on that word “speculation” in Keats; a “widening speculation,” he also writes, eases the burden of life's mystery, takes away the heat and fever (letter to J. H. Reynolds, May 3, 1818). You have to have something to speculate with or on; some luxury, like a delicious voice, whose first impact you remember. Speculation is making the thing count again, as with money, yet without fearing its loss.19 The Shakespearean language of wit is like that. Though penetrated by knowledge of loss, aware that the most loved or fancied thing can fall “into abatement fnd low price, / Even in a minute!” (I. i. 13-14), it still spends itself in an incredibly generous manner, as if the treasury of words were always full. However strange it may seem, while everything in this play is, emotionally, up or down—each twin, for example, thinks the other dead; Olivia, in constant mourning and rejecting Orsino, is smitten by Viola/Cesario in the space of one interview—while everything vacillates, the language itself coins its metaphors and fertile exchanges beyond any calculus of loss and gain. When I hear the word “fool” repeated so many times, I also hear the word “full” emptied out or into it; so “Marry” and “Mary” and “madam” (“mad-dame”) and “madman” collapse distinctions of character (personality) in favor of some prodigious receptacle that “receiveth as the sea” (I. i. 11). No wonder modern critics have felt a Dionysian drift in the play, a doubling and effacing of persons as well as a riot of metaphors working against distinctions, until, to quote the ballad at the end, “that's all one.”

I think, therefore I am. What does one do about “I act” or “I write”? What identity for that “I”? For the poet who shows himself in the inventive wit of all these personae? Twelfth Night gives an extraordinary amount of theatrical time to Sir Toby Belch and Sir Andrew Aguecheek, and to clowning generally. These scenes threaten to erupt into the main plot, which is absurd enough, where love is sudden and gratuitous, as in Orsino's infatuation for Olivia (two O's) or Viola's for Orsino, or Olivia's for Cesario. Everything goes o-a in this play, as if a character's destiny depended on vocalizing. “M.O.A.I. doth sway my life” (II. v. 109). Whose hand directs this comic tumult of mistaken identities, disguises, devices, and names, that even when they are not Rabelaisian or musical scrabble (Olivia: Viola) or transparent like Malvolio (the evil eye, or evil wish) are silly attempts at self-assertion? So it doesn't really help when Sebastian in II. i. 14-18 identifies himself. “You must know of me then, Antonio, my name is Sebastian, which I called Roderigo; my father was that Sebastian of Messaline whom I know you have heard of.” We have two Sebastians, and one Sebastian is Roderigo. In addition, as we know by this point in the drama, Sebastian and Viola (that is, Cesario) are identical twins, born in the same hour, both saved from the “breach” a second time when they escape shipwreck and find themselves in a land with the suggestive name of Illyria—compounded, to the sensitive ear, out of Ill and liar/lyre. So also Viola enters the play punning, or off-rhyming. “And what should I do in Illyria? / My brother he is in Elysium” (I. ii. 3-4).

The question, then, relates to identity and destiny, or who has what in hand; it is also related to the question of questioning itself, that kind of speech-act, so close to trial and testing, and the legalese or academic lingo in a play perhaps performed at an inn-of-court. In late medieval times, from the twelfth century on, there was a shift in “pedagogical technique (and corresponding literary forms) from the lectio to the disputatio and questio … from primary concern for the exegeis of authoritative texts and the laying of doctrinal foundations toward the resolution of particular (and sometimes minor) difficulties and even the questioning of matters no longer seriously doubted, for the sake of exploring the implications of a doctrine, revealing the limits of necessity and contingency, or demonstrating one's dialectical skills.”20 Another authority writes that “Even the points accepted by everybody and set forth in the most certain of terms were brought under scrutiny and subjected, by deliberate artifice, to the now usual processes of research. In brief, they were, literally speaking, ‘called into question,’ no longer because there was any real doubt about their truth, but because a deeper understanding of them was sought after.”21 From contemporary reports of the “Acts” at Oxford when Elizabeth visited, we know that these questions and quodlibets maintained themselves at least ceremonially.22
Is *Twelfth Night*'s subtitle, “What You Will,” a jocular translation of *quodlibet*? What significance may there be in the fact that in I. iii. 86-96 Toby passes from “No question” to “Pourquoi” to “Past question?” My own question is: *Pourquoi* these “kikshawses” (“quelques choses”)? Wherefore, Shakespeare? What’s your metaphor for?

Testing and questing seem connected immemorially: it is hard to think of the one without the other, especially in the realm of “Acts” which assert authority or identity by playful display. Even the Academy participates that much in the realm of romance. But my comments are meant to lead somewhat deeper into a drama that relishes the night-side of things with such good humor. If there are low-class mistakes, as when Andrew thinks Toby's “Accost” refers to Mary's name, there are also the high-class mistakes, Orsino's love, principally, that starts the play with a fine call for music in verses intimating that nothing can fill desire, fancy, love. Its appetite is like the sea, so capacious, so swallowing and changeable. “If music be the food of love, play on.” Play on is what we do, as “Misprision in the highest degree” (I. v. 53) extends itself. Everything changes place or is mis-taken, so that Orsino believes himself in love with Olivia but settles “dexteriously,” as the Clown might say, for Viola; while poor Malvolio is taken for mad and confined in a place as gloomy as his temperament. We tumble through the doubling, reversing, mistaking, clowning, even cloning; we never get away from the tumult of the words themselves, from the “gratillity” (another clown-word, that is, gratuitousness or greed for tips, tipsiness) of Feste's “gracious fooling,” as when Andrew, probably tipsy himself, and stupidly good at mixing metaphors, mentions some of the clown's other coinages: “Pigrogromitus” and the “Vapians passing the equinoctical of Queubus” (II. iii. 23-4).

It is not that these funny, made-up words don't make sense: they make a kind of instant sense, as Shakespeare always does. Yet a sense that can't be proved, that remains to be guessed at and demands something from us. Does “equinoctial” hint at solstice or equinox festivals, if *Twelfth Night* was performed on the day the title suggests;23 is “Queubus” mock Latin for the tail or male, or a corruption of “quibus,” “a word of frequent occurrence in legal documents and so associated with verbal niceties or subtle distinctions” (C. T. Onions)? Did the audience know it was slang for fool in Dutch (“Kwibus”)?

The text requires a certain tolerance or liberality of interpretation: yellow cross-garters in the realm of construing, “motley in the brain” (I. v. 55). To quote Andrew—and it should be inscribed on the doors of all literature departments: “I would I had bestowed that time in the tongues that I have in fencing, dancing, and bear-baiting. O, had I but followed the arts!” (I. iii. 90-3).

There exists a modern version of another “antic” song about the twelve days of Christmas (cf. II. iii. 85). If *Twelfth Night*, the climax of Christmastide rejoicing, asks that we fill up the daystar's ebb, then the emphasis falls on giving, on true-love giving. *Twelfth Night*, formally the feast of Epiphany, is when divinity appeared, when Christ was manifested to the Gentiles (the Magi or three kings). Presence rather than absence is the theme. *Twelfth Night* is not a religious play, and yet its “gracious fooling” may be full of grace. The great O of Shakespeare's stage draws into it the gift of tongues; and in addition to the legal or academic metaphors, the food and sexual metaphors, and other heterogeneous language strains, occasionally a religious pathos, impatient of all these indirections, maskings, devices, makes itself heard. “Wherefore are these things hid? Wherefore have these gifts a curtain before 'em?” (I. iii. 122-3) To the question, what filling (fulfilling) is in this fooling, the best reply might be that, in literature, everything aspires to the condition of language, to the gift of tongues; that the spirit—wanton as it may be—of language overrides such questions, including those of character and identity.

Does Orsino, the Duke, have an identity, or is he not a plaything of fancy; and is love not represented by him as both arbitrary in what it fixes on and as “full of shapes” and “fantastical” as the entire play? These people seem in love with words rather than with each other. More exactly, the embassy of words and the play of rhetoric are essential tests for both lover and object of love. When Curio tries to distract the Duke from his musical and effete reflections by “Will you go hunt, my lord?” (I. i. 16), Orsino answers, startled, “What,
Curio?” meaning “What d’you say?”, which is misunderstood when Curio replies, “The hart,” after which the Duke can’t restrain himself from an old quibble equating hart, the animal, and heart, the seat of love:

Why, so I do [hunt], the noblest that I have.
O, when mine eyes did see Olivia first,
Methought she purg'd the air of pestilence;
That instant was I turn'd into a hart,
And my desires, like fell and cruel hounds,
E'er since pursue me.

(I. i. 18-23)

The hunter becomes the hunted; but it is also suggested (though we may not be convinced) that the Duke finds a heart in himself—a sensitivity where previously there was nothing but a sense of privilege.

We see how thorough this full fooling is. In Shakespeare the poetry—the prose too—is larger than the characters, enlarging them but also making their identities or egos devices in an overwhelming revel. The revels of language are never ended. This does not mean that language is discontinuous with the search for identity or a “heart.” Orsino's first speech already introduces the gracious theme of giving and receiving, of feeding, surfeiting, dying, reviving, playing on. Love and music are identified through the metaphor of the “dying fall” (I. i. 4), also alluding, possibly, to the end of the year; and, ironically enough, the Duke's moody speech suggests a desire to get beyond desire—to have done with such perturbations, with wooing and risking rejection, and trying to win through by gifts and maneuvers. “Give me excess of it, that, surfeiting, / The appetite [for love, not just for music] may sicken, and so die” (I. i. 2-3). At the very end of the play, with the Clown's final song, this melancholy desire to be beyond desire returns in the refrain “The rain it raineth every day,” and the internal chiming of “that's all one, our play is done.” Even in this generous and least cynical of Shakespeare's comedies, love is an appetite that wants to be routinized or exhausted, and so borders on tragic sentiments.

In drama, giving and receiving take the form of dialogic repartee. Shakespeare makes of dialogue a charged occasion, two masked affections testing each other, always on guard. Usually, then, there is a healthy fear or respect for the other; or there is a subversive sense that what goes on in human relations is not dialogue at all but seduction and domination. To have real giving and receiving—in terms of speech and understanding—may be so strenuous that the mind seeks other ways to achieve a simulacrum of harmony: maybe an “equinoctial of Queubus” brings us into equilibrium, or maybe festivals, like Christmas, when there is at-one-ment, through licensed license, through the principle of “what you will,” of freely doing or not doing. (Twelve, after all, is the sign of the temporal clock turning over into One.) But the turn is felt primarily at the level of “gracious fooling” in this Christmas play. Hazlitt goes so far as to say “It is perhaps too good-natured for comedy. It has little satire and no spleen.” And he continues with an even more significant remark, which I now want to explore: “In a word, the best turn is given to everything, instead of the worst.”

5

The poetical genius of Shakespeare is inseparable from an ability to trope anything and turn dialogue, like a fluctuating battle, to the worst or best surprise. I see the dramatic and linguistic action of Twelfth Night as a turning away of the evil eye. It averts a malevolent interpretation of life, basically Malvolio's. Though Malvolio is unjustly—by a mere “device”—put into a dark place, this too is for the good, for he must learn how to plead. That is, by a quasilegal, heartfelt rhetoric, he must now turn the evidence, from bad to good. In IV. ii. 12ff. a masquerade is acted out which not only compels us to sympathize with Malvolio, making him a figure of pathos, but which repeats, as a play within the play, the action of the whole. Malvolio is gulled once more, baited like a bear—the sport he objected to. Yet the spirit of this comedy is not that of revenge, malice or ritual expulsion. All these motives may participate, yet what rouses our pity and fear is the way language
enters and preordains the outcome. Shakespeare brings out the schizoid nature of discourse by juxtaposing soft or good words, ordinary euphemisms (“Jove bless thee, Master Parson,” “Bonos dies, Sir Toby,” “Peace in this prison”) with abusive imprecations (“Out, hyperbolical fiend,” “Fie, thou dishonest Satan,” “Madman, thou errest”). Malvolio is subjected to a ridiculous legal or religious quizzing: a “trial” by “constant question.” As in so many infamous state proceedings, he can get nowhere. He has to cast himself, against his temperament, on the mercy of the clown he condemned, though never actually harmed: “Fool, I say,” “Good fool, as ever thou wilt deserve well at my hand,” “Ay, good fool,” “Fool, fool, fool, I say!”, “Good fool, help me to some light and some paper: I tell thee I am as well in my wits as any man in Illyria” (“Feste: Well-a-day that you were, sir!”), “By this hand, I am! Good fool, some ink, paper, and light.”

Every word suddenly receives its full value. A man's life or freedom depends on it. It is not quibbled away. Yet words remain words; they have to be received; the imploration is all. “By this hand” is more than a tender of good faith, the visible sign of imploration. It is the handwriting that could save Malvolio, as that other “hand,” Maria's letter-device, fooled and trapped him. Ink, paper, and light, as for Shakespeare himself perhaps, are the necessities. They must dispel or counter-fool whatever plot has been, is being, woven.

The spectator sits safely, like a judge, on the bench; yet the reversal which obliges Malvolio to plead with the fool reminds us what it means to be dependent on what we say and how (generously or meanly) it is received. To please every day, like a courtier, lover or actor, leads us into improvisations beyond the ordinary scope of wit. It puts us all in the fool's place. It is everyone, not Feste alone, who is involved, when after a sally of nonsense Maria challenges him with “Make that good” (I. v. 7). That is, give it meaning, in a world where “hanging” and “colours” (collars, cholers, flags, figures of speech, I. v. 1-6) are realities. But also, to return to Hazlitt's insight, give what you've said the best turn, justify the metaphor at whatever bar (legal) or buttery (the milk of mercy) is the least “dry” (I. iii. 72). “The rain it raineth every day.”

Bakhtin's view, inspired by the development of literary vernaculars in the Renaissance, that each national language is composed of many kinds of discourse, dialogic even when not formally so, and polyphonic in effect, can be extended to the question of Shakespeare's poetical character. There is no one heart or one will (“Will”). Andrew's querulous “What's your metaphor?” or Maria's testing “Make it good” or the Clown's patter (“‘That that is, is’; so I, being Master Parson, am Master Parson; for what is ‘that’ but ‘that’? and ‘is’ but ‘is’?” (IV. ii. 15-17)) impinge also on the spectator/reader. Yet in this world of figures, catches, errors, reversals, songs, devices, plays within plays, where motley distinguishes more than the jester, and even Malvolio is gulled into a species of it, moments arise that suggest a more than formal resolution—more than the fatigue or resignation of “that's all one” or the proverbial “all's well that ends well.” So when Viola, as the Duke's go-between, asks Olivia, “Good madam, let me see your face” (where the “good,” as in all such appeals, is more than an adjective, approaching the status of an absolute construction: “Good, madam,” similar in force to Maria's “Make it good”), there is the hint of a possible revelatory moment, of clarification. The challenge, moreover, is met by a facing up to it. Yet the metaphor of expositing a text, which had preceded, is continued, so that we remain in the text even when we are out of it.

OLIVIA:

Now, sir, what is your text?

VIOLA:

Most sweet lady—

OLIVIA:

A comfortable doctrine, and much may be said of it. Where lies your text?
VIOLA:
In Orsino's bosom.

OLIVIA:
In his bosom? In what chapter of his bosom?

VIOLA:
To answer by the method, in the first of his heart.

OLIVIA:
O, I have read it: it is heresy. Have you no more to say?

VIOLA:
Good madam, let me see your face.

OLIVIA:
Have you any commission from your lord to negotiate with my face? You are now out of your text: but we will draw the curtain and show you the picture. [Unveiling] Look you, sir, such a one I was this present. Is't not well done?

VIOLA:
Excellently done, if God did all.

(I. v. 223-39)

I was, not I am; by pretending she is a painting, just unveiled, the original I is no longer there, or only as this picture which points to a present in the way names or texts point to a meaning. The text, however, keeps turning. There is no “present”: no absolute gift, or moment of pure being. Yet a sense of epiphany, however fleeting, is felt; a sense of mortality too and of artifice, as the text is sustained by the force of Olivia's wit. “Is't not well done?” Olivia, like Feste, must “make it good.” The mocking elaboration of her own metaphor allows speech rather than embarrassed or astonished silence at this point. The play (including Olivia's “interlude”) continues. There is always more to say.

Notes

4. “Shakespeare criticism”, in Aspects of Literature (New York, 1920), 200. Eliot's epigraph to The Sacred Wood (1921) from Rémy de Gourmont (“Eriger ses impressions en lois …”) discloses the common problem of going beyond impressionism without becoming unduly scientific (i.e. following the Taine-Brunetière tradition).
5. Consult, for example, J. V. Cunningham, Woe or Wonder: The Emotional Effect of Shakespearean Tragedy (1951), especially “The Donatan tradition”; and Ruth Nevo, Comic Transformations in Shakespeare (London and New York, 1980).

8. Consider, in this light, the vogue of courtesy books in the sixteenth century, of which the most famous, Baldassare Castiglione's *The Book of the Courtier*, was done into English by Sir Thomas Hoby in 1561, and reprinted 1577, 1588 and 1603. Book 2 of *The Courtier* treats exhaustively the decorum of jesting.

9. Mikhail Bakhtin, *Rabelais and His World*, tr. Helene Iswolsky (Cambridge, Mass., 1968). See especially ch. 3, “Popular-festive forms.” Bakhtin mentions the feast of Epiphany, and claims that the common element of both official and unofficial carnivals was that “they are all related to time, which is the true hero of every feast, uncrowning the old and crowning the new.” A significant footnote adds that, actually, “every feast day crowns and uncrows.” See also Bakhtin's second chapter on “The language of the marketplace in Rabelais.” (For some amusing remarks on Shakespeare and Rabelais, cf. Hotson, op. cit., 155ff.) C. L. Barber in *Shakespeare's Festive Comedy: A Study of Dramatic Form and its Relation to Social Custom* (1959) explores the same area.

16. See Hudson, op. cit., xxiii. Also, on the related matter of “praise-abuse,” Bakhtin, op. cit., 458: “The virginal words of the oral vernacular which entered literary language for the first time are close, in a certain sense, to proper nouns. They are individualized and still contain a strong element of praise-abuse, which makes them suitable to nicknames.” On word-formation in Rabelais (often suggestive for Feste's “gracious fooling”), see Leo Spitzer, *Linguistics and Literary History* (Princeton, 1948).

19. Just as in comedy, according to Donatan principles, turns of fortune should not include the danger of death (*sine periculo vitae*, cf. Cunningham, op. cit.). Since Leibniz defined music as a species of unconscious counting or arithmetic, and music enters so prominently into *Twelfth Night* (as *musica speculativa* as well as *musica practica*—see John Hollander, “Musica mundana and Twelfth Night” (English Institute Essays: Sound and Poetry, ed. Northrop Frye (New York, 1957)), an interesting analogy begins to form between comedy, music, and the Shakespearean language of wit. In this respect, the issues of gender difference and succession return, for the action of *Twelfth Night* is simply the release of Orsino and Olivia from their single state, which cannot occur without the separating out of Viola/Cesario and Viola/Sebastian (“One face, one voice, one habit, and two persons! / A natural perspective, that is, and is not!” (V.i. 214-15)). That “one” is redeemed from both singleness and duplicity: the confounding in singleness, as Sonnet 8, with its explicit music metaphor, suggests, should turn into a harmony of “parts that thou shouldst bear,” a concord of “all in one.” Cf. however Marilyn French's surprising conclusion in *Shakespeare's Division of Experience* (New York, 1981) that the one not in harmony, Malvolio, wins out in the end as the embodiment of society's repressive stewardship. “Constancy is required; love must lead to marriage; and marriage must lead to procreation” (123).

Ludens (1944), ch. 9, the “whole functioning of the medieval university was profoundly agonistic and ludic.” The word “Act” was formally applied to the degree exercises which conferred the Bachelor and Master of Arts. The use of “act” in Shakespeare (as in Hamlet V.ii. 346 and Winter's Tale V.ii. 86ff.) includes that sense of the presence of a conferring authority.

23. Cf. T. H. Gaster, Thespis: Ritual, Myth and Drama in the Ancient Near East (New York, 1950). Chapter 2, especially, discerns in ritual dramas a uniform pattern of kenosis, or emptying, and plerosis, or filling. The twelve nights after which Shakespeare's play is named could reflect the agon or combat of those two tendencies: a combat to determine the character of such days, whether they are fasts or feasts, lenten (under the aegis of Malvolio) or copious. The twelve days between December 25 and January 6 have, moreover, a special relation to calendar time: they may be epagomenal or intercalary (Gaster, op. cit., 10, and cf. 369) and as such linked to an “occlusion of personality.” Yet is not all fictional time intercalary? “Twelfth Night” in Shakespeare may stand for every such day or night which requires a release of that “lease” on life which has to be annually renewed, yet which here is a human and ever-present rather than ritually determined necessity.

**Criticism: Character Studies: Lydia Forbes (essay date autumn 1962)**

[In the following essay, Forbes examines Shakespeare's vivid character portraits in Twelfth Night, including the self-assured and charming Viola, the courageous and forthright Sebastian, the narcissistic and self-serving Malvolio, and the bawdy, witty, and wise Feste.]

A play is not necessarily spoiled by study. If you think that its theatricality is shackled when the author's theme or meaning is taken into account, that restraint is gentle compared to the chains hung on the author by opinionated thespians.

The interpreted arts suffer as often as they are exalted by the actions of interpreters. A play, the very raw material of which is the human image, is especially vulnerable to human interference. “How do you think we ought to do this play?” Ask this over-worked question of the author first, of the author as playwright. It is not his psyche, his literary life or contemporary social scene that is primarily involved, but his play. When the effect that the author wants is clear to the director and the players—so clear that they have some notion of how to approach their tasks—then it is time to look for useful help from other sources. And only then, after this much study, may a play be judged bad or frail enough to receive support from irrelevant theatricality.

I propose to show that Twelfth Night does not deserve such trimmings, and that Shakespeare did not attach his only subtitle to give his producers licence. This pungent and apt predecessor to Shakespeare's most serious plays can be liberated, by study, from smothering bonds of fantastical romance and rich vinous fumes. This study, of course, must take place in thoughtful rehearsals as well as in the closet or the classroom.

Superficial academic study can alleviate the players' ignorance of outmoded social customs and archaic words. By enlightened acting, their meaning becomes clear to the audience. Similarly, the whole play is not likely to get across to an audience unless the producers know what it is all about. Only the text, entire and in order on the stage, can guide a director to the theatricality that this particular play requires.

Reading Twelfth Night for the first time, a prospective director is introduced to a set of poetical and funny people involved in different kinds and stages of love. If he stops without finding out why these people have been assembled, if he makes the variousness of the forms of love—or the jollity of the characters—the basis of his theatrical presentation of Twelfth Night, he will present a series of sketches agreeably set off against
each other—not a play. This elementary view lets directors and actors add to the play as they will, supplying
the kind of laughs and sentiment which they feel it lacks. To load *Twelfth Night* with romping and by-play
(Shakespearewrights, 1957), to embellish it with a pitfall for Sir Andrew (Stratford Shakespearean Festival of
Canada, 1957), or crossoverters that become dexterously entwined to hobble Malvolio (The Old Vic, 1958) is
to miss the point of the play as much as those who mistake its romance for sentimentality, exploiting pretty
scenery and parasols (American Shakespeare Festival, 1960), introducing a non-existent love affair (The Old
Vic, 1949) or drowning the production in golden light and drifting rose leaves (Ngaio Marsh, director, in
Australia—and many another production). Would you keep a Breughel painting under an amber light? Play
Mozart like Strauss? The primary job facing the director and the actors of a play is to show the audience all
that study and technique can reveal of the effect intended by the playwright himself.

The director must find out what Shakespeare intended *Twelfth Night* to be like. How can he tell? To begin
with, he can look at the plot, as Shakespeare set it up and made his characters act it out. The plot is a vital part
of a good play. This we would more readily acknowledge were we not constantly assaulted by plots that are
overworked for their own exciting sakes. From Aristotle, who called the plot the “soul” of a drama, to the
Existentialists, who call the essence the product of all the actions, the behavior of the characters in a play has
been considered inseparable from the intrinsic life or movement of the play itself as a work of art.

The two stories that Shakespeare uses in *Twelfth Night* can be summarized in the same words: A clear-sighted,
purposeful woman, in dealing with self-deluded men, makes use of trickery to achieve her purpose. The
incidents, as Shakespeare has chosen and arranged them, say two things: First, this play is about deceptions.
Second, those who know themselves have an advantage over those who do not. Olivia says it tersely in lines
whose choppy beat and alliterations force an actress to speak slowly and impressively even in the “whirlwind”
of her passion.

Be that thou know'st thou art, and then thou art
As great as that thou fear'st.

(V. i. 152)

Some of the characters act rationally, some intuitively, some emotionally, but it is their shifts between the
strength and weakness of honesty and dishonesty, and the action of self-knowledge on self-deception that
make the basic movement of the play. “Main plot” and “sub-plot” are useful terms, but misleading when the
weight of interest is as evenly balanced as it is here. The use of a story told concurrently in two ways allows
great variation on the single theme and a wide opportunity for contrasts. It also gives a chance to demonstrate
theatrically one important source of this vital self-knowledge that is explained by Feste:

Truly, sir, [I am] the better for my foes and the worse for my friends. … [My friends] praise
me and make an ass of me; now my foes tell me plainly that I am an ass: so that by my foes,
sir I profit in the knowledge of myself, and by my friends I am abused.

(V. i. 19)

In order to lay bare the “worm” of “concealment”, to distinguish between “seems” and “is”, Shakespeare uses
several comic devices. First, he develops to their logical end types of behavior which seem reasonable, or at
least harmless. The disproportionate, and even inverted results are often more satiric than comic. For
examples of this, consider Sir Toby’s last bitter jibes at Sir Andrew, or the transformation of Orsino’s pretty
flowery love for Olivia into a hunger like that, says Orsino, of the all-digesting sea. Second, the author uses
abrupt juxtaposition of characters or incidents to reveal poignantly the real nature under their dissembling
masks. If the play is shown fluently, without breaks between scenes, these sometimes bring about what seems
like the pratfall of a pretense. Look at the sea-captain’s terse announcement “This is Illyria, Lady”, following
immediately the extended periods and conceits of the opening scene. Or Maria's trap for the "trout that must be caught with tickling" which succeeds Viola's "patience on a monument" speech, so carefully attuned to Orsino's mood. Third, the outright mistakes made by the dissembling characters taking each other at face value are funny. This is most obvious in the duel scenes. But mistakes made by characters in the play, as part of the story, cannot be demonstrated to the audience by actors who have themselves failed to distinguish between what is supposed to be real and what is supposed to be mistaken. How many aging, failing Festes have we seen because Olivia's and Malvolio's lines are taken as the key to the Clown's own nature? Should Olivia be enacted as Orsino sees her? Malvolio as Sir Toby sees him? Or Orsino as he imagines himself to be?

These comic devices in *Twelfth Night* are not used to make the play seem realistic. Shakespeare works out the various aspects and consequences of dissembling with variations and permutations like those of a fugue. Here are the false-faces of the Elizabethan Twelfth Night masquerade, as well as the topsy-turvydom of the feast of Misrule, and, above all at Epiphany, the showing forth of man. The formal arrangement of *Twelfth Night* includes the title, and the humor loses its bite outside of the context the author made for it. This play has more of the critical comic spirit of Jonson and Molière, carefully expressed in artifice, than Shakespeare's other comedies.

Much of the perspective that the audience has on the action of the play is afforded by the comments of a character who has a thoroughly artificial place in his society—the official Clown or Fool. The whole play is carefully limited in three very special ways. Socially: The principal characters are all "gentlefolk", with the exception of the sea-captains and the Fool, who serve the exposition and the commentary more than they do the plot. Geographically: No one arrives in Illyria except by shipwreck, and there is no attempt to create a microcosm or any sense of the wide world beyond. Verbally: The poetry and prose in which the play is expressed are graceful and perfectly suited to its restrictions. Rarely is there intense emotional pressure or elaborate imagery. It seems, rather, that the characters are themselves symbols of the various facets of the underlying idea.

The story of the nobly born Viola, disguised as the page boy, "Cesario", is usually considered the principal plot of *Twelfth Night*. She sets her heart on the Duke Orsino of Illyria, and finally weds him. He is a good man and worthy of her, but temporarily so confused by a romantically far-fetched notion of love that he would not be able to appreciate her in her own feminine dress.

Beside this story we have a series of events engineered by a gentlewoman, Maria, attendant on the Countess Olivia. Maria's aim is to marry Olivia's uncle, Sir Toby Belch. By pretending to gratify Sir Toby's desire to be revenged on the officious steward, Malvolio, Maria succeeds in getting Sir Toby so far out of favor with his niece that he marries Maria in order to remain a member of the household.

Linking these two patterns, the Lady Olivia, as the unresponsive object of Orsino's attentions, moves briskly but with dignity, and an outstanding appreciation of honesty in respect to both the good and the bad.

In the opening scene of the play the audience is regaled with the full exuberance and verbal confusion that deception and self-delusion bring about. It is like a musical opening by Brahms, in which the themes are developed before they are stated. With the second scene, austere and isolated on the seacoast, the premises and the thesis of the play are demonstrated. The sea-captain, who rescues Viola from the shipwreck and brings her ashore in Illyria, describes the country and what he knows of its people. Viola gives us her own measure and his in her famous lines:

```
There is a fair behavior in thee captain;
And though that nature with a beauteous wall
Doth oft close in pollution, yet of thee
I will believe thou hast a mind that suits
With this thy fair and outward character.
```
While an ironic contrast exists between Viola's speech and her intention to disguise herself, her recognition of her own limitations and her own “fair behavior” after real peril clear the unreal atmosphere of the opening scene, and also put the following extravagances of Sir Toby and Sir Andrew in their place.

Viola's charm and wit and continual self-consciousness about her own disguise help us understand the people she is dealing with. She is so reasonable and patient that when she trusts someone we are persuaded that her faith is justified. Only the unreasonable in human nature forces her to disguise herself. As a woman of her position, and in such a situation, she could not be a free agent; so she dresses like her brother and calls herself “Cesario”. She, like Olivia, needs time to get her bearings after a calamity in her family. She and Olivia dissemble in various ways to gain time.

Viola's first thought after being rescued is the hopeful one that her brother may also have survived. Her second thought is that she must now act on her own account. She has no family here. Since she has apparently heard of Orsino as a possible husband, she becomes a page in his household, to see for herself whether he might fill the bill. Though her deception serves her well, before the play is done Viola admits that disguise is, in fact, a “wickedness” wherein “the pregnant enemy [i.e. the Devil] does much.”

The portrait of Viola shows that Shakespeare, in writing a stylized play, does not prevent his characters from coming alive. Their energy does not seem confined by any pattern, but occasionally the pattern becomes so clear that characterization takes second place. The two sea-captains who rescue Viola and Sebastian are a case in point. Shakespeare makes them both men of profound integrity. Antonio, who rescues Sebastian, scorns any disguise even though he knows his life is in danger here, and he is arrested by Orsino's men. Viola's nameless rescuer goes so far as to help her to disguise herself, and keeps her secret even when he is “in durance at Malvolio's suit”. Both honest, both imprisoned in this odd land, these two men of the sea make a strong and arbitrary contrast to the prevailing distortions of life on shore in Illyria.

The first sight of Orsino, the Duke, should be as different from the first sound, as Viola's swaggering costume is from her very feminine nature. The reader of the play sees only the Duke's fantastic words, the actor will show the outward form of Orsino, who, in the last act, says to the sea-captain Antonio:

That face of his I do remember well,
Yet, when I saw it last, it was besmear'd
As black as Vulcan in the smoke of war:
A bawbling vessel was he captain of,
For shallow draught and bulk unprizable;
With which most scathful grapple did he make
With the most noble bottom of our fleet,
That very envy and the tongue of loss
Cried fame and honor on him.

(V. i. 55)

This Duke, who can recognize so well the quality of Antonio, is “noble in nature as in name”. Yet for the greater part of the play he is baffled and deluded. Imagining that he is in love with Olivia, he feels both exalted and harassed by his “desires”. He grants that he does not prize her riches, but he cannot see that he does not even prize her. Her beauty and her sex arouse in him a kind of emotion, conceit and mixed metaphor which he enjoys and thinks he needs so desperately that, at the end, he cries out for the heart to kill Olivia rather than lose her. So strong can the shape of fancy become!

By the fourth scene, Orsino has actually fallen in love with Viola. She wins him “liver and all” in the second
act by talking to him in his own “fantastical” way. Her disguise lets him become devoted, without being confused by the erratic passions he associates with love of woman. That devotion is clear in one of the most comic moments in the last act, when his greeting to Olivia: “Now heaven walks on earth” is followed abruptly by a return to the puzzle of Antonio's identification of Cesario. The only sudden change in Orsino at the end of the play is his loss of the delusion that he loves Olivia.

Olivia's message to Orsino in the opening scene, refusing his suit, should seem like too much protestation, even without the benefit of hindsight. Here is a girl who is suddenly left all alone to manage the affairs of a great estate. She is saddled with her father's younger brother—a liability—and with an importunate neighbor who insists that she wed. She cannot accept him; so she publicly exaggerates out of all reason her natural grief at the death of her brother, so as to keep the unwelcome suitor at arm's length.

Viola, as Orsino's ambassador to Olivia, cannot help judging Olivia by what she has heard, and by the rebuffs encountered at the Countess's gate. To Viola, Olivia is like the subject of Shakespeare's 94th sonnet, one of those who “moving others, are themselves as stone”, who take care to be “the lords and owners of their faces”. Viola calls her “too proud” when Olivia's unveiling and itemizing of her face emphasize this attitude. There is certainly further deception, conscious or unconscious, by Viola in this first dialogue between these ladies. Viola carries out her master's orders to woo Olivia in a way that cannot succeed.

Viola's wit and aplomb, her independence and scorn for her own well-conned flowery speech are at once congenial to Olivia. When Viola, in exasperation, pulls out all the stops on her own natural poetry, Olivia dives into her bag of tricks to win “him”. She tries to give “him” money, she sends “him” a ring, she wonders, when all her pleading seems to no avail: “How shall I feast him—what bestow of him—For youth is bought more oft than begged or borrowed.”

Olivia is very young, then, and probably slight of figure to be suitably matched to “Cesario”. Anyone as competent as she shows herself to be, as Sebastian notes that she is, and as a mistress would have to be to suit Malvolio, would not mismatch herself. She has been forced to grow up quickly in the last months, and her discovery of her own capabilities has gone to her head. But, since she is reasonable as well as practical, she can see that she is being swept off her feet and put suddenly into the position she has always objected to in Orsino (that of unrequited lover). This forces her to conceal her own nature from herself, to speak of “enchantment”, and say in most un-Olivia-like tones these lines, which are noticeably difficult to say naturally:

Fate, show thy force: ourselves we do not owe; What is decreed must be, and be this so.

(I. v. 331)

However this may comfort her, she does not actually leave to Fate anything which she can manage.

At her second visit as Cesario, careful to seem more courtly, formal and remote than the first time, Viola is met by the full storm of Olivia's recklessness. This is not only caused by passion, but by intuitive uneasiness:

OLIVIA.

Stay:

I prithee, tell me what thou think'st of me.

VIOLA.
That you do think you are not what you are.

OLIVIA.

If I think so, I think the same of you.

VIOLA.

Then think you right: I am not what I am.

OLIVIA.

I would you were as I would have you be.

(III. i. 151)

Sebastian, Viola’s twin, is exactly what Olivia would have him be.

The most fundamental consideration in the relationship between “seems” and “is” arises with the confusion of Sebastian and Viola. When Olivia mistakes Sebastian for “Cesario”, she is seeing the same spirit in both. Her eye is not stopped at the surface by any probable difference of height and voice. She did not fall in love with a physique. This is a difficult theatrical problem, certainly, but one to be tackled with bravado rather than coyness, because it is more than a casual assumption of the plot—it is a considered criticism of what we are accustomed to call “real”, the façade. Olivia must be consistently shown as a person who is wary of letting her eye be “too great a flatterer for [her] mind”. Her intuitive summing up of people is always made at a deeper level than this. As for the confusion of Antonio in mistaking Cesario for Sebastian, I believe that the only assumption the actor can make is that that honest stalwart could never entertain the suspicion of a disguise. He is far too much upset by the overwhelming sin of ingratitude to notice any surface changes in his erstwhile idol.

Sebastian has as much romantic venturesomeness, courage, charm and—all important to this play—integrity as Viola. But in his astonishing impetuosity he is a mirror image, rather than a copy, of his twin’s equally astonishing patience. Their intentions are the same, their ways of carrying them out are very different.

Two such spirits as Viola and Sebastian are required as “fitting climax to the swelling act” which in the end unmasks all the characters of this play. They are needed by Olivia and Orsino as mates of the appropriate sex. They are used by Shakespeare to emphasize “what a piece of work is man”.

The same theme as that of the story of Viola is also developed on another set of instruments. The story of the winning of Sir Toby Belch by Maria shows her determination and successful ruse prevailing over the weakness of his self-deception.

In Maria, to use the language of her intended husband, the spirit of the queen of the Amazons is incarnate in the body of a “wren”. Maria knows herself, her wit and abilities, her place in the household and her exact intentions, or perhaps ambitions would be the better word. The first time we meet her there is a conjugal ring to her nagging of Sir Toby that is different from the way she teases Sir Andrew and the camaraderie with which she jokes with the fool. (She is as adept as Viola in observing the “quality of persons” with whom she jests.) Her treatment of Sir Toby not only gives the lie to his masterful air, but makes it seem likely that his wedding her is only a matter of time. The problem, as the Fool states it at first, is to get Sir Toby sober. At the end he is not only still drunk, but beaten up—yet Maria has marshalled her forces successfully. She alone proposes the writing of a love letter to Malvolio purporting to come from the Lady Olivia, asking the steward to behave in a rude and ridiculous way. She is careful not to be watching with Sir Toby and Sir Andrew when
Malvolio is taken in by the trick, nor ever to say anything impertinent in front of Malvolio. Malvolio realizes, however, that Maria is not stopping Sir Toby's noisy revels, which have so annoyed Olivia that she asks him to leave the house if he cannot behave himself. After Malvolio is imprisoned for lunacy, Sir Toby confesses that he is “now so far in offense with [his] niece, that [he] cannot pursue with any safety this sport to the upshot.” We hear no more of Maria until the end of the play, after Sir Toby's disastrous encounter with Sebastian, when Fabian solemnly states, as if he believes it, that Sir Toby made Maria forge the letter to Malvolio—and married her in “recompense”!

This is as superficially sudden as Orsino's capitulation to Viola, and Sir Toby will never be any more aware than Orsino that this result has been in the making since Act I. In many ways the figures in the “sub-plot” seem like the figures in the “main plot” reflected in a carnival mirror, distorted by their greater selfishness and lesser grace.

Sir Toby is no more stupid than Orsino, and can be really forceful on occasion. Viola's remark that “wise men, folly fall'n, quite taint their wit” is immediately followed by the appearance of Sir Toby's paunch upon the stage. But his follies are of a variety which we are accustomed to stereotype as a vague and pleasant muddle of the “Falstaff” image and Old King Cole. (We are too lenient with Sir Toby, as we are inclined to be too stern with Orsino.) Sir Toby has always presented a bold front, by means of drink and bullying, but, within the play, he deceives only Sir Andrew Aguecheek, the “little-wit”. Sir Andrew is very easily fooled by anyone who cares to try, including himself. Sir Toby preens himself before this insubstantial figure, and seems to profit as much from this self-aggrandizement as from the Aguecheek purse, which he is milking with false promises of marriage to his niece.

Sir Andrew is amiable and ingenuous in regard to his foolishness as well as to his pretense of robustness and valor. But, unless Twelfth Night is considered only as a revel, there would seem to be little in this gullible little playboy to attract the attention of leading actors, as the part undoubtedly does. All the shallowness of Sir Toby is in his sycophant, without any of the intelligence and vigor that Sir Toby is misusing. Sir Toby is a strong man, weakened by aimlessness, covering himself boisterously with false strength. Sir Andrew makes a more clearly defined impression by being uncomplicatedly weak. But Sir Andrew is definitely the straight man for Sir Toby, not Sir Toby for Sir Andrew. The director who helps Sir Andrew to steal scenes with overdone clothes and builds him up with extra stage business is helping a natural difficulty of the situation to become a calamity to the play.

And then there is Malvolio—who has probably fascinated more Twelfth Night audiences than any of these other characters. Although his place in the story is only that of a butt for Maria's joke, his monumental simplicity gives him great strength in the play. Like Antonio, he “looks on tempests and is never shaken”. In his self-love, ambition, and lack of imagination, he is the focus of very real wishes that he may come to grief through overpresumption. But his masquerade is an involuntary mistake, and Olivia sympathizes with this “poor fool” because he is honest, he cannot be other than he is. Olivia “would not have him miscarry for the half of [her] dowry”, and, for his part, Malvolio has a profound respect for his Lady, and believes her household and family should befit her. There is no fun or revelry in this naive man, and that is why he cannot understand the fun of others. They call this attitude malice.

Malvolio's first entrance obviously follows his disparaging report to Olivia that the Clown has grown “dishonest” (in the Elizabethan sense). The repercussions of this piece of undoubtedly accurate reporting he lives to regret, though never understand, in prison when “Sir Topas” comes to call. Between the rather austere satisfaction Malvolio has learned to make for himself by “practising behavior to his own shadow”, and the straightforward anger and determination to have revenge that he feels in the last act, his mistaken efforts to please and woo his Lady should bloom earnest and vivid and unbecoming. His imprisonment cannot make him more or less understanding—he is only hurt and wants to get out. It is Sir Toby who is penalized for something he only wished for and watched, and Malvolio who is to judge him—Malvolio, who thought he
had his heart's desire and did not. To play Malvolio “straight”, as Howard Hewes is startled to admit after seeing the production of the Canadian Stratford Festival, does help the balance of the play, much as he seems to prefer the simultaneous view of the twins so deftly managed to confuse the poor steward.

Olivia's professional Fool, Feste, is silently present when Maria tells Sir Toby and Sir Andrew her plan to trick Malvolio into thinking Olivia loves him. He is not there to see the trick played out. Fabian, a straightforward sporting individual, may be left over from some casting change early in the life of Twelfth Night, but he serves well as a buffer between the Clown and the plot. Except for his masquerade as “Sir Topas, the curate” visiting “Malvolio, the lunatic”, Feste takes no part in other people's schemes, and this bit of personal revenge is quickly balanced by his promise to help Malvolio. It is quite in character for him to bring light and the means of freedom, and his superlative discourse on dissembling is also germane to the whole play. But his roles would not be well served by any participation in the trick of the letter or in its defense at the end. Hence Fabian.

That Olivia delights in Feste—the Clown, the Jester, the Fool—is a strong recommendation of them both. Olivia's ability to recognize and like an honest soul intuitively shows itself in her attachment to Feste, as well as to Viola, Sebastian, and Malvolio. She is willing to consider Malvolio's charge against Feste, but she is equally willing to see that on the Fool's own terms—“there's no true cuckold but calamity”—Feste is not “dishonest”. If she really wanted to discharge him, he would be gone.

An undue penchant for women and bawdry was, of course, the Fool's prerogative, and Feste takes advantage of this. When he will not say where he has been for “so long”, Maria calls his pun on being “well-hanged” by retorting that he has learned his courage “in the wars”. Mentioned only in passing, this provides a needed glint of contrast to Orsino's kind of love making, as the Clown's forthright begging contrasts with Sir Toby's confidence tricks.

In giving us perspective on these people and events, the Fool has two roles to play. First, in being all things to all men, he holds up to them a mocking mirror where they may not see themselves, though we, the audience, do. In singing “Come Away Death”, he out-Orsinos Orsino (and—possibly—exploits an Elizabethan synonym for “dying”); in witless joking he surpasses Sir Andrew to his face. He also comments directly on the characters and progress of the interwoven stories. In his first scene, after he has been “so long absent”, he absolves Olivia of mourning, which frees her to become infatuated with Cesario. In Viola, Feste meets his match. “I do not care for you, Sir”, says he. Can he not penetrate Cesario's mask? Though the Clown's wish does not make Cesario invisible then, by the end of the play that “gentleman” is certainly on his way out.

Feste, naturally, has the last words of the play. Why is it that theatrical and literary appraisal of his final song agree on a relaxed tone and kindly purpose for this ditty that are completely out of character for Feste? Even if he were “dissolving the ‘present laughter’” and “returning us to the ‘real’ world”, his apparent gentleness would be far from kind. But have we been so separated from reality all evening that we must be returned? We all recognize the catalogue of childish follies listed in his song which are no longer toys in the grown-up world: knavery, swaggering, drunkenness. In vehement anger at Antonio's accusation, Viola lists “lying, vainness, babbling drunkenness” as only less hateful than ingratitude. Now, Feste is holding his mocking mirror up to us, and we join the characters of the play in being unable to recognize ourselves and what the jester is really doing. He is parodying our ability to slough off Viola's anger and the anger of her creator, to enjoy the music and laugh at the characters in this play, to shield ourselves from the wind and the rain and go away untouched. This play, to Feste (and he seems to include even the author in his wry commentary), is too “bawbling” a vessel to grapple with the course and nature of the world. The audience will be “pleased” and, if they think of anything less gay will only say: “Oh, well, ‘the rain it raineth every day.’”

In addition to the plot and characters of Twelfth Night, Shakespeare uses the very forms of speech in this play to exhibit the deceptions he is talking about. In this comparatively inarticulate age, we revel in Shakespeare's
mastery of language. Listening to Feste, we understand what aversion Shakespeare felt when he came to make his way with words, only to find that these tools of his trade had been degraded and made “wanton”, made to lie with many meanings, here in this capital of wit and poetry. Much has been said about the contrast between the love of delicacy and beauty which Shakespeare shared with his audience, and the stench and cruelty of their city. The Globe could be separated from the bear pits by the force of Shakespeare’s power to invoke Illyria or Elsinore and the audience’s willingness to concentrate its attention on this kind of poetry. Was it also willing to pay attention to the poet’s exasperated cry: “To see this age! A sentence is but a cheveril glove to a good wit: how quickly the wrong side may be turned outward!” The twisting “rascal” words that weave through Twelfth Night are essential ingredients in the careful pattern of deceptions.

SIR Andrew.

... I know that to be up late is to be up late.

SIR Toby.

A false conclusion; I hate it as an unfilled can. To be up after midnight and to go to bed then is to go to bed betimes.

(II.iii.5)

VIOLA.

My father had a daughter loved a man,
As it might be, perhaps, were I a woman,
I should your lordship.

.....

I am all the daughters of my father's house,
And all the brothers too and yet I know not.

(II.iv.109)

Feste claims that his jesting is corruption of words, and in his dialectic he demonstrates what he is doing. He wears no motley in his brain—but he can show you Orsino’s “doublet of changeable taffeta”.

When the difference between what is seen and what is understood is too great, the people who are involved, and far from objective, cry “madman!” By the nature of its theme, this cry is often heard in Twelfth Night. Toby in drink is “mad”. Malvolio, of course, is “mad” to Olivia, and is teased about being possessed of the Devil. All the people are “mad” to poor Sebastian, who is so effectively disguised by looking like “Cesario”. And the climax comes when Antonio confronts Cesario with:

Thou hast, Sebastian, done good feature shame.

In nature there's no blemish but the mind;

None can be call'd deform'd but the unkind:

Virtue is beauty, but the beauteous evil

Are empty trunks o'er flourish'd by the devil.
FIRST Officer:

The man grows mad: away with him!

(III.iv.402)

The Illyrian officer calls Antonio mad when Antonio, with the authority of demonstrated honesty, blazons the real nature of madness. He can say that the devil possesses the “beauteous evil”, that the “deformed” mind, masquerading under “good feature”, is the only blemish in nature. Sir Toby naturally dismisses Antonio's words immediately as “most sage saws”, going on to decry Viola's dishonesty and topping that with her cowardice. “A coward, a most devout coward; religious in it”.

Where Toby sees platitudes and weakness, there is the courage that takes Antonio undisguised into the hostile city and makes him, flanked by guards, such a powerful figure on the stage when he is a captive. There is the courage that sustains Viola throughout the play and makes her willing to die at Orsino's whim. Here is the upshot of this exposition of pretenses.

Be that thou know'st thou art, and then thou art
As great as that thou fear'st.

Shakespeare, with faith in his “powerful rhyme”, meant this play to be a lasting, stageable product, not too intricate to be acted out well. It certainly stood the test of production under his eye. Will the audience meet his effort, and that of the director and actors, halfway? A play needs as much consideration as painting or sculpture or music. “I've seen it” is not a permit to say “I know that play”. How soon does one admit to “knowing” a symphony? However, good plays are not so readily available in this country as other forms of art. So we have not yet been made to learn our jobs as play-goers, our responsibility to look beyond plots and characters to the whole play. Nevertheless, a play's director does not owe us, for our ignorance, ingratiating decorations. He owes us a simple, unified production.

Nevertheless, Twelfth Night cannot fairly be presented as merely an entertainment, a revel, a festival or as Saturnalia. Critics like Mr. Clurman and Mr. Tynan should be moved to do more than call it a “nice”, “sweet”, “dewy”, “mellow”, or “cool” theatrical pastime, begging your indulgence for its “transvestite situations” which are “hard to bring off with any conviction”. It should not, moreover, be staged as if it were by A Comedy of Errors out of Much Ado About Nothing. It has a sinewy, wiry fabric of its own, with its own brilliance and beauty. And a player who asks, like Orsino, “What shall I do?” should attend to Olivia's answer: “Even what it please my lord, that shall become him.” To stage Twelfth Night, learn its own lesson: “What You Will” must be disciplined by what is honestly becoming to the proper nature of this individual play.

Criticism: Character Studies: Larry S. Champion (essay date October 1968)

[In the following essay, Champion argues that Twelfth Night features some of Shakespeare's most well-developed comic characters whose true but hidden identities are revealed over the course of the drama.]

It is commonplace to speak of the different kinds of Shakespearean comedy. The “happy” or “joyous” comedies, for instance, are contrasted with the “enigmatic” or “problem” comedies on the one hand and the “philosophic” or “divine” comedies on the other. And, among the first group, we are sometimes told that The
Two Gentlemen of Verona is a less successful “romantic” comedy than Much Ado About Nothing or that Twelfth Night is pure comedy whereas As You Like It incorporates potentially tragic motifs. In a broad sense, of course, the attitudes toward life expressed by comedy can range from the satiric to the sentimental, the farcical to the melodramatic—distinctions invariably based upon the nature of the plot. With Shakespeare's comedy, an equally valuable insight is gained through an investigation of the characterizations and the devices by which they are rendered humorous, a perspective which suggests that Shakespeare's concern was not with different kinds of comedy but rather with plots involving an increasingly complex depth of characterization. Obviously Shakespeare began with plot—not character, but the kind of characterization demanded by these plots reveals both his changing interests and his increasing abilities.

More precisely, comedy can avoid individual characterization by focusing entirely on the humor of physical action; or it can stress the disparity between appearance and reality—what in his society a character sets himself out to be as opposed to what he is in reality behind the social mask; or it can portray an experience involving a spiritual catharsis which transforms a personality or reconstitutes an entire society. In other words, a comic dramatist can depict character to any depth which is appropriate to his narrative. The character who inhabits a stage-world in which evil is a reality and who is involved in ethical and moral decisions through which the spectators see into the foundations of his personality is completely human; portrayed on the level of “faith,” he undergoes an experience—like those of the great tragic figures—which effects a basic transformation of values. The character who inhabits a stage-world in which there is no fundamental evil to force decisions revealing his spiritual or philosophic values is, of course, removed from reality. Yet, when—he pretends to be something which he is not, the gap between appearance and reality becomes material for comedy. In this situation the comic experience for the character is one of self-revelation; portrayed on the level of “identity,” he is humorously forced to recognize or to acknowledge his true nature. It is primarily of such drama that Northrop Frye is speaking when he remarks that comedy "is designed not to condemn evil, but to ridicule a lack of self-knowledge."  

The character who is delineated only on the level of "physical action" never invites our response to him as an individual. Our detachment complete, the comedy is that of manipulation, and the humor is drawn not from character involvement or character incongruity but rather from our observation of puppet-like characters maneuvered into ludicrous situations. Shakespeare, whose development as a comic playwright is consistently in the direction of complexity or depth of characterization, deals with each of these levels of characterization. His earliest works are essentially situation comedies; the humor arises from action rather than character. There is no significant development of the main characters; instead, they are manipulated into situations which are humorous as a result, for example, of mistaken identity and slapstick confusion. Thus, the characters are revealed only in terms of what they do, outer action. The Antipholuses and the Dromios of The Comedy of Errors are cases in point, manipulated as they are amidst a confused wife, courtesan, kitchen wench, sea captain, and goldsmith. So also the princess with her ladies in Love's Labor's Lost are played puppet-like against Ferdinand and his lords who have renounced sex for Academe. In A Midsummer Night's Dream the Athenian lovers—Hermia, Helena, Lysander, and Demetrius—are puppets manipulated into ridiculous self-contradiction by Oberon and Puck. The ensuing phase of Shakespeare's comedy sets forth plots in which the emphasis is on identity—character revelation—rather than physical action. This revelation occurs in one of two forms; either a hypocrite is exposed for what he actually is or a character who has assumed an unnatural or abnormal pose is forced to realize and admit the ridiculousness of his position. Of the first type Malvolio and Don John are prime illustrations, their true nature hidden from the other characters for much of the play by their moral hypocrisy. Of the second type, Benedick, Beatrice, and Claudio in Much Ado About Nothing and Orsino and Olivia in Twelfth Night are characters, for example, whose experiences reveal to themselves as well as to others their true personalities. With individuals of either type, actions are a facade to conceal true identity; and, to the extent that the spectator is aware of this incongruency, the hypocrisy on the one hand and the lack of self-knowledge on the other are ridiculous and the ultimate exposure humorous. Admittedly there is no fundamental transformation of character; yet the false pride which blinds one to fully knowing himself is purged. In any case, the emphasis in these comedies is on the ridiculousness of the character, not his danger to
society; he is funny, not evil, because in these stage-worlds we assume that normality will ultimately prevail and that he will never be allowed to engage in activities of permanent consequence either to himself or to others. In the final comedies, however, involving sin and sacrificial forgiveness, character development is concerned with a revelation of faith. In these stage-worlds the power of evil is not harmlessly contained within a circle of wit; and the characters, struggling on the fringe of comedy, must cope with the actual consequences of sin moral and political. The “comic” transformation of, for instance, Leontes in The Winter’s Tale or of Antonio, Alonso, and Sebastian in The Tempest is the result of a character's conversion to belief in a universe controlled by a principle of love most fully realized in its redemptive powers.

The fully developed character obviously creates problems for the dramatist who must maintain a comic perspective for the spectator or see his narrative turn to melodrama or tragicomedy. Since the spectator's involvement with physical action does not extend beyond the superficial laughter that a humorous situation arouses, the playwright—to the extent that he can maintain such a perspective—has no difficulty in achieving a comic tone for “flat” characters who make no ethical decisions. On the other hand, with greater character complexity, the spectator is provoked into emotional identification with character and situation, and his comic perspective is blurred. Whether the Renaissance comic form took shape primarily from “Saturnalian release” or from “Terentian intrigue,” the dramatic experience which is to divert rather than distress is possible only so long as the spectator is either emotionally detached from the characters or, if emotionally involved with them, in possession of such knowledge or provoked into such a mood as to be assured of a happy end accomplished by means which only temporarily appear unpleasant. Consequently, as Shakespeare's conception of character expanded, so also did his problem of maintaining a proper perspective for the spectator. His success is the result of experimentation with a kind of comic pointer or comic controller who is himself involved in the action and yet whose relationships with the other characters or whose actions and comments provide us a sufficiently omniscient view—whether he himself possesses this view or not—for us to rest secure that an impenetrable circle of wit has exorcised any dangers of permanent consequence.

An investigation of the level of characterization and the method of comic control in Twelfth Night underscores the significance of the play in the evolution of Shakespeare's comedy. In his richest comic creation to this point, with character developed on the level of identity as well as on the level of action, Shakespeare has moved far beyond the one-dimensional character of farce. At the same time, he has achieved one of his most successful integrations of comic device and character revelation. Through association with Viola, Sebastian, Feste, and Maria, each of the other characters reveals his abnormal or hypocritical posture, comes to understand his true nature, and is absorbed into a normal society. The twins Viola and Sebastian, separated in a storm antecedent to the action of the play and reunited in the fifth act, are the primary comic pointers in that they establish the proper comic perspective for the spectator by providing the information necessary to create the dramatic irony. Their apparent shifts in personality—Viola's disguise and the subsequent mistaken identity—produce actual exposures in the surrounding characters. Feste and Maria, a second pair of comic pointers outside the primary action, serve a similar function for the low characters. These four characters, in no way self-deceived, create a rapport with the spectator; and their comments function to provide information about others necessary to guide the laughter.

Concerning the level of characterization in Twelfth Night, the basis for comedy, more specifically, is the incongruity between action and identity. Major characters at the outset attempt to hide their real nature behind a facade of physical action which is eventually revealed as a mere pose—Olivia as a victim of fashionable melancholia, Orsino as the disconsolate and unrequited lover, Malvolio as the puritanical jack-in-office.

The duke, like Romeo in love with the idea of love, strikes an immediate tone of hyperbolic sentimentalizing as he revels in the music which feeds his passion. In love with Olivia at first sight, he delights in the fancy of puns to describe his languishment:
That instant was I turn'd into a hart;
And my desires, like fell and cruel hounds,
E'er since pursue me.

(I, i, 21-23)

Informed in no uncertain terms that Olivia is unreceptive to his suit, he is nonetheless determined to pursue his love when we see him three scenes later unclasping to Viola (Cesario) “the book even of [his] secret soul.” Now, however, he is to woo by deputy both because he assumes Olivia “will attend it better in thy [the page's] youth” (I, iv, 27) and because, as he himself admits, he is “best / When least in company” (I, iv, 37-38). Thus far, then, the spectator is confronted with a melodramatic duke who, while avowing an overwhelming love, admits to a preference for solitude at the same time he commands another to continue his suit.

In the duke's next appearance (II, iv), two remarks, in the midst of his continued pose, signal his true identity as a prideful man infatuated with the social pose of the romantic lover. First, his description to Cesario of feminine beauty simply does not correspond with his Petrarchan posture. While he mouths praise to Olivia's immortal beauty, he advises Cesario rather cynically to find a lover younger than he, “For women are as roses, whose fair flower / Being once display'd doth fall that very hour” (II, iv, 39-40). Secondly, in the course of his conversation he flatly contradicts himself in comparing the quality of a man's love with that of a woman's. At one point he says:

Our [men's] fancies are more giddy and unfirm,
More longing, wavering, sooner lost and worn,
Than women's are.

(II, iv, 34-36)

Yet, a few lines later he avers:

There is no woman's sides
Can bide the beating of so strong a passion
As love doth give my heart; no woman's heart
So big, to hold so much. They lack retention.

Between that love a woman can bear me
And that I owe Olivia.

(II, iv, 96-99, 104-106)

Even though the duke again calls for music to feed his passion and listens to Feste's song describing the melancholy death of a distraught lover, his contradiction in advising one concept of love for Cesario and claiming another for his personal commitment reflects intellectual toying with the idea of love rather than a direct emotional involvement in it.

When Orsino appears again in the final act, his actions render his character revelation complete. Both the rapidity with which he can turn angrily on Olivia and the poised alacrity with which he can accept Cesario (now Viola) as his heart's substitute reveal how deeply indeed he has been committed to the stakes of love! When the countess first enters, Orsino speaks metaphorically of heaven walking on earth. But, his suit again rejected as “fat and fulsome,” he suddenly alters his metaphor to “perverseness,” “uncivil lady,” and, instead of heaven and its shrines, speaks of her “ingrate and unauspicious altars” (V, i, 115-16). The “marble-breasted tyrant” has made his thoughts “ripe in mischief” as he threatens to tear her minion (Cesario) out of her cruel eye as a sacrifice to her disdain. In effect, within the space of a few short lines his unbounded love has been exploded by an equally unbounded temper. The second shift is even more revelatory of the true quality of his
love. When Olivia's husband is produced, Orsino, at the point of being outfaced altogether, determines to "share in this happy wreck." He agrees to take Viola to wife asking to see her in woman's weeds, later even foregoing that precaution.

The development of Orsino's character, then, takes the form of revelation to himself and to others. His Petrarchan pose for Olivia is revealed as merely the cover for a man enjoying the fascination of his romantic adventure and too proud to accept rejection.11

The incongruities in Olivia's character are developed even more extensively throughout the drama. Her true identity is that of a normal young lady capable both of loving and being loved and possessing a sense of humor which enables her to understand and appreciate the good fun in a practical joke. This personality she attempts to conceal, however, through her actions. And, as a result of this melancholy pose, her reputation for morbid solemnity has grown throughout the land.

Although the countess does not appear on stage until the final scene of the first act, her haughty posture is established through prior conversation. For instance, in Scene ii the spectator is told that, because of the recent deaths of her father and brother, Olivia "hath abjured the company / And sight of men" and "will admit no kind of suit" (ll. 40-41, 45). More specifically, we learn in Scene i that she intends to wear the veil of mourning for full seven years and to "water once a day her chamber round / With eye-offending brine" (ll. 29-30). When the jocularity of her household in Scene iii appears inappropriate to her pose, she remains in character through a mild reprimand to Sir Toby Belch delivered by Maria:

"Your cousin, my lady, takes great exceptions to your ill hours. … That quaffing and drinking will undo you. I heard my lady talk of it yesterday, and of a foolish knight that you brought in one night to be her wooer."

(I, iii, 5-6, 14-17)

Olivia's posture, then, is clear before she appears on stage. Determined to mourn her relatives beyond normal bounds, she will reject all suitors and will soberly hold herself aloof from the slightest household merriment. Interestingly, Sir Toby's best comment on her pose is the suitor (Sir Andrew Aguecheek) whom he has cast in the face of her resolution to abjure the society of men.

This facade of character dissolves, at least for the spectator, at her first appearance on stage. For in the lengthy final scene of Act I, Feste flatly proclaims the absurdity of her attitude, and, later, with Cesario she is unable to maintain the posture she has so carefully cultivated. At our first glimpse, she is testily chastizing Feste for his having been so long absent from the house and for his continued foolishness. The clown, however, as Cesario is to do later, confronts her with polite but firm rebuttal, mockingly proving her a fool for her protracted melancholy:

CLO.

Good madonna, why mournest thou?

OLI.

Good fool, for my brother's death.

CLO.

I think his soul is in hell, madonna.
OLI.

I know his soul is in heaven, fool.

CLO.

The more fool, madonna, to mourn for your brother's soul being in heaven. Take away the fool, gentlemen.

(I, v, 72-78)

Her genuine nature is further revealed as she, not altogether displeased with Feste's wit, defends his catechism against Malvolio's charges. Even so, she is in no way ready to drop her demeanor. When a messenger arrives to plead Orsino's case, she orders Malvolio to report that she is sick or not at home. And, when Cesario's persistence prevails, she calls for her veil—the physical symbol of her artificial pose. Not awed by Olivia's cold and haughty disdain, Cesario frankly accuses her of being “the cruellest she alive” and “too proud.” The countess, though supposedly abjuring the sight of men for the sake of her brother's memory, listens with obvious delight—but her interest is in the messenger, not the message. The result is a flagrant revelation of the insincerity of her earlier posture as she not only displays a normal and healthy interest in what she assumes to be the opposite sex but is willing to act the aggressor's role in her affair of the heart. To that end she encourages Cesario to come again for further consultation and sends him a ring on the pretense that she is returning what he had earlier forced upon her. In the final moments of the act, she voices her dilemma in soliloquy:

Thy tongue, thy face, thy limbs, actions and spirit
Do give thee five-fold blazon. Not too fast! Soft, soft!
Unless the master were the man. How now!
Even so quickly may one catch the plague?
Methinks I feel this youth's perfections
With an invisible and subtle stealth
To creep in at mine eyes.

(I, v, 311-317)

Her two appearances in Act III develop further the contrast between her true nature and her assumed posture. Her pursuit of Cesario more pronounced, she is not without moments of remorse as she realizes the indignity of her actions. For instance, in Scene i she tells Cesario not to be afraid, that she will pursue no further (Il. 141, 143), and in Scene iv she laments:

I have said too much unto a heart of stone,
And laid mine honour too unchary on't.
There's something in me that reproves my fault.

(Il. 221-223)

She is unable to contain her love, however, and at this point openly declares her affection:

Cesario, by the roses of spring,
By maidhood, honour, truth, and everything,
I love thee so, that, maugre all thy pride,
Nor wit nor reason can my passion hide.

(III, i, 161-164)

Moreover, a short time later she becomes ridiculously flustered at Cesario's very approach:
I have sent after him; he says he'll come.
How shall I feast him? What bestow of him?
For youth is bought more oft than begg'd or borrow'd.
I speak too loud.—

(III, iv, 1-4)

In truth, her love for Cesario is no less outrageous than Malvolio's for her, once the steward has become convinced that he is the secret object of her attention.

By the end of the third act Olivia's true identity has been fully revealed to the spectators. Her remaining actions leading to marriage will complete the revelation to the other characters as well. For, in the following scenes Sebastian, who has replaced Viola and who admittedly is bewildered by the advances of the beautiful countess, is nevertheless willing to receive them and to tell her that he, “having sworn truth, ever will be true.”

Malvolio is perhaps the most obvious illustration of comic character incongruity. As Olivia's steward he pulls moral rank on everyone in her household and delights in contrasting his grave prudence with their apparent hedonism. Even Olivia, herself engrossed in sombre lamentation for her deceased brother, perceives the excess prudishness in his manner:

O, you are sick of self-love, Malvolio, and taste with a distemper'd appetite. To be generous, guiltless, and of free disposition, is to take those things for bird-bolts that you deem cannon-bullets.

(I, v, 97-101)

Similarly, Maria in a later scene expresses concern that Toby's late carousals have awakened Malvolio, who—as anticipated—rushes in and exclaims against the “caterwauling” and the “gabbl[ing] like tinkers at this time of night.” He in effect orders them out of the house unless greater self-discipline is exercised, singling out Maria for especial chastisement. Because of his grave disposition Olivia later summons him to entertain Cesario: “He [Malvolio] is sad and civil, / And suits well for a servant with my fortunes” (III, iv, 5-6).

When Malvolio appears before the countess, however, his true nature is showing as a result of his avarice. His puritanical facade, labeled time-serving by Maria, has been profitable only so long as he was convinced such posture was desired by his employer. Since he is motivated by ambition rather than principle, he now hesitates not a moment to accept a diametrically opposite pattern of action. His erstwhile grave face is lined with the wrinkles of a plastered smile; his conservative attire is replaced with cross-gartered yellow stockings. As commanded in the note which he assumes to be Olivia's, he is “opposite with kinsmen, surly with servants,” and his “tongue tang[s] arguments of state.” Olivia, amazed at Malvolio's antics and shocked at the effrontery of his remark that he will come to her bed, declares “this is very midsummer madness.” Later, Feste (Sir Topas) exorcises the evil spirit from the steward, who refuses to pray in his new role as a festive gallant. And, as from the dark room Malvolio accurately parrots the orthodox answers to the theological questions posed by Sir Topas, the spectator observes how distant indeed is this religion of action from his religion of words. The action, then, has flayed the pious cover and revealed the obsession of ego and ambition from which his personality suffers.

Revelation of the disparity between action and identity in Twelfth Night involves several of the minor characters as well. Aguecheek, for instance, masks his cowardice behind a volley of words and fatuously challenges the reluctant Cesario to a duel, but his courage persists only so long as his agressor's timidity. So also, Sir Toby stakes his pursuit of the jolly life on his ability to control any situation which he creates—and
here he fails physically in his inability to manipulate Sebastian (whom Aguecheek has unwittingly provoked) and emotionally in his inability to control his fascination for Maria (to whom he loses the freedom of his bachelorhood). Even Antonio and the theme of friendship are not exempt from Shakespeare's pattern. When Sebastian reveals his identity to his rescuer and describes his destination, the sea captain hyperbolically pledges his affection: “If you will not murder me for my love, let me be your servant. … [C]ome what may, I do adore thee so, / That danger shall seem sport, and I will go” (II, i, 36-37, 48-49). Similarly, his love and “jealousy what might befal your travel, / Being skillless in these parts” motivate Antonio to accompany Sebastian despite his own physical danger resulting from his previous banishment from Illyria for engaging in a sea-fight. With magnanimous affection he forces his purse upon Sebastian, and without hesitation he later intervenes in the duel between Aguecheek and Viola (whom he assumes to be Sebastian), swearing that he “for his love dares yet do more / Than you have heard him brag to you he will” (III, iv, 347-348). But the hyperbole proves bitter when Sebastian appears to deny knowledge of him or his money:

... O, how vile an idol proves this god!
Thou hast, Sebastian, done good feature shame.
In nature there's no blemish but the mind;
None can be call'd deform'd but the unkind.
Virtue is beauty, but the beauteous evil
Are empty trunks o'erflourish'd by the devil.

(ll. 399-404)

When next on stage (V, i), he speaks of the “false cunning” of the cold and deceitful thief. And his wrath abates only when the twins are onstage in the final scene. Antonio's friendship, then, has faced the human problems of confusion and misunderstanding, and his reactions have reflected the variable effects of such problems on the personality. Aguecheek, Toby, and Antonio, in short, provide an appropriate background for Shakespeare's portrayal of character revelation.

Incongruity between a character's surface action and his true identity is, of course, only the basis for comedy. The realization, as previously described, depends upon the success with which the dramatist uses comic devices to achieve a perspective from which the spectator will enjoy the situations which dislodge the characters from their abnormal posture. In *Twelfth Night*, the comedy of the first three acts results from the spectator's awareness, through the comic pointer, of the role that each character is playing and of the fact that the role is a pose; the humor of Act IV arises from the pointer's forcing each character into action contradictory to his pose which reveals his true nature to the other characters. And, in Act V with both twins on stage and with each character forced to eat the humble pie of exposure, the comic catharsis is achieved and each character restored to normality.

Shakespeare carefully sets up his pointers early in Act I. In Scene ii Viola describes the shipwreck which she has survived, a twin brother of whose life she is uncertain, and the disguise of eunuch which she will assume for reasons of safety as she travels to Orsino's court. Her ability to moderate her grief for Sebastian provides a foil for the excessive nature of Olivia's mourning. The following scene introduces Olivia and her household, with Maria tolerantly chiding Toby for his late hours and openly flouting the fatuousness of Sir Andrew. In Scene iv Viola assumes her disguise as Cesario and quickly gains favor with her new master. At this point the dramatic irony becomes significant for the function of the comic pointer as Orsino unwittingly sends female to woo female and thus subconsciously reflects the artificiality of his passion. The final scene of the act introduces Feste as a clown who travels in the households of both Orsino and Olivia. He immediately establishes himself as one who dispassionately observes this circle from the outside, with remarks such as: “Those wits, that think they have thee, do very oft prove fools; and I, that am sure I lack thee, may pass for a wise man” and “Better a witty fool than a foolish wit” (I, v, 36-40). And his first action is mockingly to reveal to the countess and to the audience the foolishness of her inordinate mourning. In the ensuing scene Shakespeare inserts a brief moment to reveal that Sebastian is indeed alive. Since he too is moving toward
Orsino's court and since Viola's disguise is masculine, the comic trap of mistaken identity is constructed, and the middle acts will bait virtually every aspect of the trap in order that the catastrophe or resolution of the final act will be more effective.

The comic pointers introduced, the major portion of the plot now utilizes the rapport created between Viola (and later Sebastian) and the spectator to effect the comic exposure of Olivia, Orsino, Aguecheek, Belch, and Antonio. Feste and Maria will successfully exploit Malvolio's presumptuous nature. The steward—whether patterned after William Ffarrington, Sir Ambrose Willoughby, Sir William Knollys, or none of these—functions in the context to heighten the absurdity of Olivia's romantic liaison with Cesario in Act III by himself becoming her lover. To carry out Malvolio's duping and derision, Shakespeare prepares these servant figures who move in his circle and have the best opportunity to know his true nature.

Viola, far from being a totally disinterested person, is enamored of Orsino though her masculine disguise renders any such relationship ludicrous—just as ludicrous as Olivia's passion for Cesario. But her primary function in the play is to reveal Olivia's hypocrisy to the spectator so that he might fully appreciate the process of comic deflation which will restore the countess to normality. To this end, once the touchstone relationship is established, Viola in soliloquy carefully identifies Olivia's infatuation for the spectator:

Fortune forbid my outside have not charm'd her! 
.....She loves me, sure. The cunning of her passion 
Invites me in this churlish messenger. 
.....Poor lady, she were better love a dream. 
.....How will this fadge? My master loves thee dearly; 
And I, poor monster, fond as much on him; 
And she, mistaken, seems to dote on me. 

(II, ii, 19, 23-24, 27, 34-36)

In two later scenes (II, i; III, iv) as Olivia becomes increasingly the aggressor, Cesario warns her that “I am not what I am” and that, in light of her haughty pose of immunity to romance, she is pitifully deceiving herself: “You do think you are not what you are” (III, i, 151).

Once Shakespeare has set in motion Olivia's passion, which is to result in her ultimate exposure and which will be all the funnier for the delay, he diverts the focus by manipulating the comic pointer into a series of intriguies by which to expose the surrounding characters. Throughout the third act, for each of these characters the trap is set which is to be sprung in Act IV as Sebastian replaces Viola upon the scene. In Scene ii, for instance, Aguecheek is goaded into challenging Cesario to a duel. Toby and Fabian persuade the fop that Olivia really loves him and that she is feigning interest in Cesario to test the mettle of his manliness. The ridiculous challenge is subsequently forced upon the distraught Viola, who declares she “will return again into the house and desire some conduct of the lady. I am no fighter. … I am one that had rather go with sir priest than sir knight” (III, iv, 264-265, 298-299). Viola, of course, realizes the danger of her disguise—which Shakespeare has no intention of destroying before the full range of exposure is effected. Aguecheek, on the other hand, senses in her reaction an even greater coward than himself, and in Act IV flagrantly pursues the challenge. Andrew, too, Shakespeare has prepared for the appearance of Sebastian! In Scene iii, the dramatist also primes Antonio for his moment of self-knowledge. Pouring forth his friendship in hyperbolic terms and risking his life through his presence in the city, Antonio insists that his friend accept his purse for what needs might arise and meet him an hour later at the Elephant.

Thus, at the end of Act III, each character has exploited his character facade to its height. And, even though the twins are meaningfully integrated into the plot in their own right, their sudden reversal in Act IV presents the comic shock which will transform each of the characters and will reveal their true identity. Aguecheek, for instance, rushes upon “Cesario” to “cuff him soundly,” but the tables are turned as Sir Andrew moans, “We
took him for a coward, but he's the very devil incarnate” (V, i, 183). Similarly, Sir Toby, intent upon fostering the mock combat but equally intent upon preventing either party from actually drawing a sword, now finds “Cesario’s” wrath quite unmalleable and consequently gets his head bloodied for his mischievous connivances. So also, Olivia suddenly finds “Cesario” amazingly susceptible to her charms and rushes the docile youth off to a priest. Meanwhile, lest any spectator be confused and the ironic humor lessened, Sebastian—clearly functioning as Shakespeare’s comic pointer—explains in soliloquy his confusion at Olivia’s behavior and his inability to locate his friend Antonio at the Elephant:

Yet doth this accident and flood of fortune
So far exceed all instance, all discourse,
That I am ready to distrust mine eyes
And wrangle with my reason. ...

(IV, iii, 11-14)

And, in turn, Olivia's hypocrisy in coveting the affection of Cesario despite her original pose provokes the sudden transformation of Orsino in which he denounces her haughty disdain and snatches Viola to his heart, a heart which only a few moments earlier was abjectly prostrated before his self-constructed altar of undying love for the countess.

Shakespeare's comic device, apparent to the spectators since the second scene in the play, is fully revealed to the characters of the plot in the final scene as a capstone to the character revelations:

One face, one voice, one habit, and two persons,
A natural perspective, that is and is not!
.....An apple, cleft in two, is not more twin
Than these two creatures.

(V, i, 223-224, 230-231)

The close integration of the subplot reveals further the careful construction of the plot of Twelfth Night. Malvolio's puritanical posture as the zealous moralist and the flagrant exposure of his hypocrisy by Feste and Maria reinforce both the theme of character revelation and the tone of tolerant mockery. The group of Maria, Feste, Toby, and Fabian, planting deceptive information and observing from the side as Malvolio is duped into rejecting his original pose, suggest the group of spectators as they too—cognizant of the deceptive twins which the author has planted in the main plot—look on as the major characters are run through similar paces. Thematically, Malvolio is a third suitor for Olivia in Acts II and III, his presumptuous wooing occurring as a corollary to Olivia's ridiculous pursuit of Viola-Cesario. Structurally, Shakespeare utilizes the gulling and exposure of Malvolio (II, iv; III, iv) as a prelude to the major character revelations in Act IV.

Malvolio sets himself in enmity with Feste in his first appearance on stage. As he gripes about the clown's foolishness, Feste quips:

God send you, sir, a speedy infirmity, for the better increasing your folly! Sir Toby will be sworn that I am no fox, but he will not pass his word for twopence that you are no fool.

(I, v, 83-86)

More specifically, Maria brands Malvolio “a kind of Puritan”:

… [A] time-pleaser; an affection'd ass, that cons state without book and utters it by great swarths; the best persuaded of himself, so cram'd, as he thinks, with excellencies, that it is
his grounds of faith that all that look on him love him; and on that vice in him will my
revenge find notable cause to work.

(II, iii, 160-166)

She then carefully describes, both to inform her cohorts and to establish the comic irony for the spectators, the
device by which she will drop a forged love-note in his way. And two scenes later she directs Toby, Andrew,
and Fabian to get “into the box-tree: Malvolio's coming down this wall” (II, iv, 18-19). Throughout the scene
the pompous and gullible Malvolio is taken in completely—while his prepared audiences in the galleries and
on the stage delight in watching his vaunted sobriety and conservative manner sacrificed for the opportunity
of social and financial gain. Similarly, as he parades himself before Olivia in ridiculous attire and later as he is
accused by Feste-Sir Topas of being a puritan possessed of the devil, Feste and Maria deliver a steady volley
of comments designed to focus the spectator's attention on the humor arising from Malvolio's hypocrisy, an
inversion of values so drastic that, as Fabian remarks, “If this were played upon a stage now, I could condemn
it as an improbable fiction” (III, iv, 140-141).

Malvolio's role, then, forms the subplot of the play; it has no direct narrative connection with the primary
comic device of Viola-Sebastian. Once Maria and Feste have goaded him into exposure through his wooing
Olivia, he is conveniently removed to the dark room as the action of the major plot resumes. And he returns to
the stage only after the full range of character revelations has occurred. His presence in Act V is not
insignificant, however, because it enables Shakespeare to maintain a comic tone. It may be true that
Malvolio's refusal to take his ignominy in the spirit of a joke and his determination to “be revenged on the
whole pack” forfeits any opportunity for our ultimate sympathy, but his action also maintains the comic
perspective of the play. Through restoring a character to his true nature, the comic catharsis achieves a
harmonious social relationship: Orsino weds Viola, Olivia weds Sebastian, Toby weds Maria, Sebastian's
friendship with Antonio is restored, Sir Andrew accepts his cowardice. Malvolio's singular unwillingness to
learn through laughter provides the spectator a final chuckle at one who remains a comic butt. And, for that
matter, his action is not exceptional to the theme of the play. He has, like the others, been forced to face the
revelation of his true personality, and in his case the revelation is not an idyllic one.

As described at the outset, character revelation does not involve actual transformation. While the
characterization is indeed more complex than the mere manipulation of the Antipholuses and the Dromios of
The Comedy of Errors, there is no innate alteration of personality such as is to be depicted in Leontes of The
Winter's Tale and in Antonio, Sebastian, and Alonso of The Tempest. In Twelfth Night the character is
identical at the beginning and at the conclusion. In Illyria no crimes have been committed; nothing needs to
be forgiven. The characters, motivated at best by a cultivated social dilettantism and at worst by an obsession
for social status and wealth, make asses of themselves as a result of their failure to use common—not
moral—sense. But the characters know themselves more fully at the end of their experiences. They have faced
the therapy of exposure, have been laughed from their abnormal postures, and, we assume, have every reason
to expect a richer and more productive life as a consequence of their self-knowledge. With Feste, they might
all say: “By my foes, sir, I profit in the knowledge of myself” (V, i, 21-22).

Shakespeare in his subsequent plays will move toward a deeper comic vision involving a society in which evil
is a reality and in which characters are spiritually transformed through the quality of love's forgiveness. His
continued efforts in these comedies to establish an effective perspective—with varying degrees of
success—will reveal his persistent concern for comic control over a narrative replete with potential tragedy.
But Twelfth Night has no potential tragedy; it is among Shakespeare's most successful realizations of
“romantic” comedy based on character revelation. And clearly this success results in a large measure from the
effective comic perspective—the creation of characters who, while playing a significant narrative role, also
serve as comic pointers by providing vital information for the spectator and by functioning as the primary
device for character exposure.
Northrop Frye, in “Characterization in Shakespeare's Comedy,” *SQ* [*Shakespeare Quarterly*], IV (1953), 271-77, points out that character depends upon function, function in turn upon structure, and structure in turn upon the category of the play. See also his *A Natural Perspective: The Development of Shakespearean Comedy and Romance* (New York, 1965), p. 14.

2. “The Argument of Comedy,” *English Institute Essays*, 1948 (New York, 1949), p. 70. Such characters are “people who are in some kind of mental bondage, who are helplessly driven by ruling passions, neurotic compulsions, social rituals and selfishness. The miser, the hypochondriac, the hypocrite, the pedant, the snob: these are humours; people who do not fully know what they are doing, who are slaves to a predictable self-imposed pattern of behavior.”

3. Robert G. Hunter, in a recent study (*Shakespeare and the Comedy of Forgiveness* [New York, 1965]), has described the form of these comedies as a secularized pattern of the medieval morality involving sin, contrition, and forgiveness.

4. Concerning the late comedies, Joseph Summers expressed something of this general idea in his comment that “after *Twelfth Night* the so-called comedies require for their happy resolution more radical characters and devices—omniscient and omnipresent dukes, magic, and resurrection. More obvious miracles are needed for comedy to exist in a world in which evil also exists, not merely incipiently but with power” (“The Masks of *Twelfth Night*,” *The University of Kansas City Review*, XXII [1955], 32).

5. *Measure for Measure*, *All's Well That Ends Well*, and *Troilus and Cressida*, currently described as “dark” or “problem comedies,” have always frustrated the critic. In them Shakespeare is searching for a method of comic control sufficient to contain characters developed on the level of faith. In *Measure for Measure*, for example, Duke Vincentio, as a *deus ex machina* figure of ambiguous motivation and limited control, fails to provide a satisfactory comic perspective for a stage-world in which evil is so pervasive.

6. “With the writing of *Twelfth Night* Shakespeare reached perhaps his highest achievement in sheer comedy” (Louis B. Wright, ed., *Twelfth Night* [New York, 1960], p. vii). Such statements concerning this play are commonplace in Shakespearean criticism. Both the dramatist and his characters appear at ease (C. Bathurst, *Differences of Shakespeare's Versification* [London, 1857], p. 89) in this “most perfect of his comedies” in which Shakespeare has “set himself the task to show, within the limit of one treatment, like a recapitulation, every combination of comedies in one single comedy” (F. Kreyssig, *Vorlesungen über Shakespeare* [Berlin, 1862], III, 268). J. O. Halliwell-Phillips describes the work as “the most perfect composition of the kind in the English or in any other language” (*Outlines of the Life of Shakespeare* [Brighton, 1882], p. 247).

7. Viola's importance in the plot has been frequently described. Bertrand Evans, for instance, comments that in *Twelfth Night* “the spirit of the practiser prevails. Seven of the principal persons are active practisers, and they operate six devices. All action turns on these, and the effects of the play arise from exploitation of the gaps they open.” Of these devices, “Viola's is truly a practice on the whole world of Illyria” (*Shakespeare's Comedies* [Oxford, 1960], pp. 118, 120). John Russell Brown, who explains the theme of the play as “love's truth,” sees Viola and her disguise as central to the development of the action (*Shakespeare and His Comedies* [London, 1957], p. 168). H. B. Charlton calls her “the peculiar embodiment in personality of those traits of human nature which render human beings most loveable, most loving, and most serviceable to the general good” (*Shakespearian Comedy* [London, 1938], p. 288). Viola “represents a genuineness of feeling against which the illusory can be measured” (Harold Jenkins, “Shakespeare's *Twelfth Night*,” *Rice Institute Pamphlet*, XLV [1959], 30). In effect, she “teaches others the true meaning of love” (Porter Williams, “Mistakes in *Twelfth Night* and Their Resolution,” *PMLA*, LXXVI [1961], 197). She, since Orsino will marry her and Olivia will marry Sebastian, is allegorically the spirit of love, which functions to redeem the disordered society (William B. Bache, “Levels of Perception in *Twelfth Night*,” *Ball State Teachers College Forum*, V [1964], 56). To the contrary, Clifford Leech recently described her importance to
the plot “exaggerated by the critic”; she is by no means “a reformer of the Illyrian emotional condition” (“Twelfth Night” and Shakespearean Comedy [Toronto, 1965], p. 36).

8. “In Twelfth Night, affectionation is everywhere—among the heroic as among the foolish, among the central characters as among the marginal. ... Olivia cannot bear to be known for what she is—a healthy and nubile woman; Viola cannot permit herself to be known for what she is, a girl; Orsino cannot bear to be known for what he is—a lover in love with the idea of love; Sir Toby cannot bear to be known for a parasite, Sir Andrew for a fool, Malvolio for a steward” (G. K. Hunter, Shakespeare: The Late Comedies [London, 1962], p. 36). Jenkins (p. 21) describes the action as “the education of a man or woman,” a plot fundamental to comedy. The characters, wearing psychological masks (Williams, p. 193), are “caught up by delusions or misapprehensions which take them out of themselves, bringing out what they would keep hidden or did not know was there” (C. L. Barber, Shakespeare's Festive Comedy [Princeton, 1959], p. 242).

10. We are later told by Sir Toby that Olivia will not “match above her ... years” (I, iii, 115-16).

11. Irving Ribner has suggested that Shakespeare's critical attitude toward the affectations of Petrarchan love was influenced by Barnabe Riche's puritanical attack on the convention in “Apolonius and Silla.” Ed., Twelfth Night, The Kittredge Shakespeares (Waltham, Mass., 1966), pp. xv-xvi.

12. If Aguecheek is intelligent enough to boast of his prowess in pressing a duel with one whom he assumes to be a coward and then to recoil in terror when his adversary appears to have a backbone, he is intelligent enough to be the object of satiric humor since he can learn something from his comic experience. Any assumption that, in this aspect of his character, he is not the proper prey of a satirist—and the charge is as old as the editorial commentary of Samuel Johnson—is surely missing the point.

17. Francis Fergusson says that Feste, “keep[ing] his sanity better than any of the other characters” and “mov[ing] through the play like a modern master of ceremonies, commenting on the characters with elaborate mockery,” seems to represent Shakespeare himself (“Introduction to Twelfth Night,” Shakespeare’s Comedies of Romance [New York, 1963], p. 304). As a ringleader (Enid Welsford, The
Fool [London, 1935], p. 253) who remains outside the action with telling remarks (John Hollander, “Twelfth Night and the Morality of Indulgence,” The Sewanee Review, LXVII [1959], 226). Feste plays a “role as observer [which] is analogous to Viola's role as ‘actor’” (Summers, p. 27). “If the Fool be cleverly played, it can be a guide through the most important points of this comedy” (G. G. Gervinus, Shakespeare [Leipzig, 1862], p. 438). “Twelfth Night is Feste's night. … It is [his] function in both parts of the action to make plain to the audience the artificial, foolish attitudes of the principal figures” (Alan S. Downer, “Feste's Night,” College English, XIII [1951-52], 261, 264).

18. Certainly the role of Malvolio is a dramatic highlight of the play. In fact, a court performance of February 2, 1623, is recorded as Malvolio. Nevertheless, I cannot agree with those critics who would make him the central figure in the play. See, for example, Milton Crane, “Twelfth Night and Shakespearean Comedy,” Shakespeare Quarterly, VI (1955), 4. Cf. also Mark Van Doren, Shakespeare (New York, 1939), p. 169: “The center is Malvolio. The drama is between his mind and the music of old manners.” Morris P. Tilley (“The Organic Unity of Twelfth Night,” PMLA, XXIX [1914], 554-556) sees Malvolio and the forces to whom he is opposed as reflective of the parting of the ways of the Renaissance and the Reformation in England. “Shakespeare composed Twelfth Night in praise of the much-needed, well-balanced nature, to extoll that happy union of judgment and of feeling which is the basis of a higher sanity.” With greater restraint, H. C. Goddard speaks of Twelfth Night as—in retrospect—Shakespeare's “farewell to comedy. … It marks the end of Merry England, of the day of the great Tudor houses where hospitality and entertainment were so long dispersed. … It seems like an imitation of the Puritan revolution with its rebuke to revelry” (The Meaning of Shakespeare [Chicago, 1951], I, 295).

19. It is impossible to conclude within the context of the drama, for instance, that Viola is “Shakespeare's ideal of the patient idolatry and devoted, silent self-sacrifice of perfect love” (W. Winter, Shadows of the Stage [New York, 1895], III, 24) or that Orsino is a man of “deep sentiments of the most sacred tenderness and truth” displaying a “firm constancy in his love” (Gervinus, p. 429). And it borders on the ridiculous to describe Orsino as one doting on Olivia as a mother substitute because he suffers from a mother fixation and Olivia as frigid, sexually terrified of men in positions of power (W. I. D. Scott, Shakespeare's Melancholics [London, 1962], pp. 57-60; Holland, pp. 278-79).

Criticism: Character Studies: Cynthia Lewis (essay date fall 1986)

[In the following essay, Lewis contends that Antonio, rather than Viola, is the moral center of Twelfth Night, but acknowledges that the play is principally concerned with Viola's moral development.]

Disguise in Twelfth Night is sheer, a thin veil like the “cypress” that “hides” Olivia's “heart” in III.i. Viola, although dressed in sturdier male clothing, almost reveals herself inadvertently at several points, as during the duel with Sir Andrew and the interviews with Olivia. Other of Shakespeare's strong, disguised women do not hover quite so closely on the brink of losing control: Portia commands her identity as judge, and Rosalind manipulates her boyish exterior to teach her future husband about love, only once verging on disclosing her true identity before she is ready to. Viola’s contrasting lack of sure control over her disguise points to a major theme unique to Twelfth Night: that of Epiphany, or the manifestation of truth. Such revelation is continually suggested in this comedy by the characters' ultimate inability to hide their true feelings and natures. This persistence of truth in coming to light parallels the manifestation of Christ to the Magi. But before any such revelation can occur in Twelfth Night, most of the characters must be transformed by the Christian folly which Saint Paul discusses and which Erasmus further develops.
Understanding how this transformation occurs depends, first, on demonstrating the presence of Christian allusions in the play's title, structure, and language. Only a handful of critics to date have begun to do so. But even these commentators have misperceived Viola's role by proclaiming her to be the play's moral center, though for most of the play she is not. That distinction falls on the sea captain Antonio, who has consistently been overlooked as a mere plot device: Antonio, at first glance, appears to do no more than help Viola to re-discover Sebastian and, later, to reveal her true identity. But Antonio actually serves a far deeper dramatic purpose. His behavior, language, and history mirror Christ's in ways suggesting Christian folly. He embodies and acts out the play's highest standard of Christian love, morally eclipsing Viola at first and yet finally linking Viola to the play's central moral. Viola eventually grows to imitate Antonio, displaying a sacrificial love appropriate to the celebration of holy Epiphany.

I

Most critics of Twelfth Night, having been reluctant to acknowledge its allusions to Christianity, apparently agree with Pepys' comment that Twelfth Night is “but a silly play, and not related at all to the name or day.” One modern example is Anne Barton, who in the introduction to Twelfth Night in The Riverside Shakespeare maintains that the title refers not to holy Epiphany, but to “images of Epiphany as it was kept in Shakespeare's own time: a period of holiday abandon in which the normal rules and order of life were suspended or else deliberately inverted, in which serious issues and events mingled perplexingly with revelry and apparent madness.” Barton rejects the existence of any “specific references to the Feast of the Epiphany” in the play, as do even the critics who see Twelfth Night in clearly Christian terms.

Yet a few critics have treated the work as an allusion to Christian Epiphany. Barbara Lewalski, for instance, argues that “… Shakespeare's method resembles, and was probably formed by, … the tradition of Christian typology, whereby certain real historical events and personages from the Old Testament and (more significantly for the present purposes) from certain classical fictions such as the Metamorphoses or the Aeneid were seen to point to aspects of Christ and of the Gospel story without losing their own historical or fictional reality.” John Hollander pursues the sort of “allegory” that Lewalski explains here when he notices the connection in Twelfth Night between revelation in general and the spirit of holy Epiphany:

Twelfth Night itself, the feast of the Epiphany, celebrates the discovery of the “True King” in the manger by the Wise Men. … The whole of Act V might be taken, in connection with “the plot” in a trivial sense, to be the other epiphany, the perception that follows the anagnorisis or discovery of classic dramaturgy. … The long final scene … serves to show forth the Caesario-King, and to unmask, discover, and reveal the fulfilled selves in the major characters.

Hollander's reference to “the other epiphany” summons not only Aristotle, but James Joyce. Of course, Joyce's more general, yet still Christian use of the word postdates Shakespeare by centuries. But long before Joyce redefined it, churchmen appear to have used epiphany in the slightly more general sense of “a manifestation or appearance of some divine or superhuman being.” As early as 1667, Jeremy Taylor mentions in a sermon Christ's “glorious epiphany on the mount.” Thus, in the later seventeenth century, the term did not pertain strictly to the manifestation of Christ to the Magi; that Taylor used the more general meaning of epiphany in a sermon implies his congregation's familiarity with—or at least their easy adaptability to—that meaning. Although Twelfth Night predates Taylor's sermon by over sixty years, I do not think it improbable that Shakespeare's audience was equally capable of imaginatively relating the Biblical Epiphany to other kinds of divine revelation, or even to revelation of truth in general. Certainly Shakespeare's extraordinary imagination was up to such obvious leaps. His original audience—possibly members of court or possibly lawyers—could surely follow him. To think that this audience was too steeped in knowledge of Twelfth Night revelry to see more serious, far-reaching implications in the title appears preposterous. The revealing of Christ to the Magi and the disclosure of true identity in Twelfth Night are too easily associated to dismiss the
connection.

Hence, views of critics like Lewalski and Hollander, although in a minority, are finally more satisfying than a purely secular reading of *Twelfth Night* because a Christian approach can include the secular while also going beyond it.9 Such is the case in R. Chris Hassel's more recent discussion of Christian elements in *Twelfth Night*. Hassel does not so much as question the pervasiveness of Christian allusions in the play. He argues that Feste and Viola, agents of Pauline/ErasmiAn folly, free the romantic characters from childish emotional frigidity and self-love. Hence, Orsino and Olivia become prepared to enter marital relationships as adults, capable of loving others. For Hassel, then, as for Lewalski and Hollander, religious and secular concerns are closely united within a single work.

Yet all of the critics I have mentioned leave major gaps unfilled in discussing the Christianity of *Twelfth Night*. Like Lewalski and nearly every other critic of the play, for instance, Hassel assumes that Viola can do no wrong and that she has already reached moral maturity when we first see her. Lewalski even goes the extent of linking Viola and Sebastian to the “dual nature of Christ as human and divine”: Viola silently endures her suffering, and Sebastian triumphs by punishing.11 But that reading is strained at best, even in light of Viola's generosity and patience. In fact, Viola has as much to learn about love, both romantic and Christian, as do, in Hassel's view, Orsino and Olivia. For most of the play, Viola remains far from Christlike.

II

If there is a figure throughout *Twelfth Night* who calls Christ to mind, it must surely be Antonio, whom Viola, however innocently, “denies” (III.iv.347). The language which Antonio speaks, as well as that which surrounds him, continually implies Christianity. He expresses his love for Sebastian in extravagant, almost unearthly terms: “If you will not murther me for my love, let me be your servant” (II.i.35-36). Later, he uses the language of religious devotion:

```
I snatch'd one half out of the jaws of death,
Reliev'd him with such sanctity of love,
And to his image, which methought did promise
Most venerable worth, did I devotion.
```

(III.iv.359-63)

Lest we mistake this language for the overstatement of courtly love, we should look into it further. In the act of rescuing Viola/Cesario, Antonio substitutes himself for the alleged criminal: “If this young gentleman / Have done offense, I take the fault on me; / If you offend him, I for him defy you” (III.iv.312-14). He soothes Viola/Cesario in the thick of his own misfortune: “be of comfort” (III.iv.338). He has “redeemed” Sebastian from the tempest: “His life I gave him, and did thereto add / My love, without retention or restraint, / All his in dedication” (V.i.79, 80-82). No, Antonio's use of religious language strongly suggests that he is returning these much-abused terms to their original meaning: his actions actually bear out his description of his love. His is total sacrifice, which prompts him, completely irrationally, to give Sebastian his entire purse in case Sebastian fancies “some toy” (III.iii.44). Moreover, Antonio is even more endangered than Viola by walking the streets, yet his great love induces him to expose himself boldly, undisguised and vulnerable (V.i.82-85).

Shakespeare seems to have taken great pains to develop and set off this character who in the main source of the play is hardly attractive or essential to the plot. Barnaby Riche's captain forces himself on Silla, thus compelling her to assume a disguise for her safety.12 Shakespeare's departures here are considerable. Antonio seems the antithesis of Riche's captain, and Viola chooses to disguise herself for vaguer reasons than Silla's, reasons that are more psychologically than physically threatening. Furthermore, Riche's story has only one captain, while Shakespeare's includes two. Shakespeare's replacement of the second captain for Silla's faithful
servant Pedro suggests his desire to thrust attention on Antonio: the unnamed captain who initially helps Viola and who finally must be released from prison does nothing but echo, and thus reinforce, Antonio's history. Antonio's role as a Christlike giver of love becomes clearer yet when we contrast Riche's moral with the fuller treatment of love in *Twelfth Night*. Riche writes of well-deserved love. But what distinguishes Antonio's love for Sebastian is precisely that it is unearned.

Despite his affiliation with Christ, however, Antonio is not to be taken as Christ. Unlike Christ, for example, he finally expects something in return for his generosity toward Sebastian, even becoming angered at Viola/Cesario when she refuses him (III.iv). Shakespeare had explored once before the implications of unworldly, idealistic conduct in his other generous Antonio, the one in *The Merchant of Venice*. There such giving in some sense fails; the setting is wrong for martyrdom to thrive. The practical aspects of Venetian life cannot, apparently, be wholly reconciled with Antonio's oblivious altruism. The earlier Antonio cannot become a full member of the familial society in Act V, where, still depressed, he stands rather apart from the newly-weds. He therefore teaches us that irrational, devoted sacrifice must be compromised because people like Bassanio inevitably have to divide their love between, in his case, wife and friends; he teaches us, in other words, that human love may resemble but cannot equal the divine. But the Antonio in *Twelfth Night*, although as human as his predecessor, displays the other side of altruism—its ability to inspire others to give more than they otherwise would, its capacity to strip from us all barriers to love.13

If this Antonio were going to be able to convey such high-minded ideas without irony and yet still give Orsino cause to arrest him, then his crime would have to be handled delicately, if not ambiguously. I believe this is why mystery abounds in our knowledge of Antonio's past. Whereas several critics have called him a “pirate,” as does Orsino (V.i.69), Antonio respectfully denies that identity:

Be pleas'd that I shake off these names you give me.  
Antonio never yet was thief or pirate,  
Though I confess, on base and ground enough,  
Orsino's enemy.

(V.i.72-76)

These lines may make Antonio appear the victim of a false arrest, but in truth the presentation of conflict between Antonio and Orsino never allows us to take sides. Whenever either man advances his case against the other, each appears believable and principled. For example, Antonio implies that his quarrel with Orsino has been a matter of conscience, a struggle for justice:

SEB.

Belike you slew great number of his [Orsino's] people?

ANT.

Th' offense is not of such a bloody nature,  
Albeit the quality of the time and quarrel  
Might well have given us bloody argument.  
It might have since been answer'd in repaying  
What we took from them, which for traffic's sake
Most of our city did. Only myself stood out,
For which if I be lapsed in this place
I shall pay dear.

(III.iii.29-37)

Antonio alone, by his own account, is unwilling to compromise his standards “for traffic's sake,” as his fellow citizens have done. On the other hand, Orsino's charge of “piracy” against Antonio suggests that the captain has “stood out” against the Duke for selfish gain (l. 35). Similarly, the Duke's officer indicates that the fight between Antonio and Orsino has been bloody, even though Antonio maintains that the conflict never came to bloodshed (ll. 30-32, quoted directly above). Even the name of Orsino's nephew, for whose lost leg Orsino blames Antonio (V.i.63), remains ambiguous. Does “Titus” suggest the pagan slaughterer or Paul's friend? If the first instance were true, we would favor Antonio for subduing a menace; if we believed the second, Orsino would seem nobler, and Antonio would appear a vicious slayer of innocence. As if to compound the problem of judging ethically between these two men, Orsino himself begrudgingly commends Antonio's bravery in the face of great danger:

A baubling vessel was he captain of,
For shallow draught and bulk unprizable,
With which such scathful grapple did he make
With the most noble bottom of our fleet,
That very envy, and the tongue of loss,
Cried fame and honor on him.

(V.i.54-59)

This sustained tension between the claims of Antonio and those of Orsino appears deliberate indeed. If nothing else, it exonerates Antonio from culpability enough to win him our esteem and does so without seriously damaging our opinion of Orsino, whom we must also finally respect. Thus, Antonio can serve dramatically as a model for candor and the unobstructed giving of love—for, in other words, Erasmian folly. And eventually Antonio's wise folly is reflected in numerous other characters, most notably in Feste.

III

While Antonio reveals to the characters and the audience an ideal behavior that is difficult for most of us to practice, Feste shows us the next best thing: a worldly, practical honesty. Feste is at home with money, as much of it as he can entice away from his audience, but his financial acumen never sullies his frankness. He thus still generously gives of himself. Although his dramatic functions are many and various, one of Feste's main purposes is to remind us that one may possess two types of folly. The two are related in that both represent innocence, yet they differ in their desirability. One, potentially dangerous—even self-destructive—is the folly aligned with Sir Toby and Sir Andrew, whose childishness is not only fun, but possibly instructive to a character like Malvolio—that is, until it turns in on the revelers. Anyone but a Puritan would applaud their trick on Malvolio, which Maria calls a “physic” (II.iii.173). Yet when the revelers go on to plot against themselves and hence divide their little society, they demonstrate that childlike insouciance can get out of hand. In the scheme against Sir Andrew, Sir Toby winds up a fool, in the worst sense. He has underestimated his competition, Sebastían, who beats the duper into the duped (V.i.175-76). The revelers' folly, then, can go either way, but it tends to cause harm.

Against this folly Feste juxtaposes another that is also childish and perhaps reckless, but nevertheless fruitful. It involves a lack of pretense and the absence of barriers to truth and love, and it characterizes especially
Antonio. Feste aims to make everyone a fool of this higher quality because it is a freeing kind of foolery. It is the wise folly that the Christian Humanists sought and the folly that R. Chris Hassel defends as Pauline: “Let no man deceive himselfe. If any man among you seeme to bee wise in this world, let him bee a foole, that hee may be wise. For the wisdome of this world is foolishnesse with God.”\textsuperscript{15} R. H. Goldsmith, in his \textit{Wise Fools in Shakespeare}, believes that this type of folly belongs to Lear's fool.\textsuperscript{16} But it is Feste's too, for without it the characters in \textit{Twelfth Night} would never let down the walls that separate them and learn to love one another completely. Feste's jokes on Olivia therefore work to loosen her up, to “mend” her grief with the abandon of laughter (I.v.74).\textsuperscript{17} Before Olivia acquires a healthy folly, Feste ridicules her restraint in terms of unhealthy folly:

CLO.

... Good madonna, give me leave to prove you a fool.

OLI.

Can you do it?

CLO.

Dexteriously, good madonna.

OLI.

Make your proof.

CLO.

I must catechize you for it, madonna. Good my mouse of virtue, answer me.

OLI.

Well, sir, for want of other idleness, I'll bide your proof.

CLO.

Good madonna, why mourn'st thou?

OLI.

Good fool, for my brother's death.

CLO.

I think his soul is in hell, madonna.

OLI.

I know his soul is in heaven, fool.

CLO.

The more fool, madonna, to mourn for your brother's soul, being in heaven. Take away the fool, gentlemen.

(I.v.57-72)
Feste's “madonna,” which no other Shakespearean fool uses, communicates both the clown's affectionate respect for his mistress and the misguided religious devotion her excessive grief entails. Feste attempts to break down Olivia's stern demeanor, and he succeeds here insofar as he escapes punishment. He prepares for the following meeting with Viola/Cesario, who cracks Olivia's defenses all the more. When Olivia finally becomes “mad” for Cesario (III.iv.14), she is essentially cured of the spiritual illness that has prevented her from loving completely; her feelings for others begin to outweigh her concern for herself: with an action that parallels Antonio's defense of Viola/Cesario in III.iv, Olivia rescues Sebastian from Sir Toby's drawn sword in the next scene (IV.i.45-51). Of course, Sebastian can defend himself, as we later learn (V.i.175-76). But the point is that wise folly is transforming Olivia into one like Antonio.

It is also this folly that could save Malvolio from himself, if he could respond to his embarrassment generously. In exposing his foolishness, Feste and the revelers give him the chance to see through his false god, restraint. But Malvolio proves hypocritical: it is acceptable for him to wear gay yellow stockings in commemoration of his love, but not for anyone else to have fun. Furthermore, Malvolio is blind to his own folly. As Feste/Sir Topas implies, Malvolio will stay imprisoned in his own private “hell” until he opens himself up to the ridiculous (IV.ii.46):

CLO.

What is the opinion of Pythagoras concerning wild-fowl?

MAL.

That the soul of our grandam might happily inhabit a bird.

CLO.

What think'st thou of his opinion?

MAL.

I think nobly of the soul, and no way approve his opinion.

CLO.

Fare thee well. Remain thou still in darkness. Thou shalt hold th' opinion of Pythagoras ere I will allow of thy wits, and fear to kill a woodcock lest thou dispossess the soul of thy grandam. Fare thee well.

(IV.ii.50-60)

Perhaps not until Malvolio can indulge in such foolish play with Feste will he be capable of faith in God and in the afterlife, which require a wisely foolish lack of skepticism to endorse.

One could argue that, in prolonging his jokes on Malvolio, Feste becomes cruel—even more cruel than Sir Toby and Maria. All three carry their foolery to the extent of terrifying Malvolio, of realizing his and our darkest fantasy: that we are mad and do not know it. But, whether for guilt or for fear of his niece's displeasure (IV.ii.66-71), Sir Toby departs with Maria from the cell, while Feste lingers to plague Malvolio further (II. 72 ff.). Still, the fool continues to derive more than mere amusement by torturing Malvolio. In his roundabout way he goes on trying to jolt Malvolio out of his rigid sanity and to instruct Malvolio: “Alas, sir, be patient” (l. 103). Symbolically, it is also Feste who brings Malvolio the instruments of his “delivery” from confinement: paper, ink, and light, suggestive of knowledge and perhaps even of salvation. If in the end Feste's attempts to save Malvolio from himself are unsuccessful, it is not because Feste has failed to show either interest in or compassion toward Malvolio's predicament. Malvolio insistently suffers from the very pride in himself and attachment to his own opinions that work against tolerant Christian love. This believer in
his own superiority provides a bad example in *Twelfth Night* of true spirituality.

Whereas Malvolio is hardened against wise folly, Orsino and Viola are, like Olivia, more pliable. Feste hints that these characters can become wiser fools when he pokes fun at Orsino and Olivia in one breath: “I would be sorry, sir [Viola/Cesario], but the fool should be as oft with your master as with my mistress” (III.i.39-41). Feste's ambiguous line can make either of two statements. First, if “should” is taken to mean “is,” then Feste says that Olivia and Orsino are too often fools, in the undesirable sense of folly. But second, if “should” means “ought to,” the line can mean that Olivia and Orsino should be wise fools more often. Here again, Feste brings the two kinds of folly into play: until later, Olivia and Orsino are wrong-headed fools and, as Feste implies, could benefit from positive, wise folly.

Viola too becomes involved with both types of folly. When her disguise embroils her in the complicated love relationship with Olivia, she indirectly admits to her unfortunate lack of foresight: “now I am your fool” (III.i.144). She has earlier recognized the potential danger of pretense: “Disguise, I see thou art a wickedness / Wherein the pregnant enemy does much” (II.ii.27-28). The threat posed by her unmasking, however, is greater to her than the fear of hurting Olivia. Orsino's love carries a high price. Are we to praise Viola for paying it when it could affect another so adversely? I think not. Without accusing her, I think we need to question her, to look closely at her progress through the play. Why, for instance, does Feste, who strives to instill folly in the characters, express a dislike for her?: “… in my conscience, sir, I do not care for you. If that be to care for nothing, sir, I would it would make you invisible” (III.i.28-30). Viola takes his comment in stride, so perhaps he delivers it inoffensively. Yet it is possible that Feste senses barriers around Viola which, like her disguise, inhibit her love and her honesty as much as Olivia's grief has emotionally crippled her. It is also possible, if Feste is somehow criticizing Viola's evasiveness, that Viola either ignores him or misses the point. For Viola shows us, in other situations, that she would rather remain safe behind her disguise than risk exposing her true self and losing Orsino. She may ultimately share Olivia's ability to become changed by folly, but she resists that change far longer and more tenaciously than her equally love-stricken counterpart.

**IV**

Viola's characterization throughout *Twelfth Night* reveals that the play concerns itself fundamentally with her moral growth. Shakespeare continually plays Viola off the other characters to illustrate how far she has come and how much farther she has to go. Initially, she has all the makings of an Antonio. She generously rewards first the sea captain and then Feste (I.ii.18, III.i.43), and she lashes out at ingratitude when Antonio accuses her of it (III.iv.354-57). Her willingness to woo another woman for the man she loves also indicates her magnanimity.

Yet she often appears self-absorbed. Nowhere is this trait clearer than when she offers Antonio only half her coffer (III.iv.345-47). Next to the total altruism that Antonio showed Sebastian in the preceding scene (III.iii.38), Viola's reserve seems downright stingy. Granted, Viola is not rich; nor does she even know Antonio. Her giving anything at all under these circumstances could thus be admired. But the contrast between the two characters is evident: Viola is willing to go far for someone else, but only so far. Similarly, Viola has good reason in III.iv to be stunned by the sudden possibility that Sebastian may yet live and thus to ignore Antonio's arrest; but Antonio, having intervened to save her life, surely deserves more attention from Viola/Cesario than she gives. Even if Viola exits at the close of this scene in pursuit of Antonio and the officers, she apparently does so not to aid Antonio but to discover more about Sebastian's history.

This key episode in which Viola and Antonio are contrasted reveals the major obstacle that Viola must surmount before she can grow to love completely: fear of losing control. That she loves both her brother and her master is obvious to us, but a great deal of the potential and actual destructiveness in *Twelfth Night* arises from Viola's refusal to expose herself openly to others—to give herself away. She is consistently associated with walls—barriers to love—throughout the play. Her disguise becomes an emblem of her and others' fear:
many such walls appear in the play and must be let down or broken through before genuine love can be enjoyed. Orsino uses clichéd love language to put a safe distance between himself and Olivia (e.g., I.i); Viola refers to the hypocrisy of most people, who hide their wickedness behind the “beauteous wall” of appearance (I.ii.48); Viola herself attempts to use language like Orsino's in wooing Olivia and in protecting herself, until she finds it will not shield her well (e.g., II.ii); Olivia hides in her house and behind her wit and her veil (II.ii, etc.). The spirit of Epiphany, represented by Antonio's willingness to manifest his true self for the sake of another, is stifled behind these barriers.

Viola's brilliant repartee with Feste demonstrates her capacity for folly, for letting go and enjoying another's company (III.i.1-59). Admiring his wit, she expresses appreciation for its wisdom and thus signals her own association with Christlike folly and her own understanding that folly comes in two forms: “For folly that he wisely shows is fit, / But wise men, folly-fall'n, quite taint their wit” (III.i.67-68). But when Feste cuts gently at Orsino's folly (ll. 39-41), Viola resists hearing more: “Nay, and thou pass upon me, I'll no more with thee” (ll. 42-43). Viola here seems reluctant to acknowledge the value of Feste's remarks. For a long time she appears unable either to admit that Orsino's attraction to Olivia is not genuine love or to deal directly with her feelings for Orsino. Her reaction to Feste's song in II.iv exemplifies the poor judgment that results from her infatuation. “Come away, come away, death” has got to be some of the most morbid verse ever set to music, as Feste kindly suggests to Orsino (II.iv.73-78), and the music that accompanies it would be anything but cheering. But Viola identifies with its gloom: “It gives a very echo to the seat / Where Love is thron'd” (II.iv.21-22). Viola's exaggerated sympathy for Orsino's pain mirrors his self-indulgence.

In its irrationality, Viola's love for Orsino resembles Antonio's love for Sebastian and Olivia's for Viola/Cesario. It is potentially good folly. But enclosed within her, it waxes overly melancholic. When she can express it in even veiled language, as she does in II.iv, it regains some of its health:

VIOLANTA.

My father had a daughter lov'd a man
As it might be perhaps, were I a woman,
I should your lordship.

DUKETA.

VIOLA.

A blank, my lord; she never told her love,
But let concealment like a worm i' th' bud
Feed on her damask cheek; she pin'd in thought,
And with a green and yellow melancholy
She sate like Patience on a monument,
Smiling at grief. Was not this love indeed?

(ll. 107-15)
Perhaps because this passage demands that Viola objectify her feelings, it is less self-pitying than her attraction to Feste's song. Furthermore, Viola's hidden love at least eventually permits her to instruct Orsino:

VIO.

But if she [Olivia] cannot love you, sir?

DUKE.

I cannot be so answer'd.

VIO.

(II.iv.87-88)

Yet Viola herself realizes that secret longings fester within, “like a worm i’ th’ bud.” The self must be honestly exposed to survive; Viola must reveal her inner self to become fully human.

Another of Viola's potential virtues emerges as she is compared and contrasted with Malvolio. In much the same way that Malvolio seeks to unravel the letter he finds in II.v, Viola tries to read the significance of the allegedly returned ring in II.ii. The concept linking the two scenes is interpretation. On this score Viola obviously does much better than Malvolio. Her vision is not so dreamy-eyed as to obscure the true meaning of receiving the ring, whereas poor Malvolio's hopes absolutely blind him to the facts. Viola's visionary quality—composed of a clear-sightedness like Feste's and a power like Antonio's to perceive how others feel—will guide her through the snarls to come. Yet on this point too she fudges, when she thrusts all responsibility onto an external force: “O time, thou must untangle this, not I, / It is too hard a knot for me t'untie” (II.ii.40-41). Notwithstanding the partial truth of this statement, Viola will sooner or later have to participate in shaping her own life. Time can and does help, but it requires a cooperation from her, a total commitment of herself to love.

Whether or not Viola learns how to make such an investment directly from Antonio, the sea captain's dramatic purpose is to provide such an example, and Viola comes to reflect his behavior. The turning point for her, when all the potentially fine qualities we have seen in her come together, is also the heart of the play. It comes in her answer to Orsino's angry threat on her life:

I'll sacrifice the lamb that I do love,
To spite a raven's heart within a dove.

(V.i.130-31)

The Christian implications of the “sacrificial lamb” ought to ring clear, and Viola's sudden “willingness” to give not just some, but all, endows her with new virtue:

And I most jocund, apt, and willingly,
To do you rest, a thousand deaths would die.

(ll. 132-33)

Like Antonio, who has earlier offered to protect her with his life (III.iv.312-14), Viola now substitutes herself for Olivia, in order to give Orsino “rest.” She gladly takes upon herself the punishment through which Orsino would “spite” another. Here lies the Epiphany in Twelfth Night, where the meaning of Christ's birth, His
sacrifice for humanity, manifests itself in the actions of human beings. Viola's commitment of her life to love is the wisest folly she can pursue. To dismiss all barriers to love, to disregard even the welfare of one's physical being, is divine.

Viola's altruistic attitude toward love, which alludes to a Christian ideal, permits spiritual love and romantic love to be linked in *Twelfth Night*. Ultimately, we are not shown a world in which different types of love—say, physical and non-physical—are qualitatively different or are opposed. Rather, Christian love, as epitomized in Antonio, works itself into the worldliest of relationships through the four lovers, principally Viola, as well as through Feste. Thus, Christian love can inform romantic love, and the two comic traditions that shape the play—the romantic and the serious—are joined compatibly as Viola grows to become more like Antonio. Significantly, in this final scene Olivia also grows to accept Viola/Cesario as a “sister” and Orsino as her brother (ll. 326, 317). The good folly that is well on its way to triumphing over all is not limited to romantic love, but leads to general good will and fellowship.

Appropriately, after Viola's declaration of devotion to Orsino, the majority of the characters are in some respect set free. Viola's self-sacrifice is not the single twist in the plot that accounts for every subsequent revelation: many other actions, like Sebastian's entrance (l. 208), intervene before Viola's true identity is discovered. But Viola's new openness to love sets a tone early in the scene for the series of manifestations and apparent miracles to follow. The twins are reunited; the four lovers are rightly matched; the sea captain who has possession of Viola's clothes is “enlarged” (l. 278); and Malvolio is “deliver'd” (l. 315), though that does not guarantee his freedom, which only he can claim for himself. Even Fabian, caught up in the “wonder” of “this present hour,” freely confesses the joke on Malvolio and tries to ease the tension between the revelers and the steward (ll. 355-68). “Golden time” is ripe for love like Antonio's.

But the play's problematic nature persists to the end, modifying and augmenting the harmonious resolution. For instance, what of Antonio? Are we to assume that Orsino will also set him free? It seems rather that the question of Antonio's future, like so many other questions at the closing, is left dangling for a reason. Interestingly, the other salient loose end here is that Viola has still not removed her disguise by the time *Twelfth Night* is finished. These two details do more than blur the play's resolution, as do questions about whether Malvolio will repair his ruined pride and whether Maria will help curb her new husband's former excesses. Most importantly, these unresolved elements involve the audience's sense of responsibility in determining their own future. Indeed, Act V would not challenge us morally if it clearly and simply showed that all ended well. *Twelfth Night* finally asks us whether we will make all well by divesting ourselves of the walls around us that shut out love like Antonio's and keep it imprisoned. Will we embrace the spirit of Epiphany, which shapes the play throughout, and thus free Christian love in our own world? By agreeing to, we will, in effect, liberate Antonio and change as radically as if we moved, along with Viola, from male to female. When *Twelfth Night* closes, it has already “pleased” us, as Feste promises (V.i.408). If it is also going to teach us when the “play is done” (l. 407), then we must respond to it by unveiling.

8. “Epiphany²,” *OED*. 
The question of whether *Twelfth Night* alludes to Christian concerns contributes to a larger debate about the play's essential nature and tone. Striding the romantic comedies on one end and the problem plays on the other, *Twelfth Night* reflects shades of both. Most critics have responded to this confusion by singling out either the romantic or the problematic strands and ignoring the rest. Hence, readings of the play as either light or serious (even dark) abound. By far the greater number of these interpretations settle in the romantic camp. One characteristic of this group is their denial of the play's titular reference to Christian concepts.

As I have implied, however, there are exceptions. In addition to those I mention in my text, Richard Henze explores the juxtaposition between apparently secular and festive elements of *Twelfth Night* and the play's Christian allusions in “*Twelfth Night*: Free Disposition on the Sea of Love,” *The Sewanee Review*, 83 (1975), 267-83. But Henze’s chief concern, in contrast with Hollander’s, is the very confusion that this mingling of traits produces in the audience. Nor does Henze feel that the play's variety of interpretations can be reconciled, though he develops an entire reading of the work based on doing justice to its several faces: “I should like to propose a solution to this puzzle of interpretations: that *Twelfth Night* is a play about opposites and that each of [its possible interpretations] tends to treat just one pair of opposites” (p. 267). While I find Henze's discussion stimulating, I shall argue that the “opposites” he identifies—between the religious and the secular—are meant less to conflict than to enrich each other.

10. Lewalski, pp. 176-78.
12. Two critics have recently addressed the generosity of *Twelfth Night*'s Antonio, each in ways unique from mine and from each other, yet in ways equally provocative. Camille Wells Slights, “The Principle of Recompense in *Twelfth Night*,” *Modern Language Review*, 77 (1982), 537-46, argues that the play's ideal of love is not altruism, but reciprocated love. Marilyn French, *Shakespeare's Division of Experience* (New York: Summit Books, 1981), believes that because Antonio loves so purely and passionately, he is, in the play's context, a “subversive,” a “misfit,” a “starving dispossessed” (pp. 118-20).
13. Robert Hills Goldsmith, in *Wise Fools in Shakespeare* (East Lansing, MI: Michigan State Univ. Press, 1955), has observed that, in this regard, Feste belongs to both the romantic plot and the subplot. He can thus mediate between the two (see especially ch. iv).
16. For a point similar to mine about Feste's effect on Olivia, see Hassel, *Faith and Folly*, p. 154.
18. Richard A. Levin carries this point to what seems to me an unsubstantiated extreme. In “Viola: Dr. Johnson's ‘Excellent Schemer,’” *Durham University Journal*, 71 (1979), 213-22, Levin not only accuses Viola of self-centered behavior; he sees her as a conniver and the whole play as covered with ironically romantic “glitter” (p. 222).
19. C. L. Barber, in *Shakespeare's Festive Comedy* (1959; rpt. Princeton: Princeton Univ. Press, 1972), has also thought about this detail of Feste's distaste. But Barber suggests that Feste does not like Viola because in their exchange “he finds himself beaten at his own game” (p. 254).
A few critics have studied Viola's maturation in psycho-sexual terms. Helen Moglen, who seems to me the best at this approach, sees Viola's disguise as a cocoon within which she can experiment in a "homoerotic relationship" before she is ready to engage in a mature union with Orsino. Such experimentation, of course, centers on Viola's wooing of Oliva in I.v and III.i. Finally, the experimentation leads to a society that can attain "personal freedom," as well as accept "responsibility." Moglen's Freudian angle on Viola's growth is important and enlightening, yet it assumes a great deal about the text. In addition, it arrives at moral conclusions less by moral observation than by scientific inquiry. To assess how Viola's role meshes with that of Christian Epiphany, one needs to observe not so much her psychological growth as her moral development. This done, one perceives other changes in her character that have unique bearing on the play's meaning. See "Disguise and Development: The Self and Society in Twelfth Night," Literature and Psychology, 23 (1973), 13-20. For similar approaches to disguise and maturation in the play, see J. Dennis Huston, "'When I Came to Man's Estate': Twelfth Night and Problems of Identity," Modern Language Quarterly, 33 (1972), 274-88; Nancy K. Hayles, "Sexual Disguise in As You Like It and Twelfth Night," Shakespeare Survey, 32 (1979), 63-72; and Robert Kimbrough, "Androgyny Seen Through Shakespeare's Disguise," Shakespeare Quarterly, 33 (1982), 17-33.

Viola's [offer of money to Antonio] is a carefully thought-out loan to a helpful but puzzling stranger. She moves slowly towards the offer. "I'll lend" is preceded by a series of subordinate clauses and phrases outlining her reasons and stressing her poverty. "My having is not much" repeats the content of the line before, and adds to our impression that Viola feels an uncomfortable need to justify herself.

(p. 82; emphasis added)

Yearling's context here is entirely different from mine, yet she aptly makes my point about Viola's extreme caution in giving, as contrasted with Antonio's boundless, irrational charity.

[In the following essay, Cahill offers a psychoanalytic reading of Malvolio in Twelfth Night, highlighting his narcissism and painful identity crisis as well as his thwarted and obsessive desires for sexual, social, and personal fulfillment.]

The origins of the main plot in Shakespeare's Twelfth Night have been traced to a cluster of earlier comedies and their derivatives; however, the subplot, involving Sir Toby, Sir Andrew, Maria, and their "gull," Malvolio, was entirely Shakespeare's invention. Like the main story, the Malvolio subplot also involves comic "errors," disguise and performance, and the pursuit of marriage. It similarly explores the themes of identity, desire, and the confusion of both. In fact, the "gulling" of Malvolio and Sir Toby's debauched revelry literalize the "misrule" of the main story. But the subplot does not resolve itself as neatly as the main plot does; indeed, it fails to resolve itself at all. It might be supposed, then, that Shakespeare sought to counter the easy connubial resolutions inherent in his sources with something more problematic, thereby adding to the comic ending of the play something of a tragic one. Joel Fineman wrote that Malvolio "plays the role of the outsider whose unhappiness is the measure of comic spirit, the alternative to comedy that makes us value the comic all the more" (33). To take this idea one step further, we can say that Malvolio alerts us to the necessity
of comedy and to the profound implications of its failure. In a sense, with the problem of Malvolio, Shakespeare answers the question: What if things in Illyria hadn't turned out so well?

The source of this potential for failure is the comic force that drives both the subplot and the main story: “misrule.” The subtitle of the play, Or, What you will, offers an ambiguous but provocative addition to our understanding of the “misrule” that was an important element of traditional Twelfth Night celebrations. “Will” has been generally interpreted as “volition” or “desire,” so as to suggest that the logic of the play turns on wishful thinking rather than an objective reality. But in the saturnalian tradition, “what you will” also refers to identity, as in “what you will be.” The narcissistic desires of Orsino and Olivia and the strategic disguise of Viola suggest that one's identity, social or personal, is derived from one's desire. Consider Olivia's question to Viola/Cesario, “What are you? What would you?” (1.5.212-213). Here, identity and desire become almost synonymous, perhaps because under the confusion of misrule both are ambiguous. Further, in Renaissance England, whom one married was an important factor in determining one's identity, particularly if a change in social rank was involved. Thus “what you will,” in this comedy of courtship and marriage, also means “whom you will have” or “who will have you.” In the complicated love triangle of these characters, misrule is the rule, and real desire and real identity become temporarily lost in a conflation of poses and possibilities.

Malvolio also confuses identity and desire when, walking in Olivia's garden, he muses, “To be Count Malvolio!” (2.5.35). But we know that Malvolio's fantasy is a pose without possibility. He is a literal example of the Italian malvoglio, which means “ill will,” but here also seems to imply “wrong desire.” Malvolio's sin is not only his alienating behavior toward others in the household, but also both the inappropriate desire to marry his mistress and rise in social rank and the sin of “self-love.” The punishment for such sins, as he discovers, is severe. By comparison, the desiring characters of the main story, confused though they may be, commit no wrong and receive no punishment. The narcissism of Orsino and Olivia, while potent, is less overt or perhaps an allowed vice of the aristocracy. Likewise, while pursuing Orsino in conscious disguise, Viola goes safely, if miraculously, undetected. Although the plights of the characters of the main story do suggest the precariousness and risk inherent in the confusion of identity and desire, which will be the locus and necessary prescription of the Malvolio subplot, these characters are nonetheless successful. Ultimately, for Viola, Sebastian, Olivia, and Orsino, “what you will” is an invitation to comic possibility; for Malvolio, however, it is an invitation to personal tragedy.²

If identity and desire function in the psychological realm, they also do in the social realm. The dialogic relation between plot and subplot, I submit, works on both levels; and herein lies a crucial difference between the plots. Whereas the main plot invokes a fantastical, almost timeless space, where an unchallenged aristocracy enjoys tremendous (if limited) emotional freedom, the subplot is more historically-specific, more obviously grounded in Elizabethan social relations: a reflection not of another time and place, like Illyria, but of England at the end of the 16th Century. As a result, the characters in the main plot are not ultimately obliged to act in a world with real consequences, while Malvolio most certainly is. Such an obligation or lack thereof is fundamental to the projection of a “self” in that world. With this difference in mind, the project of this essay will be to describe Malvolio's struggle with his identity and desires as historical and psychological “facts” that is, by historicizing the role of the household steward and his social sphere, and by investigating the possible contributions of modern identity theory. Then, I will read the elements of Malvolio's struggle back through the main plot in an effort to more fully describe the relation between the two plots.

Although much has been said of the meaning of Twelfth Night's subtitle, its specific connection to the play's subplot seems to have gone unnoticed. Olivia is the only character in the play to actually utter the words of the subtitle, when she says to Malvolio, “If it be a suit from the count, I am sick, or not at home what you will to dismiss it” (1.5.109-110, emphasis added). In telling Malvolio to use his discretion as steward and to do “what [he] will,” Olivia gives him permission to use any form of falseness to prevent the disruption of her mourning. Although we later realize, through her sudden infatuation with Viola/Cesario, that Olivia's mournful intentions
are not altogether sincere, her cloistered behavior is in fact in Malvolio's best interest: it makes him indispensable. I argue, then, that Olivia's command to do "what you will" formally initiates the Malvolio subplot, not only because it invokes verbatim the subtitle of the play, but more importantly because, as we shall see, it reveals much about Malvolio's position as Olivia's trusted steward and the paradoxical role of a steward in a household with neither a master nor a masterly mistress.

While we tend to think of Malvolio as an ambitious social climber who rejects his middle-class origins in hopes of marrying into nobility, we cannot be at all certain that this is what Shakespeare had in mind. In most sixteenth-century aristocratic households, particularly those of important noblemen, the steward had his own status. He was often a kinsman of the master and invariably a man of gentle birth. Indeed, during the parliaments of Elizabeth's reign, at least 190 members were, had been, or would become stewards (Hainsworth 7). When the steward was the head servant of the household, as was often the case, he commanded great respect. Thus, Spenser writes in *The Faerie Queen* (1590): "The first of them that eldest was and best / Of all the house had charge and government / As Guardian and Steward of the rest" (1.10.37.3). The "rest" in a noble household of the period may have been up to a hundred servants and dependents, over whom the steward had sway and kept order (Stone 29). As implied by the name of "Order," the steward in Massinger's *A New Way to Pay Old Debts* (c. 1630), the keeping of order in the household was the steward's prime objective, and for this reason, he was often likely to be unpopular with the lesser servants. However, this responsibility offered the steward privileges as well. Regardless of his social origins, he dressed as an aristocrat and followed the fashions of the day. Because he often acted as a representative of the master and saw to the comfort of guests and visitors, a well-dressed steward reflected positively on the wealth and status of the master.

But this is not to say that the steward had a clearly defined sense of power. In fact, the great challenge of stewardship during the Renaissance was to deftly negotiate the blurred line between responsibility and authority. His position was inherently an ambiguous one. Although, as the representative of the master, the steward had a nominal charge of the household, in reality he rarely made important decisions without consulting its head. Lawrence Stone argued that all household servants, stewards included, were considered "equal with children as subordinate members of the household" (27). Although this may be somewhat overstated, it does suggest that, while the steward was often charged with the duties and even the authority of a master, he was rarely treated like one. Moreover, the steward's position was inexorably linked to the fortunes of the household, which at the beginning of the seventeenth century were under constant threat of instability. As the size of the aristocratic household decreased during the period of great social, political and economic upheaval of the élite that preceded the English Revolution, the power and significance of the household steward consequently declined.

This combination of inherent ambiguity and decreasing power undoubtedly presented real problems for the steward of a noble household, such as Malvolio. When we consider further that the death of Olivia's father, followed shortly by that of her brother, has left the household without a *paterfamilias*, we may suppose an even greater difficulty. The lack of a patriarch might have required greater responsibility on the part of the steward, but it did not usually mean that he was given more authority. It appears that the many contradictions involved in stewardship were satisfactorily contained by the presence, or at least the existence, of the paterfamilias; with the permanent absence of the master, therefore, the steward might have been liable to tremendous feelings of role ambiguity.

Indeed, for Malvolio this ambiguity is not uncomplicated. Olivia is aware of her new power as mistress of the household, but she is not particularly interested in exercising it. What she is interested in, in fact, is "misrule." Thus, Malvolio occupies a subordinate role in relation to a mistress who is neither dominant nor authoritative but playful. As steward, it is his presumptive office to exercise her power for her, but Olivia's own desires prevent that. Even his job of keeping order in the house becomes impossible because Olivia does not support his efforts. Although he has become the ultimate masculine authority in the household, Malvolio is unable to
control the debauchery of Sir Toby as Olivia's father or brother might have. Because Olivia is, at least temporarily, undecided about the nature of the relation between her steward and herself, Malvolio is confused about his own appropriate role. A better steward, we might suppose, one with a greater sense of his place and power, would have been able to accept, even easily handle, these ambiguities. But Malvolio, lacking a firm sense of his place in the social hierarchy, cannot accept them. Instead, he tries to amend the situation by alternately railing at the disorder and fantasizing about becoming in name what in some ways he has already become in authority. 9

In this way, we can begin to talk about Malvolio's "identity crisis," why he is of "distempered appetite" (1.5.73), and why he cannot live comfortably in Olivia's household. Whether Malvolio is of gentle or middling birth is not so important as the kind of "self" he projects as a member of the household. Critics who have too reductively labeled Malvolio a "social climber" or diagnosed his dissatisfaction as a case of class hyper-consciousness have neglected to consider the role of identity, and its formation and resolution (or their failure), in the development of Malvolio's discontent. I argue that, beyond other valid considerations, the character of Malvolio is principally driven by his anxious but unconscious desire to resolve his ambiguous masculine identity.

The use of modern identity theory to understand early modern drama has received considerable and widely diverse critical attention in recent years. Logical justifications for such an analysis have held that as the rise of a powerful merchant class in the Renaissance disrupted the continuities of feudal and aristocratic life, a modern notion of "self," divided and in crisis, first appeared. Although historians disagree on the nature of this revolution, I want to suggest that the question of what might have constituted a "self" in the Renaissance is one to which Twelfth Night provides two answers, at least indirectly. As I have argued, there is in the main plot and the subplot a distinct difference in dramatic "subjectivities": in the former, the self is "fashioned" by the interactions of concrete social status and the free-play of experience; in the latter, status is not necessarily stable and unreliable experience is the source of debilitating anxiety. Regardless of Malvolio's rank, he consistently disrupts the continuities of life in Illyria (however temporarily discontinuous they may be) and does so in terms of the nature of status and the effects of experience. Through these disruptions, Malvolio projects a self that is, above all, divided and in crisis. Thus, in discussing the "identity" of such a character in modern terms, I am assuming that Shakespeare has, in a sense, already done so. At the very least, such an approach offers a vocabulary for understanding the play's treatment of the problem of identity—an understanding that is somewhere between a metaphor for a particular socially and politically informed psychological truth and the thing itself.

Erik Erikson's stages of identity formation offer some insight into the problems of identity formation or psychosexual development. 11 In adolescence, a child may be concerned with how he appears to others, compared to how he feels about himself. That is, his social identity and personal or ego identity may seem at odds. In this stage, there is a danger of "role diffusion" or doubt about one's sexual identity, which adolescents may seek to avoid by over-identifying with a person of the same or opposite sex, by having a "crush" or "falling in love." This response is "an attempt to arrive at a definition of one's identity by projecting one's diffuse ego images" onto another and "seeing them thus reflected and gradually clarified" (Childhood 228). In young adulthood, when one is faced with the social expectation of courtship and marriage, such "role diffusion" may become a fear of ego loss through self-abandon (i.e., intimacy), and may lead to a deep sense of isolation and, ultimately, self-absorption. A normal adult eventually learns to "lose himself" in sexuality and friendship without the fear of being "engulfed." Where these attempts at intimacy fail, however, the result, in maturity, may be a regression to "individual stagnation," "interpersonal impoverishment," and an obsessive need for "pseudo-intimacy" (Childhood 231).

We may detect a disparity between the social and personal identities of the steward who "practic[es] behavior to his own shadow" (2.5.17). Malvolio's personal identity as one deserving "exalted respect" (2.5.23) is significantly different from his social identity as a "time-pleaser" (2.3.148). A healthy person, on the other
hand, eventually bridges the gap between the way he perceives himself and the way he believes others perceive him. On this matter, Erikson states:

The conscious feeling of having a personal identity is based on two simultaneous observations: the immediate perception of one's self-sameness and continuity in time; and the simultaneous perception of the fact that others recognize one's sameness and continuity.

(Ego Development 23)\(^\text{12}\)

Even before his gulling, Malvolio lacks the emotional constancy and unity that such simultaneity requires. Once Maria's “device” has been set, the very combination of self-deception and deception by others would seem to make the achievement of a resolved personal identity quite impossible.

The basis of Malvolio's gulling is that only with such an inflated notion of himself could he believe that Olivia loved him. Everyone except Malvolio understands that a match with Olivia is impossible, not only because Malvolio is her steward, but also because he is neither “generous, guiltless [nor] of free disposition” and perhaps completely unable to love. We might call his eagerness to believe an “over-identification” with both Olivia and the possibility of becoming her husband. In his fantasy of becoming Count Malvolio, Malvolio seems to project the ambiguity or “role diffusion” he associates with his position as steward onto both Olivia and the role of her noble husband in order to see the possibility of something better. “To be Count Malvolio” would be, in name and station, to have a much more clearly defined place in life. Yet, in his inability to accept the ambiguities of his role as steward, Malvolio has neither a place nor the companionship it would offer. His isolation and consequent self-absorption seem to derive from his inability to achieve intimacy with any other person. The result of Malvolio's failure to live harmoniously and intimately with others in the household is, as Erikson predicts, something akin to “interpersonal impoverishment.”

An important distinction between Shakespeare's identity drama and modern identity theory is that Renaissance England generally did not distinguish between the specific stages of adolescence, young adulthood, and maturity (Kahn 197). In Shakespeare's day, the status of real “manhood” was not achieved by all men, and a kind of “adolescence” ensued until a man not only came of age but also took a wife and produced an heir. Patriarchal power in Renaissance England belonged not to men generally but to married men with families, and it was unlikely for a bachelor to gain a position of high social or political status.\(^\text{13}\) Thus, without a wife to confirm his manhood and a household to call his own, Malvolio, like Sir Toby and Sir Andrew, remains in a kind of adolescence. This may further explain his fantasy of becoming “Count Malvolio.” Like an adolescent day-dream of manhood, Malvolio imagines occupying not only a higher social position but also the identity-affirming position of paterfamilias. If we consider Malvolio's masculine identity unresolved in part because he remains unmarried, and therefore childless, then we can see that Olivia's unstable household, because it lacks a patriarch, further problematizes his struggle. Malvolio's situation paradoxically invites and denies his participation in reestablishing such a patriarchy, which for him would help to complete the process of identity formation.

In negotiating the space of ambiguity that comprises his search for identity, Malvolio is caught within still another paradox. Not only is the “misrule” of Olivia's household (and Illyria generally) contrary to his objectives as steward, but the emotional versatility required to accommodate such “misrule” is beyond his ability.\(^\text{14}\) Because Malvolio can only respond to the revelry and humor of the household with indignation, his officious performance becomes a failure of play. Consider his first appearance in Act 1, Scene 4, which immediately identifies him as the anti-comic figure, the opposite of Feste, Olivia's clown. Although Olivia is purportedly in mourning, she finds comic relief in Feste's jibes at Malvolio, and even provokes her steward by asking him, “How say you to that, Malvolio?” Not only does Malvolio refuse to play Feste's game, but he also insults Olivia for playing it: “I marvel your ladyship takes delight in such a barren rascal.” If we consider the psychological dimensions of the relationship between Olivia and Malvolio that I have discussed, we can see
that Malvolio is in an impossible situation. His job is to maintain order in the household so that Olivia may properly mourn; but because she is not really in mourning, she enjoys Feste's disorderly playfulness. Malvolio's reaction to this disorder is "distempered" because his world does not make sense. In attacking what he sees as Feste's vulnerability "Look you now, he's out of his guard" (1.5.82-86) he reveals his own: that he can never allow himself to be "out of his guard." Olivia shows that she understands this when she exclaims, "O you are sick of self-love, Malvolio!" (1.5.90). His narcissistic isolation is his protective shell that attempts to fend off both the "bird-bolts" and "cannon bullets" (1.5.93) of others. Malvolio cannot distinguish between innocent teasing and real offense because in Olivia's household the distinction is unstable, if not meaningless.

Feste's jesting represents not only the lack of order in the household, but also what appears to be the beginning of the end of Olivia's mourning, which may be a threat to Malvolio's present power. So long as Olivia has "abjured the sight and company of men" (1.2.40-41), Malvolio, as her keeper of the house, retains a special significance. He is, in fact, the most important man in her life, which she admits when, noting his "distract" behavior, she declares, "I would not have him miscarry for the half of my dowry" (3.4.62-63). As such status is jeopardized, Malvolio fears not only losing his present power and thus perhaps being "unmanned" but also being reminded of his lack of real patriarchal power. This fear seems to account for his disagreeable behavior in this scene. His description of the "manner of man" (1.5.152) that is Viola/Cesario is a curious one which makes the point:

Not yet old enough for a man, nor young enough for a boy: as is a squash is before 'tis a peascod, or a codling when 'tis almost an apple. 'Tis with him in standing water, between boy and man. One would think his mother's milk were scarce out of him.

(1.5.156-162)

This pubescent youth, he seems to say to Olivia, is hardly man enough for your serious consideration. It is perhaps for the same reason that Malvolio specifically calls Feste a "barren" rascal. On one hand, Malvolio is dutifully protecting his mistress; on the other hand, he is projecting his deepest fear: his failure to achieve a resolved masculine identity.

Similarly, Malvolio's failure to either control or abide the antics of Sir Toby, Sir Andrew and Maria, is closely tied to his difficult relation to Olivia. This is evident in Malvolio's first remonstrations against Sir Toby's debauchery: "Sir Toby, I must be round with you. My lady bade me tell you that, though she harbors you as her kinsman, she's nothing allied to your disorders" (2.3.95-97). Whether Olivia actually instructed Malvolio to deliver Sir Toby an ultimatum we cannot be sure, but Malvolio would have her "allied" to order, and therefore to himself. Toby senses Malvolio's implicit meaning and offers his cutting double question: "Art any more than a steward? Dost thou think because thou art virtuous there shall be no more cakes and ale?" (2.3.114-116). To be "more than a steward," for Malvolio, might indeed mean to be a nobleman and possibly Count Malvolio, Olivia's husband. Toby and the others object to the fact that Malvolio is overstepping his bounds, not by insisting on order in the house, for that is his job, but by allying himself so closely with Olivia. They seem to realize that this violation of the social order is much more egregious than their late-night revelry. Sir Toby's suggestion that Malvolio is "virtuous" is a sharply ironic criticism that subtly points to the steward's hypocritical desire for Olivia. Maria calls him "a kind of puritan" (2.3.139), not because she thinks he is an actual puritan, but because he is like one in his hypocritical, self-absorbed pomposity. The designation, as Shakespeare used it, had no narrowly defined religious or political connotation. One historian notes, of the puritan designation in pre-Revolutionary English writing: "There were many Malvolios. Contemporary references to puritan hypocrisy are frequent, and they usually refer to the combination of godly phrases with economic or other less noble motives" (Hill 25). Here, Toby and Maria insinuate the hypocritical righteousness of Malvolio's pretending to protect Olivia from Toby's debauchery while simultaneously entertaining sexual and matrimonial thoughts about her.
Maria, however, also sees beyond Malvolio's “puritan” hypocrisy, to a self-division exceeding that of “phrases” and “motives,” and one that lies at the core of his own self-concept. Thus, she explains to Sir Toby, “it is his grounds of faith that all who look on him love him; and on that vice in him will my revenge find notable cause to work” (2.3.151-153). In constructing her “revenge,” Maria recognizes that the disparity between Malvolio's “self-love” and that fact that others know him as “an affectioned ass” (2.3.148) is his greatest vulnerability. By convincing Malvolio that Olivia loves him, Maria intends to “put him in such a dream that when the image of it leaves him, he must run mad” (2.5.193-194). To put Malvolio in such a dream would be to fool him into believing that his social identity and personal identity were the same indeed, that all his problems were solved. For “to be Count Malvolio” would be to marry Olivia, to rise in station, to bring order to the house, and finally to resolve his identity into that of a mature man.

In Malvolio's performance of his fantasy, he imagines having “the humour of state” (2.5.52), or freedom of rank, that he entirely lacks as a steward: “I frown the while, and perchance wind up my watch, or play with my some rich jewel” (1.5.59-60). On one level, this is a thinly veiled fantasy of lust and power, in which he substitutes a sexually suggestive “jewel” for his steward's chain. Malvolio imagines possessing the sexual liberty that would render Olivia available to him, as well as the sexual potency that would signify his complete manhood. But he also imagines the ability to play, to be “generous, guiltless, and of free disposition,” as if such emotional freedom were the sole property of the nobility. Ironically, of course, even in his luxurious imaginings, Malvolio is not playing as much as he is being played with. Finally, when the gulling is over and “the image of [Count Malvolio] leaves him,” he does not “run mad” so much as he is threatened with what Erickson called “ego loss.” By rejecting his “calling” of stewardship, Malvolio has rejected his own selfhood, and in a sense no longer has any coherent identity at all.

Outwardly, Maria's gulling is intended to make Malvolio an extreme and ridiculous version of the person he desires to be. On another level, however, it also seems clearly calculated to destroy his very identity. We can see in Malvolio's reading of the letter his attempt to “crush” (2.5.140) himself into the identity of “the unknown beloved” (2.5.90) when he is presented with the puzzle, “M.O.A.I. doth sway my life” (2.5.107). Malvolio's effort to “make that resemble something in [him]” (2.5.119-120) results in the literal disintegration of his name. He cannot solve the puzzle because he does not really know who he is. Maria's pithy construction, “Some are born great, some achieve greatness, and some have greatness thrust upon 'em” (2.5.145-146), similarly reveals her understanding of Malvolio's predicament. To be “born great” is to have an identity that is ontologically fixed: one is simply great. To “achieve greatness” is performative and thus involves attaining an identity through some act. But to have “greatness thrust upon” one involves no willful or original act at all, but merely a reaction, perhaps desperate, to one's circumstances. In Malvolio's case, it is to nominally accept the benefits of a resolved adult identity without actually having achieved one. The letter tells Malvolio, “thou art made if thou desir'st to be so; if not, let me see thee a steward still” (2.5.155-156). Though Malvolio does indeed desire to be “made” into a nobleman and a patriarch, the effect of the gulling is not that he is left “a steward still,” but that he is virtually un-made, his identity left in tatters.

The “Count Malvolio” who presents himself to Olivia “cross-gartered” and “smiling” seems to be the imaginary fulfillment of Malvolio's wish to transcend his paradoxical position as steward by marrying his mistress and thereby resolving his masculine identity. When Olivia reacts incredulously to Malvolio's behavior, asking, “God comfort thee! Why dost thou smile so and kiss thy hand so oft?” (3.4.32-33), she fails to acknowledge and endorse the new “identity” Malvolio has assumed. Instead, she answers his gestures with ambivalence and confusion and finally dismisses him, leaving him wholly unsatisfied, “a steward still.” Thus, the truly cruel element of the gulling is the way it sets up an inevitable conflict between what Malvolio unconsciously wishes were true and what he consciously discovers is not. Because the imbrication of the conscious and unconscious seems to direct much of the subtext of the main plot of Twelfth Night, it seems appropriate to investigate Malvolio's fantasy not only in terms of its conscious effects, but also its unconscious causes. I submit that if we read his fantasy as a “day-dream” or even an actual dream, then it may reveal not only something of his hidden desires, but, perhaps more importantly, how he comes to understand, if only
unconsciously, the complex social and psychological matrix within which he attempts to define himself.

The work of Freud suggests to me several readings of Malvolio's fantasy that look to childhood desires as the origin of adult fantasies. In the essay “Family Romances,” Freud considers the (male) child who invents an imaginary parentage in order to cope with the realization that his parents are not the heroic, infallible people he thought they were when he was younger. By altering his past, the child effectively alters his conception of the present and future as well. Such a desire can be profound enough to follow the child into adulthood. Freud writes:

> A characteristic example of this peculiar imaginative activity is to be seen in the familiar day-dreaming which persists far beyond puberty. If these day-dreams are carefully examined, they are found to serve as the fulfillment of wishes and as a correction of actual life. They have two principal aims, an erotic and an ambitious one.

(Similarly, Malvolio imagines “Count Malvolio,” who may be either the invented father or the son the father produced, or both simultaneously, and who may represent the symbolic fulfillment of a wish to correct his origins. Comparing himself, or his parents, with Olivia, or her parents, and finding his own situation inadequate, Malvolio may be said to invent a past, and thus a present and future, which are more satisfying to him. The “ambitious aim” relates to Malvolio's rise in social status and is apparent in his disdainful treatment of Sir Toby in the fantasy. The “erotic aim” is to “bring his mother into situations of secret infidelity” (239), through which such an alternative parent-age might have been possible. Such an adulterous act may be symbolically represented by Malvolio's socially proscribed wooing of Olivia. In this reading, the manifestation of his unconscious desire is largely a function of difference in social rank, a difference first perceived in childhood, but one more fully and perhaps painfully demarcated in Malvolio's adult role as steward.

Yet, as Freud argued in *The Interpretation of Dreams*, the greatest influences of adult dreams are not experiences of childhood but of infancy: “A wish which is represented in a dream must be an infantile one” (533). But dreams, as wish-fulfillments, are not always inspired by the most obvious desires, and the true wish may be disguised or distorted. Through interpretation, we may find that the latent dream thoughts are altogether different from the manifest dream content. For example, in the dream, Olivia seems to be Malvolio's heterosexual object choice, and Count Malvolio, his id-driven alter-ego. Thus, the dream appears to be a clear fulfillment of Malvolio's ambitious and sexual desire to become her noble husband. Here, the latent infantile wish might involve the satisfaction of Oedipal desire through identification with the father. Yet, the true wish may be less obvious. At the time of the dream, Olivia has officially renewed her interest in Orsino's suit (through Viola/Cesario), and any accepted suitor is, to Malvolio, a rival for Olivia's love. Such a rival might be represented by the stately Count Malvolio. Indeed, the character in *Twelfth Night* who most closely resembles Count Malvolio is Orsino himself. Thus, it may appear that in becoming the noble Count, Malvolio has identified with his rival and then literally replaced him, thereby removing the threat the rival posed. This interpretation, in which the same latent infantile wish to possess the mother may involve taking the place of the father, suggests that Malvolio's desire for Olivia is part of a larger sense of masculine rivalry, and one derived from his first, infantile sense of it.

However, consider further that, beyond her beauty and charm, Olivia's greatest attraction for Malvolio may be that she, unlike any other, holds the power and title he desires: she is the head of the household. Perhaps his dream is not the fulfillment of a wish to have her, but rather to be her. The latent infantile wish in this scenario might involve the resolution of Oedipal desire through identification with the mother. Of course, in this identification across both class and gender, to be Olivia is also to desire a noble husband. Accordingly, Count Malvolio is not whom Malvolio wants to be, but rather whom he wants to have. Indeed, this may be readily
apparent in the dream when we consider that it mentions Olivia only in passing and is primarily concerned with an attractive nobleman being attended by his servants. Malvolio's dream is, in a sense, a sexually charged fantasy whose main figure is another man. Here, the manifest dream of heterosexual jealousy and desire may reflect, in Freudian terms, an insufficiently repressed homosexual impulse. More importantly, however, this interpretation suggests that Malvolio's identification with rank and authority, with real power as he most directly experiences it through Olivia, is stronger than his identification with his masculinity and even heterosexual desire.

To reiterate, the point of these interpretations is not to describe definitively the source of Malvolio's desires; rather, because the correspondences between unconscious desire and conscious action are rarely direct, they may reveal, in their indirectness, not only latent desire, but also the social and psychological dynamics that provide the context for such desire. Thus, with a contingent understanding of Malvolio's long held feelings of social inferiority, his native sense of masculine rivalry, and his powerful identification with rank and authority, we can see more clearly how his search for a resolved identity is so vulnerable to the possibility, even the inevitability, of failure.

As I have suggested, the relationship between this failure and Malvolio's dream-turned-nightmare is a symbolic one. Thus, it is not surprising that the action which follows the gulling—Malvolio's cruel punishment—is also highly symbolic. Psychoanalysis, literature, and Western culture generally have found a metaphor for identity crisis or ego loss in various images of captivity, darkness, and maternal engulfment, in which the psychic isolation experienced by the individual is symbolized by his physical isolation. Malvolio's punishment, his being taken to "a dark room and bound" (3.4.135-136), is such a metaphor. Like his fantasy, it suggests more than one interpretation. In an Eriksonian reading, Malvolio's overtures to Olivia may be called a failed attempt at "losing himself" in sexuality and intimacy (or perhaps merely "pseudo-intimacy"), which results in his feeling "isolated" or "engulfed," or, indeed, in the most literal manifestation of "interpersonal impoverishment." We may further note that Malvolio's punishment, like Maria's letter, seems custom-designed for his particular sexual crime of wrong desire for his mistress. That is, the "hideous darkness" (4.2.30) of the cellar, like Lear's "sulphurous pit" (KL 4.6.128), may signify feminine sexuality, the sexual darkness of Olivia, to which his unmediated desire has transported him. The lunatic's cellar is also the darkness of Malvolio's identity crisis, which is chiefly manifest as what Maria claims to be his "madness"; thus, the cellar is a public symbol of this alleged madness. Antipholus of Ephesus, in The Comedy of Errors, faces a similar fate when, his problems with identity having caused considerable confusion and provoked accusations of insanity, he is threatened with being "bound and laid in some dark room" (TCE 4.4.94), which was a common and curiously symbolic treatment for those thought to be insane in Shakespeare's day. For Sir Toby, however, who suggests and executes the punishment, the cellar is also a private symbol of the steward's self-doubt, of which Sir Toby and the others are all too aware. But the metaphor is also Malvolio's. Knowing that he has been "madly used" but not knowing exactly how, he is in figurative darkness about the gulling. In his psychic turmoil, the darkness of ignorance and deception, anxiety and sexuality, seem to merge, and his punishment for not seeing the truth (that is, for being gulled) is his not seeing anything at all.

On the other hand, his real "madness" is his obsessive rationality and insistence that the room is dark. Even in his vulnerable position, Malvolio is determined to discuss the matter rationally, "in any constant question" (4.2.48-49). The consummate steward, he refuses to accept any form of disorder. Thus, as it indicates the disorder of both his identity crisis and his physical predicament, this scene is emblematic of Malvolio's inability to accommodate the failures of logic and the chaos of misrule. In Illyria, such reasonableableness is problematic.

Learning to accept the disorder of experience, to enjoy its possibilities, and, like Viola, to allow time to "untangle" the hard knots of life's confusion, are what makes the characters of the main plot ultimately successful in finding mates. From their precarious beginnings, Viola, Sebastian, Olivia, and Orsino experiment with adult identities, try them out on one another, and "play" with the possibilities each identity
offers. This quest continues until the “play,” and the theatrical performance itself, come to a conclusion, and marriage permanently confirms upon each character his or her adult identity. Along the way, however, in the midst of their experimentation, the potential for error and crisis is apparent, and it is here that we can begin to explore the close thematic relation between main plot and subplot.

An undercurrent of tragic potential, which is first suggested by the deaths and melancholy that begin Act 1, can be found in the language of possibility, uncertainty, and anxiety that each character uses. For example, we hear in Orsino's first speech on the ephemeral nature of love, with its curious phrase, “so full of shapes is fancy, / That it alone is high fantastical” (1.1.1415), an almost infinite multiplicity of desire that seems to be capable of containing, if only for a moment, the wishes of every character in the play, even Antonio's. This possibility is first realized when Viola decides to don the disguise of a eunuch and serve Orsino by speaking to him in “many sorts of music” (1.2.58). The phrase echoes the music that is Orsino's “food of love,” but also looks forward to the very different sorts of music or shapes of fancy, homosexual and heterosexual, that Viola will speak to both Olivia and Orsino, and which will be an important cause of the play's confusion.

This possibility becomes endemic uncertainty when the disguise and self-deception running rampant in Illyria, like the carnival masquerades of the solstitial celebration, manifest various levels of identity and potentially limitless prospects for human interaction. Like Malvolio, the characters in the main plot's love-triangle perform a specific identity not their own, in order to satisfy a specific desire. Viola does this consciously, while Olivia and Orsino, in their obsessive narcissism, do it unconsciously. Even Sebastian, in all his apparent innocence, has used the alias “Roderigo” for unknown reasons. For each of these characters, the outward or performative “self” is capable of splitting off from the inward “self” (a split that is not unlike Erikson's social and ego identities). For example, although Viola compliments the sea captain for having “a mind that suits with [his] fair and outward character” (1.2.50-51), only fourteen lines later she dons a disguise. We are told by Viola's captain that Orsino is “a noble duke, in nature as in name” (1.2.25), yet Orsino's plan to have Viola/Cesario “act [his] woes” (1.4.26) provides strong evidence that his woes are indeed an act, and that he is not what he appears. Olivia too, who “they say … hath abjured the company and sight of men” (1.2.40-41), nonetheless entertains the jokes of Feste and has clearly moved beyond her need to mourn, though she says otherwise.

It is significant that the characters in Twelfth Night acknowledge the falseness that is common to their society and the different levels of identity that are possible (personal and social, inward and outward, ontologically “fixed” and performative). Consistently, almost habitually, they express a conscious awareness “that nature with a beauteous wall / Doth oft close in pollution” (1.2.48-49). Although this was a commonplace of Renaissance, and specifically Shakespearean, speech, as in the “fair cruel” of the Sonnets, the language of Twelfth Night is charged with a distinctive anxiety about the potential for being deceived. For example, Olivia knows that one might easily be taken in by appearances, for the speeches of suitors are “like to be feigned” (1.5.196), and “the eye is too great a flatterer for the mind” (1.5.309). Olivia's visual fixations, indicative of her own narcissism, initially cause her to fall in love with Viola/Cesario (and later enable her to switch to Sebastian in Act 5 without a second thought). Perhaps it is because Olivia is self-conscious of her own falseness that she is so wary of it in others.

In her first meeting with Viola/Cesario, Olivia is almost obsessively aware of the possibility of outward deception, and she reveals her anxiety by asking an extraordinary number of questions regarding Viola/Cesario's identity and desire. Consider those asked in 1.5 alone:

Taken together, these questions sound like the ravings of a paranoid. Not only is Olivia suspicious of the suit from the count, but she is also skeptically enamored of Viola/Cesario. To be sure, Olivia's questions are part of a ritualized courtly flirtation that is a form of play. But they also represent a tremendous anxiety about the failure of play, or what can only be called reality. That is, if this young man with whom Olivia has fallen in love is something other than the person he seems, the result of courtship could be, by Elizabethan standards, quite disastrous.

Viola/Cesario, in her response to these questions, admits, “I am not what I am” (3.1.141), conceding openly, if ambiguously, that “what I am and what I would are as secret as maidenhead” (1.5.215-216). Despite her disguise, Viola/Cesario makes it quite clear that she “care[s] not who knows so much of [her] mettle” (3.4.272), and she takes few pains to keep her true identity hidden. Perhaps this is because, unlike any other character, she has the singular emotional unity of “one heart, one bosom, and one truth” (3.1.158) and a relatively strong sense of her own identity. Nevertheless, on finding that Olivia has fallen in love with her, Viola/Cesario realizes the great danger, for herself and for Olivia, that her falseness has created:

Disguise thou art a wickedness,
Wherein the pregnant enemy does much.
How will this fadge? My master loves her dearly,
And I (poor monster) fond as much on him
As she (mistaken) seems to dote on me.
What will become of this? As I am a man,
My state is desperate for my master's love;
As I am woman–no alas the day!–
What thriftless sighs shall poor Olivia breathe?
O time, thou must untangle this, not I;
It is too hard a knot for me t'untie.

(2.2.27-41)

Despite Viola's own constancy, the “fantastical” possibilities of identity and desire, like Orsino's love, always “receiveth as the sea” (1.1.11) those who entertain them, and, like the sea, either embrace or engulf. Viola's “pregnant enemy” is the tragic possibility of identity crisis that Malvolio ultimately suffers. It is Malvolio who becomes the “poor monster” that Viola risks becoming but does not. Viola sees that in her disguise she has caused tremendous confusion of desire brought on by the confusion of identity. Because she does not know how this dilemma will “fadge,” she must trust the untangling of the confusion to time, or to the process of maturation, and hope that “Nature to her bias” (5.1.260) will untie the knot.

In this element of vulnerability, where mistakes create monsters and, as Feste says, “the wrong side may be turned outward” (3.1.13), that we can see perhaps the most important connection between the two plots, which is also the primary cause of the play's confusion: the problem of misplaced desire. In the main story, each of the characters is madly desirous of another, whom he or she cannot have, perhaps in a way similar to what Erikson called “overidentification.” Orsino desires Olivia, who desires Viola/Cesario, who desires Orsino (and even Antonio hopelessly desires Sebastian). Ultimately, Viola/Cesario is the only character whose original desires are satisfied; the others must compromise with alternatives. Still, except for Antonio, who in the final act seems to disappear from the story altogether, every character in the main story is satisfactorily re-paired, and thus repaired from the story's confusion and anxiety. For Malvolio, however, no such reparations are possible.

We are obliged to ask, then, given the extreme narcissism of the other characters and the curiously hurried marriage arrangements in Act 5, whether Malvolio's malvoglio is essentially any different from the desires of the characters of the main story. Why is Malvolio's desire for his mistress so egregious if Olivia has, in pursuing Cesario, evinced few scruples about falling in love with servants? Olivia and Orsino, and arguably even Viola and Sebastian, are full of self-love; why is Malvolio “sick” with it? How authentic is the affection
that narcissistic Orsino has for narcissistic Olivia, a woman whom he hardly knows and who has been ever so “constant” in her refusals? What about his sudden love for Viola/Cesario, whom he only recently thought to be merely a nice young man? Likewise, is the “love” Olivia easily transfers from Viola/Cesario to Sebastian born of real affection? Was this love ever anything more than a case of her eyes being “too great a flatterer for [her] mind?” And what about Sebastian's marriage to a perfect stranger? The final act of Twelfth Night elicits an unavoidable feeling that the unlikely, last-minute marriages and the somewhat abrupt conclusion of the play rely on a kind of fairytale artifice, while summarily dismissing these important questions.23 The vulnerabilities and tragic possibilities of Viola's, Sebastian's, Olivia's, and Orsino's quests for love and selfhood seem to have been displaced onto Malvolio, whose quests for the very same things are failed ones. His particular position of ambiguous authority, his own social inferiority, his faltering ego (perhaps his emerging modern “self,” divided and doubtful), all contribute to making him a very convenient scapegoat. For, ultimately, as the receptacle for the play's unwanted tragic potential, the Malvolio subplot makes comedy possible for the main plot.

Yet it is part of Shakespeare's genius in Twelfth Night to make this displacement incomplete, thereby linking plot and subplot even more closely. When in the final scene Malvolio declares, “I'll be revenged on the whole pack of you!” (5.1.378), we ought not take his meaning lightly. His true revenge, we might say, is his refusal to allow the main plot to be completely resolved before the end of the play. Having jailed the captain who aided Viola with her disguise and held her clothes in the interim, Malvolio keeps Viola from donning her “maiden weeds” (5.1.255) and thereby properly accepting Orsino as her husband. Moreover, Viola says to her brother, Sebastian, “Do not embrace me, till each circumstance, / Of place, time, fortune, do cohere and jump / That I am Viola” (5.1.2251-253). As long as Viola remains in disguise, the “misrule” of the main plot is never set straight.24 Of course, neither is the subplot. When Malvolio enters to announce the wrong that he believes Olivia has done him, she responds with the assurance that he will have justice; but this too must wait until she knows the “grounds and authors” (5.1.353) of the gulling. After Malvolio's angry exit, Orsino selfishly commands Fabian, “Pursue him, and entreat him to a peace; he hath not told us of the captain yet” (5.1.380-381). But neither Malvolio nor anyone else comes to finish the unfinished story.

If the characters of the main plot are fundamentally different from Malvolio, then, as we have seen, they also share much in common with him. There is no final marriage procession in Twelfth Night, as there are in most Shakespearean comedies, because under the circumstances, with a bride in men's clothing and a steward “notoriously abused,” none seems appropriate. The problem of Malvolio has become a problem for the characters of the main plot, and one they can solve only superficially. The underlying darkness of the play is finally, if ambiguously, played out by Feste, the last character on the stage. As the mediator between the play's two plots, Feste seems to be privileged with the wisdom that each plot holds for the other. Part of that wisdom, suggested by his name, is that the revelry and “misrule” of the Twelfth Night celebration are a natural and necessary part of life. From the perspective of modern psychology, we may add that experimentation and confusion are normal aspects of identity development. Feste's second and more ominous truth, however, is that “anything that's mended is but patched” (1.5.47-48): that although the comic fictions of life may conceal tragic possibility, they do not eliminate it. His final song, which comically describes the passage from boyhood into manhood, leaves the play with an ambivalence that points to King Lear, whose clown shares Feste's refrain.25 The concluding lines of the song are as abrupt and apparently unresolved as the play itself:

A great while ago the world begun,
With a hey, ho, the wind and the rain,
But that's all one, our play is done,
And we'll strive to please you everyday.

(5.1.405-408)

The lines sum up the play and its happy ending by dismissing them altogether. The banal send-off, like the
too-convenient marriages, overtly covers over the ambiguous final status of the play's characters simply by ending the play. It is not Feste's theme, as some critics have argued, that the progress of life and the coming into "man's estate" (5.1.393) represent a mundane but reliable transition from milestone to milestone or a mere passing of time, but rather than drama, particularly comedy, makes life seem to be so by masking its pitfalls. Although the play's marriages represent the joining of three noble families and the restoration of patriarchal rule in Illyria, the disruptive anger of the steward remains. Thus, Feste's truth resonates: "anything that's mended is but patched."

Stephen Greenblatt writes that "the form of the drama itself invites reflection upon the extent to which it is possible for one man to assume the identity of another" (219). Twelfth Night and its two plots not only invite such reflection, but they enact it, with only ambiguous conclusions. Such is the nature of identity. The steward's failed imposture of a noble count, and his failure to resolve his masculine identity, are contrasted to the successful identity experimentations of the main plot. However, Malvolio's failures are also analogous to the failure of the main plot to resolve itself completely; thus, they integrate plot and subplot and tie him to the whole structure of the play. For all his differences, he is as much the play's insider as he is its outsider. But he is still its outsider. The play's final word, then, is ultimately dependent upon Malvolio's final status, the valence and social significance assigned to his "difference." The implications for a materialist analysis are perhaps too neatly apparent from a modern perspective: if the unchallenged aristocracy of the main plot remains unchallenged in a world without consequences, this is only a temporary repression of a dialectical inevitability. Yet, such inevitability is nowhere to be found in the play's text. Indeed, the meaning of dramatic non-resolution must not be found beyond the play but within it. In the same way, Twelfth Night must be understood not in terms of the ends of identity and desire, but in their processual struggle. "What you will" signifies many things, but it is also a question, and one whose answers lie inextricably between plot and subplot.

Notes

1. Plautus's Menaechmi, also a probable source for The Comedy of Errors, and Gl' Ingannati, an early sixteenth-century Italian comedy of mistaken identity and surrogate courting, may have been well-known to Shakespeare. A likelier direct source is the English "historie" of "Apolonius and Silla" from Barnaby Riche's Farewell to the Military Profession (1581). Riche's tale, while more violent and bawdy than Shakespeare's version, similarly begins by unraveling the problems of mistaken identity and misplaced desire, only to sew them up again neatly with the reunion of twins and the celebration of a double marriage. See Bullough, 269-372. Israel Gollancz's preface to the 1894 Temple edition of Twelfth Night notes that in Il Sacrificio, the "poetical introduction" of Gl' Ingannati, there occurs the name "Malevoli," which suggests the name "Malvolio." However, beyond the nominal connection, there is no evidence that the later character is a substantive derivation. See Gollancz vi-vii.

2. The word "tragedy" is used speculatively, but not casually. In Aristotelian terms, Malvolio might arguably have the necessary traits of a tragic hero. As the steward of a great noble household and the most trusted servant of its mistress, he has achieved a certain degree of glory and good fortune; most essentially, he is a man of some excellence and uprightness and quite free of baseness. His inadequacy or positive fault (harmartia) concerns his unresolved masculine identity, which is one of the primary subjects of this essay.

3. See Malcomson 38, who argues that "the play veils and manipulates the rank of Malvolio. …"

4. Cunnington 66; also the source of the Spenser and Massinger quotations. See also Gouws 478-479; and Hunt 282.

5. We may be confident that Renaissance audiences recognized this to be true, in the same way, perhaps, that today we recognize—even stigmatize—the very difficult position of the butler, whose character, according to the time-honored adage of mystery novels, is the first to be impugned.

6. On the treatment of servants in 17th and 18th C. aristocratic households, see Hainsworth 245.
While the role of the household steward declined, that of the estate steward increased. With enclosure and industrialization, the larger noble estates became complicated organizations that required professional management. In the Seventeenth Century, the estate steward was a very powerful figure, while the household steward had become all but extinct and was replaced by the more butler-like majordomo, who wielded much less authority. See Hainsworth 10.

Although there were women, often widows of some maturity, who successfully managed wealth and property during the Renaissance, a great noble household left in the hands of a young, unmarried woman, no matter how capable, signified a distinct disadvantage. See Hainsworth 10.

I am indebted to Constance Jordan for helping me to understand the structural dynamics of the Renaissance household. See her Renaissance Feminism.

Following Erikson, I will use this term to mean “loss of ego identity.” For a useful discussion of the early history of the expression, see Erikson, Identity: Youth and Crisis 16-19.

See Childhood 219-234. While Erikson describes eight stages of ego development, my discussion concerns only three: Adolescence (Identity v. Role Diffusion); Young Adulthood (Intimacy v. Isolation); and Adulthood (Generativity v. Stagnation). The application of Erikson's work to identity formation in Shakespeare is well-developed in Coppélia Kahn's “The Providential Tempest and the Shakespearean Family,” in Man's Estate, 195-225. Although Kahn's work does not consider the Malvolio subplot, I am deeply indebted to her discussions of Twelfth Night, masculine identity in the Renaissance, and the identity theories of Erikson.

See Stone, Family 27; Laslett 12; and Kahn 12-17.

I am indebted to David Willbern's “Malvolio's Fall,” which considers “the steward's collision with the merrymakers, the nature of the damage he suffers, and its relevance to the general theme of festivity” (86).

Olivia's association of Malvolio with her dowry is further evidence that she considers him to be a kind of temporary, substitute husband.

For a contrary view, see Malcolmson 45.

See Mueschke and Fleisher 732-733: “The stage satire of the Puritans was as popular with theater audiences as the Puritans themselves were unpopular, and the occasional suggestion of a Puritanical bias in Malvolio's pretentious virtue added to the opportunities for satire and ridicule of the steward” (733).

In Shakespeare, smiling almost always signifies deception in the smiler, and often leads to his demise. Compare Malvolio's fate with some of Shakespeare's other “smiling” characters: Hamlet's Claudius “O villain, villain, smiling damned villain” (1.5.106); the “smiling” Rosencrantz and Guildenstern (2.2.332); Oswald, the “smiling rogue” of King Lear (2.2.79); and Timon's flattering lords, the “most smiling, smooth, detested parasites” (3.6.104).

I agree with Fineman's argument that the main plot's “playfully designed chaos is only possible because the sex difference, the ‘little thing’ (3.4.282-283) Viola lacks, is secure, acknowledged, presumed” (82), and Barber's point that “when the normal is secure … playful aberration is benign” (245). However, as I have argued, there is little that is “normal” or “secure” about Olivia and her household at the time when she meets Viola/Cesario; likewise, from the play's beginning, Orsino's narcissism seems to have him perched at the edge of a pond grasping at a phantasm. Only Viola's singular unity lends benignity to the play's chaos. The chaos that is not so benign is that which leads Fineman to admit that “this is comedy, but comedy that knows worse than itself” (85).

For an interesting recent discussion of Orsino's metaphors of engulfment and digestion, see René Girard 112-114.

This is what C. L. Barber might have called an “inadequate object.” See 246-247.

Perhaps this is because, unlike the apparent desires of the others, Malvolio's misplaced desire for Olivia, does not seem to be based in any real affection at all. Moreover, while the other characters mediate their desires through surrogates and equivocation, Malvolio expresses his overtly, in this way offending not only the decorum of courtly love, but also the rules of social status. While Orsino sends
embassies of love, and Olivia gives Viola/Cesario a ring and Sebastian a pearl, Malvolio's material expressions of his affection, his cross-gartering and smiling, are not tokens of real love. Because they are not of his own invention but specifically prescribed by the gulling, they become fetishes or intended symbolic actions that finally have no symbolic content for Malvolio the lover.

23. David Scott Kastan writes: “To call attention to the formal rather than the psychological justifications of [Twelfth Night’s] conclusion … is not to find the ending either inadequate or ironic, but only to see it as it is: as a self-consciously improbable—though thoroughly desirable—resolution of loyalties and affections” (577). Valerie Traub also comments instructively: “Insofar as gender hierarchies seem to be both temporarily transgressed and formally reinstated, the question of subversion versus containment can only be resolved by crediting either the expense of dramatic energy or comedic closure” (120).

24. See Willbern 89.

25. Compare Feste's song,

When that I was and-a little tiny boy,
   With hey, ho, the wind and the rain,
A foolish thing was but a toy,
   For the rain it raineth every day.

(5.1.366-369)

with the one King Lear's fool sings in the middle of the storm,

He that has a tiny little wit,
   With hey, ho, the wind and the rain,
Must make content with his fortunes fit,
   Though the rain it raineth every day.

(KL 3.2.74-77)

26. Although Feste's song suggests various interpretations, I disagree with Barbara Everett’s more conventional reading that “the theme of the song is, after all, simply growing up, accepting the principle that nights before have mornings after; that life consists in passing time, and in knowing it” (308). I prefer Coddin’s reading of the song as one which “call[s] attention to the illusory nature of comic resolution …”: “The final line, ‘And we'll strive to please you everyday,’ is a reminder that playing itself, while trafficking in illusion, is historically embedded, materially reproducible in time and space, and thus vulnerable to ‘wind and rain,’ to the threats that escape closure,” 323. See also Kastan 578.

27. Coddin argues that “Twelfth Night pointedly reinforces neither aristocratic nor anti-court values; rather, by exploding the kinds of social classifications propounded by contemporary critics into a multiplicity of slippery, contingent positions, the play subversively confounds holiday and history, festive ‘license’ and contestation,” 312.

Criticism: Production Reviews: Russell Jackson (review date winter 2002)

[In the following excerpted review of the 2001 to 2002 Royal Shakespeare Company season at Stratford-upon-Avon, Jackson observes the erotic and decadent qualities of director Lindsay Posner's staging of Twelfth Night and highlights several individual performances, including Guy Henry's strangely empathetic Malvolio and Mark Hadfield's touching Feste.]

[In the set designed by Ashley Martin-Davis for Lindsay Posner's Twelfth Night,] Olivia's household was represented permanently by the furnishing of [an] alcove on the right of the forestage: black furniture, including a piano, a grandfather clock, a small table, some austere chairs, and a row of ancestral photographs. There were also two telltale Beardsley drawings that slyly indicated her suppressed longings. Orsino's court was exclusively male and military, but he openly indulged himself in the tastes of a fin-de-siecle aesthete. After a mimed prologue representing the storm, in which two figures struggled against a translucent plastic drop that billowed up and away as if it were at once clouds, sea, and a sail, the play proper began with the duke (Jo Stone-Fewings) listening to a melancholic performance on flute and guitar. The walls of his apartment were hung with a collection of decadent art, including more or less erotic and vivid contributions from Klimt, Matisse, and others. As confirmation of his openly passionate nature, he also owned a red sofa. In the center of the stage, covering the whole area up to the backcloth, was a flowery reddish carpet, and green louvered screens were drawn across at proscenium-arch level to close off the front for interior scenes. These pulled back to reveal a stormy sky and sea on the backdrop and the very wet Viola and the captain, who came up over a slight rise onto the carpeted acting area, followed by two sailors carrying a large trunk.

Thus Illyria was specific in time and social register but, at the same time, a palpable fiction. It accommodated the social relationships of the play well but did not aim for a realistic sense of the country-house milieu. The program indicated that it was situated in the 1900s, but in fact this was the long nineteenth century beloved of stage designers. The period allows characters to wear swords, employ servants, and show signs of wishing to escape from the sexual and social constrictions of a formal society. Toby's perilous tightrope walk along the edge of social acceptability, ending with his downwardly mobile marriage to the lady's maid Maria (Alison Fiske), paralleled Malvolio's hapless social and romantic adventure. (In “Victorian” productions, the more exalted status of waiting gentlewoman usually translates down a class or two.) Olivia treated Malvolio with affection and trust, and for all his self-absorption, he would not have been an implausible or absurd partner for her if she had been minded to match below her degree. Maria's affection for the impossible Toby (Barry Stanton) was touching: when they first appeared, she was sponging the vomit off his jacket after another hard night's drinking. Toby reciprocated with possessiveness, if not the same degree of feeling for her. “She's a true beagle” was followed with an aggressive territorial claim—“and one that adores me”—to which Sir Andrew's
sad “I was adored once” was not so much a moment of pathos as an attempt not to be cut out by Toby's claim to the glamour of being worshipped. Toby's grossness (he vomited on his tie before “A plague o’ these pickled herring”) was accompanied by a constant undertow of bullying, which qualified his regret at the extreme humiliation of Malvolio and confirmed the brutality with which he finally discarded the foppish, vacuously sparkish, and ever-hopeful Sir Andrew (Christopher Good.)

When Toby speaks of being adored, the verb has been heard once already, on Antonio’s lips: in fact the most outspoken passion of the play was that of Antonio (Joseph Mydell) for Sebastian (Ben Meyjes). Viola's brother and his friend were discovered on a bed, which they had evidently shared, Antonio reaching out toward Sebastian, who got up and put on his jacket with no apparent sense of his friend's loving gesture. There was strong suggestion of sexual opportunism in the young man. He emerged from his encounter with Olivia with his shirt hanging out of his trousers, happy to be shown a good time and bribed with pearls when occasion offered. At the end of the play neither Sebastian nor anyone else noticed that nothing had been done to free Antonio, who was left in manacles. Sebastian's willingness to make the most of his bisexuality, according to the circumstances in which he found himself, was an appropriate counterweight to Viola's equivocal situation. Olivia, played with a slightly eccentric precision of enunciation by Matilda Ziegler, was just as ready as Sebastian for the main chance, and her earlier demureness was soon discarded. She positively dragged Sebastian off, first to her bed and then to the altar, and as usual there was a big laugh for her exclamation of “O wonderful” in the final scene at the prospect of two men at her disposal. Cesario/Viola's promotion in Orsino's exclusively male world was signaled by her being entrusted with his clothes when he appeared in his underwear at the beginning of 2.4. There was the by-now-customary moment during “Come away, death” when his hand reached out to her hair, and she yielded for a moment to the impulse to accept the caress. She withdrew when she realized what had happened, but it was not made a moment of embarrassment. At the end of the play, however, Olivia kissed “Cesario,” but Orsino, who had already shown some confusion at the prospect of seeing Viola as his “fancy's queen” in her “woman's weeds,” pulled back from kissing “him.”

At the beginning of the season Viola (Zoe Waite) was passionate but a little too energetic and waggish, which may have been the result of overprojection on a wide stage in a large space. As the season progressed, her performance relaxed and grew in subtlety. Guy Henry as Malvolio tended to get broader and more physical, particularly in the letter scene and in his appearance before Olivia with his trousers rolled up to reveal yellow socks with suspenders and painful-looking cross-garters. He thrust his pelvis at her and lolled his tongue suggestively, bounding about like a demented kangaroo. From his first appearance, his slightly strangulated voice, with a touch of Welsh beneath the overpolished vowels, and stiff gait betrayed the not-quite-complete acquisition of upperclass demeanor. His notions of upward mobility and romance were soon evident. When Olivia gave him her ring to carry to Cesario, he handled it as though it were a love-token for himself and after discovering and interpreting the letter, the conclusion that she loved him was followed by a sob. For all his arrogance and folly, and the absurdity of his behavior, Malvolio's degradation was moving. Only his hands were visible through a grating in the forestage during most of his imprisonment as a madman in the “dark house.” In the final scene, as he learned the cause of his discomfiture, he continued to clutch the now soiled but still potent letter. After a quiet but bitter “I'll be revenged—on the whole pack of you,” his final exit was simple and dignified. He walked quickly but not hurriedly to the back of the stage and off. It was a hard exit to follow, but in one of the productions most revealing moments, Orsino and his men laughed: the women, shocked by both Malvolio and this faux pas, remained silent.

This was an enjoyable, thoughtful interpretation, with some moments of real eloquence, an Orsino who was ardent and handsome enough to justify Viola's love, and an affecting Feste with a wistful voice. Mark Hadfield's fool had acquired an anthology of mannerisms and gags from several sources, including Harold Lloyd, Buster Keaton, and Little Tich—a famously agile and strikingly diminutive music-hall performer, whose yard-long shoes were alluded to but not quite imitated in Feste's oversized footwear. He was for all weathers but resigned to the effects of the wind and the rain. During his final song, in a production gesture
that has become familiar, Andrew, Toby, and Maria were seen making their exit from Illyria. Joseph Mydell's being the only black actor among the principals emphasized Antonio's status as an outsider, although the final sight of him in manacles had a resonance of which the production itself had not in fact taken notice.

**Criticism: Production Reviews: Kenneth Gross (review date January 2002)**

In the following review of the 2002 Holderness Theater Company production of *Twelfth Night* directed by Rebecca Holderness, Gross praises the minimalist staging of the play and calls attention to its fine dramaturgical effects, including the setting, lighting, dance, and music.

At the opening of Rebecca Holderness's production of *Twelfth Night*, one saw on the stage floor an elongated pile of crumpled sheets of paper. Over the course of the show these were variously kicked at, danced over, scattered, rearranged, and blown away. Given the plot of *Twelfth Night*, the papers suggested the detritus of sea-storm and shipwreck, seaweed and shells, also rejected and lost letters, even discarded scripts and newspapers. Mere litter at one moment, at the next they could be carefully arranged into a circle to create the sad, enclosed garden of Olivia. (Other props were scarce: a stool, a fishbowl, some umbrellas.) Without calling too much attention to the idea, they might have made the New York audience think of the chaos of paper that filled lower Manhattan in the weeks after the World Trade Center disaster—the snow of pages from destroyed offices as well as the innumerable messages, memorials, and photographs affixed to walls in the surrounding neighborhood, fading and tearing over time. This was a *Twelfth Night* after the Eleventh, alive to the sense of mourning and disaster, the feeling for the fragility of things, that sifts through Shakespeare's comedy.

In this minimalist setting (designed by Christine Jones) the words of individual actors could carry a peculiar weight. Shakespeare's text overall came through with great clarity, with a sense of each moment being open to a new thought. One felt a quick, ferociously direct confrontation between speakers, which was by turns comic, seductive, mocking, and aggressive. The disguises so many of the characters assumed heightened rather than blocked this directness, as if their own masks betrayed them, making them speak their minds more clearly and dangerously. This suggested the director's stark reading of the play: that in a world so endangered, the only community worth having is one in which people are ready to challenge each other, to risk offense, if it compels others to reveal their hearts.

Close attention to the text was combined with a more postmodern interest in layers of performance and choreographed movement. Multifaceted forms of music and dance that took their cue from the original text's preoccupation with the erotic and oceanic power of music connected the action of the play. The young, punkish Sir Toby (Jared Coseglia) danced to raucous and noisy techno-music from his boom box. The court of the youthful and melancholy Orsino (Bob Airhart) included a lounge singer (Andrea Haring) who serenaded the duke with old torch songs, including Peggy Lee's “Perhaps.” Feste (Kevin Kuhlke), alone on the stage at the beginning of the second act, strummed Bach on his guitar. And when Viola (Jocelyn Rose), disguised as the boyish messenger Cesario, told the mourning Olivia (Christianna Nelson) how he/she would woo her, she (Viola) broke into a brief impromptu aria, as much to her own surprise as to Olivia's.

A corps of dancers on stage (guided wonderfully by Dan Weltner) also formed an ever-changing, secondary world of bodily motions, picking up on hidden energies in the plot. In the show’s opening scene, for example, two groups of dancers faced each other, moving in wave-like, advancing and retreating masses to create onstage the sea-storm that divides the fated brother and sister—a storm described but never shown in the original text. In Orsino's house, the torch singer seemed to draw dancers onto the stage for an impromptu
tango. And following Olivia's speech acknowledging her fearful love for Cesario, a solitary dancer (Ellie Dvorkin) moved with slow, meditative simplicity across the stage, translating the note of Olivia's love into a different key. Another lone dancer (Brendan McCall), moving behind a scrim, imaged for us the menaced, isolated feelings of Antonio (Craig Bacon), apparently betrayed by the young man he had saved from drowning.

These elements of movement and music—supported by Loren Bevan's sparesly elegant costumes, a subtle score of storm-noises and melodies by composer Elizabeth Stanton, and lush, shifting lighting by Matthew Adelson—did more than just provide a symbolic accompaniment or underscoring for the action. It reinforced the intense, sometimes mysterious sense of complicity that marked the work of the ensemble cast and produced such unexpected turns on the text. A single example will suffice here. Kevin Kuhlke's volatile but reflective, brooding Feste was protective of Olivia, and often distrustful of the work of amateur fools. He could even at moments show a strange solicitude for the very man he had helped to gull, the steward Malvolio (strongly and scarily played by Randolph Rand). This was especially marked in the cellar scene, as the abject, imprisoned servant lay half-naked on the ground, staring into the fictive darkness with wide open eyes. In the original text, Feste, having agreed to convey a letter from Malvolio to Olivia, departs the stage singing a song that invokes the comic Vice of the morality plays, fighting the devil with a wooden sword. At the end, the “old Vice” cries “like a mad lad, 'Pare thy nails, dad / Adieu, goodman devil!'” In this production, while Feste began the song, it was completed by the imprisoned Malvolio as he rose and walked slowly offstage, half stealing the song for himself, half accepting it as a gift. Sung with restrained, dream-like menace, the ditty became both a token of some shifted self-knowledge in Malvolio and an expression of his wished-for (if still comic) revenge against those who had so notoriously abused him.

**Criticism: Production Reviews: Robert Brustein (review date August 2002)**

In the following review of Brian Kulick's 2002 staging of Twelfth Night at the open-air Delacorte Theatre in New York City's Central Park, Brustein contends that Kulick and his star-studded cast barely explored the depths of character and theme offered by Shakespeare's text.

The season being summer, it is time for Shakespeare, particularly Twelfth Night, which, along with As You Like It and A Midsummer Night's Dream, is a perennial favorite of outdoor festivals. In my time, I must have endured a hundred nights of Twelfth Night, one of them not that long ago in the very Delacorte Theater where the current version is being staged, the sole offering of the New York Shakespeare Festival's summer season. Like that previous production, which starred Michelle Pfeiffer and Jeff Goldblum, this one is a celebrity gathering featuring a number of movie and television luminaries. Some of these actors, notably those with stage experience, actually have some chops. Others should have been advised not to serve their theater apprenticeships in important Shakespearean roles.

They have not been helped much by their director, Brian Kulick, whose imaginative contribution seems to have been pretty much exhausted by the visual concept. Walt Spangler's attractive design, set against the green-carpeted, moon-drenched background of Central Park, is composed of a majestic blue fun-park scoop that occupies half the stage, on the rest of which sits a derelict wreck of a blue ship with a huge hole in its side. Through this opening can be glimpsed a bit of the cargo—notably a large nude odalisque—which suggests that Sebastian and Viola might have been engaged in smuggling paintings into the Florentine art market before being shipwrecked in Illyria. The blue ship serves as a prop for the court scenes. The scoop provides the occasion for most of the physical action, which consists mainly of characters sliding down the polished wooden surface on Persian carpets. This is fun for about ten minutes. After the eleventh or twelfth
such prank (and virtually every member of the cast gets a shot at it), it begins to grow a trifle tedious.

This *Twelfth Night* is lovely to look at—Miguel Angel Huidor's colorful nineteenth-century costumes and Michael Chybowski's shimmering lighting are especially attractive. But it lacks a strong interpretive approach other than the way it finds double entendres (otherwise known as Shakespeare's bawdry) in much of the language. Is Kulick trying to prove Viola's belief that “they that dally nicely with words may quickly make them wanton”? To be sure, *Twelfth Night* has many such verbal allusions, the broadest being the way Malvolio unconsciously spells out a rude word for Olivia's private parts. And it may be that Shakespeare's adolescent weakness for sexual puns is especially riotous in *Twelfth Night* (like Feste, Shakespeare in his lighter moments is a “corrupter of words”).

But the play also enjoys a sensual understructure that is almost entirely ignored in this production. The lesbian implications of Olivia's attraction to a young woman disguised as a boy are hardly touched upon, largely because Julia Stiles's Viola fails to summon up more than a pinched smirk in response to Kathryn Meisle's insistent attentions. With her singsong delivery and immobile features, Stiles is the latest in a Central Park tradition of casting untrained movie stars in ingenue roles, and it does not help her already weak vocal projection that the airlines seem to have timed their shuttles over Manhattan to muffle her speeches. Stiles and the considerably more mature Meisle often seem to be in different plays—or, more accurately, different media.

Similarly, although Antonio's passion for Sebastian (Zach Braff) gets some emphasis with the help of a subtle performance by Sterling Brown, the impact of Viola's gender confusion on Orsino's sense of male pride is barely explored. This is not to say that Jimmy Smits's Orsino lacks manliness—he comes off as a very dashing romantic swashbuckler in his red dressing gown and hussar uniform. But once Orsino has established his infatuation with music, the director leaves him nowhere to go. Nor has the composer (Duncan Sheik) provided much in the way of lyrical support. The songs are of indifferent quality, and they are indifferently sung by Michael Potts as Feste.

Where the production finds some strength is in its comic scenes. Oliver Platt as a Dickensian Sir Toby and Michael Stuhlbarg as a spindly Sir Andrew generally form a strong team, looting the beached ship and squirting wineskins at each other. And Christopher Lloyd's Malvolio, a shiny-domed menace out of *The Island of Dr. Moreau*, is a good foil for their foolery. But considering Lloyd's genius for manic farce, it is puzzling that he seems too restrained here and fails to capture some of the pain and rejection that lies beneath the pompous self-satisfaction of an egregious ass.

By the time this *Twelfth Night* ends, it seems to be well into its thirteenth night. The production has long since exhausted our goodwill and patience. The recognition scene, in which Viola and Sebastian take about ten minutes to acknowledge that they are brother and sister—surely this is what Ionesco was satirizing in *The Bald Soprano*, where a long-married husband and wife have a hard time recognizing each other despite mountains of evidence—seems even more interminable than the one in *Cymbeline*. We are no longer interested in which Jack gets which Jill, because we've never believed in any of the relationships. There was more sense of the play, and more playful sensuality, in the concluding scene of John Madden's *Shakespeare in Love*—in which Gwyneth Paltrow, her wet smock clinging to her delicate body, walked from the sea to alight upon the beach of Illyria—than in this entire plodding three-hour evening.

**Criticism: Production Reviews: John Mullan (essay date 1 November 2002)**

In the following excerpted review of the 2002 Donmar Warehouse Theatre staging of Twelfth Night directed by Sam Mendes, Mullan contends that an overemphasis on the erotic and sensual aspects of the drama, as well as on the suffering of Malvolio, obscured its comic elements and proved detrimental to the production.

We owe to the memoranda book of law student John Manningham our knowledge that Twelfth Night was written just before or just after Hamlet. Manningham records seeing it early in 1602, though until his diary was unearthed in the nineteenth century it was commonly supposed that this romantic comedy of loss redeemed by kind tempests was late Shakespeare. With the confidence of documentary evidence, we now see how close it is to that tragedy of forbidden mourning. Like Hamlet, it opens after a death, and asks how long someone need mourn. Hamlet is told by his mother that, after two months, he has worn his “nighted colour” long enough. In Twelfth Night, Olivia has sworn to devote herself to the “sad remembrance” of her dead brother for seven years, daily watering her chamber “with eye-offending brine”. Manningham described Olivia as a “lady widow”, a mistake that evidences the excess of her grieving. The boy playing her in 1602 must have been veiled and dressed in black, as actresses have been ever since, and the watching student naturally thought her suspended from life by her devotion to the memory of a dead husband. …

… Sam Mendes’s already garlanded new production of Twelfth Night … [begins] by inviting us to disbelieve those who mourn. Characters in inky garb are protesting too much. Mendes has Orsino (a gloomy, angry Mark Strong) and his attendants wearing black, in would-be sympathy with the woman the Duke so self-indulgently “loves”. Yet we soon realize that Helen McCrory’s Olivia is quite ready for something better than doleful seclusion and can scarcely conceal her kittenish inclinations. She smirks under her veil at Feste’s sallies and the tone of her “What kind o’ man is he?”, when informed that “Cesario” will not depart without seeing her, tells us that she is no natural “cloistress”. …

[This] Twelfth Night … puts its faith in sexual allure. Helen McCrory’s Olivia is a chuckling temptress. The director has surely gone awry here. As Olivia strives to warm “Cesario”, she discards her black robe to reveal a transparent black negligée. Viola’s “I pity you” takes on just the wrong implications. Later, Olivia takes Sebastian (Gyuri Sárossy) straight to bed (as she does in the Barnaby Riche tale which Shakespeare transformed into his play). In case we did not follow McCrory’s come-hither tone (“would thou’dst be ruled by me”) and Sárossy’s laddish alacrity (“Madam, I will”), the two emerge, deshabillés, a couple of scenes later. Sebastian’s strange readiness to become betrothed to a woman he has just met is explained away as post-coital euphoria. His lines about it being “wonder that enwraps me thus, / Yet ‘is not madness” duly got a laugh.

“Wonder” is just what the erotic theory loses. In that extraordinary interim where the twins finally find themselves on the stage together, and their presence works its amazement on the other witnessing characters, Olivia exclaims “Most wonderful!” McCrory produced a feline growl of relish, as if contemplating double helpings of the sensual delights that she had so recently enjoyed. Again, everyone laughed, and the moment was lost. The erotic element was emphasized by physical contact. There is a great deal of touching for a play whose two figures of authority, Orsino and Olivia, are supposed to command conventional respect. Sometimes this works, as when Emily Watson’s Viola unconsciously takes Orsino’s hand while they listen to Feste sing, only for both to pull back a moment later. Elsewhere it is distracting. After “Cesario” has captivated him with her tale of her father’s daughter’s concealed love, Orsino seizes his “page” and kisses him/her passionately. This has happened before in productions of the play, but always risks undoing the perplexing growth of feeling in Orsino. “O learn to read what silent love hath writ” was the line from Sonnet 23 projected on to the back of the set as we took our seats. Orsino must find love where it is not expected (and banish the self-regarding amorousness that he has been displaying before). Here, his physical demonstrativeness substitutes for emotional change.

Yet there are successes. The most striking aspect of the staging is the huge picture frame through which characters sometimes enter or depart, and in which they sometimes remain while the action proceeds. Without being reductive, it catches the sense of characters being preoccupied, foolishly or touchingly, by those who
are not present. It also allows Mendes to keep Malvolio, blindfolded and straitjacketed, “in frame” all the
while that the lovers are luckily finding their mates. Indeed, rather against the grain of stage directions,
Malvolio is with us throughout his scenes of confinement. The Folio text specifies “Malvolio within”,
suggesting that he remains concealed as he is tormented by Feste/Sir Topaz. Here, he is entirely visible,
preyed on for our discomfiting entertainment. The impression is strengthened by the playing of Sir Toby
Belch (Paul Jesson) as a would-be tormentor throughout. His final contemptuous rejection of a weary Sir
Andrew (David Bradley) is but the confirmation of what is apparent all along. In this production, Malvolio's
suffering is maximized (though it cannot be appropriate to have Olivia actually strike him when he makes
those absurd advances to her). In large measure this is made persuasive by Simon Russell-Beale's poignant
performance. His self-importance is richly ridiculous—a little camp and very tender of his dignity—yet it
always suggests a kind of torment, finally revealed. …

Mendes's *Twelfth Night* seems not quite able to trust the madness wrought by love and self-love in the
comedy. Confidently performed, eloquently spoken, and accompanied by George Stiles's subtle music and
song settings, it leaves you entertained, but moved only by that foolish steward's inevitable humiliation.

**Criticism: Themes: F. B. Tromly (essay date spring 1974)**

SOURCE: Tromly, F. B. “*Twelfth Night*: Folly's Talents and the Ethics of Shakespearean Comedy.” Mosaic 7,
no. 3 (spring 1974): 53-68.

*[In the following essay, Tromly suggests that folly is a positive force in Twelfth Night, one that allow the
characters to come to terms with life by learning to accept “delusion, vulnerability, and mortality.”]*

Well, God give them wisdom that have it, and those that are fools, let them use their talents.

(I, v, 13-14)

To speak of the ethics of Shakespearean comedy, and especially those of a play so dedicated to “good
fooling” as *Twelfth Night*, smacks of critical perversity. When Feste asks Toby and Andrew, “Would you have
a love song, or a song of good life [a song praising the virtuous life],” the two superannuated roaring boys
surely answer for the audience as well as for themselves. Toby exclaims, “A love song, a love song,” and
Andrew's response, as usual, is a vacuous echo: “Ay, ay, I care not for good life” (II, iii, 32-35). Only a
Malvolio would want to deny the play the cakes and ale of comic release. The vision of romantic comedy
tends to hold the reality principle in abeyance, to dissolve it in music and moonlight, and hence our quotidian
notions of ethical conduct may seem irrelevant to Illyria and the forest of Arden.

Also, one hesitates to dilate on the ethics of Shakespeare's comedies because there is a sense in which the
comic world actively subverts moral codes. It does so by suggesting that people stumble upon rather than earn
their happiness, and hence it reassures us that felicity is not reserved for the conspicuously virtuous. As every
Jack gets his Jill, hormones seem as instrumental as head or heart in bringing about the inevitable mass
marriages. The romantic comedies manage to sidestep the crushing moral issues which lie at the core of
tragedy because they insinuate that mistakes simply don't count. To borrow the Captain's words to Viola,
comedy works to “comfort you with chance” (I, ii, 8).

Whatever the ethics of the comedies may be, they have nothing to do with law. The comic form capitalizes on
an important psychic fact: that breaking the law, and watching it be broken, are deeply satisfying. The
exhilaration which comedy creates stems partially from its systematic violation of statutory law as well as the
law of probability. Shakespeare's comedies insist on the inadequacy of the law, and their denouements often
turn on its violation. In *The Merchant of Venice* Shylock gets his comeuppance when his insistence on the
strict application of the law backfires. The attempt of the humorous Egeus to inflict “the ancient privilege of Athens” upon his nubile daughter carries the plot of *A Midsummer Night's Dream* into the license of the woods. Nowhere in the comedies does the law seem so inimical and foreign to human needs as in *Measure for Measure*, where the “most biting laws” (I, iii, 19) are often imaged as a beast of prey. Frequently the comedies insinuate that the law is itself unlawful. In his first appearance on stage, Falstaff derides the “rusty curb of old father antic the law” (I, ii, 56), which implies that the law is the true lord of misrule. It is no coincidence that many of Shakespeare's comedies locate their action during a time of Holiday or Carnival, when the proper law is the inversion of law.

This enmity between comedy and law is a consequence of comedy's most fundamental ethical axiom—that only limited moral achievement can be expected of man. Comedy discovers its perspective on morality in its insistence on human weakness. It is that great melancholic, Hamlet, who voices the discrepancy which comedy creates between the demands of the law and man's congenital inability to fulfill them. When Polonius says that he will treat the visiting players “according to their desert,” Hamlet retorts:

> God's bodkin, man, much better! Use every man after his desert, and who shall scape whipping? Use them after your own honor and dignity. The less they deserve, the more merit is in your bounty.

(II, ii, 516-19)

Man delights not Hamlet, nor woman neither, as he has told Rosencrantz and Guildenstern a few moments earlier. The actions of Claudius, Gertrude, and Ophelia, and his mistaken sense of his own cowardice, have given him ample cause to revile human frailty, and yet, for a moment, he contemplates moral failure with a tolerant equanimity. Since everyone merits the whip for misdemeanour, no one should have to suffer what he deserves. Huck Finn, the Hamlet of Hannibal, shares the Prince's point of view when he decides to help the murderers trapped on a sinking steamship:

> I begun to think how dreadful it was, even for murderers, to be in such a fix. I says to myself, there ain't no telling but I might come to be a murderer myself yet, and then how would I like it?2

Like Hamlet, Huck never forgets that he is “low-down and ornery.”

No less an authority on comedy than Falstaff endorses Hamlet's and Huck's viewpoint. When Hal tries to shame him for cheating Mistress Quickly, Falstaff replies:

> Thou knowest in the state of innocency Adam fell, and what should poor Jack Falstaff do in the days of villainy? Thou seest I have more flesh than another man, and therefore more frailty.

(III, iii, 158-62)

Shakespearean comedy acknowledges the consequences of the Fall, but, like Falstaff, it proceeds to turn Calvinism inside-out by suggesting that man's frailty should exonerate rather than damn him. For the Calvinist, man is depraved, but for the comic artist he is only deprived. In Shakespearean comedy the key terms for man's limitation are two: frailty and folly. These terms are close in meaning, but not interchangeable. Folly resides primarily in the mind, while frailty is weakness of the flesh. In the romantic comedies, such as *A Midsummer Night's Dream* and *Twelfth Night*, folly predominates, while in the so-called “dark comedies” the emphasis shifts to frailty. But, regardless of differences of emphasis, comedy always fashions a world of diminished moral expectation. Paradoxical as it may sound, Shakespeare's comedies are...
less sanguine about human potentiality than the tragedies. The gentle scepticism of the comedies questions excellence in evil as well as in goodness; as Don John and Oliver discover, comic villainy is destined to incompetence, vulnerable to the sleuthing of a Dogberry.

Twelfth Night, the last and richest of Shakespeare's romantic comedies, gathers up the themes of the earlier comedies, and one senses in the play a new exploration of the possibilities of comic form. It is almost as if Shakespeare wrote Twelfth Night after mulling over his earlier comedies and deciding he would have a last try. The most telling manifestation of Shakespeare's new commitment is the play's emphasis on human limitation. None of the other romantic comedies forces us to question human capability in the way Twelfth Night does. None of the earlier comedies gives us so much of the dark side of comedy's moon. The movement from Twelfth Night to Hamlet and Troilus and Cressida (all written in about two years) is not as surprising as it may first seem.3

Twelfth Night is of course not unique among the romantic comedies in its reference to the sadness of things. All the comedies employ what might be called tragic relief. In Northrop Frye's phrase, “in almost any comedy we may become aware of having been delivered from the tragedy.”4 In fact, most of Shakespeare's so-called “happy comedies” begin and end in shadow. A Midsummer Night's Dream, for instance, begins with images of the waning moon, the wasting away of desire, and love won by inflicting injury. It ends with a lamentable comedy (lamentably acted), with the tolling of “the iron tongue of midnight,” and with Puck describing how the screech owl “Puts the wretch that lies in woe / In remembrance of a shroud” (V, i, 366-67). Similarly, the opening lines of Love's Labour's Lost refer to “brazen tombs,” “the disgrace of death,” and “cormorant devouring Time,” and at the end the sombre announcement of the King's death breaks in upon the festivities. A pair of seasonal songs concludes the play, with the song of Winter significantly following that of Spring. Thus, the whirligig of Time brings in his revenges on us all. The romantic comedies always hint at the incompleteness of their vision.

Twelfth Night is a play of much mirth, good fooling. Twelfth Night, itself, we should recall, was traditionally a time of licensed festivity and carnival. Inversions of hierarchy, masqueradings, song, and excessive drink were the disorder of the day. Shakespeare's play beautifully recreates the celebratory nature of its social occasion.5 Yet, the play constantly reminds us that its lovers and roisterers are playing out their games in a context of suffering, hazard, and death. To put it another way, the foreground of the play is festive, but in its immediate background Shakespeare constantly reminds us that life isn't always happy, and in fact cannot sustain happiness for long.

At the outset, we hear of the recent deaths of Olivia's father and brother, as well as a reference to pestilence in the air. Then in the next scene we hear a vivid description of a shipwreck, meet a defenceless young woman cast ashore in a foreign land, and entertain the likelihood of yet another dead brother. The ensuing complication of the action creates confusion and anxiety among the characters, who experience intensely such painful emotions as jealousy and impute ingratitude and disloyalty to the people closest to them. Also, the sub-plot concerning the gulling of Malvolio leaves a bad taste in many readers' mouths and suggests that even foolery has its dark side. The play reminds Clifford Leech of those social occasions on which “we look coldly on the merry-making and the good relationship and see the precariousness of our tolerance for one another, the degree of pretence in all sociability.”6

Perhaps the darkest aspect of the play is its frequent reference to the remorseless attrition of mutability. It refuses to let us forget that “beauty's a flower” (I, v, 47) and that women are as roses, which die “even when they to perfection grow” (II, iv, 40). Even its songs, which dally with the innocence of love, concern themselves with the interment of dead lovers and remind us that “youth's a stuff will not endure” (II, iii, 49). The play ends with Feste's piercingly lonely and plangent song—as we leave the playhouse we walk into the world of its insistent refrain, where “the rain it raineth every day.”
The darkness of the play is not confined to these sombre references to disaster and time's ruthless passage. The action of the plot creates for the audience a constant spectacle of illusion and deception. The limitations of the characters are bodied forth most vividly in their lack of knowledge about the world and themselves. They are constantly deceived about their own identity as well as that of others. To borrow a phrase from Feste, the play gives us “Misprision in the highest degree” (I, v, 50). Shakespeare sharpens the audience's awareness of the characters' illusions by always giving it more information than the people on stage possess. In none of the other romantic comedies is the discrepancy between the Olympian awareness of the audience and the limited awareness of the characters so sustained. Bertrand Evans informs us that in no less than seven scenes in Twelfth Night, the audience holds an advantage in awareness over all who take part. He goes on to say that “In the course of the action every named person takes a turn below our vantage-point, and below the vantage-point of some other person or persons; in this play neither heroine nor clown is totally spared.” Nor, it might be added, is the audience itself totally spared. In Act II, Feste refers to what the Elizabethans called the “picture of We Three” (II, iii, 15-16), which was a picture of two asses, the looker-on becoming the third. The audience's enjoyment of a fictional representation of deluded people ironically suggests that it, too, is part of the picture—the third ass.

To catalogue all the illusions which beset the characters would require a sizeable essay in itself. But a casual sample may suggest the frequency of delusion in the play. Toby gulls Andrew into thinking he has a chance with Olivia; in a parallel action, the downstairs people memorably gull Malvolio with similar hopes for Olivia. Of course they only intensify a process of self-deception in Malvolio which is already well under way. Meanwhile, Viola deludes everyone by posing as a man named Cesario. But it is only with the appearance of Sebastian in Act III that confusion reaches its climax. Antonio is baffled by the apparent refusal of his bosom friend Sebastian to recognize him; Sebastian, in turn, is baffled by the vigor of Olivia's advances (he must have thought that Illyrian women were uncommonly brazen), and by the people who walk up and hit him for no apparent reason; Viola is deluded not only in her ridiculous fear that Aguecheek is a mean man in a duel, but she is also puzzled by Olivia's insistence that they are married and by Antonio's insistence that they are old friends; Toby and Andrew are bruised as well as baffled by the sudden show of manliness on the part of Sebastian (who they think is Cesario); and even Feste, the most distanced and objective spectator in the play, is baffled by Cesario's apparent refusal to recognize him. Feste expresses the pervasive sense of bewilderment when he remarks that “Nothing that is so is so” (IV, i, 8). For its inhabitants, the world of Illyria increasingly assumes the fierce vexation of a dream and even the terror of nightmare. As the play dances to its conclusion, characters increasingly speculate on the possibility that they have become mad. And Malvolio remains locked in his darkened room, accused of madness and demoniacal possession. Like Puck, the audience may well exclaim, “What fools these mortals be.” But there is no Puck-figure in Twelfth Night, no need for supernatural high jinks and magic potions to confuse the characters. The Illyrians are quite capable of creating their own confusion.

The ethics of Shakespeare's romantic comedies, and of Twelfth Night in particular, center on one problem: given the harshness of the world, given man's vulnerability and frailty, given his propensity for self-deception, how can he get by? How can the play resolve itself happily? One indication of Shakespeare's deliberate exploration of comic form in Twelfth Night is that he poses this question explicitly. When Viola realizes that Olivia is in love with her impersonation of a man, she soliloquizes:

Disguise, I see thou art a wickedness
Wherein the pregnant enemy does much.
How easy is it for the proper false
In women's waxen hearts to set their forms!
Alas, our frailty is the cause, not we,
For such as we are made of, such we be.
How will this fadge?

(II, ii, 26-32)
The modulation of tone in Viola's speech suggests the great range of feeling that *Twelfth Night* contains. She begins in the idiom of theology, with sombre reference to “wickedness” and “the pregnant enemy,” but her language soon descends to the reassuringly colloquial: “How will this fadge?” And notice the comic implications of the rhymed lines:

*Alas, our frailty is the cause, not we,*  
*For such as we are made of, such we be.*

Although Viola's logic scarcely would suffice in an ethical treatise, it is convincing in the same way as Falstaff's is. Since we are what we are made of, our frailty is the cause of our moral shortcomings, not ourselves. Her clear implication is that man is too frail to be punished. But her question remains: How does life fadge?

As I mentioned earlier, it is always dangerous to imply that comic characters are fully responsible for earning or creating their happiness. Luck is usually involved in bringing about the vital recognition which resolves the plot; at the end of Act V, happiness seems to come wheezing in from the wings. In *Twelfth Night* the appearance of Viola's shipwrecked twin Sebastian intensifies and then suddenly disentangles the perplexities of the plot. If Sebastian had not found a mast in the shipwreck to buoy him up, or if he and his sister had not chanced to meet in Illyria, then the major characters in the play would have remained permanently stuck in an increasingly intolerable situation.

But to say that Lady Luck presides over the resolution of comic plots is not to say that comic characters, frail as they may be, can do nothing to advance the resolution. Most emphatically, Shakespeare's comedies do not embody or advocate a philosophy of fatalism, cosmic do-nothingness. Sebastian does, after all, actively bind himself to the mast that saves him, and he does choose to visit Illyria (even though he doesn't know that his sister is there). If human resolve counted for nothing, then the comic world would become farcical or absurd, and ethical discrimination about its inhabitants would become impossible. Such is not the case in *Twelfth Night*.

As John Russell Brown has argued convincingly, the romantic comedies “do not formulate a judgement in the manner of the history-plays and early tragedies, nor in the manner of satirical comedy, but a judgement is implicit nevertheless.” What we need to discover in *Twelfth Night* is the precise relationship between the plentiful limitations of its characters and the happiness that befalls most of them at the end. What values mediate between the characters' frailty and the fadging of the plot? It may be helpful to recall a sententious couplet that Antonio delivers:

*In nature there's no blemish but the mind;*  
*None can be called deformed but the unkind.*

(II, iv, 347-48)

The word “unkind” here means both “un-natural” and “un-loving.” If, as Brown has suggested, there is an implicit judgement in *Twelfth Night*, it will take its positive force from such values as love, the heart, and nature.

My contention is that folly is the idea which resides at the center of the play's implied values and focuses them. It may seem strange to talk about folly as a positive value, since it would seem to be the opposite of wisdom, and therefore a bad thing. And, at first glance, the constant delusion which the characters suffer would seem to be their greatest limitation, the greatest barrier separating them from their happiness. But a closer look at the plot will change our negative valuation of folly. The task of a satirist like Ben Jonson is to scourge folly, but in *Twelfth Night* it becomes a great and positive, if mischievous, force. Folly bestows upon
the characters the delusions which allow them to embrace their limitations. It liberates those natural qualities
which enable them to pursue a life of fulfillment in a very harsh world. The play suggests that one can come
to terms with life only by accepting the nature of things—delusion, vulnerability, and mortality.

But if the play reveals the wisdom of a foolish acquiescence to nature's order, it unequivocally condemns
passivity. Throughout the play the positive aspect of folly is associated with the notion of spending one's
talents, of sharing one's gifts with the world. The notion of sharing talents appears often in Shakespeare, and
most notably in the early sonnets, which exhort the young man to procreate and thereby increase nature's
store.9 In the language of Sonnet #4:

Nature's bequest gives nothing but doth lend,
And, being frank, she lends to those are free.

Nature's ideology here seems distinctly socialistic—to those who share, more will be lent. Or, as a popular
collection of ethical sentences put it: “God will increase that little that thou hast, if thou purposest to giue of
that little.”10 The play's emphasis on giving is apparent in its stage-business as well as in its plot and language;
coins, purses, jewels, and rings are constantly being exchanged.

The most telling reference in the play to folly's talents is a remark by Feste: “Well, God give them reason that
have it, and those that are fools, let them use their talents” (I, v, 13-14). The implication of Feste's oblique
remark is that God may well give reason to those who have it, because no one in fact does possess it. The
category of “those that are fools” includes everyone. The fools of the world must live by using their talents.
Giving is the proper fruition of folly.

A brief and very selective glance at Erasmus' Praise of Folly may help to illuminate Shakespeare's concerns in
Twelfth Night. Erasmus' personified Folly is the self-appointed scourge of Stoical restraint, and she identifies
herself with the natural world of impulse, passion and energy. She defines herself as the principle which
makes life and its constricted possibilities not only tolerable, but even fun. “Would life without pleasure be
called life at all?” she asks.11 Constantly she reminds us of how harsh life would be without the amelioration
of folly. Through her banter and foolery runs an awareness, as in the comedies, of the sorrow and limitation to
which man is born. Unlike all the other gifts of the gods, folly is available to all (p. 135).

In the wisdom of her folly she realizes that the examined life is hardly life at all, much less worth living. For
Folly, pleasure and delusion are synonymous. She would agree with Mark Twain's exhortation: “Don't part
with your illusions. When they are gone you may still exist, but you have ceased to live.”12 Folly proceeds to
inform us, with characteristic immodesty, that she is the only begetter of all social bonds; without the illusions
which she bestows beneficially on man, everyone in his wisdom would scorn love, friendship, marriage, and
even procreation (pp. 111-13). It is folly's deluded happiness which makes fellowship and sharing possible.
She argues, in short, that all of life is nothing more than a play of folly. The world is a great stage of fools, and
folly is its producer, director, and ever-diligent prompter.

Erasmus' Folly tells us that without folly life is a sombre play, that our illusions and self-love make life
bearable, that folly ministers to our infirmity. Twelfth Night dramatizes and concretizes the Erasmian notion
that life is but a play of folly. In the microcosmic “wooden O,” the Globe Theatre, the price of a penny turns
Erasmus' metaphor into reality. In Twelfth Night Feste, the professional fool, defends the significance of
foolerly (to say nothing of his job) against the attacks of Olivia and Malvolio. It is Feste who states the
hallowed transvaluation which places Folly above Wisdom:

Wit, an't be thy will, put me into good fooling. Those wits that think they have thee do very
oft prove fools, and I that am sure I lack thee may pass for a wise man. For what says
Quinapalus? “Better a witty fool than a foolish wit.”
Shakespeare frequently uses Feste as a chorus to comment on various renderings of his theme, but to catalogue his remarks on folly is not itself enough. The notion of folly and its talents pervades the play—shaping its plot, individuating its characters, and supplying some of its dominant symbols.

The first two scenes of Twelfth Night have the impact of expanded metaphors, since their distinct environments suggest the contrasts which shape the play's values. The first scene gives us the Duke's too-famous “If music be the food of love” speech and an attendant's revealing description of Olivia's elaborate plans to “season a brother's dead love.” The second scene presents Viola's conversation with the Captain about her shipwreck and the possibility of her brother's survival, and it concludes with her plans to disguise herself and attend the Duke. The rhythm joining the scenes is a common one in Shakespeare: they move from elegant verse to expository prose, from court to country, from the artifice of fashionable poses to the elemental strife of nature. Also, the scenes contrast two quite different attitudes toward life—a prudence which is sterile, since it is isolated from nature and human community, and a folly which is fruitful, since it is open to the hazard of nature and human relationship.\textsuperscript{13}

In the first scene Duke Orsino manifests the constricting prudence of isolating oneself in a world of artifice. Associated with his need for artifice is a self-dramatizing passivity. Thus, his language alternates between magniloquent gesture (he apostrophizes four times), and languorous, cloying sweetness (his stock of adjectives seems limited to “sweet,” “rich,” and “fine”). In his sybaritic self-indulgence, he intends to bombard his sensorium, so that “surfeiting, / The appetite may sicken, and so die” (I, i, 2-3). Passivity and lassitude seem to be central ingredients in his notion of love. Images of downward motion dominate his speeches, and it soon becomes apparent that he is a connoisseur of love's dying falls. Whatever enters into the sea of his love, he tells us, “falls into abatement and low price / Even in a minute” (I, i, 13-14). As he leaves the stage, his intention is to lapse into “sweet beds of flow'rs” (I, i, 41).

Although Olivia will have nothing of the Duke, the description of her plans for mourning suggests that the two of them are kindred spirits. Like the Duke, she has adopted a role and intends to play it to the hilt. Her role also is passive and life-denying; she will savour her sorrow and use the brine of her tears to season and indeed pickle “a brother's dead love” (which is not the same as a dead brother's love). The languor of the Duke finds its counterpart in Olivia's unnatural rigidity; for seven years (no more, no less) she will impose on herself the regimented life of a cloistress and “water once a day her chamber round / With eye-offending brine” (I, i, 30-31). Doubtless, she will place saucepans in strategic places, so that her tears won't streak the furniture. Implicit in Olivia's scenario is a callow contempt for time and nature. She must learn the lesson that Benedick learns in Much Ado about Nothing; as Don Pedro says of Benedick's tidy plans: “Well, you will temporize with the hours” (I, i, 244).

The second scene of the play carries us from the sea of Orsino's hungry love and from Olivia's briny tears to the driving element that casually splits ships in two. The cloistered world of the Duke's canopied bowers and Olivia's chamber gives way to a liquid world of hazard. The sea symbolizes the relentless reality which both Orsino and Olivia have structured their lives to avoid. But their self-indulgent roles are a luxury which chance doesn't afford Viola. She must set aside her sorrow for her brother and get on with the difficult business of living. The briskness of her language stands in sharp contrast to Orsino's prolixity and suggests the pressure of the moment:

\textit{And what should I do in Illyria?}
\textit{My brother he is in Elysium.}
\textit{Perchance he is not drowned. What think you, sailors?}

(I, ii, 3-5)
Though Viola realizes that “nature with a beauteous wall / Doth oft close in pollution” (I, ii, 48-49), yet she takes the calculated risk that the Captain's mind accords with his trustworthy appearance. She must rely on other people to survive. With surprising rapidity, she formulates an ad hoc plan of action—to disguise herself and serve the Duke. Viola realizes the hazard of the future, but she still manages to commit herself resolutely to it: “What else may hap to time I will commit.” Unlike the Duke and Olivia, Viola opens herself to the processes of time and nature. Using imagery that suggests childbirth and maturation of fruit, she hopes that she might not

Till I had made mine own occasion mellow,
What my estate is.

(I, ii, 42-44)

Her final words to the Captain suggest her stance toward life: “I thank thee. Lead me on” (I, ii, 64).

As many critics have noted, the movement of Shakespearean comedy is toward community; in the final scene congestion takes on symbolic value. Twelfth Night is no exception; it opens with its central characters in isolation and it reaches its resolution when they come together. The principal human agent for creating this community is Viola. This is not to suggest, however, that she foresees the happy consequences of her actions. Until the final scene, Viola has every reason to fear that her disguise has begotten disaster. When she realizes that Olivia loves her, Viola invokes a higher power to resolve what seems a hopeless dilemma: “O Time, thou must untangle this, not I; / It is too hard a knot for me t'untie” (II, ii, 39-40). Not only does her disguise as the page Cesario lead a woman to fall in love with her, but it also prevents the man she adores from recognizing her proper sex. Yet Shakespeare also suggests that the delusions created by Viola's disguise serve a positive function, since they draw Orsino and Olivia out of themselves and into the world. Paradoxically, Viola's disguise creates a hard knot of cross-purposes which both entangles the three characters and releases them from themselves.  

Viola's effect on Olivia is immediate and shattering. Significantly, Olivia allows Viola to enter her presence, even though to do so violates the oath she has just taken, only when she learns that Viola is “Not yet old enough for a man nor young enough for a boy … 'Tis with him in standing water, between boy and man” (I, v, 150-53). Because Viola is not threateningly masculine, she is allowed to enter. When Olivia identifies herself as lady of the house (“If I do not usurp myself, I am”), Viola impresses on her the need to share her gifts:

Most certain, if you are she, you do usurp yourself; for what is yours to bestow is not yours to reserve.”

(I, v, 179-80)

And a few lines later Viola states an argument familiar from the early sonnets:

Lady, you are the cruell'st she alive
If you will lead these graces to the grave,
And leave the world no copy.

(I, v, 227-29)

Olivia responds with a playfully legalistic travesty of the notion of sharing talents:

O, sir, I will not be so hard-hearted. I will give out divers schedules of my beauty. It shall be inventoiried, and every particle and utensil labeled to my will. …
But Viola's energetic description of how she would woo Olivia, along with the force of her beauty and sententious comments, shakes Olivia to the core. After she decides to pursue Viola's love, she soliloquizes:

I do I know not what, and fear to find
Mine eye too great a flatterer for my mind.
Fate, show thy force; ourselves we do not owe.
What is decreed must be—and be this so!

Her language here is reminiscent of Viola's commitment to time and chance at the end of I, ii. Olivia realizes that her love for Viola may be misguided, and yet she commits herself to an active role in the world. Consequently, her commitment is to folly: “I do I know not what.” Viola's presence has awakened in her the crucial perception: “ourselves we do not owe.” By Act V, Olivia will be ready to love Viola's double—who can return her love. It is Olivia's folly, not a growth into self-knowledge, that leads her to Sebastian. As Sebastian memorably tells her:

So comes it, lady, you have been mistook.
But nature to her bias drew in that.

Our generous delusions are part of nature's bias—they lead us along paths we don't understand, to a joy we fear to expect.

The Duke's response to the disguised Viola is less dramatic than Olivia's; the apparent masculinity which they share confines the Duke's affection to a loving friendship. And yet, in retrospect, it seems clear that the only way that Viola possibly could have reached the Duke is indirectly, through the masculine disguise which she has assumed. Just as Viola's disguise prepares Olivia for Sebastian, so it prepares Orsino for Viola's revealed feminine self, a self which he both sees and doesn't see beneath the thin disguise. The example of Viola's dedicated friendship is the proper antidote to the Duke's conception of himself as a “high fantastical” lover, for whom giddy fancy is the badge of authenticity. For instance, Viola's description of her father's daughter, who loved a man, concealed her love, and “sat like Patience on a monument, / Smiling at grief” (II, iv, 113-14) creates a tender pathos. But it also gives the Duke an example of feminine constancy, and suggests how the refusal to love results in sepulchral rigidity. As Feste's song puts it, “In delay there lies no plenty” (II, iii, 47). In the final scene, the Duke discovers the full force of his passion for Viola only in the rich confusion surrounding Olivia's betrothal to Sebastian. The Duke realizes that, unbeknownst to himself, he cares far more about losing his page than Olivia. Just as the shipwreck becomes “a most happy wrack” (V, i, 258), so the Duke's folly carries him to his happiness. In a way that the politic Polonius couldn't begin to comprehend, it is with “assays of bias” and “by indirections” that the lovers find directions out.

If a production of Twelfth Night is to realize fully the play's concern with investing folly's talents in a world of hazard, it must carefully exploit the possibilities of gait and gesture. One of the central metaphors, both in the action and language of the play, is the journey. The willingness of certain characters to journey, to wander by indirection, suggests their openness to life. The play's cloistered figures, on the other hand, employ messengers to avoid undertaking journeys themselves. Until the final scene, Duke Orsino is a virtual recluse. He is, as he says, “best / When least in company” (I, iv, 36-37), and he communicates with the world through messengers—first Valentine, then Viola. He never leaves the refuge of his palace until the final scene when his very appearance at Olivia's house suggests that he is a changed man. At the beginning of the play Olivia too relies upon messengers for her commerce with the world. She dispatches Maria and Malvolio to restrain
the antics of Toby and Andrew, and she sends Malvolio after Viola to present her with a ring. The character who perambulates most in the play is Viola; her constant motion suggests her commitments. And, in the person of Feste, “Foolery … does walk about the orb like the sun” (III, i, 37).

The metaphor of the voyage is perhaps most significant in the subplot concerning the friendship of Sebastian and Antonio. The major function of this brief subplot is to infuse the reality principle into the play, to stress the risk involved in loving. Antonio has befriended the shipwrecked Sebastian, who insists that he must leave his host and search for his sister. Significantly, Sebastian says that “My determinate voyage is mere extravagancy” (II, i, 9-10), which suggests that he (and, by implication, all men) is a wanderer in a world of chance. What he doesn’t know is that, hopeless as they may seem, “Journeys end in lovers meeting” (II, iii, 40).

Antonio resolves at once to follow Sebastian to Orsino’s court, even though he knows the Illyrians have a price on his head for his past military exploits. His brief soliloquy before he exits reveals his commitment:

I have many enemies in Orsino's court,  
Else would I very shortly see thee there.  
But come what may, I do adore thee so  
That danger shall seem sport, and I will go.  

(II, i, 40-43)

Antonio’s language and situation here recall Viola in the first act (“What else may hap, to time I will commit”), and Olivia’s closing words in the previous scene (“I do I know not what …”). And, in another symbolic action, when he catches up with Sebastian in Illyria, Antonio insists that his friend take his purse. Antonio stands in the play as a paradigm for giving “without retention or restraint” (V, i, 75). But the danger is not sport, and the giving is fraught with hazard. When Antonio comes to the aid of Viola (who he thinks is Sebastian) in her quarrel with Andrew, he is immediately recognized by the law and clapped into irons. Like another Antonio who hazards himself to help a friend, he doesn’t miss death by far. He is as foolish as everyone else.

The theme of sharing one's talents takes a hilariously comic direction in the person of Sir Andrew Aguecheck. In the play's cast of fools, Andrew is the thing itself, and he admirably discharges the part of the natural fool, the moron. Nature has been uncommonly parsimonious in her gifts to Andrew; he has neither good looks, not wit, nor skills to recommend him. He takes upon himself the demanding role of virile suitor, and, as his surname suggests, he is singularly ill-equipped for it. But nature has compensated for her niggardliness by bestowing upon Andrew a generous capacity for delusion. In the words of Erasmus' Folly, where nature “has kept back some of her gifts, she usually adds a little more Self-Love.” Andrew has the joyful obliviousness of a small boy admitted to his big brother's circle of friends—the mockery of the big people is forgotten in the ecstasy of being part of the gang. Life presents itself to Andrew’s glazed eyes as glorious spectacle; as he fatuously proclaims: “I delight in masques and revels sometimes altogether” (I, iii, 101-102). And the sum of his consciousness seems monopolized by his desperate attempt to remember the big words which his friends use.

Dr. Johnson informs us, with customary forthrightness, that Andrew's "character is, in a great measure, that of natural fatuity, and is therefore not the proper prey of a satirist." Johnson here is not giving folly its due; not only is Andrew not fair game for the predatory satirist, but he is a positive figure in the play. Fool that he is, he is a totally social creature and draws his sustenance from good fellowship. Whatever gifts he may have he is willing to share. It is not merely in regard to his ducats that “He's a very fool and a prodigal” (I, iii, 22). When he tells Toby of his skill at cutting capers, Toby exhorts him to share his great gifts with the world:
Wherefore are these things hid? Wherefore have these gifts a curtain before ’em? … Why dost thou not go to church in a galliard and come home in a coranto? … Is it a world to hide virtues in?

(I, iii, 112-18)

(Toby's words are of course an implicit comment on the self-imposed isolation of Olivia and Orsino, which we have seen two scenes earlier.) As always, Andrew takes Toby at his word, and the scene ends with one of the great moments of the play—Andrew vigorously executing spavined capers all over the stage.

Andrew is one of many foils (and fools) which the play sets up in opposition to Malvolio. The discrepancy between the harshness of Malvolio's fate and what the play awards to the other characters is striking, and it compels us to consider whether he has indeed “been most notoriously abused” (V, i, 368). The baffling of Malvolio, like the rejection of Falstaff and the punishment of Shylock, has occasioned so much critical debate that we should be prepared to accept the complex and perhaps ambivalent responses which it evokes. Only the most rigid of positivists would argue that there is a single “right” way to respond to Malvolio at the end of the play. But in the context of the play's examination of folly and its talents, Malvolio's function is clear: he serves as the antitype of the ideas I have been discussing. In terms of the biblical parable, he is an anomaly, a steward who refuses to share his master's talents.

More than anyone else in the play, Malvolio is associated with law. We learn, for instance, that the kind Captain who befriended Viola has been imprisoned “at Malvolio's suit” (V, i, 266-69); the closing lines of the play recall this legal action, perhaps to temper the sympathy the audience may feel at Malvolio's exit. Also, he is the zealous enforcer of law and order in Olivia's household. Ironically his insistence on order seems itself disorderly, since Twelfth Night festivities are properly a time for licensed disorder. His concern for order seems hypocritical, since his own secret desire is to violate the social order by marrying Olivia and becoming owner rather than steward. One recalls Ophelia crying out in her madness: “It is the false steward, that stole his master's daughter” (Ham, IV, v, 171-72).

Malvolio remains isolated throughout the play. His dismissal of the plotters is telling: “Go off; I discard you. Let me enjoy my private” (III, iv, 83-84). As his name suggests, he is the bad appetite, the inward-turning love; Olivia's incisive rebuke points directly to his shortcomings:

O, you are sick of self-love, Malvolio, and taste with a distempered appetite. To be generous, guiltless, and of free disposition, is to take those things for bird-bolts that you deem cannon bullets.

(I, v, 85-88)

Olivia's criticism of Malvolio here is occasioned by the anger which he has shown to Feste, and this antipathy to foolery manifests his lack of fellow-feeling. Nowhere is his lack of generosity more striking than in the way he relishes the time when “the pangs of death” will shake Feste out of his folly (I, v, 70).

Although Malvolio of course does not know it, he is the greatest fool of all in the play.17 As Viola tells us, “wise men, folly-fall'n, quite taint their wit” (III, i, 66). His delusion that Olivia loves him is monstrous, the offspring of a self-love that is more monstrous yet. The forged letter deceives him with ridiculous ease (an effect magnified by the voluble comments of the conspirators hidden in the box-tree), and he reveals his weakness when he says of the cryptic M.O.A.I.: “If I could make that resemble something in me” (II, v, 112-13). He defines the world in terms of himself, and his folly is totally unredeemed by generous impulse. His intention is to read “politic authors” (II, v, 148).
The punishment which Toby and Maria devise for him (to lock him up in a dark room and convince him that he is possessed by a devil) fashions multiple ironies. First, Malvolio's incarceration recalls his imprisonment of the Captain as well as the virtual isolation he has imposed on himself throughout the play. Also, the darkness of the room suggests his deluded mind; at one point he cries out “this house is dark as ignorance” (IV, ii, 45). And the business about demoniacal possession is also appropriate, since he has been possessed with self-love and since acquiring possessions has been a major aim of his life.  

Malvolio is not the only character to feel the sting of poetic justice for the manipulation of others. Andrew's plans to marry Olivia come to nothing but an empty purse, and his challenge to Viola bloodies his own coxcomb. But even with these disappointments, Andrew's folly remains invincible, his lack of self-knowledge intact. The play metes out a harsher, three-fold punishment on Toby. For his attempt to extend Carnival indefinitely, he is denied the services of Dick Surgeon, who is dead drunk at eight in the morning (V, i, 190-91). For his bullying of Viola, he has his pate cracked, courtesy of Sebastian. And, perhaps most painfully of all, he pays for his exploitation of Andrew when his erstwhile gull humiliates him by offering to help him dress his wounds (V, i, 196-99). The spirit of folly, even though it descends in the play to “sportful malice” (V, i, 355), prevents the calculation of Toby and Andrew from reaching the invidious form it assumes in Malvolio.

At the end of the play, we may feel that Viola, Sebastian, Olivia, and Orsino have had happiness thrust upon them. They have done they knew not what and discovered their hearts' joy. Their folly has allowed nature to draw them, almost in spite of themselves, to her kind bias. The conclusion is especially poignant because of its tentativeness. The play has given full exposure to the hazard of folly, and Feste's concluding song (another stanza of which the Fool sings in King Lear) reminds us that, outside the artifice of the play, the consequences of folly can be hangovers, marital strife, and beggary. The conclusion of the play becomes even more poignant when seen in the context of Shakespeare's career. In the plays which follow Twelfth Night, comedies and romances as well as tragedies, Shakespeare will not allow his central characters to escape the heavy burden of self-knowledge.

Notes

1. All Quotations of Shakespeare are from the revised Pelican Complete Works, ed. Alfred Harbage (Baltimore, 1969).
9. “There is no idea to which Shakespeare returns more often than the doctrine taught by the parable of the talents.” Edward Hubler, The Sense of Shakespeare's Sonnets (Princeton, 1952), p. 95. John Russell Brown terms this idea in the comedies the theme of “Love's Wealth” (op. cit.).
12. The Portable Mark Twain, p. 566.
13. For the relationship between hazard and giving in *The Merchant of Venice*, see Sylvan Barnet, “Prodigality and Time in *The Merchant of Venice.*** PMLA, 87 (1972), 26-30.
17. In several places the play suggests paradoxically that the characters who do not recognize folly are the true fools; cf. Feste’s catechism of Olivia in I, v.
18. For the play on the demoniacal and acquisitive senses of “possession,” see *RII* [*Richard III*], II, i, 107-08. Also, Malvolio’s cry that “They have here propertied me” (IV, ii, 89) ironically reminds us of his acquisitiveness.

**Criticism: Themes: Thad Jenkins Logan (essay date spring 1982)**

*[In the following essay, Logan claims that Twelfth Night—despite its ostensible depiction of a festive and happy resolution—contains glimpses of the darker side of human desire.]*

In a recent article, Richard A. Levin has remarked on the existence of “two alternate approaches to Shakespearean comedy”: the one, exemplified by the work of C. L. Barber and Northrop Frye, focuses on the comedies as celebrations of social order, in which the protagonists are engaged in growth and self-discovery; the other, practiced by W. H. Auden, Harold C. Goddard, and Jan Kott, finds in the plays a “serious treatment of psychological states” and a “negative comment about social conditions.” Levin attributes this bifurcation in critical response to the fact that our response to the plays is fundamentally complex, and it is the complexity of our response to *Twelfth Night* that I mean to discuss here. I propose to consider the play as a Saturnalian comedy which evokes in its audience a recognition of the limits of festivity by abolishing such limits in the stage-world of Illyria. While my thesis may not please those who view *Twelfth Night* as a comedy of romantic education and moral redemption, I am in fact attempting to demonstrate that the divergent approaches cited by Levin may (in some sense) be reconciled if we posit that the locus of growth and self-discovery is the audience.

In *Twelfth Night* Shakespeare presents us with a world given over to pleasure, intoxication, and freedom. Any accurate interpretation must acknowledge the thematic importance of festivity, and critics like Barber, Leslie Hotson, L. G. Salingar, and John Hollander have provided valuable insights in this respect. Yet none of these critics has dealt quite adequately with the particular nature of festivity in this play, and my concentration on the dark side of the carnival world of *Twelfth Night* should be viewed as a supplement to their interpretations. It is clear that festive experience permits of distinctions: a New Year’s Eve party, a Christmas dinner, and a wedding are all festive occasions, but constitute different experiences. Similarly, from a point of view of structure, the formal features which lead Barber to characterize a comedy as “festive” may be discovered in many plays, but crucial differences among the plays exist within that framework. The experience of *Twelfth Night* is very different from that of *As You Like It* or *Midsummer Night's Dream*, plays in which a critic may find similar dramatic elements and a number of formal analogues; I conceive the identifying, distinctive experience of *Twelfth Night* to be a function of the nature of festivity in that play. As its title suggests, the world of this play is a night world, and festivity here has lost its innocence.

Leslie Hotson has noted that the subtitle “what you will” recalls the motto of the Abbaye de Thélème: “fay ce que vouldras.” The phrase suggests that a fundamental concern of the play is what one critic has called
“multiple pleasures and wills to pleasure.” Jan Kott, in a brilliant though idiosyncratic assessment of *Twelfth Night*, asserts that sex is the theme of the play; this is accurate enough but it is incomplete, since the secondary plot is highly significant in terms of stage time, and that plot is not primarily centered on sexuality, but on a set of drives that have to do with food, drink, song, dance, and fun. “Revelry” is probably as good a term as any to describe these particular sorts of pleasure, and I will use it in this essay to refer specifically to them. The relationship between the two plots is, in part, dependent on the fact that revelry and eroticism are closely allied; they are the two faces of Saturnalian experience. *Twelfth Night*, then, is an anatomy of festivity which focuses in the main plot on sexuality and in the sub-plot on revelry; the subtitle implies that these are what we, the audience, want.

It is crucial to recognize that the play makes an appeal to our own drives toward pleasure, toward liberation from the restraints of ordinary life. This is not, finally, an immoral play, but its authentic morality can only be discovered if we are willing to make a descent into the night world: its meaning remains opaque if we insist on seeing at every moment in every play a conservative, Apollonian Shakespeare. (We will do well to remember that Dionysus is the presiding genius of the theater.) *Twelfth Night* is not an enticement to licentious behavior, but it is an invitation to participate imaginatively in a Saturnalian feast.

A pervasive atmosphere of liberty and license is established by the opening scenes. The first thing we recognize about Illyria is that it is a world of privilege and leisure in which the aristocracy are at play. Goddard, whose vision of the play is in many ways similar to my own, calls Illyria “a counterfeit Elysium” (p. 302), and characterizes its citizens as parasitical pleasure-seekers, partly on the grounds that any aristocratic society is founded on “the unrecognized labors of others” (p. 303). Certainly, there are only two characters in the play who seem to have any work to do: they are Feste and Malvolio, whose positions in the social world will be discussed at greater length; for most of the characters, leisure is a way of life. There are no rude mechanicals here. Sir Toby, Sir Andrew, and Maria are clearly not members of the lower class, although the conventions of comedy and Shakespeare's usual practices have sometimes led directors to make that mistake about them. That the characters of the sub-plot are themselves members of the aristocracy is a significant feature of this play. Olivia and Orsino are at the very top of the social hierarchy; they are young, rich, elegant, and fashionable. The captain who rescues Viola suggests something of their éclat in his initial description of Orsino:

> And then 'twas fresh in murmur (as you know,  
> What great ones do, the less will prattle of)  
> That he did seek the love of fair Olivia.

(I.ii.32-34)

Even the shipwrecked twins are well-off; Sebastian is amply provided for by the doting Antonio upon his arrival in Illyria, and Viola has somehow emerged from the sea with enough gold to pay the captain “bounteously.”

The wealth and social position of the characters are important in several ways and should be established clearly in production; besides setting the action in a framework of aristocratic values, pleasures, and mores, they contribute a great deal to a sense of liberation and license. Characters are, in part, free to pursue “what they will” because they can afford to do so. The financial conditions upon which Illyrian revelry depends are made explicit by Sir Toby: “Let's to bed, knight. Thou hadst need send for more money” (II.iii.182 and 183). Along with economic freedom, the social status of the main characters allows them to pursue pleasure according to their fancy. Orsino is attended by courtiers who provide him with music, and presumably with “sweet beds of flow'rs,” on command; Olivia speaks to Cesario / Sebastian from a position of power, arranging rendezvous as she chooses. Her disorderly kinsman and his guest may be threatened by her displeasure, but they are apparently in no danger from any sort of civil authority; in the brawl that follows the...
practical joke played on Viola and Sir Andrew, it is only the outsider, Antonio, who is arrested.

Political power is, in fact, vested in Orsino; as the Duke of Illyria, he might be expected to function as the parent-figure in Northrop Frye's model of the structure of comedy. From his first speech, however, it becomes clear that Orsino is not going to embody principles of law, order, and restraint in this comic world. In fact, there are no parents at all in Illyria, as Joseph Summers has cogently noted. Here, the social order is in the hands of youth, and wealth and power are at the service of youth's pursuit of pleasure.

It is Malvolio, of course, who fills the dramatic functions of the senex and the blocking figure, but what is curious about Malvolio in this respect is that he is a servant of Olivia. In a comic world noticeably lacking parents, Malvolio becomes a parent figure insofar as he performs some characteristic parental roles: it is he who tells the revellers to be quiet and go to bed. Yet Malvolio is a remarkably ineffective blocking figure; he shows himself powerless to control Sir Toby and Maria, much less to inhibit the actions of the lovers. The figure who stands for law and order in this play is not only the butt of practical jokes, but is, in the structure of the play's society, only an employee. As such, he has no real authority: his "parenting" may be made use of by Olivia when it is convenient, and dispensed with when it is not. No one is morally or legally compelled to obey Malvolio; certainly no one is inclined to do so, nor is anyone inclined to share his stolid, earnest, workaday consciousness.

In the course of the play, the sort of consciousness that Malvolio embodies is literally locked away in the dark. His imprisonment is a striking emblem of the psychic reversal that underlies Saturnalian festivity: impulses that are normally repressed are liberated, while the controls of the super-ego are temporarily held in check. What gives Illyria its distinctive atmosphere is our sense that in this world such a reversal is a way of life. For most of the characters, everyday is holiday. Festivity is the norm here, and misrule is the order of the night.

The audience of Twelfth Night participates imaginatively in an experience of psychic liberation, but does not share the "madness" of the Illyrians; in Freudian terms, our ego and super-ego continue to function normally. There are modes of awareness available to us that are not available to the characters (we hold, for example, the keys to all riddles of identity in this play), and we retain an integrity of consciousness that the characters do not. Freud, of course, conceived of art as a transformation of unconscious fantasy material into a publicly acceptable form; while a Freudian theory of art tends to be limited and reductive, it provides a useful model for an audience's experience of Twelfth Night. Fantasies of love and anarchy, given free rein in Illyria, are presented on the stage, made present for our contemplation as well as our imaginative participation. It is as though we are allowed to be at once asleep and awake; our own fantasies, "what we will," are newly discovered to us. The sorts of things we learn about the night-world of the psyche are profoundly disturbing. Festivity turns out to be fraught with dangers and complications: Eros mocks the individual; Dionysis is a god of pain as well as a god of pleasure.

According to Leslie Hotson, for Shakespeare and his original audience "what the Dalmatian-Croatian Illyria brought to mind was thoughts of wild riot and drunkenness." In the sub-plot of Twelfth Night, as in the Bacchic rites, what riot and drunkenness lead to are violence and cruelty. Among all Shakespeare's comedies, it is only in Twelfth Night and As You Like It that there is literally blood on the stage. It is characteristic of the violence in the former play to be artificial in the sense of being invented by the characters themselves rather than necessitated by the movement of the plot or brought in from outside the comic world by a villain. In As You Like It, for instance, violence is created by the wicked Duke Frederick or by the encounter of man and nature. Because the violence of Twelfth Night, at least that which we see on the stage, is directly or indirectly effected by an appetite for diversion, there is always an element of superfluity about it that is curiously disturbing; it is like the underside of play. Violence in this play is optional, chosen, "what we will."
Freud has taught us that cruelty is the genesis of practical jokes. Whether or not Malvolio deserves his treatment at the hands of Maria, it seems to me that her sadistic impulses towards him are obvious. Once he has been gulled into smiles and yellow stockings, her response to him is “I can hardly forbear hurling things at him” (III.ii.81). Her “sportful malice” creates a web of illusion that is, up to a point, very funny indeed. Yet from the moment Malvolio cries out “they have laid me here in hideous darkness” (IV.ii.29 and 30), he begins to claim a share of the audience's sympathy. His plight is too close to our own nightmare fears, his language too evocative, for us to feel quite comfortable laughing at him. The feeling that the joke has gone too far is voiced by Sir Toby: “I would we were well rid of this knavery” (IV.ii. 67-68). The game threatens to come real: “We shall make him mad indeed,” objects Fabian, to which Maria responds, “The house will be the quieter” (III.iv.133-34). She has, she says, “dogg'd him like his murtherer” (III.ii.76-77), and she is in earnest in her perpetration of psychic violence. That Maria bears the name of the Virgin is another example of the reversal characteristic of Saturnalian festivity.

Once Malvolio has fallen prey to the machinations of the revellers and to his own fantasies, Sir Toby's idea of a good time is to set Cesario and Sir Andrew at one another. He does not, of course, expect blood to be spilled—certainly not his own—but he has not reckoned with encountering the energies of Sebastian. Energy is precisely what he does encounter, however, and it leaves him and his companion broken and bloody. The play discovers to us the fact that festive revelry is likely to unleash psychic forces that are not easily controlled. In the metaphorical language of stage action, the wounded revellers function both in terms of myth and in terms of quotidian experience: in one sense, they are suffering the predictable consequences of a drunken brawl; in another, they remind us that the rites of Bacchus culminate in bloodshed.

There is within the play world one character who provides an ironic commentary on revelry, who seems to know that the pursuit of pleasure can be destructive, and who leads the audience toward a recognition of the emptiness of festive excess. Paradoxically, this is Feste the jester, whose name and office closely associate him with the festive experience. Festivity, as I have suggested, is the conceptual and experiential link between the sub-plot and the main plot; similarly, Feste acts in the play as a link between different sets of characters, moving freely from one group to another, like the spirit of festivity incarnate in the world of Illyria. But oddly, festivity itself, as incarnate in Feste, seems to participate in the principle of reversal characteristic of the play, and hover on the verge of becoming its opposite.

As Feste moves through the world of Illyria, he challenges our assumptions about festivity and foolery; he suggests not only that the fool is the only sane person in this world, but also that festivity is not as satisfying an experience as we might imagine. All three of his songs direct our attention to aspects of experience we might prefer to forget: death, the swift passage of time, and the fact that, on the whole, life is likely to bring us more pain than pleasure. Feste does not often amuse us, or the other characters; we do not often laugh with him—he does not give us occasion to do so. He seems to be, on the whole, rather an unhappy fellow. He is first discovered to us as an employee who may be dismissed; like Malvolio, Feste is a professional. Festivity is work for him, and it is evidently work which has become tiresome. He appears on stage as though he is returning from a long absence; his first words are “Let her hang me!” in response to Maria's scolding that his absence has displeased Olivia. It is easy to imagine Feste played as though he were disillusioned, cynical, and bored. Olivia herself calls him “a dry fool,” says he grows dishonest, and tells him “your fooling grows old, and people dislike it” (I.v.110). Feste is distanced from the other inhabitants of Illyria because he is immune to the lures of drink, love, fantasy, and the distortions they create; he seems to have known these things and come out the other side. The festive experience is his trade; it holds no mysteries for him, and no delights.

Feste and Malvolio are, as we might expect, antagonists. They quarrel early in the play, and in the last scene Feste recalls that quarrel, taking special pleasure in Malvolio's humiliation and the part he has played in it. There seems to be a good deal of personal rancor in his “And thus the whirligig of time brings in his revenges” (V.i.376, 377). The experience of dislike is not a common one in Shakespeare's comedies, and its appearance here is disturbing. Feste also does not like Viola, who makes a serious mistake about his nature; “I
warrant thou art a merry fellow, and car'st for nothing.” His response is a cold one: “Not so, sir, I do care for something; but in my conscience, sir, I do not care for you. If that be to care for nothing, sir, I would it would make you invisible” (III.i.26-30). The straightforward statement of dislike, of a motiveless personal hostility, sounds a new note in the comic world; it is, of course, Feste who at the end of the play will lead us out of that world.

There is a similar moment of “dis-integration” when Sir Toby reveals his true feelings about Sir Andrew: “Will you help?—an ass-head and a coxcomb and a knave, a thin-fac’d knave, a gull!” (V.i.206-207). There is never much sense of a human community established in Twelfth Night. Friendship is not a significant structural feature of the main plot, as it is in Midsummer Night's Dream and As You Like It. The revellers’ fellowship is broken by the end of the play, and they do not participate in the happy ending. We are, admittedly, told that Sir Toby has married Maria, but we do not see them together on stage at the end.

Antonio, so far as we can tell from the script, is never released from arrest, and Malvolio leaves the stage in anger. Critical notions that the end of the play is a vision of harmony and communal integration seem to me totally unjustified. A social community based on charitable love is never created in Twelfth Night; here, erotic love does not become a figure for charity, and marriage does not symbolize a universal harmony.

“What is love?” asks Feste. The conclusions we are led toward by the action of Twelfth Night are not, on the whole, happy ones. Sexuality in Illyria is mysterious and illusive. “What are we? What would we?” are questions the play sets for its audience. In Feste's lyric, love is the immediate gratification of desire: “Then come kiss me sweet and twenty.” The play, however, begins with a stalemate: desire is frustrated, and fantasies conflict. Orsino wants Olivia, Olivia “will admit no kind of suit.” It is the characteristic situation of courtly love; the roles Olivia and Orsino choose to play are familiar ones. In the course of the play, Shakespeare leads us from conventional modalities of love to a discovery of other erotic truths. This discovery is effected by the relationship of the four lovers as it is played out in the stage-world.

Part of the extraordinary appeal of Viola and Sebastian (and they have been almost as attractive to critics as to the characters in the play) comes from their air of innocence. Both Olivia and Orsino explicitly use the word “youth” on almost every occasion when they speak to or about Cesario. The twins bring a special vernal quality into the play; it is their appearance that breaks the stalemate established in the first scene. They are, in a sense, the green world. A significant number of critics assume that they teach Olivia and Orsino the meaning of love, and redeem the world into which they enter. I believe that such an interpretation does not sufficiently acknowledge our experience of the erotic aspects of the play. It is important, first of all, to notice that both Viola and Sebastian are androgynous.

Throughout the play we are compelled to pay attention to Viola's shifting sexual identity. We see her first as a girl, and watch her make decisions about how to present herself to the world; the idea of disguise thus becomes prominent, and entails the awareness that we ordinarily determine gender by dress, by appearance. The possibility of disguise suggests that there is something arbitrary about identity, and a disguise that involves a change of gender similarly suggests that our apprehension of sexual identity is mutable and susceptible to illusion. After her first scene, Viola never again appears to us as anything but a boy; unlike Rosalind, she does not re-assume her “woman's weeds” at the end of the play. A number of lines in the play draw attention to her disguise. The most notable is Orsino's description:

Diana's lip
Is not more smooth and rubious; thy small pipe
Is as the maiden's organ, shrill and sound,
And all is semblative a woman's part.

(Liv.31-34)
A modern audience perceives this as a moment in which Orsino is close to discovering the “truth” about Cesario; Shakespeare, however, must have written the lines assuming that Orsino would deliver them to a boy disguised as a girl disguised as a boy. Viola, in fact, seems to be both a boy and a girl, and is romantically involved with both a man and a woman.

Sebastian also combines characteristics of both genders, Although I have remarked on his energy, Sebastian says of himself (on parting with Antonio), “I am yet so near the manners of my mother, that upon the least occasion more mine eyes will tell tales of me” (II.i.40-42). In relation to both Antonio and Olivia, Sebastian takes a passive, classically feminine role; he enjoys their attentions, and allows them to present him with lavish gifts. Now in one sense Antonio is a nurturing parent-figure, and again the principle of reversal is operative; the parent is subservient to the child: “If you will not murther me for my love,” cries Antonio, “let me be your servant” (II.i.35-36). Antonio not only speaks to Sebastian like a doting parent, however, but also like a lover. Against Sebastian's wishes, he has followed him to Illyria:

I could not stay behind you. My desire
(More sharp than filed steel) did spur me forth,
And not all love to see you (though so much
As might have drawn one to a longer voyage)
But jealousy what might befall your travel.

(III.iii.4-8)

Like Viola, Sebastian is involved in erotic relationships with both a man and a woman.

The twins' androgyny may be, as some critics have suggested, related to their youth and innocence, but it also makes any romantic relationship into which they enter suspect. As soon as Viola/Cesario becomes an object of desire, we are drawn into the night world. Insofar as Viola is a girl, her encounters with Olivia inevitably suggest lesbianism; insofar as Cesario is a boy, all his relations with Orsino suggest homosexuality. Barber, in attempting to deal with this issue, assures us that “with sexual as with other relations, it is when the normal is secure that playful aberration is benign.” Undoubtedly, but what sexual relation can we perceive as normal in Illyria?

What we see on stage in the course of the play is a delirious erotic chase; Viola pursues Orsino who pursues Olivia who pursues both Viola and Sebastian, who is pursued by Antonio. Salingar has noted that “the main action of Twelfth Night, then, is planned with a suggestive likeness to a revel.” Indeed. And the sort of revel it is most like is an orgy. Ordinarily, sexual experience is private, and involves two partners. In orgiastic experience, the number of possible sexual partners is multiplied, and distinctions of gender become less important. On the stage, we see Sebastian erotically linked with Antonio and Olivia, Orsino with Cesario and Olivia, Viola with Orsino and Olivia, Olivia with Viola and Sebastian. For the spectators of this “whirligig,” and for the characters caught up in it, the complexities of eroticism in Illyria are dizzying.

There never is, needless to say, a real orgy; the playwright is in control of the revels, after all, and the comedy ends in marriage; sexual energy is channelled into appropriate social institutions. In Barber's words, “delusions and misapprehensions are resolved by the finding of objects appropriate to passions.” Well, yes. Orsino marries Cesario, who loves him, and Olivia marries a man. But by this time passions have so slipped their moorings in terms of objects of desire (who, for example, does Olivia love?) that this finding of objects appropriate to passions seems rather like a game of musical chairs. My point is that the marriages at the end of Twelfth Night do not convince us that sexuality is ever ordered and controlled with regard to the individual in society.

In the final scene Olivia and Orsino claim their partners. There is no doubt, from an audience's perspective, who is in control here: Olivia and Orsino are older and they possess social status that the twins do not; they
further control the scene in the special theatrical sense of having most of the lines. Olivia has already, by the
last scene, engineered a marriage with the complaisant Sebastian. Having effect ed her own wedding by sheer
force of will, it is Olivia who moves at the end of the play to arrange the betrothal of Viola and Orsino:

My Lord, so please you, these things further thought on,
To think me well a sister as a wife,
One day shall crown th' alliance on't, so please you,
Here at my house and at my proper cost.

(V.i.316-19)

Orsino embraces her offer, and takes Viola's hand. It is important to remember that if we saw this scene in a
theater, we would see him take Cesario's hand; the actor is still dressed as a boy, as he is some moments later
when Orsino leads him from the stage.

Throughout the play, Olivia and Orsino are self-absorbed, self-willed and self-indulgent creatures: there is no
evidence that they change significantly as a result of their encounters with the twins. Orsino's last words,
like his first, are about himself: “But when in other habits you are seen, / Orsino's mistress, and his fancy's
queen” (V.i.387-88). He is still speaking of “fancy.” Orsino's anagnorisis seems to involve only the
recognition that if he cannot have Olivia he may as well take Cesario: “I shall have share in this most happy
wrack” (V.i.266). Similarly, there is no reason for an audience to believe that Olivia has made meaningful
discoveries about the nature of love. If she was headstrong and reckless in loving Cesario, it is hard to see her
as docile and prudent in her relations with Sebastian. At the end of the play, as at the beginning, Olivia is
doing precisely what she wants to do.

While Olivia and Orsino have not really learned anything about love during the play, we in the audience have.
As I have suggested earlier, when external obstacles to the pursuit of love are removed, as they are in Illyria, it
is the nature of passion itself that lovers must contend with. “Bright things come to confusion” readily enough
in our world without the interference of blocking figures. Love, first of all, can be unrequited. It is, horribly
enough, possible to love someone who—for no good reason—just does not return that love. Olivia makes it
perfectly clear:

I cannot love him,
Yet I suppose him virtuous, know him noble,
Of great estate, of fresh and stainless youth;
In voices well divulg'd, free, learn'd, and valiant,
And in dimension, and the shape of nature,
A gracious person. But yet I cannot love him.

(I.v.257-62)

Orsino responds, “I cannot be so answer'd,” and continues to long for what he cannot have in a particularly
elegant, “poetical” fashion. Olivia, faced with rejection by Cesario, takes a more active approach; her
“headstrong potent fault” finds expression in direct, aggressive confrontation with Cesario. It is Viola whose
response to loving without requital has become best known:

She never told her love,
But let concealement like a worm i' the bud
Feed on her damask cheek; she pin'd in thought,
And with a green and yellow melancholy
She sate like Patience on a monument,
Smiling at grief.

(II.iv.110-15)
It has been argued that this is not really an accurate description of Viola; perhaps it is exaggerated, but certainly Viola's reaction to loving one who loves another is of this same kind; she waits for “Time” to resolve a painful situation made more painful by her concealed identity. It seems to me very peculiar to regard this as a norm or an ideal, as some critics suggest.\textsuperscript{23}

At last, of course, Viola has her reward; Orsino's love for Olivia, which could “give no place, bide no denay,” suddenly turns to her. That love can so turn is another of its characteristics that \textit{Twelfth Night} discovers to us; again, it is an old truth. Here, in a comic structure, love's capriciousness works toward a comic resolution of the plot. Orsino can, after all, love Viola; Olivia can just as well marry Sebastian as Cesario. Yet Dr. Johnson's objection to Olivia's marriage is, as one might expect, lucid and to the point.\textsuperscript{24} Only in myth and ritual are twins the same person, and while the stage world is, in part, a mythic realm, theater—and Shakespeare's theater in particular—is closely bound to the empirical, naturalistic world the audience inhabits. In that frame of reference, Olivia abandons her vow of chastity to pursue the first new man she meets, marries his (her) twin brother by mistake, and seems willing to transfer her affections to a man she does not know because he looks like the one she fell in love with.

The crucial point is this: at the end of the play we perceive that love really has little or nothing to do with personality. It is, as Kott has said of love in \textit{As You Like It}, an electric current that passes through the bodies of men and women, boys and girls.\textsuperscript{25} Passion violates identity. That this is true in terms of the individual's consciousness is a truism. “Ourselves we do not owe,” cries Olivia, succumbing to her feelings for Cesario. The action of \textit{Twelfth Night} suggests that it is not only the personality of the lover that is disrupted by passion: it is personality itself, the whole concept of unique, distinct identity. Cesario, the beloved, is both Viola and Sebastian; it really doesn't matter. Olivia and Viola are ultimately as interchangeable as their names suggest. As in Spenser's Garden of Adonis, forms change, but Form remains; here, however, the “Form” is not a structure or a pattern, but energy, energy which propels individuals, sometimes against their will, toward others who may or may not be so moved. Such, it seems to me, is love in \textit{Twelfth Night}.

Shakespeare has made similar suggestions about the nature of love in \textit{As You Like It} and \textit{Midsummer Night's Dream}, plays which also deal with psychic liberation; yet these plays do not lead us to a dark vision of the psyche. Nor do they have the melancholy tone of \textit{Twelfth Night}; the language of this comedy is unusual in being not bawdy but grim. There are remarkably few ribald puns in \textit{Twelfth Night}; by my count, there are twenty-nine references to madness in the play, twenty-two references to disease, twenty-five to devilry, and thirty-seven to destruction and death. The play's somber language would seem to be at odds with its festive structure; in my view, the structure and language are particularly compatible given the nature of festivity in \textit{Twelfth Night}.

One difference between Illyria and the Wood of Athens is that in the wood, powerful and ultimately benevolent beings exist to set things right, beings who are intimately allied with, indeed embodiments of, the natural world. Illyria is a city, not a forest. In \textit{Twelfth Night}, unlike \textit{As You Like It} and \textit{Midsummer Night's Dream}, festivity is divorced from pastoral, and this is crucially important to our experience of the play, since it means that sexuality is not perceived in relation to nature.

The concept of nature which the Renaissance inherited from the Middle Ages made a distinction between material phenomena (natura naturata) and an organizing principle (natura naturans); the latter was conceived as a structuring energy which, under Divine Providence, brought the physical phenomena into existence and patterned their being. As a manifestation of natura naturans, sexuality may wreak havoc in individual lives, but pursues its own ends of fertility and generation.\textsuperscript{26} Thus, as in \textit{Midsummer Night's Dream}, a loss of identity can result from being subsumed in forces greater than the conscious self; personality may be blurred or erased by these forces, but finally they are beneficent in that they drive towards the preservation of life. The multiple marriages at the end of \textit{As You Like It} provoke even from Jacques the comment (the realization), “these couples are coming to the ark.” But in \textit{Twelfth Night}, the absence of pastoral distances festivity from fertility,
just as the absence of bawdry distances sexuality from a simple, homely pleasure that all humans share with the beasts.\textsuperscript{27} Illyria is beautiful, aristocratic, and sterile.

Festivity in \textit{Twelfth Night} is divorced not only from nature, but, as I have indicated, from occasion. It is not a temporary release from social restraints but a permanent condition. The Forest of Arden and the Wood of Athens are places into which people enter in the course of the play and from which they will return; there is, to paraphrase Ralph Berry, “no escape from Illyria.”\textsuperscript{28} The marriages there do not seem to place erotic love in a community, or to anchor it in a social life where impulses are ordered—not necessarily repressed, but controlled and contained.

That ordering, in a healthy society, provides more, rather than less individual freedom; the ability to control drives and impulses means, for the individual, freedom from the tyranny of the unconscious, while societal restraints ultimately protect the individual from the tyranny of others. The real tragedy of Malvolio lies in the fact that in this play the principle of order has become too rigid and too perverse to accommodate pleasure. Of course we laugh at him, he is ridiculous, yet his expulsion from the comic world brings an end to “Shakespeare's Festive Comedy,” since it means that sobriety and intoxication, parents and children, workday and holiday, restraint and release, cannot be reconciled. In this way, Malvolio's exit is as disturbing as Mercade's entrance in \textit{Love's Labours Lost} with his message of death. We feel, in the audience, the necessity of somehow making peace with him, and he is gone. His last line must certainly include everyone in the theater.

The play itself has discovered to us the dangers of life without the principle of order that Malvolio stands for; Feste's final song serves as a vivid reminder. The Rabelaisian ideal of freedom (the Abbaye de Thélème) only is possible when human nature can be trusted; doing what we will can be a horror if the forces that drive us are dark. In \textit{Twelfth Night} Shakespeare leads us to explore the possibility that our drives to pleasure are ultimately irreconcilable with social and moral norms of goodness; it is the antithesis of \textit{As You Like It}, which works from the hypothesis that people are basically good at heart. In \textit{As You Like It}, the characters and the audience arrive at a restoration of the world; in \textit{Twelfth Night} what the characters and the audience come to are the limits of festival, and at that extremity are violence and indiscriminate passion.

The play does not so much tell us but show us that these are what we want. It is the audience who finally approve, with their laughter and applause, the actions of the characters. I do not mean to suggest that we should not laugh and applaud, or that we should become a community of Malvolios, hostile to pleasure. This is a very funny play, and nearly all the characters—certainly including Orsino and Olivia—are enormously appealing. That is just the point. What I am suggesting is this: to delight in the pranks of the revellers is to participate vicariously in a form of Dionysian frenzy; to assent to the ending, to confirm it as a “happy” one, is to embrace the possibility of erotic love as trans-personal and trans-sexual. But the play does not wholeheartedly confirm the value of Saturnalian pleasure; if it is not sentimentalized in production, if festivity is allowed to reach its limits, then the play itself will create an awareness that “what we will” is potentially dark and dangerous.

\textbf{Notes}

view the locus of this surfeiting is the audience. The text used throughout this essay is *The Riverside Shakespeare*, ed. G. Blakemore Evans, et al. (Boston: Houghton Mifflin, 1974).

3. Hotson, p. 158.
6. Salingar links the sub-plot and the main plot with reference to the Elizabethan trope of love as madness, and allies madness with revelry.
10. Joseph Summers, “The Masks of *Twelfth Night,*” *The University of Kansas City Review* 22 (October 1955): 25. Summers makes several interesting points, among them that Olivia and Orsino embody conventional, literary modes of love (p. 26), and that Feste “is the one professional among a crowd of amateurs” (p. 29). His interpretation of the play as a whole, however, is quite different from my own.
13. The revels of the “lighter people” in *Twelfth Night* have perceptible affinities with the rites of Dionysus, not so much because Shakespeare was influenced by classical drama or myth, as because he was aware of certain characteristically human modes of experience. Another way of seeing this is to follow Hotson and Barber in affirming the close ties between Shakespeare's drama and traditional British forms of festivity, themselves descended from a Northwest European paganism which in many ways parallels that of the classical world. Sir James Frazer, in *The Golden Bough* (1922; abridged edn. London: Macmillan, 1923), provides an exhaustive commentary on the pre-Christian rituals of Europe and their structural similarity to the rites and myths of antiquity. His comments on “The Roman Saturnalia,” pp. 583-87, are particularly relevant to *Twelfth Night*. Robert Graves, in *The Greek Myths* (New York: Braziller, 1955), also draws explicit parallels between those myths and European paganism.
15. Goddard also notes Maria's cruelty (p. 298). I disagree, however, with his conclusion that this cruelty would go entirely unnoticed by an audience in the theater.
17. Walter N. King, in his Introduction to *Twentieth Century Interpretations*, notes that Cesario “roused the best qualities in Orsino and Olivia” (p. 10), and concludes that “as each reaches out toward union with Cesario, each is concurrently discovering what love is and is not” (p. 9). Although Goddard
conceived the ending of the play to be ambiguous, he saw the possibility that “these two beings from outside Illyria … will redeem that world by lifting it at least a little toward a more spiritual level” (p. 304). Barbara Lewalski, in “Thematic Patterns in Twelfth Night,” Shakespeare Studies 1 (1965): 168-81, sees Viola and Sebastian as types of Christ, and Hassel remarks on Viola’s “ministry” to Olivia and Orsino.

21. Barber, p. 244.

22. In his chapter on Twelfth Night in Shakespeare's Comedies: Explorations in Form (Princeton: Princeton Univ. Press, 1972), Ralph Berry argues convincingly that “they have begun neither to understand nor confront their problems” (p. 211). Berry's sense of the play is very similar to my own, although he focuses on different elements.

23. Porter Williams, Jr., for example, states that “Viola is always the touchstone” (p. 198). Summers sees her as “a standard of normality” (p. 29), while Goddard finds her “a being of higher order … a Lady from the Sea” (p. 304).

27. Barber also notes the scarcity of “direct sexual reference” (p. 258).

28. Berry titles his chapter on As You Like It “No Exit from Arden.”

**Criticism: Themes: Camille Slights (essay date July 1982)**

*[In the following essay, Slights maintains that Twelfth Night illustrates the thematic principal of reciprocity as the foundation of successful human relationships.]*

Like Shakespeare's other romantic comedies, Twelfth Night moves from personal frustration and social disorder to individual fulfilment and social harmony by means of what Leo Salingar has shown to be the traditional comic combination of beneficent fortune and human intrigue.¹ This basic pattern, of course, takes a radically different form in each play. In comparison with many of the comedies, Twelfth Night begins with remarkably little conflict. The opening scenes introduce no villain bent on dissension and destruction, nor do they reveal disruptive antagonism between parents and children or between love and law. In contrast to the passion and anger of the first scene of A Midsummer Night's Dream, the restless melancholy that pervades the beginning of The Merchant of Venice, or the brutality and tyranny that precipitate the action in As You Like It, the dominant note of Orsino's court and of Olivia's household is static self-containment. To be sure, both Orsino and Olivia sincerely profess great unhappiness, but, as many critics have noted, a strain of complacent self-absorption dilutes the poignancy of Orsino's love-melancholy and of Olivia's grief. Orsino's concentration
on his own emotions cuts him off from real personal relationships as effectively as does Olivia's withdrawal or Sir Toby's careless hedonism. The self-absorption of the native Illyrians and Viola's involuntary exile present a spectacle of isolation rather than confrontation, not so much a society in disorder as a series of discrete individuals without the interconnexions that constitute a society.

While the beginning of *Twelfth Night* is unusually static, the conclusion is strikingly active. Far from tying up a few loose ends, the last scene contains major events in both the double main plot and the sub-plot. Both pairs of lovers meet with full awareness for the first time. Viola finally wins Orsino's love, Orsino and Olivia, in different ways, discover whom it is they love, and Malvolio is released from imprisonment. Beginning calmly and purposefully enough with Orsino's first attempt to woo Olivia in person, the scene gathers intensity through a series of increasingly bitter confrontations. Orsino's banter with Feste is interrupted when Antonio appears, ominously under armed guard. Recognition as the duke's old enemy, however, is less galling to him than the apparent ingratitude of Sebastian (Viola-Cesario). At Olivia's entrance the tone darkens further with Orsino's jealous spite and threat to murder his presumed rival, to 'sacrifice the lamb that I do love' (V. 1. 130). On the priest's confirming Cesario's marriage to Olivia, Orsino's rage is replaced by even more bitter contempt at such betrayal. In quick succession Viola-Cesario has provoked condemnation as an 'ingrateful boy' (l. 77) from Antonio, sorrow at the faithless cowardice of her new husband from Olivia, and, from the man she loves, a threat of death and disgusted rejection as 'a dissembling cub' (l. 164). The crescendo of pain and anger climaxes in the bloody spectacle of Sir Andrew's and Sir Toby's broken heads and Toby's vicious attack on his friend: ‘Will you help?—an ass-head and a coxcomb and a knave, a thin-fac'd knave, a gull!’ (l. 206).

At the midpoint of the scene, as Sir Toby and Sir Andrew exit to find help for their bleeding heads, Sebastian enters and the scene reverses direction. In the first half, relationships disintegrate in the whirling confusions of mistaken identities emanating from Viola's disguise. In the second half, new relationships form from the revelation and identification of the twins, Sebastian and Viola. The scene performs the conventional function of uniting lovers and reuniting family, but the emphasis is less on restoration and reconciliation than on the discovery of unexpected relationships and acceptance of new obligations. Sebastian's reunions with Antonio and Viola reveal that Olivia is betrothed not to a cowardly faithless boy but to a strong loyal man. By identifying Viola, Sebastian's appearance transforms Orsino from Cesario's master and Olivia's unsuccessful suitor into Viola's future husband and Olivia's prospective brother-in-law. Viola suddenly hears herself hailed as Olivia's sister and Orsino's mistress. Through marriages prospective and already performed, Maria, Toby, Olivia, Sebastian, Viola, and Orsino become one extended family, in households where Malvolio, Fabian, and Feste have secure positions.

In *Twelfth Night*, then, the comic movement from disorder to harmony is more particularly the transformation of isolation and fragmentation into mutuality and cohesion. The personal and societal problems at the beginning of the play result not from envy, aggression, or malice, but from a perhaps no less insidious, and equally universal, ambition for self-sufficiency. As the social anthropologist Claude Lévi-Strauss points out, mankind has always dreamed of seizing and fixing that fleeting moment when it was permissible to believe that the law of exchange could be evaded, that one could gain without losing, enjoy without sharing. At either end of the earth and at both extremes of time, the Sumerian myth of the golden age and the Andaman myth of the future life correspond, … removing to an equally unattainable past or future the joys, eternally denied to social man, of a world in which one might keep to oneself.\(^3\)

Orsino's vision of self-surfeiting desires, Olivia's projected isolation, Toby's life of unconfined pleasure, and Malvolio's 'practicing behavior to his own shadow' (II. 5. 17) are all versions of this dream of inviolable autonomy. Their various attempts to create these solipsistic paradises in Illyria produce an atmosphere of sterility, a society without cohesion. While a current of self-indulgence runs through Orsino's and Olivia's
pain, the real dangers of isolation from the protection of human society threaten the more cheerful characters. Viola and Sebastian are separated and shipwrecked in unknown country, Sir Toby and Feste are threatened with dismissal from Olivia's household, and Antonio is banned from Orsino's territory on pain of death. By the end of the play this sense of incipient disintegration has disappeared from the enlarged and cohesive group, and the communal joy and affection are achieved largely in terms of what Lévi-Strauss, in the passage quoted above, calls the law of exchange.

Instead of celebrating personal and social harmony with the dancing and wedding festivities that end most of the comedies, the final scene of Twelfth Night demonstrates the mutual obligations imposed by the complicated new relationships. Public recognition of Viola's female identity depends on recovering her 'maid's garments' (l. 275) from the sea captain who befriended her. The captain, in prison under some legal obligation to Malvolio, cannot be released until Malvolio is satisfied. The need for Malvolio reminds Olivia of her responsibility to him and Feste of the letter in his charge. The letter brings Malvolio's release, which in turn precipitates Fabian's confession of responsibility. Meanwhile Olivia's and Sebastian's wedding festivities wait on Orsino's and Viola's, and Viola remains Cesario until Malvolio is pacified. This cycle of mutual dependence gives an open-ended quality to the ending of the play. Our confident expectation that 'golden time' (l. 382) will bring happiness to the lovers is complemented by our sense of continuing obligations. Reciprocal love, the design of Twelfth Night implies, naturally culminates not in a private dream-world of complete fulfilment, but in the give and take of human society.

This happy, albeit imperfect, ending is possible only when the major characters have come to terms with the inescapable mutuality of communal life through a series of exchanges, often financial transactions. We usually think of The Merchant of Venice as Shakespeare's treatment of the relationship of wealth to love, but, as Porter Williams, Jr, has pointed out, 'seldom in a play does money flow so freely' as in Twelfth Night.4 Viola gives gold to the sea captain, Antonio gives his purse to Sebastian, Orsino sends a jewel to Olivia, Olivia showers gifts on Cesario, Viola-Cesario offers to divide her wealth with Antonio, and they all repeatedly give money to Feste. Economic advantage is not a prime motive for any of the characters, but hardly a scene goes by when they are not engaged in giving or receiving money or jewels. The lovers in the forest of Arden may rely on Hymen to arrange their nuptials, but in Illyria Olivia knows that someone must pay for the double wedding that is to replace the differences and frustrations of the past with a joyous alliance:

My lord, so please you, these things further thought on,
To think me as well a sister as a wife,
One day shall crown th'alliance on't, so please you,
Here at my house and at my proper cost.

(V. 1. 316)

Illyria definitely is not Gonzalo's imaginary commonwealth without trade, service, or riches.

This emphasis on giving and receiving serves, as Porter Williams says, to contrast the generous and loving nature of Viola, Orsino, and Olivia with the selfishness of Malvolio and Sir Toby, but he oversimplifies, I think, when he suggests that the money and gifts that change hands so freely 'symbolize generous love and friendship' and that 'such giving and receiving must be done without counting the cost or measuring the risk' (p. 194). Orsino's financial generosity is patently not identified with generous love. Admittedly, he does not count the cost in his courtship of Olivia. His motives are not mercenary and his emissaries bear jewels; nevertheless, his love is self-regarding. In the first scene, for example, when he makes the expected pun on Curio's suggestion to hunt the hart, he first seems to be directing his thoughts beyond himself, thinking of the noble Olivia:
Will you go hunt, my lord?

DUKE.

What, Curio?

CUR.

The hart.

DUKE.

Why, so I do, the noblest that I have.

(I. 1. 16)

But immediately we discover that the noble heart Orsino pursues is his own:

O, when mine eyes did see Olivia first,
Methought she purg'd the air of pestilence!
That instant was I turn'd into a hart,
And my desires, like fell and cruel hounds,
E'er since pursue me.

(l. 18)

His love for Olivia does not give rise to thoughts of serving her or sharing with her but of reigning supreme in her:

These sovereign thrones, are all supplied and fill'd
Her sweet perfections with one self king!

(l. 36)

In the meantime he seeks solitude: ‘for I myself am best / When least in company (1. 4. 37).

Viola too is generous, but, while her love is more selfless than Orsino's, her economic liberality is less purely spontaneous and more thoughtful. When she gives gold to the sea captain, she does so explicitly in gratitude for the comfort he has given her: ‘For saying so, there's gold’ (1. 2. 18). She promises to pay him more in return for specific help she requests from him:

I prithee (and I'll pay thee bounteously)
Conceal me what I am, and be my aid
For such disguise as haply shall become
The form of my intent.

(1. 2. 52)

She is fully aware that she takes a risk in trusting him:

And though that nature with a beauteous wall
Doth oft close in pollution, yet of thee
I will believe thou hast a mind that suits
With this thy fair and outward character.
And she is not averse to reinforcing his good will with the hope that ‘It may be worth thy pains’ (l. 57). Just as she gladly pays for help she needs, she expects to earn her way with the duke she proposes to serve, confident that she can prove ‘worth his service’ (l. 59). Like the other characters, Viola is tempted by the attractions of solitude: she would like to join Olivia in her isolated grief and postpone being ‘delivered to the world’ (l. 42), but she readily accepts the necessity of taking part in the commerce of human society.

The idea of reward for service continues in Viola's first scene with Orsino. The short scene opens with Valentine commenting on Cesario's advancement: ‘If the Duke continue these favors towards you, Cesario, you are like to be much advanc'd; he hath known you but three days, and already you are no stranger’ (l. 4). The dialogue between Orsino and Viola ends with the duke's promise:

And thou shalt live as freely as thy lord,
To call his fortunes thine.

The effect is not to stress Orsino's generosity, or to suggest his vulgarity in offering reward, but to show that Viola belongs; she has become an active participant in the reciprocal relationships that bind the social group together. Indeed, the play as a whole, I think, demonstrates the principle of reciprocity, the unwritten rule, according to Marcel Mauss and Lévi-Strauss, by which the exchange of goods creates mutually-satisfying relationships among individuals and groups.

Building on Mauss's seminal study of the gift in primitive societies, these social anthropologists point out that exchanges of goods may be complex social events—at once legal, economic, religious, aesthetic, and morphological—rather than solely, or even primarily, economic transactions. Most basically, ‘the agreed transfer of a valuable from one individual to another makes these individuals into partners’ because it implies that the gift will be reciprocated with a counter-gift, usually of equivalent or greater value. Through the principle of reciprocity, then, the act of exchange binds the giver and the recipient in a relationship. To give is to create an obligation; to take is to imply a willingness to pay that debt. Consequently, to refuse a gift is an insulting rejection of relationship with the giver, and to take without repaying is either humiliating failure or an act of aggression in the eyes of the whole society.

The principle of reciprocity operates most clearly through Feste. His first scene, Act I, Scene 5, establishes his position as a professional entertainer. After Maria's warning that his absence has threatened his security as Olivia's fool, he successfully fools Olivia out of her bad humour and in return receives her support and protection when Malvolio attacks him. In Act II he sings, first for Sir Toby and Sir Andrew, and then for Orsino, demonstrating each time that he who pays the piper calls the tune. There is nothing demeaning in the financial aspect of the transaction, despite A. C. Bradley's worry that Feste is offended and disgusted by Orsino's offer of payment. Feste sings for pleasure, as he tells Orsino, but ‘pleasure will be paid, one time or another’ (II, 4. 70), and he pockets as his due the money Toby, Andrew, and Orsino pay for the pleasure he gives them. The scenes where Feste is paid for his foolery follow the same pattern. In Act III, Scene 1, his witty wordplays elicit coins from Viola as well as an appreciative analysis of the fool's art. Similarly, at the beginning of Act V, Scene 1, Orsino pays for Feste's excellent foolery and promises further bounty if he will carry a message. Feste's cleverness in getting his tips doubled, as he tells Orsino, is not ‘the sin of covetousness’ (V. 1. 47), but part of his performance, rather like the plea for applause by the epilogue to a Renaissance play. Often, Feste expresses gratitude for these payments in a wittily pertinent blessing: ‘Now the melancholy god protect thee’ to Orsino, and to Viola-Cesario: ‘Now Jove, in his next commodity of hair, send thee a beard!’ (II. 4. 73; III. 1. 44).
The only significant departure from the pattern of a mutually satisfying exchange of talented performance for money comes when Feste tries to deliver to Sebastian a message intended for Cesario. Feste's words, of course, make no sense at all to Sebastian, who in exasperation tips the fool in an effort to get rid of him:

I prithee, foolish Greek, depart from me.
There's money for thee. If you tarry longer,
I shall give worse payment.

(IV. 1. 18)

Instead of begging for more or invoking a witty blessing on his benefactor, this time Feste responds with open contempt: ‘By my troth, thou hast an open hand. These wise men that give fools money get themselves a good report—after fourteen years' purchase’ (l. 21). When the young man seems to deny his identity and his relationships with people in Illyria, Feste's words, his medium of exchange, lose their value, and the exchange process breaks down: ‘No, I do not know you, nor I am not sent to you by my lady, to bid you come speak with her, nor your name is not Master Cesario, nor this is not my nose neither: nothing that is so is so’ (l. 5). Because Sebastian cannot receive Feste's message, his offer of money is not part of a reciprocal exchange but, from his point of view, an insulting dismissal and, from Feste's, a wise man's folly.

Sebastian's refusal to participate results, of course, from Feste's mistake, not from Sebastian's rejection of the principle of reciprocity. His scenes with Antonio stress his dual awareness that taking implies an obligation to give and that gifts of love cannot be reduced to an economic transaction. ‘Recompense’, Shakespeare's word for the idea of reciprocity, is the subject of his first speech: ‘My stars shine darkly over me. The malignancy of my fate might perhaps distemper yours; therefore I shall crave of you your leave, that I may bear my evils alone. It were a bad recompense for your love, to lay any of them on you’ (II. 1. 3). He pursues isolation because he feels unable to enter into a balanced mutual relationship. But when Antonio persists in offering help and protection, Sebastian understands that rejecting such love would be unkind, although gratitude is the only recompense he can give:

My kind Antonio, 
I can no other answer make but thanks,
And thanks; and ever oft good turns
Are shuffled off with such uncurrent pay;
But were my worth as is my conscience firm,
You should find better dealing.

(III. 3. 13)

Similarly, Sebastian values the pearl Olivia gives him as symbol of the wonder of her love and reciprocates by vowing eternal love.

Thus the transfer of wealth from one person to another in *Twelfth Night* creates and expresses a wide variety of relationships: entertainer with audience, employer with employee, friend with friend, and husband with wife. Concomitantly, repudiating the principle of reciprocity signals the breakdown of community and the outbreak of hostility. The extreme case is Antonio, who is excluded from Illyria because he refuses to repay what he has taken from Duke Orsino. His offence, he explains to Sebastian,

might have since been answer'd in repaying
What we took from them, which for traffic's sake
Most of our city did. Only myself stood out,
For which if I be lapsed in this place
I shall pay dear.

1051
Antonio knows that because he has refused to repay, he will pay dearly if he is recognized, for the ugly reverse of the reciprocity binding people harmoniously together is the requital of injury with injury in a divisive cycle of revenge. Similarly, when it appears that Sebastian is unwilling to return his purse, Antonio's love turns to hostility. The refusal is a denial of their relationship, and to claim no relationship is to create a hostile one. Antonio has sincerely believed his love to be totally selfless and his generosity to expect no return. But in the crisis produced by Orsino's revenge and by the confusion of brother and sister, he discovers that he has counted on receiving loyalty and gratitude in return for giving Sebastian 'his life' and 'my love' (V. 1. 80, 81). Without such recompense love is impossible, and his adulation is transformed to scorn.

Sir Toby's relationship with Andrew Aguecheek also demonstrates the principle of reciprocity by negative example. Toby coaxes money from the thin-faced knight, who receives nothing in return but deceptive assurances of success in his courtship of Olivia. Because Toby is exploitative and Andrew foolish, we see their companionship as a travesty of friendship, and its disintegration in the last act strikes us as no loss and no surprise. Toby's high-spirited gaiety is equalled by his selfish disregard for other people, but even he realizes that 'pleasure will be paid, one time or another', and he marries Maria 'in recompense' (V. 1. 364) for her part in the gulling of Malvolio.

Only Malvolio stands outside the lines of exchange that link the characters in increasingly complex patterns of relationship. He is the only major character who pays Feste nothing and neither gives nor receives a gift. He lacks the 'generous' and 'free' temperament that provides a sense of proportion, as Olivia tells him (I. 5. 91, 92), but he is no more greedy than Sir Toby, who calculates that he has cost Sir Andrew 'some two thousand … or so' (III. 2. 54-55), or than Sir Andrew, who expects to repair his fortune by marrying Olivia. The measure of Malvolio's self-love is not his miserliness or covetousness but his presumptuous belief that he lives in a sphere above and beyond ordinary human relationships. Maria's attempts to define what is so odious about Malvolio (he is a 'puritan' and a 'time-pleaser' (II. 3. 140, 148)) at first sound contradictory, if a puritan is one who self-righteously condemns lapses from a moral ideal and a 'time-pleaser' one who cynically manipulates worldly affairs for self-aggrandizement. But Maria is right both times; the puritan and the politician meet in Malvolio's self-esteem and in his contempt for people and for human relationships as ends in themselves. This total lack of identification with other people both incites and provides the means for Malvolio's gulling. When his insults provoke the conspirators to revenge, they can easily persuade him that Fortune has singled him out for greatness. Maria's letter merely reinforces his desire to 'wash off gross acquaintance' and his assumption that he condescends to speak to ordinary mortals as 'nightingales answer daws' (II. 5. 162-63; III. 4. 35-36).

In Twelfth Night money symbolizes not love so much as a broader engagement with the real and imperfect world; paying, lending, giving, and taking are signs of willingness to have commerce with human society. Because the attitude that controls Malvolio's response to other people is 'I am not of your element' (III. 4. 124), he does not take part in the exchanges of wealth that engage the other characters. Even when he is duped into believing that Olivia has given him her love and, by marrying him, will give him wealth and power, he feels no obligation or gratitude. He thanks 'Jove' and 'my stars' (II. 5. 172), but not Olivia. He believes that 'nothing that can be can come between me and the full prospect of my hopes' (III. 4. 81) and that no human actions, not even his own, contribute to this perfect felicity.

The success of the plot against him teaches Malvolio the vulnerability he shares with the rest of mankind. In his distress he appeals to Feste for help, and promises, 'I will live to be thankful to thee for't'; 'It shall advantage thee'; 'I'll requite it in the highest degree' (IV. 2. 82, 111, 118). A demonstration of dependency so humiliating and a promise to reciprocate offered under duress do not promise Malvolio's sudden conversion to brotherly love, but even his departing curse, 'I'll be reveng'd on the whole pack of you' (V. 1. 378), does not inspire, in the theatre, the dread or pathos critics often solemnly attribute to it. Malvolio may never learn with
Prospero that ‘the rarer action is / In virtue than in vengeance’, but even his comically impotent fury registers his dawning awareness that he is ‘one of their kind’ (The Tempest, V. 1. 27-28, 23). In suffering wrong and experiencing the natural human desire to hurt back, he is at least entering the rough give and take of the real world. And Olivia's immediate sympathy and Orsino's command to ‘Pursue him, and entreat him to a peace’ (V. 1. 380) assure the audience, I think, of future reconciliation.

While all the characters take part in the process of exchange, Viola is distinguished by her fuller understanding of the conscious and unconscious operation of the principle of reciprocity. Hating ingratitude more than any other vice, she repays Orsino's trust and favour with loyal service, faithfully wooing Olivia for him despite her own longing to be his wife. And the heart of her plea to Olivia is that love deserves recompense; ‘My master, not myself, lacks recompense’ (I. 5. 285), she replies tartly when Olivia offers to tip her. However great Olivia's beauty, she argues, Orsino's love could be ‘but recompen'sd’ (l. 253) by winning her. Indeed, Viola breaks through Olivia's reserve by teaching her that the gifts of nature too bring an obligation to give in return, for ‘what is yours to bestow is not yours to reserve’ (l. 188). The lesson Olivia learns, ‘ourselves we do not owe’ (l. 310), strikingly resembles the ‘basic theme’ which Marcel Mauss's English editor finds in the anthropologist's analysis of reciprocity: ‘One belongs to others and not to oneself.’

Still, for all Viola's advocacy of the human obligation to love and to give, it is impossible for her to reciprocate the love Olivia gives to Cesario, a fiction Viola has created. And she begins to regret her male disguise when she realizes the falseness of her position in relation to Olivia. As Cesario she clearly tells Olivia that she can never love her but, even so, she accepts Olivia's gifts, sparing her the pain and humiliation of having these symbols of love rejected.

Recognizing the reciprocal nature of human relationships, then, does not solve all problems. It is impossible to give without desiring some return, but to expect exact recompense, as Feste demonstrates to Fabian, makes an absurd sham of giving: ‘to give a dog and in recompense desire my dog again’ (V. 1. 6). Giving without recompense may be self-indulgent, insulting, foolish, or tyrannical, but failing to give is self-destructive, as Viola reminds us, describing her father's daughter who ‘never told her love, / But let concealment like a worm i' th' bud / Feed on her damask cheek’ (II. 4. 110).

Not even Viola, then, can discover a way out of the tangled personal relationships that make up the plot of Twelfth Night. Beneficent fortune, not human wit, creates the happy ending. It is the fact that Sebastian exists, rather than moral education or spiritual growth, that solves the problems troubling the inhabitants of Illyria. The sorting out of couples in the last scene, however, is not merely a mechanically-contrived happy ending; it is, rather, the culmination of the reciprocal exchanges I have been tracing. In the course of the action, all the major characters have been tempted by the dream of self-sufficiency, but have been forced, by circumstances and by their own needs and desires, into relationships where they become aware of their obligations to and dependence on others. Viola-Cesario is the key figure in the process. She triggers Olivia's abandonment of her vows of celibacy and provides her with the humbling experience of finding the real world intractable to her will. She provides Orsino with real human love as an alternative to a self-centred fantasy. When all fantasies of limitless personal power and happiness collapse in the last scene under the pressure of the destructive
aspect of reciprocity, Orsino and Olivia are ready to relinquish their dreams of Olivia and Cesario for the real love of Viola and Sebastian. Finally repelled from worshipping at ‘uncivil’ Olivia's ‘ingrate … altars’ (V. 1. 112, 113), Orsino's first reaction is the angry cruelty that is so often the corollary of sentimentality. But when Sebastian's arrival reveals Viola's identity, he asks for Viola's hand and gives her his in grateful recompense for ‘service done him’ (l. 321).

The sudden reversal from hostility and disintegrating relationships to love and alliance results from the amazing yet natural division of Cesario into Viola and Sebastian. This separation of brother and sister into two independent people symbolically illustrates Lévi-Strauss's theory that the principle of reciprocity binds people together in stable societies through the prohibition of incest and its wider social application, the custom of exogamy. He speculate that incest ‘in the broadest sense of the word, consists in obtaining by oneself, and for oneself, instead of by another, and for another’ (p. 489). The functional value of reciprocal exchange in marriage alliances and of the prohibition of marriage within certain degrees is to maintain ‘the group as a group, … avoiding the indefinite fission and segmentation which the practice of consanguineous marriages would bring about’ (p. 479).

So too in Twelfth Night, it is only when Olivia's exclusive allegiance to her brother is relinquished, and when brother and sister are brought together so that they can be publicly divided, that a harmonious and cohesive society becomes possible. The strangers from across the sea rescue the native Illyrians both from the sterility of self-preoccupation and from the divisive violence of their inevitable conflicts. Viola and Sebastian free Orsino and Olivia from illusions of exclusive self-fulfilment and total dominance and give them instead the shared happiness of mutual love. Neither Shakespeare nor the anthropologists claim that awareness of the principle of reciprocity can fundamentally alter the finite, complex nature of the human condition, but in his last romantic comedy Shakespeare suggests that by understanding our mutual needs we can choose love, generosity, and alliance rather than isolation, stagnation, and division.

Notes

2. Quotations throughout are from The Riverside Shakespeare, edited by G. Blakemore Evans and others (Boston, Massachusetts, 1974).
8. Compare Seneca, De Beneficiis, ‘A gift is not a benefit if the best part of it is lacking—the fact that it was given as a mark of esteem’ (Moral Essays, III, 49).
9. III. 4. 354-57. Compare Seneca: ‘Homicides, tyrants, thieves, adulterers, robbers, sacrilegious men, and traitors there always will be; but worse than all these is the crime of ingratitude’ (p. 33).
11. In her discussion of mutual love in Shakespeare's romantic comedies, Marianne L. Novy presents the meeting of Sebastian and Viola as emblematic of mutual love between man and woman (‘“And You
“Smile Not, He's Gagged”: Mutuality in Shakespearean Comedy’, *PQ [Philological Quarterly]*, 55 (1976), 178-94). Without denying that the loving reunion is crucial to the mutual happiness of the ending, I want to argue that its primary function is to divide Cesario, the brother-sister amalgam, into two people, a division which allows new love relationships to succeed long-established biological ones.

**Criticism: Themes: Marcus Cheng Chye Tan (essay date 2001)**

[In the following essay, Tan discusses the relationship of music to Twelfth Night's theme of sexual ambivalence.]

**THE ELUSIVE NATURE OF TWELFTH NIGHT**

Taken as Shakespeare's farewell to romantic comedy and written around the same time as *Hamlet,* *Twelfth Night* presents a high comedy of elusive complexity that preempts the problem plays. Contesting a “universal consent [that] the very height of gay comedy is attained in *Twelfth Night,*” modern critics note that *Twelfth Night* possesses “darker” features of the problem plays but, as C. L. Barber suggests in *Shakespeare’s Festive Comedy,* the play manages to restore the festive through its comic resolution, affirming what Jonathan Dollimore terms “the telos of harmonic integration.”

Elements of “dark tragedy” constantly complicate the “sunny identity of spirit.” The gulling of Malvolio is often seen by modern sensibilities as an excessively cruel prank passing into the domain of sadism. The latter's ignored plea for help while locked in the dark room, exacerbated by Feste's cruel taunting, becomes a comic joke that proves excessive for the audience. In addition, Orsino's unsettling “murderous” rage and Viola's swooning acceptance of a love death cause the play to “walk the edge of violence” till the arrival of Sebastian in Act V. Malvolio's unresolved vow of vengeance (V.i.376), sworn after the union of the lovers, threatens a newly established harmony, prompting the audience to speculate on his possible return, which could turn comedy into tragedy. Consequently, Harold Bloom asserts that “*Twelfth Night* is of no genre.” The play possesses a generic elusiveness that, like the problem plays, superficially adopts a comic genre but constantly threatens to metamorphose into a tragedy, suggesting that “the whole bright revel emerges from shadow.”

*Twelfth Night* also plays about with hermeneutics. As Bloom observes, “[the play is] another “poem unlimited.” One cannot get to the end of it, because even some of the most apparently incidental lines reverberate infinitely.” Generic uncertainty and the interpretive “reverberations” of the text plunge both literary and performance critics into a crisis of hermeneutic subjectivity echoed in *Twelfth Night* 's secondary title, *What You Will.* Such an irresolute title playfully jests at hermeneutics, freeing interpretation of the play from the stipulations of its title and flipantly reducing “what it is” to “what you want it to be.”

The multiplicities resultant from varying interpretations of the text contribute to this highly unstable nature of *Twelfth Night.* Laurie E. Osborne's seminal study of the various performance editions of *Twelfth Night* proves that the dramatic text is constantly subjected to historically specific tastes. Her work demonstrates how we must avoid “the trick of singularity” (II.v.151), dispelling the myth of a singular text and realising the presence of multiple texts of *Twelfth Night.* Davies echoes this elusive multiplicity when he remarks that “*Twelfth Night* contains multitudinous *Twelfth Nights* and the dormant seeds of many more, whether generated by a producer's singular comprehensive reading of the text or the nuanced particularities of the
actors' voices.”

Considering *Twelfth Night* in performance, Michael Billington believes that this is among the hardest of Shakespearean plays to stage because of its “kaleidoscopic range of moods,” from melancholia to drunken revelry, high-strung tension to joyous sadness. In performance, “elusiveness” takes on a different definition. Unlike other Shakespearean plays where temporal location is either “real” (such as in the history plays) or “fantastic” (as in *The Tempest*), Illyria is at once both. Its dreamlike environment presents difficulties in achieving verisimilitude on the stage. Furthermore, the manifold possibilities of staging the “‘darker” and complex elements, such as those mentioned, can disclose directorial bias and effect particularised impressions of character. Malvolio can become the Puritan Shylock or an oppressed victim. The trickery of physical allure between the infatuated lovers can metamorphose into a homoerotic attraction just as the homosocial bond between Antonio and Sebastian proves susceptible to varying interpretations. These possibilities demonstrate, in congruence with Osborne and Davies's observations, *Twelfth Night*'s elusive and unstable nature both as text and in performance.

Perhaps the most salient reason for *Twelfth Night*'s elusive nature lies in the difficulty of striking a balance between the play's light and dark aspects. In its stage history, few directors have managed to evoke what Stanley Wells terms “the transmuting alchemy”—that which unlocks both the play's ambivalent darkness and resonant comedy. This dialectical duality of “ambivalent darkness” and “resonant comedy” is not merely resultant from emplotment and dramatic staging. Music also contributes to this elusive nature of *Twelfth Night* because it eludes any attempts at an understanding of its aesthetics. *Twelfth Night* becomes a play that, like music, can communicate simultaneously joy and sadness, festive revelry and a deep-rooted melancholy, and so share a common feature of elusiveness. It is perhaps this pervasive presence of music that accentuates the elusive quality of *Twelfth Night*.

**MUSICAL ELUSIVENESS AND ELUSIVE MUSIC**

Jean-Pierre Barricelli, in *Melopoiesis*, observes that Shakespearean plays are “verbal” dramas which transmogrify into “musical” dramas at pivotal interstices in the text. This is certainly true of *Twelfth Night*, where music permeates the play and is tightly interwoven into the dramatic structure and thematic concerns such as love, gender, and time. As Davies observes, “*Twelfth Night* is all music.” It begins, ends and progresses with music, not solely via its quintessential songs but “the melodious recitative of its language,” where the verse structure becomes “musical” in form.

It is by virtue of this musical quality that *Twelfth Night* has an unsettling elusiveness, a “peculiar sweet sadness,” possessing both a spirit of revelry and a pervasive melancholia. Barbara Everett encapsulates this ambiguity when she states that,

*Twelfth Night* is itself an elusive work, which—perhaps because of this quality of ‘musicality’ or aesthetic self-consistency, an expressive reticence, seems to resist critic's attempts to explain or define or even describe the work as a whole, to say how or why it succeeds and why we value and admire it so.

*Twelfth Night*'s elusiveness and resistance to critical placement resembles music's elusive nature. Music is “a supreme mystery of the science of man” whose inner spirit cannot be easily expressed through language. It is that “which we cannot define in words, or include in any category of thought … a language we speak and understand, but which we are unable to translate.” The central dichotomies in musicology and music criticism remain: can music be described adequately by language and is music a “language” in itself? If it is a language system, what it expresses or communicates is ambiguous. Perhaps music will remain perpetually enigmatic and ineffable, just as *Twelfth Night* proves to be elusive because of this pervasive presence of music.
MUSIC AS THEME AND IDEA; MUSIC AS PERFORMATIVE

The difficulties encountered in the discussion of an aesthetics of music amidst the disputations of its nature has confined scholarship in Shakespearean music, and in particular, music in Twelfth Night, to a discursive consideration. Canonical works such as those by John H. Long, Richmond Noble and Peter J. Seng approach music as an idea or theme in the play to evade the hazardous terrain of musical aesthetics. By investigating the lyrical content and contextualization of each song, these works engage music in Twelfth Night as a prevailing thematic concern, and regard it as a conventional adjunct to the dramatic action whose primary function lies in the establishment of mood and atmosphere. Despite their importance in the field of Shakespearean music scholarship, such studies have seldom considered the performative aspects of music or music's musicality, treating it discursively and thematically whilst establishing the historical justification and contextualization of the musical texts. Furthermore, music's contributory role to the elusive and problematic nature of this comedy has not been explored.

As an alternative parameter to the thematic understanding of music (and its functions) in Twelfth Night, this paper seeks to understand music as performative, through an analysis of the songs in the play, and hopes to prove that Twelfth Night's elusive quality is accentuated by the frequency and prevalence of music. A framework of musicological analysis will be employed, through an examination of the music's formal dimensions such as notational sequencing, major-minor contradistinctions, harmony, rhythm, and other properties to show how music, when heard and understood as performative, can modulate responses to the play.

Like a dramatic performance, music varies with nuances in every performance, yielding a diverse range of responses despite an “authoritative” score. Thence, there is no absolute meaning in a piece of music yet an analysis of music's musicality renders a range of possible meanings delimited within the boundaries scripted in the score. These meanings are never arbitrary for the arrangement of an ensemble of notes with its dynamic properties indicates a specific range of particular responses. Meaning in music is then a tonal range of possible responses. This range remains intrinsic to the song despite possible stylistic variations and interpretations.

THE POLITICS OF HOMOEROTICISM

There is critical consensus in scholarship on Twelfth Night that issues of gender contribute to Twelfth Night's darker tonality. In the play, disguise causes gender confusion that further leads to suggestions of homoerotic love. As Casey Charles observes, “Twelfth Night is centrally concerned with demonstrating the uncategorical temper of sexual attraction.” These ever-present “dark” suggestions of homoeroticism and “ambi-sexuality” not only subvert the harmonious order in Illyria but produce the elusive nature of the play.

Shakespearean comedy constantly appeals to the body and in particular to sexuality as the heart of its theatrical magic. Cross-dressing, as a central leitmotif in issues of gender, is employed in several comedies and best exemplified in Twelfth Night. Twelfth Night is arguably about bisexuality and the fashioning of gender. Exhaustive studies have been done in relation to disguise, transvestism and mimesis leading to notions of androgyny and homoeroticism in the play. The following discussion thus seeks to illuminate the ways in which music contributes to this nexus of issues on gender explored by preceding scholarship.

Illusionism that leads to ambiguity is the very substance of the theatrical experience in Twelfth Night, where Viola embodies this ambiguity effected through the illusion of disguise. On the Shakespearean stage, the double cross-dressing convention (boy playing girl disguised as man) complicates gender relations on the dramatic and meta-dramatic levels. The issue of an artistically licensed homoeroticism effected through stage transvestism becomes then a central problematic in Twelfth Night.
On stage, the three contingent dimensions of Viola/Cesario's corporeality, her physiological sex as a boy actor, her gender identity in the drama as a woman, and her gender performance as Cesario, encourage the audience to view him/her as a sexually enticing qua transvestized boy. Because her gender is consistently the ulterior topic of conversation when she is present (I.v.185, I.v.158-161, III.i.143), the audience's eyes are invited to dwell upon the actor's body as a pretty boy, inadvertently stimulating homoerotic desire. Her/his multiple-disguised presence triggers an attraction in both genders, within the fiction of Illyria and the non-fiction of an Elizabethan audience. Furthermore, pederastic intimations between Antonio and Sebastian invite further speculation of same-sex love in *Twelfth Night.*

Homoeroticism on the Renaissance stage was neither misogynist nor confined to men. Lesbianism was also a common feature as Valerie Traub shows. The stage articulated a discourse of desires and acts that can be articulated and correlated with our modern understanding of diverse erotic practices among women. At the narrative level, the romantic discourse in *Twelfth Night* is improperly addressed by a woman disguised as a young man to another woman and vice versa (from Olivia to Viola/Cesario). At the performative level, it is still improperly addressed from one boy in boy's costume to another boy cross-dressed as a woman. “The proper axis of desire is thus crisscrossed by improper ones.”

---

Disguise, I see thou art a wickedness
Wherein the pregnant enemy does much [...] 
And I, poor monster, fond as much on him,
And she, mistaken, seems to dote on me:
What will become of this? As I am man,
My state is desperate for my master's love:
As I am woman [now alas the day!]
What thriftless sighs shall poor Olivia breathe?

(II.ii.26-27, 33-38)

Viola's articulation of anxiety has implicitly served as a summation of sixteenth- and seventeenth-century attitudes toward transvestism and homoeroticism. Cross-dressing is presented as wicked while homoerotic desire is implicitly monstrous. The pregnancy of disguise threatens to deliver an apocalyptic disruption of a normative social order based upon strict principles of hierarchy and subordination, not only in Illyria but in a conservative English society. Anti-theatricalists and religious authorities charged the playhouse as a “Venus Palace,” a place of erotic arousal that promoted sodomitical practices among theatergoers and encouraged such behavior and effeminacy in the general population.

**A MUSICOLOGY OF GENDER AND THE MUSIC OF ANDROGYNY**

Homoeroticism has, in scholarship on *Twelfth Night,* been the central focus of gender issues in the play. However, recent critics such as Rackin and Greenblatt have considered the problematics of androgyny, implied by Viola's disguises, as the pivotal agency of *Twelfth Night* 's double tonality. Music, in performance, is a dramaturgical device that can modulate our understanding of these concerns of androgyny. By being a unique performative discourse alongside the visual and verbal lines of action, the songs in *Twelfth Night* augment the visual cross-dressing (physical presence and costume) and gender (con)fusion that results.

Music is, as Susan McClary notes, “shaped by constructions of gender and sexuality.” In most dramatic music, there exist musical utterances inflected on the basis of gender. The rise of opera in the seventeenth century saw the birth of a musical semiotics of gender—a set of conventions for constructing “masculinity” and “femininity” in music. Such codes of gender differences are informed by prevalent attitudes of the time, for instance in the late sixteenth and early seventeenth centuries, music was regarded as a predominantly male occupation.
These attitudes toward gender and music were inherited from the misogynist ideas of the classical poets and philosophers. Females who undertook music studies or performance were cast as vile and contemptible, unless they were of the highest social classes. This attitude was prevalent because music was considered a representative of the destructive power of feminine sexuality that needed to be disciplined.\textsuperscript{41} Music is then, as McClary points out, a gendered discourse rooted in social attitudes concerning gender. Musical semiotics can thus tell us as much about the actual music as it can suggest how particular pitches and rhythms, as opposed to others, can delineate gender.

“O Mistress Mine” is among the more popular songs of the play. Although this song is not “gendered” in any deliberate compositional way as the operas of Cavalli were, an understanding of its formal arrangement can possibly suggest the androgynous nature of cross-dressed Viola/Cesario. The song, however, is not sung by Viola/Cesario but by Feste. In its dramatic context, the song, sung as a “love song” (II.iii.38), garners its affective power through irony, for Feste sings seemingly without realising its implications. The audience is, conversely, made aware of not merely the thematics of the song but the musical qualities (and their possible extra-musical connotations) because it is performed. The sub-plot thus comments on the main plot in an intersection of lines of actions (as Trevor Nunn's production demonstrates).

In Thomas Morley's instrumental arrangement for viols (1599), “O Mistress Mine” is set to the key of G.\textsuperscript{42} Although there is inconclusiveness over the versions Shakespeare employed in his stage productions, there is general consensus that Morley's arrangement, later adapted and varied by William Byrd (ca. 1619), was probably used.\textsuperscript{43}

The G major scale lies “in-between” in the Western harmonic scale of seven major tones in a single octave. In Naylor's version, the song is set to F major, a note whose placement is exactly mid-point in the notational sequence beginning in C.\textsuperscript{44} Likewise, Andrew Charlton’s arrangement sets the song in F major while retaining Morley’s original tune.\textsuperscript{45} Both keys are suggestive of an in-betweenness that could be associated with the gendered “middleness” of androgyny. Hollander suggests that this song directs attention to the overall themes and individual characters, and in particular refers to Viola/Cesario, “the boy-girl true love, ‘that can sing both high and low.’”\textsuperscript{46}

The harmony of the song implies the androgynous nature of Viola as well.\textsuperscript{47} Morley’s settings employ the entire notational range within the octave of G major, beginning with the tonic which ascends an entire scale degree and returns back. The aural patterning of this sequence at once reveals a range of ascending and descending notes indicative of Viola’s “high and low” vocal abilities. The almost equal number of downward and upward staves suggests the high and low tonal movements, further indicating the range required in the performance of the song. The singer’s ability is challenged by the range—from the VI of the lower degree (lower E in measures 12 and 18) to XIII of the tonic (higher G in measures 10 and 16). High ascending notes have often been associated, in traditional musicology, with higher voices of “the maiden's organ,” whose “small pipes” are “shrill and sound,” and are “semblative of a woman's part” (I.v.32-34). Conversely, lower bass notes of “deep and dreadful organpipe[s]” (\textit{The Tempest} III.iii.98) are often attributed to the masculine persona. Viola’s ability to sing both these ranges, according to Feste, reinforces her dual-gender effected through disguise.

The boy-actor playing Viola (though he does not sing this song) meta-dramatically reinforces this androgynous notion since his pubertal voice lies in-between the shrill “maiden's organs” and the bass “organpipes.” His range and vocal quality would then have resembled the countertenors or male sopranos of the Baroque era.\textsuperscript{48} “O Mistress Mine” performed by countertenor Alfred Deller of the Deller consort is one such example. The pubertal youth who is “[n]ot yet old enough for a man, nor young enough for a boy” (I.v.158)—a description of Cesario by Malvolio—is then most fitting to portray an androgynous Viola/Cesario. Like the latter, the youth is ambivalent in gender identity and orientation as he embodies a “pre-sexual androgynous youthfulness.”\textsuperscript{49}
“O Mistress Mine,” though not sung in the presence of the androgynous figure, recalls Viola/Cesario's ambi-sexuality as it musically fuses, in an embodied whole of the androgyne, what s/he still considers as dual genders in her/his “poor monster” soliloquy in II.ii. The dramatic irony arises because the song actualises her fears of metamorphosing into an unnatural monstrosity. As a distinctive action in performance, “O Mistress Mine” enhances the visual action of stage transvestism effected through costume and the boy-actor. The tune actualises the notions of androgyny and creates performatively, via an aural experience, the figure of the androgyne because the song’s “high and low” tonalities are sung by (and embodied in) the same person. The binary oppositions found in the visual text of costume-change (where gender cannot be “fused” because it is still constructed [and reconstructed] as a superficial switch of clothing) are dissolved in the harmonics of the tune sung by the pubescent youth. The matrix of experience resultant from the conjunction of the verbal text, visual action and aural harmony creates then the notion of androgyny.

In Trevor Nunn's filmic adaptation, composer Shaun Davey exploits this androgynous possibility of “O Mistress Mine” by having the twins disguised as look-alike girls and singing this tune in unison. Davey's cabaret-style adaptation of the folk song provides a different tune in C major but resonates with Morley's melody and tempo. By having the twins sing together, beginning on a middle-C, Davey accentuates the ambivalent gender of the twins for this is a note that plays “mid-way” and can be sung by both males and females. Sebastian sings in falsetto through much of the song but resumes his masculine tenor and descends to a low G when the lyric indicates “both high and low,” demonstrating how musical range can determine or disguise gender.

In Morley's arrangement, Viola/Cesario's androgynous identity is reinforced further with the song's conclusion on a perfect cadence. In the final measure, the chord of the dominant returns to the tonic, implying not just finality but reasserting the “middleness” of androgyne. This perfect cadence, keeping firmly within the harmonic framework, correlates with Rene Fortin's belief that Viola, in her bisexuality, embodies the myth of the androgyne. In Neoplatonic tradition, the androgyne was associated with an ideal prelapsarian perfection. This perfect figure exemplifies the “primordial totality of being,” embodying and displaying the strengths of both sexes, and representing “the ultimate harmony with which the individual might be endowed.”

Yet the androgyne is “terrifying and seductive precisely because s/he incarnates and emblematizes the disruptive element, signaling not just another category crisis, but—much more disquietingly—a crisis of “‘category” itself.’ In II.ii, Viola recognizes her state as “poor monster,” a Renaissance appellation reserved for unnatural prodigies. Her androgynous fusion deepens the sense of indeterminacy characteristic of the play itself. As Davies notes,

    Shakespeare's cryptic use of the boy-actor playing the girl-boy heroine goes further than mere reversal: it extends female characterisation into a realm which confounds sex-differentiation.

Viola/Cesario's sexual “ambi-valence,” in Jungian terms, “fuses both gender-polarities, animus and anima, in a transgressive wholeness [...] by trespassing over the borders of what society constructs as ‘male’ and ‘female’ behaviour.” Although Barber believes that the saturnalian reversal of sexual roles does not threaten the social structure but serves instead to consolidate it, the threat posed by transvestism, leading to an ambiguous sexual existence that incites potential homosexual impropriety, causes the play to walk the edge of chaos where social and sexual perimeters are violated. Sexual identity becomes a “performance,” readily transformable by the clothes one wears. Such was the idea antitheatricalists of the Renaissance feared most—a fluidity of gender and the resultant licentiousness. The music of “O Mistress Mine” likewise blurs the distinctions between masculine and feminine. “The homoerotic shades into the heterosexual” as they both sing a common tune. Music, via its formal qualities in performance, accentuates as it embodies the themes of sexual ambivalence.
HOMOSOCIAL DRUNKENNESS AND THE MASCULINE DISCOURSE OF SONGS

The drunken revel songs in II.iii stand in contrast to the “androgynous” love tune of “O Mistress Mine” as they create a homosocial ethos. In As You Like It, the masculine courtly ritual of hunting ends with a catch (IV.iii.10-19). The hunt and catch become significant masculine activities that reverberate with a homosocial cadence. The image set before us, in performance, is a bond of masculinity where the men move in a circle after killing the deer, rejoicing in a catch that can repeat itself ad infinitum. This motional and musical circle ostracises the women who become “only a ghostly presence.”

Such a masculine ritual is repeated in the catches of Sir Toby and companions as Maria is significantly left out of the singing though she is physically present. Although many stage (and filmic) productions have interpreted Maria’s role as complicit in (and co-opted into) the festivity which gives cause for Malvolio’s reprimand, the dramatic text remains silent on her role in this misrule. She can thus be interpreted as a silent associate of the merry drunks or as an ostracised other.

The catches together exude an abrupt male persona with short unison passages and common stresses on the downbeats, especially in the example of “Hold Thy Peace.” The dotted figures, accompanied by several quavers and semi-quavers of generally low notes (measures 1-3), create an aggressive downbeat that leads the song into subsequent rounds while creating the whirligig of motion, hence occasioning its ad infinitum characteristic.

Though a common “cake and ale” (II.iii.115) tune, “Three Merry Men Be We” reinforces via its lyrics the visual performance of three men prancing around in a circle of drunken merriment, exemplified in Kenneth Branagh’s 1991 production of Twelfth Night. The rise in tone (measures 1, 3 and 7) expresses, as Cooke propounds, “an outgoing emotion.” Like “Hold Thy Peace,” the major mode (here in B-flat major) evokes an emotion of joy and pleasure. Such an association of mode and emotion has long been exploited in Western music. The major modes of these songs, then, create a mood of festive revelry that balances the minor modes of ambiguity and melancholy felt in other songs such as “Come Away, Come Away Death” and “Hey, Robin, Jolly Robin.”

Tonal mode is also a marker of gender. Eighteenth-century theorist Georg Andreas Sorge explained the hierarchical distinction between major and minor triads in terms he regarded as both natural and God-given—the respective powers of male and female:

Just as in the universe there has always been created a creature more splendid and perfect than the others of God, we observe exactly this also in musical harmony … the first (major triad) can be likened to the male, the second (minor triad) to the female sex.

Arnold Schoenberg’s Theory of Harmony (1911) resonates with Sorge’s ideas. The major mode, considered as masculine, was “natural” while the minor mode, in its association with femininity, was regarded as “unnatural.”

In traditional, pre-feminist Western musicology, cadence was an important marker of gender. A cadence is called “masculine” if the final chord of a phrase or section occurs on the strong beat and “feminine” if it is postponed to fall on a weak beat. Hence, the masculine ending is identified as the objective and rationale of musical discourses while the feminine is preferred in more romantic styles. Such a definition is bound in a binary opposition that associates strength with masculinity and normalcy, and weakness with femininity and abnormality. In “Three Merry Men Be We” and “There Dwelt a Man in Babylon,” the cadences fall on the strong beat (first beat in “tree” of “Three Merry Men Be We” and fourth beat in “la-di” of “There Dwelt a Man in Babylon”). Although it is arguable that the songs were never completed and sung only in abstract, they nevertheless, in composition, seem to reinforce a masculine solidarity characteristic of such drinking
songs.

Grout notes that these rounds were often accompanied with humorous and ribald texts sung unaccompanied by a convivial group, usually of men because of its lewd content. According to Seng, such catches and drinking songs were popular in the sixteenth century and the male audience would have easily recognised them and participated in the singing. The drinking songs then intensify a homosocial ethos, characteristic of Renaissance patriarchy, that merges performance and reality as both audience and characters partake of this masculine ritual.

The drinking songs become more significant because their dramatic placement, following “O Mistress Mine,” undoes the fearful androgynous transgression suggested by the harmonies of the love song. Such a reading of sexual tensions becomes possible when we note how readily Sir Toby shifts focus away from the love tune to the catches (II.iii.57-61). The emphatic masculinity evoked by these catches, though it can be seen as an excess of revelry that leads to disorder in Olivia's household, re-establishes the social system of patriarchy.

Malvolio's interruption gives cause for antagonism in both audience and characters for he disrupts a moment of masculine bonding. Despite legitimately exercising his stewardship, Malvolio is cast as a “Shylockian other” (and possibly a “feminine other” since he disrupts what is considered a virile pursuit) that needs to be expelled. Ironically, another catch (“Farewell Dear Heart”) is used to banish the Puritan steward in an exclusionary manner just as the rounds in *As You Like It* exclude the feminine “other(s).”

**MELANCHOLIC LOVE TUNES AND THE TWIN THEMES OF LOVE AND MUSIC**

Love is an important aspect in discussions of gender. The Renaissance, inheriting many Neoplatonic ideas, considered music to be intimately connected with love. Thomas Morley (1597) adopted the Platonic definition of music as “a science of love matters occupied in harmonie and rhythmos” while Thomas Ravenscroft (1614) notes that music can truly express the universal passion of love and that the power of love may teach a man music. The opening lines of *Twelfth Night* readily establish this relationship between music and emotion, where “music [is] the food of love” (I.i.1). Although Long notes that this music is one that feeds Orsino's melancholia, it can perhaps be seen as a measure by which the latter learns to love and to await his “true love” (II.iii.41).

Love and music are thus considered as “twin themes” in *Twelfth Night*. As Lynn Liptak Budd notes, “[m]usic is more than a tool of courtship in this play. It is an active ingredient in and metaphor for love itself and for love's frustrations.” Much of the incidental (instrumental) music in *Twelfth Night* then, functions to create an atmosphere of romance (e.g., I.i, II.iv).

“Come Away, Come Away Death,” however, serves to problematize the notion of love in *Twelfth Night* as noted by critics. This scene (II.iv) is “the emotional heart of the play” and exemplifies the play's “elusive” quality with its shifting and bittersweet mood occasioned by music. The song is extravagant and almost parodic of the theme of death from unrequited love. It is unusual that Orsino would find such a song “reliev[ing] [his] passion much” (II.iv.4) since the lyrics propound a hopeless love that ends in death. Davies notes that the song contributes to the atmosphere of melancholy with its “peculiar sweet sadness” and feeds Orsino's love-sickness which is now protracted to extremes.

Although the settings of the original song have been lost, Long has attempted to reconstruct the tune by adapting a traditional Elizabethan tune entitled “Heart's ease.” Set in the key of B flat major, the song revels in the minor mode, producing a dark tonality that shades the play as well. The predominance of G minor chords (measures 1, 3, 7 etc), together with other minor chords within the diatonic scale (C minor in measures 9 and 10) darkens the modality of the moment. Following a time signature of 6/8, the downbeats (first and fourth beats) constantly articulate the fatalistic sense of the lyrics (e.g. “death” in measure 3, “slain” in
measure 7, “‘cruel’ in measure 8, “death” in measure 13), accentuating the dark nature of the song. Charlton's adaptation set in F major, a copy of Long's with minor variations, permits the minor mode (G minor and D minor) to prevail over the major as well.75

Musicologists have theorized the affective power of the minor mode in Western music and queried its frequent association with negative emotions. Leonard Meyer postulates the nature of the mode's chromatic potentiality as a possible explanation. Chromaticism possesses ambiguity not only because “chromatic alterations delay or block the expected motion to the normal diatonic tone” but also because a persistent “uniformity of progression” tends to create ambiguity and general tonal instability.76 Peter Kivy explains the power of the minor from a historical perspective, purporting that contentment and joy, among other “resolved” states of feeling, have historically come to be associated with the stable diatonic harmonies of the major mode. Conversely, extreme states have become associated with the “more forceful departures of chromaticism and its modal representative, that is, the minor mode.”77

The tune which is traditionally used for “Gone Away Death” not only darkens the tonality of the play by its musicality but punctuates the dramatic action by its contextual placement as well. It demonstrates the shifting moods, within a single scene, created by music—from the “light airs” (II.iv.5) heard the night before to Feste's melancholic tune. The song precedes Viola/Ceasario's passionate address on love sitting like “Patience on a monument” (II.iv.115). Ironic undertones arise because Orsino fails to realize that it is not his “death” that has been sung but Viola's “death” through her imaginary sister's love.78 Furthermore, in seeking to escape death by demanding the continued pursuit of Olivia's love, Orsino realizes his own “death” by sending his true love away. The song's foreboding melancholy is felt by Viola as well since she realizes that she too, could go to her grave without being able to declare her love. The powerful effect of the song then ironizes Orsino's claim that it is “old and plain” (II.iv.43), sung by common folk about the innocence of love.

“Hey, Robin, Jolly Robin” likewise ironizes its ostensible function via its musicality. Seng notes that the song is used mockingly by Feste to taunt Malvolio, who believes that his lover Olivia loves not him but another—Viola. Though the song may be addressed specifically to Malvolio, it also applies to Viola and Orsino's situation as well since they all share in the knot of confused love.

William Cornyshe's composition (ca. 1485-ca.1523), creates, however, not a tone of mockery (or “jolly-ness”) but of melancholic sadness, particularly because of the use of the Dorian mode where the song is transposed up by a fourth.79 Like “Come Away, Come Away Death,” the song's minor modality predominates yet again (G minor). Fox-Good notes that the minor quality of the initiating G minor chord emerges more clearly because of the entrance of the second and third voices.80 Feste's solitary singing however, heightens the isolation felt not only by Malvolio but perhaps by Feste too since he is the only character not scripted to love another. Furthermore, the singing of fragments from the song without resolutions or cadences amplifies uncertainty.81 Thus, the song's peculiar and affecting melancholy awakens in us a sense of loneliness, sitting like “Patience on a monument, / Smiling at grief” (II.iv.115-116)—a grief that clouds the sunny spirit of Twelfth Night.

The songs in Twelfth Night mediate the issue of gender relations and the dissolution of gender categories as they operate within the dialectics of gender. Music's ambiguous nature compels the understanding of such gender distinctions as possibilities rather than absolutes. It can at once delineate masculinity or androgyny or neither, thus exemplifying music's elusive nature. Likewise, music is not only “the food of love” but it exposes love's problematic nature and deep-seated melancholy, thereby creating a double tonality within the play.

Notes
1. Richmond Noble, Shakespeare's Use of Song (Oxford 1923) 80.
7. All quotes are taken from the Arden edition of *Twelfth Night* (n. 4 above).

56. Ibid. 56.
57. Barber (n. 2 above) 245.
58. Davies (n. 10 above) 59.
60. See appendix 2. Two versions of the song exist. I have here referred to an anonymous composition printed by Thomas Ravenscroft in *Deutromelia* (1609). This is also the version that Long suggests (n. 25 above, 173). The other is found in a manuscript book of rounds collected by Thomas Lant (1580). See the introduction to the Arden edition of *Twelfth Night* (n. 4 above) 84.
61. See appendix 3.
63. See appendixes 5, 6a, and 6b.
64. Quoted in McClary (n. 39 above) 11.
65. McClary (n. 39 above) 10.
66. See appendix 4.
67. “Hold Thy Peace” is not considered here because it is a catch that has no formal resolution and thus, proves difficult to determine its cadence.
69. Quoted in Austern (n. 41 above) 55.
70. Long (n. 25 above) 168.
71. Budd (n. 53 above) 179.
73. Seng (n. 21 above) 110.
74. See appendix 5.
76. Fox-Good (n. 59 above) 67-68.
77. Quoted in Fox-Good (n. 59 above) 69.
79. See appendix 6a, measure 10. I have provided two different scores of the same composition. The first is the fragment sung by Feste from Cornyshe's composition. The second, appendix 6b, is the complete score for three voices.
80. Fox-Good (n. 59 above) 67.
81. Ibid. 69.

**Twelfth Night Literary Criticism (Vol. 85): Further Reading**

**CRITICISM**

*Studies the dynamics of same-sex feminine desire, focusing on the relationship between Olivia and Viola/Cesario in Twelfth Night.*

*Comments on the textual uniqueness of Twelfth Night and examines some of the idiosyncrasies of its manuscript history.*

*Surveys language, structure, theme, and characterization in Twelfth Night and describes the play as the epitome of Shakespearean romantic comedy.*

*Explores the theme of identity in Twelfth Night and examines the symbolism associated with Viola's pseudonym Cesario.*

*Probes Shakespeare's treatment of androgyny through an examination of the disguised Viola in Twelfth Night and Rosalind in As You Like It.*

Centers on the final recognition scene between Viola and Sebastian in Act V, scene i of Twelfth Night, analyzing its relationship to the play's concerns with sexual indeterminacy and deferral.

Questions “festive” interpretations of Twelfth Night that view the play as authorizing a temporary celebration of misrule and personal liberation for the purposes of self-discovery.

Summarizes the history of the “Noli me tangere” (“Touch me not”) icon in Renaissance religious drama and explores the significance of its use in Twelfth Night.

Emphasizes the similarities of theme, plot, and structure in Twelfth Night and King Lear.

Presents a summary of Twelfth Night's sources, themes, characters, and circumstances of composition.

Concentrates on the textual history of Twelfth Night, exploring crucial revisions of the play's text that occurred in the early seventeenth century, resulting in the 1623 Folio edition.

The anonymous critic approves of director Sam Mendes's production of Twelfth Night at the Donmar Warehouse in London, praising its “intelligent simplicity” despite its relatively subdued comedy.

Concentrates on Twelfth Night's theme of love.

Psychoanalytic reading of Twelfth Night's Malvolio that views his character as a dramatic paradigm of the paranoid's unconscious projection of sexual anxiety.
Teaching Guide

Teaching Guide: Introduction

So you’re going to teach William Shakespeare’s Twelfth Night. Whether it’s your first or hundredth time, Twelfth Night has been a mainstay of English classrooms for generations. While it has its challenging spots—complicated language and complexly layered themes—teaching this text to your class will be rewarding for you and your students. Studying Twelfth Night will give them unique insight into the concept of metatheatre and important themes surrounding gender, performance, and love. This guide highlights some of the most salient aspects of the text before you begin teaching.

Note: This content is available to Teacher Subscribers in a convenient, formatted pdf.

Facts at a Glance

- **Publication Date:** Performed 1602; Published 1623
- **Recommended Grade Level:** 9-12
- **Approximate Word Count:** 20,000
- **Author:** William Shakespeare
- **Country of Origin:** England
- **Genre:** Comedy
- **Literary Period:** Renaissance
- **Conflict:** Person vs. Person, Person vs. Society
- **Setting:** Illyria, a fictional city resembling Italy
- **Structure:** Five-Act Stage Comedy

Twelfth Night

As You Like It (written 1599) is another stage comedy by William Shakespeare. Considered to be one of Shakespeare’s “mature comedies” alongside Twelfth Night and Much Ado About Nothing, it explores metatheatre and themes surrounding gender and love through its crossdressing protagonist, Rosalind. Similar to Twelfth Night, As You Like It features an active heroine who must rely on her wits in order to find love and resolve conflicts.

The Great Gatsby (1925) is a novel written by F. Scott Fitzgerald. It follows narrator Nick Carraway as he becomes entangled with the charismatic and mysterious millionaire Jay Gatsby and Gatsby’s longtime infatuation with Daisy Buchanan. Gatsby’s idealized vision of Daisy and desperate desire to impress her mirrors Orsino’s dogged pursuit of Olivia in spite of her disinterest. Additionally, Gatsby’s desire to transcend his class, only to fall short, mirrors Malvolio’s scorned ambitions.

Hamlet (1603) is a tragedy by William Shakespeare. Though Twelfth Night is a comedy, it interrogates themes that have the potential to verge into more serious subject matter. The impact of disguise and performance on identity is explored as Viola pretends to be a male servant. Hamlet also engages with this theme but in a more dangerous setting, offering a glimpse at the multifaceted nature of themes.

Orlando (1928) is a novel written by Virginia Woolf. It explores the fluidity of gender through its protagonist, Orlando, who is transformed from male to female. Orlando’s experiences closely interrogate gender and the
different experiences that accompany living as a man or a woman. The novel, like *Twelfth Night*, grapples with issues surrounding internal and external identity and the frustration entailed in being unable to align them.

“What is our Life?” is a short lyric poem by Sir Walter Raleigh, written sometime between 1590 and 1618, that ruminates on the idea of life as a performance. Raleigh portrays life as a “short comedy” and asks readers to question whether the apparent insignificance of a human life is a blessing or a curse. Much like Shakespeare’s comedies, Raleigh’s poem considers an oftentimes depressing theme from a lighter perspective, encouraging readers to enjoy their brief moment on the stage.

**Teaching Guide: Key Plot Points**

**Viola is Shipwrecked and Decides to Disguise Herself (Act 1, Scene 2):** Viola, a young noblewoman, is rescued from a shipwreck by a sea captain. Viola assumes that she is the only survivor of the wreckage and laments the loss of her twin brother, Sebastian. The sea captain tells her that Illyria, the country she is in, is ruled by the noble Duke Orsino and that Orsino is currently romantically pursuing the Countess Olivia. Lady Olivia has sworn off the company of men as she mourns for her recently deceased brother. With the help of the sea captain, Viola decides to disguise herself as a man and enters Duke Orsino’s court.

**Orsino Sends Cesario to Woo Olivia (Act 1, Scene 5):** Three days after the shipwreck, Viola has joined Duke Orsino’s household as a male servant named Cesario. Orsino dispatches Cesario to woo Lady Olivia on his behalf. Olivia initially refuses to meet with Cesario as she has vowed not to entertain any male suitors, but Cesario’s persistence wins her over. Olivia firmly rejects Duke Orsino’s proposal, but she finds herself attracted to Cesario and sends her steward Malvolio to give Cesario a ring on her behalf. Viola laments that circumstances have become so complicated, as she herself has fallen in love with Orsino.

**Malvolio is Deceived and Olivia Proposes to Cesario (Act 2, Scene 5 and Act 3, Scene 1):** As retribution for Malvolio’s pompous attitude, several members of Olivia’s household decide to play a prank on him. Olivia’s servant Maria composes a letter designed to resemble Olivia’s handwriting, expressing love for Malvolio and instructing him to wear absurd clothes and behave ridiculously. Olivia’s uncle Sir Toby, her suitor Sir Andrew Aguecheek, and her servant Fabian spy on Malvolio as he discovers the letter and gleefully vows to follow its instructions. Meanwhile, Olivia proposes marriage to Cesario, who gently rejects her.

**Sebastien and Antonio Arrive in Illyria, Malvolio is Locked Up, and Sir Andrew Challenges Cesario to a Duel (Act 3, Scenes 3 and 4):** Viola’s twin brother, Sebastian, arrives in Illyria with Antonio, who saved him from the shipwreck. Meanwhile, Malvolio follows the instructions from the letter he believes to have been written by Olivia. His actions scandalize Olivia, who has him locked up in order to regain his wits. Sir Toby then goads Sir Andrew into challenging Cesario to a duel for Olivia’s affections. Viola has never dueled before, on account of being a woman, but is unable to avoid the encounter. The duel is interrupted by Antonio, who mistakes Viola for Sebastian and intervenes. Antonio—who is considered a criminal in Illyria—is arrested, and the confused Viola ignores his pleas for help.

**Viola and Sebastian Reunite and the Confusion is Settled (Act 5, Scene 1):** Orsino and Cesario go to Olivia’s house in order to confront Antonio and continue pursuing Olivia for Orsino. Antonio angrily remarks that Cesario, who he believes is Sebastian, has betrayed his friendship. Orsino and Cesario are greeted by Olivia, who addresses a bewildered Cesario as her husband. Orsino angrily rebuffs Cesario, who he believes has betrayed him by stealing Olivia’s affections. Sebastian’s arrival ends the confusion: the twins reunite and reveal that Olivia has actually married Sebastian, who she mistook for Cesario. Upon realizing that Cesario is actually Viola, a noblewoman, Orsino proposes to her and she happily accepts. The joyous atmosphere is interrupted by the arrival of Malvolio, who realizes he has been duped and swears revenge on the other
Teaching Guide: History of the Text

_Twelfth Night_’s Publication and Performance History: The first known performance of _Twelfth Night_ took place on February 2, 1602, during Candlemas (the last day of the forty-day Christmas festival season). Like many of Shakespeare’s plays, _Twelfth Night_ was not formally published until the release of what is now termed the First Folio in 1623, seven years after Shakespeare’s death. _Twelfth Night_’s memorable characters and subversive treatment of gender have helped it retain its popularity into the modern day. It has been updated and adapted numerous times for film, stage, and print.

- The title of the play refers to the twelfth day of Christmas. This indicates that the play was written with the intention of being performed during the Christmas-Epiphany season, which lasts from December 25 to February 2. One of the hallmarks of Twelfth Night festivities in Shakespeare’s time was the intermingling of social classes, with servants and nobles celebrating together. The mixing of classes is a source of comedy in _Twelfth Night_, as Malvolio is tricked into pursuing a woman above his station and Viola, an aristocratic woman, dresses and behaves as a male servant.
- _Twelfth Night_ is the only Shakespearean text to have a formalized additional title. Though it is primarily referred to as _Twelfth Night_, the play’s full title is set in the First Folio as _Twelfth Night, or What You Will_. Some scholars view this secondary title as a nod to the festive and carefree attitude surrounding the Twelfth Night holiday. Others have drawn a connection between the irreverent sentiments of _What You Will_ and Shakespeare’s 1599 comedy, _As You Like It_.

Shakespeare and Metatheatre: The term metatheatre refers to the act of calling attention to a play’s nature as a dramatic performance. A recurring theme throughout Shakespeare’s body of work is the idea that life itself is a series of performances. This is reflected through subtle acknowledgements of fictionality and performance within his works. The plots of several of Shakespeare’s plays, including _Hamlet_, _A Midsummer Night’s Dream_, and _The Tempest_, include stagings of other, fictional plays. One of the most famous quotes from _As You Like It_ asserts that “all the world’s a stage / And all the men and women merely players.” Metatheatre is present in _Twelfth Night_ as well because the plot and comedy arise from Viola’s role as an actress.

- Gender on the Shakespearean Stage: Elizabethans believed that acting was a masculine profession and that such a transitory and oftentimes unsavory lifestyle was unsuitable for women. As such, almost all theatre troupes were composed of male performers, with female roles played by prepubescent boys. Though most modern treatments of _Twelfth Night_ cast female performers as Viola, the role would have originally featured a male actor playing a female character pretending to be a man. This would have enhanced the metatheatrical elements of the play, providing a constant visual reminder of both Viola’s disguise and performance.

The English Renaissance and Inspirations for _Twelfth Night_: From the late 15th to the early 17th centuries, England underwent a significant cultural and artistic shift known as the English Renaissance. The proliferation of the printing press in the 15th and early 16th centuries increased literacy and heightened interest in literature as an art form. This further inspired a resurgence of interest in classical works, with many scholars devoting themselves to translating Greek and Roman literature into English. Art, literature, and drama produced during the English Renaissance incorporated references and homages to classical forms and myths, as is evidenced in _Twelfth Night_ by the frequent allusions to Greco-Roman mythology.

- Sources for _Twelfth Night_: English Renaissance writers adapted Greco-Roman plotlines and characters into their writing. For example, plotlines involving mistaken identity were common
comedic fodder. *Twelfth Night* is thought to have been inspired by Barnabe Rich’s story “Apollonius and Silla,” which was based on the Italian comedy *Gl’ingannati*, or *The Deceived Ones*, written collectively by members of the Siennese Accademia degli Intronati in 1531. Though its plot is more similar to that of “Apollonius and Silla,” *Twelfth Night* notably takes the idea of the disguised heroine falling in love with her employer from *Gl’ingannati*. Another potential influence is Plautus’ *Menaechmi*, which involves twins who are mistaken for one another and of which Shakespeare’s 1594 play *The Comedy of Errors* is a direct adaptation.

---

**Teaching Guide: Significant Allusions**

**Allusions to Ancient Greece and Rome:** The English Renaissance brought about a renewed interest in classical works, namely Greco-Roman mythology and history. In *Twelfth Night*, Shakespeare uses allusions to mythological figures in order to characterize Orsino’s declarations of love as hyperbolic and inauthentic. Notable mythological allusions in *Twelfth Night* include the following:

- In act 1, scene 1, Orsino hopes that Olivia will someday be struck by love’s “golden shaft,” an allusion to **Cupid**, the Greek god of love. Cupid’s golden arrows inspired insatiable love and desire in mortals. Orsino’s allusion to Cupid suggests that his love for Olivia is externally motivated and forced upon him, rather than founded on true affection. Cupid’s arrows were also often considered a source of misery, especially in cases of unrequited love.

- Also in act 1, scene 1, Orsino compares Olivia to **Diana**, the Roman goddess of chastity and the hunt, by alluding to the story of Diana and Actaeon from **Ovid’s Metamorphoses**. After being caught watching Diana bathe, Actaeon is turned into a “hart,” or male deer, and hunted down by his own dogs. Through this allusion, Orsino implies that the “cruel hounds” that pursue him are his own desires.

- Orsino reuses this allusion when, in act 1, scene 4, he compares Cesario’s “smooth and rubious” lips to those of Diana. The repetition of this allusion serves two functions. First, Orsino’s commendation of Cesario’s beauty reminds the audience that Cesario is actually Viola, a woman. Second, this comparison highlights the hyperbolic nature of Orsino’s love and foreshadows the rapid transfer of his affections from Olivia to Viola.

- In act 5, scene 1, Orsino compares himself to an “Egyptian thief,” in reference to the character of **Thyamis** from the *Aethiopica*, a novel written by Greek writer Heliodorus of Emesa in the 3rd century CE. Thyamis, the leader of a band of Egyptian thieves, falls in love with Chariclea, the heroine of the story. When “faced with death,” Thyamis attempts to kill Chariclea to prevent any other man from having her. The implication of this allusion is that Orsino would rather kill Olivia than see her married to Cesario, highlighting the dangers of possessive, unbalanced love.

---

**Teaching Guide: Teaching Approaches**

**Disguise and Performance:** Appearances and disguises are central elements of the plot of *Twelfth Night*, and many characters use physical and verbal means to hide their true feelings or identities. The myriad disguises contribute to the confusion that drives the play’s plot, and thematically suggest that disguise and performance prevent people from forming meaningful connections.

- **For discussion:** How does Viola’s disguise complicate her relationships with Orsino and Olivia? What does this suggest about how disguises impact interpersonal relations?

- **For discussion:** Consider how other characters might be performing. Do you think that Olivia’s grief over her brother’s death is genuine or a performance? What about Orsino’s love for Olivia? Do other
characters engage in performance? Defend your answers using evidence from the text.

- **For discussion:** How is the confusion over identity resolved? Do you think that the characters will now be able to form more meaningful, honest relationships? Why or why not?

- **For discussion:** A recurring theme in Shakespeare’s works is that life itself is a performance and that people act out different roles in different scenarios. Do you agree with this idea? Why or why not? Are there moments in your own life where you feel like you have to put on a performance?

**Internal vs. External Identity:** Themes surrounding identity in *Twelfth Night* manifest through the disparity between a character’s sense of self and the way they are perceived by others. The contrast between internal and external identity is particularly apparent in the case of Viola, as she is forced to grapple with her thoughts and feelings along with the external perceptions that result from her role as Cesario. And, although Olivia ends up heterosexually married to a man, it was a woman who first won her heart, calling into question the nature of gender, sexuality, and Olivia’s identity.

- **For discussion:** Why does Viola choose to disguise herself as a man rather than being honest about her identity? Do you think the Cesario persona is an authentic extension of Viola or is it simply an act? What evidence from the text makes you think so?

- **For discussion:** By the end of the play, Cesario has become—in the minds of other characters—a separate entity from Viola. This is evidenced by Orsino’s claim that Viola will continue to be Cesario so long as she is dressed as a man. What does this suggest about the power of external perception in shaping identity? Do you agree with Orsino that clothes and external presentation can define a person’s identity? Why or why not?

- **For discussion:** How is Sebastian’s claim that Olivia has married both a “maid and man” a double entendre? What is the implication of this remark on his marriage to Olivia? To what extent can Sebastian be considered a replacement for the unobtainable Cesario?

- **For discussion:** How does the subplot describing Malvolio’s deception and imprisonment engage with the idea of external identity? How does the way Malvolio sees himself contrast with the way that other characters view him? What does he hope to accomplish by dressing and speaking the way he does? Does it work? Why or why not?

**The Dangers of Unbalanced Love:** For the majority of *Twelfth Night*, confusion, inequity, and dishonesty dominate the relationships between characters. Malvolio is tricked into believing that Olivia loves him, Viola reluctantly woos Olivia on Orsino’s behalf, and Olivia falls for Cesario without realizing that he is actually a woman in disguise. This confusion culminates in Malvolio being locked in a dungeon and Orsino threatening to kill Cesario and Olivia for seemingly marrying behind his back. Though all seems well after Sebastian and Viola reveal their identities, the suffering and jealousy experienced before that point highlight the perils of excessive or imbalanced love.

- **For discussion:** *Twelfth Night* begins with Duke Orsino hyperbolically professing his love for Olivia. Why do you think Shakespeare chose to introduce Orsino’s romantic woes before any other plot elements? What tone does this set for the rest of the play?

- **For discussion:** How do different characters experience romantic love? Is it primarily a positive or negative experience? What about platonic love? To what extent is love associated with suffering? What does the play suggest is the cause of this suffering?

- **For discussion:** The characters in *Twelfth Night* experience a variety of imbalances during their pursuit of love, including class differences, hidden identities, and a lack of reciprocation. What methods do different characters use in order to overcome these barriers? Are any of them successful? What does this suggest about the nature of unbalanced love?

- **For discussion:** What are some examples of balanced love—either romantic or platonic—in the play? Do you think that the couples who end up together at the end of the play have found balance? Why or why not?
Metatheatre: Metatheatre refers to a dramatic work’s recognition of its own fictionality. From plays-within-plays to witty asides to the audience, Shakespeare’s body of work is filled with metatheatrical elements, and *Twelfth Night* is no exception. Metatheatre is established mainly through Viola, who is dressed as a man for the majority of the play. Viola’s disguise allows the audience to recognize her as an actress. Furthermore, though modern performances typically employ female actors, the role would have originally been played by a young boy, creating a visual reminder that Viola is not what she seems.

- **For discussion:** When *Twelfth Night* was first performed, Viola would have been played by a male actor. How does this impact your understanding of the play? Does your interpretation of the play change if Viola is played by a female actor? How so? What does this suggest about how gender is performed?
- **For discussion:** In act 3, scene 4, Fabian notes that if the events of *Twelfth Night* were “played upon a stage now, [he] could condemn it as an improbable fiction.” How is this statement ironic? What does it suggest about the relationship between fiction and reality?
- **For discussion:** How might a live theatre production of *Twelfth Night* differ from a film version in terms of metatheatricality? Imagine that you are the director of a theatrical production of *Twelfth Night*. How might decisions like casting, costumes, music, and props impact how an audience interprets the play? Would you choose to enhance or minimize the metatheatrical elements of the play? How would you do so?

Tricky Issues to Address

Shakespeare’s Diction and Syntax Are Unfamiliar: *Twelfth Night* may present a challenge for students because of its unfamiliar vocabulary and verse structure. Unfamiliar language can be especially difficult with a comedy, as much of the humor is found in Shakespeare’s wordplay. Helping students navigate conventions of Early Modern English will allow them to better engage with *Twelfth Night*’s themes and technical elements.

- **What to do:** Consider introducing students to the plot of *Twelfth Night* prior to reading the text. The added context will allow them to more easily parse the unfamiliar language.
- **What to do:** Read aloud the first section of the assigned reading as a class, allowing time for students to ask questions and grow accustomed to the style. Giving students a chance to hear the text read aloud introduces them to the concepts of meter, verse, and prose, and experience how those devices function within the play.
- **What to do:** Screen scenes from a filmed version of *Twelfth Night* to give students a better understanding of how tone and humor can be conveyed. Also remind them that actors can interpret the text in a variety of ways and that no performance can be considered definitive.
- **What to do:** Consider handing out vocabulary sheets prior to each section of assigned reading. Instruct students to write down unfamiliar words, phrases, or concepts and encourage them to research some of the items on their list. Have students share their research in small groups and consider addressing common difficulties as a class.

*Twelfth Night* Upholds Traditional Gender and Class Distinctions: Though *Twelfth Night* is often lauded for its subversive explorations of gender, its resolution upholds a traditional model of marriage and, by extension, of women’s roles. The play also mocks the ambitions of the lower classes: Malvolio is humiliated for attempting to transcend his station. While students may feel confident contextualizing the outdatedness of the text’s sexism, for instance, they might be confused by the brutality of Malvolio’s treatment, given the play’s classification as a comedy.
• What to do: Remind students that both gender and class are broad themes within *Twelfth Night* and encourage them to consider how the sexist or classist sentiments espoused by certain characters advance or complicate these themes. Ask students if they think these moments are meant to be interpreted straightforwardly, and whether or not the play provides refutations of sexism or classism.

**Content Notice:** *Twelfth Night* contains bawdy humor, and sanctions sexist and classist language and beliefs.

### Alternative Approaches to Teaching *Twelfth Night*

While the main ideas, characters, themes, and discussion questions above are typically the focal points of units involving teaching *Twelfth Night*, the following suggestions represent alternative readings that may enrich your students’ experience and understanding of the play.

**Focus on clothing as a motif.** Clothing is a motif within *Twelfth Night*, from Viola’s “woman’s weeds” to Malvolio’s ridiculous yellow stockings and crossed garters. How do characters’ outfits influence their self-expression? How do clothes affect the way they are perceived by others? In what ways are clothes comparable to costumes in *Twelfth Night*? How does clothing as a motif support the idea of life as a performance?

**Focus on the Malvolio subplot and class as a theme.** Though *Twelfth Night* is a comedy, not every character is given a happy ending. Malvolio swears vengeance against the central characters after learning that he has been duped, creating a contrast to the otherwise joyful ending. Furthermore, unlike Viola, whose subversion of gender is readily accepted by the other characters, Malvolio’s efforts to defy his class are met with scorn and ridicule.

• **For discussion:** What does Malvolio’s treatment suggest about the privileges given to the nobility in terms of self-expression? What does it suggest about the limits of ambition? How is class enforced by the other characters in the play?

• **For discussion:** Do you empathize with Malvolio, or do you think he got what he deserved? Why do you feel that way? How does the message of the play change based on whether the Malvolio subplot is read as comic or tragic?

• **For discussion:** What might revenge look like for Malvolio? (How) Do you think he will obtain it?

**Focus on Feste as a character, and the legacy of the Shakespearean Fool.** Shakespeare’s fools are some of his most fascinating and clever characters, from Touchstone in *As You Like It* to the Fool in *King Lear*. Though the fool was a common archetype in Elizabethan theatre, Shakespearean fools are known for diverging from their purely comedic roots. They often engage the other characters and the audience with meaningful questions and commentary relating to the themes of a play. *Twelfth Night*’s Feste continues this legacy, providing wise commentary and witty humor in equal measure.

• **For discussion:** Feste’s songs are often out of tune with the festive events going on around him. What might this suggest about the true message of the play?

• **For discussion:** What does Feste mean when he says “better a witty fool than a foolish wit”? How is Feste’s intelligence established? Why do you think Shakespeare made Feste, a lowborn character, arguably the wittiest presence in the play?

• **For discussion:** Feste’s ability to travel between Orsino’s and Olivia’s estates gives him a near-omniscient presence within the play. He also has very little stake in the outcome of events. (How) Does this lack of investment enable him to be an honest reporter of events? (How) Does this
honesty manifest itself during his interactions with other characters?

Focus on *Twelfth Night* as a comedy. Mistaken identity, separated twins, and role reversal are comedic tropes that can be found across many of Shakespeare’s plays. How have comedy tropes changed between Shakespeare’s time and the modern day? Have you seen any of these tropes in more modern media? Do you find *Twelfth Night* funny? Why or why not? How might you update the play’s humor to be more accessible to a modern audience?
Quotes

Quotes in Context: "If Music Be The Food Of Love, Play On"

Context: The ruler of Illyria, Duke Orsino, is in love with Olivia, a young, beautiful, and very wealthy countess who is in mourning for a dead brother. The duke's affection is not requited by the countess, who will not admit his emissary or hear his protestations of love and pleads mourning for her brother as the reason she may not. At the beginning of the play, Duke Orsino is listening to melancholy music as he waits for his messenger to Olivia, Valentine, to return with news from her. (Over 150 years later, in 1775, another English dramatist, Richard Brinsley Sheridan, paraphrased, in The Rivals, this famous quotation thus: "Is not music the food of love?") (In modern times, the phrase "a dying fall" is used by T. S. Eliot in The Love Song of J. Alfred Prufrock, l. 52.)

DUKEIf music be the food of love, play on,Give me excess of it; that, surfeiting,The appetite may sicken, and so die.That strain again--it had a dying fall.O, it came o'er my ear, like the sweet soundThat breathes upon a bank of violets,Stealing, and giving odour...

Quotes in Context: "Journeys End In Lovers' Meeting"

Context: Sir Toby Belch, uncle to Olivia, and Sir Andrew Aguecheek are at Olivia's house when Feste, her servant and jester, enters. Sir Toby and Andrew have been talking nonsense, and with Feste's entrance all three continue in the same vein. The older men ask Feste for a song, and he asks if they would like a love song or one of "good life." Toby chooses a love song, and Andrew assents because he does not care for good life. Feste then sings one of Shakespeare's loveliest songs, both stanzas of which follow:

FESTEO mistress mine, where are you roaming?O stay and hear, your true love's coming,That can sing both high and low.Trip no further pretty sweeting;Journeys end in lover's meeting,Every wise man's son doth know...What is love? 'Tis not hereafter:Present mirth hath present laughter,What's to come is still unsure.In delay there lies no plenty,Then come kiss me sweet and twenty.Youth's a stuff will not endure.

Quotes in Context: "Laugh Yourselves Into Stitches"

Context: Malvolio, a pompous, self-loving, and sour steward in Countess Olivia's household, harbors ridiculous aspirations for his mistress' affections. He is disliked by Sir Toby Belch, Olivia's bibulous uncle, and Maria, Olivia's waiting woman. Seeking revenge on Malvolio for his officious interference with their drinking late one night, they obtain their goal by preparing a love note in Olivia's hand and style and dropping it in Malvolio's path. He believes it to be from Olivia and obeys its instructions to appear before her cross-gartered, in yellow stockings, smiling, and kissing his hand--affectations which she abhors. As he approaches, Maria fetches Sir Toby and Fabian, a servant who also dislikes Malvolio, with these words:

MARIIf you desire the spleen, and will laugh yourselves into stitches, follow me. Yond gull Malvolio is turned heathen, a very renegado; for there is no Christian that means to be saved by believing rightly, can ever believe such impossible passages of grossness. He's in yellow stockings.SIR TOBYAnd cross-gartered?MARIAMost villainously...
Quotes in Context: "Love Sought Is Good, But Given Unsought Is Better"

Context: Viola, on a sea voyage with her twin brother, Sebastian, is shipwrecked on the seacoast of Illyria. Convinced that her brother has been drowned, she determines to serve temporarily the ruler of Illyria, Duke Orsino, in the guise of a eunuch and under the name of Cesario. The duke employs her thus to press his suit for the hand of the Countess Olivia, who does not love him and who has put him off by pleading mourning for a dead brother. Viola-Cesario, with an entourage, calls at Olivia's home, gains admittance, and attempts to persuade Olivia of the duke's devotion. Olivia rejects the duke but realizes that she has fallen in love with the messenger, believing Viola to be a man. Now, on Viola-Cesario's second visit, Olivia confesses her love, and in an attempt to persuade an angry and perplexed Viola she argues:

OLIVIA. . .Cesario, by the roses of the spring,By maidhood, honour, truth, and every thing, I love thee so, that, maugre all thy pride, Nor wit, nor reason, can my passion hide. Do not extort thy reasons from this clause, For that I woo, thou therefore hast no cause. But rather reason thus with reason fetter; Love sought is good, but given unsought is better.

Quotes in Context: "Many A Good Hanging Prevents A Bad Marriage"

Context: Maria, Countess Olivia's waiting woman, is quarreling with Feste, the Clown, another of Olivia's servants, and he returns her some saucy answers:

MARIANay, either tell me where thou hast been, or I will not open my lips so wide as a bristle may enter, in way of thy excuse. My lady will hang thee for thy absence. FESTE Let her hang me. He that is well hanged in this world needs to fear no colours. MARIAMake that good. FESTE He shall see none to fear. . . . MARIAYet you will be hanged for being so long absent, or, to be turned away. Is not that as good as a hanging to you? FESTE Many a good hanging prevents a bad marriage; . . .

Quotes in Context: "Midsummer Madness"

Context: A self-loving steward, Malvolio, nurses ridiculous aspirations for the affections of his mistress, Countess Olivia. He is greatly disliked by Sir Toby Belch, Olivia's bibulous uncle, and Maria, the countess' waiting woman. They, together with Sir Andrew Aguecheek, a ridiculous and hopeless suitor to Olivia and tool of Sir Toby, seek revenge on Malvolio because he has interfered in their affairs. They accomplish their aim by dropping a love note for him to discover in the garden. He finds it and, completely duped into believing it to be from Olivia and meant for him, obeys its injunctions to appear before her in yellow stockings, cross-gartered, smiling idiotically and kissing his hand. Olivia, in mourning for a dead brother, is amazed by the sober and civil steward's appearance and behavior, and thinks he is mad.

MALVOLIO Remember who commended thy yellow stockings— OLIVIA Thy yellow stockings? MALVOLIO And wished to see thee cross-gartered. OLIVIA Cross-gartered? MALVOLIO Go to, thou art made, if thou desirest to be so—. . . If not, let me see thee a servant still. OLIVIA Why this is very midsummer madness. . . . Good Maria, let this fellow be looked to. . . . Let some of my people have a special care of him, . . .
Quotes in Context: "No More Cakes And Ale"

Context: It is after midnight at the home of the wealthy countess Olivia. Sir Toby Belch, her riotous uncle and house guest, and his friend Sir Andrew Aguecheek are joined in their drinking and jesting by Feste, a clownish servant of Olivia. When Feste is prevailed upon to sing, the group becomes so noisy that Maria, Olivia's waiting-woman, warns them that Olivia will surely dispatch her ill-tempered steward, Malvolio, to put an end to the din. Malvolio appears and upbraids the rioters for lack of "wit, manners, and honesty," but Sir Toby and Feste respond by singing contemptuous responses and finally saying to Malvolio:

SIR TOBY Out o' tune sir, ye lie. Art any more than a steward? Dost thou think because thou art virtuous, there shall be no more cakes and ale? FESTE Yes by Saint Anne, and ginger shall be hot i' th' mouth too. SIR TOBY Th'art i' th' right. Go sir, rub your chain with crumbs. A stoup of wine, Maria.

Quotes in Context: "Patience On A Monument"

Context: In Illyria, Viola, a shipwrecked gentlewoman, is disguised as a page, "Cesario," in the service of Duke Orsino, whom she secretly loves. Orsino, professing overpowering sentiment for the wealthy Countess Olivia, sends "Cesario" with messages of love to Olivia, who in turn falls in love with "Cesario." Viola, still in disguise, while arguing with Orsino about the ability of a man to love versus the ability of a woman to love, relates the story of her father's daughter, herself of course, who harbored a deep secret passion:

VIOLA . . . My father had a daughter loved a man, As it might be perhaps, were I a woman, I should your lordship. DUKE And what's her history? VIOLA A blank my lord. She never told her love, But let concealment like a worm i' th' bud Feed on her damask cheek. She pined in thought, And with a green and yellow melancholy She sat like Patience on a monument, Smiling at grief. Was not this love indeed? We men may say more, swear more, but indeed our shows are more than will; for still we prove much in our vows, but little in our love.

Quotes in Context: "Some Have Greatness Thrust Upon Them"

Context: Malvolio is a self-loving, pompous steward in Countess Olivia's household. He nurses ridiculous aspirations for Olivia's affections, and is disliked by Sir Toby Belch, Olivia's bibulous uncle, and Maria, Olivia's waiting woman. They, together with Sir Andrew Aguecheek, Sir Toby's friend and hopeless suitor for the countess' hand, seek revenge on Malvolio because he has officiously interfered with their drinking and merrymaking late one night. Maria prepares, in imitation of Olivia's handwriting and style, a love note to drop in Malvolio's way. He, walking in the garden, finds the note, recognizes the handwriting, breaks the seal, reads the contents and becomes convinced that the epistle is from Olivia and is meant for him. Thus he is completely gulled, and the revenge of the tricksters is well in train. The letter proper begins:

MALVOLIO [reads] If this falls into thy hand, revolve. In my stars I am above thee, but be not afraid of greatness. Some are born great, some achieve greatness, and some have greatness thrust upon 'em. Thy fates open their hands, . . .
Quotes in Context: "Youth's A Stuff Will Not Endure"

Context: The hand of the young, beautiful, and wealthy Countess Olivia is sought by a foolish knight, Sir Andrew Aguecheek. Sir Toby Belch, Olivia's uncle, encourages, for his own bibulous and financial ends, Sir Andrew's quite hopeless suit. Sir Andrew, recently persuaded to remain in attendance on Olivia for another month, is drinking and carousing with Sir Toby late at night. They are joined by Feste, Olivia's jester, who is prevailed upon by the two tipsters to sing a love song. This is the second stanza:

FESTE
What is love? 'Tis not hereafter; Present mirth hath present laughter, What's to come is still unsure. In delay there lies no plenty; Then come kiss me sweet and twenty. Youth's a stuff will not endure.

Character and Theme Quotes: Essential Quotes by Character: Viola

Essential Passage 1: Act 1, Scene 2, Lines 55-64

VIOLA:
I prithee, and I'll pay thee bounteously,
Conceal me what I am, and be my aid
For such disguise as haphly shall become
The form of my intent. I'll serve this duke:
Thou shalt present me as an eunuch to him:
It may be worth thy pains; for I can sing
And speak to him in many sorts of music
That will allow me very worth his service.
What else may hap to time I will commit;
Only shape thou silence to my wit.

Summary

Viola, a gentlewoman of Messaline, has been shipwrecked on the coast of Illyria, along with the ship’s captain. Having a twin brother on the ship, Viola believes him drowned. On inquiring from the captain where they are, she learns that Illyria is the captain’s birthplace, and they are near the home of Count Orsino, a duke who is currently a bachelor. Viola had heard her father speak of Orsino and is curious about the bachelorhood
of so rich and noble a man. The captain tells her of Orsino’s love for Olivia, a lady of the region. However, because Olivia is in mourning for her father and brother, she will accept no suitors. Viola is intrigued by this tale and decides that she would like to aid the duke’s suit. At first she proposes to present herself as a lady-in-waiting to Olivia, but the captain informs her that Olivia is not even accepting visitors. Viola then decides to disguise herself as a male eunuch (i.e., person surgically altered prior to the onset of puberty so as to prevent the development of secondary sex characteristics such as a beard) to Count Orsino as a servant. Her intent is to act as a matchmaker between Orsino and Olivia because she desires to see true love fulfilled.

**Essential Passage 2:** Act 1, Scene 4, Lines 22-44

**DUKE ORSINO:**

O, then unfold the passion of my love,

Surprise her with discourse of my dear faith:

It shall become thee well to act my woes;

She will attend it better in thy youth

Than in a nuncio's of more grave aspect.

**VIOLA:**

I think not so, my lord.

**DUKE ORSINO:**

Dear lad, believe it;

For they shall yet belie thy happy years,

That say thou art a man: Diana's lip

Is not more smooth and rubious; thy small pipe

Is as the maiden's organ, shrill and sound,

And all is semblative a woman's part.

I know thy constellation is right apt

For this affair. Some four or five attend him:
All, if you will; for I myself am best

When least in company. Prosper well in this

And thou shalt live as freely as thy lord,

To call his fortunes thine.

VIOLA:

I'll do my best

To woo your lady. [Aside] Yet, a barful strife!

Whoe'er I woo, myself would be his wife.

Summary

Viola has presented herself to Count Orsino as a eunuch named Cesario. Within a matter of days, she has earned his trust to the point where he is comfortable sending Viola to Olivia to persuade her to accept his suit. Orsino believes that Olivia will be more accepting of “Cesario” than she will of himself. Although Viola is doubtful, Orsino points out that her feminine appearance will be less off-putting than his own. He observes that Viola’s features are closer to a woman’s than a man’s. Her mouth is softer, her voice more tender, her very appearance is womanly (this is a reference to his belief that “Cesario” is a eunuch and thus has retained more boyish qualities). Orsino sends Viola off with several attendants and bids them leave, as he wants to be alone. Viola promises that she will do her best to present him as a fitting suitor to Olivia, but in an aside she reveals that she is now in love with Orsino and would sooner woo him for herself.

Essential Passage 3: Act 5, Scene 1, Lines 258-284

VIOLA:

If nothing lets to make us happy both

But this my masculine usurp'd attire,

Do not embrace me till each circumstance

Of place, time, fortune, do cohere and jump

That I am Viola: which to confirm,

I'll bring you to a captain in this town,

Where lie my maiden weeds; by whose gentle help
I was preserved to serve this noble Count;
All the occurrence of my fortune since
Hath been between this lady and this lord.

SEBASTIAN:
[To Olivia]
So comes it, lady, you have been
mistook:
But nature to her bias drew in that.
You would have been contracted to a maid;
Nor are you therein, by my life, deceived,
You are betroth'd both to a maid and man.

DUKE ORSINO:
Be not amazed; right noble is his blood.
If this be so, as yet the glass seems true,
I shall have share in this most happy wreck:
[To Viola.]
Boy, thou hast said to me a thousand times,
Thou never shouldst love woman like to me.

VIOLA:
And all those sayings will I overswear;
And all those swearings keep as true in soul
As doth that orbed continent the fire
That severs day from night.
DUKE ORSINO:

Give me thy hand;

And let me see thee in thy woman's weeds.

Summary

At the conclusion of the play, all the principal characters are together on stage. Sebastian and Viola meet for the first time since the shipwreck. Because both believe the other has been drowned, they are incredulous at what they see, Sebastian more so, since his sister is dressed as a man. Yet Viola reveals herself to be a noble lady and the sister of Sebastian. As proof, she mentions the sea captain, resident in the town, who has her original clothing. Sebastian then says to Olivia, whom he has just married, that she escaped being wedded to a woman. Instead, she has been married to a virginal man and thus has retained her honor. Orsino wonders at Viola’s deception, yet remembers that she, as Cesario, promised him that she loved Orsino as she could never love a woman. As Viola swears her love to him again, Orsino asks for her hand in marriage.

Analysis of Essential Passages

As the central character in *Twelfth Night*, Viola is the hub of the action and the link between the play's different plots. She is the connection between the home of Orsino and that of Olivia, where the drama involving “Cesario,” Sebastian, and Olivia is played out. Her ability to be “all things to all men” facilitates the chaos of the disguised identities, hidden plots, and unknown twists that weave through the story.

After the shipwreck, she decides to be a matchmaker to two people who are strangers to her. Unable to play the part of a woman and serve Olivia, she ingeniously takes up the guise of a man to serve Orsino. Wisely she portrays herself as a eunuch. Because a eunuch has undergone surgery as a youth in order to prohibit the onset of puberty, her high voice and lack of beard will give some credence to her disguise, whereas a simple costume change would have immediately revealed her true gender.

Yet her femininity is still apparent, even with such a plausible disguise. Orsino identifies not just womanly features but the subtle personality differences that were attributed to a woman of that time. It is these attributes that Orsino believes will make “Cesario” more acceptable to Olivia as a messenger than if he had sent a man. This perception on the part of Orsino will also ease the way at the end from his thinking of her as a man to thinking of her as a woman and thus an “acceptable” object of love.

In one of the play's several plot twists, Viola falls in love with the man she is to represent to another woman. Yet, against what might be expected, Viola in no way shirks this duty; she truly tries to present Orsino to Olivia as the man of her dreams. The complication arises, however, when Olivia falls in love with Viola in the guise of Cesario. The oddness of this lies not so much in the fact of their being two women, but in the fact that Cesario is a eunuch. Viola’s seeming “boyishness” hides her femininity but does not hide her attractiveness to either gender. This misunderstanding is the root of the comedic element in Shakespearean drama: in the Bard's plays, there are most always complications on the road to love.

As the romantic resolutions unfold in the final act, it is Viola’s revelation of her gender that ties up all the loose ends. Olivia’s hasty marriage to Sebastian is the catalyst that forces her to reveal her true identity. Olivia has believed that she has known “Cesario” for enough time to warrant marriage, yet Sebastian has known Olivia for a very short time indeed before he acceded to her request to wed. Olivia’s confusion of Sebastian for “Cesario” propels Viola to uncover her true self. Also, her shock in finding her brother alive slows this
revelation so a full explanation can advance the plot.

Almost unbelievably swiftly, Orsino transfers his love from Olivia to a person just moments before he believed to be a male eunuch. Yet instantaneous love is a typical Shakespearean element to speedily resolve conflicts and bring the plot to a conclusion. Thus all (with the exception of the embittered Malvolio) are joined in happy wedlock, completing the revelries that are associated with the “Twelfth Night” festivities of the Christmas holidays.

Character and Theme Quotes: Essential Quotes by Theme: Love

Essential Passage 1: Act 1, Scene 1, Lines 1-15

DUKE ORSINO:

If music be the food of love, play on;
Give me excess of it, that, surfeiting,
The appetite may sicken, and so die.
That strain again! it had a dying fall:
O, it came o'er my ear like the sweet sound,
That breathes upon a bank of violets,
Stealing and giving odour! Enough; no more;
'Tis not so sweet now as it was before.
O spirit of love! how quick and fresh art thou,
That, notwithstanding thy capacity
Receiveth as the sea, nought enters there,
Of what validity and pitch soe'er,
But falls into abatement and low price,
Even in a minute: so full of shapes is fancy
That it alone is high fantastical.

Summary

Orsino, Count (or Duke) of Illyria, is sick with love for the lady Olivia. In his chamber, he is listening to the court musicians perform a love song. Bidding them to play on, he hopes the music will increase his feeling of love until he is sick of it. Overindulgence will break the obsession, he believes, and thus release him from the
pain of unrequited affection. At last he calls a halt to the music, saying it is not so sweet as when it first began: he is sick of the music but not of love. Orsino thinks that there does not seem to be a limit to love’s capacity. Like the sea that refuses to rise no matter how much water is added to it from the rivers and the rains, his love for Olivia is full. He acknowledges that as the sea level changes with the rise and fall of the tides, love may do likewise without changing capacity. His messenger arrives to announce that Olivia will not entertain Orsino’s suit, because she is still in mourning after the death of her brother. Orsino is content to wait but vows he will not give up until he wins Olivia’s heart.

**Essential Passage 2: Act 2, Scene 4, Lines 103-120**

**DUKE ORSINO:**

There is no woman's sides

Can bide the beating of so strong a passion

As love doth give my heart; no woman's heart

So big, to hold so much; they lack retention.

Alas, their love may be call'd appetite,

No motion of the liver, but the palate,

That suffer surfeit, cloyment and revolt;

But mine is all as hungry as the sea,

And can digest as much: make no compare

Between that love a woman can bear me

And that I owe Olivia.

**VIOLA:**

Ay, but I know—

**DUKE ORSINO:**

What dost thou know?

**VIOLA:**

Too well what love women to men may owe:
In faith, they are as true of heart as we.

My father had a daughter loved a man,

As it might be, perhaps, were I a woman,

I should your lordship.

Summary

Orsino has commissioned Viola/Cesario to plead his case to Olivia, who refuses to accept him as a suitor. He commands Cesario to force Olivia love him, which Cesario states cannot be possible. Love is not obedient to a command, but must be given freely. Orsino, however, disagrees. He believes that a woman is subject to passion, but not to love, and therefore her passions must be appealed to. A woman’s love, he says, is like an appetite that must be fed. A man’s capacity, however, is as big as the sea, which can accept all love and still not be satisfied. But a woman is too weak and too inconstant to be capable of so much love, and therefore is easily swayed. Viola/Cesario knows, however, the amount of love a woman may give to a man. She refers to “her father’s daughter” who once loved a man, as Cesario himself would love Orsino—if he were a woman. Of course, since Cesario is really Viola, she is skirting around the edges of a confession of her own love for Orsino, to which Orsino is immune.

Essential Passage 3: Act 3, Scene 1, Lines 157-164

    OLIVIA:

    Cesario, by the roses of the spring,

    By maidhood, honour, truth, and everything,

    I love thee so, that, maugre all thy pride,

    Nor wit nor reason can my passion hide.

    Do not extort thy reasons from this clause,

    For that I woo thou therefore hast no cause,

    But rather reason thus with reason fetter,

    Love sought is good, but given unsought is better.

Summary

Viola in the disguise of Cesario has come to woo Olivia on behalf of Orsino, who is sick with love for her. Yet Olivia is not open to love due to the grief she feels at the death of a brother. However, this grief seems to fade when she comes into increasing contact with Viola/Cesario. Gradually Olivia falls in love with Cesario, despite the fact that he on a mission to win her affections for another and he is (as Olivia believes) a eunuch. Olivia pushes past Cesario’s scorn and swears her love. Because Olivia woos Cesario, he has no reason to woo her in return. Yet she presents to Cesario the belief that a love that has been sought for is good, but a love that is given freely is even better. It is this better kind of love that she is offering to Cesario.
Analysis of Essential Passages

Love is a constant theme in Shakespearean comedy, especially a love that encounters difficulties. The hurdles that love encounters in _Twelfth Night_ are varied, yielding to many twists and turns until the final resolution, when all marry the person they are somehow destined to marry.

Count Orsino represents love that is unrequited. His devotion to Olivia is rejected, not so much because of the source of the love, but because of the circumstances in which the love is first acknowledged. Orsino, however, also believes that love is pure emotion. As an emotion, it can be controlled, in the case of the opening act by cranking up the level of that emotion until its very weight causes it to fall into a more manageable state. It is a habit that can be overcome. It is delicious treat that can lose its appeal by surfeit. The emotion of love is temporary, so it must be satisfied before it dies away.

Yet in his argument with Viola (who is disguised as Cesario), it is a woman’s love that Orsino stamps as emotional rather than stable. This is indicative of the ephemeral nature of his love, which will become apparent in the final act as he so easily transfers his “undying passion” from Olivia to Viola. The near-anagram state of the two women’s names perhaps indicates that it does not really matter whom one loves, just so long as one loves someone (at least in Orsino’s point of view).

It is Viola, however, who has the clearest understanding of love. Although her love has come quickly to fall upon Orsino, it does not change. In fact, it rises to the level of self-sacrifice, as Viola does not renege in her duty to encourage Olivia to fall in love with Orsino, despite Viola’s own feelings for him. Her steadiness is perhaps not deserved by so vacillating a person as Orsino, but nevertheless she bestows it freely on him.

As Olivia freely gives her love to “Cesario” (and by extension and more appropriately to Sebastian), Olivia also reflects the nature of love. It is love unsought and therefore of a higher value. Like Orsino, Sebastian quickly decides he loves Olivia, with as little thought.

The women in _Twelfth Night_ thus show a more thorough understanding of constant love than do the men. Despite Orsino’s contention that a woman’s love is based on mere passion, it is the women who give their hearts thorough examination. Despite the obstacles, as usual, love conquers all. As the fate of the flawed hero is ruled by destiny in Shakespearean tragedies, so too destiny rules in the matters of love in the comedies.

Quotes

_O spirit of love, how quick and fresh art thou,_  
_That notwithstanding thy capacity_  
_Receiveth as the sea, naught enters there,_  
_Of what validity and pitch so'er,_  
_But falls into abatement and low price_  
_Even in a minute._  
(I.i.9-14)

Orsino's opening meditation on his unrequited love for Olivia encompasses some of the most famous lines and images in the whole Shakespeare canon. The lines also identify the major themes and concerns of _Twelfth Night_. In the lines above, the references to love and to the sea encompass elements that will resound throughout the action of the play. Orsino compares the capacity of love to the capacity of the ocean in its ability to be infinite and overpowering. (cf: Juliet in _Romeo and Juliet_ who also expresses her love in the same terms: "My bounty is as boundless as the sea, / my love as deep. The more I give to thee / the more I have for both are infinite" II.i.175-177.) He goes on to say that love can also be destructive since, like the sea, its
ability to completely consume the mind and heart of a person can eventually destroy them—much as the sea eventually destroys and devalues everything that is washed into it.

So full of shapes is fancy
That it alone is high fantastical.
(I.i.14-15)

The essence of these lines is that love can take many shapes and forms. Not only that, but it can also be highly imaginative in the way it presents itself and consumes the mind and imagination of lovers. The word 'fancy' is often associated with love in Shakespeare, particularly with love that is illusory or deceptive. Orsino's over-romanticised love for Olivia is deceptive in that his love is presented as fancy: he loves with his eyes and only imagines that his love comes from the heart. The notion of fancy, or illusory love sets up the situation for Orsino's journey in the play. He needs to be 'cured' of his imaginative fancies about love and to discover what 'true' love really is.

O when mine eyes did see Olivia first,
Methought she purged the air of pestilence;
(I.i.18-19)

Orsino's declaration of his love for Olivia prepares us for the play's focus on the kaleidoscopic nature of love. Love in Illyria takes many different forms: love at first sight; love versus lust; self-love; self-indulgent love; the love of true friendship; true love. In this quote it is clear that Orsino's love for Olivia is based on his first sighting of her: his love is about seeing rather than feeling. His words also identify love with disease, specifically a pestilence or plague. To the Elizabethans, the word 'pestilence' carried negative and frightening associations since the plague was an ever-present threat to their lives. In this case, Orsino suggests that the very sight of Olivia has the power to cleanse the air around her of disease, but the irony is that Orsino himself has fallen prey to the disease of love.

That instant was I turned into a hart,
And my desires, like fell and cruel hounds,
E'er since pursue me.
(I.i.20-22)

One of the play's many classical allusions, and one that expresses love in violent imagery. Orsino is vividly expressing his frustrated love for Olivia by comparing himself in metaphor to the hunter Actaeon. In Greek legend, Actaeon saw the goddess Artemis bathing naked in a river. In punishment she turned him into a stag whereupon he was pursued by his own hounds and torn to pieces by them. These lines again highlight the destructive abilities of love, particularly of illusory love. Orsino is also continuing the hart/heart pun on Valentine's earlier question as to whether Orsino intends to hunt that day.

And what should I do in Illyria?
My brother, he is in Elysium.
(I.ii.2-3)

Viola believes that her brother has drowned during the storm that wrecked the ship. She asks what is to become of her now that her brother is no longer alive to protect her. Elysium, the classical Greek equivalent to heaven represents a place of peace and eternal joy. The similarity in the sounds of the names seems to link Illyria with Elysium, suggesting a place of security and happiness. The inference is that Illyria will eventually provide the healing that Viola needs after the (apparent) loss of her brother.
There is a fair behaviour in thee, captain
And though that nature with a beauteous wall
Doth oft close in pollution, yet of thee
I well believe thou hast a mind that suits
With this thy fair and outward character.
(I.ii.43-47)

Viola confides her plans for disguising herself as a boy to the Sea-Captain who has saved her from the storm. She comments that although a fair and kindly exterior can sometimes conceal a corrupt soul, she believes that the Captain's nature is as true and loyal as his appearance suggests. This being so she intends to trust him with her secret plan of dressing herself as a boy to protect herself whilst she is in Illyria, and will even ask the Captain's aid in achieving this.

Even so quickly may one catch the plague?
Methinks I feel this youth's perfections
With an invisible and subtle stealth
To creep in at mine eyes.
(I.v.285-288)

As Orsino does in Act I, scene i, Olivia identifies the notion of love at first sight. She declares that 'Cesario's' charms are working on her eyes and she is overwhelmed by what she has seen. Just as Orsino's love for Olivia is presented as 'fancy' or illusory love, so is Olivia's sudden and violent emotion towards Viola-Cesario. Yet this is also a comic moment since as an audience, we know of her vow of seven-year grieving (reported by Valentine in Act I, scene i). With the advent of Viola-Cesario, Olivia's solemn vow towards the memory of her brother is completely overturned in the extravagance of her reactions to this personable young man. It is the moment at which Olivia's character displays the comic edge that remains throughout the play altering our image from than the romantic, tragic figure in mourning that Orsino has described.

Fate, show thy force; ourselves we do not owe.
What is decreed must be; and be this so.
(I.v.300-301)

Olivia's rapturous rhyming couplet after Viola-Cesario's exit at the end of Act I, scene v, identifies another of the play's themes: that of Fate as the ultimate controller of human destiny. Olivia's words are comparable with Viola's invocation to Time to "untangle this, not I." (II.ii.40), when she realises that Olivia "loves me sure" (II.ii.22). In this scene, Olivia places the situation in the hands of Fate because, she argues, humans do not own (ie: control) their own destinies, therefore she will have to wait and see what happens. (cf: Helena in All's Well That Ends Well whose attitude is opposite: Our remedies oft in ourselves do lie / Which we ascribe to heaven. The fated sky / Gives us free scope … " (I.i.212-214). She ends with a variation on the proverbial phrase "what must be will be." This gleeful resolution to let Fate take its course anticipates the comic situation at the end of the play where Olivia does try and take Fate into her own hands by marrying 'Cesario' out-of-hand.

Did you never see the picture of 'we three'?
(II.iii.15-16)

This is a topical reference to the caption of contemporary seventeenth-century 'trick' pictures of two fools or clowns, in which the viewer of the picture then becomes the third 'fool'. An anonymous painting of two fools, possibly the well-known jesters Tom Derry and Archie Armstrong, exists by this title 'WeeThree Logerhds' and it is possible that Shakespeare has something like this painting in mind when he wrote this line. Other versions are known to have existed as inn signs, in which the two 'fools' were depicted as asses, which may
explain Sir Toby's greeting to Feste "Welcome, ass" (II.iii.17).

Dost thou think that because thou art virtuous there shall be no more cakes and ale?
(II.iii.110-111)

Sir Toby is confronting an irate Malvolio who has come to investigate the noise made by the midnight revelry of Sir Toby, Sir Andrew and Feste. The 'cakes and ale' of Sir Toby's speech are a metaphor for the title of the play and also encompasses the idea of Illyria as a place of permanent informality and festivity. Twelfth Night marked the end of the season of Christmas festivity and Yuletide leniency which pervaded the great English houses over the twelve days of Christmas from 25 December to 6 January. During this period normal conventions and behaviour were disregarded and all attention given to merry-making and revelry. Malvolio, who is said to be "a kind of puritan" (II.iii.119) represents the puritanical disapproval of over-eating and drinking—so much so that he is prepared to challenge his employer's uncle on his behaviour. Sir Toby's mocking question is both a challenge to Malvolio's authority and his puritan beliefs. It highlights his scorn and disregard for his niece's steward, and anticipates the 'revenge' he takes on Malvolio later in the play when he has him imprisoned in the dark house.

Why, thou hast put him in such a dream that when the image of it leaves him, he must run mad.
(II.v.186-188)

The image of love wavering closely between dreaming and madness is another of the play's motifs. Maria is referring to the 'dream' that Malvolio is experiencing of Olivia being in love with him through the trick played by Sir Toby, Sir Andrew and Fabian. She suggests that once Malvolio realises it is a trick and that Olivia is not in love with him, the knowledge will drive him mad. Compare these lines with Sebastian's lines in Act IV, scene i and his soliloquy at the beginning of Act IV, scene iii. Olivia has declared that she is in love with him, and he has never seen her before. In IV.i he initially decides that "this is a dream / … If it be thus to dream, still let me sleep" (IV.i.60-62). The dreamlike state continues and in IV.iii he is desperately trying to seek some kind of explanation for the situation he finds himself in. He tries to convince himself that "'tis not madness" (IV.iii.4), and "this may be some error but no madness" (IV.iii.10), but is finally forced to conclude "that I am mad, / Or else the lady's mad" (IV.iii.15-16). Sebastian's 'dream' is temporary in that the apparent madness is dispelled when the identity of the twins is finally revealed and he can claim Olivia as his wife. However Malvolio's experience in the dark house turns his 'dream' into a living nightmare in which his protestations of sanity are ignored and he is humiliated and humbled.

Have you not set mine honour at the stake
And baited it with all th'unmuzzled thoughts
That tyrannous heart can think?
(III.i.116-118)

Another example of the violent intensity of love. Olivia is referring to the Elizabethan sport of bear-baiting in which a bear was tethered to a stake and is baited by dogs which eventually tore it to pieces. Olivia's metaphor suggests that she is the bear, and her love for Cesario resembles the unmuzzled dogs that tear at the bear's flesh. This violent image is similar to the one Orsino uses at the beginning of the play in which he compares himself to Actaeon being torn apart by dogs.

Come, we'll have him in a dark room and bound. My niece is already in the belief that he's mad.
(III.iv.130-1)
Sir Toby's injunction continues the motif of madness, but introduces a darker and more troublesome side to the play. Whilst love can induce a kind of madness that can create the kind of melancholy suffered by Orsino, Sir Toby is refers here to mental insanity. The common cure for insanity during this period was to imprison the patient in a dark room in the belief that the darkness would drive out the evil spirits from the patient's body. This cruel and often violent practice that continued for many years. Sir Toby's proposal to subject Malvolio to this 'cure' when he knows that the madness is not real indicates a dark side to Sir Toby's character. (cf: Dr. Pinch's proposed treatment for Antipholus and Dromio of Ephesus in *The Comedy of Errors*: "They must be bound and laid in some dark room" IV.iv.95).

Nothing that is so, is so.
(IV.i.8)

This line, more than any other perhaps, encompasses one of the dominant themes of *Twelfth Night*, that of deceptive appearances. Within the world of the play almost everything is deceptive: appearances, love, even death. Feste is speaking this line to Sebastian, whom he believes to be Cesario. Yet Cesario is not who he 'seems' to be either. The play is dominated by a man who 'seems' to be in love with a woman who does not return his love, and this woman herself is in love with a woman who 'seems' to be a man. Viola's brother 'seems' to be drowned, and Sebastian believes his sister to have died during the shipwreck. These images of deceptive reality also capture the mercurial spirit of the world of Illyria. Shakespeare has endowed Illyria with a kind of magical quality that allows these inversions of normal behaviour and situations. It is only in Illyria that the festival of Twelfth Night can be carried on permanently by Sir Toby and his associates; only in Illyria in which girls can masquerade as boys; only in Illyria where dead siblings can be resurrected. Illyria 'seems' like a real place with a sea-coast, storms and ruling dukes, but it too is not as it seems to be. It is a make-believe world of illusion and fantasy comparable with Shakespeare's other 'created', 'magical' worlds: the forest of Arden in *As You Like It*, and Ephesus in *The Comedy of Errors*.

Feste's line reminds Malvolio of the incident in Act I, scene v in which Malvolio dismisses the wit of the fool. Clearly, Feste has nursed a grudge against the steward for his condescending rebuke, and the 'jest' against Malvolio in the dark house has been by way of Feste's revenge. The 'whirligig of time' becomes the explanation as to why Malvolio has been treated the way he has. The wheel has come full circle and Feste's remark seems to indicate that through the Sir Topas jest he and Malvolio are now square and the 'feud' between them can end. Malvolio however does not see it this way and seems set to continue the feud, which casts a damper of reality over the closing moments of the play. In the theatre, these lines have been played in countless different ways—particularly with regard to Malvolio's final line and exit. Malvolio's threat could be directly addressed to the perpetrators of the 'joke'—Maria, Sir Toby and Fabian, or more specifically at Feste with whom he seems to have a running antagonism. Maria describes Malvolio as a "kind of Puritan" (II.iii.135), and it has also been suggested that this line anticipates the Puritan control of England forty years later during which the theatres were closed and 'Twelfth Night' revels were ended.
